The copy filmed here has been reproduced thanks to the generosity of:

Library of the Public
Archives of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol ➔ (meaning "CONTINUED"), or the symbol ▼ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

La bibliothèque des Archives
publiques du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole ➔ signifie "A SUIVRE", le symbole ▼ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

PREFACE.

THE Proprietor, in presenting to his Patrons the MONTREAL ALMANACK for 1831, deems it unnecessary to enter into any explanations of the exertions he has used to insure its correctness—to increase its value—and to render it a useful companion to the counting-house and office. By comparing it with that of last year, several alterations will be perceptible, and it is the intention of the Proprietor so to diversify each succeeding number, that they will form a valuable book of reference in the library of a man of business.

The Editor deems it necessary to state, that with a view of obtaining, with certainty, the various lists, applications have been made to the different Departments, who have always furnished the information required, and thus enabled the Editor to publish with greater certainty than if merely dependant upon private information. To the Provincial Secretary he has again to return his sincere thanks for the accommodation and facility with which he was permitted to copy the dates of the Commissions granted since last year—a plan which it is intended shall be continued in succeeding volumes.

A vast quantity of very useful information will be found in the Appendix—a portion of the work which it is intended to enrich each year with statistical tables of value and rarity, and to which reference is usually made.

Changes and alterations have occurred, of course, during the publication of the work, but these are noticed under the head of "Errata and Alterations while Printing."

Gentlemen appointed as Physicians and Surgeons, Notaries, Surveyors, &c. are requested to furnish the Editor with their places of residence, as it is these classes which he finds it most difficult to have correct.

In conclusion, it may be necessary to say that the arrangement of the different officers or public bodies in this publication, though as perfect as circumstances will permit, cannot in any wise affect any precedence, to which either of them respectively may be entitled.

Among the improvements intended for next year's ALMANACK, is that of the succession of public officers of the Colony since the present Constitution, stating the time at which each incumbent entered upon the functions of his office.

7 at near one in the morning.	19 — about — 11
15, at full, it rises about 6 in the evening.	20 — about — 12

N. B.—This table is sufficiently accurate for the purpose for which it is wanted—that of ascertaining moonlight evenings.

OF THE CHANGES OF THE MOON.

Many persons, understanding that the mean time between one new Moon and another is 29 days, 12 hours, 44 minutes and a fraction, imagine that, to find the full or quarters of the Moon, they have only to add a half or fourth part of that time ; and when they do not find the changes marked in the Calendar to correspond with this method, they impute it to mistake in the calculation of those changes. It is therefore necessary to put them in mind, that the great inequality of the Moon's motions renders the above rule extremely inaccurate, so that nineteen times in twenty it must fail in giving the true conjunction or change.

ECLIPSES OF THE SUN AND MOON FOR 1831.

There will be this year four eclipses, two of the Sun, and two of the Moon ; of these one of the eclipses of the Sun will be visible, and one of the Moon partly so.

1. The first is of the Sun, Feb. 12th, and visible as follows :—

Beginning.....	11h. 19m. A. M.	} <i>apparent time.</i>

Goods, Wares or Merchandise, (being foreign) not otherwise charged with duty, by 6 Geo. IV. cap. 114.

Ships, Foreign. (7)

These several duties are payable under the Acts of the Imperial Parliament of 4 Geo. III. cap. 15, sec. 1—6 Geo. III. cap. 52, sec. 4—14 Geo. III. cap. 88, sec. 1—3 Geo. IV. cap. 119, sec. 8—6 Geo. IV. cap. 114, sec. 9—7 Geo. IV. cap. 48, sec. 44—and 7 and 8 Geo. IV. cap. 56, sec. 29—and under the Acts of the Provincial Legislature of 33 Geo. III. cap. 8—35 Geo. III. cap. 9—41 Geo. III. cap. 14—53 Geo. III. cap. 11, amended by 55 Geo. III. cap. 2, and 55 Geo. III. cap. 3, rendered permanent by 3 Geo. IV. cap. 119, sec. 23.

(1) This further duty is only charged when its amount, if any, shall exceed the amount of the previous duties, in which case the excess is payable, 5 Geo. IV. cap. 114, sec. 11, but this is not likely to occur, except with very high priced articles, it may therefore be rendered as merely nominal.

(2) This further duty will in every case exceed the previous duty, the excess will therefore be charged, the amount payable cannot, however, be shewn by Table, as it will vary in every case according to the value of the article.

(3) Molasses if imported in a vessel not belonging to the United Kingdom or to Quebec, the duty will be 7d. sterling instead of 4d.

(4) This duty is drawn back if the Salt be shipped for the use of the Fisheries in the lower parts of the Province.

(5) See the exception in the "Table of Free Goods."

(6) Upon such of these goods as are liable to the Provincial duty of 2½ per cent. that duty is payable under the Provincial law, but its amount is deducted from the payment made under the 6 Geo. IV. cap. 114.

(7) A Tonnage duty of 4s. 2d. sterling per ton upon the ships, and 10 per cent. upon the amount of duties on the goods imported, is chargeable by order in Council, under certain conditions which at present only apply to the ships of the United States.

TABLE OF FREE GOODS.

NOTE—All imported goods when re-exported, the date of importation and the name of the importing ship to be given, and if liable to duty on importation, the payment of the duty to be stated.

With Foreign Countries or States.

British Ships may import from any Foreign possessions any goods not included in the "Table of Prohibitions," and they may export goods to the said Foreign possessions.

Foreign Ships—no goods shall be imported into any British possession in America in any Foreign ships, unless they be ships of the country of which such goods are the produce, and from which the goods are imported, 6 Geo. IV. cap. 109, sec. 11.

No ship shall be admitted to be a ship of any particular country, unless she be of the build of such country, or have been forfeited to such country under any law of the same, made for the prevention of the Slave Trade, and condemned as such prize or forfeiture, by a competent Court of such country, or be British built, (not having been a prize of war from British subjects to any other foreign country,) nor unless she be navigated by a Master who is a subject of such foreign country, and by a crew of whom three-fourths at least are subjects of such country usually residing therein, or under the dominion thereof; Pro-

vided always, that the country of every ship shall be deemed to include all places which are under the same dominion as the place to which such ship belongs, 6 Geo. IV. cap. 109, sec. 15. The permission granted to Foreign ships to import and export goods is made subject to certain conditions, 6 Geo. IV. cap. 114, sec. 4. And these conditions are by an order of His Majesty in Council, dated July 16, 1827, (which enumerates and confirms certain previous orders in Council,) declared to be that

French ships may import from the dominions of His Most Christian Majesty, the following goods, such goods being the produce of those dominions, that is to say, Wheat, Flour, Biscuit, Bread, Meal, Pease, Beans, Rye, Calavances, Oats, Barley, Indian Corn, Rice, Shingles, Red Oak Staves or Headings, White Oak Staves or Headings, Wood, Lumber, Wood Hoops, Live Stock, Hay and Straw, Coin and Bullion, Diamonds, Salt, Fruit and Vegetables, fresh, Cotton, Wool, and all articles subject on importation to an *ad valorem*, on which articles the amount of such duty should not at the time of importation exceed £7 10s. for every £100 of the value of the same, (but the importation of Wine and Brandy in French ships is not permitted,) and may export goods to any Foreign country whatever.

Ships of the Dominions of

His Majesty the King of Prussia,

His Majesty the Emperor of all the Russias,

His Majesty the Emperor of Austria, (order in Council April 7, 1830.)

His Majesty as King of Hanover,

His Majesty the King of Sweden and Norway,

His Serene Highness the Duke of Oldenburgh,

The Republics of Lubeck, Bremen and Hamburg,

The United States of America,

The State of Colombia,

The United Provinces of Rio-de-la-Plata, and

The United States of Mexico, may respectively import from such of the Dominions to which they respectively belong, goods the produce of such Dominions respectively, except those mentioned in the "Table of Prohibitions," and may export goods to be carried to any foreign country whatever.

All manufactured goods are deemed to be the produce of the country of which they are the manufacture, 6 Geo. IV. cap. 100, sec. 5.

British Coals are prohibited to be exported to any foreign place, 6 Geo. IV. cap. 114, sec. 85.

NOTE.—There is no drawback whatever on any goods exported, except on Salt for the use of the Fisheries within the limits of the Province, and on

Salted Salmon, per tierce, 7d.

Salted Beef or Pork, per barrel, 4d.

Salted Fish of any kind, per barrel, 4d.

Exported beyond the limits of the Province.

REGULATIONS AFFECTING COMMANDERS OF VESSELS.

IMPOSED BY PROVINCIAL ENACTMENTS, OR BYE-LAWS OF TRINITY HOUSE

By the Provincial Act 47 Geo. III. cap. 10. all Masters of vessels must pay into the hands of the Naval Officer at Quebec, 2s. 6d. per foot of water their ships draw coming up, and the same amount for what she may draw going down. If the vessel proceeds to Three-Rivers, or higher up the River, and is from 100

to 150 tons admeasurement, they must pay into the hands of the said Officer the sum of £2, if from 150 to 200 tons £3, and if from 200 to 250 tons £5, over and above the aforesaid 2s. 6d. per foot water, for the purposes mentioned in the Act.

Masters of vessels, who shall harbour or conceal a deserter from one of His Majesty's or any other ship, shall be liable to a penalty of not less than £20, and not exceeding £50. The Harbour Master to keep blank discharges to be filled up and given to each commander of a ship, who may apply for them for each seaman they discharge, signed by the Harbour Master, to distinguish men regularly discharged from deserters.

Masters of vessels, on arriving, must sign the Harbour Master's report, under a penalty of £5, in case of refusal.

All vessels arriving at Quebec must be heaved to, or brought to anchor as the case may be, until the Harbour Master's boat shall board them, under a penalty of £10. All Masters of vessels, arriving in the night, must hoist their colours the next morning, and keep them flying until boarded by the Harbour Master, under a penalty of £10. The Harbour Master's boat will always have a union-jack flying abaft as her distinguishing mark.

By a Provincial Act (17 Geo. III. cap. 14, sec. 3.) no Master of a vessel leaving the Province shall carry any person whatever (except the crew brought with him at his last arrival,) without having a pass signed by the Secretary of the Province, under the penalty of being liable to pay the creditors of such persons all the debts he may have contracted in the Province.

