# **EDDY'SSEARCH** A BRAVE BOY'S BATTLE

That was a fateful moment to Eddy Burns and those he loved—that moment in which he stood clinging to the vessel's side, in the midst of the wild storm, with the fitful gleam of sullen light playing upon him and

o kill him. No moan, no cry for help ould have been heard in that terrific gale he wind shricked through the cordage, ending masts and spars as if they had been and fro like a plaything on the wild yeast of waters, mound and labored and grouned a season above all others, the assassin thought, for a deed like that he had sworn

ous villain. The tumbling of the vessel, the fierce onslaught of the mighty sea wind, compelled him to feel his way slowly—to approach by degrees. Yet on he crept, like some deadly, terrific beast of the jungle upon

And close upon him now was the assassin, his singers bent like claws, his eyes gleaming, his lips parted, his short squat figure bent and crouching, appearing but half its,

iginal size. Suddenly, with a quick, tiger-like spring Vellis hurled himself upon the boy. Eddy's wild scream was borne away the gale. He could not turn his head: In that first shock, he had no time to conjecture who was his assailant, or what was his purpose. But with a sudden instinct—that was no time for reasoning—he clung to the bulwarks with all the energy of an awful

matched pair in the midst of the gloom and the darkness. The boy felt his strength forsaking him. The deadly grip of his enemy sought his throat, his brain reeled, his hands unconsciously lost their hold of their support, and he fell backwards into the arms of Vellis. re arms of Vellis.

The latter caught up the slight, boyish approached his subordinate and the engineer.

figure to hurl it overboard.

In the same instant a wilder light lit up

the strange scene.

And in the same instant also, a pair of bony hands clutched the throat of Jacob Vellis, nearly strangling him. He dropped the boy and turned upon his assailant. A fire boy, and turned upon his assailant. A fierce struggle ensued, in which the new-comer was victor. Vellis tore himself loose from the hands that gripped him, a panic of terror, seizing him, and slunk quickly into the dense darkness, hurrying below, and matteries.

the boy would have been buried in the sea.

Better luck next time. I'll bide my time,

and watch my chances."
The timely rescurer of poor Eddy Burns was no other than his new friend Ichabod

He had retired early in consequence of illness. Sleepless and agonized with his new and singular physical sensations, he had lain in his berth and anathematized himself and his ambition, as well as the pretty country girl for whose sake he was seeking his fortune. But as the time passed and the storm deepened, he began to grow anxious at Eddy's absence from his berth, and finally dragged himself up to the deck to ascertain if he were fill.

to ascertain if he were ill.

The friendly gleam of lightning, falling upon the two struggling figures by the bul-warks, betrayed to him Eddy's peril. He made his way to him, arriving in the very crisis of the lad's danger, and rescued him

their way, crushing down the weaker of their number, in their frenzy to reach the deck. On deck, the Captain, alert and self-pos-sessed, worked and acted like a hero. The slippery deck, gathering the boy in his arms, and calling upon him to arouse himself. And in a moment more, to his great joy, the boyish form stirred, and by another lightning gleam he saw that Eddy was looking up at him, with wild and startled eves.

"Ah, here you are!" cried Mr. Gorse joy-tully "All care inst in the nick of time. "An, nere you are the nick of time. A second more; and you'd have been dodging sharks. That fellow meant to toss you overwith air

"I didn't see his face," returned Eddy bly. "He came up behind me unawares, as I stood looking at the sky."

"Hey?" shouted Mr. Gorse, at the top of

however, cautiously made. The fire was in the hold, as the slender column of smoke

"Why, I supposed—or should have sup-posed, if I had had time for suppositions— that you'd had a fight with the rascal. But unnatural scoundrel was a downright assas-sin, trying to kill you bony fidy?"

Eddy assented.
"And you don't know who he was?

The Captain's ruddy face worked with emotion. The loss of his ship by fire or wreck was to him as the death by violence of his child. "And you don't know who he was?"
queried Mr. Gorse, in a sort of bewilderment.
"I suspect who he is, but, as I didn't see him, I couldn't swear it was the man I think," said Eddy, sitting upright and leaning against his lank, bandit-like friend.
And there in the midst of the awful storm and the terrific gloom, in a voice broken often by grief and horror, and pausing often when the gale shricked higher, drowning his tones Eddy told his story. "We're doing the best we can, Captain We must batten down the hatches to keep the air out of the hold, and put on all the steam the engines will stand. Our only hope

steam the engines will state, is to make port."

