Friendship of David and Jonathan 1 Sam. 20: 1-42.

entary.—I. David's consultation with Jonathan (vs. 1-10). To save his life David had escaped to the aged pro-phet Samuel in Ramah. Here David was placed in the school of the prophets at Naioth, a part of Ramah, But Saul learned of his retreat and David was obliged to leave. It was then that David appealed to Jonathan for assistance. On the day following, the festival of the new moon was to be celebrated, and David would be expected to be present. But he felt that it would not be safe for him to go; accordingly he ask. safe for him to go; accordingly, he ask-ed Jonathan to make excuses to Saul for his absence and thus learn how Saul felt ans assence and thus learn now Saul rett toward him. "Though David was the anointed king to reign after Saul he had everything to fear from Saul, and there-fore concluded it better to secure him-self than to get into danger. He might have rallied an army to his defence, but he had not sought the kingdom or public he had not sought the kingdom, or public notice, and he chose to trust God to bring about his affairs in His own time and way."

II. The covenant (vs. 11-23). "The pridialogue which is here detailed at full length presents a most beautiful exhibition of these two amiable and nobleminded friends. Jonathan was led, in the circumstances, to be the chief speaker. The strength of his attachment, his pure disinterestedness, his warm piety-his invocation to God consisting of a prayer and a solemn oath combined— the calm and full expression he gave to his conviction that his own family were by the divine will to be disinherited and David elevated to 'the possession of the throne; the covenant entered into with David on behalf of his descendants, and the impression (**16) imprecation (v. 16) denounced on any of them who should violate this part of the conditions; the reiteration of this covenant on both sides (v. 17) to make it indissoluble; all this indicates such a power of mutual affection; such mag-netic attractiveness in the character of David; such susceptibility and elevation of feeling in the heart of Jonathan, that this interview for dramatic interest and moral beauty is unrivalled in the records of human friendship." It seems clear that Jonathan expected David to occupy the throne of Israel (v. 13), and he acthe throne of Israel (v. 10), and ne ac-oordingly exacted a promise from him to show kindness to his posterity after his death as well as to himself during his lifetime. "His words, like Saul's in chapter 24, 21, are prompted by a fear lest even David should conform to the rous Oriental custom by which the first king of a new dynasty often tried to secure himself on the throne by murhis predecessor's family. David fulfilled his promise by showing kindness to Mephibosheth. See II. Sam. 9, 1-13; 21, 7."

Saul's murderous design (vs. 24-34.) Following the interview between Jonathan and David, David remained hid in the field while Jonathan returned to test his father and find out his purpose Jonathan soon discovered that his father was very angry against David, and had determined upon his death. 30. Against Jonathan—Saul was angry at Jonathan because he saw ne was pleading for David, ious woman-To any Oriental, nothing is so grievously insulting as a reproach cast upon his mother. To thine own confusion.—Saul accuses Jonathan of disgracing Gd faithful in all his house. God whis. -Saul accuses Jonathan of disgracing himself and his mother by choosing Damimself and his mother by choosing David as a friend. 31. As long as the son of Jesse liveth—"Saul had now fully made up his mind that David was his rival for the throne; that he was the man after God's own heart of whom Samuel had told him; and perhaps the fact that Samuel had anointed him was now generally known."

David exceeded—"The separation of two such faithful friends was equally grievous to them both, but David's case was the more deplorable, for when Jonathan was returning to his family and friends, David was leaving all his comforts, even those of God's sanctuary, and therefore his grief exceeded Jonathan's."

42. Go in peace—It was kindness in Jonathan to bid David depart, since his life was in such danger. They referred to the covenant they had made with each other, to be faithful and kind to each other from generation to generation. They found some comfort in this way in the mournful separation. two friends.

Teachings—Those who are theroughly honest and upright in all their doings are glad to call God as a witness. True love is self-denying and self-sacrificing; it stands by in the midst of adversity and trial as well as in times of prosperity and blessing. We should always be ready to assist those in trouble; favors shown at such times will never be forshown at such times will never be forgotten. It is right to protect our lives, to avoid danger and to guard ourselves against those who might seek to do us injury. The Lord is with those who trust in him to protect and sustain them in the hour of darkness and danger.

Thoughts—Because Saul did not humble himself before God, he became a prey to envy, pride, jealousy, cruelty and every malevolent temper. David might have raised a powerful party in Israel, but as God had called him to the kingdom he chose to let God bring him

kingdom he chose to let God bring him to it in his own way. God's way and time are always best.

