**Rich Gifts For
The Bride**

It would be difficult indeed to choose a more acceptable and more pleasing wedding gift or one in better taste than the pieces we offer in Silver ware, Cut Glass and China.

Let us suggest one of the following pieces:

- Silver Cake Basket
- Silver Butter Dish
- Silver Baker
- Silver Casserol
- Silver Marmalade
- Cut Glass Water Set
- Cut Glass Spoon Tray
- Cut Glass Compotes

CHAS. E. WENDT
JEWELER . MILDMAY

hen remove and clean the
the birds will stand this feeding
two or three weeks with good apper-
tes.

Even if labor is scarce an effort
ould be made to have at least a
ew flowers and flowering shrubs on
he farm lawn. Beauty has a value
hat cannot be measured in dollars.

The school-directed home garden is
he most economic form of gardening
or small cities, towns and the sub-
urban districts of large cities. The
child's garden becomes a centre of
interest of the whole family. The food
s produced at the home, where it is
ised and the home is beautified. As
he garden ties the child's interest to
he home, the visits of inspection and
nstruction of the garden teachers tie
he home to the school. In the con-
ested sections of large cities, home
ardens are not always possible and
he community school grounds or
vacant lot plot must be substituted.
his form of school garden usually
quires a greater financial cost in
roportion to the value of the crop but
is still justified from the standpoint of
ducation.—Nature Study Review.

Y SCHOOL

The Spear and the Cruse of Water.
From the other side of a valley, at a
safe distance, David roused the sleep-
ing camp by his shouts. In the dark-
ness Abner could not see who was
calling, but Saul recognized David's
voice. David takes a keen delight and
a bloodless revenge in taunting Abner
for his neglect of watchfulness. "What
a man art thou!" he said. "Who is
like thee in Israel? Why hast thou
not kept thy lord the king? You and
your men deserve to die for your care-
lessness."

My Son David. Once more, and for
the last time, the king's better nature
is aroused. He can not but see that
his life has been in David's hands and
yet he has been spared. Surely David's
accusers have lied to him and his own
ears have been groundless. His old
affection for the fresh-faced boy,
whose music had charmed away his
fits of moody depression, revived.
David seizes the opportunity to plead
his cause, and confound his enemies
who have persistently stirred up the
king against him. If the king's anger
is from the Lord, will the Lord not
accept an offering, but if it be from
men who tell lies, may those men be
scourged.

18-25. Go, Serve Other Gods. David
interprets his outlawry as banishment
from the country of Jehovah. Of
course he did not serve other gods,
he remained true to Jehovah, the God
of his own people. But that is the
way his banishment would be com-
monly understood in those days, when
most men thought of the god they
served as confined to one country and
to the sovereignty of one people. It
took a long time to learn that Je-
hovah was true Lord of all countries
and nations. David begs that he may
not die outside Jehovah's own land
of Israel, away from the home and
the graves of his ancestors.

Instead of to seek a flea the ancient
Greek version has "to seek my life,"
which is likely to be the correct read-
ing (v. 20; compare 24: 14).

I Have Sinned. David's forbearance
and magnanimity wrought what no
act of violence could have done. It
brought real repentance to Saul's
heart and an honest confession to his
lips. That is the noblest kind of re-
venge—revenge that wins, and heals,
and saves.

more
sured as
At the Coronation
perquisites come in showers,
of them are very quaint. From the
Lord of the Manor of Addington the
Sovereign can claim a dish of pottage
concocted of "chopped chickens, cap-
pon-brown, spices, sugar, and almond-
milk," while the Lord of the Manor
of Haydon must make a solemn pres-
entation of a towel for his Sovereign's
use.

In olden times the Chamberlain
claimed the furniture of the room in
which the Sovereign had slept on the
eve of the Coronation, in addition to
forty yards of crimson velvet and a
silver ewer and basin.

Bits of Information.

The Polish alphabet contains forty-
five letters.

Allspice is the pea-like fruit of a
shrub grown in the West Indies.

"Alice's Adventures in Wonderland"
was first published in 1855.

The properties of cocaine as an
anæsthetic were discovered in 1884.

There are more than 1,500 different
tribes of American Indians.

Aliens to the number of 24,500 were
interned in England at the beginning
of the Armistice.

There are 11,000 British troops still
stationed in France as guard to
"dumps" of war material.

Explosive shells, which were fairly
successful, appear to have been used
by the Dutch as long ago as 1588.

More than 60,000 people have return-
ed to the ruins of Rheims, where they
are mostly living in the miles of wine
cellars.

Although only two peaks of the Alps
are over 15,000 feet in height, there
are dozens exceeding 12,000 feet.

Peasants on the Swiss mountains
use horns, often as much as eight feet

ago I was in
condition. I had had
severe nature, and sharp
agony all through me. My
was so weak that it was difficult to re-
tain food, and often after eating I
would have vomiting spells. I was un-
der medical treatment, but as I did
not improve my nerves were in a ter-
rible condition and I was always in
much misery. One day I read of a
woman who had been relieved of sim-
ilar trouble through the use of Dr.
Williams Pink Pills, and I decided to
try them. The result can be summed
up by saying that after using the pills
for some weeks I was entirely bet-
ter, could eat a hearty meal and
was again enjoying life. If I feel run
down at any time I take Dr. Williams
Pink Pills and always get benefit
from them."

You can get these pills through any
dealer in medicine, or by mail at 50
cents a box or six boxes for \$2.50 from
The Dr. Williams Medicine Co., Brock-
ville, Ont.

Incendiary Bullets.

The incendiary bullets used during
the war, mostly fired from machine
guns carried by airplanes, were in ef-
fect miniature high-explosive shells.
Those supplied to our armies were of
brass, hollowed out to hold a composi-
tion of which the principal ingredient
was barium nitrate. To set this off,
each bullet had a priming charge of
magnesium and red lead.

An ordinary rifle bullet, of course,
is solid. The incendiary bullet is of
wholly different construction, though
of the same calibre, being meant to
carry flame. Its discharge sets fire to
the explosive stuff contained in it.

