Municipal Government. Next to the administration of the Ministry districts of the control of affairs of the Colony s and that of the Municipality in print of importance. commonwealth to exercise their franchise. A toot all his there is a blindness and a folly that are truly deplorapley The wonder is that, under this condition, the city has had such good governments was it has a lingood men get sinto these positions it is by the meres, accident; and even good, wellmeaning men will become less good under this most fatal and enervating influence of complete indifference. It is only fair to say that want of interest in these matters may to some extent have had its origin in that absence of proper Municipal organization which marked a considerable period in the history of the city. But surely it is wrong to allow that indifference to outlive the condition which gave it birth. It must be remembered that the city now possesses a Municipat Charter which makes the civic government a real power for good or for evil; and it should also be borne in mind that the functions of that government are becoming more important year by year. The Mayor is presumably entitled to a seat in the Legi-latife Council of To the City Coonerhis now entrusted the control of all the public schools, and the oversight of edadation within the limits of the Miniscipality. The important question of a proper supply of water will necessarily but nathe same hands, and must involve a legrand many other special considerations, which might be mentioned, added to the more crainary and general functions of a civic government, report it of the greatest moment that

the people of Victoria should arise to the importance of the subject, and manifest the greatest interest in the annual se-

attract to the front; or they may be the worst. It may be open to question whether they are either; but that is, as we have said, a matter altogether beside our present subject. We are pervade this community, in respect to its local affairs, dispelled—to see every man who pays municipal taxes take an active and lively interest in municipal affairs. Saturday, October 30 1869 The Canadian Tariff. As the conviction that Confederation is the immediate destiny of this Colony gains ground, interest in the Canadian Tariff of Customs, is relatively increased. And it is well that it should be so. There are, we have been given to minion; but we are disposed to think under-tand, a few persons laboring un der the delusion that the Canadian take the earliest opportunity of bringtariff will not recessirily be ours under Confederation - that we shall have power to frame a tariff suited to our local wants, or to modify the general it would indirectly benefit the entire one somewhat, in so far as its applica - Domi ion, by at once giving it a comtion to this section is concerned This is altogether a mistake, one which no person at all familiar with the -utject, pro racted and doubtful race for emis in danger f making. The Tauff of Customs, above all other matters, is a Federal measure and must of necessity, these columns on Tuesday, there may and will be uniform the Dominion over. be some doubt as to the advisability There is nothing in the constitution or of those now in the clany committing gentus of the Dominion repugnant to tu ure and larger populations, by an the establishment of a free port, wherever act of this kind, to a principle regardsuch a thing may be considered dei-rab e; but the theory of a varying Customs tariff or deferential duties is one which is not, cannot, will not be entertained. We wish it could be otherwire : but we must deal with facts as we find them. Allusion was made in a previous article to the fact that, under the Canadian taviff, that class of axacion paid in the form of import duties would be very material y ligh ened. A more careful examination of that tariff leads us to the belief that it would be reduced fuly one third. In o her words, instead of being called upon to hand over to the Doninion Government \$350,000 of revenue, we would not in reality give away more than \$243,000. Will a treaty of reciprocity between the Dominion and the United States the reva enue derived from this source would be still further diminished. In this was we at ould probably be relieved of about \$150,000 maxation, a reflection which is pecul arly gratilying in view of the fact that this relief is from a class of tax tion which produces Federal revenue. Nothwithstanding this sola ing consideration, We counct, however, close for eyes to the fact that the tainff contains several items calculated to bear is juriously upon the commercial interests of Victoria. Dry goods, clocking, boots and choes, &c., all tall under the head of unenu no rate articles, and are subject to an advelorem duty of 15 per cent. On the other hand, we find little or no duty imposed up n the natural productions of the country. Tuis is, we confess the most serious feature of the whole matter. The very articles, which, of all others, we desire pec's of \$1 to the pan havi g been found in Francisco paper announcing that she has to have admitted at a mere y nominal a defined charnel, in the old Arkinson renounced the Jewish and esponsed the which, of all others, we derire pec sut \$1 to the pan havi g been found in rate of duty, in order to extend claim, foreign trade and build up a been obtained by the Neill co on a bench on of entering a convent; but the place of her large commercial city, would be subject the right bank of the canyon. The latter, it hiding has not as yet been discovered. to an increased rate, while the cuty is thought, will enable the rich lead which to an increased rate, while the enty articles standing in need of protection was lost in the flat below the town of Antarticles standing in need of protection ler to be traced. There is the utmost achave it not. This point is not raised as an argument against Confederation; for we think it would be uscless to argue that the ji lds being just about the average. against it; nor do we believe there are sufficient arguments against it to j stify opposition. But this is one of the reasons in favor of Victoria being created a free port. Under such a tariff there is little hope of our be ng able to attain commercial power in time to cope with our neighbors. With a free port we would be cortain to do so. Tarning to other items of importance in the rariff. it is satisfactory to find live stock well protected. Horses, \$15; horned cattle, \$10; swine, \$2; sheep, \$1. The duty on tobacco is considerably less than under our present tariff, being five per cent ad valorem and 15 cents a pound specific on manufactured tobacco, and on cigars ranging from \$3 to \$6 per thousand, according to value. Perhapthe most marked reduction will be found in the article of spirite, which, under our tariff, pay \$2 a gallon, au'i under the Canadian tariff only 80 cents. We conless that we cannot felicitate our selv s over this particular item. Without p etending to understand the policy which framed the Canadian tar ff, we cannot but hink that it would be in the ther Pass It is a noteworthy circumstance true interest of the country to take, that no snow lell on any part of the route say, ten per cent from such classes of dry goods as must continue to be imported and place an equivalent increase upon spirits. Tuese, taken with the free admission of grain, flour and a long free list of apwards of three hundred articles, constitute the most important features of a customs tariff, without doubt destined at no distant date to take the place of our own. There is just one other item in the Canadian tariff to which we will extend our present remarks. It is provided that "The Governor in Council may, under regulations to be made for that purpose, allow, on the exportation of goods which have been imported into Canada, and on which the du y of customs has been paid, a drawback equal to the duty so Under this provision it is pre-