Fernie, B. C., Aug. 12.—The temperature is decidedly lower, and if the cool spell continues there will be much rushing in for mattresses and blankets. Further supplies of tents from the military stores at Victoria have arrived and have been issued already. Blankets are scarce, and there is urgent need of a protection of rubber sheets as protection against the rain and damp ground. These may also be procured from the military stores, and negotiations with that end in view are now in progress. Colonel James Mason, of Toronto, who is one of the directors of the Crow's Nest Pass Coal Company, has been spending a few days in the city looking into the situation as created by the fire. He has interested himself in procuring military supplies for the stricken people, and has hopes of being able to assist the citizens tobeing able to assist the citizens to-wards procuring what is needed most. its ordinary obligations.

A citizens' meeting has been called for Friday evening next to take up the question of the acquisition of the electric light and telephone systems owned by the Coal Company. The sentiment in the city taking over these utilities is almost unanimous, but no one has been able to devise a satisfactory means for financing the proposition. The company appears to be prepared to deal liberally with the municipality, but the latter is not in a position to add to its obligations It has troubles enough There is difficulty, too, in the fact that the city's charter does not permit the municipality to engage in the electric light or telephone business. Special permission would be necessary for this purpose, and the Legislature would find The waterworks are on a different footing, but they are still in good shape, and are now managed by a company and present no problem. Other utilities must be reconstructed, and the question is as to who shall undertake the work Eventually, of course, all utilities will

Pretty Women Threw Flowers Into King Edward's Carriage

As He Entered Ischl to Visit Francis

Entertained at Dinner and Serenad ed by Vienna Choir.

Ischl, Austria, Aug. 17.- Through ires of beautiful women, dressed as Tyrolese peasants and throwing flowers into the royal carriage, King Edward entered Isehl yesterday to pay his respects to Emperor Francis Jos whose summer villa is in this quaint little town. Emperor Joseph, despite his advanced age, was at the station to meet the King and a loving greeting between the monarchs took place.

Edward, who left the Kaiser at

Crenberg at 11 o'clock on Tuesday night, traveled all night along a continuous line of sentries. From Cronberg to the Austrian frontier, German sentries stood 300 yards apart and this guard was continued by Austrian soldiers when the frontier was crossed.

The villa of Francis Joseph is The villa of Francis Joseph is too small to accommodate the King's entourage and he is stopping at the leading inn, a building more than 100 years old. The King and Emperor lunched together in the open air at the Imperial villa. Subsequently they took a drive together, at which question of state were discussed. While nothing of importance was given out regarding their conference, it is understood that it had aference, it is understood that it had to do largely with affairs in Turkey in whose future both countries are virtual ly interested.

Many German critics of King Edward profess to see in his visit to Emperor Francis Joseph an attempt to win Austria Hungary, one of the few remaining allies that Germany has, to the English column. They point to his alliance with Japan, his agreements with France, Rus-sia, Spain, Portugal and Belgium, and his command of the support of Denmark, Norway, Sweden, and Holland, as proof that his desire for the absolute control of Europe is still unsatisfied, nor will he until he has won every ally from Germany.

The Emperor last night entertained King Edward at a gala dinner during the course of which toasts were exchanged, expressive of the mutual pleasure of the visit, the King congratulating Emperor Francis Joseph on the celebration of his jubilee and both dwelling with satisfaction on the friendly relations existing between the two countries.

satisfaction on the friendly relations existing between the two countries.

The dinner was followed by a serenade given by the Vienna Mannergesang Verein, during which in sobedience to flashlight signals, beacon fires were lighted at 200 points in the surrounding mountains. The two monarchs then drove through Ischl to view the public fete and illuminations until nearly midnight, when the Emperor escorted his royal guest back to the hotel.

King Edward left for Marienbad, where he will take the waters this morning. Emperor Francis Joseph, who displayed wonderful activity during King Edward's visit, was at the railway station to bid his royal visitor farewell.

CROWN RESERVE AND LAROSE MINES STRIKE RICH ORE.

Two Giant Nuggets Hoisted From New Find on Crown Reserve-Larose Vein Said to be Three Feet Wide.

Cobalt, Despatch-Yesterday in the crosscut about twenty feet from the main shaft at a depth of one hundred feet the Crown Reserve mine struck what is believed to be their big main vein.

Two hundred pound nuggets were hoisted from the find last night. Supt. Cohen states that the ore is the same as the ore in the open cut one hundred and ninety feet to the west, where a large quantity of very rich ore has been taken out. The width of the vein been taken out. The width of the vein where it was struck in the crosscut had not been determined last night, but it is believed to be equally wide as at the other end of the vein. This virtually means that high grade ore has been blocked out of one hundred and ninety feet with every likelihood of the vein continuing to the east. The vein in the open out shows 36 inches in width, A new compressor plant will be in operation on the property next week. A big strike was made at the Larose mine this week in the north tunnel 140 feet in from the face of the cliff. It is re-ported that the entire face of the tunnel shows high grade ore for a width of three feet. The strike is considered very important on account of its being farther north than where other work has been done on the property.