Possible Planets

Suppose that a new planet, a fresh
addition to the sun's family, were to
appear one of these fine nights in the
sky. What a sensation it would make,
to be sure!

Astronomers do not regard such an
occurrence as impossible, though as-
suredly most unlikely. The sun's erup-
tive forces are so tremendous that it
might conceivably throw out a flaming
mass of gas that would cool and con-
dense into a planet.

Not long ago, at the Yerkes Obser-
vatory, an eruption was observed (and
photographed) on the rim of the sun
which threw up material to a height
of 500,000 miles. One cloud of it,
which appeared as if floating detach-
ed, was reckoned to have some thou-
sands of times the volume of the earth.

We are accustomed to regard great
volcanic explosions on the earth as
the most appalling of natural phenom-
ena, but they are feeble and trifling
disturbances compared with the out-

bursts which are continually taking
place all over the body of the sun.
When an eclipse occurs, we can see
with the naked eye, through a piece of
smoked glass, gigantic flames darting
out from the edge of the solar disk.

Very likely the little planet on which
we dwell was originally part of the
sun and was thrown out from the lat-
ter as a mass of burning gas. The ro-
tation of the sun on its axis started
the mass whirling, helped perhaps by
the vortex motion of the eruption.

The same eruption may have
thrown out the moon, a smaller mass
of gas, which fell under the control of
the embryo earth, becoming its satel-
lite.

Possibly the four little planets—
Mercury, Venus, Earth and Mars—
were thrown out at about the same
time. Greater eruptions may have
given birth to the four giant hot
planets—Jupiter, Saturn, Uranus and
Neptune.

Tea and Coffee Drinkers

ing in com
acres.
Aromatic honey, exce
locality, is produced by
Malta.

Typhus is raging in the famine
of Europe, there being 250,000 cases
in Poland alone.

Red-haired people are said to be less
liable to baldness than those with hair
of any other color.

A silent, keyless clock, which con-
tains only four wheels and no springs,
has recently been patented.

Turkey's population will, by the
Peace Treaty, be reduced from 30,000,
000 to 6,000,000, and her navy must
consist only of a few revenue cutters.

There are under construction for
the British Navy one battle-cruiser,
eight destroyers, thirteen submarines,
and eighteen other vessels.

Krapps (Essen) employed 80,000
hands before the war. This grew to
115,000, and now stands at 45,000.
They are making agricultural ma-
chinery and cash registers, among
other things.

GUARD BABY'S HEALTH IN THE SUMMER

The summer months are the most
dangerous to children. The com-
plaints of that season, which are
cholera infantum, colic diarrhoea and
dysentery, come on so quickly that
often a little one is beyond aid be-
fore the mother realizes he is ill. The
mother must be on her guard to pre-
vent these troubles, or if they do
come on suddenly to banish them. No
other medicine is of such aid to
mothers during hot weather as is
Baby's Own Tablets. They regulate
the stomach and bowels and are ab-
solutely safe. Sold by medicine
dealers or by mail at 25 cents a box
from The Dr. Williams Medicine Co.,
Brockville, Ont.

Burglars, Beware!

A "burglar chaser" is the novel in-
vention of Gertrude Markle and Ku-
wakichi Fujita (the latter a Japanese),
and it promises to be a terror to ill-
advised persons who break in and
steal.

It consists of a series of alarm boxes
distributed through the house, one in
each room. They are harmless-looking
affairs, fastened to the wall. But they
are loaded.

In case of an alarm of robbers, the
householder touches a button that com-
municates with the box in the room
where the thieves are supposed to be,
and the box, pneumatically energized,
turns on a pivot, pointing half a dozen
gun barrels toward the interior.

Bang! bang! go the guns. Perhaps
the robbers are not hit, but they are
badly scared. They may run into an-
other room. If so, the box in that
room is similarly revolved by another
button, and starts shooting.

As the inventors state, the opera-
tion may be repeated "until the in-
truders have entirely fled the pre-
mises, thus obviating the necessity of
the occupants of the house having to
face armed burglars."

Marriage Etiquette in China.

When a Chinese girl is married she
must wait four months before eti-
quette allows her to pay her first visit
to her mother; but after this initiatory
call it is within bounds of social cus-
tom and propriety to visit the home
of her parents at her home.

You can't wear soil out by cultivat-
ing it.

only—look for the name California on
the package, then you are sure your
child is having the best and most
harmless physic for the little stom-
ach, liver and bowels. Children love
its fruity taste. Full directions on
each bottle. You must say "Calif-
ornia."

The Grim Companions.

I saw him dancing between the two.
When the spring was young and the
leaves were green.

Oh, gay was he, for his life was new,
Though the sombre two that he
danced between

Were Pain and Sorrow, Sorrow
and Pain.

The brook was full and the wee birds
sang.

The child boy played and his laughter
rang,

For Pain and Sorrow had barbed no
fang

When he started down life's lane.

I saw him again on a summer's day,
A man full-grown, stern-faced, and
strong,

And Pain and Sorrow he held at bay,
Though they sulked beside as he
walked along—

Oh, Pain and Sorrow, Sorrow and
Pain,

The trees were full and the way uphill,
Spring's rushing stream was but a rill;
The wee birds dreamed, and their
song was still,

As he climbed the hilly lane.

I saw him next on an autumn eve,
Weary and sad by the moaning
trees;

And he cried and prayed for a short
reprieve,

Of two who were forcing him to his
knees,
Hard Pain and Sorrow, Sorrow
and Pain.

The brook was dark, and the wind was
shrill,

The wind swept down, on the steeper
hill;

While Pain and Sorrow were working
their will

To strike him deep and again.

I saw him last in the winter bare,
The church was near, and its graves
were dank.

He crept along to find refuge there,
Until at the foot of the Cross he
sank—

Scourged, and followed by Sorrow
and Pain.