Canadian tariff and the more we reflect upon the whole question, both in the light of its local and national bearings, the more thoroughly are we convinced hat it would be the true policy of British Columbia and of the Dominion o establish a free port on the Pacific reah ald. Of course it would be folly to suppo e that we can make this a stipula ed condition of entering the Do. it would be true wisdom on our part to ing this subject before the authorities at Ottawa, with a view to showing them not only that such a measure appears indispensable to local prosperity, but that mer ial status and poser on this eide ot. the con inent which it could only hope otherwise to attain after a ing which there may be much difference of opinion. In raply to this objection we would say, let the people now in the colony seek, in negotiating terms of Confederation, to have the power conced d to the Provincial Legislature to create a free port here, should the rea presentatives of the people consider such a thing desirable. It would of course be competent for the Provincial Legislature to abolish the free port at any time; and thus would the objecon to which we have alluded fall to the ground. Now is the time to have all such matters thoroughly ventilated; and, whatever diversity of opinion may exist, it will be well that all parties should approach these subjects in a snirit of moderation, and wi h an honest desire to secure for this our adopted country those terms of union which will have the greatest influence for good.

Thursday Oct 29.

Caribeo.

From files of the Sentine! of the 13th and 16 h i at. we compile the following condensed summary :- On Sunday the 10th a second treshet occurred, agein filling the claims on the lower part of Williams Creek with water. All the companies in the upper part of the creek were busy, and things looked lively in that directio . The Felix co (Conkin Gulch) washed up 2061, oze the result of four days' work. Several other compar ise had good yields on the guich. On stout guich the Taffvale washed up 101 oze and the U ombs 32 oz for the week. For two following days the latter co washed 41

On Antier Creek new diggings of a very promiting character have been struck, prosand exceedingly good prospects bave From the other creeks the news is unimpor-PRTHEN OF LYPLORING PARTY

Mr Fred Black and party returned to Barkerville on the 15th. It will be recollected that this party started out about the middle of September to make explorations with a view to ascertaining the practicability of constructing a road to Fraser river in the vicinity of Tere Jaune Cache, This party report the discovery of a pass about 83 miles east of Barkerville, upon which they conferred the name Dominion Pass,' From this pass to the Fraser the country is repor ed highly favorable for the construction of a road, with an abundant supply of grass along the entire route. The distance from Barkerville to the Fraser, via Autlet pass they estimate at one hundred thirty-seven mile-General appearances indicate a gold-bearing country on the east side of the divide, good looking slate and quartz rick commencing 15 miles from the pass. Fine gold was obtained wherever tried, by means of a tor cup. The supply of provi i as falling short, the party turned back at a point which they considered within fitteen or twenty miles of fete J. one Cache. They consider however, that they fully succeeded in the object of the ex, edition in ascertaining that a good praclicable route for a waggon road exists between Barkersile and the Fraser river, in the vicio ty of the termination of the Leawhile they were out, nor was there any snow n the Pass.