Masters of vessels, on their arrival, to report their ships at the Custom House. If any foreigners are on board, their names and occupations to be specified, under a penalty of £10, and until this is paid, the Collector may detain the vessel. Aliens to report themselves in writing to the Collector of Customs, giving their name and occupation, with the country they have resided in for the last six months.

No Commander of a vessel shall throw any ballast into the River except on the south shore, opposite to the Ance des Meres, near Quebec, as near the shore as the water will permit, under a penalty of £10.

No vessel in ballast shall be brought to anchor in any other part of the harbour of Quebec, than that appointed for the discharging of ballast, under a penalty of £10, to be paid over and above the penalty Masters are liable to for throwing out ballast, in any other part of the River, other than that appointed for the purpose.

The regulations respecting the landing of gunpowder, those to be observed by ships at anchor in the stream, at the wharves, and at the Cul de Sac, and with respect to fires on board vessels when lying at the two last mentioned places, with those relating to the duty of Pilots, are not here given, as Masters of vessels will find them at full length in a pamphlet containing extracts from the laws of Lower Canada, and the bye-laws and regulations of the Trinity House, with a copy of which the Harbour Master is obliged by law to furnish them, and for which he is allowed to charge 7s. 6d.

REGULATIONS OF THE PORT OF MONTREAL,**AS ESTABLISHED BY THE BYE-LAWS OF THE TRINITY HOUSE.**

That part of the Port of Montreal, situate between the mouth of the Lachine Canal at Grey Nuns street, and the shoal below the gate, commonly known by the name of Madame Duffy's gate, at the foot of St. Joseph street, is appropriated for the loading or unloading of vessels, and no cargo, or any part of a cargo, (gunpowder excepted which is specially provided for by law,) shall be receivable or deliverable elsewhere, unless by special agreement between the Master of the vessel and the receiver of the property, in which case it may be delivered in such part of the harbour as may be agreed upon.

No scow or raft, loaded or unloaded, shall be anchored or secured on shore, within the above limits, under a penalty of £2, and a further penalty of £1 for every period of twenty-four hours they shall so remain; this regulation not to prevent any scow or raft from being secured along-side any vessel, lying within the limits before described, for the purpose of loading or unloading such vessels.

All rafts and scows in the harbour of Montreal shall be arranged in such manner as the Harbour Master shall direct, and any person refusing to obey such order shall incur a penalty of £1.

Vessels in the harbour shall also be arranged as the Harbour Master shall direct, under a penalty of £10 against the Master of such vessel as shall refuse to comply with his orders.

Any Commander of a vessel, or any person whatever, who shall throw into any navigable part of the harbour, or on the beach, any ballast, coals, oyster-shells, or any thing whatsoever, by which the harbour may be injured, or the navigation impeded or rendered difficult and dangerous, shall incur a penalty of not less than £2, and not exceeding £10, and any person so offending, who being required by the Harbour Master to remove such obstruction, neglects or refuses to do so for the space of forty-eight hours, shall incur a further penalty of £5 for each and every such neglect.

Vessels may load and unload over the decks of each other respectively, when necessary in the opinion of the Harbour Master, and any Master of a vessel, refusing permission for this purpose, shall incur a penalty not exceeding £10 for each and every such refusal.

Any Commander of a vessel, or any other person, who shall boil or heat, or cause to be boiled or heated, tar, pitch, turpentine, rosin or grease, for the purpose of graving or breaming vessels, at a less distance than twenty feet from their respective vessels, or from other ships, buildings, or wharves, shall incur a penalty of £10 for each offence; and a like penalty, if a proper person does not attend the same, to extinguish the fire when necessary; and when a vessel is to be graved or breamed, the Master must apply to the Harbour Master for authority to perform the same, under a penalty of £10.

The shore fastenings of vessels, &c. to be so placed as not to interrupt the passage of carts, &c. along the beach or any of the wharves, under a penalty not exceeding £2.

Any person, who shall place or pile on the beach any timber, lumber, water casks, boats, stones, or rubbish of any kind, shall remove the same at his expense, as soon as ordered by the Harbour Master, and should this order not be obeyed in twenty-four hours, the person so offending shall incur a penalty of £2, and a like penalty for every twenty-four hours after, until the removal of such obstruction, it being provided that this shall not extend to cargoes lying on the beach lately unloaded, or to be immediately loaded on board such vessel.

Any person, who shall by accident carry away any buoy or mark, in the harbour or on the beach, placed there by order of the Trinity House, shall replace the same at his expense within forty-eight hours, under a penalty not exceeding £5.

All vessels whether river craft or from sea, on arriving, whether loaded fully or in part, shall be at liberty to take such births, as are not occupied by other vessels, and shall be allowed to retain such birth for such time as may be deemed sufficient by two members of the Trinity Board, and shall be at liberty to remain there for the purpose of reloading, if their cargoes are in readiness, which time for unloading and reloading, if it is a vessel from sea, shall be in proportion to the tonnage, and if a river craft shall not exceed in either case four working days, and the Master of any vessel or craft refusing to give up his birth, after being ordered by the Harbour Master to do so, shall incur a penalty of £5 for every such refusal, and a like penalty for every day he shall remain in the birth from which he has been so ordered.

Vessels loading lumber from the water, or from cribs and rafts, shall take an outside birth, if thereunto required by the Harbour Master, to make way for other vessels, under a penalty against the Master of £5, and a similar amount for every day he shall remain in the birth from which he has been ordered.

All rafts and scows, descending the St. Lawrence, are required to pass outside the Little or Market Island, and the owner of any raft or scow, that shall pass between the Island and the Town, shall forfeit a penalty of £10.

And for the protection of the works now making in the harbour of Montreal, it is enacted that any person injuring the said works by negligent navigation, or any other cause, or who shall cause any obstruction to the progress of the same, shall pay a penalty not exceeding £10.

LIGHT HOUSE ON GREEN ISLAND.

The Lantern of the Light-House on Green Island in the River St. Lawrence shows a Light every evening, from sun set to sun rise the next morning, from the 15th April to the 10th Decemr.

ber, inclusive, and the following are the bearings of it, by Compass, from the respective places, hereunder mentioned, viz :—

Red Island.....	E. S. E. $\frac{1}{2}$ S.
White Island.	E. N. E. $\frac{1}{2}$ E.
Brandy Pots.....	N. E. by E. $\frac{1}{2}$ E.
Apple Island.....	W. S. W.
Basque Island.....	W. S. W. $\frac{1}{2}$ S.
The Shoal at the N. E. end of Green Island, S. W. $\frac{1}{2}$ S.	
The Shoal at the West end of Green Island, N. E. $\frac{1}{2}$ E.	

LIGHT HOUSE AT POINTE DES MONTs.

The Lantern of the Light-House on Pointe des Monts (or Cape Mont-Pelé) on the north side of the River St. Lawrence, nearly opposite to Cape Chat, stands one hundred feet above the water.

The Light House lays with the outermost part of Carribou Point, N. 52° East and S. 52° West, by compass, and can be seen over that point, and to the Eastward of it.

Ships approaching the light from the Eastward, as they draw towards Carribou Point, must bring it to bear W. by S. they will then be in a good fair way, and if necessary they can near the land by their lead.

After passing Carribou Point, and as they draw towards the Light-House they must come no nearer than twelve fathoms water to avoid two ledges of rocks:—one of which lays E. S. E. from the Light-House, with only twelve feet water on it; the other lays S. W. from the Light-House, and E. S. E. from the Western extremity of Pointe des Monts, with sixteen feet water on it; but these rocks do not lay further from the shore than half a mile at low water.

The Light-House lays with the Western extremity of Pointe des Monts N. 64° East, and S. 64° West, and distant about one mile; and when ships are to the Westward of the Point the Light-House is in one with the outermost rocks off the Point—and in the day time it forms a bold distinct land mark—and on this line of bearing ships are in the best possible fair way for the general purposes of navigation, whether bound up or down.

For any particular purpose of navigation, ships may safely stand to the northward, until the light bears E. by N.; they will then be drawing near the North land; and when it bears E. $\frac{1}{2}$ N. it is time to tack; for when it bears East it will shut in with the high land and cannot be seen to the Southward of East, and then they will be only one mile from the land, and if they are off Godbout River, Pointe des Monts will bear from them E. by S. two leagues distant.

When ships are off Saint Nicolas harbour, and the light bearing E. by N. they are in a good fair way from the North land. The S. E. spitt of Manicougan great shoal, the ship and the Light-House are then all in one line of bearing.

PROVISION POSTS ON ANTICOSTI.

On the outermost extremity of the west end of Anticosti stands a Direction Board. From this board to the house of Gannache, where there is a Depot of provisions, at the upper part of Grand Bay, by crossing the Isthmus formed by Point Henry, the distance is six miles; but from this board round Point Henry, and up the Bay to the house, it is double the distance.

Six leagues to the eastward of Grand Bay is Duck River, at the mouth of which, on the east side, stands the Direction Board.

Four leagues to the eastward of Duck River is Otter River: close to its entrance stands the Direction Board.

Four leagues to the eastward of Otter River is Seal River, on the east side of which is a Direction Board, nailed to the house used only in summer by Gannache's salmon and seal fishers; at this house there are no provisions.

Two leagues from the River is the S. W. point of the Island—on both the extreme east and west ends of which stands a Direction Board, about one mile from each other, and about one mile from the easternmost, stands another Direction Board, in the Bay, to the eastward of the Point.

Seven leagues to the eastward of the S. W. point is Heath River, on the east side of its entrance stands the Direction Board.

Three leagues to the eastward of Heath River is Pavilion or Flag River, and two miles to the eastward of it stands the Direction Board, on a point on the east side of the Bay.

Six leagues to the eastward of Flag River is Hammel's Post, at Jupiter River, where there is a Depot of provisions.

Seven leagues to the eastward of Mr. Hanimel, and on the south side of the east end of the Island is a Direction Board, and on the north side of the east end is another Direction Board.

Four leagues from this Board, on the north side of the Island, is the Post of Bell, kept by Mr. Godin.

It may be remarked that all these Rivers are merely Creeks, there not being water in any of them for a Boat at low water, except Jupiter River at Hamel's Post.

