

UNB Win Both Men's and Women's Championships

A strong UNB team copped both men's and women's open swim championships in Halifax March 21.

Faced with considerable opposition from Dalhousie and Middleton, New Brunswick girls walked off with their fourth straight open crown. Final standings gave UNB 66, Dalhousie 22 and Middleton 3.

Individual times in events won by UNB were: 50 yard free-style—Vickery, 30.5 sec.; 50 yard breast stroke—Hoyt, 44 sec.; 150 yard medley relay—UNB, 54.6 sec.; 100 yard backstroke—A. McCready—52.4 sec.; 200 yard freestyle—Elson, 3.061 sec.; 100 yard breast stroke—Hoyt, 36.4 sec.; 75 yard individual relay—A. McCready 35.3 sec.

Fighting heavy teams from YMCA, Navy and Middleton, UNB men achieved their second championship in four years. The earlier one had been won in 1953. Final standings in the men's heats showed UNB far ahead with 72, YMCA second with 49, Navy 39 and Middleton trailing with 8. The three navy teams combined into one powerful squad as did the Acadia with Halifax YMCA.

Individual times in events won by UNB were: 100 yard free-style—Sanger, 1 min.; 400 yard free style relay—4 min., 16.4 sec.; 100 yard individual medley relay—Gregg, 1 min., 16.2 sec.; 100 yard butterfly—Gregg, 1 min., 21 sec.; 300 yard medley relay—UNB, 4 min., 5 sec.

UNB came fourth in the 50 yard free style, third in the fifty yard breaststroke, second in the 400 yard medley relay, third in the 100 yard backstroke, third in the 400 yard free style, second in the 100 yard breast stroke, and third in the diving.

In the girls' open, UNB came second in the 50 yard free style, second and third in the fifty yard back stroke, second and third in the 100 yard free style, second in the 100 yard backstroke, third in the 200 yard free style.

BRISK BEGINNING FOR NEW COUNCIL

Maple Sugar?

After a long, hard race to the top, and a thrilling down-hill run, with the sun shining brightly on pyjama-wrapped skiers, there's nothing like a bit of refreshment to take the edge off one's thirst—however—every man to his own taste. Pictured above are Flem Christensen and Rozi Harris, winners of The Sugar Derby held at the U.N.B. Royal Roads Ski Hill last Sunday.

The first meeting of the new council started with a 'bang!' Committees, Campus Police, the Brunswickan and Scholarships all received a thorough going over.

The Committees selected for the new council year are as follows:
Financial Committee — Bastin (Chairman), Bird, Foerstal, Steeves, and Yoell.
Constitution Committee — Pearsall (Chairman), Campbell, Doyle, and Hart.
Application Committee — Ray (Chairman), Bird, Emblin, Young, and Steeves.
Student Athletic Awards — Colpitts (Chairman) and all Class Presidents.
Discipline Committee — Ray (Chairman). The other members will be chosen later.

A motion was presented which would change the form of the Discipline Committee. It was moved that it include one member from all classes except the Freshman Class and one Co-ed. The motion was defeated.

The Council then dealt with a recommendation from the previous council that a \$100 scholarship be given to the W.U.S.C. winner. This motion was also defeated.

Perhaps the most interesting and by far the most debated subject was the question of the Brunswickan. Barry Toole, the Editor, brought up a recommendation that the present system of two Brunswickans a week involved much more work for all concerned and warranted a change both in the honorariums and in the administration. He suggested that the present honorariums be raised and that the position of Managing Editor be re-created and given an honorarium. The Council passed a motion raising the honorarium of the Editor to \$125, that of the Business manager to \$100 and provided for an honorarium of \$75 for the Managing Editor.

Campus Police Chief Walden presented the views of his department. It is felt, he said, that the present rates should be raised so that a constable will receive \$.75 per hour, the assistant chief \$.85 per hour and the chief \$.90 per hour. All three were accepted by the council. President McAllister will approach the Athletic Association concerning arrangements to be made for Athletic events. Walden was also voted \$50 for his work during the present year. Indications are that the new council will have its hands full and will provide sound government.

STILL TIME!

Applications for the following positions are being called for the year 1957/58.

All applications must be in the hands of the Applications Committee by 12:00 Noon, Saturday, March 30, 1957.