He put his right hand to the spot, and withdrew it wet with blood. Then he remembered hearing the sound of a revolver and feeling a sharp pang of pain at the moment the candle went out. Banks must have fired at and wounded him.

He listened, but could hear no sounds of pursuit, and after a moment to recover his breath he sped on to the Court again, and letting himself in, stole up to his room.

The first thing he did was to examine his wound. It was not a serious one the bullet having just scored the fleshy part of the arm below the elbow, but it was extremely painful, and Jordan gnashed his teeth and cursed and swore as he washed the wound and bandaged it with

"If he should come, let him come up. I rather expect him with some important papers from London."

When the valet had left the room Jordan turned over his pile of letters impatiently, and then flung them aside. There was none from Audrey; she had not written him a line.

"Curse her," he muttered; "she treats me as if I were dirt. She can't write a short note of a few words to the man she is going to marry, can she? By Heavens! my lady, Fil break that proud spirit of yours presently! I will teach you to estimate Jordan Lynne a little more highly than you appear to do. Wait awhile, my lady; wait!"

Lloyds was a famous coffee house in London frequented by business men of substance, who, like many of their kind to-day, were willing to take a gambler's chance to make good posite on their money. A group of patrons of the place, including the substance of the place, and the place of the money. A group of patrons of the place, including many owners of ships, decided to form a sort of mutual protective society and insure vessels and their carciety and insure vessels and their cargoes against loss by any of the numerous causes which afflicted travel by
sea in those days. Each one in the group
made himself responsible for a certain

a proportionate share of the premium.

That was the beginning of Lloyds, Designed originally as a society for marine insurance— and that is still its princinal husiness—it has issued cipal business—it has issued policies against all conceivable kinds of risks. As in the beginning of its career, Lloyds is still backed by a group of men, much more numerous than the first group, and each one stands to lose more than did the whole of the order to Each member of the same than the coince

leg in the last furlong of a race and had to be destroyed. Highball was insured for a large amount.

Race horses and valuable pclo ponies are still insured, but the policies usually only cover possible losses while the animals are in transit. The dangers of the race track and the polo field were found to be too many for the insurers.

Llóyds makes a lot of money out of the vagaries of the weather. It bets huge sums right along that it is not going to rain on a certain day. Every once in a while it does rain and it pays out a pretty sum. Proprietors of race tracks frequently insure against a rainstorm on big stake days. Rainy weather will cut the attendance in half, but the money offered for the big stake must be paid whether 10,000 or 30,000 persons witness the race. Recently a suburban real estate concern, which spent \$15,000 advertising an auction sale of lots, took day fixed for the sale.

Out a policy against a rainstorm on the Paderewski, on his concert tours, takes out half a dozen different kinds of insurance, accident and health, and a separate policy on his valuable fingers. Kubelik, the violinist, also keeps his fingers insured on his tours. Caruso and several other grand opera stars carry insurance against colds and other maladies which affect only the vocal organs.

Practically all the wealthy owners of automobiles not only insure their machines against damage by fire, theft, collision or other accident, but also carry liability policies. If the chauffeur rons down and kills or injures anybody the damages which the victim gets must be paid by the liability company.

Many business men in Britain carry insurance all the year round on the life of King Edward, as they did for years prior to the death of Victoria.

Some Wall street stock speculators make it a practice to carry insurance on the life of President Roosevelt, because of the market upheaval which would follow the sudden death of the head of the

of the market upheaval which would fol-low the sudden death of the head of the nation. Lloyds will not issue its ling policies to everybody. It must know the man and know that his ragular business will suffer a loss in event of the happenings against which he insures.

FISHWOMEN ON THEIR DIGNITY. How They Forced the Removal of an

Officious Police Inspector. A telegram from Cherbourg describes

a strange happening there yesterday morning. The fishermen had brought in a big catch of fish and shellfish and the market was just opening when a police inspector stepped up to one of the fishwives to make note of an infringement of the local by-laws.

The woman had stepped two yards

further than the by-law allowed her to do. A minute later a second police complaint was made-against a woman wh had undertaken to sell the fish of a fishwife who was ill. A third complaint was made against a fisherman wh out of his turn in putting up his catch for sale.

