COUNTY OF LEEDS ADVERTISER.

FISHING THAT HAS BEEN

A few years ago Mr. Justus Smith, at present fishery overseer at Charleston Lake, was actively engaged in piloting anglers to the most favored fishing grounds, and was then the most widely known and best carsman on the lake. That his popularity rested upon a solid foundation is shown by the following daily record of catches made by his patrons, which we take from his daily calendar diary for May, 1887:—

Lyn men, 17 salmon. Allan, of Brockville, 42 salmon. Robinson and Gibson, of Brockville,

Jones and Harvey, Brockville, 29

Dave Booth and Baker, Brockville

Gilmore and Leslie, Brockville, 9

Morse and Hardin, Morristown, 7

Bill Jones and Colcock, Brockville,

40 bass, 4 salmon, and 8 pike.

With such catches being made, it

may seem strange that the lake was not depleted of its best flish, but it must be remembered that in those days summer fishing was but little practiced. Dragging around two or three hundred feet of web line weighted

with a pound of lead was not a very pleasant pastime. Since the introduc-

pleasant pastime. Since the introduc-tion of the copper lines summer salmon fishing secures fair catches all through the heated period, so that the present total catch for a year will probably equal the best results obtained in "the good old days."

ood old days."

The wholesale destruction of bass

The wholesale destruction of bass practiced for so many years at Charleston Lake has very noticeably decreased the supply, and only the most conservative treatment of these gamev fish will enable them to make good their loss. Several of our local anglers and New York visitors set a good example in this respect. The fact that reckless, improvident anglers have succeeded in depleting the great Muskoka lakes of bass should be a warning to all interested in Charleston Lake fishing. Our Anglers' Association, now out of business, helped very materially to

business, helped very materially to popularize sportsmanlike methods at Charleston. The salmon and other fish of the lake have well withstood

the drain, and the lake to day probably offers as good all-round sport with the rod as any lake in Eastern Ontario.

A FAIR SUGGESTION

Editor Athens Reporter:

About this time President Beecher, Secretary Field and the able board of directors of Brockville Fair will be intently devising ways and means of ing attractions possible. And they are going to succeed and develop the resources and genius of the society to a

degree never betwee presented to the people of this and adjoining counties.

Leading stockmen, prominent men, intelligent farmers foremost in all lines of rural industry, will be there-men of high merit in many kinds of manufactories will be there—gentlemen and ladies, artists of more than local distinction, and musicians of finest culture, making the halls beautiful and melodious, will be there. A grand stand worthy of the early days of Rome will envelop all in a hazy, dreamy air of luxury an indolence, and we will indulge in the brightest

and we will induse in the originess anticipations of a royal good time.

Last fair, many of the lesser but yery interesting performances were missed by hundreds. A few days after all was over, in many homes it was said "I did not see this or that; I

regret it."
Well, Mr. Editor, if the manage ment will get out a cheap official pro-gramme giving time for and probable location of each event and hand one out with each ticket, it will please everybody. The cost to the society would vanish if Breckville business nen were allowed to advertise on the

Cholera and Diarrhoea Remedy About eighteen months ago, Mr. W. S. Manning, of Albany, N. Y., widely known in trade circles as the representative of the Albany Chemical Co.,

A lady who lived in "the Beatty neighborhood" about forty years ago gives the following as the origin of the name Ballycanoe. A service held by a Methodist preacher at or near Lyn was attended by Mr. Robert Hazelwood. At the close of the service the preacher was invited by Mr. Hozelwood to hold service at his beuse on the following Sabbath. The invita

tion was accepted and as the preache was about to make the announcemen he said "And what is the name of the section in which you live, Mr. Hazelwood?" This was a puzzler, for it had no name; but a bright idea struck the preacher, and he said, "What part of Ireland did you come from?" "Ballycance," was the prompt reply. "Then," said the preacher, "all being well, I will preach at Mr. Hazelwood's, Ballycanoe, on Sunday next." And that

INTERNATIONAL LESSON NO. VI AUGUST 9, 1908.