Please leave applications in Box "R" in the ARTS'S BLDG., or in the hands of the Applications Committee.

POSITIONS:

Editor of the Brunswickan
Business Manager of the Brunswickan

Photo Editor of the Year Book
Editor of the Year Book

Co-Editor of the Year Book
Business Manager of the Year Book

Chairman Winter Carnival Committee

Chairman Social Committee

Campus Co-ordinator

Campus Police Chief

2 Campus Police Chief Assistants

Concession for Student Directory

Concession for P.A. System

Concession for Formal Photos

Concession for Programmes

1) Football

2) Hockey

Concession for Canteens

Concession for Check Rooms

All applications should include a summary of qualification for the positions and must be in on time.

William Ray,
Chairman Applications Committee.

FACTS AND FIGURES

(1) 121,000 bottles of blood have been collected from voluntary clinics in 6 years in New Brunswick.

(2) At \$25.00 per bottle this has been a saving to New Brunswick people of \$3,025,000.00

(3) The Red Cross will replace blood used for New Brunswickers (or students who have donated their blood) in hospitals in other provinces where blood is not free. For example a student from outside the province had donated his blood during several U.N.B. clinics. Working during the summer vacation in his junior year he was involved in a car accident. He required 12 pints of blood. The bill came to \$300.00. Had the N.B. Red Cross not replaced the blood such a financial set back would have meant the loss of his college year. Further the transfusions saved his life. Your blood will save someone's life.

WARNING!

The S.D.C. wishes to remind students that the long-standing university rule of no alcoholic beverages in the gym, will be enforced by the Campus Police at the "Con", and all offenders will be referred to the S.D.C. No repetition of the Winter Carnival is wanted!

Maritime Motif For "Con."

Friday, March 22nd, marks the 75th anniversary of the Con. The Con is growing old and in accordance with this the social Committee has taken the age old sea as its theme. In the sea, fish are most important. The Con will sport a wide and colorful variety of these inhabitants of the deep.

The Collegians will provide their usual brand of excellent music. The social committee

would like to take this opportunity to thank all those who have so generously donated their time and energy to the task of providing a suitable setting for this last and best, "Dance of the Year". But at the same time, it is hoped that there will be many more who will find time next year, to aid in making the Fall Formal and the Con better and better next year.

'We Fooled Them'

The road leading to the Students' Memorial Centre has been blocked off for the past few days, one assumes for cars only. By the number of people who unconcernedly walk by the barriers every day it is quite obvious that few consider that they have been placed there for any other reason. But there are whispers! This is just a trick they say, of the faculty to prevent us from going for our cup (probably the seventeenth) of coffee. They think that by putting something in our way we will turn our backs and go to the Library and study.

So far we have fooled them! Not one person has been rebuked, not one has given up his coffee, and not one honestly realizes that exams start in less than six weeks.

It is not being suggested for one minute that you should be swayed from your daily trek; not at all, go right over, play your game of bridge, read the daily paper, don't let any one fool you into doing the work that is required to pass the year; after all, there is just so much that can be expected of a fellow.

The next time you come to the blockade, give it a little kick, smile to yourself and say, "I fooled them for another day". And you will have, they will have covered another twenty-five pages and not have had the privilege of having your honoured presence to lecture at.

If you really try, you will find many persons over at the centre who like yourself have "pulled the wool over their eyes" and like you will be planning trips for the summer, activities for next year, and the old pastime, future conquests (all varieties). You should find yourself right at home. But I know one fellow you won't find there, its the fellow writing this; he's getting d**n scared.

Segregation?

On Monday, March 25, at 7:30 p.m., WUSC will be holding its last general meeting of the current academic year. The meeting will be held in the Oak Room of the Student Center.

The meeting will be in the form of a panel discussion on the topic "The Racial Problem In South Africa". The panel will be chaired by Dr. Chapman and the other members of the panel being Prof. Clark, Prof. McFeat, and Phil Okonokwo. Some of the questions which will be brought up by the panel are: Will the segregation policies have any effect on the future of South Africa? Is there any justification for the segregation policies of the South African government in regard to education? Is there any similarity between the racial problem in the U.S. and the racial problem in South Africa? Should this problem of racial segregation be brought before the United Nations?

After the panel discussion the members of the panel will answer questions from the floor, and the meeting will close with the serving of coffee and doughnuts.

