Liberal Lead on Reciprocity f the Conand the Police servative

tion of Trade as a Huge Joke.

OTTAWA, May 2.—The House opened at o'clock, nearly all the members being

prohibition of the liquor traffic were presented.

Mr. Hazen, one of the M. P.s for St. John, N.B., a young man with a pale face and a good voice, moved the address in reply to the speech. He looked for great things from the growing crops and the development of the Northwest. As to the reciprocity negotiations, he believed that reciprocity along the line of the treaty of 1854 would benefit both countries, but the Dominion would not discriminate against Great Britain. He took up the speech ause by clause, but said nothing striking egarding it.

great Britain. He sause by clause, but said nothing striking legarding it.

Mr. Corbould (New Westminster, B.C.) seconded the address. He followed the same line as Mr. Hazen.

Hon. Mr. Laurier was warmly applauded when he rose to speak. He appealed to the honorable gendleman, the leader of the House, if this verbose document known as the speech from the throne were not a very dry skeleton. So far they had not been told why Parliament had been dissolved, which was a breach of constitutional law. There was no intimation that the Franchise Act would be repealed, though its utter uselessness and unfairness had been demonstrated beyond question. Nor did the speech contain any proposition for amendments to the election law whereby the outrageous frauds which had been perpetrated at the late elections could be prevented in future. Nor did the speech contain a reference to the matter of mails to Europe, the carriage of which had now been transferred from a Canadian port to New York. reference to the matter of mails to Europe, the carriage of which had now been transferred from a Canadian port to New York. Surely such a course was disloyal, even when pursued by a professedly loyal man like the Tostmaster. General. Whether it was veiled or unveiled treason, he could not say, but it was one or the other. (Cheers and laughter.) The two previous speakers had talked of the country having combined confidence in the Government, but where was it—in the battered, shattered ranks of the Ministry? Honorable gentlemen opposite might say,

hattered, shattered ranks of the Ministry? Honorable gentlemen opposite might say, in the words of King Cyrus, "One mere such victory and we are undone." Only that the people of the country had been gagged, shackled and manacled by the Wranchise Act, by the mutilated boundaries of counties, by the law which placed the preparation and printing of the voters' lists in the hands of the Government, by the appointment of shamelessly partisan repreparation and printing of the voters lists in the hands of the Government, by the appointment of shamelessly partisan returning officers who committed the most disgraceful frauds ever perperated at an election—only for the fact that by these and other such methods the people had been gagged, shackled and manacled, the confidence of the people would have shown itself to such an extent in the Government that the big majority with which it went to the polls would have been reduced to a minority too small to form a corporal's partial from. (Opposition applause). If tee morable gentlemen opposite were sincerein go foir claims to possess the confidence of the form a corporal such at the description of the good of the form that the description of the Government when, in a panic it resolved to rush to the country. There had really been no valid excuse for dissolving the House a veer before its full term had been served.

year before its full term had been sorved. He denounced the empty loyalty cry, in the name of which so many crimes against good government had been perpetrated, and said the real reason for the dissolution the real reason for the dissolution was the constant accession to the canks of the Liberal party, which thonestly advocated reciprocity. Sir Charles Tupper had so asserted after his return to London. The reciprocity mission to Washington had been a failure so far. The delegates said they had been received with every courtesy, but if they had not they would have only received the rebuke for which they had been yearning. Nothing could be so offensive to international courtesy as the language of the First Minister at could be so offensive to international courtesy as the language of the First Minister at Halifax last fall. (Hear, hear.) Mr. Laurier then read the celebrated extract from that speech, in which the Premier contemplated with philosophic calm "the struggles of a democracy." Nothing, said Mr. Laurier, could be more contrary to the amity which they owed to this neighboring nation. There was hostility in that speech, as there was in Canada at the time of the civil war. The philosophy of that period lost as there was in Canada at the time of the civil war. The philosophy of that period lost us a treaty, and it will be well if the Premier's philosophy does not cost us another treaty. Mr. Laurier demanded to know on what basis the commissioners were sent to Wash-

hasis the commissioners were sent to Washington a few weeks ago, whether they caried with them authority to negotiate for unrestricted reciprocity, restricted reciprocity, or any reciprocity at all, or if it as confined to official questions respecting the ring Sea or the Atlantic. Sir John Maconald in 1878 had complained of the vodus of Canadians. It was very much eater to-day. "We must have a change," at the Opposition leader in ringing tones, had it must be in the direction of greater edom of trade." (Loud Liberal cheers.) thental reciprocity was the only policy could be advocated on business ciples, and it must ultimately triumph this continent. (Liberal cheers.) Sir the continent.