David and Goliath.—1 Sam. 17: 38-48.

Commentary.—I. David offers to fight Goliath (vs. 32-37). The giant Goliath, who came out as the champion of the Philistines, "belonged to the primitive race of the Anakim, of which the Israelites had found a small remnant at the time of the 'conquest', 400 years before (Num. Xiil. 32, 38; Josh. Xiv. 12). These, driven out by the Israelites, attached themselves to the Philistines; and Goliath appears to have been one of a family of giants, all of whom were slain by David and his men (II. Sam. Xxi. 15-22). Goliath's height has been variously estimated at from hine to eleven feet. His armour is estimated to have weighed about 157 pounds; David and Goliath.-1 Sam. 17: 38-49.

feet. His armour is estimated to have weighed about 157 pounds; while the head of his sphere weighed about nineteen pounds. None of Saul's soldiers dared to fight with him, for no one could overcome him with the ordinary weapons of war. But just at this point David appeared on the scene, and, much to the astonishment of Saul, offered to champion the cause of Israel and go out and meet the Philistine. At first Saul hesitated, but David soon convinced the king that

will exhibit his great strength in pulling him into pieces. Then said David—There was no mistake about their coming together. It was intended David spoke with as much assurance as did Goliath, and felt no shame hecause of the contrast between their authority. Hast defied—David trusted in the God whom Goliath defied, and relied upon Him as safely as Goliath did upon his his sword and seear and physical power.

SISYPHUS A MODEL?

In the pleasant days of antiquity, when people were content to take life tranquilly and worshipped a race of gods and goddesses as easy-going as themselves, a certain discontented mortal, Sisynius by name, lealous of his papa-in-law, Atlas, supporter of the universe started out to achieve a reputation for himself-as financier and founder of enterprises. He, however, quickly got into trouble, being both rapacious and avid, so was promptly ordered off to Hades for his sins. To be energetic and grasping was then the errest way to exasperate public opinion, for it was an epoch when all reasonable people and even the gods themselves asked for nothing better than to sit in the shade and be comfortable.

In order to make his punishment co-ordinate this culprity crimes he

In order to make his punishment co-ordinate this culprit's crime he was condemned for all eternity to shoulder a rock up a mountain side, only to see it go bounding down into the valley again as soon as he had got it laboriously to the top.

This story and that of the hungry wight who was always being tempted by good cheer just out of reach crop up continually in the writings of that day, both tales being amusingly illustrative of the Greek spirit and an age when to enjoy a cultivated leisure was considered as about the summum bonum of existence.

Fancy the amazement of those attic peoples (who, between our selves, may not have been so very far wrong in their view of life) had they been told that a race would one day spring up, quite as civilized as themselves and bossessing far greater opportunities for cultivation and enjoyment, every member of which, rich as well as poor, would look upon weary Sisyphus task as the one reasonable and commendable occupation for a gentleman. Yet this view is almost universal in our land to-day, where an all-pervading rustle of bank notes differentlems in over land to-day, where an all-pervading rustle of bank notes differentlems in our land to-day, where an all-pervading rustle of bank notes differentlems in over held up as a model of industry and application. industry and application. Parents urge their offspring to waste no time in preliminaries, but knuckle down as early as possible to the thief problem of to-day, the rolling of stones uphill, or, to put the idea minus the metaphor, the endless and almiess piling up of treasure, nor for any enjoyment the store may bring its possessor (that is a minor consideration), but simply for the sake of accumulation.—Century.