Those Good Old P. C.'s

On Monday evening a bus-load of public-minded students made a two-mile trek to the Devon School auditorium, where a Progressive Conservative nominating convention set itself the task of choosing a candidate to contest the York-Sunbury riding in the forth-coming general election.

Chester MacRae, part owner of the Fredericton Business College, edged out barrister Aulder Gerow by nineteen votes in the open convention. Special speakers of the evening were Premier Hugh John Flemming, Federal M.P., Van Horne, and John Diefenbaker. The fiery eloquence, vigour and wit of Van Horne livened up an interesting, but sometimes slow, convention.

Bulletin Board . . .

STILL NO CROWN

Despite the pleas of those concerned with the Winter Carnival the Crown has not been returned. If any one knowing the whereabouts of the crown would by some method have it returned to the officials, it would be greatly appreciated.

SURVEY FORMS REQUESTED

Students are reminded that the forms filled in for the recent nation wide survey are of utmost importance, and are requested to hand the completed forms into the Public Relations Office as soon as possible. The Deadline is Monday, March 25.

SPECIAL SPEAKER FEATURED

A meeting of the Newman Club will be held in St. Dunstan's Hall at 8:30 on Sunday, March 24th. A special speaker will be featured.

VOL. 89 FREDERICTON, N.B. MARCH 22, 1957

'Bye Now!

This issue marks the end of the regular publishing schedule of the Brunswickan. For the first time in its history, The Brunswickan has provided the students with a continuous bi-weekly newspaper, 40 issues in all. It has been an experiment, and one which we believe, has proved successful. The past year has shown us that the students of UNB clearly warrant a bi-weekly paper, not only as a news organ, but as a pungent vehicle of campus opinion.

No experiment is without mistakes, and we have experienced our share. However, in this very experience, we are enabled to show the way for a better paper in the future.

In glancing back over the past year and noting the many significant events which characterized the term, we think, without qualification, it was one of the most prominent on record. Immersed in the difficult problem of rapid expansion, the university has energetically cleared the way for future growth. The new Chemistry Building reaches completion this year, the Engineering annex and plans are presently being finalized for the construction of the handsome men's residence. Last, but not least, the Maggie Jean Chestnut House, the domicile for UNB's irrepressible co-eds, started the year with a new wing.

Student Affairs reached a new peak, with near record participation in the many extracurricular activities; a successful Winter Carnival, excellent debating record, an eminently enjoyable Red 'n Black Revue to mention only a few. Shouldering new responsibilities, the students approved a substantial allotment for WUSC and NFCUS. And finally, to ensure themselves competent government in the coming year, they voted a realistic and hardworking council into office.

Speaking for the students, we are convinced that they are looking forward to an even better year next fall. For those graduating, 1957 will leave with them an unforgettable and precious impression of their college days. To them, good luck. We hope you will be back often to renew old acquaintances.

To end on a more sober note, may we wish all students the best of luck in the coming exams.

Take It Easy . . .

The last yearly publication of any periodical is usually subject to the pleasant reminiscences of its editorial board, so we hope you will make allowances in our case. In this instance, though, it is not many, but one facet, of the past year that we wish to discuss.

THIS IS

SPERRY

No more rock'n roll aboardship.

A new gyro-controlled, electronically-operated stabilizer produced by Sperry can now reduce a vessel's roll by as much as 90%. The SPERRY GYROFIN operates below the waterline like the ailerons of an aircraft and rules out the danger of cargo shift in heavy weather — to say nothing of seasickness. S.S. Mariposa, Matson Line, the first ship so fitted, is now at sea.

Development of the GYROFIN adds to the already formidable list of Sperry contributions to safe, dependable sea travel — contributions such as the Gyro-Compass, Gyropilot, high-resolution radar and direct reading Loran.

Young engineers who seek a career in the field of electronic research or mechanical development, with freedom to think and act along original lines, should contact Sperry.