VARIATIONS OF THE COMPASS

IN THE GULF OF ST. LAWRENCE.

It appears from the observations of Capt. Bayfield, R. N. that the variations of the Compass are erroneously laid down in almost all the Charts actually in use. At the time the Charts of Major Holland and Admiral Saunders were constructed, the variations as laid down might have been correct, but they have since materially altered, and there can be little doubt of many vessels having been thrown ashore, by errors arising from this source. For example, a vessel off Pointe des Monts shapes her course to pass to the southward of Anticosti. Consulting any of the Charts now in use, the Master finds the variation marked $7\frac{1}{2}$ degrees; whilst it is in reality $23\frac{1}{2}$. He therefore steers too far to the northward by more than half a point of the Compass; and if the night should be dark, and the weather bad, stands a great chance of running on the Island. The same error, in the case of ships bound to Quebec, causes them to pursue a course too far to the southward; and hence many of them run on the south Coast. It is conceived, therefore, that the following statements of the variation, sufficiently exact for the purposes of navigation, will prove valuable to Masters of vessels navigating the St. Lawrence.

Brandy Pots.....	16 $\frac{1}{2}$ degrees West.

APPENDIX.

PRINCIPAL PUBLIC EVENTS IN CANADA, FROM THE DISCOVERY OF AMERICA TO 1828.

1492.—Christivallo Colon, or Christopher Columbus, a Genoese, under the patronage of Isabella of Spain, set sail from Palos, with three vessels and ninety men, on the 3d August. On the 11th October he discovered St. Salvador, one of the Bahama Islands.

1497.—John and Sebastian Cabota, Italians in the service of Henry VII. of England, discovered Newfoundland, and coasted along the continent to 67° 50' N. latitude. He entered, and explored some part of the Gulph of St. Lawrence, but did not take formal possession.

1506.—Jeu Denys of Harfleur drew a map of the Gulf and adjacent coast.

1508.—Thomas Aubert made a voyage from Dieppe to Newfoundland and sailed up the St. Lawrence.

1517.—The banks of Newfoundland were visited by at least fifty Spanish, Portuguese, French and other European ships.

1522.—Verazani, an Italian, in the service of Francis I. of France, discovered a great portion of the American continent, took formal possession in the name of his sovereign, and gave it the name of *Nouvelle France*.

1535.—Jacques Cartier, of St. Malo, discovered the river of Canada, now St. Lawrence. He sailed up the river for 300 leagues, formed alliances with the natives, took possession of the territory, built a fort, and wintered in the country. He visited Hochelaga which he named *Mont Royal*. He returned to France in 1536, with Donnacona, a chief of the natives, and was coolly received, as he brought no gold nor silver.

1540.—François de la Roque, Lord of Roberval, Viceroy of Canada, sent out Cartier to Canada with five ships, and individuals to commence the colonization of some portion of the banks of the St. Lawrence. Cartier returned to France in the fall and died in 1543, broken hearted.

1542.—Roberval came himself this year to Canada, built a fort, and wintered four leagues above the Isle of Orleans.

1549.—Roberval, his brothers, and a long train of adventurers sailed from France for Canada, but were never heard of. This so discouraged the French Government and people, that fifty years elapsed without any measures being taken to settle Canada.

1591.—The trade with Canada began to be renewed, which had been interrupted by Cartier's conduct to the natives in 1535.

1583.—Three ships, one of which averaged 150 tons, were employed in the Canada Trade.

1591.—The Walrus common in the Gulf of St. Lawrence; a fleet of ships fitted out from St. Malo for Canada to engage in the killing of those animals, whose teeth sold dearer than ivory.

1598.—Marquis de la Roche was appointed by Henry IV. Viceroy of Canada. His commission authorized him to grant lands en fief et seigneurie, as rewards for military service. He landed his settlers on Sable Island, and proceeded on his voyage of discovery, but he was unable to return and withdraw the individuals he had there left. Of these, twelve only survived when visited in 1605. La Roche died shortly afterwards of vexation and remorse.

1600.—The patent of the Marquis was renewed in favor of M. de Chauvin, who visited Tadoussac, and returned with a valuable cargo of furs. The next year he visited Three Rivers.

1603.—Pierre de Monts succeeded Chauvin on his death, and received a patent of the territory included between 40° and 45° whereby he was constituted Lieutenant General, with power to colonise and convert the natives to Christianity. Samuel de Champlain, and M. de Chatte, Governor of Dieppe, were his principal associates. Champlain visited Tadoussac this year, Demonts devoting his attention to Nova Scotia.

1607.—The patent enjoyed by Demonts revoked, and then renewed on condition of forming settlements. The patentees found it, however, more advantageous to carry on trade with the Indians, and in consequence the Acadian colony was neglected, and the contemplated Canadian one delayed.

1608.—Champlain persevered in his efforts to found a settlement, and succeeded this year in commencing the city of Quebec.

1611.—Champlain visited France, having already been engaged in two successful expeditions against the Indians, and was there detained in great suspense as to his future situation or relation to the colony.

1613.—Champlain returned to Quebec under the patronage of the Prince de Condé, and visited the Ottawa.

1614.—The affairs of Canada were transferred to a company of merchants in Rouen, St. Malo and Rochelle, who had induced Champlain to consent to their participation in the supposed advantages of the Canada trade.

1615.—Champlain entered into an expedition against the Indians, and was detained a winter among them.

1620.—The Prince de Condé transferred his commission to the Marshal de Montmorenci.

1621.—The Iroquois began their system of extermination, and carried on the most sanguinary and destructive warfare in the history of the world. A mission was sent to France to represent the defenceless state of the colony. The patent was transferred to William and Emeric de Caen.

1622.—The population of Quebec, though established fourteen years, amounted to only fifty souls.

1623.—This and the three succeeding years were consumed in preventing alliances among the Indians—the proselytizing of some tribes by the Jesuits—the transferring of the Viceroyalty of Canada from the Marquis de Montmorency to his nephew the Duke of Ventadour.

1627.—At the instance of Champlain, the patent enjoyed by de Caen, who devoted himself solely to the fur trade and his own personal advantage, was revoked, and the colony placed in the hands of a company of 100 associates, organized under the direction of the celebrated Cardinal Richelieu.

1628.—War being then existent between England and France, Charles I. of England granted authority to David Kirk, and his kinsmen, to conquer the French dominions in America. Kirk appeared before Quebec, after having captured the fleet destined for the place, and ordered it to surrender. Not having the means to enforce a surrender, he retired.

1629.—Louis and Thomas Kirk, brothers of David, appeared before Quebec, the inhabitants of which having been again deprived by the capture of another fleet for Quebec by Kirk, of their supplies, and threatened with an invasion from the Indians, and starvation within the garrison, gladly surrendered to the British arms, 130 years before the memorable conquest by Wolfe.—The capitulation was so honorably fulfilled that the majority of the inhabitants preferred remaining with the captors. Champlain and most of the Jesuits returned under free passes to France.

1632.—Charles I. by the treaty of St. Germain-en-laye, resigned to Louis XIII. of France, all his title to Canada and Nova Scotia, then so little valuable as an appendage to the English crown. From this year is dated the commencement of a train of events which led to the loss of Canada to the French Government, and of the American Colonies to Great Britain. Champlain returned to Quebec as Viceroy with extension of his powers, and a large accession of settlers.

1635.—A college founded at Quebec by René Rohault, a Jesuit. Champlain died this year universally regretted, celebrated alike as a historian, traveller, author, mathematician, or seaman. He was succeeded by M. Montmagny.

1639.—The Ursuline Convent at Quebec founded by Madame de Peltrie. The Hotel Dieu at Sillery founded the preceding year.

1642.—The Island of Montreal vested in Mr. Maisonneuve and thirty-four associates in 1640, and of which he was declared Governor in 1641, was this year taken possession of, by him and several families, with many religious ceremonies.

1644.—The island was transferred to the religious order of St. Sulpice in Paris.

1647.—Mr. Montmagny, under whose government the colony advanced languidly, was recalled and succeeded by Mr. D'Aillebout. The latter proposed to the English Colonies an alliance against the Indians which was by them rejected, as it required them to make enemies of their allies, the Mohawks.

1648.—The Colonies of New England proposed to the Governor and Council of Canada perpetual peace between the colonists, even when the parent states were at war. This proposal was unattended with success.

1649.—The Huron village of St. Ignatius, of 400 persons, was attacked by 1000 Iroquois, and the inhabitants massacred.

1654.—The Iroquois this year exterminated the Erie Indians.

1658.—D'Aillebout was succeeded by Mr. Lauzon in 1650, by the Marquis D'Argenson, and this year by the Baron D'Avengour, all of whom were severally censured for the unfavorable reports of the state of the colony, which they transmitted to the Company.

1660.—Francis de Laval, Abbot of Monsigny, was appointed Bishop of Canada, came over and brought with him a body of clergy for the settlement.

1663.—The Baron D'Avengour had sufficient influence with the King of France to have his report relative to the state of Canada attended to. His Majesty in consequence determined upon resuming his rights and erecting Canada into a royal government. The 100 associates, tired of maintaining the country at a great expense, had retired from the fur trade, and now reduced to forty-five members, willingly made a total resignation of their rights to the Sovereign, who thereupon appointed Monsieur de Mesy the first Royal Governor of New France. A dreadful earthquake is mentioned by the Jesuit historians to have occurred in February of this year, throughout all Canada, particularly below Quebec, but we are unaware whether geological evidence or traditionary lore will bear out the reverend writers in their statements. During the course of the year Mr. de Mesy arrived at Quebec and put in execution a Royal Edict, which nominated a Sovereign Council for the Government of Canada. This Council consisted of seven members, of which were the Governor, the Bishop, and the Intendant. The powers conferred on this body extended to the cognisance of all causes civil and criminal, to judge definitely according to the laws and ordinances of France, and the practice of the Parliament of Paris. To this was added other powers of such a nature as to render the institution of the Council an era in the History of Canada.

1664.—Canada was transferred to the West India Company, who by Louis the Fourteenth were put in possession of all the territory then owned abroad by the French King. The grant did not give much satisfaction to the inhabitants of Canada, who made complaints to the Company.

1665.—Mr. de Mesy was succeeded by Mr. de Courcelles.

