PEARY HERE THIS MORNING; IS ALL THROUGH EXPLORING

Says He Will Never Again Go
North—Twenty Three Years
Enough for Any Man
Crowd Down to Meet Him

"Well, gentlemen, what can I do for you this morning," was the greeting of the newspaper men and camera men as they gathered about Commander Robert E. Peary who had just returned from his expedition to the North Pole. He was met at the depot by a large crowd of his admirers, and they all went to the hotel where he was staying. Peary was in high spirits and seemed to be in excellent health. He had been away for twenty-three years, and he said that he would never go back to the North Pole again. He had seen enough of the Arctic region for his lifetime. He had been through a lot of hardships, and he had seen a lot of things that he would never see again. He had been to the North Pole, and he had seen the flag flying from the top of the world. He had seen the aurora borealis, and he had seen the sun in the winter. He had seen a lot of things that he would never see again. He had been to the North Pole, and he had seen the flag flying from the top of the world. He had seen the aurora borealis, and he had seen the sun in the winter. He had seen a lot of things that he would never see again.

When asked about the rumor that he had refused to permit the Roosevelt expedition to take part in the Hudson-Fulton celebration, the Commander said: "All rumors to that effect are unfounded. I know absolutely nothing about the celebration, and the facts so far as I am concerned, is in the hands of my friends to arrange." The Roosevelt left Sydney yesterday and will arrive in New York in plenty of time for the celebration. The subject of Dr. Cook was mentioned, but Mr. Peary remarked: "I do not know anything more than has already been said." Asked as to the value of the discovery of the Pole, he replied: "The discovery has little commercial significance but the great value of the Pole is as a trophy and for what it stands for."

When asked about the rumor that he had refused to permit the Roosevelt expedition to take part in the Hudson-Fulton celebration, the Commander said: "All rumors to that effect are unfounded. PRISONERS STILL ELUDE THE GUARDS

No Trace of the Men Who
Escaped from Dorchester

Adam Carter Kicked by a Horse—Dragging
to be Done in Gaspeaux
River.

SACKVILLE, N. B., Sept. 23.—St. John delegates to the W. C. T. U. convention here next week will be: Mrs. C. H. Dearborn, Mrs. Morton Smith, Mrs. H. Dearborn, Mrs. E. G. Dearborn, Mrs. W. H. Myles, Miss Edith Humphrey.

The Government dredge Northumberland has been ordered to Port-Breton to do necessary dredging in the Gaspeaux River. Word to this effect came in a telegram from Hon. Wm. Fugatey. The dredge is expected to reach Port Egin in the course of a few days.

Rev. Rees Jones, a Welsh clergyman, has been appointed to the Anglican rectory at Mount Whately and Bals Vertes. He is expected to reach Mount Whately this week. He succeeds Rev. C. R. Quinn, who left for very long ago for Waddington, N. Y.

So far the two penitentiary prisoners Kennedy and Larsen, have avoided recapture. Different rumors as to their whereabouts have been heard, and all proved groundless. Today several guards are devoting special attention to the section of country about Sackville.

M. E. Rodd and Co., of Amherst, have bought the Sackville book store from Wallace R. Rodd.

While at work on the main road or so Adam Carter, of Westport, was kicked on the head by a horse. A severe scalp wound was inflicted. At the time of the accident Carter was bending over his mowing machine. A young colt, which was being driven by Carter, was frightened and ran into Carter's back.

When asked about the rumor that he had refused to permit the Roosevelt expedition to take part in the Hudson-Fulton celebration, the Commander said: "All rumors to that effect are unfounded. I know absolutely nothing about the celebration, and the facts so far as I am concerned, is in the hands of my friends to arrange." COOK DESCRIBES LAST STAGE OF HIS DASH FOR THE NORTH POLE

Dogs and Men Racing Northward Over the Paleocrycitic Sea—Gales and Heavy Snow Storms Encountered—Eskimo Ingenuity to the Fore.

Synopsis of Previous Chapters. In the first instalment of this thrilling story, "The Conquest of the Pole," printed in the St. John Sun on Wednesday, September 15th, Dr. Frederick A. Cook told of the start from Gloucester on the Bradley of the voyage to the Pole and of the overhauling on route of the equipment needed for the dash to the Pole. In a graphic manner the doctor wrote a story of Eskimo life that never has been excelled for human interest. He told of the home life, the tragedy and comedy that mingled in the dreary existence of the dwellers in the Arctic region, and of the childlike eagerness of the natives to trade their valuable furs and ivory for the simplest things of civilization.

The right, he wrote, Mr. John Brackley, the explorer and his party were pictured in their preliminary work for the final dash. Finally after describing the various places visited in Greenland in search of guides and information as to conditions further north, Dr. Cook wrote of the trip across Englished Gulf past Cape Auckland and on toward Cape Robertson. Here the discoverer closed the first part of his narrative with "Eskimo life, the various places visited in the icy distance. In the second instalment, published in the St. John Sun on Friday, Sept. 17, Dr. Cook described the journey to the north, on to Annotok, the piece of plenty, which he selected as the base for his dash to the Pole. In the third instalment, published in the St. John Sun on Saturday, Sept. 18, Dr. Cook described the journey to the north, on to Annotok, the piece of plenty, which he selected as the base for his dash to the Pole. In the third instalment, published in the St. John Sun on Saturday, Sept. 18, Dr. Cook described the journey to the north, on to Annotok, the piece of plenty, which he selected as the base for his dash to the Pole.

WHOLE FAMILIES WIPED OUT IN THE SOUTHERN STORMS

Death List in Terrebonne Parish Alone Will Probably Amount to Sixty—Fourteen of One Household Perish

NEW ORLEANS, Sept. 23.—At an early hour today the list of known dead who perished in Terrebonne Parish during Monday's hurricane had swelled to more than forty and it is believed a score or more may be added this morning. Additional reports of death in other sections of Louisiana are also being received and the toll of human life exacted by the hurricane will count perhaps a hundred people when the final count has been made.

Further details of property loss reaching millions of dollars come in with the growing number of reports of death in other sections of Louisiana. The families of Thomas and Walter Rhodes, numbering fourteen people, are now reported as being almost certainly among the dead. Others mentioned who are believed to have perished are Dick Gray, wife and seven children; Ines Verret and family of four; C. B. and wife and Norway Forsy. Carcasses of cows, hogs and dogs strewn the prairies for miles and thousands of dead birds and quadrupeds are strewn the waters. The bodies of three fishermen were found in the Louisiana marshes several miles southwest of New Orleans, it was reported today. Two children near Bois Du Tere, La., were drowned when skiffs in which families were fleeing struck obstructions. Two were reported today the collapse of a house near Clinto, La. No trace of the crew of nine men on the sloop Seven Brothers, wrecked near the Illinois, 20 miles from the coast, has been discovered. A relief expedition organized by the Louisiana Game Commission, left New Orleans today for the Gulf coast, going direct to Lake Calumet. From there it will make its way toward Gulfport, distributing supplies and administering aid to the sufferers.