SAINT JOHN — AND — FREDERICTON

Throughout the almost continuous stream of deprecation we have received from interested students, we have tried to present a fair indication of Brunswickan Policy; and since nearly all the correspondence has dealt with our alleged violation of student rights, student opinion, and student integrity, it has become almost necessary to continually remind the student of our position on the campus. We should not have to do this. Regularly this year, readers have been faced with indignant letters from their colleagues, each purporting to reveal just one more way in which the Brunswickan has failed. As the letters became more harsh, it became obvious that we had to defend ourselves. This was duly done, and in every case provoked still further outbursts from students. It is exactly the sort of thing which nuclear scientists claim is responsible for an atom bomb explosion—a chain reaction. It can be just as dangerous as an atomic explosion, because it presents an often incorrect picture to the students, on the one hand, and it will eventually lead the editorial board of the paper to take a defensive stand, on the other. Both of these are to be avoided if at all possible. The letter on this page today is an excellent example of this. In it, the writer accuses the paper of premeditated bias towards the Newman Club. This is a serious charge if well founded and the writer seems to think it is.

The last month has clearly indicated to what extremes this invective can go. We are not trying to defend ourselves, nor disapprove the allegations of our critics. We are slightly weary of trying. However, it does occur to us that, in many cases, the difficulties might have more equably been ironed out, had the writers a clearer notion of their problem. It is one thing to criticize a newspaper. It is quite another thing to hurl unjustified invective.

Perhaps a suggestion would be in order. To our many interested critics: Would it not be more realistic to find out the background of an unfortunate circumstance, before laying the blame?

We recognize the right of individuals to express an opinion on the pages of a newspaper. Nevertheless, this opinion must be reinforced with the necessary facts. For, like a person, a newspaper is sensitive about its integrity and very few of us would think of accusing a colleague before ascertaining the validity of the charge.

Letters to the Editor

The Editor,
The Brunswickan,
University of New Brunswick
Sir:

On behalf of the Newman Club of UNB I wish to express in no uncertain terms, our displeasure at the negative response we have received from your newspaper in relation to the publicizing of our events. We have been ignored during the past three weeks in response to our request for space in the "Brunswickan" to publicize two very important events.

You also stated in your editorial that articles would be chosen with an eye to student interest, importance and pertinency. Now I suggest to you that the interest, importance and pertinency of the Newman Club articles is certainly more in keeping with student interest than the article in the "Brunswickan" of March 11 which deals with "Trade Analysis". I suggest to you that the news in that article can be acquired from many other publications dedicated to that field, whereas this student organization has only the one means of reaching the students: i.e. The "Brunswickan". I refer you to an article in the Brunswickan of March 5 which states that "societies have a certain commitment to the student body, to entertain them as well as themselves. They seem to have forgotten this commitment during the past few years and have given up the student body as an organ of support."

I now submit that this organization has not forgotten its commitment, but that the "Brunswickan" has. I ask this question. How can an organization advertise properly without the support of the "Brunswickan?" I answer this question. It can't. Perhaps the staff of the Brunswickan does not agree that the Newman Club is an organization of students or that it is an extracurricular activity for students. If this is true, the staff is very incorrect.

The "Brunswickan" has the power of making or breaking a club. I can also state that it has been very effective in helping to bring about a decline in Newman Club interest. Why? Because prospective members have not read anything about the club and therefore have drawn the conclusion that the

"Such MIGHTY Power encompassed in so small a frame"

By comparison with the vacuum tube the transistor is smaller, uses less current, generates little heat and has considerably longer life. It is proving an invaluable instrument for the designers of electrical equipment.

The manufacturing of transistors and their use in new equipment is but one of a number of challenging projects currently being undertaken by the Northern Electric Company.

The solving of Canada's communication problems will give full scope to the enquiring minds and inventive genius of young engineers.

There are interesting careers—and a continual need for University Graduates—at the Northern Electric Company Limited. A letter or postcard to the College Relations Department, Box 6124, Montreal, Que., will bring full information concerning these opportunities.

LETTERS TO THE EDITOR

Continued from Page 2

organization is dead.

In order that this letter is constructive also, I suggest that the Brunswickan make a sincere effort to be unbiased towards organizations on the campus and improve their method of determining the relevancy of student interest in the articles.

In closing let me quote from an article in the Brunswickan of March 5. "The university is the breeding ground for future leaders. The college paper as part of that ground, is one of the roots of free and independent thought."

Is the policy of the "Brunswickan" towards the Newman Club really acting in the interests of free and independent thought?

Yours sincerely,
M. J. O'Connor,
President, Newman Club.