1666.—Mr. de Tracy, the Governor General of the territories

of the West India Company, visited Canada, built three forts on the Chambly river, and made a successful incursion into the territory of the Mohawks. This year the complaints of the Colonists against the monopoly enjoyed by the Company were appeased by an edict, granting to the inhabitants the trade in furs, subject to the payment of one-fourth of all beaver. This did not, however, prevent a very extensive smuggling trade.

1667.—The West India Company were confirmed this year by the Governor General in all rights and privileges formerly held by the Company of one hundred associates.

1668.—Mr. de Talon, to encourage colonization, induced the French government to disband within the country the Carignan Regiment, and to ship from France about 300 women of loose character, who were, in less than fifteen days, disposed of among the inhabitants, to whom, on marriage, considerable presents were made. Pensions were also granted to all individuals who had ten children lawfully begotten.

1671.—The see of Quebec was this year established, dependant on the see of Rome. Concessions of land were also reduced to one half of their original extent.

1672.—M. de Courcelles, built a fort near the modern Kingston, for the purpose of bridling the Iroquois, pretending it to be only a place of trade. This gentleman was this year superseded by the Count Frontenac.

1673.—The Count completed the fort on Lake Ontario, which hereafter was known by his name. The River Mississippi was this year explored by order of the Government of Canada.

1674.—The charter of the West India Company was revoked by an edict of the French King.

1675.—The Sovereign Council was this year increased to nine members and its powers extended.

1679.—An edict in Council prohibited the imprisonment of any French subject except by order of the Governor General or Sovereign Council.

1682.—The Count Frontenac was recalled, and Mr. de la Barre appointed Governor, with instructions to cultivate an intercourse with the French West Indies.

1684.—Mr. de la Barre made an unsuccessful inroad into the territories of the Five Nations, with the natives of whom he entered into a treaty, and de la Barre with his whole army returned to Montreal.

1685.—The population of Canada amounted to 10,000, of which 3000 were capable of bearing arms.

1687.—The dangerous rivalry which had arisen between the inhabitants of the British and French Colonies, by the erection of numerous forts by the latter, and cherishing the hostilities of the Five Nations to the French by the former, received the interference of James II. of England.

1688.—The Five Nations excited by the Fox, one of their powerful leaders, attacked the French settlement at Montreal, killing 1000 of its inhabitants and committing horrible cruelties.

1690.—The Count Frontenac, who had returned from France last year with forces to carry the war into the English Provinces, was unable to effect his purpose till this year, when he attacked Schenectady and massacred its inhabitants. The alarm which this last affair had on the minds of the inhabitants of the British Colonies, induced them to enter into co-operative measures and decide upon an expedition to Canada. Sir W. Phipps, who was sent from Boston for that purpose, did not arrive before Quebec, till Count Frontenac had sufficiently prepared for defence, and his order to surrender was soon followed by his own departure from the St. Lawrence.

1693.—Frontenac entered the territory of the Iroquois and commenced a warfare which continued for several years, and so weakened that nation, that they were never afterwards able to make any impression upon Canada.

1698.—Count Frontenac died at Quebec and was succeeded by Mr. de Callieres, who was enabled to effect peace with the Five Nations, as a power independent of Great Britain.

1702.—War was again renewed between Britain and France, and Mr. de Callieres represented to his Court the necessity of reinforcements, and made preparations for the defence of the Colony.

1703.—Mr. de Callieres died and was succeeded by the Marquis de Vaudreuil, who devoted his attention to destroy the influence which the English possessed over the Indian allies.

1704.—The Bishop of Quebec, returning from France, was taken by an English frigate and kept prisoner in England, to effect a release of French Protestants. The negotiation was unsuccessful.

1705.—Mr. Reaudot, the Intendant, introduced some improvements in the laws of the country, which had a tendency to repress the litigious spirit which prevailed within the Province.

1708.—An attempt of the Clergy to raise their tythe from a twenty-sixth to a thirteenth was foiled, as being too burthensome to a colony so limited in its resources.

1709.—The English Colonists incensed by the massacre of the inhabitants of Haverhill, again determined upon attacking Quebec by sea and land, and the New Englanders were only restrained from proceeding, on learning that the forces intended for Canada, had been required for service in Portugal.

1711.—The operations by sea which this year took place in pursuance of the original intention, were unsuccessful from the inadequacy of the means, and the fleet was so damaged by tempestuous weather, that the expedition was abandoned.

1713.—The treaty of Utrecht left the French in peaceable possession of Canada, and of extensive means of annoyance to the peace and commerce of the New England Colonies.

1718.—This year was remarkable for the discovery in the forests of Canada of the plant Ginseng, so highly valued by the Chinese.

1720.—The inhabitants of Quebec and Montreal paid taxes for

improvements in the fortifications of their cities, then commenced under Mr. de Lery.

1722.—A definitive regulation of the distribution and limits of parishes took place, and finally promulgated within the Province.

1723.—Nineteen vessels cleared from Quebec—their cargoes limited to peltries, lumber and provisions.

1725.—The Marquis de Vaudreuil closed his long and meritorious career, and was succeeded the following year by Mr. de Beauharnois, a natural son of Louis XIV.

1731.—The administration of Mr. de Beauharnois was marked by the continual erection of new forts, and displays of military force, for the purpose of keeping the English traders within proper limits. His recommendations to the French government to erect a line of military establishments were successful, and this year the important and well situated fort at Crown Point was erected.

1743.—During the long peace which followed the treaty of Utrecht in 1713, several measures had been put in execution with a tendency to promote the welfare and prosperity of the country. The conduct of the Nuns, so contrary to the vows they had undertaken, was repressed; several ecclesiastical decretals bearing heavily upon some portions of the people were repealed, and this year a Royal Edict issued, which prohibited the Jesuits and other ecclesiastics from acquiring mortmain acquisitions.

1744.—An important change was made in the law of Canada, by which only such of the laws of France as should be enregistered in the books of the Superior Council, by His Majesty's direction, should have force in the Colony. By this circumstance the French *Code Marchand* never was in force in Canada.

1745.—His Majesty directed that no houses should be erected but on farms of one acre and a half in front by forty in depth. The consequence has been that the population of Canada has been always kept confined and thickly settled, and the pernicious law of subdivision of property has had a tendency to weaken, instead of strengthen families. Cape Breton was this year taken by Great Britain.

1747.—The Count de la Galissonniere, who had succeeded the Marquis de Beauharnois, having in vain sought assistance from the mother country, employed engineers to mark out and settle a line of demarcation, to restrict the English within the Alleghany mountains. He also succeeded in establishing forts beyond the limits of Nova Scotia. He was however superseded by Mr. de Jonquieres.

1748.—The negotiations were finally terminated for a line of demarcation between the British and French territories in America, in consequence of a clause of the treaty of peace of Aix La Chapelle.

1749.—Forts were erected in the Bay of Fundy by the Governor of Nova Scotia, to counteract the views of the Governor of Canada, who endeavoured to seduce the Indians and Acadians from their allegiance to the British Crown. A private expedition

sent out by the Governor and officers of the Government for the purpose of exploring a route to the Pacific Ocean, terminated, as it was really intended, in a rich return of furs, of which the Governor's share amounted to £12,000.

1750.—Mr. Bigot, the Intendant of Canada, displayed this year much of that license and prodigality for which he became notorious, and resorted to the most profligate means for the support of his expenses, which were lavished upon a female favorite.

1752.—Mr. de Jonquieres was succeeded in the administration of the government by the Baron de Longueuil. His appointment was temporary, for the Marquis du Quesne, arrived in August as Governor General, prepared for active warfare against the English traders on the Ohio, and offensive hostilities soon commenced. The conduct of the Intendant, who had entered into a conspiracy to defraud the government, was calculated to destroy its resources and alienate the affections of the people, and probably by creating internal weakness and disunion, effected as much of the conquest of Canada in 1759 as the valour of the invaders.

1755.—No offensive operations took place between England and France, except a small naval engagement on the Banks of Newfoundland, till this year, when an expedition of regulars and Colonial militia under General Braddock, for the purpose of giving a decided check to the encroachments of the French government on the Ohio, was defeated, through his disregard of all precautionary measures. The troops which were brought off by the celebrated General Washington, joined the Provincial troops under Governor Shirley and General W. Johnson. The latter was attacked near lake George by a large army under Baron Dieskau, whom he repulsed and forced back upon Crown Point. This success restored the spirit of the hitherto discomfited Provincial troops, but circumstances did not permit their following up their success this season.

1756.—The Marquis de Montcalm arrived from France with a fine army, reduced Fort Oswego, and displayed his warlike trophies in Montreal. He also succeeded in destroying the outworks of Fort George, and the batteaux and sloops prepared for an attack on Crown Point.

1757.—Bigot continued to pursue his iniquitous career of fraud, oppression, and most nefarious conduct, while Montcalm was occupied with extensive plans of warfare. This year's campaign was signalized by the capture of Fort George and the massacre of 2000 of its inhabitants by the Indians under his command. This latter affair roused the indignation of the British Government, and the determination of the English Colonists to destroy French dominion in America, was supported by the energy, which the elder Pitt infused into the councils of his Sovereign.

1758.—This year was principally spent in preparing for the blow intended at French dominion, and no means were spared to excite the people to meet the invaders, as the warfare in which France was engaged in Europe did not permit her to spare many troops to

defend her Colonial possessions. The clergy, who dreaded a conquest by a Protestant Government, lent their powerful aid, towards encouraging the people to defend the country against the enemies of France and the Romish religion.