When asked about the rumor that he had refused to permit the Roosevelt expedition to take part in the Hudson-Fulton celebration, the Commander said: "All rumors to that effect are unfounded. LOSS BY FLOOD WILL REACH MILLIONS

Five Dead in New Orleans TOURISTS SUFFER Fear Expressed That Many Lives Have Been Lost

Central last night in Mississippi and sweeping north at the rate of 200 miles a day, the hurricane which devastated the Gulf coast and left a trail of wreckage and ruin through four states continues on its course with unabated fury.

Of the ruin that it has wrought no one can give estimate. In New Orleans alone five are known to be dead and a million dollars will not repair the damage done to the city. It is said that plate glass alone will cost \$100,000 to replace.

From the little aristocratic summer colonies on the Louisiana and Mississippi Gulf coast came vague tales of devastation and fear that many lives have been lost. Beyond the Mecca of the wealthy, it is still isolated and its fate unknown.

At Vicksburg two vessels were sunk and a third was driven ashore. Three passengers were rescued. One vessel lies across the channel and will require navigation. The property damage in Mobile and vicinity will not be large. Some loss of life is reported in the vicinity of Chef Menteur, La.

WAITING FOR THE END OF THE WORLD TO COME

PROVIDENCE, R.I., Sept. 22.—True to their belief that a great upheaval is about to occur whereby the top crust of the earth will peel off, carrying the wicked to destruction and leaving the "elect" in undisputed possession of the world, several Rhode Island families belonging to the sect known as the Latter Rain of the Apostle Church have gone to Duxbury, Mass., an appointed place to await for the cataclysm.

NORTH SHORE WEDDING

NEWCASTLE, N. B., Sept. 21.—The marriage of Rowland Waldo Crocker and Miss Helen May Sinclair, daughter of the late Walter W. Sinclair, was solemnized tonight at 8:30 o'clock. Rev. Dr. Cousins performed the ceremony at the bride's home. The couple were attended by the bride's mother, Mrs. Cousins, her brother-in-law, John Robinson, Jr., the marriage took place under a canopy of white chrysanthemums. The bride was dressed in white, decorated with Messaline satin trimmed with hand-embroidered net silk fringe and train. She carried a bouquet of bride's roses, sweet peas and maiden hair ferns. The bride's niece, little Rita Atkinson dressed in white silk, trimmed with insertion and lace, carried a basket of sweet peas. Owing to the rain in both families, the wedding was quiet. The couple left on the Maritime express for a honeymoon in Upper Canada. The bride's going-away dress was of wisteria serge. Among the gifts were cheques from nearest relatives.

THE DOCTOR'S WIFE

Agrees With Him About Food A trained nurse says: "In the practice of my profession I have found so many points in favor of Grape-Nuts food that I unhesitatingly recommend it to all my patients. It is delicate and pleasing to the palate (an essential in food for the sick) and can be adapted to all ages, being seasoned with milk or cream for babies or the aged, with coffee, tea, or tooth renders mastication impossible. For fever patients or those on liquid diet I find Grape-Nuts and albumen water very nourishing and refreshing. "This recipe is my own idea and is made as follows: Soak a teaspoonful of Grape-Nuts in a glass of water for an hour, strain and serve with the beaten white of an egg and a spoonful of fruit juice for flavoring. This affords a great deal of nourishment that even the weakest stomach can assimilate without any distress. "My husband is a physician and he uses Grape-Nuts himself and orders it for his patients. "Personally I regard a dish of Grape-Nuts with fresh or stewed fruit as the ideal breakfast for anyone—well or sick. "In any case of stomach trouble, nervous prostration or brain fatigue, a 10 day trial of Grape-Nuts will work wonders toward nourishing and rebuilding and in this way ending the trouble. "There's a Reason, and a trial proves. Look in papers for the famous little book, "The Road to Well-being."

LONDON NEWS GOV. JOHNSON AND GOSSIP BY LETTER

Authors' Earnings Lead to Ruin TIPS RUIN TAILORS THURICE GOVERNOR

LONDON, Sept. 10.—The case of Stephen Phillips, the poet and playwright, who is in very straitened circumstances has opened the question as to whether English writers can, on the whole, be called successful financially. Mr. Phillips has had many plays produced in England and America, yet he is now in actual poverty, which he attributes to the failure of his last two plays, "The Lost Hero" and "Faust," both of which were failures in London.

The very recent death of John Davidson because he was tired of struggling to make a living from his poetry, the death of Francis Thompson, also without means; the case of Matthew Arnold, who after all his years of successful work, left but \$5,000, and that of Charles Godfrey Leland, author of "Hans Breitman's Ballads," whose estate was valued at about \$20,000, are instances cited which are balanced by the case of Lord Penryn, who left over \$300,000, and of Robert Browning, who left \$100,000, and of Robert Browning, who left \$100,000.

As authors of successful books, many have amassed considerable fortunes. Henry Spink Meriman, Edna St. Vincent Millay, Mrs. J. K. Paulding, Lucy Bishop and George Meredith, all left estates of value; but Florence Murray, Mary Kingsley and even Louis L'Amour left small sums as \$7,395, \$17,085 and \$18,000.

Publishers in many cases left very large fortunes, the chief among them being G. Smith of London, Elder and Co., \$3,800,000; Thomas Nelson of W. Nelson and Sons, \$3,154,235; George W. Lippincott of Philadelphia, \$2,500,000; McMillan and Co., \$2,885,055; Adam Black of A. and C. Black, \$1,738,300; George Lord of Ward, Lord and Co., \$958,000.

London tailors have been appearing in the bankruptcy court lately with great frequency, and in reply to some questions by a reporter regarding these have told very fully the story of their difficulties. They declare that not one tailor in a hundred in London makes a comfortable living, because the more fashionable customers are the more difficult it is to get them to pay for their bills. They assert that there are many well-to-do customers who stop at any expedient to avoid settling their bills, much of their profit is swallowed up in secret commissions. Valets must be well paid for recommendations, for it is every easy for them to suggest to their masters that certain clothes do not fit well, and that such and such a tailor would do better for them. And there are many big houses who have large numbers of liveried servants are kept by the tailor who supplies these liveries at a regular income to keep the patronage of the household.

The aviation craze in London and in Paris has been succeeded by the Eskimo craze. Last week there was a moral certainty that the Eskimo craze, in fact, larger than ever before. Milliners were drawing inspiration from the wings of the aeroplanes, and the aero hair form of winter headgear. Now comes all the North Pole excitement, and the Eskimo craze is in vogue. The very latest of everything Eskimo. There are Eskimo caps and Eskimo gloves and before long shop windows will have goods labeled "Eskimo panaches," "Eskimo croquettes," "Eskimo Alaska," "Eskimo Cook's mer de glace," "Fruits du nord."

