CREDIT RATES OF PREMIUM.

THE great and decided success which has attended this Institution, has indaced the Directors to REDUCE the RATES originally required in British North America, to the ordinary European Rates. The result of such Reduction is to enable parties to avail themselves of the important benefits to Life Assurance at more forcer Rates of Previous than those of any other dustrance Company to messeling business in Ordinary The Directors have also resolved to entend in British North America the advantages afforded by the HALF CREDIT RATES of PREMITES THE MARKET OF THE MINES OF THE

North America without anecome their respective Policies.

PETER MORRISON,

"We hereby certify that we have examined a specimen of Cod Liver Oil, transmitted to us for this purpose by Messra. Langton, Brothers & South."

"The Oil is of a pale yellow color, with a slight but not offensive fishy odour, and is free from any disagreeable taste. It is very fluid, and in consistency and general appearance resembles good Florence oil.

"We are of opinion, from its purity and the absence of any unpleasant odour or flavor, that it is preferable for medicinal use to those samples of Cod Liver Oil which have hitherto come under our notice.

CANADIAN AFFAIRS.

(FROM OUR OWN CORRESPONDENT.)

The St. Gregoire Rinters Acquitted. As I anticipated, after a long and patient inves-tigation, the Petit Jury came into Court this morning, and stated, that each prisoner accused of

elequence of the learned Solicitor General, and the assistance of the Education Commissioners, at the trial, there remains nothing left but to attach the proceedings of this trial, as an appendix, to the voluminous Report of the Government Commissioners, which will, no doubt, be given to the public. The question has been asked, where has been Dr. Meillieur during these investigations !- Echo answers " where ?"

The inhabitants of the Parish of St. Gregoire, attending at the Court House, have now gon home, crying defatte au Gouvernment. There en much sympathy shown to the prisoners. and I believe it has been enhanced by the proceedings of Government in regard to the Educational Law. Subsequently to this trial, the Solicitor General moved to fix the trial of Mr. Courval, (a Notary,) Bourque, and Thibodeau, for conspiracy against the Rev. Mr. Harper, for the first day of next Term. It were better that this trial should not appear in Court, for it is not of that nature which will tend to do good, even if the defendants should be found guilty.

The Petit Jury was composed of persons from all parts of the District, and it is believed that the being brought home to the parties accused.

Had it not been for these School cases, the Gaol Calendar would have justified the Sheriff in presenting the learned Chief Justice with a pair of white kid gloves, which, in these days of retirenchment, I dare say the Sheriff was glad to be excused from doing. The remainder of the trials have been postponed to the next Term.

The adulteration of medicine appears to be carried on in a systematic mode. We give an extract from a writer on the subject :—" Oxyde of zinc is adulterated very commonly with subplate and carbonate of baryta and Duch lead, the latter preadulterated very commonly with sulphate and carbonate of baryta and Duch lead, the latter previously adulterated with a substance still cheaper, Plaster of Paris. Nitrate of silver consists precisely of four parts of this very valuable salt, and one part of Nitrate of Potash, ("villainous saltpetre.") Balsam copaiba is nothing but Castor-Oil with a dash of the true balsam. White precipitate (amiduret mercury, &c., of Kane,) is usually made up of carefully precipitated carbonate of lime, (chalk,) exactly one part and white precipitate one part. Hydriodate of potash is hydriodate potash six parts, common salt one part, and carbonate of potash half-a-part. Sulphate magnesia is glauber's salt in small crystals—no attempt at mystification. Tartar emetic is almost always sulphate of potash and tartar emetic (the latter, of course, by some mental process, also considered pure) of each equal parts. Calomel is, (mind don't go astray,) 1st, for the Western Stafes, "pare calomel one part, earbonate of lime nina parts, pure calomel three parts;" 2nd, for the Eastern Stafes, "pare calome one part, earbonate of lime three parts." Lactate of iron is sugar of milk and sulphate of iron; of lactic acid none. Opium is that drug carefully washed to get out the morphia, and made up again as good as new. Real Turkey rhubarb, much the same rhubarb exposed to spirit. Quina and morphia fare little better. A good beginning has been made in the petition to the House of Commons, respecting the adulteration of milk. Let it be rigorously followed by one against the adulteration of medicines.