1759.—The military operations of this year form a glorious era in the history of our country, but our limits will permit us to state them only very briefly. The British Government, at the urgent request of the Colonists, resolved on a decisive measure. The Colonists themselves were to have an opportunity of co-operating with the regular troops, who were to attack Canada at three points. To General JAMES WOLFE was assigned the task of attacking Quebec from sea ; to Sir W. Johnson, the reduction of Fort Niagara ; and to General Amherst, that of Crown-Point and Ticonderoga ; and in case of success, a junction of the armies was to take place at Montreal. Wolfe landed in June on the Island of Orleans, with an army of 8000 men, to whom was opposed the Marquis de Montcalm with 9800 disposable forces and a reserve of 2200 men, independant of the garrison of Quebec. The first attempt of General Wolfe on the French intrenchments at Montmorenci proved unsuccessful, and the tenor of his despatches to the British Government led them to await a defeat, rather than a victory. By a council of war, a landing so as to obtain a position on the plains of Abraham was determined on, and on the 12th September the measure was fully executed with a surprising degree of secrecy, silence and address. Montcalm imprudently determined on meeting Wolfe on the plains, the next day, and after a battle, remarkable for displays of courage, more than scientific manœuvres, and in which the spirit of the invading army was well met by the vigour and energy of their opponents, victory declared in favor of the arms of England. Both nations had to regret their commanders, Montcalm expired ere the capitulation could be effected, and Wolfe dying in the arms of victory, received all the manifestations of public gratitude which the British Government never fails to grant to the heroic character and warlike glory of her sons. The capitulation of Quebec succeeded the battle, and the effects of the termination of this portion of the expedition were if possible increased, by the successful reduction of Fort Niagara by Sir W. Johnson, and Crown Point and Ticonderoga by General Amherst.

1760.—The entire conquest of Canada became comparatively easy to the co-operating armies, after the capitulation of Quebec, and the success which we have mentioned. Though some drawn battles and undecisive engagements took place between the French and English, the contemplated junction of the different divisions of the invading forces occurred this year near Montreal in September. This event, combined with the continued misconduct of Bigot, led to the capitulation of Montreal on the 8th of that month and the complete subjection of Canada to Great Britain.

1761.—The preceding season it was announced to the people of Canada that Mr. Bigot's bills on the Treasury, were dishonored, and thereby a loss to the inhabitants of about £4,000,000, which

was then in circulation. Upon an examination into the affairs of the Intendant by Commissioners, it was perfectly ascertained that the amount of his peculations was little less than £400,000. The only Courts within the Province, since the capitulation, were Military tribunals within each District, and an appeal to the Commanding Officer.

1763.—A treaty of peace between England and France was signed at Paris on 10th February, by which the French King renounced all pretensions which he might have had to Nova Scotia, Canada, &c. and France was by one blow deprived of every acre she possessed in North America. The King issued a Proclamation on the 7th October, promising to the new settlers in Canada a variety of benefits, several of which have unfortunately never been fulfilled.

1764.—The *Quebec Gazette*, the first newspaper in Canada, established in Quebec by Messrs. Brown & Gilbert. New Courts of Civil and Criminal Jurisdiction were established by the Ordinance of Governor Murray, by which also the Laws of England were introduced in conformity to the provisions of the Royal Proclamation of 1763. An assembly of delegates from all the parishes except Quebec were called together, but the most being Roman Catholics, could not conscientiously take the requisite oaths, and no proceedings were thereupon had.

1765.—The famous Stamp Act passed the Imperial Parliament, so disastrous in its consequences to the peace of the New England Colonies, to which, however, Canada and Nova Scotia submitted.

1766.—Several meetings of the Cabinet took place in London, for the purpose of imposing a Constitution upon Canada, and some reports made by the Attorney and Solicitor Generals discussed. The dissolution of the Rockingham administration, and the changes that thereupon ensued, caused the affairs of Canada to be entirely forgotten.

1771.—Under the administration of Lord North, the affairs of Canada were again taken up, and the Crown Lawyers directed separately to report a plan of civil and criminal law for the Province of Quebec.

1773.—The reports of the Crown Lawyers were given in, and whatever may be said of their consequences, they are highly creditable to the talents of those officers. Meetings of the French and English inhabitants took place in Canada for the purpose of obtaining a Legislative Assembly, and petitions to that effect severally transmitted to the Imperial Legislature.

1774.—The Quebec Act, 14 Geo. III. cap. 83, was passed this year in England, by which Canada was restored to a situation entirely different from that of every other British colony, in reference to its laws, language, religion or manners—in short it became again a French colony, although nominally British.

1775.—The difficulties attendant upon passing the Stamp Act in 1765, were daily increasing in the New England States, and the Quebec Act did not tend to allay the rising ferment. They regarded it as favouring the Catholic to the exclusion of the Pro-

testant religion, and as oppressive of the subject. The Colonies, then about to demand redress of their own grievances from the mother country, called upon the Canadians to send their delegates to the Philadelphia Congress. Not so violent in seeking for redress as the New Englanders, the Canadians remained tranquil, and the Declaration of Independence was scarcely made public, ere an invasion of Canada was talked of by the Provincialists. The first advance of the rebel troops was remarkably successful.—Chamblly, St. Johns, Longueuil, (then posts of some importance) after some siege, fell into General Montgomery's possession, and the city of Montreal, whose inhabitants had defeated a former attempt of Col. Allen, were obliged to capitulate in November. Montgomery followed up that success by taking possession of all the military stores and provisions, not only at Montreal but also on board of the river craft, which surrendered about Lavaltrie. Another invasion of Canada under General Arnold, had been decided upon, by the Kennebec and Chaudière rivers, and the army of the latter officer, after thirty-four days march through woods, arrived before Quebec on the 9th of November, in a state to rival Falstaff's ragged regiment. On the 14th he encamped on the plains of Abraham, and began his operations. Governor Carlton had made every preparation for a siege, and successfully opposed the progress of his adversary till the evening of the 31st December, when an assault was made by the Provincialists, during the night. The attempt was unsuccessful—Montgomery was killed, and the year terminated without the surrender of Quebec.

1776.—The arrival of reinforcements in spring, enabled the Canadians successfully to contend with the Provincialists who were now in full retreat, and before the end of June the whole Province was evacuated. The number of the besieging army consisted of 1500 men, which was augmented this season to 8000 men. The British at the siege numbered about 1500 recruits, marines, seamen and militiamen, raised within a few months, with scarcely any regulars.

1777.—The Quebec Act, which had passed the House of Commons in a very hasty manner, and in opposition to the feelings of a great portion of the people of Canada, had been the subject of complaint to the British Government in petitions from the people in 1775, and a proposal for its repeal made by Lord Camden and Sir George Saville, met with little success. The Act continued to excite feelings of disgust within the Province, and measures were taken to effect a remedy.

1780.—The 19th May was distinguished by the phenomenon of a remarkable darkness in the northern parts of America; and is still called "*the dark day*." In most parts of the country where it prevailed, the darkness was so great that persons were unable to read common print, determine the time of day, dine, or manage their domestic business, without additional light. It commenced between 10 and 11, A. M. It appeared to grow by succession of clouds from the northward and was most pitchy about 2 o'clock.

1783.—The Province of Quebec contained by enumeration

113,000 inhabitants, English and French, exclusive of 10,000 loyalists who had preserved their allegiance to the British Crown and located themselves in the upper portions of the Province.

1784.—A petition was this year presented to the Parliament, by the English inhabitants, to which many Canadians united themselves, soliciting the entire repeal of the Quebec Act, and the establishment of a representative constitution, with a mixture of English and French laws, and the distribution of elective suffrage to the old and new subjects.

1786.—Lord Dorchester arrived in Canada as Captain General and Governor in Chief of Quebec and the other British Provinces.

1790.—The petition of 1784 was neglected till this year, when the British ministry brought before Parliament, and obtained the passing of the Act 31 Geo. III. cap. 31, commonly called the Constitutional Act, dividing the Province of Quebec into two Provinces, giving to each division a Legislature, consisting of a House of Assembly, Legislative Council, and a Representative of His Majesty.

1792.—The first session of the first Parliament of Lower Canada opened by Lieutenant Governor Clarke. Mr. J. A. Panet chosen Speaker. The House consisted, as it still does, of 39 knights, 8 citizens and 3 burgesses, in all 50 members. The session occupied principally in framing rules and regulations.

1793.—The second session opened by Lord Dorchester. The Judicature Bill, 34 Geo. III. cap.—, passed the Legislature. The assertion of the privileges of members in relation to freedom of arrest, asserted in the case of Mr. Young of Quebec.

1795.—In consequence of the failure of the crops, the Governor in Council proclaimed an embargo, prohibiting the export of wheat, &c. A Bill of indemnity for the act was passed in Parliament. An Act was passed for making the Lachine turnpike, and the Lachine Canal was proposed.

1797.—The second Parliament met in January, and was opened by General Robert Prescott—Mr. Panet re-elected Speaker.—French emissaries employed by the French revolutionary government to disseminate orally its principles among the unlettered people of Canada, were denounced by Proclamation.

1798.—Great excitement in the country from the abuses attendant on the Land Granting Department, the members of the Board of which had granted to themselves immense tracts of territory, to the injury and distress of thousands of settlers, and to the discouragement of emigration. Governor Prescott came to an open quarrel with Chief Justice Osgoode, on this occasion.

1799.—The Legislature during the session passed bills for the erection of Court Houses, and Houses of Correction, and for other important measures.

1800.—The Legislature opened by Sir Robert S. Milnes, Lieutenant Governor. C. B. Bouc, Esq. expelled the House by vote, having been found guilty and convicted of a conspiracy to defraud. Jean Casot, the last of the Jesuits, died this year.

1801.—A new Parliament meets, when Mr. Panet is a second time elected. C. B. Bouc again expelled the house by vote.

Bills passed for the establishment of the Royal Institution for the advancement of learning, and for removing the fortifications of Montreal.

1802.—The annual annoyance of Mr. Bouc's re-election, led to a Bill disqualifying him from ever sitting or voting in the House of Assembly.

1803.—The Chief Justice of Montreal rendered a decision that as the Criminal Law of England and the Habeas Corpus Act were in force in Canada, no right of property in slaves could exist in Lower Canada, and the few slaves still existing in Canada were thus manumitted. In consequence of the declaration of war between France and England, the Parliament were suddenly convoked and Bills passed for the exigencies of the case.

1805.—The fourth House of Assembly was opened by Sir R. S. Milnes. Mr. Panet was again elected Speaker.

1806.—The House voted Isaac Todd, Esq. the President of a public dinner at Montreal, who gave, and Edward Edwards, Esq. the proprietor of the *Montreal Gazette*, who published, certain toasts reflecting on the conduct of the House of Assembly, in relation to the Montreal Gaol, guilty of a breach of privileges, but no proceedings had thereon.

