of the long-expected Senate reform resolution, which he will move on Wednesday.

It read as follows:

"That an humble address be presented to Her Majesty the Queen, setting
forth that the provisions of the British
North America Act, 1867, respecting the
powers of the Senate of Canada in the
making of laws are unsatisfactory and
should be brought more into harmony
with the principle of popular government, and praying that Her Majesty may
be pleased to recommend to the Imperial
Parliament a measure for the amendmentof the said act in such terms as will
effectually make provision as follows:

"If the House of Commons passes any
bill which the Senate rejects or fails to
pass or amends in a way not accepted
by the House of Commons at the next
following session, again passes such bill,
and the Senate again rejects or fails to
pass or amends the same in a way not
accepted by the Commons, the GovernorGeneral may by proclamation convene
one or more joint sittings of the members
of the two Houses for the further consideration of such bill or amendments,
and the question whether such bill or
amendment shall pass shall be decided
by a majority of the members of the two
Houses present and voting, and the vote
of any such joint sitting shall, as resputs

The Death of Mr. Ives.

On the orders of the day being called, Sir Charles Tupper said it was again his sad duty to call attention to the death of a member of the House. He need not say to the House, of which the late Mr. Ives has been so long a member, that no gentleman could be removed from this House whose absence would perhaps create a greater void. As an able lawyer, as a man of great business enterprise and capacity, as a man of the Legislature for many years, and as an administrator of an important public department, Mr. Ives has filled an honorable place in this country and has well and faithfully discharged the fárious duties devolving upon him. He spoke with great feeling of the loss which Mr. Ives would be to the House, to the Conservative party and to the country. Continuing, he said that the hand of death had been laid heavily on this Parliament. Not only had the House lost some of its members, but in the Senate there had also been several deaths, one of which, that of Senator Sanford, had been peculiarly shocking by its suddenness. In conclusion, Sir Charles its all the senate there had also been several deaths, cone of the senate of the later of the senater of the suddenness. In conclusion, Sir Charles its suddenness. In conclusion, Sir Charles of the suddenness in conclusion succession.

Sir Wilfrid Laurier said he soined most heartily in the expressions of regret which had fallen from the lips of the leader of the Opposition. "Mr. Ives," he said, "was one of the most influential, important and useful members of this House. Hon, gentlemen who came into this Parliament at the last election were unable to appreciate him fully, because, being much engaged in commercial and business pursuits, he had not of late taken the same active part he did in former years in the proceedings of this House, but those who have sat in the House with him for the last 20 year can testify that he always imparted much useful information to the diseasion of every subject he chose to speak upon. On some questions, indeed, it is not too mirch to say that he was an authority. In everything that pertained to finance, business, commerce, aericulture, lumbering and mining, he had a wast amount of knowledge and a great deal of experience, which enabled him to speak on all these questions as a master, and his loss amongst us will be all the more felt when we have to deal with such questions as toese." He referred to his personal association with Mr. Ives in early life, and, in conclusion, said that he thoroughly joined in the expression of sympathy for the family of Scenator Sanford, the circumstances of whose death were peculiarly sad. Sir Wilfrid's Sympathy.

The House in Supply.

The House then went into supply, taking up the Public Works votes. On the item of \$354,000 for St. Lawrence ship channel a long discussion took place.

The Opposition vigorously criticized the Government for the employment of day labor in the construction of a dredge at the Sorel workshops. Good progress was, however, made on the Public Works settimates.

Dying—Mr. Leduc Very III.

Ottawa, July 18.—Drs. Powell and Ruddick have advised Sir James Edgar, Speaker of the House of Commons, that it is necessary for him to take a rest, the arduous work of the session having produced splonetic anaemia. No serious remits are anticipated, but it is considered advisable for his honor to rest for a couple of months. Sir James Edgar and Lady Edgar left for Toronto last night and during the week will go to Sir James' country house at Roach's Point, where the remainder of the summer will be passed. The Queen's Frize Cenditions.