"Go out into the woods, Sambo," said a southern master to one of his negroes, "and cut me some crotches for a fence—to stick in the ground like this:" making at the same time an inverted A of two fingers on a table. The negro took his axe, went into the woods, was gone all day, and returned at last with nothing but his axe in his hand. "Where are your crotches, Sambo!" asked the master. "Couldn't fine none, massa' no how!" "Couldo't find any!" said his master; "why, there are thousands of them in the woods. Why; look at that tree; there are a half dozen on that: couldn't you find any like that!" pointing to a forked branch on the tree, "Oh, yee, massa, plenty o' dem kind; but they all cretch up: 'ought you wanted dem kind dat crotch down!"

of certificated instances, they have even reacced
sufferms from the very varge of an untimoly offere,
after all the deceptive neutrams of the day had atterly failed; and to many thousands they have
permanently secured that uniform enjoyment of
health, without which life lised is but a partial
bleading. So great, indeed, has their efficacy laveriably and infallity proved, that it has appeared
converly has than mirroulous to those who were
acquainted with the beautifully philosophical principles upon which they are compounded, and upon
which they consequently set. It was to their
manifest and assaible action in strifying the springs
and channels of life, and adding them with renewed tone and vigor, that they were indebted for
their name.

Unlike the host of mentionic measurements in

newed tone and vigor, that they were macette for their name.
Unlike the heat of pernicuous quackeries which boust of vegetable ingredients, the LIFE MEDICIBES are purely and solely vegetable; and contains assider Electury, nor Antimony, nor Argonie, nor any other mineral, in any form whatever. They are entirely composed of extracts from rare and powerful plants, the virtues of which, though long known to several Indian tribes, and recently to some eminent pharmacontical chemists, are altogether unknown to the ignorant pretenders to

long known to several Indian tribes, and recently to some eminent pharmaceutical chemists, are alterative unknown to the ignorant pretenders to medical science; and were never before administered in so happily officacions a combination.

The first operation is to loosen from the coats of the stomach and bewels the various impurities and crudities constantly settling round them; and to remove the hardesed faces which collect in the convolutions of the small intestines. Other medicines only partially cleanse these, and jeave such collected numers behind to produce habitual Costiveness, with all its train of svil, or sudden Diarrhean with its imminent dangers. This fact is well known to all regular anatomists who examine the numan bowels after death; and hence the projudice of these well-informed men against the quack medicines of the age. The second effect of the VY SEPARIE LIFE MEDICIPES is to leanner the kidneys and the bladder; and, by this means, the liver and lunes, the builded even of

V. FTABLE LIFE MEDICINES is to cleanes the kidneys and the bladder; and, by this means, the liver and lungs, the healthful action of which entirely depends upon the regularity of the urinary organs. The blood, which takes its red color from the agency of the liver and lungs, before it passes into the heart, being thus purified by them, and nourished by food coming from a clean stomach, courses freely through the veins, renews every part of the system, and triumphantly mounts the banner of health in the blooming cheek.

The fellowing are among the distressing variety of human diseases in which the VEGETABLE LIFE MEDICINES are well known to be infallible:

INFE MEDICINES are well known to be infallible:

DYSPEPSIA, by thoroughly cleansing the first and second stomachs, and creating a flow of pure healthy bile, instead of the stale and scrid kind; FLATULENCY, Loss of Appetite, Heartburn, Headas, Restleamers, Ill-temper, Anxiety, Languor, and Melancholy, which are the general symptomes of byspepsia, will vanish, as a natural consequence of its cure.

Constiveness, by cleansing the whole length of the intestines with a solvent process, and without violence: all violent purges leave the buwels contive within twe days.

Diar area and Cholera, by removing the sharp acrid fluids by which these complaints are occasioned, and by premoting the lubricative secretion of the mucous membrane.

Fevers of all kinds, by restoring the blood to a regular circulation, through the process of pengiar on such cases, and the thorough solution of all intestinal obstruction in others.

The Lara Medicines have been known to cure RHEUMATTEM permanently in three weeks, and GOUT in half that time, by removing local inflammation from the muscles and ligaments of the joints.

Dropsing of all kinds, by freeing and strengthening the kidneys and bladder: they operate most dolightingly on these important organs, and hence have ever been found a certain remedy for the worst cases of GRAVEL.

Also Worms, by dislodging from the turnings of the heavily of the strength of the process of the content o

of the hearth was the state of the consumption, by relieving the air-vessels of the lungs from the mucous which even slight colds will occasion, and which, if not removed, becomes bardened, and produces these dreadful diseases.

Scurvy, Ulsers, and Inveterate Sores, by the perfect purity which these LIFE MEDICINES give to the blood, and all the humons. Scorbutic Eruptions and Bad Complexions, by their alterative effect upon the fluids that feed the skin, and the morbid state of which occasions all eruptive complaints, sallow, cloudy, and other disagreeable complexions.