The great airship garage at Wormwood Scrubs is now completed and ready for the reception of the Clement-Bayard II, which Mr. Clement is to sail from Paris to London to be tested by the British military authorities with a view to its possible purchase by the British government. The airship is now rapidly approaching completion and it is hoped that it will be ready to make its first trial in the neighborhood of Paris about the middle of October. Mr. Clement's ambition is that his new airship shall, if possible, complete the 380 miles between Paris and London in a non-stop run of ten hours. It is expected that the Clement-Bayard will be ready to undertake its flight to London before the end of October, and may thus arrive in the English capital while parliament is still in session. In the event it is probable that an effort will be made to carry out evolutions above the houses of parliament. Mr. Clement and Mr. Du Cros, M. P., chairman of the par-

REGULATING THE GREAT WHITE PLAGUE FORMED

The executive of the St. John association for the Prevention of Tuberculosis at its regular meeting in the Board of Health rooms yesterday afternoon decided to have Dr. Porter of Toronto lecturer for the Canadian Association, the Prevention of Tuberculosis, lecture in St. John during the first week in October. The exact date on which the lecture will be given and the building in which it will be given have not yet been decided upon, but will be at an early date.

The executive also decided to issue a circular letter to the association among the citizens of St. John for the purpose of making them acquainted with the aims of the association and inviting cooperation. It will be pointed out that the association is a popular body and not an exclusively medical society. Attention will be called to the fact that the association, when it becomes sufficiently wealthy, to maintain a district nurse and finally to establish a dispensary.

At the termination of the meeting were: Dr. Daniel, chairman; Dr. Melvin, secretary; Miss Grace Leavitt, Dr. L. McLellan, Thos. Gorman, Dr. Silvester, Dr. Keeney and Dr. McAvaney.

PROVINCIAL NEWS

AMHERST, Sept. 20.—Stirling, the crack runner of the Grand Bay Hotel, St. John, has kindly consented to come to Amherst next Friday to run a five mile race on the track of the Grand Bay Hotel. The race will be the championship race of the Maritime Provinces at Halifax. Stirling defeated Cameron twice in the early part of the season, and is now the only man to win a victory from Cameron this summer.

An interesting relay race was run on the Ramblers' grounds Saturday afternoon. Cameron, defeated three well known local runners in the persons of George Blanche, Robert Steele and Frank Hooper in a three mile race. Cameron was fifteen minutes and sixteen seconds, the race was won by Cameron by a few yards. Cameron will run in the Halifax Herald road race on Thursday, and if he wins he will enter in the Montreal races later in the season.

AMHERST, Sept. 20.—In May, 1902, the New Brunswick legislature passed an act incorporating the Chignecto Historical Society. In the first year of its history the society had several meetings for the preserving of the records, manuscripts and relics of the past as well as to prevent the loss of the society was called to order. The society was called to order. The society was called to order.

On Friday evening last a meeting of the society was held in the council chamber of the Town Hall, Amherst. Among those present were Hon. H. R. Emerson, Dorchester; W. C. Milner, Halifax; H. J. Logan, Exmouth; Rev. Dr. D. A. Steele was called to the chair and asked Mr. Milner to read to those present the object of the society. Mr. Milner read the object of the society. Mr. Milner read the object of the society.

BIG GAME IN SPAIN TO RENEW NEIGHBORHOOD OF MEXICAN MOROCCO WAR

Remarkable Luck of Railway Men UNEXPECTED HAUL Moose, Deer and Partridges All in One Day

MONCTON, Sept. 21.—It has been said that some of the best hunting districts of New Brunswick are those not the most widely advertised. The possibilities of the Miramichi woods are well known because many noted hunters of big game have visited there, and because the guides who pilot non-resident sportsmen into the haunts of moose, caribou and deer are enterprising fellows who have assisted the Tourist Associations and the International Railway in giving wide publicity to the excellence of the hunting. The attractions of the forests of Northern New Brunswick are widely advertised in the E. C. R. pamphlets, so much so as to almost create an opinion that sportsmen are not liable to be successful elsewhere.

The story of two inexperienced hunters going into the woods at Coal Branch station, only twenty-seven miles from Moncton, on the Northern Division, and in a few hours securing a moose and a deer, besides some partridges, reads almost like fiction, but such was the experience of Saturday last of two Moncton young men, J. C. Parham and C. E. Myers, both E. C. R. employees. They went to Coal Branch by the morning train for a day's hunting. They were not out for big game particularly, in fact had so little thought of hunting that they were by no means equipped, except that besides a shot gun Mr. Parham had also taken a rifle along, and had taken the precaution of carrying a vestment and a hat in his pocket. Striking into the woods from Coal Branch station, they followed a trail a few miles in search of partridges. It was early in the afternoon when they heard the crashing of branches that announced the presence of a moose not far away. Hastily taking cover they waited until their patience was rewarded when a fine bull emerged from the brush onto a small clearing. Almost immediately the animal caught the scent of danger and turned in their direction to sniff the air. As he did so Mr. Parham fired a shot which sent a fine bullet into him behind the shoulder. The animal staggered, dropped on its knees and then rose again, but receiving another bullet through the body, it fell to the earth and lay dying. His struggles soon ceased, and leaving Mr. Parham on guard, Mr. Myers hastened back to Coal Branch for assistance to get out the carcass. While waiting for the return of his friend with a team of oxen, Mr. Parham fired a fine bullet into a buck deer that happened to wander within range and was successful in bringing it down also. It was the first experience of these hunters at big game, and their luck is considered phenomenal. But it proved clearly that in parts of New Brunswick not widely exploited the game is plentiful. The fact it demonstrates clearly that this province is the greatest big game district in the world.

ALL RECORDS BROKEN AT FREDERICTON FAIR

Attendance 1,200 Ahead of Last Year—Two More Days to Run EXHIBITION GROUNDS, Fredericton, N. B., Sept. 21.—Fine weather favored the exhibition today and 4,571 passed through the turnstiles, making the total attendance about 1,200 over two years ago, with the exhibition yet two days to run. All judging has been completed. Tomorrow, at 3 o'clock there will be a parade of the prize horses, followed an hour later by a parade of cattle. The vaudeville show in Amusement Hall and the wild west show on the grounds are of excellent character and proving a great attraction.

The awarding of the baby prize this afternoon formed an unique and interesting event. So large was the number of entries that it was decided to make the judgment in Amusement Hall. On the stage was placed no less than 25 babies, accompanied by their mothers. Some cried, some laughed, while others remained quiet. It was a most amusing sight and proved a great attraction. Mrs. J. B. Hawthorne, Mrs. R. B. Phillips and Mrs. W. M. Carten acted as judges, and after consultation awarded the prize to Sammy Ode Pickett, son of Mr. and Mrs. Mowat Pickett of Kingsford, six months old, weight 23 pounds. The prize baby was afterwards exhibited in the exhibition. It is not yet learned what opinion the other mothers have of the judges, as probably each fell sure of the prize.