"Do you think we will accomplish it?"

"I don't know, Captain," returned the engineer anxiously. "The wind is rising," and he put up his hand to feel it. "The sky looks to me as if a squall was coming. tones, Eddy told his story.
"You look tuckered out," said the Ohioan.

"You look tuckered out," said the Ohioan.
"How spiteful that wind is! And—and I don't feel so well again. Hadn't we better go below? I'd like to be fenced in somewhere. This rolling around loose, and pitching to and fro, don't seem to agree with me. Hadn't we better go below?"

Eddy assented, and the two, clinging to each other, struggled across the deck, battling with the wind, and slipping backward and pitching forward alternately, as the vessel Inrched. They stumbled heavily down the companion way, nearly falling.

"Do you think we will accomplish it?"
"I don't know, Captain," returned the engineer anxiously. "The wind is rising," and key looks to me as if a squall was coming. Once let the flames break through, and the wind rise, and it's all up with us."

The Captain noded assent, and looked with anxious gaze at the frowaing sky. Surely a squall was brewing. Already the wind had a shriller cadence; already it blew with increasing force.

CARLETON PLACE;

For some days fair weather continued.
The steamer made good time upon her course and no incident of note transpired worthy of mention. Eddy read his books and talk of the steamer with Gorse, whose shrewdness and the crevices about the hatchway grew larger the crevices about the hatchway grew larger the crevices about the commander ordered wet the decks, and a and denser. The commander ordered wet blankets to be laid on the decks, and a steam soon arose from these

Gorse was a man of genuine principle, simplicity and kindliness, and entirely without those small vices of appetite and behavior which so often pave the way for crimes. Eddy could have had no better friend or tread, when his engineer again joined him "It's about four o'clock, Captain," he said looking up at the gloomy sky. "We're booked for a squall, sure enough. It'll come on about daylight." "Yes, it's coming," replied the Captain

the pitch in them is melting," continued the engineer. "Captain, we have only a few planks between us and the seeining hell below, and those planks are hot already."

"I know it," said Captain Vindent, fixing

his haggard eyes upon his companion.
"The ATLANTIC will never see port. Let us hope she will ride out the squall."
"One word more, Captain," whispered the engineer, with a quick, furtive glance at the bean, where frequent breezes, laden with spicy odors, swept the decks and filled the spicy odors, swept the decks and fined the sails, and approached the isthmus, where they were to disembark. "Only twenty-four hours more and we shall land at Chagres," said Ichabod Gorse, as he stood with Eddy on the deck of the

spread they will reach it before noon," replied the Captian calmly. "I have thought of that peril from the first. If it were not for the gunpowder, I should have hopes of ATLANTIC one glorious tropical night, and looked with him upon the phosphorescent waters and the azure sky gemmed with About ten o'clock the first mate approached

the Captain and said, in an undertone. "We haven't an hour longer, Captain The fire is within forty minutes of the maga

time to clear the vessel. The boats are already provisioned. I attended to that thoughts. I seem to hear my mother's monus in every breeze. I picture her as I saw her on that last evening, with her pale face and officer with a sufficient number of the crew station themselves at each boat. Arm

which was quickly and quietly executed.

Then the Captain raised his speaking won't kill her !" said Gorse shrewdly, "He'd like to kill her husband off and bury you.

and then he'd gobble the poor lady up I wish I was the one destined by an avenging Nemesis to cook his hash for him! But I sort of feel that this Vellis is intrusted to my good offices, so I won't complain." said Eddy, in a low, anxious voice. "He hasn't been heard from in fifteen months boats, with great care in loading, will depart decently and in order. Any mai any how. He was then desolate and heart-broken. He may have taken a fever and died, or he may have been killed. How am or who endeavors to create a panic, will be I to find him? Where am I to look for him?' shot down as a mutineer. The crew are "Those questions will settle themselves when we get to San Francisco" replied Gorse. Now let the first boat be filled and lowered. The women first." their husbands followed them. The boat him. Or we may meet your father himself, was filled without any serious outbreak, Stranger things have happened. Just keep manned and lowered.