Valuable Relic Which Has Bee Handed Down Through Generation

Ed. M. Gels, of Salina, is the possessor of what is thought to be one of the oldest Catholic Bibles in existence. The book bears the date of "Cologne, Germany, 1564," and it has been the pride of each succeeding Gels family for generations past. Mr. Gels became the owner of this interesting relic at the death of his lather, W. R. Gels, a few years ago. The Bible has been the property of the late W. R. Gels since 1864. The book is well preserved, considering its age. It is printed in large ornamental type, in two colors, red and black, and from its appearance the book compares favorably with the printing art of today, and one could hardly, believe that it was printed only 72 years after the discovery of America. It is 91-2 inches wide, 14-2 inches in the Old Testament and 155 sheets in the Old Testament and 155 sheets in the New Instead of each page being numbered, each sheet is numbered in large Roman letters, in some cases the numbers occupy almost half of the top line of the page. Therefore, in the manner in which books are numbered nowadays, instead of naving 714 sheets, it contains 1,428 pages. The illustrations are wood engravings and the handly work is almost equal to the art of the present day. Ed. M. Gels. of Salina, is the pos

Accompanying the book is a his tory of the Bible, which was writ tory of the Bible, which was writ-ten years ago. The book was trans-lated into German by Dr. Johann Dietenberger, and was published by the heirs of Johann Quentels and Gerwinns Calenius, at Cologne, Ger-many, in 1564. It was copyrighted by the Emperor Ferdinand, dated at his Imperial palace at Pressburg, Feb. 13, 1564. Ed. Gels grandfather brought the hook to America, from Feb. 13, 1564. Ed. Geisr grandfather brought the book to America from Ascheffenburg, Germany, in 1841. It was for 23 years at Geistowa, Pa, and for seven years at Johnstown, Pa, At the death of John Geis he whiled it to his son, W. R. Geis, with a request that it always be the property of the oldest male member of each succeeding family. Mr. Geis hought the book to Kansas thirty years ago, and at his death it became the property of his oldest son, Ed. M. Geis.

This interesting book is bound in bearskin, and has at times been repaired, which was made necessary bearskin, and has at times been repaired, which was made necessary on account of its age. This book is 35 years older than the Bible owned by Mr. Hanna, of Monroe, La, which was thought to be the oldest one in existence. A short time ago Mr. Geis received a request that the book be sent to Johnstown, Pa., to be exhibited at the 100th anniversary of that city, but he refuses to let the book go out of the house, where it is kept in a large steel safe, bought especially for that purpose.—Kansas City Journal.

A stone could be hurled with a velocity that would make it as fatal as a rifle ball. It was a very common weapon in David's time. here stands as the representative of the army of the living God (v 26). It is not to be a test of military, skill or power, it is not a personal matter between David and Golith, but an issue between heathenism and the true God. The Glant cursed David by his god, but David said, "I came to thee in the name of the Lord of hosts, whom thou hast defied."

In refusing to fight in Saul's armor, David shows us that we will do better to work in the way and manner to which we are accustomed, and not try to be anybody but ourselves. It will be better for us to resist our natural tendency to imitate, and thus preserve our originality and individuality. What a great contrast there is between the youthful stripling, as he hastens out to meet the foe, and the mighty warrior who comes to meet him, accompanied by his armorbearer. Vain self-confidence pitted against simple trust in God. "This day will the Lord deliver thee into mine hands." David is speaking and acting under inspiration. The Lord will again show that He can take the weak things to confound the mighty. Greater victories have been won by the simplest and most humble means of God's own choosing, than by the most skilful efforts of man; instances, the fall of Jericho, the defeat of the Midianites by Gideon and the defeat of the army of Sennacherib (II. Kings xix, 35), etc.

The victory is complete, the one unprotected spot is found by the divinely guided stone, and like a forest oak the great glant falls crashing to the ground. His threats and curses recoil upon himself, his own sword cuts off his head. Tarror scizes the Philistines, while the camp of Israel rings with shouts of victory! There is a perfect rout; not only are many of the enemy slain, but their tents become a spoil for the Israelites. How often the courageous act of one has inspired a multitude to heroic deeds. We should look for victory, through God's help, even in the most trying circumstances.