There were a large number of visitors in the city today, about 400 coming from St. John. The cattle will be shipped to Halifax on Thursday on the close of the exhibition, while the race horses will leave tomorrow.

OMAHA, Neb., Sept. 22.—Following a conference last night between a committee of the city council and street railway officials it was announced that President Watters was willing to make some concessions including higher wages and better hours and to grant some minor points to the trolley-striker.

St. John Hotel for Sale Owing to the death of Mr. Louis Nelson, this well-known and well-patronized Hotel is offered for sale. It is splendidly located at Cor. Prince William and St. James sts., and directly opposite wharves used by Boston and Digby boats. Street Cars pass the door. Consists of a fine three-story Brick Building used on street level as shops and hotel office, balance exclusively for Hotel purposes. From time of erection for twenty-eight years conducted by late Jas. A. Burns and since then for the last three years by Mr. Nelson. Property is freehold, is well furnished, and enjoys a good reputation maintained by this Hotel. Business will be continued until after purchaser takes charge. The splendid reputation maintained by this Hotel for the past thirty-one years is sufficient guarantee of the business to be done. Liberal terms to the right person. Apply to MISS MARY L. NELSON on the premises, or to H. H. PICKETT, Barrister-at-Law, St. John, N. B.

CANADIAN HOME COMFORT IS NECESSITY

"All the comforts of home." This is at first appears. It means the right of good health, happiness, love, service. To constitute home. Many a millionaire with every possible convenience, may instead of even the poorest farmer, whose contentment that are strangers to the thing called "the home atmosphere." The true home is characterized by the thing called "the home atmosphere." The true home is characterized by the thing called "the home atmosphere."

Happiness is a matter of heart and culture. The affection, confidence and atmosphere in the home of a poor man is more than all the gold in the world. You or property, or education, love cannot of spirit of the home, like other spiritual things, call "the home atmosphere." If you have not this right spirit in your life, it is to be won by kindness, affection, all those little acts and graces which make up the home atmosphere.

Therefore, let us make the farm home a place to make the rural school the best in time be equipped with every material and cold, modern cook stoves, a kitchen for saving steps and making work easier, a hot steam, hot water or a furnace, a ventilation; a good system of lighting; plants and flowers; pictures and books; an outdoor kitchen and dining room; against the typhoid fly; plenty of sun shades for washing dishes and clothes; making the farm a more comfortable place; an outdoor kitchen and dining room; against the typhoid fly; plenty of sun shades for washing dishes and clothes; making the farm a more comfortable place.

It is astonishing how much a few dollars will accomplish in the home. It is not only more beautiful, but easier to prove the health, vigor and spirits of each in turn means more capacity in each better farming, better profits.

For every home betterment pays financially and soul. It speaks prosperity in the citizenship results, thus is home betterment. Now is the time to live. By the work which called living, which is more existing the farmer himself. Much of the success depends on activity of thought in right improved conditions of daily life. Right thinking.

No one has such unhampered opportunity as the farmer. And no one is becoming the farmer himself. Much of the success depends on activity of thought in right improved conditions of daily life. Right thinking.

All of our useful birds the swallows strictly insectivorous. One can safely say upon insects for their existence. The swallows, thereby destroying such insects or are overlooked by other birds. The number is not only beyond calculation, but also six aspects of swallows most commonly available, cliff or cave swallow, bank swallow and the purple martin. The barn swallow exist in many parts of the country, but the barn swallow and the purple martin are the most common. The swallows are a colony of cliff swallows, building their make a picturesque addition encourages the presence of these birds on a cutting holes in the barn swallow and the purple martin are the most common. The swallows are a colony of cliff swallows, building their make a picturesque addition encourages the presence of these birds on a cutting holes in the barn swallow and the purple martin are the most common.

When the city resident buys a farm it is a corresponding loss to the country. The material benefit to the town in which he lives. If he buys a deserted farm, there will be for he will spend some money for improvement. But if he buys an occupied farm, beauty, and converts it into a typical suburban home.

Most summer residents do little or no farm to fall into disuse they become to the continued prosperity and advancement. There are, however, many city buyers and spend labor and money to improve the farm, and revitalize methods to the good of the country. The man who goes to law to get justice, there are two or three kinds of justice.

It is impossible to live a sealakin life. A homemade dog bread can be made of three parts corn meal, two parts rye flour, one part wheat flour and one part bran, by measure. Sea-ting with salt, mix into a stiff dough with water and bake in hard tin cakes about an inch thick.

CANADA'S BEST AGRICULTURAL PAGE

HOME COMFORT IS VITAL NECESSITY TO FARM LIFE

(BY JOHN J. TAILLON)

"All the comforts of home." This phrase is more far-reaching than at first appears. It means the right environment within the home, good health, happiness, love, service. The home and its furnishings do not constitute home. Many a millionaire's palatial establishment, with every possible convenience, may not be as homelike as the homestead of even the poorest farmer, whose home is sweetened by affection and contentment that are strangers to the palace.

The true home atmosphere, the thing called "the home atmosphere," is the thing in home life, as it is in the life of the individual.

Happiness is a matter of heart and of mind rather than of wealth or culture. The affection, confidence and helpfulness that create the ideal atmosphere in the home of a poor or uneducated family are more real than all the gold in the world. You cannot buy it with money, or lands, or property, or education—love cannot be weighed or measured. The spirit of the home, like other spiritual attributes, is the real thing. If you have not this right spirit in your home, strive for it until you get it. It is to be won by kindness, service, thoughtfulness, sympathy, affection, all those little acts and graces which begot love and stimulate happy contentment.

But vital as is this spirit of the home, how important it is also that the home be equipped with material comforts, so far as possible. Many a man has a full line of machinery to lighten his farm work who through carelessness, ignorance, selfishness or brutality has not provided labor-saving facilities for the house. Except in the comparatively rare instances of real misfortune there is little excuse for any farm home to be ill-equipped. This life is just what we make it. And so much of this life is spent in the home that it behooves both the old folks and the younger members to do all they can to make the home a thing of beauty and a joy forever.

Nowadays the best is none too good for the up-to-date farmer, and for each member of his family. In these years of the up-to-date farmer, and for each member of his family. In these years of the up-to-date farmer, and for each member of his family. In these years of the up-to-date farmer, and for each member of his family.

Therefore, let us make the farm home the best home, just as we are able to make the rural school the best school, and the rural home will be equipped with every material convenience—running water, hot and cold, modern cook stove, a kitchen cabinet, all the little conveniences for saving steps and making work easier; a bathroom and toilet, heat and ventilation; a good system of lighting; clean and sanitary wall coverings; plants and flowers; pictures and books; screens in doors and windows; an outdoor kitchen and dining room rigged up on the porch, insurance against the typhoid fly plenty of sun air to protect against tuberculosis; machines for washing dishes and clothes; cold storage, and facilities for making ice cream or cold beverages; a lawn mower, garden for vegetables and flowers. An up-to-date, homestead has all of these things and more. Most of the farm homes have some of them, every farm home is a market for some of these things or similar devices.