WANTED .- "A childes, relationless, carpetbagless" person to be President of the United States of America. Such are the qualification, now demanded by an influemial section of the American press for fature Presidents. A San Francisco con-temporary eass: "President Lincoln's relatives gave him more trouble than did the rebel'in, in divers ways; and, rightfully or not. Gen. Grant, as President, has had to stand more charges on account of his relatives than he did from the Confederates during his whole military services against them. Nepotiem and carpetbagism have gone far towards disatistving the people with the form of Government we live under."

Ma. Russell, who was formerly an Episcopalian clergyman, is giving some capital readings of "Evenings with Dickens" sought by our own Drawbacks Bill of we can corduly recommend Mr. Geoffrey Norreys as in every way competent.

The steamer Enterprise arrived at 6 o'clock last evening from New Westminster, bringing Capt Parsons, C Wright, C Moss, Geo. Bent, Mr Newton and 25 other passengers. and 23 head of beef-cattle from Fort Lang-ley. The gulf was full of whales, spouting and sporting as the Euterprise crossed.

IMPORTANT FROM PEACE BIVER—B G DIGGINGS. Some months ago a party of miners were cuifilled for Peace river by residents of Quesnelmouth and the Government; two other parties also proceeded to the same locality and one of the latter, known as the Burns party, discovered ich deposits of gold in the bank of the Findlay Branch of Peace River. The party numbered six men. they worked a short time, took out from \$5000 to \$6000 in gold dust, and returned to Quesnelmouth eight days ago, where they purchased supplies of clothing and 'grub' to ast the winter and have started back for the digginge. Their appearance and report have created much excitement in the apper country, as it is said the diggings have been traced many miles and that the pay dirt is six and eight feet thick. Some think greater diggiogs than those of William Oreck have been discovered. Be this as it may, Findiay Branch may be reached from the coast by way of Skeena River in a very few days.

THE WIRING AND SEALING of packages of goods bound for 'American ports via Victoria has we learn been abandoned at San Francisco. It is only at Portland and Astoria, where stupid prejudice appears to govern the action of the customs' officers, that the ridiculous system is convinued. The system was intended to apply to Panama; but certain narrowminded American officials thought there was a good opportunity presented to annoy British Columbia and so they introduced it upon this coast.

LARGE OFERATIONS .- A contemporary is esponsible for the following calculations :-"Five hundred millions in gold was the sum of the Wall street sales no that terrible Friday. This amount of gold, upon a rough estimate, allowing sixteen dollars to an ounce, and sixteen ounces to the pound, and wo thousand pounds to the ton, and one ton o each cart, would require a thousand carts to move it; and allowing twenty feet to each borse and car, the string of carts would be eight miles long. No wonder Wall street collapsed."

FRESH WATER .- Mr. Wm. Fawcette has inserted an advertisement in this issue in which he offers to convey a supply of fresh water to the city from a spring which be has discovered not far from town. In a letter addressed to the Secretary of the Spring Ridge Water Company, Mr. Fawcette says the water can be led into town by means of wooden pipes for \$15,000. The present yield of the spring is 20 000 gallons, which is, we believe, about 40,000 gallons less than the consumption. However this may be, the suggestion of Mr Fawcette should not be ost upon the Company, or, at any rate, upon the Corporation.

TURNED CHRISTIAN. - Frances Mayer, the Nan-imo girl, who lately disappeared from her bome io S n Francisco in a mysterious manner, has published a letter in a San Christian faith She declares her intention

THE ALABAMA CLAIMS .- The latest intelligence, through American sources, is to the livity and great expectations on this creek. effect that Minister Motley wants fresh instructions. He thinks the present temper of John Bull is such as to encourage the hope of a mutually satisfactory treaty being negotiated just now, and he is desirous of trying his hand at it.