The Waterworks Eylaw Defeated—Sam Small Opens a Campaign.

Toronto, May 4.—The citizens voted on a money bylaw to provide \$127,000 for a new engine house, pumping well and 10,000,000 gallon engine on Saturday. The vote was the lightest in the municipal history of the city, 1,105. Of this 697 votes were cast against the bylaw and 408 for it. The defeat of the bylaw will not prevent the erection of the new engine, a contract for which has already been let. The rate of taxation will, however, be increased by half a mill for the raising of the necessary money to pay for the work.

Rev. Dr. Samuel Small, better known in Toronto as Sam Small, opened a two weeks' campaign at the Auditorium yesterday afternoon and evening. On each occasion the spacious building was crowded to its limit by appreciative audiences. His address in the afternoon was on Gospel temperance, and at night he spoke on the power of grace to suppress sin, and to give man the victory over self. Great assistance was rendered by the singing of the Whyte brothers.

Until lately the cotton waste used in printing presses has been cleansed from the oil and refuse, the grease being considered as useless and thrown away. It has, however, been found that the oil thus destroyed can be made, after very simple treatment, to yield first-class printing ink, and it has been ascertained that one ton of this spent waste yields about fourteen hundredweight of oil from which ink of an improved quality and a reduced price is manufactured.

A startling incident occurred at the anniversary services of the West U. P. Church at Kirriemuir, Scotland, entirely without a parallel in memory of the oldest inhabitants. On Sunday, April 5, the minister was calmly preaching his sermon, when a modern Jenny Geddes, infuriated at one of the male members of the choir being asleep hurled her Bible at the head of the delinquent from the gallery where she was sitting. The Bible missed the sleeper, but struck the shoulder of another man in the choir, who started up amazed. The minister became pale, paused in his discourse, and exclaimed, "What's wrong?" "The Bible struck the wrang man," she cried, rising up in her pew, although her friends vainly attempted to hold her down, "'twas meant to wauken the sinfu' sleeper." Strange to say, all present retained their gravity, not the ghost of a smile becoming apparent on the faces of the infinitely tickled and astounded congregation.

Washington Ladies Inaugurate a Suite of Club Rooms.

Washington, May 1.—A woman's club is the latest institution that the society ladies of the capital have set going. It is called the Washington Club, and has just opened a fine suite of rooms at the Hotel Richmond. The ladies say they have modeled the constitution after the most successful of similar organizations of men's clubs. The most stringent of the rules applies, of course, to future applications for membership. As a member has said: "Without being captious, we are going to be safe, so that each lady may!fact that she is always among ladies while in the club rooms." A candidate is proposed by a permanent member, seconded by another, and the entire Board of Governors elects to membership. The Board of Governors will have, when completed, fiften members. Mrs. Les, wife of Admiral Lee, is president, Mrs. Wister, first vice-president, and Mrs. D. P. Morgan, second vice-president. The others are Mrs. McPherson, wife of the New Jersey Senator; Mrs. Phil. Sheridan, Mrs. Winthrop, Mrs. S. O. Richey, Mrs. N. S. Lincoln, Mrs. W. A. Hammond, Mme. de Sibour, Mrs. Woseph R. Hawley, Mrs. Lothrop Bradley, Miss Olive Risley Seward and Mrs. Isham Hornsby, leaving one vacancy yet to be filled. A member can introduce a lady from out of town, to whom the privileges of the club rooms will be effered for a period of ten days. The wives of foreign ministers resident in this city, and distinguished women for other cities, will be elected to honorary membership, and will be sent cards entitling them always to the hospitality of the club rooms.

### TESTIMONIALS.

CONSUMPTIVES, ATTENTION.

CONSUMPTIVES, ATTENTION.