For Sorrow and Pain they had racked
each bone,

And he prayed for the peace that is
Heaven's own;

Till a light shone down from the Great
White Throne.

And there was no Sorrow nor
Pain.

MONEY ORDERS.

The safe way to send money by mail
is by Dominion Express Money Order.

"Why did you strike the telegraph
operator?" asked the mag'strate of
the man who was summoned for as-
sault. "Well, sir, I gives him a tele-
gram to send to my gal an' he starts
readin' it. So, of course, I ups and
gives him one."

Ask for Minard's and take no other.

Everyone is needed; even a rag doll
is priceless if it fills the heart of a
child.

near us
black, and she gave me
told me to get her one."
and get one? That is not a bath brick
you have there."

"Look here!" said the boy, as he
came closer, and spoke in tones of con-
fidence, "I want to earn that sixpence.
I'm going to take this brick home, and
put it in the bath-tub and make a bath-
brick of it, and to-morrow I will take
it to the lady."

The watchman looked at him in a
puzzled way, and then said:
"Boy, you can have the brick. You
are what they call a genius, and, if
you live many years longer, you will
be a millionaire or in prison."

Minard's Liniment Co., Limited.

Gents—I relieved a valuable hunt-
ing dog of mange with MINARD'S
LINIMENT after several veterinarians
had treated him without doing him
any permanent good.

Yours, &c.,
WILFRID GAGNE.
Prop. of Grand Central Hotel,
Drummondville, Aug. 3, '04.

British Columbia is making plans on
a large scale to kill sea lions and use
their skins as material for shoes: a
project that the fishermen of the
province welcome, because a sea lion
eats on an average of fifty pounds of
fish a day.

ONLY TABLETS MARKED "BAYER" ARE ASPIRIN

Not Aspirin at All without the "Bayer Cross"

The name "Bayer" identifies the
only genuine Aspirin—the Aspirin
prescribed by physicians for over nine-
teen years and now made in Canada.
Always buy an unbroken package
of "Bayer Tablets of Aspirin" which
contains proper directions for Colds,
Headache, Toothache, Earache, Neu-
ralgia, Lumbago, Rheumatism, Migraine,
Sciatica, Joint Pains, and Pain generally.
Tin boxes of 12 tablets cost but
a few cents. Larger "Bayer" packages.

There is only one Aspirin—"Bayer"—You must say "Bayer"
Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Mono-
aceticacidester of salicylicacid. While it is well known that Aspirin means Bayer
manufacture, to assist the public against imitations, the Tablets of Bayer Company
will be stamped with their general trade mark, the "Bayer Cross."

In a few moments you can trans-
form your plain, dull, flat hair. You
can have it abundant, soft, glossy and
full of life. Just get at any drug or
toilet counter a small bottle of "Dan-
derine" for a few cents. Then moisten
a soft cloth with the Danderine and
draw this through your hair taking
one small strand at a time. Instantly,
yes, immediately, you have doubled
the beauty of your hair. It will be a
mass, so soft, lustrous, fluffy, and so
easy to do up. All dust, dirt and ex-
cessive oil is removed.

Let Danderine put more life, color,
vigor and brightness in your hair. This
stimulating tonic will freshen your
scalp, check dandruff and falling hair,
and help your hair to grow long, thick,
strong and beautiful.

Cuticura

For Skins That Itch,
Burn and Scale

Bathe the affected
part with Cuti-
cura Soap and hot
water. Dry gently
and rub on Cuti-
cura Ointment.
This treatment is
usually best on ris-
ing and retiring.
For every purpose
of the toilet, bath
and nursery the
Cuticura Soap
and Ointment are
ideal. The Soap
to cleanse and
purify, the Oint-
ment to soothe
and heal.

Soap 25c, Ointment 25 and 50c. Sold
throughout the Dominion. Canadian Depot:
Lynans, Limited, St. Paul St., Montreal.
Cuticura Soap shaves without muss.

1.00 bot... 2 for 1.01

An accident which may be attested with serious results happened on the St. Marys Road near Stratford, on Sunday evening, when an automobile driven by Valentine Weitzel of Stratford crashed into a buggy containing Mr. and Mrs. Joseph Satchell and daughter, also of Stratford, with the result that Mrs. Satchell now lies in the hospital in a critical condition with a fractured skull, a broken collar bone besides other injuries.

Mr. Satchell escaped with minor injuries and the little girl was not hurt at all. The buggy, however, was badly smashed and the horse ran away. Mr. Weitzel appeared in Police Court on Monday morning charged with driving a car while in an intoxicated condition and also that he did by willful neglect cause injury to Mrs. Satchell. Mr. F. H. Thompson K. C. appeared for the accused and asked for an adjournment till

Friday stating that he had been informed that the steering gear of the car had been defective and wished to investigate. He asked for bail but was not allowed till the condition of the injured showed improvement. Later bail was allowed. Mr. Robert Moore, an occupant of the car, who is being held as a witness, was also granted bail.

In its "Birth" column last week, The Walkerton Telescope ran the slogan, "Boost the town you live in." It was a slip of the make-up man, and yet it was not too bad at that.—Hanover Post.

Two Japs at the opening baseball game stood uncovered during the playing of "How Dry I Am," thinking it was the American national anthem.—Portland Oregonian.

An Italian girl, of the Bronx, New York, helping her mother clean house, shook a rug out of an upper window. Later in the day it was discovered that the mother had hidden in the rug a roll of five thousand dollars, her life savings. Somebody picked it up and walked off with it. And the little girl wanted only to help!

It is estimated that as a result of the storm Saturday afternoon two-thirds of the fruit crop in Niagara section has been ruined. Seven inches of water fell inside of forty minutes. Two storms met here and a cloudburst resulted. A thunderstorm came up from the north-east and the wind veered and brought up a hailstorm from the east. Hailstones as large as walnuts fell, breaking windows and even making holes in wooden roofs.

6.

tween them, it was evident that she regretted it all and was eager enough to get back to their old friendly footing. But Mary met all his advances coldly. It will be time enough, she thought, when he has ordered the vacuum cleaner. And each day she was more unhappy about it all.