> PARALYZED .- Policeman Armstrong, who lately entered the force, was struck with paralysis, a few nights ago, while standing guard. He lost the power of his limbs and ell to the ground, but was enabled to call for assistance. Yesterday he was sent to the Hospital for treatment.

> Dogs IMPOUNDED .- The poundkeeper pounced down upon a number of dogs-good, bad and indifferent-yesterday and impounded them One little fellow was seduced into the poundkeeper's arms on promise of a piece of meat; and it co t the owner \$2 to release his pet. The plan is to seize all dogs not wearing tage to indicate that the owners have paid the municipal tax.

> THE ST. ANN's ORPHANS' BENEFIT SOIREE ast evening proved very successful, the ttendance being l. rge and enjoyment great, Governor Musgrave was not present; but ent, we believe, a handsome donation. The proceeds of the sale of tickets will be handed over in full to the Sisters—the Committee defrayes all expenses from their private

Is IT So ?- We are informed that while i lady residing on Cook street was engaged in milking a cow in front of her own gate, the calf was burried off to the pound, and that during the lifetime of the Premier. The great difficulty was experienced in saving the cow from seizure. This is rather stretching the law, is it not?

MARRIAGE - St. Paul's Church; Esquimalt, was througed yesterday with ladies and gentlemen, gathered to witness the nuptials of Staff Commander Pender, R. N., and Miss Amy Maria Gribbell. The ceremony was performed by Ven. Archdescon Reece, assisted by Rev. Frank B. Gribbell, brother of the bride.

files of the Oregonian that Gen. Tom Thumb and party sailed from Portland for San Francisco n the Oriflamme, on the 19 h inst. It would thus appear that our people are not to be bonored by a visit from tha distinguished individual.

ERRATUM,-In the leading article yesierday, in the ninth line, we were made to say that the Colonists expect "partial results," whereas we intended to say practical results -rather an important difference.

Sooks .- The ship Old Dominion, lumber laden for Sydney, Australia, is ready for sea, and the bark Medora is loading for Valparaiso.

RETURN MATCH .- The return match beween the Charybdie and Victoria Tens will be shot on Thursday next at the range at

THE S. F Bulletin says the "shrinkage" in the value of mining stocks in ninety days was \$12,000,000.

THE ACTIVE will sail from San Francisco for Victoria on Saturday. This may be re-

It is reported the Pol ce force will shortly be placed under the Mayor and Council. another reason why tax-payers should arouse.

THE steamer Gussie Telfair will be due at the mouth of the harbor to-day.

The Pascal Forgeries.

From the New York Evening Post.

It will be recollected that two years ago a good deal of discussion was excited in France and England concerning the alleged discovery of authentic letters of Pascal, which clearly gave to the great Frenchman the glory of having been the first to unfold the law of gravitation. M. Philarete Chasles brought these letters to the notice of the Academy, and when confronted by Leverrier, who came forward promptly to the defence of Newton's fame with a demand for the name of the owner of the letters, declined to give it, but offered the manuscirnts either in the originals or in photographic facsimiles, for scientific examination. Subsequently a report from a commission of the Florentine Academy, declaring that a letter put forth upon the same authority as Galileo's was spurious, excited the suspicions of M. Chasles as to the character of his discoveries in general and he caused the house of the owner of these remarkable autographs [which and swelled to the number of twenty thousand] to be rigidly searched, in the hopes of obtain-ing proofs of his rescality, but without important results.

M. Chasles has now come forward with full and most extraordinary revelations in relation to the fraud, which would appear quite unprecedented in literary history. The Rowley manuscripts, the Ireland forgeries, the numberless rascalities of George Psalmanazar, all dwindle into insignificance by the side of this new production of ancient documents. most singular part of the whole matter is that M. Chasles refused to be convinced of the fal-sity of all the letters. The allusion has been so delightful to him that he is reluctant that it shall be all at once and entirely dispelled; and when we read over the lists of illustrious men to whose inner lives he was introduced in this most interesting and voluminous correspondence, we cannot wonder that he clings tondly to the sweet deception. More than this, he had paid thirty thousand dollars for portions of the correspondence, and he could not bear to believe that he had spent his money for waste paper. Think of the delight an ennal letters, documents or poems in the hand writing of Copernicus, Christopher Columbus Calvin, Luther, Raphael, Michael Angelo Motaigne, Shakespeare, Scaligeo, Rabelais, Francis I. Cervantes, Ponsard, Tasso, Dante, the forgeries did not stop here. There were documents purporting to come from St. Augustine, St. Jerome, Julius Cæsar and other Roman emperors, and some of the Apostles ! It is inconceivable that a French academic