HISTOGENETIC MEDICINE ASSOCIATION:

Gentlemen,—I now wish to bear my testimony to the magic powers of Histogenetic Medicines in the cure of lung disease. Three years ago I had a severe attack of intermittent fever, which shook my constitution very seriously, especially my lungs, liver and bronchial tubes. A year ago I took la grippe, which left me in a bad condition. I had a very bad cough and profuse expectoration. Could not sleep for coughing and pain in my lungs. I had night sweats and other evidences of a destractive process going on in my system. All I took and did, including cod liver oil andother consumptive remedies, did me no perimenent good I finally became discouraged and realized that consumption would soon carry me off unless some unitsual treatment was brought into use my case. I got worse and still worse, until about the middle of December last when I noticed an advertisement in the Toronto News giving the testimony of a managed Hoperoof having been cured of consumption. Also the testimony of another of the managed Hoperoof the ing been cured of consumption. Also the testimony of another of the association. He was positive, after a careful examination of my condition, that Histogenetic Medicines perseveringly taken would effect at least an arrest of the disease and very probably a radical cure. I commenced treatment at once and beyan to gain rapidly when, unfortunately, I took a severe cold, but persevered with the treatment and was soon better than usual again. I have rapidly improved till my cough, expectoration, pain and night sweats are entirely gone. I have gained more since commencing the treatment than I had lost during my illness (fifteen pounds.) In fact, I weigh five pounds more than I have for years. I am able now to follow my usual employment all day and feel splendid. The action of these beautifully-oregared, tasteless medicines is miracin. pounds more than I have for years. I am able now to follow my usual employment all day and feel splendid. The action of these beautifully-prepared, tasteless medicines is miraculous and permanent, and they leave no injurious effects. I wish in this testimony to tender my hearty thanks, and also those of my now happy wife, to the Histogenetic Association for the deep interest they zook in my case, which has resulted, through God, in my life being saved when all else failed. I shall glaid answer any inquiries concerning the facts in my case. Yours truly.

SPRINGFIELD ON THE CREDIT, Ont. March 18, 1891. Histogenetic Medicine Association:

March 18, 1891.

Histogenetic Medicine Association:

GENTLEMEN.—

Wishing to testify to the superior merits of Histogenetic Medicine for the cure of lung diseases, I submit the following statement: Two years ago I found myself, as a result of exposure to cold and wet weather, taking frequent colds. I took a severe cough and got run down in vitality and had several spells of hemorrhage of the lungs. I coughed a great deal in the morging and some during the night. I consulted two or three physicians, one very clever Toronto physician. He treated my without medicine, by hand rubbing, and did me considerable good, but in the course of time the hemorrhage returned.

Two of the physicians I consulted considered mine a serious case, and one of them gave me to understand it was hopeless, and I have no doubt that consumption would some have caused my death. I heard only the head office for dameds. By Yonge street Market, who examined me and thought Histogenetic remedies was dead to the mobility and the rapidly lessened. There was considerable bronchitis and it soon disappeared. My strength came the rapid breathing disappeared the first lot of medicine was called and the rapid breathing disappeared the first lot of medicine was called. I have not had any hemorrhage since the first lot of medicine was called. I have not had any hemorrhage since the first lot of medicine was called. I have not had any hemorrhage since the first lot of medicine was called. I have not had any hemorrhage since the first lot of medicine was called. I have not had any hemorrhage since the best treatment for the lungs I have ever known, and I can conscientiously vecommend it to my friends and acquaintances who may need lung treatment as far superior to any other system. Sincerely.

of England, and the sum of \$75 to the Cavalry of England, and the sum of \$75 to the Cavalry Company.

E. T. Essery reviewed a number of the acts of the Council and said he would be one, if others were willing, to test the question of the Council's jurisdiction. Every man who had anything to do with the grant of this money could be made to pay back a share. If a citizen's protective association were formed he would be a member. He claimed that the action was clearly illegal and should be procested against.

Mr. McCormick said that if this precedent were established all other societies would expect to get similar grants. He hoped others would express their views, as he had merely brought the matter forward in the hope of having opinions freely expressed.