And it was her woman friends who made things quite unbearable; she could not go to town or to church or even walk down the road to her father's house without some one stopping her to inquire if the vacuum cleaner had come yet. She began to dread any of her friends, and even avoided her own front yard, lest some one passing would stop and call out an inquiry about it.

One morning Mrs. Dillon stopped in because she was going over to Grandma Anderson's that afternoon and had promised to tell the old lady all about it.

And while she was still there Mrs. Gibson's car stopped in front of the house. She had brought Matilda, she said, to see Mery's vacuum cleaner.

Mary repeated what she was so sick of saying: "It hasn't come yet."

"My goodness!" Mrs. Gibson exclaimed, innocently enough, though to Mary it seemed pure malice. "It must be lost. I never heard of anything so slow."

"If you ordered one in town," Mrs. Dillon volunteered, "you could have it out here just the same day."

"Well, if I were you," Mrs. Gibson advised, "I wouldn't stand it a second longer. I'd write to them and tell them that if they are going to be so slow they needn't send their old thing at all, that you can get one here just as good. You come over and see if you don't like mine."

And as she left she said, "I never in all my born days ever heard of anything so slow. You want to look into it, Mary."

Mary said she would.

At that moment she made up her mind what she would do, for her pride could brook no more inquiries.

When Mrs. Dillon too had gone, she went right upstairs and in her bottom bureau drawer, among the babies' outgrown dresses and a lace shawl which had belonged to her mother, found an old, worn, black purse. It was her butter and egg money, and there was forty dollars and seventy-five cents of it. She was saving the money for little white fur coats and caps for the children.

There was enough of it for the vacuum cleaner and she'd delay no longer.

"May I have the horse to go in town this afternoon?" she asked Ben the next morning.

"Sure," he told her. "I have to go in town myself this afternoon, but I don't know just when I'll be able to get off." He paused for Mary to say she'd wait and they could go together. She did not say it, so he went on. "You take the horse and don't wait for me. I can walk over to Dillon's Siding and take the train in."

"All right," said Mary.

All that morning she was so busy nursing her grievance that she scarcely gave a thought to dinner. She was shocked, therefore, when she came down to the kitchen to find that the beans and potatoes were cooked dry and that the cornbread in the oven was heavy and soggy.

This was worse than having the drop cakes for the missionary circle fail, for never had she placed such a meal before her husband.

But she made no apologies for it, and Ben ate it cheerfully enough. The only sign he gave that he was aware of its shortcomings was when he asked, most amiably, for another piece of cornbread. "I'd like a bit more of that wet sponge, dear," he told her.

Mary hardened her heart. If she were not so pressed for time, she told herself, and had, say, a vacuum cleaner and some things like that to help out with the work, there wouldn't be any spoiled meals. Why? If Ben had complained about the dinner it would have been quite unjust.

Not once did her purpose waver all

out to go to her. She drove home in thoughts.

"How can anyone be dear and lovable when he has had scorched beans and potatoes for dinner and cornbread that is heavy and soggy! And wasn't I a pig about the vacuum cleaner!" she thought remorsefully. "Why couldn't I have been as patient and cheerful about my share of the work as Ben was about his?" she demanded of herself. "And, besides, a harrow is a lot more important than a vacuum cleaner, because you can sweep with a broom and you can't harrow with anything but a harrow."

When she stopped at Janey's to get her children she felt glad to have some one to whom to tell her happy secret. "I bought a harrow," she announced proudly as Janey lifted the little girls into the buggy.

Janey's eyes opened wide. "You got a harrow," she gasped. "Whatever in the world are you talking about?"

"I bought a harrow this afternoon," Mary repeated proudly. "I bought it at Lawson & Smith's. It cost \$40."

"Where did you get the money?" "It's my butter and egg money," Janey's dimples appeared for an instant, and then disappeared again. "Why didn't you get a vacuum cleaner with your money?"

"Because," replied Mary firmly, "I preferred a harrow."

Mary found Ben waiting for her in the front yard. He greeted her as joyfully as if she had been away for months. After he had put the horse away he helped her to get the supper from the pantry shelves and put it on the table. And after supper he went with her to put the babies to bed.

"Do you know what's going to happen to-morrow?" he asked as they came downstairs together.

Mary's first thought was that somehow he had found out about the harrow.

"What do you mean?" she demanded.

"Why, to-morrow's your birthday, girl, did you think I had forgotten it?"

"So," she challenged him tenderly, "that's why you had to go to town to-day, 'cause to-morrow's my birthday!"

He smiled, "because to-morrow's your birthday."

The next morning every time Mary tried to peep furtively out the front door to see if Lawson & Smith's wagon was in sight it seemed to her that Ben was there, too. And when it did finally appear there was Ben beside her watching it. He stood with her in the doorway, his arm across her shoulder, and together they watched its approach.

As it turned into the yard she felt his arm tighten across her shoulder.

"It's bringing your new harrow," she told him softly.

"Harrow nothing," he replied with a joyous laugh. "It's bringing your new vacuum cleaner I have been getting for your birthday."

(The End.)

Minard's Liniment used by Physicians.

It's an awful bore when a man will insist on talking of his ailments when you want to talk of yours.

WANTED

Young women to take the Nurses' Training Course in the Ontario Hospital for the Insane, Toronto. Three years' course in general nursing secures a Graduate Nurse's Diploma from the Provincial Secretary's Department of the Ontario Government.

Wages—First Year: \$25.00 per month, board, uniform, and laundry. Second Year: \$30.00 per month, board, uniform, laundry and high cost of living bonus. Third Year: \$35.00 per month, board, uniform, laundry, and high cost of living bonus.

Write for particulars to the Medical Superintendent, 999 Queen Street West, Toronto.

help, and he owes it to the community at large. The courts would be cleared of a great burden of needless litigation and a vast amount of bitterness would be avoided in families if every man screwed up his resolution and actually made a will.