cian could have been imposed upon by such a preposterous fraud as this, no matter with what amazing cleverness it may have been carried on. The author of it, whom M, Chasles calls a 'palæontologic archivist,' whatever that may mean, certainly seems the more learned and able men of the two, and it is fortunate that his exposure has been made public before he produced the logbook of Noah giving new views of the deluge, or a letter of Cain, exculpating himself in the matter of the murder of Abel.

THE New York Sun says: "Lord Hubert Ainsley is now attracting so much attention in the fashionable circles of this country by his magnificent and costly entertainments, that we are desirous to give a short sketch of his tamily and title But we regret to say that we have been unable to procure the requisite materia's, though we have sought for them in the records of the British aristocracy. His came cannot be found in Dud's Bittsh Peerage, a work which purports to contain the family names and titles of all the Peers of Great Britain, and of every one who is entitled to the profix of Lord, Lady or Honorable. In the 1 test edition of this book, which is the highest arthority on such matters, we cannot find the name of Lord Hunert Ainsley. How it came to be ouit. ted is unaccountable to us; perhaps it was by a mistake of the printer. It is not to be doubted that he is really a Lord, because he is always spoken of as such by those who ought to know."

THE death of Lady Palmerston has called out expressions of genuine sorrow in Eugland, and many reminiscences in the pleas ant Saturday receptions at Cambridge House most insignificent guest was sure to be welcomed by pleasant smiles from Lady Palmeision and by a warm greeting from her husband, who, slihough he was often ignorant of the rame of the person whose hand he so cordialy shook, always managed to convey the impression that he had been most anxiously expecting and was qui e delighted at his arrival. Lady Palmerston's good manners were the n ere reflection of her true kindliness of beart, and it is this which made them so fascinating to all around her. She offered a rare example to all 'great fadies' by showing that it was possible to occupy a Nor Course Hars.—We observe by late high position in the most genial manner, yet les of the Oregonian that Gen. Tom Thumb without vulgarity or affectation.

> A French writer thinks that ' Two women are necessary to make the life of man complete-the women be loves and the woman who loves him.'

Ayer's Cherry Pectoral. For Diseases of the Throat and Lungs, such as Coughs, Colds, Whooping Cough, Bronchitis, Asthma, and Consumption.

Probably never before in the whole history of medicine, has anything won so widely and so deeply upon the confidence of mankind, as this excellent remedy for pulmonary complaints. Through a lorg series of years, and among most of the races of men it has risen higher and higher in their estimation, as it has become better known. Its uniform character and power to cure the various affections of the lungs and throat, have made it known as a reliable protector against them. While adapted to milder forms of disease and to young children, it is at the same time the most effectual remedy that can be given for incipient consumption, and the dangerous affections of the throat and lungs. As a provision against sudden attacks of Croup, it should be kept on hand in every family, and indeed as all are sometimes subject to colds and coughs, all should be provided with his antidote for them.

Although settled Consumption is thought incurable, still great numbers of cases where the disease seemed settled, have been completely cured, and the patient restored to sound health by the Cherry Pectoral: So complete is its mastery over the disorders of the Lungs and Throat, that the most obstinate of them yield to it. When nothing else could reach them, under the Cherry Pectoral they subside and disappear.

Singers and Public Speakers find great protection from it.

Asthma is always relieved and often wholly cured by it.

Bronchitis is generally cured by taking the Cherry Pectoral in small and frequent doses.

So generally are its virtues known that we need not publish the certificates of them here, or do more than assure the public that its qualities are fully maintained. Probably never before in the whole history of

Ayer's Ague Cure,

For Fever and Ague, Intermittent Fever, Chill Fever, Remittent Fever, Dumb Ague, Periodical or Bulious Fever, &c., and indeed all the affections which arise from malarious, marsh, or miasmatic noisons.

