REHEARSAL OF THE EGLINTON TOURNAMENT.—On Saturday, 90th July, there was a grand rehearsal, with tents and barriers, and the adjuncts of the lists. The knights first filted at the quintain figure, and then at the heavy block figure. The tilting practice, during which the men were only pertially in armoust—only Lord Alford and Lord Glenlyon, to the best of our seasible time, have insort helmels—was successful in jousts between two, hights at a time, suage aspa-3-16. In full plate. The first succession of courses was between the Earl of Eginton, the Lord of the turnay—ind Lord Alford. The former was apparelled it a getty-course suit of burnished brass, with the coronect of his degree on his helmet; his plume and housings being of the colours of his livery, blue and gold. The latter was in bright steel, bearing on his helmet the creat of the joust was with Lord Alford, who planted one more attaint on the shield of his adversary than he himself suffered. After this Lord Glenlyon and Mr. Gage entered the lists; but even the beautiful horsemanship of the latter was unable to bring his horse up to the charge. Nothing could induce the animal to face, his opponent; and so much time was lost in the attempt, that the concluding joust between the Marquis of Waterford, and, we believe, Capt. Maynard, was of necessity postponed—it being then eight o'clock in the evening. REHEARSAL OF THE FOLINTON TOURNA

Lord /illiam Bentwick has scarcely left his equal among the Liberal Aristocracy.—In waried and addous situations at home and abroad, he "kept the whiteness of his soul." With opportunities of amassing wealth such as few have enjoyed, and the offer of that advancement in the tanks of the Peerage which is "order" So engerty over, he preferred to remain a man of the people, with a moderate fortune. There has been and are many more noisy professors of attachment to popular interests, but few have acted up to their principles as steadfastly as the late member for Glasgow. What he promised he performed. He held out no false expectations; and if his constituents were somewhat disappointed in his Parliamentary career, they will not fall to bear in mind, not only the moderation of his professions, but the unforturate state of health which kept him back on many occasions when inclination might have prompted him to take an active part in the business of the Rouse of Cammons.

The Chartist movements and the prospects of the harvest in England, the affairs of British Indla, and the state of the foreign relations of the Great Powers with Mehemet Ali, are all of a nature to arouse in the minds of us Colonists a feeling of intense anxiety for the receipt of tidings from the "Fatherland".

Trial of Jalbert

The steamer Engle arrived yesterday at 33 P. M., bringing to our address the Montreal papers—which are barren of news—and the following interesting letter from our correspondent :-

pondent:—

Ziontreal, Wednesday, 4th Sept.

This c.y, during the last two days, has been kept in a state of the most feverish excitement in consequence of the trial of the notorious Captain Jalbert fo, the murder of the late Lieutenant Weir, of the 32nd regiment. Jalbert appears to be about sixty years of age, tall, good looking, and of respectable appearance, deportment, and, dress. He has been, during the trial, generally cool and collected, though he now and then shed (or affected to shed) tears.

the 27th August, Frederickton 31st, and Miramichi 27th. We subjoin a few extracts from Macket hit will be seen that His Excellency Sir John Harvey has compiled with the requisition made to him to convene the Legislature. The inhabitants of Eastport, we are happy to find have "reciprocated" the generosity of the New Brunswickers.

At a Public Meeting, buld at the County Court House on Tuesday evening last, pursuant to notice given, which was numerously attended: William D. Hartt, Esqr., was called to the chair, and Mr. Ward was requested to act as Secretary. The object of this meeting was to consider the best methods, which could be abopted for the preservation of property from conflagration and plunder. Seven resolutions were passed for the establishment of fire companies.

On the following day the committee proceeded to collect subscriptions, and obtained upwards of £100 towards the accomplishment of the object in view; and which will probably be a sufficient sum, in addition to that already in the hands of the Fire-Wardens.

On Saturday last a Proclamation was issued by the Lieutenant Governor, requiring the inhabitants held yesteriany. He was the will be every disposition in that eity to carry into effect those Laws which the Legislature to assemble on Tuesday the 10th September, "in consequence of a great recent public calamity, and other weighty reasons." It is understood this measure is in accordance with the wish cymmunicated to His Excellency by the inhabitants of St. John: and we trust there will be every disposition in that eity to carry into effect those Laws which the Legislature may enack.—Sentinel.

Halifax, Ang. -7.

At a meeting of the Inhabitants held yesteriady, at the Exchange Coffee House, to take the chair. The Chairman having addressed the meeting states the object for whigh it had been called. When the following Resolutions having been submitted were unanimously adopted.