1807.—The trade of Canada was this year considerably increased in consequence of the Milan and Berlin decrees. From there being an appearance of approaching difficulties with the United States of America, for the affair of the Leopard and the Chesapeake, Sir James H. Craig, a distinguished officer, was appointed Governor General.

1808.—In consequence of the embargo laid on all American vessels by President Jefferson, an extensive contraband trade with the United States was carried on, and the exports from Canada this year were double their accustomed value. Ezekiel Hart, Esq. expelled the House for professing the Jewish religion.

1809.—Fifth Parliament met, and Mr. Panet again elected Speaker. Ezekiel Hart, Esq. again expelled by vote. Serious difficulties arose during the session between His Excellency and the Parliament, and the House was in consequence dissolved by proclamation.

1810.—The arrangement made with the American Government by Mr. D. Erskine, being disapproved of by the British ministry, the prospect of peace was considered exceedingly doubtful. The sixth Parliament met, in the month of January, and Mr. Panet was re-elected Speaker. The subjects which came under consideration were the exclusion of the Judges from the House of Assembly, and other matters which had a tendency to excite angry feelings. On the 7th of February, the House pledged itself to vote the necessary sums to defray the civil expenses of the Government—a pledge which Sir James H. Craig considered unprecedented as the Legislative Council had never been consulted, and His Majesty had not made any formal demand for such an aid. The Bill passed the House of Assembly for the exclusion of Judges, and some amendments made by the Council thereon, in which the

House could not concur, and the latter then proceeded to the expulsion of Judge Debonne by vote, which was carried. His Excellency not wishing, as he stated, to make himself partaker in the violation of an Act of the Imperial Parliament, dissolved this short and turbulent Parliament by Proclamation. The *Canadien* newspaper, which directed its whole energies against the Executive, upon whose conduct it commented with unusual severity, was destroyed by the authority of the Executive, the press conveyed to the Court House, and the printer sent to prison. Six individuals were also taken into custody, who never were tried. These and other similar harsh proceedings on the part of the Executive caused this period to be familiarly designated as the "Reign of Terror."

1811.—The seventh Parliament composed of nearly the old members, re-elected Mr. Panet, for the seventh time, their Speaker. The most of the old members were found to be component parts of the new Assembly, and the appeal to the sense of the people was any thing but favorable to the views of the Executive. The session, however, passed over in greater quiet than might otherwise have been expected from recent proceedings, and it presented all the appearances of a busy session. On the 21st March, Sir James H. Craig delivered his farewell speech to the Legislature, and on the 19th June was succeeded by President Dunn. On the 14th September, Sir George Prevost assumed the reins of Government as Governor General.

1812.—The United States of America took the opportunity when Britain was engaged in a war in Europe, to declare war against that power; at a time, also, when from various circumstances, Canada was supposed to be in such a state as to be unable to resist a powerful invading army. The whole force then in Canada scarcely exceeded 4000 men, and in consequence the Legislature was assembled to decide on the best measures to be pursued on the occasion. Government paper bearing interest was issued, battalions ordered home were detained, the militia drafted for active service, the garrisons placed in a state of defence, and in less than a month after the news of the declaration was made known, the Lower Province was prepared to meet the assailant. The first movement of the enemy, was the army under General Hull crossing into Upper Canada, in July, with his retreat to Detroit in August, after hearing of some reverses at Amherstburgh and Michilimackinac. General Brock, the Lieutenant Governor of Upper Canada, however, attacked Hull on the 16th August, and his whole force were marched captive into Montreal, within two months after the breaking out of the war. The enemy soon after collected a large additional force on the Niagara frontier.—They crossed into Upper Canada at Queenston, where they were again defeated by General Brock, whose death followed the wounds he received in the engagement. In November, the Americans, under General Smyth, invaded the country near Fort Erie, and the British naval force made an attack on Sackett's Harbour, but neither were attended with any important result.

1813.—In January the American General Winchester was taken at Detroit by General Proctor, with 500 other prisoners. An attack on Ogdensburgh by the British forces took place. Lieut. Col. Macdonell, who commanded the British regulars and Militia engaged in the attack, took possession of all the enemies' artillery except one piece, and brought over to the Canadian side eleven guns of different calibre, all the naval, military and commissariat stores, ammunition and burnt the Barracks and Shipping. On the 27th April, the Americans landed at York, and burnt and destroyed the whole town, and afterwards proceeded to Niagara. Towards the close of May the whole Niagara frontier was in their possession. General Proctor captured about this time an additional 500 Americans on the Miami River. At Burlington Heights, the Americans were on the 6th June defeated by Lieut. Col. Harvey, and driven back to Fort George, and the Niagara Frontier again restored to the British troops. An attack upon Sackett's Harbour by Sir George Prevost, completely failed of success, and became one of the charges against the military conduct of that General. On the 3d June, two vessels were captured at Isle aux Noix by Lieut. Col. Taylor, and in July, Black Rock, and the barracks at Plattsburgh were destroyed by the British troops. On the 10th September, Commodore Perry captured the whole British force on Lake Erie under Captain Barclay, which was followed by the defeat of General Proctor on the 5th October near Detroit. These disasters compelled the British Commander to fall back on Burlington Heights. In October the people of Lower Canada were called out to repel the American army, then threatening to invade Montreal in two directions.—General Hampton with an army of 7000 men entered the Province by the Chateauguny, on the banks of which, his advance was met by the Canadian Militia, under Lieut. Col. De Salaberry, and defeated, and Hampton obliged to retire to Plattsburgh.—General Wilkinson commenced his descent in November, on the 11th of which month, Colonel Morrison with about 800 men, attacked General Boyd at Chrystler's Farm, and drove them to their boats. The whole army retreated by the Salmon river to Plattsburgh and Sackett's Harbour. Before the close of this season, the Americans had deserted the American frontier, and burnt Newark, the British took Niagara, and General Riall destroyed Black Rock and Buffalo.

1814.—In March the American army under Wilkinson again entered Lower Canada, was defeated at Lacolle by Major Handcock and retired to the States. General Brown crossed in July into Upper Canada, and captured Fort Erie. The Niagara frontier during the months of July and August was the scene of several engagements between the American troops under General Brown, with detachments under Generals Drummond and Riall, and success seemed rather to favour the American arms. Reinforcements were however added to the British army at the close of the latter month. Sir George Prevost, in September, with an army of 11,000 men, entered the United States, attacked Plattsburgh, defended by 1500 regulars and some militia, on the 11th, and retreated

with considerable loss on the 13th. At the same time the British flotilla on Lake Champlain was defeated by Commodore McDonough. The conduct of Sir George Prevost was loudly censured and became one of the serious charges with which he stood accused. In November the Americans had evacuated every military post they possessed in Canada, and when several of their forts and stations had been captured, the command of the Lakes secured, and large reinforcements added to the strength of the inhabitants, a treaty of peace between the powers was signed at Ghent on the 24th December, 1814—a termination inglorious to both nations, and particularly to Great Britain.

It has often been remarked with great truth, that History becomes deficient in interest during times of peace, and that the annalist finds ample materials for comment, in the sanguinary details of war. Since the termination of the last American war, few circumstances have occurred that merit particular notice, it will suffice merely to mention the proclamation of peace, the commencement of hostilities between the rival fur trading Hudson's Bay and North-West Companies, and the impeachments of Chief Justice Sewell and Monk by the House of Assembly in 1815; the administration of the Government by Sir Gordon Drummond, John Wilson and Sir John Coape Sherbrooke in 1816; the impeachment of Judge Foucher by the House of Assembly in 1817; the arrival of the Duke of Richmond as the Governor in Chief, the payment of the Civil List by the Province, and the commencement of those financial difficulties which have since unfortunately too much disturbed the tranquillity of the country in 1818; the unfortunate termination of the Duke of Richmond's career on the Ottawa in 1819; the assumption of the reins of Government by the Earl of Dalhousie in 1820; the discussion of the Union of the Provinces as proposed to the Imperial Parliament in 1822; the administration of the Government by Sir Francis Burton, in the absence of Lord Dalhousie; the launch of the mammoth vessel, the Columbus, in 1824; the unsatisfactory nature of the financial arrangements by the Legislature, and the return of Lord Dalhousie to Canada in 1825; the dissolution of the House of Assembly, the elections of the new members, and the prorogation of the Legislature in consequence of the difficulties which had arisen in relation to the appointment of Mr. Papineau as Speaker of the Lower House in 1827; the reference of the affairs of Canada to a Committee of the House of Commons, the departure of Lord Dalhousie from the Province, and the assumption of the Government by Sir James Kempt as Administrator, in 1828.

Partial enumerations of the population of the Province are to be found in early historians. In 1622, there were only 50 persons in Quebec. In 1685, the inhabitants of Canada, according to an accurate account made by order of the government, amounted to 17,000, of whom 3000 were capable of bearing arms. In 1693,

In 1693,

Canada by computation, contained 180,000 souls, but this probably included Indians as well as the white population. In 1706, the Intendant, in a memoir submitted to the Court of France, stated that the colony contained 20,000 souls. In 1714, according to a statement of Mr. De Pont Chartrain, Canada contained 4484 inhabitants capable of bearing arms, which considered as a sixth of the population, would make the total number of souls at about 27,000. In 1720, Quebec contained about 7000 souls. In 1783, the Province of Quebec contained by enumeration 113,000 inhabitants, English and French, exclusive of 10,000 Loyalists, who had recently settled in the upper parts of the Province. Since that date no enumeration or census has been taken till that of 1825 given above. A more specific return of individuals follows. Total of inmates in each family 423,630; absent from the Province, 1450; under 6 years of age 82,870; upwards of 6, and under 14 years of age, 74,429; over 14 and under 18 years of age 23,935. Of males, there are of 18 and under 25 years, 23,378 single, and 5293 married; under 40 years of age, 7899 single, and 31,783 married; of 40 and under 60 years, 2664 single, and 23,419 married; of 60 years and upwards 1994 single, and 9448 married. Of females there are, of under 14 years of age, 68,781; of 14 and under 45 years, 39,518 single, and 52,854 married; of 45 years and upwards 6682 single, and 1860 married. By the evidence taken before the Committee of the House, to whom these returns were referred, it would appear that the grand total given above, is much less than the reality, as many persons, probably fearing that the census was for a capitulation tax, concealed from the Commissioners the true number of their families.

POST OFFICE REGULATIONS.