As its name implies, it does Cure, and does not fail. Containing neither Arsenic, Quinine, Bismuth, fail. Containing neither Arsenic, Quinine, Bismuth, Zinc, nor any other mineral or poisonous substance whatever, it in nowise injures any patient. The number and importance of its cures in the ague districts, are literally beyond account, and we believe without a parallel in the history of Ague medicine. Our pride is gratified by the acknowledgments we receive of the radical cures effected in obstinate cases, and where other remedies had wholly failed. Unacclimated persons, either resident in, or travelling through miasmatic localities, will be protected by taking the AGUE CURE daily.

For Liver Complaints, arising from torpidity of the Liver, it is an excellent remedy, stimulating the Liver into healthy activity.

For Bilious Disorders and Liver Complaints, it is an excellent remedy, producing many truly remarkable cures, where other medicines had failed.

Prepared by Dr. J. C. Ayer & Co., Practical and Analytical Chemists, Lowell, Mass., and sold all round the world.

PRICE, \$1.00 PER BOTTLE.

Ayer's Sarsaparilla, FOR PURIFYING THE BLOOD.

The reputation this excellent medicine enjoys, is derived from its cures, many of which are truly marvellous. Inveterate cases of Scrofulous disease, where the system seemed saturated with corruntian have been

ease, where the system seemed saturated with corruption, have been purified and cured by it. Scrofulous affections and disorders, which were aggravated by the scrofulous contamination until they were painfully afflicting, have been radically cured in such great numbers in almost every section of the country, that the public scarcely need to be informed of its virtues or uses.

Scrofulous poison is one of the most destructive enemies of our race. Often, this unseen and unfelt tenant of the organism undermines the constitution, and invites the attack of enfeebling or fatal diseases, without exciting a suspicion of its presence. Again, it seems to breed infection throughout the body, and then, on some favorable occasion, rapidly develop into one or other of its hideous forms, either on the surface or among the vitals. In the latter, tuberdies may be suddenly deposited in the lungs or heart, or tumors formed in the liver, or it shows its presence by eruptions on the skin, or foul ulcerations on some part of the body. Hence the occasional use of a bottle of this Sarsaparilla is advisable, even when no active symptoms of disease appear. Persons afflicted with the following comvisable, even when no active symptoms of dis appear. Persons afflicted with the following length, cure, by the use of this SARSAPARIL-LA: St. Anthony's Fire, Rose or Erysipelas.

plaints generally find immediate relief, and, at length, cure, by the use of this SARSAPARILLA: St. Anthony's Fire, Rose or Erysipelas, Tetter, Salt Rheum, Scald Head, Ringworm, Sore Eyes, Sore Ears, and other eruptions or visible forms of Scrofulous disease. Also in the more concealed forms, as Dyspensia, Dropsy, Heart Disease, Fits, Epilepsy, Neuralgia, and the various Ulcerous affections of the muscular and nervous systems.

Syphitis or Venereal and Mercurial Diseases are cured by it, though a long time is required for subduing these obstinate maladies by any medicine. But long continued use of this medicine will cure the complaint. Leucorrhaa or Whites, Uterine Ulcerations, and Female Diseases, are commonly soon relieved and ultimately cured by its purifying and invigorating effect. Minute Directions for each case are found in our Almanac, supplied gratis. Rheumatism and Gout, when caused by accumulations of extraneous matters in the blood, yield quickly to it, as also Liver Complaints, Torpidity, Congestion or Inflammation of the Liver, and Jaundice, when arising, as they often do, from the rankling voisons in the blood. This SARSAPARILLA is a great restorer for the strength and vigor of the system. Those who are Languid and Listless, Despondent, Sleepless, and troubled with Nervous Apprehensions or Fears, or any of the affections symptomatic of Weakness, will find immediate relief and convincing evidence of its restorative power upon trial

JAMES L CHAD-EY.
Sumas, July 16th. 1869.