Mr. George Hiscox said the mayor was not present, but as Ald. Taylor was, it would be a good idea to hear him.

Ald. Taylor said he stood up for his action, and if it came up again he would do the same thing. The Council had been blamed in the past for not encouraging crowds to come to the city on the public holidays. Train after train load left the city, but the Council's action now was to encourage large crowds to come to the city of instead of going away. The majority of workingmen did not get an opportunity to enjoy themselves except on these holidays and it was proper that something be done old stagers on the platform had voted the city's money in times past for equally illegal purposes.

On response to the call for a public meeting to protest against the City Council's action in granting \$200 each to the A. O. F. and S. O. E. B. THE ADDRESS.

The debate on the address in the Domin ion Parliament, which began Friday, was rendered lively by the vigorous addresses of Hon. Messrs, Laurier, Sir Richard Cartwright, David Mills and others. The chief point, necessarily, was the trade question. By the way, Sir John Macdonald seems to regard the matter of commercial relations with our neighbors as a huge joke, and the inconsistencies of his Cabinet as something to be laughed away. To say the least, such an attitude does not betoken statesmanship.

GAME AND FISH.

The Ontario Game and Fish Commission have made the following appointments in the West: At Windsor, May 5; Chatham, May 6; London, May 7; Hamilton, May 8 and 9; Simcoe, May 14; Dunnville, May 15. Local sportsmen who can give any auggestions as to the best means for preserving and increasing the supply of game and fish foods should be prepared to give evidence. The commissioners will gladly welcome any assistance in the task committed to them.

Pregarded as among the most valuable of municipal rights." In Quebec, our connunicipal rights." In Quebec, our contemporary asserts, the principle has been by the old Province of Canada, and not repealed, doubtless Mr. McLaren, Q.C., the formulator of the local option clause, thought it was perfectly valid. As the susstion is important the action of Premier Mowat in appealing to the higher authorisities to set it at rest, as was done in other attacks on Ontario legislation for comparison. tacks on Ontario legislation for com-latting drunkenness, is commendable.

increase, which could with absolute propriety and justice have been made before now. Ontario is a large and important Provnce, larger than any of the Provinces in the colonial system that possess responsible Government. Yet till now the remuneration of its chief executive officer has been kept on a par with that of the smallest Australian colonies, possessing a tithe of the population, resources and op-portunities of this great commonwealth. We briefly illustrate. According to the latest official statements, the following is a list of the population and the salaries paid to the Premiers in the understated

The legislators who have done justice by

he veteran Premier that has spent the best days of his life in husbanding their reources need formulate no defense for the justice of their action. The remuneration now voted to him is as little as the Premier of this Province should be asked to accept. It is not one-half what bank corporation willingly pay their general managers for performing work that cannot be more arduous and for assuming responsibilities that are not nearly so great. By his own profession Mr. Mowat could have made imself rich long ere now. He has chosen to serve his fellow-citizens, he has served them well, and he deserves to be decently remunerated. No reasonable person will cavil at the action of the Legislature. Nor do we think that many will object to the principle being established that the Opposition leader in the House should receive increased indemnity. To properly perform his duties, he has to spend a great deal of time and money.
Assuming that his work is performed in the public interest, there is certainly a good deal to be said in favor of the proposit

> MAY DAY CALAMITIES. Two classes seem to have fomented the

labor day troubles that proved so disastrous on the European continent Friday. One was the Anarchists, who incited the men to indefensible acts of violence. Another was the opponents of liberty and progress, who prevented the holding of public procession and public meetings.

Between the men who advise the abuse of liberty and the men who suppress it there is little choice. They are both memies of the masses, and should be condemned. The shorter day's labor and better remuneration cannot be promoted by the agencies that either of the two lasses counsel or adopt.