Letters for the United States must be post paid to the Lines and those intended to go that way for Europe must be post paid to the port from which they will depart.

Letters for Europe, intended to go by way of Quebec, must be post paid to that place, and those meant to go by the Halifax route must be post paid to Halifax.

Letters for St. Roc, St. Thomas, St. Jean Port Joli, River Ouelle, Kamouraska, Cap Santé and Port Neuf must be post paid to those places.

Unless attention is paid to the above notices, any letters put into the Offices will remain there and be lost to all concerned.

All letters for the United Kingdom, and places beyond the seas, in addition to the Inland Postage to Halifax, must pay the following rate of Packet Postage for every single letter.

To West Indies, 1s. 5d. Bermuda, 1s. 6d. Portugal, 3s. 2d. Madeira, the Azores, or the Canaries, 3s. 3d. Gibraltar, 3s. 6 $\frac{1}{2}$ d. France, 3s. 9d. Netherlands, 3s. 11d. Letters for Newfoundland may be forwarded on paying the postage to Halifax only.

The arrivals and departures of the different Mails are subject to such frequent alterations, that it is deemed unnecessary to attempt giving in this place tables of departures and arrivals. They may be obtained at the Post Offices, where notice is regularly given of every change.

GENERAL POST OFFICE.

LONDON, June 11, 1827.

By an Act passed in the present Session of Parliament, intituled, "*An Act to amend the Laws relating to the Duties of Postage in Great Britain and Ireland*,"

All letters conveyed by the Post from Great Britain to Ireland, and from Ireland to Great Britain, are chargeable with the like rates, according to the distances such letters are conveyed, *as would be payable if they were conveyed the whole distance in Great Britain*, in addition to the separate rates of Packet Postage, and the several rates payable under the Acts for building the Menai and Conway Bridges, respectively.

Parliamentary Proceedings sent to the Colonies by Packets.

Printed Votes and Proceedings in Parliament, from Great Britain and Ireland to any of His Majesty's Colonies, are to be charged with a rate of *one penny half penny per ounce*, and so in proportion, in lieu of any sum payable under any former Act, *to be paid on putting the said Votes and Proceedings into the Post Office.*

Colonial Legislative Proceedings brought into the United Kingdom by Packets.

Every Vote, Proceeding, or other Public Paper, printed by order, or under the authority of the Legislative Assemblies of any of His Majesty's Colonies, is to be charged with a rate of *one penny half penny per ounce*, and so in proportion, *to be paid on delivery thereof* to the person or persons to whom the same shall be addressed.

Newspapers brought by Merchant Ships from Abroad.

Every Newspaper printed *within* His Majesty's Colonies, brought into the United Kingdom by any Ship, *other than a Packet*, and delivered by the Commander at any Post Office, with the Ship's Letters, is to be charged with a rate of *threepence*, *to be paid on delivery thereof*, by the person or persons to whom the same shall be addressed.

Pamphlets, &c. conveyed to the Colonies.

Every Pamphlet, Magazine, Review, or other Periodical Publication, *put into the Post Office at Falmouth*, not exceeding *six ounces* in weight, to be charged *one shilling*, and the further sum of *threepence* for every additional ounce.

Pamphlets, &c. under this section cannot be received at any Post Office except Falmouth.

N. B.—If such printed Vote, Proceeding, Newspaper, Pamphlet, Magazine, &c. be not sent *without a Cover, or in a Cover*

open at the sides, or if any writing be thereon, other than the superscription, or any other paper or thing be enclosed therein, the packet will be liable to the full rates of postage as a letter

The above enactments commence and take effect from and after the 5th July, 1827.

The following come into *immediate* operation.

Newspapers for His Majesty's Colonies, and Places beyond Seas.

Every such Newspaper or other printed Paper *liable to the Stamp Duty, and for the conveyance of which any duty of Postage is chargeable*, to be put into the Post Office of the town or place in Great Britain or Ireland, in or at which such Newspaper shall be published on any day, within *seven days*, next after the day on which the same shall be published, the day of publication to be ascertained by the date of such Paper, and in case any such Paper be put into any Post Office, after the *expiration of such seven days*, such Paper to be charged as a *single Letter*.

N. B.—This clause alters the regulation according to which Newspapers to the Colonies, &c. *were required to be put into the Post on the day of Publication.*

Merchants' Accounts, &c.

All Merchants' Accounts, Bills of Exchange, Stamped Receipts, Invoices, Bills of Lading and Proceedings at Law, written *on one and the same piece of Paper with a Letter*, to be charged as a *single Letter* only; and any sheet of Paper on which Letters to *several and distinct Persons* be written shall not be chargeable with any higher rate of Postage, in Great Britain or Ireland, than if *one Letter only* were written upon such sheet of Paper.

Letters addressed to Officers of the Army, Navy, &c.

In order to find the distance from any place, in the foregoing table and list, to another, deduct the smaller from the larger number of miles, and the product gives the distance :—*thus*, do you want to know how far it is from *York* to *Côteau du Lac*, by the main road ; deduct 931 from 1253, and there remain 322 miles, the true distance ; or, if it be a *cross road*, and you want to know how far it is from *York* to another place named—say to *Raleigh* ; see how far *York* is from *Halifax* (by the list that is given) and how far *Raleigh* is from *Halifax*—deduct 1253 from 1427, and the result is 174 miles, the true distance from *York* to *Raleigh*.

As these tables and lists are taken from those used in the Post Office, it must be presumed they are as correct as the present state of the country will admit of.

FOREIGN MONIES, WEIGHTS AND MEASURES.

General Index of Foreign Monies, Weights and Measures, with Comparisons and Explanations by Dr. Kelly.

It should be observed, that all the comparisons and explanations of foreign measures are here computed according to the new British Imperial Standard, which is about three per cent. larger than the Winchester Measure, or more nearly 31 gallons, bushels, &c. of the new, answer to 32 of the old. Hence to reduce Imperial Measure, add the thirty-first part to the number of gallons, &c. The contrary calculation must, of course, be observed with regard to prices. But the several proportions can be only stated

with perfect accuracy in a regular treatise on Metrology, and as this index is merely intended to give general illustrations, all minute fractions are omitted.

Alberts Dollar, a money used in Lisbau and Riga, worth about 4s. 6d. sterling.

Alqueire, a corn measure in Portugal, answering to three imperial gallons.

Arroba, a Spanish weight, answers to 25½ lbs. avoirdupois.

Barrel, or *Tunna*, a corn measure in Sweden, answering to 4½ imperial bushels. Barrel is also a weight for flour in America, and weighs 196 lbs. avoirdupois.

Boisseau, a corn measure in Bordeaux, containing 2½ imperial bushels.

Cent, or *Centime*, the 100th part of a coin. It is of various values according to the unit.

Charge, a corn measure at Marseilles, Nice, &c. answering to 4½ imperial bushels.

Chetwort, a corn measure in Russia, which contains 5½ imperial bushels.

Coppec, a Russian money, the 100th part of the rouble.

Dollar, a Spanish coin, and intrinsically worth 4s. 2½d. but it is generally valued at 4s. 6d. The paper dollar of exchange in Spain is worth 36d. sterling, and Leghorn 42d.

Ducat, a gold coin in Holland of extensive use in the corn trade, is worth about 9s. 4d. sterling. There are various other ducats in different countries, in gold, silver and paper.

Fanega, a corn measure in Spain, containing about 1 bushel 4½ gallons imperial measure; there are however different sized fanegas; thus there are the large, the regular, and the small fanega, which are to each other as 11, 10 and 9, nearly.

Ferrado, a corn measure at Corunna, about 3¼ imperial gallons.

Florin, coin of money of account in various countries.—In Holland it is also called the guilder, and is worth 2½d. sterling. It is divided in Holland into 20 stivers of 16 pfennings each; but in other countries into 60 krentzers. Fls. Gr. means at Dantzic, florins and groshem. The Netherland guilder is divided into 100 cents, and is equal to the florin in exchange.

Franc, a silver coin of money of account in France and other places. It is generally valued at 10d. sterling, which is something above its intrinsic value.

Grosche, a money of account in various parts of Germany, and of different values; 24 generally make the rix dollar.

Grote, half the Dutch stiver, and at Hamburg half the sol or shilling.

Guilder, also called *Guldon*, a money of Holland. See *Florin*. The gold guilder is much used in the corn trade, and is reckoned worth 23 stivers, or about 30d. sterling.

Guilder, Current, a money of the Netherlands, seven of which will equal six guilders of exchange.

Halster, a corn measure in the Netherlands, answering to about 6½ gallons imperial measure.

Kilogramme, the principal weight in France, answering to 2lb. 3oz. 4dr. avoirdupois.

Kroutzer Creutzer, a small coin and money of account in Germany and other northern nations. In Austria it is at present worth about 7d. sterling.

Last, a large measure for corn in Holland, Germany, &c. varies from 10 to 12 imperial quarters.

Livre, an imaginary money in France, and several other countries. It is generally considered of the same value as the franc. In Italy it is called the lira, and is mostly divided into 100 centimes.

Lof, a corn measure in Libau and Riga, containing about $1\frac{1}{2}$ bushels imperial measure.

Molter, a corn measure in many parts of Germany; at Frankfurt answers to 4 imperial bushels.

Muravedi, a small money of account in Spain, $\frac{3}{4}$ of which make the real or rial.

Metze, a corn measure in Friuli and Trieste, answering to $1\frac{1}{2}$ imperial bushels nearly.

Mitrea, a money of account and exchange in Portugal, worth about 5s. 7d. sterling.

Mina, a corn measure in Genoa, equal to about 3 bushels, 3 gallons imperial.

Mudde, a corn measure in Holland, answering formerly to $3\frac{1}{2}$ English bushels; but in the system of the Netherlands the mudde is reckoned the same as the hectolitre.

Paolo, a money of Italy, worth about 5d. sterling.

Peseta, a Spanish silver coin, one-fifth of the hard dollar.

Pezza, the dollar of exchange at Leghorn, worth about 4s. sterling.

Quintra Metrique, a French weight of 100 kilogrammes, answering to $220\frac{1}{2}$ lbs. avoirdupois, or 2 cwt. less $3\frac{1}{2}$ lbs.