Many years ago, the writer of these lines and an invalid physician, while visiting the island of St. Croix for their health, experienced and witnessed many surprising and beneficial effects of the Rum there produced upon many of the invalids who were (like ourselves) seeking health; and, upon inquiry and investigation, obtained a full history of its medicinal virtues. He was delighted and surprised, and after his own recovery, which soon occurred, determined, if possible, to procure the sole right to manufacture and sell it in the United States. (1 138 h and 1 199 man manne

The result of his labors was a glorious success for himself and suffering humanity, for the celebrated PLANTATION BITTERS was thus made known to the world. PLAN-TATION BITTERS being an article of real merit, founded upon new principles, and relying wholly upon the vegetable world for its medicinal effects, worked a rapid revolution in the history of medicine, and became as a household word all over the civilized world. The cabalistic S. T.-1860-X. was a talisman of health, and the demand for the PLANTATION BITTERS soon far exceeded the abilities of the proprietors to supply.

Notwithstanding the large importation of St. Croix Bum, made expressly for the compounding of these Bitters, the quantity was madequate. It therefore became necessary that arrangements upon an extensive scale abroad should at once be made, and an acent was dispatched to St. Thomas for that purpose. He was fortunate in securing and leasing several plantations on some of the largest and most productive estates on the island. Houses, stills and presses were erected as if by magic, which utterly "astonished the natives." The services of experienced men and natives of the island were procured, and very soon the proprietors of the PLANTATION BITTERS were in a position to supply their laboratory with all the perfectly pure St. Croix Rum needed in manufacturing the GREAT DYSPEPTIC TONIC AND INVIGORATOR. The above out represents the natives crushing the sugar-cane and otherwise preparing it for the stills and presses. As an antidote to Fever and Ague, Intermittent and Malarious Fevers, Dyspepsia, and other kindred diseases, the use of the PLANTATION BITTERS is unsurpassed in the history of the world. Over five million bottles are disposed of annually. They are adapted to old and young, male and female. They are agreeable in taste, and always produce an immediate beneficial result.

MADRID, Oct 18—The capture of Valencia has had a tranquilising effect all over the country. Official reports state that only remnants of dispersed bands are now roaming the provinces.

ing the provinces.

LONDON, Out 18.-The Times has an article on God, Prim. The writer-admits that Prim has depth and cocloses and boundless ambition; he has the army in his hand and intends to keep it. As long as Spain is without a King none can wrest it from his sword, which is the real sceptre of Spain. Prim sees this and resolves that no King shall precide but one of his own making or under his influence; but above all, not Montpenhis influence; but above all, not montpell ed in Paris that a plot conscious sier, whom be always opposed. It is not the Liberals for rising on Thursday easy or hardly desirable to break through next has been discovered. The Emperical statement of the city is disposed to make good uses of his vic-tory let him introduce, not improvident cle-mency or inordinate liberalism, but true or-

der based on legality.

Paris, Oct 18—The council of Ministers met this morning at Compaigne, the Emper-or presiding, and held two sessions to day. Dronya de l'Huye has gone to Compaigne to supply the place of Prince Latour de-Auvergne, Minister of Foreign Affairs, whose continued illness prevents his attendance

PARTE, Oct. 19 .- It is officially denied that there is any foundation for rumors of a change in the ministry. Basel and Ferry attended a meeting of opposition members of the Corps Legislatif yesterday in order to

explain their recent conduct.

The Emperor has written a very flattering letter to Prince Charles of Boumana on the occasion of his marriage.

TRIESTS, Oct. 19.—An insurrection has broken out in the town of Calota, Delmaia.

Martial law has been proclaimed there. VIENNA, Oct 31-The Urown Prince of Prussia arrived here well, and was received by the Emperor. Peace now seems assured between Prossis and Austria.

Paris, Oct 21—A review of the Imperial Guard will be field on Sunday next, when a demonstration is expected.

Radical voters prepose to acmmon the End great as was his ascendency and Deputies from Paris to resign their seats in the Conservative Peers, he never they have not fulfilled their duties.

London, Oct 21.—Gladetone has written a letter to the President of the Limerick Association on the subject of the course of the Government toward the imprisoned Feniane. He says members of the Government have carefully considered the many memorials for the release of political prisoners which have been presented from time to time, and have unanimously decided that such release would be contratly to their duty as guardians of

Rumore that the Emperor of Austria and Victor Emanuel of Italy will soon have an

Interview are increasing.