Its crew pulled off from the ship,
"The second boat," ordered the captain "No noise there! There's room enough and The two ingered on the deck until a late hour, then seeking their berths.

The night deepened. Every soul on board the steamer, save those whose business it was to keep awake, had fallen asleep. The lowered, and drew away The second hoat, heavily loaded, was lowered, and drew away from the ship.
"The third boat!" cried the trumpet-tone

of Capt. Vincent "Don't be in too great haste. Easy now. Not too full. Lower.
The boat was also safely lowered her living and unconscions freight.

The bells of midnight had struck. A little the sweet night air. The officer in charge of the watch snuffed at the atmosphere, and an anxious look appeared on his face. At Ichahod Gorse and Eddy Burns were in the rear of the throng, and would necessarily the boy's view by an intervening group stood Jacob Vellis, sullen of countenance and

wild-eyed. The night had been to him an eternity of horror.
"We'll soon be off, my boy," said Gorse cheerfully. "Our turn'll come in good time. Why, you have acted like a hero ever since the cry of fire was heard. I haven't heard you cry out once."
The boy's face was grave and anxious, but

The engineer pointed silently toward the the blue eyes were fearless and calm.
"Crying will do no good," he returned unietly. "We are in the hands of God—I. umn was arising:
"Smoke?" whispered the Captain hollowly and my poor mother and my father. I have perish here, than troubled about myself. You see I am a link between them—the link "On fire! And we are short of boats! On which may be re-after unite them. It I am lost, what will become of them?"

"You'll not be lost my boy. There's room The three men looked at each other, white

enough for us all in the boats. See how the cr.wd is thinning out. They are lowering the fourth boat. By George "and Mr Gorse start. and plunged his hands into his pockets. "I must have dropped my pocket-book into my berth! And all my money is in it. I must look for it."

He made a movement to go below.

companion-way, shouting out his f-arful news. And all through the steamer the He daited away, hurring through the Jacob Vellis saw him depart, and watched

him vanish into the cabin. He looked around him burriedly, and then, with the cabin to the berth Gorse had occupied. The mission pocket-book lay in plain sight upon

bosom, and turned to retrace his steps. He had gone scarcely a dozen paces, when e suddently encountered his enemy face to Eldy receiled for an instant, glancing steerage passengers, like those in the cabin, were fastened below, and a clear deck re-mained to the Captain and crew. The first

around him like a trapped deer, and then made a movement to rush past his foe.

"Not so fast, voungster," cried Vellis mockingly. "I told you our next parting would be different from the last. You'll never see Californy, nor your father. Eddy could recover himself, the cowardly low was repeated again and yet again.

had proved already. The engineer and a sturdy seaman were sent down into the hold, and presently returned with the report that a box or barrel of chemicals, intended to be used in California in smelting ore, had burst, Vellis spurned the slight, unconscious igure with his foot. "He's stunned!" he muttered. "He won! come to until every boat is gone. He's disposed of at last. Bah! How hot the air is here! My lungs seems burning."

With a fleet step, he hurried out to the engineer, as the two walked apart. "No earthly power can save her. She's all on fire inside."

awaiting impatiently Eddy's return, did not see him slink up from the companion-way and suspect the evil he had done. The fifth boat was in the act of being low-

"The rest may come forward," said the Captain, surveying crew and passengers. "You can get in, if you pack closely. Quickly now, but don't rush."

Vellis darted forward, and was one of the first to enter this last boat.

"Where can Eddy be?" muttered Gorse uneasily. "We shall be late. They won't want to wait for us. Dust that money.

want to wait for us. Drat that money. I wish I'd let it burn. Where is the boy?" He crept down the companion-way, calling loudly: "Eddy! Eddy!"