Despite the fact that grave perils follow the failure to make a will, only about half of the persons who leave property sufficient in extent to justify their making such document actually perform this duty. Of course, those who neglect such a precaution have their estates administered with quite as much regularity as if they had made a will and appointed an executor. But there is always a sad difference. The difference is that in the cases where no will is made the estate seldom if ever passes to the persons in the same proportions as it would if a will had been left. There is always and ever the total absence of the testator's mind back of the distribution of the no-will estate. If you make no will you are neglecting a privilege which no other person in the wide world can perform for you.

A Few Don'ts.

Here are a few terse but loud-pedal Don'ts for laymen willmakers:

1. Don't make your own will; you may not, most likely do not, know how.

2. Don't use a printed will form and don't copy the will of another and make it your own.

3. Don't trust the work of making your will—the most important undertaking of a whole lifetime—to a person not a lawyer.

4. Don't, after the will is executed, make insertions, cross out words or make any such changes. If changes are to be made have a new will or a codicil prepared, and by the same lawyer, if possible, who prepared the original will.

5. Don't put your will under the carpet or in an old trunk in the attic or otherwise hide it after its execution. It is an important document and will be wanted after you are gone. Leave

it in a safe place, and have the key given to some one you trust.

The Japanese are not great meat eaters. Beef is sold in Japan by the ounce, and chickens are minutely dissected and sold by the wing, the leg, or an ounce or two of the breast.

There are many recipes for cakes made with honey. These nearly all call for some sugar, but the amount is usually small.

Honey Cake.—One-half cup of butter, one-half cup of granulated sugar, one-half cup of strained honey, two eggs. Beat these until creamy yellow. Add two cups of flour, one rounding teaspoon of baking powder, one-eighth teaspoon of soda—honey always needs a little soda—sifted together, and one teaspoon of caraway seed. Bake as a loaf cake.

Honey Cakes.—Sift two cups of flour and stir into it a cup of sour cream, two tablespoons of strained honey and two of granulated sugar, a fourth teaspoon of cinnamon and a half teaspoon of ginger. Beat all thoroughly and add an even teaspoon of soda dissolved in two tablespoons of hot water. Beat hard again and drop in gem tins. These are especially good eaten hot.

Honey Gingerbread.—Beat two tablespoons of strained honey into a half cup of butter, first warming the butter slightly. Whip to a cream and then beat in a tablespoon each of powdered sugar and ginger. Have ready four eggs, yolks and whites beaten light separately, and add these alternately to other ingredients. Last of all, add three cups of flour sifted with a heaping teaspoonful of baking powder. Beat vigorously for one minute, then pour into shallow pan or gem tins and bake one-half hour covered. Uncover and brown. Have a steady heat, not too intense.

Dutch Honey Cake.—To one pound of bread dough add one pound strained honey, a quarter-cup of butter, half a teaspoon each of cinnamon, cloves and nutmeg. Work these into the dough and add the grated rind of a lemon, a quarter pound of candied ginger and citron, both shredded, and the yolks of four eggs beaten light, and the whites of two, also beaten, a half teaspoon of soda, dissolved in a little hot water, and one cup of flour. Make into a loaf, and bake covered for forty-five minutes. Then uncover and brown.

Cakes to which sauce or jam is added may be made and syrup substituted for the sugar called for. A larger measure of syrup than the sugar called for is needed, as corn syrup is not so sweet as sugar. Usually a little more flour should be added.

Apple Sauce Cake.—One and one-half cups apple sauce, one and one-half cups syrup, one-half cup butter, three and one-half cups of flour sifted with three teaspoons of baking powder, one-half teaspoon of cloves and nutmeg, and one teaspoon of cinnamon. A cup of raisins may be added.

Blackberry Jam Cake.—One-half cup of butter creamed, two eggs well beaten, one and one-fourth cups of syrup, one cup of blackberry jam—or any jam, three tablespoons of buttermilk, one teaspoon of soda, two cups of flour sifted with one teaspoon of cinnamon and one-half teaspoon of cloves.

"Over and Over."

As Maide followed her sister up to the sewing room her small feet were fairly dancing with excitement.

"O Ellen, are you going to begin my new dresses this afternoon? Will you do the pink one first? Please do the pink one, Ellen. You know I like that best."

Ellen drew the cover from the pile of work cut out and ready for basting. Such a pile of work! The pink ging-

er was the first to be basted. The blue and green were next. The red and white were last.

As fluid fuel grows dearer "canned"

may sometimes be cured with oil. This applies more especially to soft corns. Soak some wadding with the oil, place on the corn before getting into bed, tying a bandage around to keep secure.

Bread Bits.

Ordinary white bread contains 40 per cent. of water.

The "fat" in bread is just 1 per cent. of its total ingredients. The rest is made up of protein (the basis of life), starch, sugar, dextrin, cellulose (indigestible), and mineral matter.

New, moist bread is extremely hard to digest, because it produces no appreciable flow of saliva in the mouth during mastication. A slice of ordinary day-old bread is not digested until it has been in the stomach two and a half hours.

During the process of baking, bread loses a large quantity of its nutriment. Just short of three-quarters of the "fat" is lost, and an inroad is made on the protein, etc.

Wheat can be eaten in its entire state if soaked for a long time in water, then boiled in milk, and sugar added. This is "frumenty."

Real brown bread is made from stone-brown flour, manufactured from the whole grain.

An expert has stated that if this wholemeal bread had been eaten and white bread forbidden, the present national decay of teeth would never have happened.

Flour made from the whole grain has twice the protein and only a third of the water in ordinary "white" flour.

Bread is such an excellent food because but 4½ per cent. of its solids escape absorption by the body.

If milk were drunk with bread practically every crumb would be absorbed in nutriment.

The next fifty years will see an astonishing development of water power for electricity over most of the eastern part of this country. Enormous hydro-electric plants will be built at dam sites established along the rivers, and these, supplemented by steam plants at the mines, will furnish unlimited quantities of the "juice" for manufacturing, transportation and other purposes. Central Canada lacks coal, but has plenty of available water power.