A TALE OF WOMAN'S LOVE AND WOMAN'S PERFIDY

Even when the old doctor raised his head and exclaimed gravely, "Good Lord! Looks like murder!" the inspector did not move his eyes from the marquis. "By his own hand, sir?" murmured the inspector, without eyes from the marquis.

It was Davie who related the findign of the body; the inspector did not contribute a word. He had got the lantern in his hand by this time, and kept its light playing over the marquis' figure.

Cholera infantum is one of the most dreaded diseases of infancy. It is prevalent during the heat of sum-mor in spite of all the care mothers may take to guard against it, and It sometimes progresses so quickly that death occurs in a few hours no matter what earl is given the child.
The first thing to do is to stop feeding the child and give him plenty of fresh air and pure water to driak.

"I'll take the lantern," he said, and he kept its glare on the marquis during their passage from the keeper's cottage to the Castle.

The marquis opened the library window and stepped in, and the in-

window and stepped in, and the inspector followed him.

The marquis sank into the chair in front of the table, and passed his hand across his brow. Inspector Saunders glanced round the room with the comprehensive sweep of a man accustmoed to dealing promptly with details, and his eyes rested for a moment on the dress-coat lying on the chrit, on which the lying on the chair, on which the

The man inclined his head respectfully, but his eyes were as sharp as

"Would your lordship have any ob jection to telling me where and how you met him?"

The marquis looked at him, not with the resentment which might have been expected, but with a steady, thoughtful intentness.

"I met him first——" He stopped. The inspector looked at him sharply, and then down at the carpet. "I need not say, my lord, that you are not obliged to answer my questions," he said in a low voice.

"I see no reason why I should not," said the marquis, not haught-lly as might have been expected, but quietly, deliberately.

The marquis looked down.

"He was not alone," he said. 'He was with a lady. It is not necessary that I should mention her name; she can have no possible connection with this case."

"Just so, my lord," assented Saunders. "There is no need to mention any name that is not wanted. Nobody, at least of all a lady, likes to be mixed up with this kind of business. Was Captain Sherwin a friend, as I might say, of yours, my lord?"

The question was a skilful one.

The question was a skilful one, and put in the most innocent and natural of tones; and the sharp, small eyes of the London policeman saw the marquis' lips com-

press.
"I cannot say Captain Sherwin was a friend of mine," he said, after a scarcely perceptible pause. "I have told you I only met him twice."

"Just so, my lord," assented Saunders. "But of course, you were on the best of terms with him?"

"Thank you, my lord," said the inspector very respectfully indeed. "Th much obliged to your lordship for the information, you have given me." He took up his hat, his 'eyes wandering round the room. "I shall ride over to Porlington, and wake up the people at the station so that I may wire to Scotiand Yard. I'm hoping they'll trust the case to me, my lord. It's raining still," he said, as he stepped to the window. "Raining as hard as when we were out. I'm afraid your coat's wet, my lord, and I've kept you with my questions, from changing it. There's a coat on that chair there, my lord," he went across the room and took up the dress coat, and approached the marquis. "And this feels damp too, my lord," he said, passing his hand over it swiftly. The marquis looked on as if he quite understood the man's movements, but did not reset them. Suddenly something fell to the as if he quite understood the man's movements, but did not resent them. Suddenly something fell to the ground, apparently from the pocket of the dress coat. Saunders picked it up, not quickly, but quietly. "Beg your pardon, my lord." he said, with the deepest respect. "I'm afraid I've dropped this out of your pocket."

signation.
"You may continue your search,"
he said, with quiet dignity and significance.
Saunders started, for the first time, then he looked at the marquis, and then at the rose and lily dag-

ger. "What am I to do, my lord?" he "What am I to do, my lord?" he said in a low voice, as if he were appealing to the marquis' sense of justice. "I must do my duty. If I didn't do it, someone else would be sent down from London who would." "Go on," said the marquis grimly. 'Ask what you please." "I may, my lord? The marquis remained silent. There was no sign of fear in his eyes, none of the cheap bravado which the criminal often assumes at this critical time; he simply sat silent and thoughtful, as if he were still weighing the problem which had haunted and perplexed him since he saw the red spots on Elaine's sleeve.