Quintal, a Spanish weight of 4 arrobas, or 100 Castilian pounds, answering to about $101\frac{1}{2}$ lbs. avoirdupois. It is also a corn measure at Bordeaux, containing about 2 imperial bushels.

Real, a Spanish money of different values. The real vellon is the most common and is worth about $2\frac{1}{2}$ d. sterling; 20 such reals make the hard dollar.

Six Dollar, or *Thaler*, a coin of money of account in most northern nations. It is of different value and variously divided.

Rouble, a money of Russia, which has varied considerably in value, viz. from 3s. 2d. down to 9d. sterling; 10d. is its present price.

Rubbio, a corn measure in Ancona, answering to nearly an imperial quarter.

Sacco, a corn measure of Leghorn, containing about 2 imperial bushels.

Scudo, an Italian coin, worth about 4s. 4d. sterling

Sotter, a corn measure in France, answering to about 1½ imperial bushels.

Sheffel, a corn measure at Dantzic, answering to about 1½ imperial bushels. It varies, however, in several parts of Germany.

Skilling, a division of the rix dollar. In Sweden it is the eighth part, and it is divided into twelve rundesteekens.

Soma, a corn measure in the Venitian States, answering to 2½ imperial bushels.

Stajo, a corn measure in Italy, of various dimensions. In Friuli and Trieste, it answers to about 2½ imperial bushels.

Stiver, a money of Holland, worth nearly 1d. sterling. It is 1-20th of the florin or guilder, and is divided into 18 pfennings, 12 deniers.

Shingles, per thousand.....	0 3
Hay, per 100 bundles	1 0

The said rates are for the whole distance from Lachine to Montreal (9 miles,) and so in proportion for each mile of the distance that goods, &c. may be transported on the Canal, but all boats, scows, vessels or rafts, loading or unloading below Lock No. 4, whether in ascending or descending, shall pay the same as if they

passed through all the Locks. A fraction of a mile shall be deemed a whole mile. A fraction of a ton, in the measurement of a boat or vessel, shall be taken according to the number of quarters of a ton therein. A fraction of a quarter of a ton shall be deemed a whole quarter. Timber, boards, plank and scantling in rafts, to be calculated by the quantity of feet; no quantity under 25 feet shall pay less than for 25. Boats and scows laden solely with firewood or other timber having passed down the Canal and paid the rates are exempted from toll in ascending, if unladen and empty. Boats, &c. having descended by the river are subject in ascending the Canal to pay one-third more than the above rates of toll. Boats and vessels of every kind entering the Canal from the river to load or unload articles of any kind upon or from the Canal wharf, below Lock No. 7, are liable to toll as for one mile for the said boats, vessels and articles, and will be required to pay the same accordingly to the Lock-keeper at the Wind Mills.

Conductors must be provided with a manifest or list of the packages or pieces comprising the cargo of each boat, vessel or scow under their charge, distinguishing the species thereof; and also the measurement, if the toll thereon be so payable. The toll on merchandise being fixed by the ton, the weight must be marked on each package whereof the rate is not specifically provided for in the tariff.

If the Collector sees good reason to doubt the correctness of the manifest or list, the cargo may be unloaded and examined; if found incorrect, the expense shall be paid by the owner or conductor of the boat, vessel or scow; if correct, to be reloaded at the expense of the Canal.

Boats, &c. shall be detained until the tolls are paid, and the same power of detention is given, if any damage is done by persons navigating boats, &c. or being passengers therein.

Horses employed in towing must not be driven at any pace but a walk. Boats, vessels and scows meeting others in the Canal, those coming down shall keep the side next the tow-path, and those going up give way so as to allow of the others passing over the tow rope.

All rafts or cribs, when overtaken by boats, must give way thereto, and sheer off to the side opposite to the towing path, so that the boats may pass, and there shall be with rafts or cribs a sufficient number of men to the due management thereof.

No timber shall be allowed to be drawn up the banks of the Canal, or to lie over the sides thereof.

No boats or vessels of any kind shall remain in the Canal, excepting during the time of loading and unloading, or passing up and down. The entrances of the Canal at Lachine and Montreal must not be obstructed, and all boats or other craft waiting at Lachine for a wind to proceed upwards, or to be towed up by the steamboat, must be placed in the basin there, in conformity to the directions of the Superintendent.

No rafts or cribs, whether of firewood or timber, shall be admitted into the Canal unless they are in good order, and they

must proceed immediately to the place of their destination without stopping.

If any firewood or timber be allowed to sink in the Canal, the penalty of obstruction will be exacted, besides the expense of removal.

ERRATA AND ALTERATIONS WHILE PRINTING.

HOUSE OF ASSEMBLY.—In the list of Members of the Assembly, supply names of Edouard Thibeaudeau and John Gosset as Representatives for the County of Bonaventure. The Members for Rimonski should be designated as Francois Corneau and Pascal Dumais, that for Shefford as Paul H. Knowlton, and the second for Orleans as Jean Baptiste Casneau. The number of County Representatives should be 73, and the total number 84. The names of the following gentlemen should appear in the list of Officers of the House:—G. W. Wickstead, Assistant Law Clerk; G. B. Faribault, French Translator; and Etienne Parant, Assistant French Translator.

PUBLIC OFFICERS.—Board of Officers of the Colonial Government, appointed for the inspection of the Public Treasure in the vaults of the Receiver General:—Hon. William Smith, Hon. C. E. C. De Lery, the Secretary of the Province, the Auditor General of Provincial Accounts, and Louis Montizambert Clerk of the Board, Auguste Jourdain.—Officers having the custody of the Keys of the Vault secured by three separate locks, the Receiver General, the Auditor General of Provincial Accounts, and the Secretary of the Province. Clerk to the Officers, Auguste Jourdain.—Clerk of the Markets, Quebec, George Chapman, Upper Town Market, Jean Baptiste Sauvageau, Lower Town Market.

COMMISSIONERS.—Commissioners for building a Custom House at Quebec, Lewis Henry Ferrier, George Addenbrooke Gore, and John Bruce.—Commissioners for opening a Road from a lot called the Glebe in the Township of Rawdon, as far as the Grand St. Esprit, and to make Bridges along the said Road, Julien Poirier, Henry Donabroe, Sen. and Robert Bagnall.—Commissioners for repairing Churches were re-appointed in November. No change is made in those for Districts of Quebec, Montreal and Three Rivers, and the District of Gaspé. Commissioners are Charles Cavanagh, Robert Sherar, and Hypolite Landry.

TRUSTEES OF MARKETS.—Trustees for Market in St. Paul Street, Lower Town, Quebec, William Henderson, Colin McCallum, John Munn, Barthelemy Lochange, and Augustus Gauthier.

ATTORNEYS.—John Godard, Montreal, November 10. John Short, Three Rivers, November 24.

JUSTICES OF THE PEACE.—Sir Isaac Coffin, Bart. and Philip Franklin Calbeck, for District of Quebec.

NOTARIES.—Octave C. Fortier, November 10. Edward Tremblay, November 17.

MILITIA.—The extensive additions made to the list of Officers appointed will not permit of our going into details in this place, but as the list is not yet completed this is of the less consequence.

DOCTORS.—The names of Niel McKernan, William Reece, Francis Murray, Hamilton Leslie, John Whitelaw, Bernard Murray, John Dormer and Wilo H. Fowler should be omitted, as being absent from the Province. Stephen Hicks and Lindsay Sims are dead, and should also be struck out. Joseph Morrin and William Blumhart should have M. D. appended to their names. Charles Boucher de Grosbois, and Eugene Napoleon Duchesnois, lately admitted, to be added to list.

CLERGY.—The list of the Clergy of the Church of England is somewhat incomplete, from the corrected list not having reached us till after the sheet was printed off. The following additions and corrections make it complete. Examining Chaplains, Ven. G. J. Mountain, D. D. Rev. R. Cartwright, A. M. Mr. Cartwright is also Secretary and Domestic Chaplain to the Lord Bishop, and not Rev. E. W. Sewell. The Rev. J. L. Mills, D. D. (now absent on leave) should appear as Evening Lecturer, and the Rev. ADVERTISEMENT.

THE MONTREAL GAZETTE, (*by authority,*) being now greatly enlarged, and printed on a very superior quality of Imperial paper, is published at the Office, No. 25, *Notre Dame Street*, near the English Church.

From arrangements which the Proprietor has made with Correspondents and Agents in various quarters, from whom the latest Papers, Periodicals, and other Publications are received, the GAZETTE will contain copious selections on the most interesting subjects of European Politics.—Commerce and Agriculture will receive a great share of attention, and Law Reports, both Foreign and Provincial, on important subjects, will have frequent insertion in the columns of the GAZETTE.

The local Politics and the general interests of the Canadas, and the events which daily pass before us, will be duly examined and recorded; a Commercial Price Current, corrected with care by experienced Merchants, will be frequently published, during the most active periods of business; a brief condensed list of the Sheriffs' Sales in the Province, that are to take place during the month subsequent to that of publication, will be inserted monthly; and on the arrival of each LONDON and LIVERPOOL Packet, the Promotions in the Navy and Army, and interesting events connected with these services, will receive early attention.

During the sitting of the PROVINCIAL PARLIAMENT, full Reports of the Debates and Proceedings of the different branches of the LEGISLATURE will be inserted.

From the present very extensive circulation of the MONTREAL GAZETTE, it can with confidence be recommended as a useful vehicle for general Advertisements, and being the Official Paper in the District of MONTREAL, it is a safe legal record, and will be admitted by the Courts to be the best reference and proof of the acts of Executors, Tutors and Trustees, Sales of Property, Dissolutions of Partnerships, or any acts from which future contest may possibly arise.

All kinds of Books, Pamphlets, Catalogues, Funeral Cards, Posting and Hand Bills, &c. &c. &c. will be executed with neatness and despatch, on moderate terms. An assortment of Custom House, Half-pay Officers' and Widow Pensions' Blanks, Declarations, Inscriptions, Subpoenas, and other Forms used in Legal

proceedings, Bills of Lading and other Mercantile Blanks, always kept on hand, and sold at reasonable rates.

The following Agents of the MONTREAL GAZETTE will receive and forward, without delay, all communications and advertisements or orders for printing at the GAZETTE Office, and also receive subscriptions and payment of accounts :—