This is no mere dream; it has got to come. As coal (the main cost of which to the user is for transportation) becomes dearer, the demand for a less expensive substitute to furnish power, heat and light will compel resort to electricity. Whole regions will be electrified and the motorists of half a century from now will refer to the gasoline tank of their grandfathers in much the same way as we are accustomed to speak of the dodo.

Solving the Fuel and Power Problems

Automobilists are disgusted and alarmed at the soaring price of motor fuel, but how will they feel when, a few years hence, it costs two or three times as much as now? Supply is not keeping pace with demand, and a continuing rise of the product is inevitable.

The prospect seems to be that electricity will largely take the place of gasoline. With the next quarter of a century we shall see on this continent an immense development of great plants from which power will be widely distributed. Many such plants will be established at the mouths of coal mines. Others, far more numerous, will utilize falling water for the production of electricity. At intervals along all important traffic roads will be charging stations, to reload the storage batteries of auto-vehicles.

The automobile storage battery is steadily gaining ground. Already it is largely used on trucks, being found as convenient and economical as the gasoline engine where travel is not extended over great distances. The electric storage locomotive has proved for certain uses altogether satisfactory, and in the subterranean tunnels of mines the same means of propulsion is to-day widely adopted.

As fluid fuel grows dearer "canned"

power will gain correspondingly in popularity. And another reasonable expectation is that before very long on important traffic roads we shall see the electric trolley taking up a new function. Trucks will be run by trolley; and it is even possible that private vehicles will avail themselves of the same means of propulsion.

The next fifty years will see an astonishing development of water power for electricity over most of the eastern part of this country. Enormous hydro-electric plants will be built at dam sites established along the rivers, and these, supplemented by steam plants at the mines, will furnish unlimited quantities of the "juice" for manufacturing, transportation and other purposes. Central Canada lacks coal, but has plenty of available water power.

This is no mere dream; it has got to come. As coal (the main cost of which to the user is for transportation) becomes dearer, the demand for a less expensive substitute to furnish power, heat and light will compel resort to electricity. Whole regions will be electrified and the motorists of half a century from now will refer to the gasoline tank of their grandfathers in much the same way as we are accustomed to speak of the dodo.

the family. She could not get back to their old friendly footing. It will be time enough, she thought, when he has ordered the vacuum cleaner. And each day she was more unhappy about it all.

And it was her woman friends who made things quite unbearable; she could not go to town or to church or even walk down the road to her father's house without some one stopping her to inquire if the vacuum cleaner had come yet. She began to dread any of her friends, and even avoided her own front yard, lest some one passing would stop and call out an inquiry about it.

One morning Mrs. Dillon stopped in because she was going over to Grandma Anderson's that afternoon and had promised to tell the old lady all about it.

And while she was still there Mrs. Gibson's car stopped in front of the house. She had brought Matilda, she said, to see Mery's vacuum cleaner.

Mary repeated what she was so sick of saying: "It hasn't come yet."

"My goodness!" Mrs. Gibson exclaimed, innocently enough, though to Mary it seemed pure malice. "It must be lost. I never heard of anything so slow."

"If you ordered one in town," Mrs. Dillon volunteered, "you could have it out here just the same day."

the fam-
going that would make new
clothes every spring and fall. She
would not get tired then. It was the
doing things over and over endlessly
and never getting them done. Days
and nights and seedtime and harvests
did themselves.

But how about people? How about
people's selfishness and laziness and
impatience? Did God never get tired
of forgiving people over and over?
Did He never get tired of giving them
fresh days and having them spoil
them?

Ellen's needle slipped from her
fingers, and she sat very still in the
bright little sewing room. Suddenly
she dropped her work and went to the
window. In the yard below was a
grave little figure sitting listlessly in
the swing.

"Maide," Ellen called, "you may
come up now. I've found a lovely piece
that you may use to make Rosie May
a dress."

Buttermilk As a Summer Beverage.

Buttermilk with its fat taken out
and its milk, sugar, minerals and pro-
tein left in, plus its wholesome acidity,
is an ideal drink for bilious folks and
all with intestinal and gastric
troubles.

For very aggravated cases of bil-
iousness let the patient put himself
on a steady diet of buttermilk and
bread and cereals for one week, and
he will be surprised at the result.
Of course, care must be taken not to
take too much even of this plain food.
Fruit should not be eaten at the same
meal with buttermilk.

An appetizing and nutritious way to
prepare buttermilk for table use is to
make buttermilk jelly. Boil one quart
of fresh buttermilk in a granite kettle,
stirring occasionally to avoid curdling
in lumps. Mix in it enough rice flour
(previously moistened) to make a soft
mush. Beat in the yolk of an egg
while hot, two tablespoonfuls of sugar
and pour into molds. Serve cold with
cream. Another variation is to flavor
with lemon and add half a cupful of
chopped almonds instead of the egg.

Buttermilk pie is preferable to the
usual custard pie, being pleasantly
acid and more wholesome. It is pre-
pared the same, substituting butter-
milk for sweet milk and adding to
each cupful a heaping teaspoonful of
cornstarch. One egg to each pie is
sufficient.

Buttermilk, too, is good for the
complexion of womankind, externally
or internally applied. On a hot day
try a glass of half sweet cream and
half buttermilk. It is wholesome and
refreshing—both food and drink for
summer time.

Boiling water and washing soda
will remove the musty odor from a
closed teapot.

The man of intelligence who lacks
moral force remains always a follow-
er; he never becomes a leader, for he
is seldom master of his own conduct.

PLAGUE IN TEXAS
Eight Cases Reported, With Three Deaths.

A despatch from Austin, Texas, says:—Eight cases of bubonic plague have developed and three victims have died to date at Beaumont, Texas, the State Health Officer announced here. At Galveston there have been three cases of plague, with two deaths so far, he added.