London, Oct 22—At a large meeting of the clergy at Dublio. Archbishop Trench presiding, it was resolved by a large majority that the laity shall have the right to decide on matters of doctrine and discipline Rome, Oct 21—The x-King and Queen of Naples have arrived in this city 96 remains for the Pacel army arrived from

ALETANDHIA, EGYPT, Oct 22—The Empress Eugenie arrived last evening.

PARIS, Oct. 21-The bullion in the Bank

be organized immediately. The Emperor will come to Paris on

25th but the ministers will remain at Com-pelgue until the 24th, when they will return programme will soon be made public, and that the ultra imperial Deputies to the Corps meet to morrow to reorganize their

party. The meeting was called by a friend of Rouber. Twenty-seven Deputies adhere to the manifesto of the opposition members and Liberal voters of Paris generally adhere to the manifesto ba Marshal Bezaine, in taking command of the Imperial Guard, issued a very energetic

propose to introduce a law next assession in the Corps Legislatif to annul the decree of confiscating the property of the Ofleans

Princes.
Che Patrie reports that the ultra radicale are visiting wor shors and urging men to take part in the demonstration on the 26th

The President of the revolutionary Commines of Paris warned the working men in the provinces that on the 26th inet there will

The radical journals do not approve of the proposed demonstration. I is romored that Ledra Robin, Felix Riol, Victor Hago, Louis Blanc and other extreme radicals will come forward as candidates for the Corps Legislatif in the supplementary elections to

A dnel was fought to-day between Count de Beaumont and Duke de Taulksgan. The

London, Oct 24.— There was an immense demonstration in favor of the Ferian amnesty to-day. Large processions formed in various parts of the city headed by bands of music, and bearing flags and banners inmaggled to day de Parks of Several thousand women wearing greed on their bonnets and scarls walked 10 the procession ... A meeting was addraged by several persons and rest intions demanding amostly for the Februars were adopted by acclamation, after which the people details dispersed. The proceedings throughout the day were orderly. Great precentions bed been taken by the Govern-

ment, and the officers of police were all on duty and thomas as shalled at the partables.

MADRID Oct 23—The country is tranquil. The Bishop of Ashant and several process

tants were arrested at Madrian generday.

At the Course seated by deep Prim, said if
the Council should adopt decisions hostile
a their operations to the Spanish Council of
the Land and the Council of the Council of

Page Oot 24—It is decided that no million the 26th inst.

An Imperial manifesto is expected to appear, to its contents, but nothing is positively known. Some journals assert the Government is making enormous military prepara-tions to prevent any public disturbance on Tuesday.

Pere Hyacinthe not having returned to his convent, as ordered by his Superior, has been dispossessed of all his charges.

London, Oct 25—Nearly all the pa-

pers have obituary notices of the late Earl of Derby, who died yesterday. Henry Layard, the author, is ap-

pointed Minister to Spain. Fear- of revolt at Paris on the 26th are diminishing. The government is taking every precaution against any disturbance of the public peace. Marshal Bazaine has been authorized to use artillery without mercy. It is rumor per r is concentrating troops in the city and General Bazaine has received an order that severe measures may be employed if necessary to keep the streets clear. An Imperial manifesto has been prepared and is ready for publication; but the Government await events before i-suing. The Liberals deny the exist. ance of the reported plot. The people of Paris are much excited over the impending crisis.

LONDON, Oct 25-Most of the London journals, in their obituary notices of the late Earl Derby, say, No one can be a statesman without statesmanlike patience. With this Earl Derby was never endowed. He was impulsive to resist the temptation of making sallies, on Premiers, and both in and out of season His part in the struggles will be ever remembered as proof of his restlessness. In speaking of foreign affairs, the Duke of Wellington bequeathed him his influence in the House of Lords, but the bequest could not be executed. The manner of the Duke's soldierlike bearing bas not descended on his succe-sor. End great as was his ascendency among the Conservative Peers, he never gained Parts. Oct 25-The Emperor strived

at the Turlieries to-day. The Pretect of Police has issued a proglamution informing the people that in view of the proceedings expected on the 20th, which are likely to disturb the public peace, measures are to be taken to insure respect for the law and maintain tranquility. Good citizens are requisted to be on guard against imprudent curiosity and not expose themselves to consequences that may result