Resolved, That this meeting sincerely symmitted the count of the country of the country of the country of the country

the conclusion, desired an adjournment of the court till to-morrow, to enable them to prepare for the defence. The proposition was of course rejected, and Mr. Walker commenced his address on behalf of the prisoner, which up to the present moment, (five o'clock) is not concluded. He does not seem to deny that the prisoner was a participator in the murder, but contends that he was guilty only "alike with the rest"—that he ought to be indicted for high treason,—and that Dr. Nelson, as his superior in command, was more guilty than he. I do not believe that the duties of Attorney General and Solicitor General were ever, in my recollection, more zealously and efficiently performed than on this occasion. The counsel for the prisoner consists of Messrs. Mondelet, Cherrier, Walker and Lafontaine.

Ye thing can be more clear and conclusive that the prisoner consists of Messrs.

Cherrier, Walker and Lafontaine.

Nothing can be more clear and conclusive than and which has been adduced of the guilt of the prisoner; and I think that justice will be done one way or another. Public excitement is very great. On the jury there are eight Canadiams, two Scotchmen and one I rishman. In impannelling the jury, ten were challenged by the prisoner, and twenty by the Attorney General.

P. S. Account.

P. S. After an address of an hour and a half Mr. Walker has concluded, and the Court is now being addressed by Mr. Mondelet. After an address of an hour and a half

The Montreal Herald of Tuesday states that The Mo.treal Herald of Tuesday states that the objections raised by the counsel of the muriaere Jalbert, have been over ruled by the Coart, and his trial would commence that day If the Jury is composed of Canadians, the murderer will most certainly be acquitted, as in the case of the murderers of Chartrand. If such proves to be the case, we hope that the counsel, the jurymen and criminal will yet meet the fate they will so richly merit. Verbum sol. The excitement on this subject is immense, more so than many may imagine.

"RESPONSIBLE GOVERNMENT." We have much pleasure in transferring to We have much pleasure in transferring to our columns from the Niagara (U.C.) Chronicle, the subjoined statistical information respecting the Canadian newspaper press. Our talented contemporary has fallea into some slight errors, which we take leave to correct. There are four French papers published in Lower Canada, namely—La Gazette and Le Gandien at Quebec, and L'Amista Peuple and L'Aurore des Ganadas at Montreel. The acter is an obscure radical print unworthy of being classed was among the "responsible" journals; its publisher was incarcerated last winter on a charge of teeson, and since his release he contines his attention to extracts from other papers. With respect to the other three French journals, there is "no mistake" as to the Gazette and Amista Peuple being on the right wide of the question. The Canadien is not on the right side; its editor and proprietorwerse both placed in a predicament, last winter, similar to that of the publisher of the Autore.—Now, with these corrections, and the addition of the Sherbrooke Farmer's Gazette to the "Anti-Responsibles," our Niagar contemporary's list will show a majority of twenty-three to fifteen against "Durham and Responsibility."

I trust, however, that when the real state of the case is known in the Province, any excitement which may have been raised by this decision will subside—and that it will be in your power to disabuse the public mind of the opinion, that Her Majesty's Govenment regard with indifference, or are disposed to treat with a misplaced lenity, such crimes as those of which the prisoners in question are self-convicted.

THEATRE ROYAL.—Miss Davenport continues to attract numerous admirers to the Theatre; we cannot speak of last night, not having been present. On Wednesday evening, this extraordinary young lady acquitted herself to the serfect satisfaction of the audience, in the diffical; character of Young Norval; and in the afterpiece—"Old and Young?"—she severely Exact the actioninatory powers of "old and young?" in the Theatre.

This evening, Miss Davenport will appear in two pieces, as a country oungkin in one, and as the spoiled child in another.

Aurora Borealis .- Tuesday night, the he Aurora Bercalis.—Turesday night, the heavens resented an appearance of unusual splendour. Early in the evening the Aurora slightly illumined the North and South East; it continues to increase in billiancy fill to; sards 1 pass 9, when it presented a scene of magnificent grandeur. In the zenith a bright radius of light was centered and shot out its oblique rays with various primitive coloum, and occasionally appearing of a deep crimion and green, intermingting and crossing each other until about 10 o'clock, when it gradually disappeared.

On Saturiay last, His Excellency the Governor Teneral left, town for Sorel, by way of Chumbly; and we understand, that before his return in feed quastors, His Excellency will proceed to Quebac, and review the troops in garrison there.—Montreal Gazette, Tucaday.

A fire took place at Kingston, or the 30th August, which was not extinguished until it nahoused a dozen of families, and burned sight habitations, which were principally built of wood. The papers speak in the highest erms of the assistance rendered by the mili-ery in arresting the progress of the flames.

THE REGATTA.—The Rowing Matches only came off yesterday as there was no wind, indeed it was nearly dead calm, and the sailing matches were postponed till today.

*The result of the rowing matches was as fol-

The 1st. Class four oars race was won

The 1st. Class four oars race was won by the Quebec Rowing Club's new gig Red Roter, built at Greer cock, beating the T1st's boat Thames by I minute 16 seconds.
The 1st Class 6 oared race was won by the Quebec Rowing Club's boat Flamingo beating the six oared boat of the Officers of the Coldstream Gnards, by about the same time.
In the second Class race for 4 oared boats, Mr. Cotman's boat came in first, but the race was given against him from having ran foul of the other boat, rowed by men of 186 Tist Regt.