PERSONAL AND GENERAL. The Imperial Parliament has just voted \$474,520 for the maintenance of royal parks and pleasure grounds for the ensuing year. 111

-The Conservatives are very much afraid that some of their slim majority may two whips as hitherto, the leaders have appointed a whip for every dozen members. The party is now as well supplied with

whips as the Israelites were with Egyptian taskmasters. —We are glad to observe that at the an-nual meeting of the Association of Medical Superintendents of Asylums and Hospitals for the Care of the Insane, held this week at Washington, Dr. Daniel Clark, of Toronto, was unanimously elected president of that great international body for the ensuing year. Dr. Clark is one of the most distinguished alienists on the continent, and his many friends will congratulate him on

this new testimony to his worth. 111 -Great Britain seems to be fairly prosperous, despite the assurances of our high tax friends in Canada, who are continually bewailing the fatuity of the course of the motherland in sticking to freedom of trade. There were 500 fewer bankruptoies in Britain in 1890 than in any previous year, and within the past decade pauperism, according to Mr. Chamberlain, M.P., has been reduced by 20 per cent., and the committal of crime by nearly 30 per cent.

-Hon. Wilfred Laurier caused much merriment in the House of Commons Friday night by a story he told illustrating the two-facedness of Sir John Macdonald, who asked for dissolution because of supposed negotiations in favor of reciprocity; whereas, in his manifesto, he never once referred to trade negotiations. The reason was obvious, remarked Mr. Laurier. There were two classes of men in the Dominion; the most part on the one side the pro Local option, says the Montreal Star, 18 tected manufacturers, and on the other the gentleman reminded him of a bat which one day had fallen among acted on in a number of cases. A fitting tribute was paid to the Hon.

Suicide Near Strathroy.

Strathroy, May 2.—James Fraser, a well-to-do farmer living on the town line of Adelaide, committed suicide yesterday morning. He tore off the covering of the well on his own place and jumped in, sinking in about twenty feet of water. His wile saw him and gave the alarm, but before aid could reach him he was beyond help. He made an attempt to take his life six weeks ago by cutting himself with a razor. Deceased was married and about 50 years of age. He leaves a wife, two sons and three daughters. It was deemed unnecessary to hold an inquest. The deceased was laboring under a fit of temporary insanity, having been somewhat deranged for three months past.

Bradstreet's Report.

New York, May 1.—Special telegrams to Bradstreet's do not reflect a generally improved state of business within the week. Crop reports west and northwest, with reference to the leading cereals, however, continue exceptionally favorable. Leather, hides, hats, caps, hog products, raw wool, cotton and raw sugar all tend to shaded quotations, with the demand noticeably less than a week ago. Money is firmer and in active request, notwithstanding the partial subsidence of the wave of speculation.

At Montreal the drygoods trade is bolder than a year ago, but groceries and hardware are only moderately active. Farm work is well advanced. Trade has improved steadily at Toronto, where prices are firm. Ontario crop reports are encouraging. The Dominion reports 41 business failures this week, against 33 last week and 23 this week last year. The total number from Jan. 1 to date is 746, against 698 last year. ### Wakes the Weak Strong

The marked benefit which people in run down or weakened state of health derive from Hood's Barsaparilla, conclusively proves the claim that this medicine "makes the weak strong." It does not act like a stimulant, imparting fictitious strength from which there must follow a reaction of greater weakness than before, but in the most natural way Hood's Sarsaparilla overcomes that tired feeling, creates an appetite, purifies the blood, and, in short, gives great bodily, nerve, mental and digestive strength.

Baseball Club—General Sporting News.

BASEBALL.

A novel baseball nine has been organized in this city and that it will attract wide-spread attention is certain. It is composed of nine brothers—sons of Christopher Sheere. The father acts as manager and the sons play positions as follows: Albert Sheere, aged 27, pitcher; Frank Sheere, aged 22, first base; John Sheere, aged 20, catcher; Alfred Sheere, aged 16, second base; Fred Sheere, aged 12, center field; Harry Sheere, aged 12, center field; Harry Sheere, aged 12, oenter field; Percy Sheere, aged 8, left field; Chester Sheere, aged 11, consisting of seven brothers, father and a cousin, has been talked of a great deal, while another club called the "Brothers," of Chicago, has eight brothers and the father. The Sheere brothers' baseball team will make a name for itself within the next few years, provided the family's health remains good and nothing occurs to separate them.

DRAUGHTS.

The forfeits lodged with the stakeholder in the abortive Wyllie and Reed match have been handed over to the latter.