He bore him nearer the light, and his fierce eyes marked the discolored temple of the hoy. He knew at the first glance that During the remaining hours of that terrible night, Captain Vincent walked up and down the decks, a prey within to the keenest as if he had been a witness of the d assault, that it was Vellis who had Eddy's assulant. "Has he killed him?" he whispered w

He tore open the lad's skirt. heart still heat. Murmuring than passage, up the stairs, and to the deck. How strangely deserted it seemed! Captain was no longer on his bridge and southward. The six boats, und

term to characterize it formed one the greatest of these dependencies, was inhabited by people who were proud to acknowledge England's sovereign as their sovereign, and who were anxious, if possible, to maintain the happy connection which had heretofore existed (a plause), and to enjoy the advantage which flowed from that connection nation might be increased by milliens of dollars, if every family favorably situated, would keep a few hives. No other branch of industry can be named, in which there need be so little loss on the material employed, or which so completely derives its profits from the vast and exhaustless domains of nature."

The Farmer should keep Bees to collect the honey afforded by his orchards, timber lands and broad pasture fields; for "profit must attend success in this branch of the farmer's stock, inasmuch as bees work for nothing and find the materials."

The said that in accepting the invitation of the Burlington Literary Society to deliver a lecture on the subject, "Cambridge a lecture on the subject, "Cambridge a lecture on the subject, of the Burlington Literary Society to deliver a lecture on the subject, "Cambridge a lecture on the subject, of the Burlington Literary Society to deliver a lecture on the subject, "Cambridge a lecture on the subject, "Cambridge a lecture on the subject, "Cambridge a lecture of the subject, of the Burlington Literary Society to deliver a lecture on the subject, "Cambridge a le the first comb is then enlarged, and own hives, beside supplying their neighbors; and all will find that, for the little time and capital required, it will materially affect their expenses and and income.

The Horticulturist should keep Bees to gather the delicious nectar which "would else be lost on desert air," and the centre of piace of piace of begin-tion of what was said on an occasion like this. He presumed, taking a hint from what had fallen from the chair, that any man in any Canadian assembly might, without danger of misapprehension, be consider ation that she was withdrawing permitted to refer to the history of his her military forces from all the outlying approach of spring, an increased amount country, to deal with events in that parts of the Empire, and concentrating approach of spring, an increased amount of brood is reared, and as early spring flowers appear the bees go to work in earnest, to provide limpid honey and freshly gathered pollen for the queen and her numerous offspring. When the fruit trees unfold their pink and snowy blossoms, rich supplies are garnered by the busy throng of workers. Breeding the free speech, thank God, was a recognized right, as a point of the Empire, and concentrating that history, to remark upon facts to trace their bearing upon the position of Canada in the past, and to infer from them the position we would occupy in the future so far as it could be looked into by judging the influence of past events. As a citizen of Canada where free speech, thank God, was a recognized right, as a might go in England, they found the same opinion. This was not the policy of any mere military upstart, nor of any political leader, but it was a policy adopted after mature consideration and was approved, not by one the influence of Canada where free speech, thank God, was a recognized right, as a might go in England, they found the the busy throng of workers. Breeding goes on apace. The latent swarming impulse begins to be felt, and if the weather continues warm and balmy, we soon arrive at the swarming season.

