THAT OIL SPRINGS TRAGEDY

Joseph Clark Died From a Wound Alleged to Have Been Inflicted by His Brother James.

THE TWO HAD BEEN DRINKING

Got Into a Quarrel in the House and it is Said James Kicked Joseph Fatally.

Oil Springs, Ont., Oct. 11.—Joseph Clark met his death here yesterday by violence, supposed to have been inflicted by his brother James. The two brothers lived on a farm on the 4th concession of Etnak, about three miles north of Oil Springs, together with the dead man's wife and family.

They went to Petrolia on Thursday with grain, returning home in the evening, the women of the house. A dispute in the house led to a fight, and it was during this that the elder brother, James, is alleged to have kicked Joseph in the abdomen, causing internal injuries that resulted fatally. Dr. Chalmers was called and pronounced the case hopeless, and Clark died at 3 o'clock yesterday afternoon. Dr. Chalmers refused to issue the regular death certificate. Coroner, Matt of Petrolia, arrived and issued a warrant for an inquest.

**James Clark's Story of It.**  
When James Clark said that he and his brother took a load of grain to Petrolia Thursday, and returning home late in the afternoon stopped at Far's hotel to procure a flask of whiskey, from which they took an occasional drink. They arrived home about 8 o'clock. After supper they began quarrelling. Then James called Joseph a liar and the two men clenched, and then James left the house for over an hour; when he came back Joseph had gone to bed, and was moaning, but James says he thought this was a mere indisposition. Later, James Clark came to Oil Springs last night for the purpose of giving himself up to the police. He was met by Marshall, and as there was no authority for taking him into custody he was not detained and returned home. The Clark brothers have been in the 4th line for about four years. Joseph, the deceased, was of years of age, and leaves a wife and four small children. James is a bachelor, aged 35 years.

**An Open Verdict.**  
An inquest was held this afternoon, and the verdict rendered virtually means "killed from some unknown cause."

GETTING THE MEN IN LINE

T. E. Kenny, ex-M.P., Will Be R. L. Borden's Running Mate in Halifax.

R. A. PRINGLE FOR CORNWALL

Alex. Gibson Nominated by Liberals for York, N.B.—Strong Conservative Candidate in West Bruce.

Halifax, Oct. 11.—A mass meeting of Conservatives was held in the Empire Theatre tonight. The meeting was large and enthusiastic. Striding addresses on political issues of the day were delivered by G. E. Foster and R. L. Borden.

**Conservative Convention.**  
The Conservatives of this county met in convention here this afternoon, and unanimously nominated R. L. Borden, the present member, and Thomas E. Kenny, ex-M.P., as the candidates at the coming federal elections. The convention was large. R. L. Borden has accepted the nomination. Mr. Kenny is now in Montreal, but before he went away he said if he was unanimously nominated he would accept.

**Cornwall to Be Redeemed.**  
Cornwall, Ont., Oct. 11.—The Liberal-Conservative Association of the County of Stormont met at Newington today to select a candidate to represent the riding of Stormont and Cornwall. The meeting was a large one and representative, and was marked by the greatest enthusiasm, showing that the Conservatives are thoroughly organized and that perfect harmony prevails in their ranks. There was only one name placed before the convention, that of Mr. R. A. Pringle of the law firm of Letich, Pringle & Cameron of Cornwall. Mr. Pringle accepted the nomination in a forcible speech, which made a marked impression on the assembly. The Conservatives are confident of regaining the riding, which was so long represented by the late Dr. Bergh.

**Gibson is Now in the Field.**  
Fredericton, Oct. 11.—A convention of York County Liberals this afternoon nominated Alex. Gibson, M.L.A., as candidate for the Dominion House. Gibson accepted the nomination. Mr. Gibson, M.L.A., will likely be named as Conservative candidate.

**Strong Man in West Bruce.**  
Kincardine, Ont., Oct. 11.—A convention held here today was probably the largest Conservative gathering ever held in the town, upwards of 200 men being present. The following gentlemen were nominated: Mr. John G. Macdonald, M.P., for the riding of South Bruce; Mr. J. H. Macdonald, M.P., for the riding of North Bruce; Mr. J. H. Macdonald, M.P., for the riding of West Bruce; Mr. J. H. Macdonald, M.P., for the riding of East Bruce.