The Queen's prize, the blue ribbon of the active volunteer rifenen, consists of £350, the N.R.A. gold medal, and the N.R.A. gold badge. In addition there are 59 prizes given, ranging from £60 for the second, to £1, the total value being £3,430. All of these prizes, with the exception of the first, are open to retired volunteers, but the Queen's prize itself can only be captured by a member of a volunteer regiment. The medals and badges given in addition to those mentioned are: For the highest aggregate soorer in the first and second stages, the N.R.A. silver medal and badge, and for the highest aggregates correr in the first and second stages, the

stage, the N.R.A. bronze medal and badge.

The first of the stages, which are all squadded competitions, consists of seven shots at each of the following distances: 900 yards, 500 yards and 600 yards foot and 600 yards shooting will be made to-day. The 300 who make the highest aggregate score in the first stage will be entitled to compete in the second stage, which will be shot off on Thursday. The final stage will be decided on Saturday, when 100 who have made the best scores in the second stage will decide by their total aggregate who is entitled to the much coveted distinction.

Fingged Trains in Danger.

Vancouver, B.C., July 18.—Late Saturday night a spark from a freight train set fire to and completely destroyed the railway bridge 18 miles west of Kamloops, and just east of Cherry Creek. The bridge spanned the arm of Kamloops Lake and was a Howe truis structure 196 feet in length. The incident was attended by an axhibition of pluck on the part of a railway laborer shat is much oftener seen in melodana than in real life. But for him the west going express would probably have been precipitated into the water. This C.P.R. watchman discovered the fire just in time for him to flag the two trains that were cast and west bound, respectively. It was late as night, and in order to make sure of stopping the eastbound train the watchman heroically swam across the stream at this junction with the lake and flagged the train. He made the trip back and flagged the westbound train. The passengers on both are warm in praise of his action. Iolder, Pte. H.D., 30th Batt. toss, Major J. B., 18th Batt.

Morrisburg, Ont., July 18.—About 2.80 yesterday morning burglars forced an entrance through a rear window into Chalmers' jewellery store, and made an attempt to blow open the safe. Two charges were set off, the last one being of terrific force. Parties living in the building were aroused, and succeeded in sparing off the robbers. The door was badly damaged, but the safe was not opened. Four men were distinctly seen by different persons making good their escape. They fired a number of shots at those who were giving the alarm. This is the second attempt to burglarize Chalmers' store within the last two weeks. Burglars at Morrisburg.

softly:
"There is just room between that and the fence for a person to pass sideways.

If you and this lady want to get nearer o Miss Knollys, you might take that road. But Mr. Gryce will expect you to be very quiet. The young lady expressly said before she came into this place that she could do nothing if for any reason Mr. Trohm should suspect

that they were not alone."

"We will be quiet," I assured him, anxious to hide my face, which I felt twitch at every mention of Mr. Trohm's name behind the screen he thus offered for our use. Loreen was already behind

the hedge.

The evening was one of these which The evening was one of those which are made for peace. The sun, which had set in crimson, had left a glow on the branches of the forest which had not yet faded into the gray of twilight. Where is silly Rufus and all the rest who have vanished between Deacon Spear's house and th little home of the cripples on the high road? Can a man who loves these things stomach the destruction of a man, much less of a silly, yawping boy? Lucetta, you are mad!"
"Mad or sane, my accusation will have its results, Mr. Trohm. I believe too deeply in your guilt not to make

"Yes, that they might not suspect you and perhaps that they might suspect us. But it was useless, Obadiah Trohm. Althea Knollya' okildren have been long suffering, but the limit has been reached at last. When you laid your hand upon my lover, you roused your hand upon my lover, you roused

CHAPTER XXXV.

EXPLANATIONS. The cause of Lucetta's joy was soon explained. Mr. Ostrander had not fallen a victim to Mr. Trohm's mania, but was in X alive and well. That Mr. Gryce knew this at the time of showing Gryce knew this at the time of showing her the telegram was apparent to me and probably suspected by her, but me words were ever exchanged on the subject, possibly because she was soon made too happy by her lover's explanation to regret anything which had led up to this satisfying hour.

He, so it seems, had found it impossible to leave Lucetta. Upon issuing from Lost Man's lane he had met Mr. Gryce and learned enough from him of

"Ah," said he, "then yon have not done so yet? You believe this and that, but you have not said so."

"No," she calmly returned, though her face blanched to the colorlessness of wax, "I have not said so yet."