Mr. Reed, champion of the world, is ready to defend his title against all-comers. He adds that, if Freeman does not care for the title, he will play that gentleman for a sum of money—the first game to be played in Chicago and the second in Providence. HOMING PIGEONS.

P. B. Leighton, of Belleview, Amherstburg, while engaged in grading his property to the breakwater, came across what are, without doubt, the most valuable of Indian relics ever discovered in Essex. Among the treasures found were vast quantities of skulls, bones, spear and arrow heads and several solid silver armlets, anklets and crosses, one of the latter a perfect beauty, being 10 inches long and 8 inches wide. All the silver ornaments showed when cleaned off no traces of tarnish. None of the oldest inhabitants have the faintest recollection of hearing of a burying ground at this point, and from the character of the find it is thought the find must be 200 years old. The farm on which the valuable find was made is the old Reynold's homestead.

AN ENTERPRISING FIRM.

D. Ferguson & Bros., of this city, have a remarkably fine lot of horses for service for the season of 1891, as may be seen in their advertisement in this issue, comprising three standard bred, and one imported Clydesdale.

Being of the opinion that there are a large class of desirable brood mares in this is vicinity capable of producing etylish roadsters and fast trotters, and to stimulate this pursuit it is their intention to offer annually a stake to be entitled "The Excelsior Stock Farm Colt Stake," to consist of a purse of \$100, to be competed for by 3-year-old colts, the produce of their trotting stallions, stivided as follows: 1st, \$50, entrance money added; 2nd, \$30; 3rd, \$20. The inaugural stake to be trotted for at London Exhibition, 1893. A small entrance fee will be charged. The breeders of this section have never before had such a variety of high class standard trotting stallions at they now offer to select from, and if the opportunity is taken judicious advantage of it will result in considerable profit to the horse interests of the surrounding country. They make this offer because they are confident that their stallions are rotters and will sire trotters, and breeders need only glance at their pedigrees, and examine them individually, to arrive at the same conclusions interested in high-bred stock to call attheir stable, corner York and Ridout streets, where the owners will take great pleasure in showing the stock.

What It Costs

Must be carefully considered by the great majority of people in buying even necessities of life. Hood's Sarsanarilla commends itself with special force to the great middle classes, because it combines positive economy with great medicinal power. It is the only medicine of which can truly be said "190 Doseo One Dollar," and a bottle taken according to directions will average to last a month.

## WHOLESALE

The Pick of Two Wholesale Bankrupt Stocks of Drygoods.

It never rains but it pours, so the old adage says, and in accordance with this we have another bankrupt stock to add to the many bargains we are

now offering to the people of London.

We have purchased the choice portion of the Birrell bankrupt stock and are now prepared to offer astonishing bargains in every department. This with the one already advertised (McLachlan Bros., of Mon-treal) makes the greatest sale of bankrupt Drygoods ever held in London.

Purchasers of every line of Drygocds will study their interest by looking through these two wholesale bankrupt stocks. Jobbers and country merchants will find many interesting lines in this stock to boom their business during the present dull times.

"My boy, I'd have you reflect about this enormous matter, and weigh it well in your mind. Do ye know anything about the stars, now? Do ye know how long it would take to go from here to Jupiter?"

"Well, let we see now," said Arthur; "to Jupiter? It would depend, of course, on how you proposed to go. If you went by English express, sixty miles an hour say, I suppose it would take you about a thousand years; if you went on the old mare you would be longer, of course."

This was one for Anthony, who did not quite know what to say next.

"I see," he said at length, "that you know something of astronomy, Arthur. "Tis a tremendous great science. "Tis a science that a person can never get to the end of. And I don't know that you could do a better thing at present, Arthur, than

"I see," he said at length, "that you know something of astronomy, Arthur.

Tis a tremendous great science. Tis a science that a person can never get to the end of. And I don't know that you could do a better thing at present, Arthur, than to go on with your studies in the company of my friend, Mrs. Lytton. My! my! but that's a powerful clever women, and so amenable to."

Arthur stared open-eyed at his father.

What should this portend?

Anthony shifted uneasily under the gaze of his son.

Anthony shifted uneasily under the gaze of his son.