The news of the police officiousness are news of the police officiousness spread quickly. Many of the women were still bargaining with the fishermen, but the last bids and counterbids could not be heard for the shouts of the women established by the state of the tablished behind the fish baskets on the market place. In two minutes the word was passed round that the fishwives were going to close the market in ord show their indignation against the

For some time all was hurry and bustle; within ten minutes the market square had been cleared and the fish re-turned to the boats in which they had been brought into harbor. Thus it was that the 75,000 inhabitants of Cherbourg were without fish yesterday. The strike came to an end to-day owing to the removal by the municipal authorities of the obnoxious police inspector.—From the London Standard.

THE GRAND TOUR

Miss Bessie Wright of Ottawa, with a parky of friends, is making the "grand tour" of Europe, and under date of July 9th, writes her mother, Mrs (Rev) Wright as follows :-

We are now in Venice. We spent yesterday sightseeing in Milan. Talk of architecture! I never saw such a grand view as the inside of the cathedral—52 immense pillars holding the roof, only a few chairs in front of the grand altar, the place capable of holding 40,000 people. Of course the paintings are grand. The carving on the outside is like lace work. 2000 separate statues outside and 1000 with

We were also in St. Ambrose's church, the patron saint of Milan. The parks and cemetery are grand. We saw a funeral of some rich old chap who had left and given money to orphanages, etc. The children all walked. Some of the wreaths on the outside of the hearse were about 5 feet

Pan is congestion, pain anywhere, has its cause else usually. At least, so says Dr. Shoop, and the prove it he has created a little pink tablet. That tablet—called Dr. Shoop's Headache Tablet—coaxes blood pressure away from pain centers, its effect is charming, pleasingly delightful, elently, though safely, it surely equalizes the blood circulation.

Guaranteed to Cure Lame Back

An excellent remedy for Reheumasm, Lame Back, Etc., Etc.

Read the following testimonial from man you all know:

Mr. W. A. Singleton,
Crosby, Ont.
Dear Sir.—In the winter of 1905 I was laid up with La Grippe and unable to to get relief from several other patent medicines. I was convinced by several of my neighbors to try St. Regis Lumbago Cure, and I can thankfully say it was the first thing that gave me immediate relief. Since that time I have never been without it in my house, and cannot speak too highly of it, especially for children, as it will break up a cold at once. I have also found it a sure cure for lame back.
You are at liberty to use my name for reference if you wish to publish it for the benefit of others. I am yours truly,

CRAWLED THREE MILES.

derful Pluck of Injured Man or Mountainside In Wales.

After the terrible experience of spending two nights on the side of a mountain in the Snowdonian range, with a broken leg, a young German doctor, named Hahn, lies in a weak condition at Penygwryd Hotel.,

Dr. Hahn, who hails from Berlin, left the Penygwryd Hotel, Llanberis, on a recent Sunday, saying he intended to climb one of the heights in the vicinity, but he did not inform anybody as to the place he meant to reach, nor did he engage a guide.

He did not return that night, and his absence did not attract a great deal of notice; but as he did not put in an appearance on the following day a search party was formed, and on Tuesday morning the missing man was found in a state of extreme exhaustion.

Dr. Hahn told a wonderful story of

was found in a state of extreme exhaustion.

Dr. Hahn told a wonderful story of pluck and resource. "I scaled the mountain for a considerable distance," he said, "when I lost my way in a dense fog, and to make matters worse an unlucky fall on the rugged path fractured my leg. I then became unconscious—for how long I do not know—and I remained on the mountainside numb with cold and blinded by the mist.

"Some sheep drew around me suriously, and for two nights and a day they were my sole companions.

"I thought I would make an attempt somehow to descend. I had a stout stick with me, and I broke it up into three pieces. I used two of them as splints for my fractured leg, and then I began my descent. But I was like a dead weight, and was compelled to stop and rest close to a huge chasm where one of the searchers saw me waving my handherchied.

"I had only a few bars of chocolate to sustain me during my pilgrimage."

Altogether Herr Hahn must have crawhed over three miles.

HUNTING GULLS' FGGS

Englishwoman Thinks It Fun to Be Lowered Over High Cittle.

Lowered Over High Ciffe.

A visitor at a seaside resort in England recently espied on the face of a cliff 400 feet high the figure of a woman. She was seated in a kind of chair arrangement suspended by ropes from above, and she carried a pointed pole to steer herself clear of the jagged rocks, while a canvas bag was shing across her back. The air was full of gulls, evidently much disturbed by her presence, and every now and then one of them would swoop down upon her and strike at her savagely with wing or beak.

The young woman turned out to be a Miss Leslie, who lived in the neighborhood and thought it amusing to have herself lowered over the edge of precipitous cliffs in order that she might collect gulls' eggs for breakfast.