CONFESSION OF A MEDDLING HUSBAND

It was about the buckwheat cakes. I

country, and considering what course was best for its security and for the welfare of its people. (Applause.) He might say before going further, that in consequence of the political events of the past two or three years, he found himself not very strongly attached as a public man to any of the political organizations that had sprung up in recent years? He could not find that any such opinion prevailed either on this or the opinion prevailed either on this or the opinion prevailed of the Atlantic. All put a whose movements were now agitating the different interpretation upon the fact country. He was sorry, upon a review He had, while in England, discussed the because I could not find any lard. The batter did not look right. I lighted my not think that, in all respects, those measures were calculated to promote the best interests of Canada. He had felt change that had taken place in the position of Great Britain, and were anxiously preparing in every possible way to meet the new state of things. He had been forced to the conclusion that the policy of the ruling classes in England was not to abandon the colonies, nor to act so as on the other hand, could be say that he concurred in the policy and views of those who constituted the Opposition to that Government? There were proposals emanating from them to which he must enter as unqualified a dissent as to the measures of the government. He did not know that he had any party in the country, or that he could enter heartly into the plans of any political organization. into the plans of any political organiza- prepared to accept the consequences, tion; but he did find when he went whatever they might be, which followed among the people that there were a great invasion and conquest. Speaking for among the people that there were a great invasion and conquest. Speaking for intention to compromise others—and speaking freely, frankly and truthfully—he was of opinion that the union of these Provinces was a preliminary step for the establish ment of a system of government in British America which would enable us when the moment arrived, when the necossity pressed upon us, to maintain a separate and independent existence among the nations of the earth. (Applause.) He believed that that idea was present to the minds of most if not all of those who took part in carrying out that great and important political liar relations and obligations to parties change; but, because they foresaw that which they believed must happen, betraint as to the expression of their views. and reserved their opinions on these matters whenever they happened to con cause they took the initial steps to put the country into a position to maintain itself, was to be charged, as he saw some of the public press had charged, that they had ulterior objects in view, that they had proved themselves disloyal to the mother country, that they had shown flict with the opinions of their party. As for himself, he felt entirely free from these entanglements, and no adequate eason presented itself to him why he hould not express the honest convictions of his mind upon these and all other themselves to be the authors of dangerjuestions. It was in that spirit he apous measures, and that they should eared before them to-night, to make therefore be politically opposed and con-demned? He denied that they were ome observations on the subject which he had stated. He then went on to consider, in the first place, the geoopen to such condemnation, and he re-ferred to the phrase of Lord Monck, about a "new nationality," and Lord raphical position of Canada, and referred upon this point to a book lately written by Prof. Hurlburt, which he recommended to the attentive perusal of all his hearers. Prof. Hurlburt estimated the area of Canada at 4,900,000 square miles—a larger area than that of the United States, and embracing a larger surface of arable land, that is, land adapted for the growth of cereals and grasses suitable for the sustenance of man and animals. Compared with the United States, we had a very small proportion of sterile country, while in the north-west especially we possessed a great empire, an enormous territory, the greater part of which consisted of the very best farming soil. Now, with sach a country when and the larger in Canada that the connection with Canada was a source of embarrassment from which the mother country should be freed as soon as possible, and if English statesmen and the English press discussed the question so unreservedly without being subject to imputations of disloyalty, it could not be charged against public men grasses suitable for the sustenance of very best farming soil. Now, with such a country upon our hands, the larger part of it unoccupied virgin soil, it became a question of great importance what we were to do with it. The solution of that problem depended upon the future we ourselves should occupy, and the place we would take among the nations of the world. The next fact to be considered was that this great country stretched like a belt for several thousand miles along the frontier of the powerful next fact to the south of us; and with this country to the south of us; and with this country because they recognized the actual position of affairs. He (Mr. Macdongall) thought at the time, and his views, as he then expressed them, were on record for confirmation of what he said now, that they foresaw what was being prepared for us, the political change that must necessarily arise from the policy which the Imperial Government and then entered upon; but what the Government of Canada said then

Lisgar's declaration that "alliance should now take the place of allegiance." as well as to repeated observations of the leading as to repeated observations of the leading newspapers of England, to establish the fact that what the public men of Canada foresaw was based upon a correct understanding of opinion in the mother country. The whole drift of that opinion was that the connection with Canada was miles along the frontier of the powerful ment had then entered up nation to the south of us; and with this fact ever present to us we must take into was, "Don't press this change upon us account the existence of the United States as well as their social system and their form and system of government their form and system of government the responsibilities and burdens of an independent existence until we have whether we like or not we were in the A negro who was suspecte of surrepticiously meddling with his neighbors worker is but a few weeks during fruit, being caught in a garde by moon light, nonplussed the detector by raising his eyes, clasped his hands and piously exclaimed: "Good Lord! die gere darky exclaimed: "Good Lord! die gere darky exclaimed: "Good Lord! die gere darky exclaimed in gement for the society of her relatives, or friends, or of attendance upon public worship, or shall designedly render her life unhappy or uncomfortable.

The workers are so well known that a minute description would seem superant's go nowheres to pray any more without being 'sturbed."

A wretch broke off an eng gement for the following aggent reason: You know protecting the queen and brood, and expected the society of her relatives, or friends, or of attendance upon public worship, or shall designedly render her life unhappy or uncomfortable.