It is astonishing how much a few dollars and a little gumption, taste and judgment will accomplish in making the home and its surroundings not only more beautiful, but easier to live in. This means to improve the health, vigor and spirits of each member of the family, and this in turn means more capacity in each individual, which results in better farming, better profits.

Thus, home betterment pays financially as well as profiting body, mind and soul. It speaks prosperity in the largest and best sense. Better citizenship results, this is home betterment the best patriotism.

Now is the time to live. By the word "live" we do not mean that sham called living, which is mere existence. Not at all. We mean that cheer, appreciation of all that is good and beautiful and ennobling, which depends on activity of thought in right directions, and that is manifested in improved conditions of daily life. Right living is inseparable from right thinking.

No one has such unhampered opportunity for right thinking and living as the farmer. And no one is becoming awake to this fact so much as the farmer himself. Removed from the artificialities of existence and in intimate daily touch with the natural as well as the necessary he may enjoy practically all the comforts of his calling without being forced to forego the characteristic pleasures and privileges of his calling.

Now is the time to enjoy all things richly. And rovingly the right thinking farmer is learning to live. From coast to coast the ripple of the telephone bell is becoming as familiar as the cackle of the hen; from Halifax to Vancouver, acetylene, electric and other improved methods of lighting enjoy practically all the comforts of his calling without being forced to forego the characteristic pleasures and privileges of his calling.

DAIRYING

CONSUMERS ARE SCARED BY THE TUBERCULOUS BOGEY

Too Many Scientists Take Extreme and Unfair Views.

DAIRY NOT SOLELY TO BLAME

(BY F. C. SINCLAIR)

The first and most serious effect of the agitation in the United States by boards of health and so-called milk experts in their efforts to secure cleaner milk is to scare off milk consumers. They picture a few extreme conditions in such a graphic manner as to lead the casual reader to believe that such conditions exist generally. Some have asserted that at least one-third of the cows are tuberculous (based on a test of suspected herds), while other authorities say that not over one per cent of the cows are dangerous in any way.

Nathan Straus, of New York, a pioneer and thorough believer in pasteurizing milk believes that one-third of the cows and two-thirds of the dairy herds are tuberculous. He makes the statement of a scientific savant that every tuberculous cow is either an actual or potential carrier of infection.

CHAMPION GUERNSEY BULL ENDMYION OWNED IN WISCONSIN.

This famous Guernsey was senior and grand champion at one of the dairy shows held at Chicago, exhibited by the late J. H. Endmyion, who was the owner of the bull. The competition at the dairy show was keen and this animal was judged very high class by good judges. He is of good size and has great vigor. Breeding animals of this character do much to maintain Wisconsin dairy prominence.

It would lay the blame for most of this increase on the use of milk on every farm. With medicine, you could read as by sunlight, the women did and out in the stables the stock was fed and the chores finished with such ease and satisfaction as such that I had never ever dreamed when I was a boy.

Now here follows an interesting fact. The entire cost of the lighting, piping, fixtures, including every detail of the plant and equipment, was only \$175, and the cost of a year's lighting, even summer cooking included, was only \$10.65, a sum even smaller than when kerosene was used.

Keep clean water where the hens and chickens can get it at all times. They need a great deal in warm weather. Soak the drinking vessels twice a week.

AGRICULTURE

LIGHTING WITH ACETYLENE IS BY FAR THE BEST

Heat is a Heavy Handicap to the Late Broods.

FIGURES WHICH CONVINCE.

(BY H. H. HALL)

I confess I am an enthusiast over acetylene. Its cheapness, its cleanliness, its safety and its adaptability for use on the farm all unite in giving it first place as a most desirable farm convenience. When I was a boy we used kerosene and the lamps were not very good. They smoked, smelled, and the chickens got black. Reading under these conditions was uncomfortable and certainly bad for the eyes. And then everything was so dark out in the country, with the houses in among the trees. How different now that acetylene is possible and available!

I visited a farm recently on which an acetylene plant was installed. A score of lights were in the house; the attic, the barn and the stables. What a picture it made at night, with the lights all aglow in house and barn and lamp! In the barn, no dull smoky lamps, no lighting troubles. And what is more to the point, the success of the acetylene lighting was so marked that the most skeptical to see its results.

HOME BETTERMENT OPPORTUNITIES ARE DISCERNIBLE ON MANY FARMS TO-DAY.

The world moves. Improvements and comforts are everywhere within the reach of the farm home. In almost every instance the old ways of one or two generations ago are still in vogue. The picture on this page is a fancy but a real one, and indicative of the lack too often observed. Exaggerated? Not a bit of it. It is one instance of the meager comforts, the lack of conveniences, the lack of labor-saving devices, the lack of the evening lamp for father and the boys. Move with the world. Get into line with the rest of civilization. It's worth while.

POULTRY

SUMMER HATCHED CHICKS SELDOM GREAT SUCCESS

Heat is a Heavy Handicap to the Late Broods.

BEGINNING OF R. I. REDS.

(BY R. A. McDOWELL)

It has been my experience every season that chicks hatched in early July, when the heat of summer is coming on, never do so well or grow so fast as early chicks, or even those hatched after the extreme heat is over.

In the hot weather the little chicks, instead of being always on the "go," hunting bugs, etc., are hunting shade and sitting out of the sun, consequently they don't grow so fast. It is even too hot to dust themselves, and one must be very diligent to keep them under the body lice.

THE HEAVY TYPE OF POLAND-CHINA.

This hen weighed 700 lbs. when a year old. Although she was a little weak in the back because of heavy service, still she is smooth and has good legs. She is owned by A. Glenn and is valued at \$5,000.

one will have them wherever they may be needed. We have two in the cellar, ten on the first floor, one on the porch, six on the second floor and two in the attic. There is no need for a lantern or lamp anywhere in the home.

My lighting system cost in money a little less than \$150. This includes generator, pipe, burner, blumbers, wires, one three and two two light chandeliers and five drop lights, together with glass and brass.

Since mill feeds have been so high many farmers have sold all their brood sows, and instead of growing pigs, they have turned to raising chickens. The question naturally arises in the mind of both buyer and seller, "how much are such pigs worth" and questions to that effect are frequently asked at this office. It is impossible for anyone to say definitely, a pig ten weeks old is worth \$2, or \$3 or \$4 as its value depends upon such a multiplicity of varying conditions. The best that can be done is to discuss the features that must enter most largely into the determination of their value.

SWINE

PROPER BREEDING MEANS A DEAL IN SWINE PROFIT

Higher Grain Prices Lead to Study of Feeding Methods.

COST OF THE YOUNG PIG.

(BY N. A. CLAPP)

At present time, when prices for grain are high, and prices for pork are low, it is a desirable thing to make as much growth as possible at as little cost as possible. It is important that the methods of producing pork at little cost, should be considered. The many experiments that have been carried on at present prices of the country have shown that by feeding hogs a moderate amount of grain while on pasture, or by their eating some coarse feed, gains can be made much cheaper than when they are fed grain only.

