BROCKVILLE

STREET DIRECTORY.

The occupation is given in the street directory only at the place of business : This is done, 1st, to distinguish a residence from a place of business ; and 2nd, because the occupation can be given much more fully in the alphabetical than in the street directory, the latter being merely a plan of the streets showing the relative position of the buildings.

S. E. for side entrance is used in the street directory to show that the building in question faces the cross street.

Streets running north and south are numbered from the south north ; those running east and west are numbered from Broad st., Court House ave. and William st., east and west.

Names in brackets are in the same house.