A young Parisian lately committed snice and would continue so to the end of snicide because he could not pull off his boots. It was the crowning misery of his life, and having written a memorand dum to the effect that he had failed in our allegiance. Then, as to our political

the course of action we should pursue. The people of this country had no desire to change their relations with the people of England, or to establish new political relations with the people across the border (applause); but if that connection could not be maintained, if we found that England, owing to some movement lonal law as was charged against Great Britain in respect to that vessel, if it had not been for the connection of these Provinces? Looking at this matter then as a loyal subject he was prepared, for one who had all he possessed in this country, to make every needful sacrifice for the purpose of relieving the mother m the embarrassments which arose from our position as a dependency upon the borders of the United States. (Applause.) He then proceeded to argue that such a change could be brough about without exciting any feeling hostility, and pointed to Hanover, which

As a case in point, he rapidly sketched the history of the connection which existed between Great Britain and Hanover down to 1837, when, upon the accession o' Queen Victoria to the throne, Hanover was severed from England and declared a separate kingdom, under the sovereignty of the Duke of Cumberland, heir male to George III. For many years previous to that the connection was felt to be an anomaly and an embarrassment, because it was impossible that England could successfully defend Hanover in the event of war, if the latter should be attacked by any of the great military powers of the continent. It was for this reason that the act of separation. causing disquiet and indignation in England, was accepted with silent acquiescence, if not with a feeling of relief and satisfaction. This was clear from a passage in Alison's "History of Europe," which he thought of sufficient interest to

British crown.

This severance of the two Crowns which had so long been united however excited very little attention and was in no respect a subject of regret; so strong was the impression in the nation that CARLETON PLACE, APL. 17, '72 Great Britain was essentially a maritim power and that the connection with small German State was a source rathe of weakness than strength, by involving

when no return on a corresponding scale the largest one in the village was fill He, Mr. Macdougall then passed on to consider our capacity for defending ourselves in case of war, and mentioned that when he had had the distinguished honor of dining with Her Majesty at Windsor, he had there met an officer in the Royal service who had been sent out Canada, and who had told him that it would be impossible to defend the country against a determined attack from the United States, adding, moreover, that England would never attempt it. He, (Mr. Macdougall) was not responsible for that observation, which much surprised him at the time; considering the made a deep impression upon his mind, the public men of England. He pro- that he could prove his statements by pe dependent country in alliance with Gr. at | between himself and Mr. G. Britain, as Belgium was among Europeau . Mr. McDouge I defined his position before nations. He dwelt upon the advantages the electors. He said he had another session which such an alliance would confer; of Parliament to attend, at the close of which such as immunity from wars in which he would visit every part of the Riding, and Great Britain might engage upon questions in which we had no interest, while ships and villages, so as to give all the electhe fact of alliance itself with a nation so powerful would ever constitute a cheek upon the aggressiveness of our piring candidates to attend the meetcheek upon the aggressiveness of our neighbours. He saw great difficulty if our present relations continued, while there was a prospect of security in the condition which he indicated. But even if we did not go so far as to create a separate and independent State, we ought to insist upon entire commercial freedom, upon the removal of all resfrictions upon our commercial intercourse with foreign countries. He spoke at some length upon this point, and urged the importance, in view of the great interests concerned, of having permission to maintain a representative at Washing ton, and power to enter freely into negotiations upon commercial questions with the government of the United States and

The control for the proper description of the state of th feeted by our present position; and that it had now become necessary in the interest not only of the Empire at large but of Canada in particular that a corporation considered in particular that a co

Confederation, were nevertheless opposed to the election of any other than a local candidate. Sympathising with this feeling which was not confined to any one party, complied with a requisition, signed by nearly four hundred electors, asking me to he the local caudidate in opposition to Mr. McDougall. The result was not unanticipated by those who worked with me. All-the influence of Sir John A. McDonald and his Government, and of many influential Reformers and Conservatives, was exerted against me, and this, added to the late date at which I was brought out, allowing no time for canvass, rendered the resultat hest doubtful. And here a word of explanation as to my resignation on that occasion. receiving the returns the evening of the receiving the returns the evening of the first day's polling, it was found that I was behind at every polling place, and that the election was virtually lost. To save our friends farther labor, the committee consented to my resignation, which proved afterwards a very unwise step, giving serious cause of offence to many, as it was found in the state of the committee to make the state of the st impossible to communicate with them all in time to accomplish the object for which

y resignation was intended.
Since that time Phave taken very little to support Mr. Galbraith as your represent-ative in the Ontario Parliament, and to take im out as a candidate for the Common when it was understood Mr. McDougall's retirement was about to take place.