Oh, the cunning that crept into his face!

"She has not said it. Oh, the little Lucetta, the wise, the careful little Lucetta, the country wise and to a degree in hiding, place having been found for him

Mr. Gryce never neglects it, but Mr. Mr. Gryce understands his business and Gryce has a heart, too, and that heart has a way of working even amid his most argent affairs in a manner to bring light out of darkness as well for the happiness of those concerned as for the elucidation of the mystery he has undertaken to clear.

The hour we all spent together late that night in the old house was unlike any hour which that place has seen for years. Mr. Ostrander, Lucetta, Loreen, William, Mr. Gryce and myself all were there, and as an especial grace Saracen was allowed to enter, that there haight not be a cloud upon a single face.

The next morning we all took a walk in the lane. (I say nothing about the night. If I did not choose to sleep or if I had any cause not to feel quite as elevated as the young people about me, there is surely me reason why I should dwell upon it with, you or even apologies for a weakness that is, I hope, but the exception setting off my oustemary

Now a walk in this lane was an event. To feel at liberty to stroll among its shadows without fear, to know that the danger had been so located that we all felt free to inhale the autumn air and te enjoy the beauties of the place without a thought of lurking trouble in its sweetest nooks and most attractive

its sweetest noons and most autractive goverts, gave to this short half hour a distinctive delight aptly expressed by Loreen when she said:

"I never knew the place was so beautiful. Why, I think I can be happy here now." At which Lucetta grew pensive, till I roused her by saying:
"So much for a constitutional, girls. pensive, still I roused her by saying:
"So much for a constitutional, girls.
Now we must to work. This house, as
you see it now, has to be prepared for a
wedding. William, your business will
be to see that these grounds are put in
as good order as can be done in three
days. I will bear the expense, and Loream".

"Miss Butterworth," said he, "you're "Miss Butterworth," said he, "you're a right good sort of woman, as Saracen has found out, and we, too, in these last few plaguy days of our trouble here. But I'm not such a bad lot either, and if I do like my own way, which may not be offier people's way, and if I am sometimes short with the girls for some of their d.—d nonsense, I have a little them. decempy about me, too, and I say I will fix these grounds, and out of my own money too. Now that nine-tenths of our income does not have to go abroad we'll income acces not have so go actions we have chink enough to let us go respectable once more in a place where one horse, if he's good enough, will give a fellow a standing and make him the envy of even those who for some other peaky reasons may think themselves called upon to hoot him. I don't be-grudge the old place a few dollars, especially as I mean to live and die in it so look out, you three women folks, and work lively as you can on the inside of outside will put you to open shame, and that would never please Loreen, nor, as I take it, Miss Butterworth

It was a challenge we were glad to accept, especially as from the number of persons we now saw come flocking into the lane it was very apparent that we should experience no further diffi-culty in obtaining any help we might

only in obtaining any help we might need to carry out our undertakings. Meantime my thoughts were not alto-gether concentrated even upon these pleasing plans for Lucetta's benefit. There were certain points yet to be made clear in the matter whose termination still lay heavy on my heart, and there, was a confession for me to make, without which I could not face Mr. Gryce with all that unwavering composure which our peculiar relations seemed to

demand.

The explanations came first. They were volunteered by Mr. Gryce, whom I met in the course of the morning at Mother Jane's cottage. She had been perfectly happy all night, sleeping with the coin in her hand and waking to again devour it with her greedy but loving eyes. As we were looking at her and Mr. Gryce directing with his hand the movements of the men who had come to smooth down her garden and make it presentable again the detective spoke.

make it presentable again the detective spoke.