EDITOR'S NOTE: Parts of Mr. O'Connor's letter were deleted. These were the most unimportant parts and in no way destroy the sense of the letter. We have continually warned students about the length of letters, and while in some cases it has been possible to print an entire letter, this time there is not sufficient space.

THE ROLLING STONE

By Marvin J. Meloche

This year the geologists emerged from their chrysalis and became a relatively important and influential group on the campus. In all fairness and objectivity, the activities of the other science organizations do not seem to merit equally high praise.

There are those who contend that it is harmful to divorce geology from the other sciences, that there should be closer bonds tying the sciences together. I am not at all in agreement with this point of view. Unlike other faculties there are few similarities between the academic interests of the various departments of the science faculty. I feel that there is a lack of stimulation when an active department or organization is fettered to others who do not share the same energetic outlook. Academically, the various scientific organizations are incompatible, and extracurricularly the same incompatibility exists, mainly due to the fact that some departments are populated by those whose lack of pride in their department does not spur them on to any extra effort. It must be admitted that the basis of success for any scientific organization on the campus is its social and extracurricular aspects, rather than the academic. And from this aspect good public relations are essential.

Thus one can see that to take pride in our organization and to maintain its present standards of activity, we must realize that close relationships

SALES SLANTS . . .

by CALVIN MOIR

Perhaps you have never realized the cunning sales technique which comes into play when one enters a clothing store. Immediately, the approaching clerk makes a tentative estimate of the victim's intelligence and wants. Then comes either the clerk's winning smile or the somber understanding look, whichever he feels will go over best with the prospective customer. Next comes the conventional (sometimes sickening and suggestive if accompanied by an overemphasized smile) "something I can do for you sir? (or madam). The person is immediately categorized by the answers he gives. There are four amusing types which come to mind: (1) The Great Pretender (2) the hick (3) the willing to please spendthrift (4) the critic. Let's take a look at each in turn!

The Great Pretender usually bursts in with a great flourish and swagger knowingly, to the rear of the store so that all may see him. He then asks for a certain item stating the brand, colour, size and price. The clerk, recognizing this type, leads him to the rack and produces the required product. Our customer studies it thoroughly, comments sarcastically on the quality, discredits the manufacturer and criticizes the store for selling such an inferior product. The salesman will refute these arguments politely and at the same time make the customer feel that he really knows clothing. Strangely enough the customer will usually buy it on the grounds that it is the closest thing to what he wants. (Note that the salesman takes all of this quite passively knowing that the customer will buy anyway or else suddenly stamp out.)

Our second type (whom some insensitive souls refer to as "the hick" is usually the source of great delight and much joking when he is gone. He may be looking for a new pair of pants or a brilliant shirt which his girl friend has suggested would make him look handsome. Our salesman takes him under his wing, guides him into a dusty corner and produces the latest fashion in the product he seeks. At this point he will hear smooth words of wisdom on the quality and soon. Completely overwhelmed, our "hick" buys and walks out triumphantly.

Thirdly, we have the person who has just received his weekly or monthly pay check and decides that he needs an article or two of clothing. Salesmen are on the lookout for this person and immediately make an attempt to find out the state of his finances. By asking where he works, how he likes his work, how often he is paid etc. he soon arrives at the conclusion that our customer has just been paid. Revelling in this knowledge the clerk will commence suggesting everything from socks to topcoat. The poor victim who just can't resist the flattering picture of himself in the new garb will probably terminate his buying expedition by walking out a new man (outwardly) with an empty wallet. (Sometimes in the not too distant future it will suddenly dawn on him that he was took).

Our fourth character is indeed an interesting specimen, especially to the alert bystander. This time our customer really knows clothing. This requires all the eloquence and technique which the salesman can muster to really convince his customer that he is getting the best. Here the salesman does not stick to the particular piece of clothing; if he finds he is losing his man, he will commence a discussion on the manufacturing company, its affiliates, its history, scope of operations etc. Here we will probably (it is hoped) find that his opponent is not so well versed. This gives the salesman a boost in confidence and tends to put the customer on the defensive. Then the salesman will probably come back to the product in question by following the line of production from the sheep to the retail store. At each point of course he will show where the product gained superiority over competing brands. Unless the customer is a complete pessimist he will buy the product.