"She'll break her neek one of these fine days," the fishermen said, but Miss Leslie declared that there was no occasion for alarm.

"There is very little danger," she said, "provided you keep your head, look out for dislodged falling stones and see that the ropes are strong and that they are not out by sharp edges of rock. It is delightful to fisel oneself swinging over some lofty precipice, to peep into the cunning places in which the eggs are laid and to hear the gulls screaming around one."

When Miss Leslie has no one to help her in the egg hunts she fastens the ropes to a stake or bush and lowers herself over the cliff. She sometimes takes young birds from the nests and has found that they make interesting pets. takes young birds from the nests and has found that they make interesting

Switzerland Leads. Switzerland Leads.

Switzerland takes the lead in the public ownership of telegraph and telephone services, having 10,548 miles of combined wires extending to all the railway stations and nearly every town and village in the country. It also has more telephones in use in proportion to the inhabitants than any other country in Europe. Great Britain has one telephone to 116 persons; Germany one to 112; Great Britain has one telephone to 116; France one to 301; Russia one to 2,023, and Switzerland one to 48. The Government—is now going into the business of manufacturing the instruments. The yearly charge for a telephone in office or residence is \$12.45, and the ates for long-distance calls are far below similar calls in Canada. An average of three long-distance calls a day, and the yearly charge of \$13.45 would not bring the total for both services for a year above \$24. Low charges and profits run together as the net earnings last year were \$364,000 on gross receipts amounting to \$3,000,000. It is instructive to note that the United States had at the chose of 1907, 3,939,000 telephones in use, or one for every twenty-two inhabitants. No less than 763,340 telephones were added during 1907, and the number nearly doubled during 1906 and 1907 over that at the end of 1906.

A Relic of the Penal Days. A Relic of the Penal Days.

There are two places in Ireland where it has been customary for many centuries to ring the curfew—the village of Tynan in County Armagh and Derry. The Derry curfew is a relic of the days when no Roman Catholic was allowed to live inside the walls of Derry, although the citizens were glad enough to have them in the daytime as laborers and customers. At sundown, however, the curfew bell was rung and every Roman Catholic who was then in town had to leave with all haste, even if it meant sleeping in the open on the bleak hills which surround the city.

Rabbits vs. Mutten in Australia. Rabbits vs. Mutten in Australia.
Up to the beginning of December, says a writer in Australia, 918,000 crates of rabbits, totaling about 23,000 tons, had been received in London during 1907, and the market for mutton was never so bad as it is now. It is the fostering of the rabbit industry which decimates the pastoral industry. Between these two there can be no compromise. It is sheep or rabbits.

ANIMALS PROMOTE CHARITY.

King Edward Devetes Tarf Wienings
For Benefit of Peor.

The King of Sweden recently told a story of King Edward's charitable propensities. Just before the race for the Derby which the King's horse Dismond Jubilee carried off, His Royal Highness, as he then was, was watching the horses proceeding to starting post. Suddenly turning to the King of Sweden, who was with him, he said: "I am most specially anxious to win to-day."

"Why so?" inquired the King.
"Because," was the answer, "I always give the princess whatever amount my success happens to bring me. With the stake money of the last Derby I won the princess provided 1,700 poor boys with a complete outfit—chothes, under-linen, hoots and all necessaries—and stamped on each saticle was. "From your friend the Prince."

chothes, under-linen, hooks and all necessaries—and stamped on each article was. From your friend the Prince."

Others besides the King have devoted great sums won on the turf to charity. The Duchess of Portland some time ago presented to her husband a very handsome biotting book of Russia leather, heavily mounted in silver. On the mountings are engraved the names of all the races won by that extraordinary racer Donovan. In 1869 Donovan won the Derby and the St. Leger, besides the Newmarket Stakes and many other important races. The total sum won by Donovan during his racing career amounted £70,000, and the whole of this large fortune the duke gave to his wife for the purpose of building almshouses for the widows of the duke's tenants, and a cottage hospital for the neighborhood.

Baron Hirsch was another great turfite most of whose whenings went to charity. As is well known the baron left almost the whole of his millions toward establishing colonies for Jews. But during his lifetime he spent more than £30,000 of turf winnings on charity.

All the winnings of La Flecha, amounting in all to £34,855, were devoted to various charities.