The Health Director declared 20 per cent. of all rats killed at Beaumont were infected with bubonic plague, which he considered "a decidedly heavy rate."

Considerable progress is being made in rat extermination campaigns at the Texas ports, he said, but added, that 15,000 more traps were needed at Beaumont, where State and Federal Health forces were being increased.

University to be Opened in Holy City in 1922

A despatch from London says:—The Educational Committee reported at the Zionist Conference that preparations were progressing for the establishment of a Jewish University in Jerusalem, which "must be built up gradually, although a small beginning must be made in the near future." It is expected that it will require several years to complete a building necessary to house the research institutes for physics, chemistry, micro-biology and the Hebrew language, which will be the first efforts of the Educational Committee, and it probably will be opened in 1922.

Canada's immigration tables reveal over 50 nationalities.

Dardanelles to be Forever Open to World Commerce

The Dardanelles is to have a small international force of Allied troops and Constantinople a similar garrison to guarantee free passage to the ships of all nations through the straits and the Sea of Marmora, press despatches state.

Mention of the Dardanelles conjures before our mind the story of a fierce and tragic fight in 1915 and 1916 and a history which trails back into dim mythological times, when Leander swam across its three-quarter-mile width at Abydos every night to tell the "same old story" to Hero, who hung her light out to inform him she wanted to hear it.

Lord Byron, not to be outdone as a swimmer by his amorous predecessor, "did" the Hellespont in 1810. Though it was regarded as rather a prodigious feat when these two accomplished it, many modern athletes could don their trunks and visit their lady loves and regard the effort as a part of their training to keep physically fit.

Xerxes, in 480 B.C., lashed boats together as a bridge, which Herodotus tells us groined for seven days and nights during the unloading of Asiatics on the soil of Europe. Alexander the Great, about 100 years later, tried out the thrill of Xerxes by leading his Macedonians into Asia.

The approach by which tourists enter Constantinople may well be likened to the entrance to a dwelling house—the Dardanelles being the outside or storm door, the Sea of Marmora the

vestibule and the Bosphorus the inner door.

This storm door is commanded by the Dardanelles Castles, built by Mohammed II. in 1470. One fort is on the European side and one on the Asiatic. Many guide-books published before 1914 carried this ominous and prophetic sentence: "The castles on both sides have been lately restored and armed with Krupp guns." According to the treaty of July, 1841, and the Paris peace of 1856, no foreign ship-of-war was allowed to enter the strait without the permission of Turkey and merchant vessels only during the day-time.

On the Asiatic side a short distance from the fort lies the town of Dardanelles, which was named for Dardanus, the mythological ancestor of the Trojan kings, Aeneas, and hence of the Roman people. This city of 15,000 inhabitants, situated prettily on a fertile stretch of land, is the point from which most of the excursionists start for the plains of Troy, a short distance beyond. Here, too, ships must stop to show their papers.

Across on the European side is Gallipoli, or "beautiful town." It was the first European town to be captured by the Turks in 1357. Superbly located on the steep projecting coast of the Gallipoli Peninsula, it commands a view of the Asiatic side—the plains of Troy and the broken hills of Mount Ida. On this narrow peninsula, in April, 1915, Allied forces were landed in an attempt to capture the Dardanelles.

Canada's New Prime Minister

Honorable Arthur Meighen, called by the Governor-General to form a new Cabinet, is a native of Perth County, Ontario. Born at Anderson, on June 16, 1874, he is in his forty-seventh year. He received his education at St. Mary's Collegiate Institute and Toronto University. For some years he practised law at Portage la Prairie, which constituency he now represents in the House of Commons. He was first elected to Parliament in 1908, and two years later moved a resolution to remove the duty on agricultural implements. He was returned at the general elections of 1911 and 1917; appointed Solicitor-General, June 26, 1913; Secretary of State and Minister of Mines, Aug. 28, 1917; Minister of the Interior and Superintendent-General of Indian Affairs, Oct. 2, 1917.

Mr. Meighen is a keen debater. In religion he is a Presbyterian.

Anconagua, Chile, with an altitude of 23,083 feet, is the world's loftiest volcano.

Hail and Snow.

Offspring of a fleeting cloud, Begotten in mid-air, I often wonder why they are So contrary a pair. For Hail is noisy, hard, and cruel, Of desolating power That wounds and strips the tender branch, And mars the beautiful flower— It reveals in a summer's day When warm aerial currents play: While Snow is quiet, soft, and kind, Protecting by its fall The bounteous earth's frail progeny Beneath its shell'ring pall— Its gleaming crystals deck the ground When winter spreads her chills around.

Mrs. Arthur Rogers of Winnipeg, who has the honor of being the first woman to be elected to the legislature in the history of the province of Manitoba.

Canada has 324,886 automobiles, valued at \$320,000,000.

Canada Contributes \$200,000 For Typhus Campaign

A despatch from London says:—The Secretary of the League of Nations intimates that the Canadian Government has decided to contribute \$200,000 to the League's campaign against typhus in Central Europe.

Fewer people would ask advice if they were compelled to take the advice they receive.

Tens of thousands of German helmets that had accumulated at a dump for captured war material in England have been put to use in paving a street. The helmets were laid close together by hand and a tractor was driven over them back and forth until all were firmly imbedded. The result is like a cobblestone pavement.

births recorded in eight weeks in 1920 exceeded those of the same period last year by 1,442.

The births in London in the last few weeks show an enormous excess of baby boys, indicating that nature is restoring the population to its normal male and female constitution.

Premier of Quebec Resigns Office

A despatch from Quebec says:—Sir Lomer Gouin, for fifteen years Premier of Quebec, Thursday afternoon tendered his resignation to the Lieutenant-Governor, Sir Charles Fitzpatrick. His successor will be the Hon. L. A. Tachereau, for many years a member of Sir Lomer Gouin's Cabinet.