"I suppose you have been wondering how this old woman came to have those mementos of the crimes which took place up there. Well, we have figured it out thus: The trinket from the peddler's pack she probably stole from that pack before it was found by the villagers and given up to the proper authorities. The other, the ring, has a different history, and the finding of it in Mother Jane's possession can only be explained by a series of causes so bizarre that they must ever rank as among the most remarkable that have ever adorned the annals of our police register. Should I give it out as a puzzle you could never answer it. How could a ring which was en the finger of Mr. — five minutes before he vanished from the light of the sun forever pass from the month of before he vanished from the light of the sun forever pass from the mouth of that old well into Mother Jame's hand a half mile away without compromising Mr. Trohm in the eyes of mortal man, or even Mother Jame, who was as innocent of wrong in this as we are? You cannot tell. You might quote Scripture and say, 'A bird of the sir carried it.' But, Miss Butterworth, you would never believe the truth of your own words, and yet that was the vary way it was done—a bird of the air carried it. In those days—it is three months ago now—Mother Jame begt two tame pigeons. They slept on her house top, they ste from her hand and they flew sometimes as far away as Mr. Trohm's garden. One day a young man, equipped

s ring, and being nervous was fiddling with it as he saiked to the pleasant old scatteman who was lowering the bundlet for him. As he fiddled with it the serith fell from under him, and as the daylight vanished above him the ring few out of his up thrown hand and lay, the only taken of his now blotted out existence, upon the emerald sward he had but a moment before pressed with his unsappicious feet. It burned—this ruby burned like a drop of blood in the grass when that demou came again to his senses, and being a felltale evidence of crime to him whe had allowed nothing to ever speak against him of these matters, he stared, at it as at a deadly thing directed against him of these matters, he stared at it as at a deadly thing directed against him of these matters, he stared at it as at a deadly thing directed against him of these matters, he stared at it as at a should be to the hind how he had allowed nothing to ever speak against him of the same and a first and to be get rid of at once and by means which by ne possibility could recoil back upon himself as its author.

"The pigeons stalking near offered to his shoursally soute understanding the only solution which would leave him absolutely devoid of fear. He might have swung open the lid of the well one more and fung it after its owner, but this meant an afternath of experience from which even he shrank who delighted in the thought that the viotims he saw vanish before his eyes were like something whyse on the to lure birds into his hands), and tying the ring around the neck of the kind to take advantage of old Mother Jane's eyes, of course, was a plucked up from the highway he let it fix and so was rid of the bandle which the bird had flewn before lighting on her doorstep."

"Wonderful!" I exclaimed, almost overwhelmed with humilitation, but the distance of the bird had flewn before lighting on her doorstep."

"Wonderful!" I exclaimed, almost ovarwhelmed with huntiliation, but preserving a brave front. "What invention and what audacity—the audacity of a man totally irresponsible for his deeds, was it not?" I asked. "There is Feed young fowls five times a day until they are a month old.

the facts about the ring and the pigeon. I drew a deep breath. We were standing in the sight of several men, and their presence there seemed intolerable. Unconsciously I began to walk away. Unconsciously Mr. Gryce followed me. Unconsciously mr. Gryce follows me. At the end of several paces we both stopped. We were no longer visible to the crowd, and I felt I could speak the words I had been burning to say ever since I saw the nature of Mr. Trohm ex-

posed.
"Mr. Gryce," said I, flushing scar-let—which I here solemnly declare is something which has not happened to me before in years and if I can help it shall never happen to me again—"I am interested in this which you say be-

microssed in this which you say because yesterday, here in the open road,
Mr. Trohm proposed to me, and"—
"You did not accept it?"
"No. What do you think I am made
of, Mr. Gryce? I did not accept him,
but—I made the refusal a gentle case, and—this is not easy work, Mr.
Gryce," I interrupted Layself to say
with suitable grinniess—"the same
thing took place between me and Deacon Spear, and to him I gave a response such as I thought his presumption war-canted. The discrimination does not argue well for my acumen, Mr. Gryce. You see, I want no credit that I do not

You see, I want no credit that I do not deserve. Perhaps you cannot understand that, but it is a part of my nature."

"Madam," said he, and I must own I thought his conduct perfect for the monos, "had I not been as completely deceived as yourself I might find words of criticism for this possibly unprofessional partiality. But when an old hand like myself can listen to the insinuations of a manine and repose, as I must time myself can listen to the institutions of a manisa and repose, as I must say I did repose, more or less confidence in the statements he chose to make me, find which were true enough as regarded plain fact, but wickely false and ed plain fact, but wioned as regards their suggestion, I can have no words of blame for a woman who, whatever her understanding and whatever her experience, necessarily has seen less of human transport of the second sec man nature and its incalculable surprises. As to the more delicate matter you have been good enough to confide to me, madam, I have but one remark to make. With such an example of wom-anhood suddenly brought to their notice in such a wild as this, how could you in such a wild as this, now could you expect them, sane or insane, to do otherwise than they did? I know many a worthy man who would like to follow their example." And with a bow that left me speechless Mr. Gryce laid his hand on his heart and softly withdrew.