The stomach of the hog is not large enough to enable it to consume coarse feeds enough to make profitable gains on grass or clover alone. But by using both grain and pasture grasses, he can be kept thriving, making the popular kind of meat, lean and fat intermingled, and make profitable returns even at present prices for grain.

ANSWERS TO CORRESPONDENTS

NOTE—Not more than one question from one correspondent can be considered in this column. Questions should be specific, clear and concise, and should be addressed to the Editor, 1000 Agricultural Department of this paper. Any person requiring a reply by mail must enclose stamped envelope—Editor.

ECZEMA—H. J. P. has a dog, with a breaking out on his face and body, which causes itching. Mix 1 gram iodine of sulfur with 1 gram vasoline. Rub a little of this on the affected parts and repeat in one week if needed.

MOLES—J. B. S. The presence of moles indicates a abundance of worms or grubs, for these animals live largely upon insects. Flooding the runways with water will drive them out. Scatter wads of cotton waste with handfuls of carbon ash on these runs; the gas will kill them.

COUGH—C. G. has a cow that has a cough and keeps in poor condition. Boil one teaspoonful flaxseed in a pint of water and give it to the cow once a day with one of the following powders: 1. One teaspoonful of pulverized sulphate of iron in 20 cc. of water.

COUGH—C. G. has a cow that has a cough and keeps in poor condition. Boil one teaspoonful flaxseed in a pint of water and give it to the cow once a day with one of the following powders: 1. One teaspoonful of pulverized sulphate of iron in 20 cc. of water.

DERANGED UDDER—J. G. R. has a cow that has a cold, and since then one of her udders has become sore. Rub a little milk can be gotten from it. Mix 1/2 ounce of salicylic acid with 1/2 ounce of a little on the hard part every third day, and continue for a month or more if needed.

CONTINUED HEAT—F. W. has a mare that seem to be in heat all the time. Give 1 oz. bromide of potassium in a dose twice a day in bran mash continue for 10 days. Then skip a week and give again if needed.

INDIGESTION—E. L. S. has a young cow that has a very poor appetite, and is not gaining weight. Give 1/2 ounce of a dose of castor oil. Give 1/2 ounce of a dose of castor oil. Give 1/2 ounce of a dose of castor oil.

SPRAYING WEEDS—J. G. S. Sulphate of iron is intended to be used as a spray to kill weeds in grain and grass which give cattails. It would probably be injurious to corn, beans and other crops. One should be cultivated to conserve moisture and promote growth, as well as to kill the weeds.

NERVE DERANGEMENT—H. W. B. has a horse that has a nervous habit about once a month. He will run in his box stall for hours, and at other times he seems all right. Give 1/2 ounce of bromide of potassium in a dose twice a day in bran mash continue for 3 days. Then skip two weeks and give again if he should have an attack.

DERANGED UDDER—G. A. S. has a udder under caked in the front part and has a sore on the udder. Rub 1/2 ounce of a dose of castor oil. Give 1/2 ounce of a dose of castor oil. Give 1/2 ounce of a dose of castor oil.

ECZEMA—O. G. has a cow that scratches her head and shakes it. There are scabs near the root of the tail. Rub a little on the affected parts. Rub a little on the affected parts. Rub a little on the affected parts.

ASTHMA—H. J. P. has a horse that has a cough and keeps in poor condition. Boil one teaspoonful flaxseed in a pint of water and give it to the horse once a day with one of the following powders: 1. One teaspoonful of pulverized sulphate of iron in 20 cc. of water.

POULTRY—M. J. P. has a hen that has a cough and keeps in poor condition. Boil one teaspoonful flaxseed in a pint of water and give it to the hen once a day with one of the following powders: 1. One teaspoonful of pulverized sulphate of iron in 20 cc. of water.

ANTS IN THE LAWN—F. E. The ants' nests and pour into each a teaspoonful of sulphate of carbon. Cover

A PAIR OF MAMMOTH WHITE PEKIN DUCKS.

The Pekins are the most popular breed with the large duck raisers because of their large size, early maturity, and prolific fertility. They frequently dress 6 lbs. each at 10 weeks old. They are also the most profitable breed, a point with some which makes them objectionable for a farm ducking.

the nests for a few minutes with a damp blanket, then remove and expose the sulphur to the mouth of each hole by means of a light at the end of a pole. The slight explosion will drive the poison fumes down into the tunnels and kill thousands of the ants.

ALL SORTS—G. F. L. Put common rice through a coffee or tea mill for making ground rice for whitewash. You can also cook it until it cooks to pieces. C. J. B. Separator milk is condensed worth 20c to 25c per 100 lbs. to feed calves and pigs. It makes the best feed of any kind for the next to whole milk.

H. S. As the air above the earth is not directly over one spot if it were not for the air currents which carry it in many directions or another—F. C. McC. A. dried poultry can be preserved in a feed dealer. C. D. W. There is no way of preventing poultry to molt in the spring.

Mrs. J. S. Eggs which are infested with the trouble may be kept either the good or the gander.

weight daily must be allowed for the milk. In summer of course, pasture would in large measure take the place of the grain, but the cost of this pasture and its fencing must be figured in.

Hogs are liable to waste more or less of any crop which they are allowed to run over. Movable fences will enable one to hold them on a portion of a field until they have consumed practically all that is valuable at the time. Hogs take to pasture feeds when moist with dew or rain.

Since mill feeds have been so high many farmers have sold all their brood sows, and instead of growing pigs, they have turned to raising chickens. The question naturally arises in the mind of both buyer and seller, "how much are such pigs worth" and questions to that effect are frequently asked at this office. It is impossible for anyone to say definitely, a pig ten weeks old is worth \$2, or \$3 or \$4 as its value depends upon such a multiplicity of varying conditions. The best that can be done is to discuss the features that must enter most largely into the determination of their value.

The first consideration is the cost of the pig at birth. This is found by dividing the cost of the sow's service and the sow's maintenance for the year by the number of pigs produced. The average number of pigs from one sow is about seven and one-half to eight, but in every herd are some sows that produce more than the average number for the whole herd would in many cases be considerably less than the average. The cost of the sow's service is variously placed at from 50 cents to \$2 per sow, depending upon the cost of the sow and the number of sows he serves. The cost of maintaining a sow for a year varies from \$3 to \$15, depending upon the weight of the sow and the kind of feeds used. During that part of the year when grain is scarce, eight or ten cents of a pound of feed per hundred

LOCAL MATTERS OF INTEREST.

SATURDAY

W. T. James, a passenger from Bermuda to his home at Paradise, N. S., reached the city yesterday morning on the S.S. Sobba. He states that trade conditions between the island and Canada were in a better condition than ever before. Everything is booming on the island itself and indications point to good crops in onions and other commodities. Lord Kitchener is expected to visit the island during the winter, as the guest of General Walker Kitchener.