The coalition formed in 1864, for the purpose of bringing about Conf-deration.

has had other results than those which the romoters of that scheme probably contemlated. Old party times have been almost bliterated; issues, the struggle over which at one time gave point to the names Conservative and Reformer, are dead or have een finally settled, and to-day we find men who, under the old regime, were called Conin harmony, and in support of, or in opposi-tion to, the Government of the day, itself-composed of men of both parties. The motto should therefore now be omen as well motto should therefore now be "men as well as measures," and the question of the hour is "the honest and faithful administration of the affairs of the country, and a wise and economical management of its finances." I am confirmed in this view from the fact that many members of the Ontario Government, heretofore called Conservatives, are to-day found voting with and sustaining & Liberal Government under the leadership of Hon. Mr. Blake, against the Opposition led by Mr. M. C. Cameron. No one imagines for a moment that these gentlemen are sacrificing any principle in so doing; rather may we take it for granted their opinions in full accord with those of the Liberal party as represented in the Ontario Govern-

Holding these views and bearing in mind that at the approaching session of Parlia ment, new issues may arise and changes be our opinions, I will now briefly state whn course I feel it will be may duty to take should you elect me to be your representa

Whatever foundation there may have been at one time for the claim set up tha the present Government should be retained wer until Confederation became an ac complished fact, none such can now exist. The no-party cry at the general election of 1867, and the dread of endangering establishment of Confederation on a firr basis, contributed to give the McDone'd The results have been unfortunate. and cowardly trackling to a conferaptible rebellion has distinguished the settlement of the terms on which Manitoha became a member of the Canadian Confederation ditti' have been fraternized, with ; th calls for justice on the marderess of Scott, martyr on account of his loyalty to his country, have been met with contemptions indifference; millions have been usclessly thrown away in the construction of the Inat great cost, is completely worthless; while confidence in the ability or desire, of the Government to rectify these criminal blun: parties buying by the piece, a liberal dars, is utterly last. Holding these views. and with no desire to judge the Government | reduction will be made harshly, it will be my duty to oppose them, and when necessary sustain such men in the formation of a Liberal Government as we

may have reason to believe will better meet the wishes of the people. As it is a recognized fact that manufac tures gr atly increase the prosperity of any people, their encouragement will always receive my healty support. Tending to this, is the importation tree of duty of all necessaries of life, so as to cheapen the cost of living to the laboring popula-tion—of all raw material necessary in the achinery such as is not made in the com try, and a judi jous arrangement of the ariff for revenue purposes, which while operating to encourage native industries, will not be open to the objection of being specially productive.

The adoption of a wise and liberal policy, having for its object the encouragement of

the immigration of farm laborers, is urgent ly demanded; and the opening up of the back country by railroads, and ell measures having a tendency to promote the rapid and permanent settlement of the new anoccupied White Dress, Ruffled and Frilled Shirts, ands of the country, shall have my warmert

support, since North Labark was set apart as separate Riding, it has never been reprented by a resident member. A longer continuance of this humiliating state of things must be regarded as a reflection apon ourselves. At the request, forrefore, of many of the electors in different parts of the riding, I have conserved to test the sense of the people on this question, by soliciting your suffrages as a local candidate oming clera in, and am resolved in due time to proseque the canvass vigor-ously and to continue the contest until the last vote is police

Your obd't Serv't B. ed thankful for past favora would now inform the people of Carloton Place and surrounding country, that having again leased the McNeely property for a term of years, is now prepared to receive business. A few wagens on hand as good as any in the County. Also Har-rows, Cultivators, Ploughs, and all other work warranted to give satisfaction. Horse Shoeing done in the very best manner and