"I shouldn't like, sir," said Arthur, "to step in between you and Mrs. Lytton. You see you are only just beginning the subject yourself. You'll want a great deal of Mrs. Lytton's time for the present."

"I will," said Anthony, "I will. For I believe that the stars are my vocation; but I wouldn't like to cut you off entirely from all that Mrs. Lytton could teach you. It tell ye now, Arthur, that when ye're learning under Mrs. Lytton, ye don't know that ye're learning at all, the way of her is so the kidneys and indirectly on bad blood. Burblesant,"

The Oarsman.

Edward Hanlan, the celebrated oarsman, found great efficacy in St. Jacobs Oil, and he says: "It is a reliable remedy for muscular pains in arms and legs and invaluable to oarsmen." All athletes use it. "What are you doing in here?" asked the other fellow who had just come in. "Oh, just passing away the time," was the answer, as he handed his watch to the pawnbroker.

prosperous journey through life.

The Armagh (Ireland) Guardian speaks as follows of an accident which resulted in the death of a cousin of A. B. Powell, of this city: "We regret sincerely to have to announce the death of Mr. Caleb Powell, of Gorthmore, near this town, which took place last night, from injuries received at the Solsboro races yesterday, he being knocked down by a horse while crossing the course near the brook jump. Mr. Powell had only been a short time on the course when the lamentable accident occurred. It was during the time the first race was being run. He rallied somewhat in about an hour after the occurrence, but ultimately he had to be conveyed home in a car, in which a mattress was placed. All that medical skill could suggest was done by both Dr. Powell, Toomevara (a nephew of deceased), and Dr. Morton, but death supervened in the course of the night. Mr. Powell was very much respected and popular in every place he was known, and his death will be sorely felt by his bereaved wife and family."

—The fund for the purchase of a chime of bells for St. James' Church, South London, was considerably augmented Friday evening by the large attendance at the concert given in the church. The programme was meritorious, as follows; solos, Mias Boddy, Dr. C. A. Sippi, C. W. Davis (violin obligate by Miss E. Coppinger), J. W. Belcher and J. Raymond; duet by Miss E. Raymond and W. Halle; quartets by Misses Greenwood and Boddy, Messrs. Davis and Belcher, and Messrs. Belcher, Fewings, Halle and Davis; trio by Miss Raymond and Messrs. Belcher and Halle; organ solos by W. C. Barron and E. T. Maccomb, and choruses by the church choir. The entire programme was carried out with credit to each of the individual singers, and especial praise is due to the choir. Mr. Barron's organ solos were a delight to all. The performance of Mr. Maccomb was a surprise to his most intimate musical friends. It was his first appearance in critical organ work, as well as in concert.

"Lost in New York."

"Lost in New York."

The great aquatic drama "Lost in New York" will open for a season of three nights and Wednesday matinee at the Opera House this evening. The play and company are very strong, and come highly recommended by the Montreal and Toronto recommended by the Montreal and Toronto papers. It is a genuine novelty and the first aquatic drama ever produced in this city. A river of real water sustains real yachts, rowboats and a genuine practical steamboat that conveys a score of passengers to and fro upon the stage running at full speed. A beautiful prismatic fountain is also introduced in the Grammercy Square score. The story is we, conceived and is also introduced in the transmercy square scene. The story is we, somewhat told concisely and dramatically. A poor street girl, cast upon the sympathy of the world, shows what a determined, honest girl can do for herself if she has half a mind o. It is true that she is clothed in rags has lost all friends, but she goes straight habead, with a view to doing something to gain an honest name. Her career is romantic; her adventures in numerable. She can sing, dance, swim of row a boat. In the course of time she discovers her long lost mother and after many covers her long lost mother, and after many trials and struggles finds a happy home. The cast contains Miss Lottie Alter, who succeeds Patrice; George Wright, L. W. Babcock, Henrietta Scott, Baby Spence

from Hon. David Mills, J. Dearness and others who were to have taken active part. The toast list was introduced and the speeches were masterpieces of grace and wit, such as became the admirers of the immortal Bacon, showing also the admirable effect which an institution like the Recentage Club has in investigation. mirers of the immortal Bacon, showing also the admirable effect which an institution like the Baconian Club has in improving the facility of thought and speech.