Saunders' face became pale.

"You are right not to answer, my lord. I shouldn't have asked, only I thought you would have been able to explain at once, and keep me, off a wrong scent. "What is this, my lord?" he asked, looking at the dagger.

dagger.
The marquis took it and touched the spring, and Saunders started as the venomous blade shot out like a

serpent's tongue.

"It's a dagger!" he said. "It's the thing that did it! The blade is the same width—I measured the wound! I find this in your pocket— you admit being in the grounds at the time of the saurder. Good God, my lord, what am J to do?" and he stood breathing hard and his eyesfixed on the marquis, a man torn hetween duty and inclination.

The marquis raised his head.

"Do your duty," he said quietly.

CHAPTER XXVI.

"Do your duty!"
The words were so quietly, so calmly spoken, that Saunders could only stare with perplexity and troubled uncertainty. For a moment it seemed to the astute inspector as if it were simply impossible that this calm, quiet gentleman could be guilty; then he glanced at the coat, at the dagger, at the red spots on the shirt front and wristband and doubt and uncertainty fell on him again.

doubt and uncertainty fell on him again.

The marquis stretched out his hand and took a cigarette, lit it, and smoked, but not with an air of bravado, by any means.

After finishing his cigarette, which had the effect of clearing his brain, the marquis went to Luigi's room, and found the blind man still up, seated in a chair.

He slowly told the tale of the events of the night—the discovery of the body of Captain Sherwin, the visit of the inspector to the Castle, the dropping of the dagger from his coat, the suspicions of the officer, etc. He also described, how he, the marquis, had found the dagger in the shrubbery.

Here Luigi interrupted the marquis with the appai ing information that he knew that the dagger a few hours previous had been in Elaine's hand.

Care of Pupples. Pupples after weaning will keep strong and healthy and will grow fast if fed only on fresh buttermilk and corn bread, with soup instead of the buttermilk twice a week, till they are five or six months old. Do not feed sweet milk. Keep the pupples where they can get plenty of exercise Do not crowd them. Arrange their kennels so that they can go in and out of their sleeping quarters. If fed in the same vessels, some dogs get more than their fair share of food and lose their manners also. Fasten a number of chains where they eat at such distances that no one can reach the other; then feed in individual pans. Give little medicine and plenty of exercise and you will then have strong, healthy dogs. An hour's run every day in the year in the fields and woods, weather permitting, is essential to good health.

Suffering Sours the Temper. "In all my experience as a physician," said Dr. S. Weir Mitchell, the merve specialist, in a lecture, "I have not seen more than a dozen men or women who have been improved mor-ally by long continued suffering. Acute Miness and illness which brings the patient close to death often has a benecial effect upon the disposition, but I cannot agree with the assertion which we frequently hear made in the pulpit that suffering is usually the means of refining. I have seen a few isolated cases in which this was so, but it is not the rule by any means. The chronic in valid is almost invariably selfish and peevish, and it is a hard task to find a nurse who can stand the strain of such a service."

King Was Deeply Touched by Visit to the Emerald Isle.

Majesty Was Wildly Choored, the Streets of the City Being Brightly Decerated and Filled With Jubilant

Cork, Ireland, Aug. 3.—The firing of royal salutes and eathusiastic cheering welcomed King Edward, Queen Alexandra and the royal party on their arrival at Cork Saturday, morning on board the royal yacht Victoria and Albert from Berehaven. The port was bright with bunting, the town was well decorated and the streets were filled with jubilant sight-seers.

The Lord Mayor and corporation of Cork welcomed the visitors when they landed. Their Majesties drove through the decorated streets, which were lined with troops and blue jackets, to the race course, where the King presented colors to two Irish regiments.