THE END. Malleable Glass. Neri, whose book on glass was published at Florence in 1612, says, 'In the time of Tiberius was invented a way of making glass malleable, a thing afterward lost and to this day wholly unknown, for if such a thing were now known without a doubt it would be more esteemed for its beauty and incorruptibility than silver or gold, since
from glass there ariseth neither smell
nor taste nor any other quality." But
though unknown to the old Italian, the
art was practiced in Persia, if we may
believe Bailey, who says that in 1610
Sophi, emperor of Persia, sent to King
Philip III of Spain six glasses that were
malleable and would not break by being hammered, and Blacout tells that
an inventor, having presented a bust of
malleable glass to Richelieu, 1620, was
rewarded for his insenuity by perpetual more esteemed for its beauty and incorrewarded for his ingenuity by perpetual imprisonment lest the vested interests of French glass workers should be in-

A Perspective In V.

The class in optics was doing duty before the professor, and that worthy man was looking over his contingent of rising physicists for some one to put through a course of sprouts, as professors have a way of doing when they suspect that every felow isn't quite keeping up with the procession. There was one chap he knew of who spent more money than he spent time on his books, and him the professor tackled.

"Um, Mr. Jones," he said, "what is perspective?"

Mr. Jones hesitated for a moment.
"Well, I should say," he responded, "that it is kind of looking through the other end of a spyglass."

The professor recognized that the answer showed some signs of intelligence and accepted it.

Pierced by a Swordsh.

When the barkentine City of Paucete was within a few bundred miles of Tahiti, she fell into a dead calm. The men were dreaming on the deck and the captain was sleeping in his bunk when there came a severe shock under the starboard bow. The captain scrambled out of his bunk and on deck as fast as he could, supposing that the vessel had struck on a reef, although he knew of none on the chart within 100 miles. The lead was thrown over the side and the line run out to its full length without touching bottom, and for the rest of the watch the soundings were continued with the same result. So the shock was a mystery, and the sailors were inclined to get superstitions about it until the vessel got into port, and then six inches of the sword of a swordfish was found sticking in the planking. The force of the blow must have been tremendous and probably killed the assallant as well as broke his nose.

The Japanese Hot Bath.

Here is a point that English folks might learn from the Japanese. The reason we are inclined in this country to catch cold after taking a hot bath in the daytime is that we do not take it hot enough. If only you have the water as near boiling point as possible, there is no fear of your getting cold afterward. The Japanese revel in these hot tubs. They take them three or four times a day. In some districts of Japan, I believe, the people are amphiblous. For months at a time they live practically in the water. A Japanese once called upon me, and be apologized at the outset of our conversation for being so unmannerly and dirty, for he had only had time to take two hot baths that day.—Chambers' Journal.

rossibly few of the many odd ways of making money utilized in a large city offer such possibilities to the crafty as that of hunting up old, forgotten titles and trying to bring about a sale of interest from persons who are ignorant or careless as to what the property in question may be worth. "I have been engaged in this business," said one operator the other day, "for some time, and you cannot imagine what an endless amount of work is connected with it. I have to look over aged and musty files in the records of deeds and mortgages and hunt and trace out sales for weeks at a time, and then, just as likely as not, I find that all my trouble goes for nothing. It is the expectation of finding something rich at last that makes me persevere. It's like a man digging for gold, and I have been rewarded, too, I must confess.

"A little time ago my partner and I ran across an old deed which lacked two signatures really required to make it valid. After spending a long time in trying to find whether the persons mentioned were alive, we located one, an old woman, in California. There was nothing to be done but to go there, and I started off at once. When I arrived I found that the woman had moved into another part of the state, and I had to follow her. At last I found her. She was very old, had never heard of the deed in question, and was glad to sell out for \$100, probably more than she had seen at one time before in her life. The other person had lived in the state also, but he was dead, so I had to content myself with the one signature. When I got eas: I sold that share which I became entitled to for something over \$18,000.