The second Class six oared race was we by a second boat belonging to the Quebe Rowing Club, manned by soldiers of the Quarter Master General's boat's stew.—Mer.

The Army.

On Saturday night last, the Rural Police, St. Cesaire Station, under the Superintendance of W. J. Chaffers, Esq. Stipeadiary Magistrate, succeeded in securing three desarters from the Goldiers of them young men of 18 or My earn old, and arrived with the last draft from England; two of them young men of 18 or My earn old, and arrived with the last draft from England; two of them young men of 18 or My earn old, and arrived with the last draft from England; two of them had their arms and some ammunition with them. They had left Lapraire on Monday-evening last, got across the Richelieu below St Johns by swimming, and becoming bewildered, instead of steering for the Smits, they took quite a contrary direction. They had suffered much from hunget and cold, their shoes and stockings were worn out, and they declared they had tasted nothing but wild berries for upwards of two days. With every outlet to the United States so well guarded as at present it is folly for our soldiers to attempt desertion, they only bring disgrace and punsahment on themselves by the attempt.—

To the Editor of the Quebec Transcript.

Sta,—In your paper of Friday, the 23rd August, there appeared a communication, said to be an "Extract taken from Appendix D. to Lord Durbam's Report, containing Mr. A. Buller's Reports on the state of Education in Lower Canada."

The "details" given in that extract are in my opinion of little or no importance, and would have been passed over by me, as they have been by many, as altogether unworthy of notice, had not a foul calumny appeared in the last paragraph;—a calumny, to say "> least of it, of a very injurious nature to class of

men, whose great misfortune is that they are engaged in the humble though honorable em-ployment of teaching "the young idea how to shoot." Ecrover granting that the "Gentle-man" who hunted out the schools found one, or shoot." Eorewen granting that the "Gentleman" who hunted out the schools found one, two, or even three persons, whom he considered unquelified to teach, still it is unfair, and unjust, thus to hold up to public contempt, the "many" for the incompetency of the few. "Many," says Lord Durham in his Report.— "Many masters and mistresses are utterly incompetent." Now, as his Lordship has adopted the Report of the Commissioner of Education as his own, he having pledged himself for the accuracy of it, I as one of the public Schoolmasters in Quebec would ask—upon whose authority does he make the assertion that "many masters are incompetent." Is it from his own personal showledge?—No, for he has been candid enough to say, that it is not from his own personal observation, but from that of another. Is it upon the authority of the Schools whilst he held that office. But whether he did or not, I can only say he never visited the school I have charge of; and I do not heastate to state that this circulator of what the uneducated vulgar would be apt in their ignorance to call an untruth, never examined me, consequently he is totally ignorant of my qualifications as a teacher. I dare not only his Lordship to prove what he has thus circulated under the sanction of his "mighty name," but also the Commissioner himself, who by the by was thought by the majority of the citizens of Quebec to be better fitted for the race-course, the wrestling and boxing rings, than for devising plans of education for the race-course, the wrestling and boxing rings, than for devising plans of education for enlightening the illiterate inhabitants of Lower

rings, than for devising plans of education for enlightening the illiterate inhabitants of Lower Canada.

Is it upon the authority of the "accurate gentleman" in whom Lord Durham has "complete confidence"? As that gentleman is still in or near Quebec, I in my own name, and also that of the "many" who are of the same profession, call upon him either to retract what has been published, or poir out by name all those "masters" that "are utterly incompetent" so that the public may judge whether his report be "accurate" of not. As a gentleman of honor he cannot shrink from this. It would only be an act of justice to the school-masters who have thus been either intentionally, or to put the most charitable construction on it, inadvortently exposed to public masters who have thus been either intentionally, or to put the most charitable construction on it, inadvortently exposed to public it easier to make an assertion than prove it. In a word, the Education Commissioner, as well as his associates, appear to have viewed every thing through a distorted medium; for not contented with exposing the ignorance of the country schoolmasters and belabouring them most unmercifully, they imagined, I doubt not, that their work would be incomplete unless those in the city had at least a share—thus verifying the old adage, "Qui vult codere camen, facile inventif fustern."

HEADACHE.

R. E. SPOHN, a German physician of much note, having devoted his attention for some years to the cure and removal of the causes of NERVOUS AND SICK HEADACHE, has the satisfaction to make known, that he has a remedy which by removing the causes cures effectually and permanently this distressing complaint. There are many families who have considered Sick Herdache a constitutional incurable family complaint. Dr. assures them that they are mistaken, and labouring under distress which they might not only alleviate, but actually eradicate by the use of his remedy. It is the result of scientific research, and is entirely of a different character from advertised patent medicine, and is not unpleasent to the taste. To be had of I. I. SIMS.