As long as the customer (all types) is in the store he is "buying" the product. When he has left the salesman speaks to his associates in terms of having "sold" the product. So the next time you go into a clothing store, ask yourself the question: "Which type am I?"

with other sciences can only be detrimental. Next year, the various activities, including the Maritime University

geology convention will represent a great challenge to the incoming executive. If there exists any pride in their department or if there is initiative on the part of next year's executive they should attempt to carry the society on to new and higher triumphs.

NEWMAN ACTIVITY

The second last meeting of the Newman Club will be held this Sunday at 8:30. The guest speaker for the evening will be Father McKendy, professor of religion at St. Thomas University. The important item on the agenda will be the nominations for next year's executive. All Newmanites are urged to attend this meeting to hear Father McKendy and to take part in the selection of next year's executive.

-SCM-

In the porch of George St. Baptist Church there is a small card that points an arrow downstairs and says: "SCM". If you will come here at 8:30 of a Sunday evening, and follow this card, you will find yourself in a spacious room with the genial atmosphere of study, discussion, and good fellowship. This is "Open House" of the SCM of UNB, and the people you see about come not only from our campus, but also from Teacher's College and Business College. Open House will be held for four more Sundays.

TRAINING OPPORTUNITIES

for Careers in Meteorology with the Federal Department of Transport

- These attractive positions are open to pass and honours graduates of universities, including 1957 graduates, in physics, physics and mathematics, science, engineering or arts. No experience is required.
- Those selected will start at \$372, \$352, or \$315 a month depending on their qualifications.
- Graduates who have had some training in physics and mathematics beyond the senior matriculation level but lack sufficient credits in these subjects will receive short intensive training to bring their qualifications up to the required standard. They will, of course, receive full pay while taking this training.
- These positions offer numerous opportunities for advancement and generous fringe benefits.

For details, write to Civil Service Commission, Ottawa. Please quote Competition 57-174.

BOWLING

Two games are scheduled tonight in the Faculty Bowling League.

Meeting at 7 o'clock on the alleys in the Lady Beaverbrook Gymnasium are Science and Arts. In the second tilt, booked for 9 o'clock, Civils meet Administration.

St. Francis Xavier University this week took its tenth Maritime Intercollegiate Hockey title in eleven years by winning a convincing 10-3 victory over UNB Red Devils in Antigonish. The Nova Scotia league's top scorer, Chebot Cormier, led the X-men with a hat trick. Morrison scored two goals while MacKenzie, Murphy, Wiseman, Claud MacKinnon, and Andrea picked up singletons. Galen Parent, with two, and Ed Dohaney were the Red Devils marksmen.

The triumph gave St. FX the two-game, total-goal championship series 15-6. The champs had edged UNB 5-3 in the opener at the Lady Beaverbrook Rink.

Devils Open Fast

The Red Devils went into an early 2-0 lead as Parent scored on a waist-high screened shot from the blueline. Dohaney slapped in a McDonagh pass to make it 2-0 less than a minute later. However, Murphy and Wiseman tied the score for X-men before the period ended.

Five unanswered goals by St. F.X. in the second period broke the game wide open. The turning point of the game was Claude MacKinnon's clearing shot from the center ice region that slid into the UNB net.

St. FX outscored the Red Devils three to one in the third period. UNB's Parent notched his second goal of the night three minutes after X's MacKenzie had made it 8-2. Cormier finished off the scoring with two more goals for the winners.

Claude Brown in the UNB cage had a busy night in a losing cause. The barrage of rubber totalled 55 shots with Brown turning 45 of them aside. Keenan had considerably less work in the St. FX net, making only 17 stops.

In the fairly rough game, 11 penalties were handed out; six went to UNB and five to St. FX. A third-period brawl caused a stoppage of play and the near forfeiture of the match to the Red Devils. Jim McNutt and Wiseman were the battlers, and other players joined in to some extent. The partisan crowd snowed the ice with litter and the referee was going to give the game to UNB. No such luck though. Instead, only one misconduct penalty was handed out, that to Savoy of UNB for too vehemently protesting a referee's decision.

BADMINTON

Tomorrow will see the annual Intramural Badminton Tournament run off on the hardwood of the Lady Beaverbrook Gymnasium. The meet gets under way at 2 o'clock in the afternoon.

Contestants will participate in five different events. They are: men's singles, men's doubles, women's singles, women's doubles, and mixed doubles.