Dogs have done much for charity. The record in this direction is held by Tim, the famous Airechab terrier which belonged to Mr. Bush, the Great Western inspector at Paddington. For more than ten years before his death Tim trotted from train to train, inviting donations to the Railway Servants' Widows' and Orphans' Pund. The total of his collections exceeded £300. The dog always knew when royalties were about to travel. He would sit down on the edge of the carpet haid on the platform and refuse to move until he had had something added to his hoard. On five separate occasions Queen Victoria placed a sovereign in his box, and many times the King has done the same. W. W. Astor gave Tim his reseparate occasions Queen Victoria, separate occasions Queen his box, and many times the King has done the same. W. W. Astor gave Tim his record present—a check for £200 — on the occasion of the coming of age of his son. Tim died in August hast, but has been set up under a glass case, still to continue his charitable work.

but has been set up under a glass case, still to continue his charitable work.

Other animals, too, have indirectly contributed to the cause of charity. At Amersham, in Buckinghamshire, the superintendent of the Baptist Sunday school adopted a novel expedient for raising money for the Coago Mission. He distributed among his scholars a number of young rabbits. These they had to fatten at home, and when fit for market the creatures were sold, the proceeds going to the mission.

At Frieth, near Marlow, a pig raised no less than £7 for charitable purposes. It was raffled for and then given back by the winner and sold again. In a Lancashire town a local butcher presented a handsome young pig to a bazaar, on condition that a church member, got up in frockcoat and silk hat, should drive it through the village. The procession caused great amusement, and a collection realized more than £3.

The committee of Lloyd's have decided to bestow the silver medal of the Society of Lloyd's on Mr. John F. cided to bestow the silver medal of the Society of Lloyd's on Mr. John F. Welch, second officer of the steamship Bermudian, a young Canadian, only 21, and the brome medal on each of the five men who accompanied him, as an honorary acknowledgment of their extraordinary exertions in contributing to the saving of life in the case of the American schooner Mary L. Newhall. On Feb. 2, about 400 miles from Sandy Hook, the Bermudian fell in with the Mary L. Newhall, which had lost her rudder and was in a sinking condition. A terrific sea was running, and Captain Fraser, of the Bermudian, decided that it was impossible to lower a boat. The same might Mr. Welch volunteered to try and reach the schooner, if five of the crew would also volunteer. Five black West Indian British subjects came forward. A boat was lowered with great difficulty, and an attempted recome was made, which, however, falled, and the rescuing crew only reached their ship again after an exciting experience. The Bermudian stood by the sinking schooner all night, and at daybreak Mr. Welch repeated his attempt, succeeded in reaching the schooner, and taking off six of her crew. He and his boat's crew made a second trip, and rescued five more men, thus saving eleven lives, the entire crew of the schooner, which subsequently sank.

Old Scottish Sanctuary.

The old sanctuary of the Abbey and Palace of Holyrood House, to quote the full description, was an interesting institution. The debtor was free from arrest during the week. On entering the sanctuary he enrolled himself in a formal manner and obtained a room—that is, if he could pay for it. There was a public-house within the boundaries, and it was not uncommon to see the debtor in the inn playing dominoes and his creditors standing looking in at the window with wistful eyes. The debtor was safe, and he knew it, and the face of the creditor told the same tale. Sunday being a dies non, the debtor could leave his sanctuary and visit his family. The had to be careful to get back to Holyrood on Sunday night. Sunday being a debtor had the temerity to leave on a week day, but he did so at his peril. leave on a week day, but he did at his peril. "Hecla" Furnace

The "Hecla" has four grate bars. Each one can be shaken separately. This means that you can shake down just the part of the fire where the

ashes are, without disturbing the rest of the coals. With "Hecla" Triangular Grate Bars, you can get rid of all the ashes—save coal—keep the fire bright and clean—and do away with sifting ashes, because no fresh coal or half-burnt clinkers come down in the ashpan.

We would be pleased to talk over the furnace question with you and show you, part by part, just why the "Recla" Furnace is the best for you to buy. Come in any time.

Minard's Liniment Cures Diphtheria. Bismark's Test of Von Moltke.

In telling in the August 'McClure's' of an interview with Bismark in 1867, in which they discussed the Austrian

war, Carl Schurz says:

'Then he came to speak of the battle of Koeniggraetz, and especially of that "anxious moment" in it before the arrival of the Crown Prince in the rear of the Austrians when some Prussian attacks had failed and there were signs of disorder among the re-pulsed troops.

"It was an anxious moment," said

Bismark, "a moment on the decision of which the fate of the empire de-pended. I confess I felt not a little nervous. I looked at Moltke, who sat nervous. I looked at Moltke, who sat quietly on his horse and did not seem to be disturbed by what was going on around us. I thought I would test whether he was really as calm as he appeared. I rode up to him and asked him whether I might offer him a cigar, since I noticed that he was not working. He roylied that he was not smoking. He replied that he would be glad if I had one to spare. Is Pe-ru-na Useful for Catarrh?

