Technical and Bibliographic Notes / Notes technique et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming are checked below.

- Coloured covers / Couverture de couleur
- Covers damaged / Couverture endommagée
- Covers restored and/or laminated / Couverture restaurée et/ou pelliculée
- Cover title missing / Le titre de couverture manque
- Coloured maps / Cartes géographiques en couleur
- Coloured ink (i.e. other than blue or black) / Encre de couleur (i.e. autre que bleue ou noire)
- Coloured plates end/or illustrations / Planches et/ou illustrations en couleur
- Bound with other material / Relié avec d'autres documents
- Only edition available / Seule édition disponible
- Tight binding may cause shadows or distortion along interior margin / La reliure serrée peut causer de l'ombre ou de la distorsion le long de la marge intérieure.
- Blank leaves added during restorations may appear within the text. Whenever possible, these have been omitted from filming / Il se peut que certaines pages blanches ajoutées lors d'une restauration apparaissent dans le texte, mais, lorsque cela était possible, ces pages n'ont pas été filmées.
- Additional comments / Commentaires supplémentaires:

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modifications dans la méthode normale de filmage sont indiqués ci-dessous.

- Coloured pages / Pages de couleur
- Pages damaged / Pages endommagées
- Pages restored and/or laminated / Pages restaurées et/ou pelliculées
- Pages discoloured, stained or foxed / Pages décolorées, tachetées ou piquées
- Pages detached / Pages détachées
- Showthrough / Transparence
- Quality of print varies / Qualité inégale de l'impression
- Includes supplementary material / Comprend du matériel supplémentaire
- Pages wholly or partially obscured by errata slips, tissues, etc., have been refilmed to ensure the best possible image / Les pages totalement ou partiellement obscurcies par un feuillet d'errata, une pelure, etc., ont été filmées à nouveau de façon à obtenir la meilleure image possible.
- Opposing pages with varying colouration or discolourations are filmed twice to ensure the best possible image / Les pages s'opposant ayant des colorations variables ou des décolorations sont filmées deux fois afin d'obtenir la meilleur image possible.

This item is filmed at the reduction ratio checked below /
Ce document est filmé au taux de réduction indiqué ci-dessous.

The copy filmed here has been reproduced thanks to the generosity of:

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

MOON AT FIRST QUARTER

June 29th, 1906

Soon: as the evening's shades prevail,
The Moon takes up the wondrous tale;
And nightly to the listening earth
Repeats the story of her birth.

The Heavens Declare the Glory of God

THAT great ceiling fretted with gold, and ornamented with quivering points of light, supported without pillars, without abutments or foundations; that stately canopy, bedecked with stars, and sufficiently spacious to form a covering for suns innumerable, and their planetary companions, has from all time been the study of him who is made like unto his God.

From time unknown man has sought to learn the great book open before him. To know something of those mighty orbs that roll along the space of the sky and to trace the Creator's steps in yonder starry plains, has

been the desire of thoughtful man from time immemorial.

As the glories of spring give us a view of the work of the great artist, as the stores of nature reveal the beneficence of the bountiful provider, as the mid-day sun gives us a ray of his eternal brightness, so surely the caverns of stellar space introduce us to the mysteries of the perfections of the ALMIGHTY.

The Bible reveals God's love and mercy. The book of nature presents His wisdom and His goodness: but yonder starry vault with wide-open pages displays His power, and His glory.

The sun with his radiant honors, the moon with her pale light of molten silver, the planets in their unutterable silence, the stars like thousands of golden tapers fixed in their sockets, all pouring out their light, tell the

Photographed, by the Author, with 5-inch Brashear telescope.

FULL MOON, JULY 5th, 1906

"It shall be established for ever as the moon, and as
a faithful witness in heaven."—Ps. 89 : 37.

story of HIS OMNIPOTENCE.

Looking upward to the sky on a clear moonless night, shining points meet the eye in every direction. As I gaze upward to that gilded roof with those celestial lamps glittering through the gloom—Stars, methinks you beckon me! Eternal lamps, your splendor inspires me! Divine, monitors, I understand your meaning, and I, even I, also will strive to obey Him who said: "Let your light so shine among men."