All university students, with the exception of varsity players, are eligible to compete. Anybody who wishes to play is asked to get in touch with

either Ted Jack (5655) or the Athletic Office (5082).

WRESTLING

Coach Don Nelson of the University's athletic department is conducting wrestling classes three times a week in the Lady Beaverbrook Gymnasium. Any persons interested in learning the fundamentals of the grunt and groan game are invited to attend.

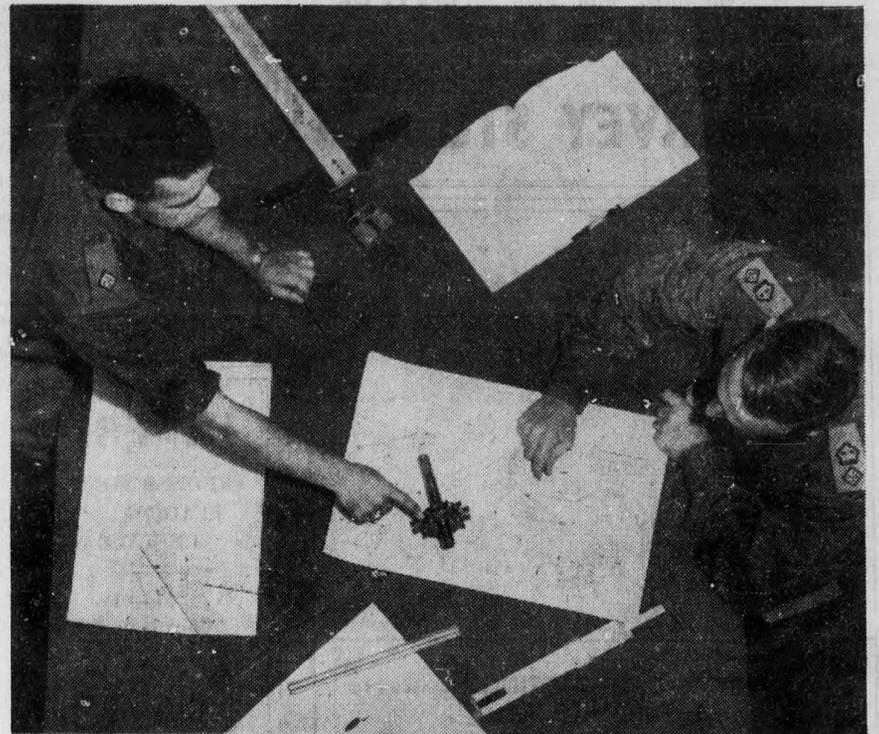

Sessions are scheduled each Monday, Wednesday and Friday afternoons. All classes begin at 4.30 o'clock and continue until 6.

RINK SLATE

A full schedule of university sporting activities is scheduled Sunday at the Lady Beaverbrook Rink. Curlers will go into action from 8 to 10.30 o'clock in the morning, intramural hockeyists will play from 1.30 to 5.30 in the afternoon, and a general skating session is set from 9 to 11 in the evening.

SCOPE FOR A THOUSAND TALENTS as an Army Engineer

Yes, there is scope in the Canadian Army for engineers with many talents. Engineers who can design and build bridges, tunnels, dams, roads, airfields — engineers who specialize in mechanical, electrical and chemical engineering — engineers who can design and develop communications.

In the Royal Canadian Engineers, the Royal Canadian Corps of Signals and the Royal Canadian Electrical and Mechanical Engineers there are worthwhile tasks for every type of engineering specialist. Here are three paths to a Queen's Commission as an engineer, one of which may be your road to a fine career as an officer in the Canadian Army.

Regular Officer Training Plan. A plan applicable to all three services . . . the Army, the Navy and the Air Force. Under the terms of this plan acceptable University students and young men with college entrance are given a college education, and are paid while they learn to become officers. Training is given at either the Canadian Services Colleges or a University (or affiliated College).

Canadian Officers Training Corps — University Contingents. A plan for acceptable students attending Universities or Colleges with COTC contingents. Training is identical with that obtainable under ROTP and leads to a similar qualification.

Direct Entry Commission. Young University graduates may be accepted as officers in the Canadian Army, and on completion of necessary military training be granted a Queen's Commission on a short service or permanent basis.

For further information see your
 Army Resident Staff Officer,