Should a list of the ingredients of Peruns be submitted to any medical ex-pert, of whatever school or nationality, he would be obligated. would be obliged to admit without reserve that the medicinal herbs composing Peruna are of two kinds. First, standard and well-tried catarrh remedies. Second, well-known and generally acknowledged tonis remedies.

That in one or the other of these uses they have stood the test of many years' experience by physicians of different schools. There can be no dispute about this, whatever. Peruna is composed of some of the most efficacious and uni-versally used herbal remedies for catarrhal diseases, and for such conditions of the human system as require a tonic. Each one of the principal ingredients of Peruna has a reputation of its own in the cure of some phase of catarrh or as a tonic medicine.

The fact is, chronic catarrh is a dis-

ease which is very prevalent. Many thousand people know they have chronic catarrh. They have visited doctors over and over again, and been told that their case is one of chronic catarrh. It may be of the nose, throat, lungs, stomach or some other internal organ. There is no doubt as to the nature of the disease. The only trouble is the remedy. This doctor has tried to cure them. That doctor has tried to prescribe for them.

No other household remedy so uni-

versally advertised carries upon the label the principal active constituents, showing that Peruna invites the full inspection of the critics.

me think of a French p have who waltzed at a State ball thrice running with a pretty matron. Though he danced execrably, the matron was flattered, and when the prince claimed a fourth waltz she smiled and said: 'Thank you, sir, for she smiled and said: 'Thank you, sir, for this marked compliment.' 'I don't in, tend it as a compliment,' the prince an-swered. She bit her lip. 'Then,' she said, 'you must be very fond of dancing.' 'I detest dancing,' he said. 'May I ask, prince.' pursued the lady, 'why you dance?' 'Madame,' he answered stiffly, 'if you must know. I dance to perspire.'" 'if you must know, I dance to perspire.'

Okuma Says It Was Natural He Should Say What He Said.

Tokio, Aug. 17.—Special despatches from New York and London printed in Japanese newspapers represent that the recent utterance of Court Okuma, attributing the naval expansion policy of the United States to the sudden rise of Jap anese to the importance of a world pow er is arousing intense indignation and has caused a complete recrudescence of anti-Japanese sentiment throughout

They believe that the special despatches exaggerate the tone of the New York newspapers, and it is felt that it is particularly unfortu-nate at this time that anything should turn up to retard the increasing friendly relations of the two nations, in view of the arrangements on foot among the Japanese to welcome the American fleet and the growing cordiality exhibited on all sides towards Americans.

His statement concerning the American navy and Pre-sident Roosevelt's advocacy of its ex-pansion was undoubtedly brought out by reports of Congressman Hobson's speech in the Democratic National Convention, when he quoted President Roosevelt as predicting an early war with Japan.

The statement which has caused all comment was an excerpt from a series of articles printed in the Hochi. Tokio newspaper, which are being writ-ten by Count Okuma, reviewing world politics, and printed from day to day.

When Count Okuma returned to-day from the country he said to the Asso ciated Press that he was surprised to find that his utterances had been con-

sidered purposely offensive.
"It was only natural," he said, "in reviewing the world's politics to point out that Japan's rise above the horizon had caused the American navy to turn its attention toward the Pacific. It was undoubtedly true that some Americans talk unwisely concerning Japan, but never for an instant have I desired or never for an instant have I desired or intended to reflect on the honor and courage of the American navy or its sailors; but it is an uncontrovertible fact that commercial considerations weigh materially with all older commercial earnestly than myself to cultivate cor-

Foreigners Declared to be Safe I Turkey.

Constantinople, Aug. 17.-An unplear ant impression was created here owing to an alleged proclamation of the Young Turk Committee declaring that should the powers intervene in Turkey's inter-nal affairs a rising would occur which would imperil the residences of foreign ers. The proclamation, it was supposed was due to a report that Russia had de clared the powers must interfere if Turkey failed to crush the movement in edonia, but inquiry at the offices of the Young Turks resulted in a denial of its authenticity.

its authenticity.

Another interesting report in circulation, but has not yet been confirmed, is that the Young Turk Committee is determined to insist that the Sultan quit the Yildiz Kiosk in order to completely put an end to the old traditions and prevent the possibility of a coup d'état by the palace guard. Under this scheme the Yildiz Kiosk and the surrounding gardens would be converted into a public park, and the Sultan henceforth would reside in the Dolma Bagtche Palace on the shores of the Bosphorous. According to the report, however, the project is not to be put in force immediately.

SPANKED IT.

Court Says Babies Have Right to Cry.