Disaster of Poland May Begin New War

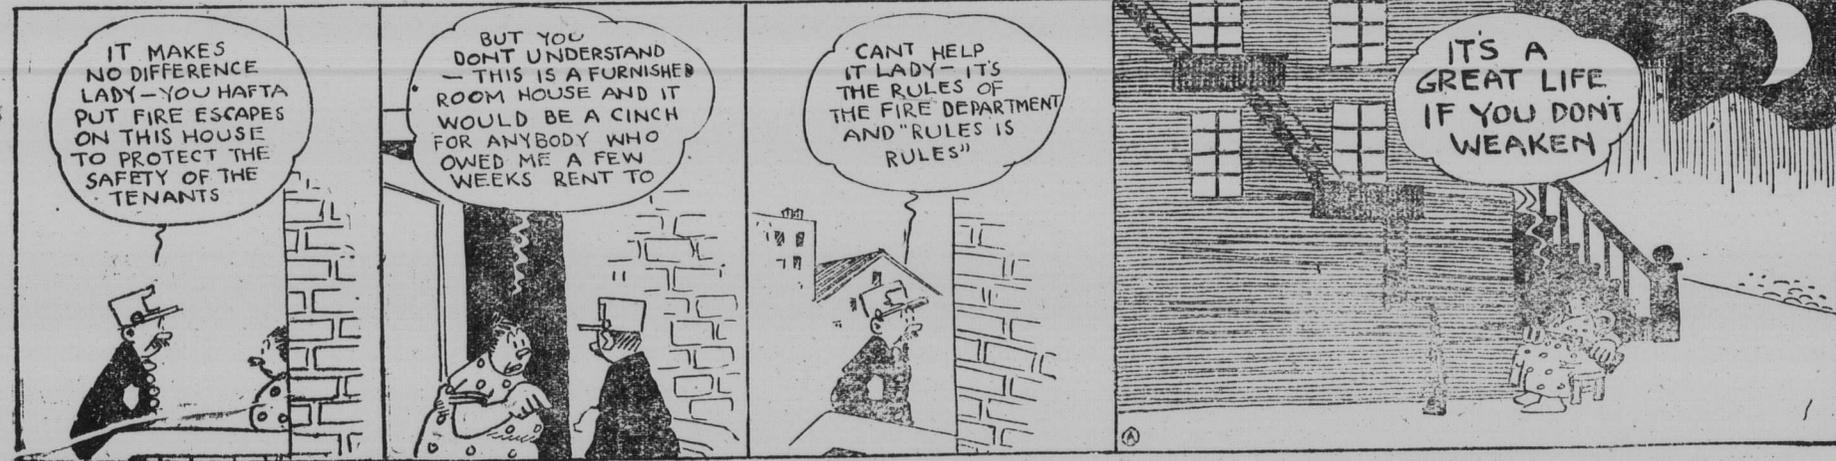

A despatch from London says:—Confidential official military telegrams received from Warsaw on Thursday state that the situation on the Polish front is very critical, and a catastrophe is feared. Copenhagen despatches from the Warsaw press say Poland expects Allied military intervention. In some circles in London the Polish calamity is looked upon as the beginning of a new war.

James M. Cox

miles from Walkerton. Will be sold on
easy terms. Apply to owner, Paul
Hoffarth, on the premises, or R. R. 1,
Carlsruhe.

EVIDENCE

**Of Success of Hacking's
Heart and Nerve Remedy
and Hacking's Kidney
and Liver Pills**

Wm. Fullarton, R. R. 1, Listowel:
"I doctored for eight years for
Stomach Trouble and Pains all
through my body, got no relief until
I used Hacking's Heart and Nerve
Remedy which fixed me up all right.
I used Hacking's Kidney and Liver
Pills along with the Remedy."

Mrs. H. Hinchcliffe, Wingham:
"I was on the point of a complete
Nervous Breakdown, could not sleep
or plan my household duties, suffer-
ed with my Heart and my Nerves
and doctors could do little for me.
After taking the first box of Hack-
ing's Heart and Nerve Remedy I
improved so much in health that I
continued with a 6 box treatment
and am able to return to my work
with renewed vigor."

Mr. Richard Jones, Doon, Ont.:
"I have had Pains under my Heart
for some time and tried all sorts of
remedies and have been to four dif-
ferent doctors and could get no re-
lief. I took one box of Hacking's
Heart and Nerve Remedy and felt
very much better. I took another box
and have been able to work again.
Before I took your remedy I could
not work for weeks at a time, the
pain was so great."

These are only a few of the many
testimonials that come to us volun-
tarily and I am sure that you too
will get beneficial results if you will
but give them a fair trial. Buy them
from your dealer. Insist on Hack-
ing's.

Liesemer & Kalbfleisch

Teach the Children to Save

Habits are acquired early in life. Children, who are taught the value of money and the habit of saving, grow up into good business men and capable women.

The easiest way to teach children to save, is to start a Savings Account for each child (\$1.00 each is sufficient). After a child has saved another dollar to make an additional deposit, he or she will have a better appreciation of just what a dollar stands for, and how much work and self-denial it represents.

Hydro electric lighting rates have been boosted in several of the towns and villages in this section. In Flesherton the rate has been more than doubled, the minimum now being \$1.25 per month. Power rates have also been considerably increased.

Tupper Scott, a farmer living on con of Morris Township, lost two valuable young cattle by the heel-fly. The fly caused the animals to run through the fields in the extreme heat. One dropped dead from exhaustion, and the other fell and broke a leg and had to be destroyed. The animals were valued at \$100 each.

Owing to increased costs of newsprint paper and other factors, the Guelph Daily Mercury has put its price up from \$5 to \$6 in the city, and from \$3 to \$4 by mail. Single copies will sell for 3c instead of 2c.

Miss Sarah Vallad, returned home from Detroit on receiving word of her mother's illness. She arrived in Toronto on Saturday afternoon, too late to catch the Teeswater train, so she hired a taxi to bring her to Teeswater, arriving here early Sunday morning. On the trip the auto had two upsets and two blow-outs, and the single trip cost her sixty-five dollars.—Teeswater News.