During the afternoon Their Majes-ties visited the exposition. Addresses were presented by several local bod-ies, to which the King jointly re-plied, expressing his great interest in the welfare of Ireland.

"I desire on leaving Ireland to ex-press to my Irish people how deeply I have been touched by the kindness and good will they have shown to the Queen and myself. Our experience on previous visits had indeed prepared us for a traditional welcome of a warm-hearted race, but our expectations have been exceeded. Wherever warm-hearted race, but our expectations have been exceeded. Wherever we have gone, in town or country, tokens of loyalty and affection, profered by every section of the community have made an enduring impression upon our hearts. For a country so attractive and a people so gifted, we cherish the warmest regard, and it is expected, therefore, with supreme satisfaction, that I have so often during our stay, heard the hope expressed that a brighter day is dawning upon Ireland. Ottawa, July 27,—The bills incorporating the Alliance Bank of Canada and the Citizens' Bank of Canada were read a third time in the House to-day. After a five hours' discussion of points of order and the merits of the bill to incorporate the Brockville and Sault Ste. Marie Railway, the preamble was passed on a vote of 41 to 35. On motion for the third reading of the bill it was declared carried by 54 to 35. On the third reading of the Canadian Telegraph Company's bill, Mr. Clarke moved the insertion of a clause compelling the company to forward the messages of other telephone companies, but it was lost and the bill was passed. The House adjourned.

Ottawa, July 28.—Mr. Fitzpatrick's bill to amend the Criminal Code occupied the attention of the House for a long time in Committee to-day, after which, in Committee of Supply, the supplementary estimates of the Railway Department were passed. of the Agricultural Department were
passed after a debate in which every
phase of the operations of the department from cold-storage to chicken-raising and fattening was discussed.

Ottawa, July 30.—In the House to-day, in a speech of two and a haif hours' duration, Sir Wiffrid Laurier communicated the details of the Government's Grand Trunk Pacific Railway scheme. These occupy five newspaper columns, while his speech was more than double that length. The road will be in two sections, the Eastern from Moncton to Winnipeg, which will be built by the Government and leased to the Grand Trunk Pacific Co. for fifty years, 47 Government and leased to the Grand Trunk Pacific Co. for fifty years, 47 of which they will pay 3 per cent. per annum on the amount of the cost of construction; and the western section from Winnipeg to the Pacific Coast, the Government guaranteeing the bonds to the extent of 75 per cent. and the Grand Trunk Company guaranteeing the remaining 25 per cent. The House adjourned after short criticisms by Messrs. Borden and Haggart. and Haggart.

Ottawa, July 31. - The House quorum was barely maintained to-day, but the members passed over one million dollars of the estimates. A motion to strike out the salary of Mr. Joseph Haycock, inspector of binder twine, was discussed at great length, and with much good-natured banter, but the item stands. The Grand Trunk Pacific private bill will likely be taken up on Monday.

All of the neighbons were interested in the coming event, and a number of them were pledged "to help out on chairs and china." Patience Saybin, familiarly known as "Patty." and her brother lived only a mile from Elm Dale, but they had not been asked to contribute, and Petty felt slighted.

"I've offered to lend them everything on the place—even you, John," she said to her brother, "but Mrs. Hammond says they have all the arrangements made. I did want a finger in the pla."

John laughed. "Never mind, little girl," he said, consolingly, "Mr. Hammond says they may ask us to 'sleep' one or two, if the old house won't hold them all."

The day before the celebration Mrs. Hammond drove over in the morning to see Patty. "I thought we could stow 'em all away," she said, with a smile, "but I was thinking Mary had four chidren, 'stead of five! I don't see how I came to forget little David when I counted noses. I've been wondering, dear, if you'd let him sleep

she patty nodded and smiled again.