The use of these Pills for a very short time will effect an entire cure of SALT RHEUM, and a striking improvement in the clearness of the skin.

offect an entire cure of SALT RHEUM, and a striking improvement in the clearness of the skin. COMMON COLDS and INFLUENZA will always be cured by one dose, or by two even in the worst cases.

PILES. As a remedy for this most distressing and obstinate malady, the VEGETABLE LIFE MEDICINES deserve a distinct and emphatic recommendation. It is well known to hundreds in this city, that the former proprietor of these valuable Medicines was himself afflicted with this complaint for upwards of THEATT-FIVE YEARS; and that he tried in vain every remedy preacribed within the whole compass of the Materia Medica. He however at length tried the Medicine which is now offered to the public, and he was cured in a very short time, after his recovery had been prenounced not only improbable, but absolutely impossible, by any human means.

PEVER AND AGUE.

For this scourge of the western country these Medicines will be found a sufe, speedy, and certain remedy. Other medicines leave the system sub-set to a return of the disease—a cure by these medicines is permanent—TRY THEM, BE SA-TISFIED, AND BE CURED.

TISFIED, AND BE CURED.

Bilious Fevers and Liver Complaints.

General Debility, Loss or APRIFIE, And Designates of Females—these medicines have been used with the most beneficial results in cases of this description:—KRES'S EVIL, and SCROPULA, in its worst forms, yields to the mild yet powerful action of these reimericable Medicines. Night SWEATS, NEXUOS COMPLAINTS of all kinds, Palmyration of the Heart, Palmyrat's Colle, are speedily cured.

METERIFICATE AT. THESE ACRES

MERCURIAL DISEASES. Persons whose constitutions have become impaired by the injudicious use of Mancuar, will find those Medicines a perfect cure, as they never full the effects of Mercury infinitely sconer than the most powerful preparations of Sarsaparilla. A single trial will place them beyond the reach of competition, in the estimation of every patient.

oparations are the reach of competition, in the simulation of every patient.

remedies; and, I doubt not, but what there are humire is who are distinated from taking your excellent Medicines, in consequence o the deception and inefficiency of many advertised remedies put forth by suprincipled men, in flaming advertisements. But, what a pity it is that the deception used by others should be the means of discussing many laboring under disease, from making trial and being cured by your excellent remedia. Humanly speaking, they have saved my life; when I commenced making use of them, I was in a wretched condition, but began to experience their good effects in less than three days; and, in six weeks from the time I purchased the Mcdicines, to the great surprise of all my friends, I was entire y curd, and had increased fifteen pounds in weight, having taken one box of the Pills and two bottles of the Wine. Would to God that every poer sufferer would avail himself of the same remedies!

Dr. David Marvin, celebrated Practitioner of New York, declared publicly, that one bottle of Halsey's Forest Wine contained m.re virtues than fifty of the large bettles of Sarasparilla. Messes, S. S. Laupman & Co., the largest and most respectable Druggists in Syracuse, in a letter, says:

"From what they have heard and seen of Halsey's Forest Wine, it is an excellent and good iffedicine, and will, undoubtedly, become the leading Medicine of the day." Dr. Mott, of New York, delease obscribes to the virtues of Halsey's Forest Wine, by recommending it to many of his Patients.

The following opinion of the beneficial effects of the Plantagenet Water, is from the last number of the British American Medical and Physical Journal, edited by Dr. Hall. The Dector recommends the employment of this water to the special attention of the Profession, both in Canada and the United States. Nothing further is required to ensure their general use by all classes of our citizens:—

stmount of money consequently man by metr proprietors, whese, have at no time, since we undertisely the management of a Journal intended solely for the advancement of medical science, found favor in our eyes. No shall they, We have always adheced to the old maxim, "Se autor ultra creption." We have always thought, and are daily more convinced of the trusfulness and sorrectness of our opinion, that all the world was never incended to practice he medicalart, inassmech as all men—aye, and all women no—are tunded to make themselves masters of the civace of medicine; and it must be admitted, without a navil, that without a foundation there can be no superstructure. Not that we would dure to question freq qualifications of all to become, perhaps, even, ncientife practices of the Healing Art—far from it; but seeing that ifferent girls have been assigned to different indivinuals, from the foundation of our world, and that one class in accessarily dependent upon mother for its comfort and support—the rich and poor, the educated and illiterate, the profession of science and the simple mechanic—to we held, that the public should be directed, under God, in the main tenance and preservation of health, by men who have given, and continue to give, the best energies of their mind to this particular study. It is under impressions of this kind that we direct the attention of our professional brethren to the advertisement of Mr. Lasseque on the cover. We have, in common with our medical men, prealysis, as to its constituents, furnishes at one f as applicability and usefulness.