**Farmer John Again Nominated.**  
Brudenell, Ont., Oct. 11.—At a Liberal convention for the purpose of selecting a candidate to contest South Huron at the coming election was held here today, and a very large crowd attended. Mr. John McMillan was again chosen to contest the riding, being made the unanimous choice of the convention. Mr. McMillan accepted and heartily thanked the delegates for again making him their choice.

**Hon. L. O. Tallon in Bagot.**  
St. Catharines, Oct. 11.—At a Conservative meeting held here today Hon. L. O. Tallon, M.P., was the guest of the evening. He delivered a very able and interesting address.

**South Renfrew Liberals.**  
Renfrew, Ont., Oct. 11.—The Liberal convention of South Renfrew was held here today and was represented by a large number of delegates. Mr. J. H. Macdonald, M.P., was the guest of the evening. He delivered a very able and interesting address.

**Pontiac Liberals Choose Murray.**  
Shawville, Ont., Oct. 11.—The Liberal convention of Pontiac was held here today and was represented by a large number of delegates. Mr. J. H. Macdonald, M.P., was the guest of the evening. He delivered a very able and interesting address.

**An Englishman Killed.**  
Schenebrey, N.Y., Oct. 11.—Henry Ruston, an Englishman, who lives in this city, was killed by a threshing machine while working near Petrolia, Ont.

\$5000 REWARD IS OFFERED FOR WILLIAM SCHREIBER'S ARREST

Young Man, a Bank Clerk, Earning \$16 a Week. Steals \$106,000 From the Elizabethport Bank—A Woman in the Case.

**The Defaulter.**  
New York, Oct. 11.—The Board of Directors of the Elizabethport Banking Company held a meeting today in the bank building to take action on the defection of William Schreiber, their missing clerk. The expert accounting showed that the shortage was \$106,716.

The bank has instructed a lawyer to bring an action to-day against "Mrs. Hart" for the recovery of the \$23,000 worth of jewelry, \$3000 worth of horses and carriages, and several thousand dollars worth of furniture, paintings and bric-a-brac now in her possession.

**The Story.**  
The Elizabethport Banking Company has offered \$5000 reward for the arrest of William Schreiber, the truly remarkable young clerk who defected from the bank, stole about \$106,000 more than the bank's capital, and disappeared from the bank when his vacation began on Aug. 11 last.

**Like Finding the Money.**  
The police have looked for two weeks in vain for the money which Mrs. Schreiber is said to have hidden in her home.

**Two Strangers Demonstrated a Financial Problem to Mrs. Wis-**  
Hart and Mr. Palmer.

The police have looked for two weeks in vain for the money which Mrs. Schreiber is said to have hidden in her home.

**Market Gardeners' Association.**  
At a large and representative meeting of the Market Gardeners' Protective Association, held here today, a resolution was passed recommending the 'young man' to make such changes as would be necessary to bring the market gardeners' association into line with the market gardeners' association.

TARTE A LOYAL BRITON NOW

He Says So Himself—Looks Forward to Independence in the Future.

DEFEAT OF SIR WILFRID JUST NOW

Would Be a Calamity to the Cause of Imperial Unity—Rabid Talk of Mr. Targueon.

Montreal, Oct. 11.—(Special.)—Mr. Tarte has given up his dream of France, and is now for independence. At a speech in Laval County, the Minister of Public Works said: "I believe that a Liberal defeat now would be an imperial disaster. The Imperial cause is not only a cause of the British Empire, but it is a cause of the Anglo-Saxon origin. The Anglo-Saxons are even in a minority. This is a fact which must not be lost sight of."

**These Paris Speeches.**  
Referring to the criticisms which had been made of his Paris speeches, Mr. Tarte declared that he had said nothing that he would not repeat anywhere. He intended, he said, to go into the streets of Paris and to tell the people there the same things that he had said in France.