After all, this Bavid had pleasant party in the like the little fellow's. "I am glad that you came," she said, hospitably. "My brother and I are often lonely, and John will be delighted to entertain someone of his own age. I hear him coming now," and she rose and went to the door to meet him. "John," David heard her say. "Mr. Terrell," the answer came, "Mr. Terrell is here."
"Mr. Terrell," the answer came, "and who is he, Patty?"
"Hash! He'll hear us; it is little David. Don't laugh so loud, John to the slipped her hand into his and led him to the sitting-room, and in a few minutes the three young people were on the short road to friendship.

Late in the evening they adjourned to the dining-room for a little hunch. Patty had forgotten the high chain and its accompaniments, and it was with a feeling of dismay that she saw thair visitor's eyes traveling in that direction.

Patty bent eagerly over the photograph. A pleasant little face smiled at her from the cardboard — the round, dimpled face of a five-yearround, dimpled face of a old. "He's a perfect cherub,"

"I'm expecting most of my children this evening, and, if his folks come I'll send him over before bed-

ther."

John stared at her in amazement, His face grew crimson with suppressed mirth when Mr. Terrell said, "How old is your little brother?"

"Twenty-seven," Patty answered, demurely, and John exploded with laughter. "No good pretending, Patty" he cried, "better show him all of my old possessions, including the trundle bed, but we'll not ask him to occupy it."

The morning of the golden wedding dawned clear and bright. It was a day filled with happiness for all who gathered at the old home. At 10 that night David Terrell gave John and Patty full account of the gathering of the clans," as he called it. In conclusion, he said, "I shall have to ask you to keep me another night, but after that there will be room for me at Elm Dale."

"I thought you said you must go to-morrow?" "soin exclaimed. The dear old lady forgot to tell Patty that the picture of David was taken 23 years before.

All that day Patty was very busy preparing "little David's room." An old high chair and trundle bed were brought down from the attic and dusted. Lizzie, the good-natured girl in the kitchen, made some little round cakes, and Patty frosted them and put a pink "D" on the top of two or three. When evening came everything was in readiness for the expected guest. The tin waiter and two or three. When evening came everything was in readiness for the expected guest. Patry's face flushed. "You know I didn't mean—" she began.

He interrupted her anxiously. "But you will take me, dear—on trial—for the sake of little David?"

She smiled into the honest eyes, so like those of the child in the picture. "Yes," she said, "for the sake of little Eavkl's successor." me, I believe?"

Bristol P. O. Quebec, Aug. 8.—
(Special)—Reuben Draper, well known here, tells a story of his cure of a bad case of gravel that would be considered miraculous if similar cures by Dodd's Kidney Pills were not being reported almost daily.

"About three years ago," says Mr. Draper, "I was taken ill with what I thought was gravel. I was suffering great pain, and the doctor I sent for gave me but little relief. Another doctor I tried falled to cure me, and I was getting weaker all the time.

"Then a man advised me to try Dodd's Kidney Pills, as they had cured his mother, and I did so. In just one week after I started using them, I passed a stone as large as a small bean, and in four days after I passed another about the size of a grain of barley. Your most delightful acquaint ance is the man who grows on yo You know people in plenty who do not gain in your appreciation; every time you meet them they seem more shallow and more petty than before. Indeed, there are times when your discoveries of inner character your discoveries of inner character within the circle of your associations run so much to the revelation of pairtiness that you feel in danger of being compelled to discount all human nature as a deceiving sham. But the man who grows on you saves you from cynicism. Every day you are finding in him some factor of manhood that you had not expected; every day he proves in a onw test to have resources of strength upon which you have not counted in your estimate of him.

Cock and Bull Story. Regarding the origin of this phrase Brewer, in his 'Dictionary of Phrase and Fable,' says that it is a cor-

and Fable,' says that it is a corruption of a 'concocted and bully story.' The catchpennys hawked about the streets are still called 'cocks'—that is, concocted things. Bully is the Dutch 'bullen' (exaggerated), as in bullfrog.