Between Saturday night and Sunday morning Frank Estlin's house on Market Road was entered. A ring valued at \$12 and \$20 in cash were taken from the premises. The stolen articles were in their places Saturday night and after dinner yesterday were missed by one of the occupants. The police were notified and a search was made around the place which was absent from his accustomed place yesterday afternoon. As yet no arrests have been made.

While dispersing a crowd of boys on Union street last night, Policeman Rankine was struck in the leg with a stone thrown by one of their number. The injury forced him to leave his beat and seek his home. The officer was chasing the crowd when he was struck by a stone thrown from behind. He sought aid at a nearby drug store, but was suffering such intense pain that he was forced to take a car for his home. This is the second case in a short time when the police have been interfered with by unruly boys and a number of last night's crowd are known arrests will probably be made.

While standing on the wharf at Reed's Point on Saturday afternoon watching the boats racing in the harbor, Mrs. Grant, of this city, who was quite an enthusiastic spectator, had the misfortune to drop her hand satchel containing a number of articles, including a gold bracelet and diamond ring, into the harbor. Nothing could be done at the time to recover the lost articles, but Mrs. Grant has secured the services of Diver Edward Lahey, who will go down today in an attempt to recover the satchel.

Mr. Vincent A. Porter, who for the last five years has held the position of manager of the International Harvester Co. in this city, has been appointed to the position of district manager for the Harvester Co. in the United States. Mr. Porter and his family left for New York on Thursday evening for a short visit to his home in New York. Mr. Porter is a very pleasant gentleman and has been very successful in his position in this city. He has been in the Harvester Co. for many years and has been very successful in his position in this city.

After trying for about twenty years to obtain full particulars of the whereabouts of his relatives, who were taken prisoner during the time of the American Civil War, and died while in the state of incarceration, in order to receive a government grant, now justly due them, having been accruing for some forty years, his relatives have not yet succeeded in completing their search, or receiving any of his pension from the United States government.

This morning the diver and crew of the S.S. Cynthia were busy making preparations to raise the boiler lying in the sixth sea. Last Saturday night the diver, the dredge fielding struck the top of the boiler, which is quite a large one, protruded about ground about sixteen inches. Quite a quantity of rock has been found at this depth which is being removed by the Cynthia, while the fielding level the bottom. Repairs are about completed and the fielding is expected to continue digging tomorrow.

Accommodations were heavily taxed on the outward trip of the Calvin Austin to Boston. It is expected to carry a crew deal more grain this season than they have been doing at home. The Boston-Wilby Co. is reported to have chartered 15,000 bushels of grain to Liverpool and London. The 100 bushels will be shipped now. The 100 bushels will pass through the S. S. Albatross.

FIRE DESTROYED THE LACEMITH SHOP

At an early hour this morning the destruction of the shop and the tools and lumber which it contained will entail a loss of five and there is no insurance. Mr. Day was awakened by the glare of the flames and securing help from the residents of Beulah Camp managed to extinguish the fire. The house was saved with difficulty.

Game warden Dean has had a conference with the market dealers and a number of them have applied for licenses to sell carcasses of big game. The license costs one dollar and is obtained from the Surveyor General's office at Fredericton. Warden Dean also called the attention of the dealers to the provision requiring them to preserve the shipping tags, giving the name of the hunter, number of license, etc.

C. H. Allan, who has been attending the Seattle fair in the interests of the St. John Exhibition Society, is expected to arrive in the city the first of next week. Immediately on his arrival here a meeting of the Exhibition executive committee will be held. Mr. Allan's plans and suggestions, obtained in Seattle, will be submitted. Other important matters will also be dealt with. The committee will be held on Wednesday night, and will be further discussed. The committee is working hard, making preparations for the big fair, which promises to surpass any exhibition ever held in Eastern Canada.

WEDNESDAY

Police Constable Abner Belyea, has seized a case of Scotch whiskey at New Brunswick Coal and Railway Company's station at Chipman. The case was marked "W. A. Chipman, Constable Belyea, intended bringing action against several wholesale liquor dealers of the city for sending liquor to a Scotch lot county for illegal purposes.

A meeting of the committee in charge of the arrangements for the Presbyterian synod to be held here on October 5th, 6th and 7th was held last evening and the following business was transacted. Delegates will be present at the church council from the various parts of Nova Brunswick, Nova Scotia, Prince Edward Island and Newfoundland. The complete list of delegates will be ready for publication in a few days.

The kidnapping case of Mrs. Bridget Hymowitz of Lawrence, Mass., against James McManus of Hampton, was to have come up before Magistrate H. H. Bate, was the scene of a pretty wedding, when their daughter, Miss Ethel Prentiss, was united in marriage by Rev. J. Colpitta to Frank Leaman, of the same place. The bride wore a gown of white broadcloth with Irish lace and soutache braid trimming with conventional designs in blue, green and carmine. The wedding march was rendered by Miss Elizabeth Wells. Mr. and Mrs. Leaman will make their home in Amherst.

LEAMAN-TINGLEY

LIST OF SEPTEMBER BRIDES

SWELLS AS MONTH CLOSURES

A happy event that has been looked forward to with much interest on account of the popularity of the contracting parties, was celebrated in Holy Trinity Church at 7 o'clock last evening, when Miss Agnes Tomney, daughter of Mrs. M. J. Tomney, of 128 Paradise Row, was united in marriage to Miles Carroll, of Union street. The ceremony was performed by Rev. J. J. Walsh.

The bride's costume was of grey silk. She was attended by Miss Lizette McSherry, who was gowned in blue. John E. McDonald supported the bride. The groom's present to the bride was a set of furs, to the bride a pearl stick pin, to the bridesmaid a pearl brooch. The happy couple left for the C. P. R. at 1:30 on their way to Saint John, Digby, Annapolis and Parrabrook. When they return they will reside on Front street.

RICH-FLAM

CHATHAM, N. B., Sept. 22.—The wedding of Miss Sarah L. Rich, daughter of Mr. and Mrs. Charles Rich, Water street, to Mr. Louis Flam, of Grand Falls, was solemnized last evening at the bride's home by Rev. Rabbi Amund, of St. John. The house was crowded with guests and friends and the ceremony passed off with much rejoicing. The happy couple left for Grand Falls on the C. P. R. at 1:30 on their way to Saint John, Digby, Annapolis and Parrabrook. When they return they will reside on Front street.

FRIDERICTON

Sept. 22.—The wedding of Miss Mary E. Donohoe, daughter of Mr. and Mrs. W. A. T. Thorne, Somerset street, when Mr. Levi N. Schofield, of Portland, Me., was united to Miss Rosella Kate Orchard, also of Portland. The ceremony was performed by Rev. A. R. McDonald, assisted by Rev. D. Hutchins. A few special friends and relatives of the bride and groom were present. The bride wore a gown of white broadcloth with hat to match, and carried an amber and rose and a white parasol. She was attended by Miss Evelyn A. Bradley, of Boston. The groom wore a suit of dark blue and carried a top hat. The happy couple will make their home in Portland, Me.