**His Change of Heart.**  
Mr. Tarte then referred to his change of political allegiance, and declared that there were other men prominent in the Conservative party who had been tempted to do as he had done at the same time.

**What Mr. Targueon Said.**  
This is the substance of Mr. Targueon's speech. He said that he was a French-Canadian from the soil of my foot to the crown of my head, and that he was a French-Canadian from the soil of my foot to the crown of my head.

What About Boeckh's Adjustable Tables

A Leading Firm in Great Britain Says

ROBERT BRYANT, 48 to 50 Aldersgate Street, London, E.C., Sept. 13, 1900.

MESSRS. BOECKH BROS. & COMPANY, 67 Aldersgate Street, London, E.C.

DEAR SIR,—I have received your consignment of Adjustable Tables, and have used them here in our retail department and in our travelling bookstalls, and find them so handy, so admirably adapted for displaying goods to the greatest advantage, so tempting to the purchaser, that they are almost invaluable to any tradesman who wishes to show his stock in the most fascinating manner.

When properly used they must inevitably bring business and a speedy return to the tradesman.

Yours truly, T. C. EXAMER, Manager.

There is but One Answer

From merchants who have used the Adjustable Table, and the above is but a fair sample.

## MINES AND MINING STOCKS

Reaction in Price of Crow's Nest Coal

On Toronto Stock Exchange

Yesterday

## DEEP MINING IN ROSSLAND

Sales of and Quotations on Mining

Stocks on the Toronto and Mont-

real Exchanges Yesterday.

There was a natural reaction in Crow's

Nest Coal yesterday afternoon, shares

changing hands at 105, 104 and 103.

Following is from the Rossland Miner:

To what depth will miners be able to

mine successfully? is a question of con-

siderable interest in this camp. Of course

there are many factors to be considered,

but that mines are getting deeper and deeper

each year is certain. On the Comstock,

Nevada, the mines' depth of about 3,000

feet, and then the thrust of water, the

great cost of pumping and hoisting and

the excessive heat made it impossible with

the machinery then in use to longer oper-

ate the mines at a profit there. The plans

of the Comstock Pumping Association,

which at present is engaged in enlarging the

Comstock mines, is to sink the Ontario

combination shaft to a depth of 8,000

feet, and it is thought this will demon-

strate the existence of large ore bodies at

that depth. In the Calumet and Hecla in

Michigan, successful mining is now going

on at a depth of about 3,000 feet. As deep

as this is it is now stated that it is not

unlikely that on the reconstruction of mining

the South African mines will witness a

successful effort to sink to a depth of 4,000

feet, and all the evidence at hand indi-

cates that the mines are getting deeper and

deeper each year. On the Comstock, Nev-

ada, the mines' depth of about 3,000

feet, and then the thrust of water, the

great cost of pumping and hoisting and

the excessive heat made it impossible with

the machinery then in use to longer oper-

ate the mines at a profit there. The plans

of the Comstock Pumping Association,

which at present is engaged in enlarging the

Comstock mines, is to sink the Ontario

combination shaft to a depth of 8,000

feet, and it is thought this will demon-

strate the existence of large ore bodies at

deeper each year. On the Comstock, Nev-

ada, the mines' depth of about 3,000

feet, and then the thrust of water, the

great cost of pumping and hoisting and

the excessive heat made it impossible with

the machinery then in use to longer oper-

ate the mines at a profit there. The plans

of the Comstock Pumping Association,

which at present is engaged in enlarging the

Comstock mines, is to sink the Ontario

combination shaft to a depth of 8,000

feet, and it is thought this will demon-

strate the existence of large ore bodies at

that depth. In the Calumet and Hecla in

Michigan, successful mining is now going

on at a depth of about 3,000 feet. As deep

as this is it is now stated that it is not

unlikely that on the reconstruction of mining

the South African mines will witness a

successful effort to sink to a depth of 4,000

feet, and all the evidence at hand indi-

cates that the mines are getting deeper and

deeper each year. On the Comstock, Nev-