Another etymology may be suggested: The idol Nergal was the most common idol of the ancient Phoenicians, Indians, and Persians, and Nergal means a 'dunghill cock.' The Egyptian 'bull' is equally notorious under the name of Osiris. 'A cock-and-bull' story may therefore mean a 'myth,' in reference to the mythological fables of Nergal and Osiris. A third suggestion refers to 'fables,' where dumb animals are made to speak and act like human beings. The French equivalents are 'faire un coq a l'ane,' and un coute de ma mere l'ole, (a mother goose tale).—Reply to 'Sawed Off.'

Blackmore, was the subject of khaki as the fighting color of the British army: The color will for ever be associated with the Boer war, for no British troops are likely to wear it in, a future campaign. For peace and parade purposes the British army will continue to be dressed as before, and for spectacular purposes there is nothing finer than red and gold colors, which predominates in the British uniforms. When engaged in field manoeuvres or in actual campaigns the troops will wear a bluish grey dress dress—a color which is well known in Scotland as Atholl grey. It is a favorite color with the King, and he has had a large share in securing its adoption for the army. It will take some time before the whole army can be provided with the new working uniform.

GHINESE MURDER MYSTERY

Sack Chum Bribed to Pay

the Penalty.

IS AH CHEE THE MURDERER?

Wancouver, Aug. 3.—The murder mystery of trow's Bar is slowly solving itself, apparently, and in such a wa, as to illustrate afresh how far is the east from the west.

Briefly the Crow's Bar murder was a sortid deed of covetousness and crucity. Ah Chee, Sack Chum, Ah

oun and Gum Tai, occupied the same cabin at Crow's, on the Fraser, and all were employed in washing over the abandoned placers for gold. Ah Chee, report said, had several thousand. He himself admitted that his gold-winning ambition was satisfied and he prepared to forsake the Fraser for his home in Cathay. It was

ser for his home in Cathay. It was virtually on the eve of his departure for the coast, homeward bound, that be disappeared, as also did his gold.

The first intimation of anything amiss came through Ah Gun and Gum Tai, who appeared one morning at the home of Thomas Darby, five miles from Crow's Bar, and, through

Darby's cook, announced that Sack Chum had killed An Chee with a heavy hammer, for his store of gold ostensibly, and had dragged the body to the riverside and there disposed of it.

Constable McMillan, investigating,

found Sack Cnum waiting calmly at scabin, and when he arrested that worthy he received an unqualified

admission that the deed had been loneas stated. Then Superintendent

Hussey appeared on the scene. Pend-ang inquiries he ordered Ah Gun and

cumstance that Sack Chum is an emaciated old man of perhaps less than 90 pounds, sick and weak, and Ah Chee weighed upwards of 200 pounds, suggested that it was a physical impossibility for him atone to have disposed of the body as altaged, and examination failed to show any signs of a body being dragged although one might have dragged although one might have processed. Ah Gun and Gum Tai adhered to the story that they awakshered to the story that the story that the men will act as escorts for the girls employed in the factory. REV. EARL SUSPENDED

Cornwall, July 31.—The trial court of the Methodist Church, Montreal Conference, which was appointed to deal with the charges brought against the Rev. D. Earle of Bedford, but formerly of Delta, Ont., has now completed its labors. It was held that violation of the marriage contract was sustained, inasmuch as the foregoing was sufficient to give reasonable cause of jealously to Mrs. Earle. The charges of hugging and kissing the young lady and being party to the persecution of Mrs. Earle, on a charge of improper conduct in the Indian

ivorce, were not sustained. Rev. D. Earle's case will be dis posed of finally at the next meeting conference and in the meantime he h been suspended from the ministry

Aching Joints

In the fingers, toes, arms, and other parts of the body, are joints that are inflamed and swollen by rheumatism that acid condition of the blood which affects the muscles also.

Sufferers dread to move, esp after sitting or lying long, and their condition is commonly worse in wet

weather.