"It is a curlous thing," remarked another expert "how careless men and women are in such matters as those connected with the sale and transfer of real extate. Some of them buy parcels of land when they have to pay comparatively nothing for them, and then they go away and leave them and forget about them till in time they are either eaten up in taxes or the value has increased in a rapid proportion. In either case they are forgotten, and time after time I have known men to die poor when they had fortunes in real estate which somebody had persuaded them to give away

After my first experience with them I took the precaution, when I paid him a visit, of carrying a few choice Havanas for my private consumption and a few of an entirely different brand to present to my host. I selected as nearly as possible the kind he had given me, and don't think I missed it very far, although I must confees I never saw him smoke them. "Why, professor, have you forgotten that you have just been married? This lady is Mrs. Hopkins now, you know."

"Oh, is she?" exclaimed the professor, with his mental machinery still pegging away at the same old problem. "Happy to make your acquaintance, Mrs. Hopkins: very happy indeed! I shall have the pleasure of meeting you again."

"Dropping her hand, the absentminded professor was turning away when the quick witted bride caught him by the coat sleeve and blushingly whispered:

"Why, Henry, aren't you going to take me with you?"

The Hernet's Charge.

Mr. Hervy Laney, in The Scietific American, describes the way hornets defend their homes. There is always a sentinel on watch at the entrance, and when a stone is thrown at the nest "the hand that threw it has been marked as sure as the sun shines, and before the atcking party can possibly turn the head he will feel a stunning blow in the forehead and possibly drop to the earth with pain, for the hornet files with such velocity that the human body is not swift enough in movement to get out of the way."

In making such a charge, Mr. Laney says, the hornet files "with head and tail together," and the sting is driven deep. But if the boy gets behind a tree or bush and throws from shelter he is likely to escape, because the hornet seems to possess little power of locating the enemy by sight. When the delivery of a stone is followed by a successful charge, Mr. Laney thinks, it is because the hornet possesses "the faculty of marking the direction of a missile thrown at the nest."

In the city offices of a big brick manufacturing concern there are a number of small sections of brick walls. In old days bricks were substantially all of one color, but now they are made in many colors, in various shades of each of these colors. They also come in various shapes and sizes.

HORSES THAT DRINK GRASS.

Substitute For Water Found In the Hawatian Islands.

It is a surprising statement to make and yet one that is literally true and so commonplace that no one there thinks anything about it—that there are hundreds of horses and thousands of cattle in the Hawatian Islands which never take a drink of water throughout the whole course of their lives.

On all the islands the upper altitudes of the mountains are given up to cattle ranges. The cattle run wild from the time they are born until they are rounded up to be sent to the slaughter house. Except during possibly two or three months of the ralny season, there are no streams or pools of water in any part where the cattle range.

But everywhere there grows a recumbent, jointed grass known by the native name of maninia. This is both food and drink. Horses end cattle grazing on it neither require water nor drink it when

neither require water nor drink it when offered.

Our first experience with this fact was on a trip to Haleakala. A party were mounted on horses which had just been brought in from the range. The journey they made was 14 miles, in which distance they ascend about 9,000 feet.

The party started in the afternoon and about sunset halted for supper. They thought it strange that the horses should leave a feed of grain to nibble the scanty grass which grew near by, but were willing to trust their instinct in the matter. However, before starting they insisted that they be given water. The native guide demurred to this, saying they didn't need it, but with the good natured complaisance of his race yielded to requests and led a detour of about a mile, which brought the party to a ranch house, where there was a well; but, to the utter amazement and stupefication of the travelers, the horses would not drink. They took it as another case of instinct and assumed, that the water for some reason was not good and so refrained from drinking it themselves. It was not until the return, the second day, to Kawanapae that the travelers learned the secret of the wonderful manning grass.

How Clever Specialists Make a Living Securing Them.

Possibly few of the many odd ways of making money utilized in a large city offer such possibilities to the crafty as that of hunting up old, forgotten titles and trying to bring about a sale of interest from persons who are ignorant or careless as to what the property in question may be worth. This kind of thing is more apt to be profitable in New York than in many other places on account of the rapid rise in the values of real estate.