Dunkirk despatch: Mrs. Bambrina Vo velli, of East Third street, was arraigned in Police Court to-day upon charge of assault in third degree, the complainant being Mrs. Angela Fote, who lives in the same building. The special features of the case as developed in the trial were that Mrs. Fote has an infant that cries a good deal at night, and Mrs. Vovelli was greatly disturved by the child's noise last night, and became so nervous in consequence that the entered the Fote consequence that the entered the Fote apartments without invitation, and, pick-ing up the crying babe from its cradle,

gave it a spanking.

Judge Roberts decided that the child had a right to cry, as that was its only way to make its discomforts known to its natural protectors, and after di-recting Mrs. Vovelli, the defendant, to hereafter attend to her own household and refrain from spanking her neigh-bors' children, he released her from

BEHIND CLOSED DOORS. Mystery Still Hangs Round Death of Hugh Graham.

Brockville despatch: Tthe inquest on the body of Hugh Graham, which began yesterday morning at Alexandria Bay, N. Y., was continued until late in the afternoon. Two witnesses were heard, but what information was obtained from them has not been made public, as the investigation is being conducted privately. An adjournment was made until to-morrow, when Sheriff Bellinger, Coroner Gray and Dr. J. D. Cole will continue the investigation. Sheriff Bellinger, when seen, said:
"We have not ascertained with certainty that Graham had a large sum of money just before his death. We are pretty sure that just before he went into the water he was sitting on the porch of the boathouse above the place where the body was found, for his hat was found on the porch. The body was found in only five feet of water, with the head wedged between the timbers in such a manner as could only be accomplished with the aid of someone." Graham's body was exhumed at Caintown and a post-mortem performed Caintown and a post-mortem performed

HOTEL MAIDS PERISH IN SURF. Two Girls Drown While Trying Float With "Wings."

Cape May, Aug. 17.—Margaret Mas-terson, parlor maid, and Katie Charles, chambermaid at one of the hotels, were drowned while bathing opposite the Windsor Pavilion. The tide has been unusually high for several evenings, and the surf somewhat boisterous, and it is supposed that the unfortunate girls became alarmed at the unusual conditions and succumbed. Olga Schoanvild, another maid, was with them, and, after trying to persuade them to be careful, retreated shoreward, and soon afterward noticed that her companions were in difficulty and screamed loudly for help.

Peter Coen, porter at the Windsor
Htoel, and W. A. Holmes, a guest there from Philadelphia, hastened to the beach

ers on the porches of the Windspectators on the porches of the Wind-sor say that the girls seemed to have waded out up to their necks and were using "water-wings," endeavoring to swim and float with their aid. Several colored bathers took up the search almost immediately and aucceeded in landing the body of Katie Charles. Dr. T. C. Greenwald, of Chambersburg, Pa., directed efforts to resuscitate her for an hour, but without avail. The other body has not yet been recovered.

NO DESIRE TO WASH

SEVERE CRITICISM OF CANNING FACTORY EMPLOYEES.

Mies Cartyle, a Factory Inspector, Reports Rather Repulsive Conditions In Seme Places—On the Whole There Have Been Improver

Toronto, Aug. 17.- "The women have no particular desire to wash, and the manner in which the washing arrangemente are presented to them does not alter their opinion. Neither the employer nor the employees seem to realithe necessity for cleanlines." The the necessity for cleanlinesa." These sentences, referring to sanitary conditions in some of the canning factories in Ontario, are taken from the report of Miss Margaret Carlyle, factories inspector for the western part of the Province. It is but fair to add that Miss Carlyle says that substantial improvements had been made in many of the fruit preserving factories during the year in regard to conditions generally. She remarks, however, that the idea seemed widespread among some owners that suitable sanitary accommodations would not be appreciated. Where good washing conveniences had been provided, away from digt and dust with plorar of

would not be appreciated. Where good washing conveniences had been provided, away from dirt and dust, with plenty of soap and clean towels, the women made good use of them.

The condition of the floors in many factories comes in for severe condemnation. They should, says the report, be kept in sound condition so as to prevent retention or accumulation of water, which causes not only discomfort, chills and colds, but also the risk of more serious troubles. In many food factories the floors were found coated with black, greasy, sour-amelling mud. The employgreasy, sour-smelling mud. The employ-er deplored the condition in one place, but seemed to think that the more it was swept the worse it grew, and was astonished when told that the floor should be relaid with suitable material should be relaid with suitable material to prevent so much grease accumulating on it. Miss Carlyle regrets to be unable to report much progress along the line of housing the people engaged in this industry. The same defects and discomforts exist in the rooms where they eat, sleep and perform their domestic duties. But here again she mentions some bright exceptions, where there had some bright exceptions, where there had been great improvement.