RAYMOND-CAMERON

A quiet wedding took place last evening at the home of Rev. Geo. W. Titus, 107 Chestnut street, when Miss Annie Raymond, of St. John, N. S., was united in marriage to Frank Bell Cameron, of this city. Only the relatives and immediate friends of the happy couple were present. The bride wore a gown of white broadcloth with hat to match, and carried a top hat. The groom wore a suit of dark blue and carried a top hat. The happy couple will make their home in St. John, N. S.

ZEIGLER-BERRY

MONCTON, N. B., Sept. 23.—St. John's Presbyterian church at 8 o'clock last evening was the scene of a pretty wedding, Miss Birdie Laughey, daughter of Col. John Berry, being united in marriage to Mr. Zeigler, of Winnipeg. The church was prettily decorated with flowers. The ceremony was performed by Rev. J. Colpitta. The bride wore a gown of white broadcloth with hat to match, and carried a top hat. The groom wore a suit of dark blue and carried a top hat. The happy couple will make their home in Winnipeg.

SACKVILLE BRIDES

Two weddings took place in Sackville yesterday. The first was the marriage of Miss Helen Prentiss to Mr. Frank Leaman, of the same place. The bride wore a gown of white broadcloth with Irish lace and soutache braid trimming with conventional designs in blue, green and carmine. The wedding march was rendered by Miss Elizabeth Wells. Mr. and Mrs. Leaman will make their home in Amherst.

WILLIAMS-KELLY

The wedding of Miss Ruth, daughter of James Kelly, of this city, to William Williams, took place at 4:30 last evening at the residence of the groom's father, A. E. Williams, of 14 Harding street. The ceremony was performed by Rev. C. W. Sullivan, of Moncton. The bride wore a white costume, and the bride's maid was Miss Mabel Kileup, sister of the groom.

SCRIBNER-POWELL

SUSSEX, N. B., Sept. 23.—A very pretty wedding was solemnized at 12 o'clock today at the residence of the bride, when Miss Irene Victoria, daughter of R. W. Scribner, station agent of Moncton, was united in marriage to Seymour V. Powell, of Moncton. The ceremony was performed by Rev. B. H. Thomas, of Berwick. The bride wore a gown of white broadcloth with hat to match, and carried a top hat. The groom wore a suit of dark blue and carried a top hat. The happy couple will make their home in Moncton.

MCGRADY-WILSON

MONCTON, Sept. 23.—The marriage of Brougham E. McGrady, of the I. C. Refractory, to Miss George Wilson, of this city, took place at the bride's home last evening at eight o'clock. Rev. E. B. McLatchy, pastor of the Holy Trinity church, performed the ceremony. Mr. and Mrs. McGrady left on the Maritime on a trip to Montreal and Toronto.

GEORGE-HICKS

SACKVILLE, N. B., Sept. 23.—At the home of Mr. and Mrs. C. W. George, Upper Sackville, last evening, Mr. and Mrs. George's daughter, Miss Margaret E. George, was married to Mr. and Mrs. Gullford Hicks, of this city. The ceremony was witnessed by a large number of guests and was performed by Rev. J. L. Dawson. The bride was given away by her father and was attended by her sister, Miss Turner, of Port Elgin. The bride's costume was of white silk with trimmings of baby Irish lace. She carried a bouquet of cream bridle roses. After the ceremony a wedding supper was given at the home of Mr. and Mrs. Hicks. The happy couple will make their home at Upper Sackville. The bride's going away costume was of fawn broadcloth with hat to match.

FORBES-LORING

MONCTON, N. B., Miss Myra Ethel Forbes was married this morning to Mr. Robert Wm. Loring, of Moncton. The ceremony was performed by Rev. James Stothard. The couple have gone to St. John and will go through the Annapolis Valley on their honeymoon.

COOK DESCRIBES LAST

LAST STAGE OF HIS DASH FOR THE NORTH POLE

(Continued from Page One.)

1908, and if we did not return he was told to place Koolookingwah in charge and go home, either by the whaler or by the Danish ship to the south.

NO RELIEF WOULD AVAIL

No relief which he could offer would help us and to wait for an indefinite time alone would have inflicted a needless hardship. This was my own opinion. The instruments were prepared for Koolookingwah and Inuit to take back on the morning the first crystals had been swept from the air, but there remained a humid chill which pierced to the bones. The temperature was minus 25 Fahrenheit. The level of snow was quite impossible for us to start, so we withdrew to the snow sheds and waited for a few hours longer. At noon the horizon cleared, the wind veered to the southwest and came within earshot. The dogs had been doubly fed the night before, they were not to be fed again for two days. The twelve hungry huskies were fed with extra portions of seal and quickly slipped around deep grooves in the great palaeolithic floor.

HELPING THE ADVANCE

On the morning of March 18 preparations were made to divide the party. The advance must be helped over the rough ice of the pack edge, and for this purpose, Koolookingwah and Inuit were selected. They were given an abundance of extra food. In the course of an hour a comfortable balance of crystal was erected and into it we crept out of the piercing wind.

FIRST DAY'S MARCH

The first day's march over the circum-polar sea was a hard one for each of us. The dogs curled up and went to sleep without a call, as if they knew there would be no food until the morning. Their faces were their conventional long hair and sank quietly into a comfortable slumber, but for me sleep was quite impossible. The whole problem of our campaign must be again carefully studied, but to reach our ultimate destination, for the returning parties and for the security of the things at Anookook, it was difficult at this time to even guess at the probable line of our return to land.

NOT AS GOOD AS EXPECTED

The second run on the Polar sea was with twenty-one miles to our credit. I had expected to send the supporting party back from here, but progress had not been as good as expected. We could hardly spare the food to feed their dogs, so they volunteered to push along another day without dog food. On the next day, with increasing difficulties in some troublesome ice we camped, after making only sixteen miles. Here a small snow house was built, and from here, after taking of a pot of steaming muck on loins and broth, followed by a double brew of tea, our last helpers returned.

FRANCKE'S INSTRUCTIONS

Because of this uncertainty Francke was instructed to wait until June 5.

WANTED

WANTED—Ladies to do plain and light sewing at home, whole or spare lots. Good pay. Work sent daily. No experience, charges prepaid; send stamp for full particulars. National Manufacturing Company, Montreal. 12-3-4-4

We could hardly spare the food to feed their dogs, so they volunteered to push along another day without dog food. On the next day, with increasing difficulties in some troublesome ice we camped, after making only sixteen miles. Here a small snow house was built, and from here, after taking of a pot of steaming muck on loins and broth, followed by a double brew of tea, our last helpers returned.

FRANCKE'S INSTRUCTIONS

Because of this uncertainty Francke was instructed to wait until June 5.