"I have been engaged in this business," said one operator the other day, "for some time, and you cannot imagine what an endless amount of work is connected with it. I have to look over aged and musty files in the records of deeds and mortgages and hunt and trace out sales for weeks at a time, and then, just as likely as not, I find that all my trouble goes for nothing. It is the expectation of finding something rich at last that makes me persevere. It's like a man digging for gold, and I have been rewarded, too, I must confess.

"A little time ago my partner and I ran across an old deed which lacked two signatures really required to make it valid. After spending a long time in trying to find whether the persons mentioned were alive, we located one, an old woman, in California. There was nothing to be done but to go there, and I started off at once. When I arrived I found that the woman had moved into another part of the state, and I had to follow her. At

done but to go there, and I started off at once. When I arrived I found that the woman had moved into another part of the state, and I had to follow her. At last I found her. She was very old, had never heard of the deed in question, and was glad to sell out for \$100, probably more than she had seen at one time before in her life. The other person had lived in the state also, but he was dead, so I had to content myself with the one signature. When I got east I sold that share which I became entitled to for something over \$18,000.

"It is a curious thing," remarked another expert "how careless men and women are in such matters as those connected with the sale and transfer of real estate. Some of them buy parcels of land when they have to pay comparatively nothing for them, and then they go away and leave them and forget about them till in time they are either eaten up in taxes or the value has increased in a rapid proportion. In either case they are forgotten, and time after time I have known men to die poor when they had fortunes in real estate which somebody had persuaded them to give away for a song simply because they were too laxy to go and investigate for themselves."

But They Were Not the Kind He

"Speaking of cigars," said a New Orleans lawyer to some friends at the tobacconist's on the corner, "I'll tell you
a little story which is not without a

moral.

"One of my clents is an old planter up the river, and on several different occasions I have found it necessary to visit him at his home. The old man is a great smoker, and has always insisted on my accepting some of his cigars, which were peculiarly villainous. After my first experience with them I took the precaution, when I paid him a visit, of carrying a few choice Havanas for my private consumption and a few of an entirely different brand to present to my host. I selected as nearly as possible the kind he had given me, and don't think I missed it very far, although I must confess I never saw him smoke them. 'I believe I would prefer my own,' he would say, and put them in his pocket.

'I'll strike his taste this time,' I said to T'll strike his taste this time,' I said to myself, and stepping into a store near my office I told the proprietor to give me a box of the strongest and rankest 5 centers he had in stock. 'I want them for old Major So-and-so,' I said, 'to send as a little birthday present.' Then you'd better change your order,' replied the tobacconist. 'The major has bought his cigars here for years and I'm thoroughly familiar with his favorites.' But

You may know what he gives away," said the dealer, miling, 'but I can assure you he amokes none but the best himself.' I bought a bor of besuitful Cuban weeds and wrote the major a note, suggesting that we stop fooling each other. THE VERDICT.

The Hernet's Charge.

Mr. Hervy Laney, in The Scletific American, describes the way hornets defend their homes. There is always a sentinel on watch at the entrance, and when a stone is thrown at the nest "the hand that threw it has been marked as sure as the sun shines, and before the attacking party can possibly turn the head he will feel a stunning blow in the forehead and possibly drop to the earth with pain, for the hornet files with such velocity that the human body is not swift enough in movement to get out of the way."

In making such a charge, Mr. Laney says, the hornet files "with head and tail together," and the sting is driven deep. But if the boy gets behind a tree or bush and throws from shelter he is likely to escape, because the hornet seems to possess little power of locating the enemy by sight. When the delivery of a stone is followed by a successful charge, Mr. Laney thinks, it is because the hornet possesses "the faculty of marking the direction of a missile thrown at the nest."

s plan that would either make or break business.
"There were some old rubber mats in the storeroom, and I had the boys wash them thoroughly and then cut them up in pleces about the size of a domino. Taking about 200 of these pieces, I went to De Mar, the chef of the hotel and famed for his fried oysters, and asked him if he could cover the chunks of rubber with butter and brown them without getting the rubber so hot it would smell. He tried it and succeeded beautifully, and when I had placed the patent oys-