To inquire into the mystery of those countless orbs circling through never-ending time in limitless space, to lift the curtain of nature and to inquire into the great cosmos, has been the effort of man in the past—is the effort of man now—and will be for all time to come. With all the

knowledge of centuries at his feet, with the best instrumental equipment that the world to-day can provide, with the spectroscope—that subtle thing of recent invention by which light waves are measured and classified—the sensitive plate, the climax of the chemical laboratory—the telescope, the fruit of man's genius, by which he can pierce the gloom far beyond the pall of earthly night—with the faith of the patriarchs, prophets, apostles and martyrs to stand upon; yet with all this, man is able only to spell but a syllable of His eternal name, and catch but a glimpse of His Glory.

As the mysteries of the love of God to the world can never be fathomed, as the secrets of nature upon the ocean wave, on the mountain top, in the flower of the field, or in the bowels of

Photographed by the Author.

THE SUN, JULY 27th, 1906

For the Lord God is a sun."—Ps. 84:11.

the earth can never by man be understood, neither can man ever know the mysteries concealed in the depths of space.

Contemplating the star-strewn heavens, the poet Shelley wrote:

"Below stretched the universe there,
Far as the remotest line
That bounds imagination's flight,
Countless and unending orbs
In mazy motion intermingled,
Yet each fulfilled immutably
Eternal nature's law.
Above, below, around,
The circling systems formed
A wilderness of harmony;
Each with undeviating aim,
In eloquent silence, through the
depth of space,
Pursued its wondrous way."

The abyss of this immense concave, radiant with millions of constellations, tinged with shades of infinite color, surely is a wondrous sight, and mocks all human grandeur.

"Jay proud arch; built with divine
ambition.

Built in disdain of limit.

Built in the taste of heaven.

Vast concave: ample dome:

Wast thou designed a meet apart-
ment for deity?"

Is it by this, **THY POWER**
and **GLORY** to man is revealed?

On a clear night about four
thousand stars are visible to the
unaided eye. With a large tele-
scope, such as the Lick or the
Yerkes, about one hundred
millions can be seen. By the
aid of the photographic plate,
one thousand millions are re-
vealed. But these are not all.
For only from the vestibule of
HIS great house are these photo-
graphs taken. The poet, caught
up by the Spirit of God, wrote:

"Come forth, O man, yon azure
round survey,

And view those lamps that yield
eternal day.

Bring forth thy glasses, clear thy
wondering eyes,

For millions beyond the former
millions rise.

Look farther: millions more blaze
from remoter skies."

Surely the view is profound!
Suns and worlds intermingled
float between suns and worlds, in
the unlimitable depths of ether.

What an extent of creation!
What numbers! What variety!
What velocity of motion! Who
but GOD could fashion them?
What but the power of the
ALMIGHTY could bowl them
through the circuit of the heavens
with such accuracy? GOD
rounded in his palms those pon-
derous bodies. He kindled those
bright fires that fill the firmament
with mysterious light. He
weighed them in the balances

of His might, and by the breath of His nostrils they sweep to the shores of eternity, returning only as His laws direct. "For ever singing as they shine, the hand that made us is divine."

Ye winds that howl in the stormy blast, or whisper in the breeze of summer; ye waves that wash the beach of coral strands, join in the chorus. Ye lightnings blaze to His honor. Thunders, sound His praise. Oceans, roll the anthem. Minutest creation, display His meekness. Ye planets that roll in your primeval glory, take up the strain. Great Suns, address your homage to Him who kindled your fires! Majestic dome, gilded roof, azure canopy, what a display of the Power and Glory of the ALMIGHTY!

Photographed by Professor Ritchie, Yerkes Observatory.

N. G. C. 6992. CYGNUS.

"Lift up your eyes on high, and behold who hath created these things, that bringeth out their host by number : he calleth them all by names by the greatness of his might, for that he is strong in power ; not or faileth."—Isa. 40 : 26.
