A Philosophic Problem.

A Virginia member of Congress used many years ago to tell a story which may have been intended as a parable for politicians who approach questions from the wrong side. It is still capable of performing that office, not only for politicians, but for others.

The proprietor of a tan yard built a stand on one of the main streets of selling leather and buying raw hides. When he had completed the buying, he considered for a long time what sort of sign to put up to attract attention to the new establishment. Finally a happy thought struck him. He bored an auger hole through the door post and stuck a calf's tail into it with the tufted end outside.

After a while he saw a solemnfaced man standing near the door looking at the sign, his eyes in a round, meditative stare behind his spectacles. The tanner watched him minute, then stepped out and ad-

"Good morning, sir !" he said "Morning!" said the other, without taking his eyes off the sign. "Want to buy leather ?" asked the

"No."

"Got any hides to sell ?" "No.

"Are you a farmer ?" "No "Merchant ?"

"Lawyer ?"

"No.

"Doctor ?"

"No." "What are you, then ?"

"I'm a philosopher. I've been standing here for an hour trying to work in the store. There is twenty- figure out how that calf got throug

Aunt Nancy had a piece of a Yankee tent which had been picked up on the line of march after the soldiers had passed, and she scanned it well, but it seemed to promise little in the way of a warm petticoat for Lucy.

Aunt Nancy did not study long over the problem, however, for she was a woman of inventive mind. Noting Lucy's heavy shock of wool she straightway sheared her head who had good crops of wool, she sheared them also, telling them it

She took this wool, carded it and made battens, as they do with cotton for padding quilts, and quilted it into the remnant of the Yankee tent, which had been washed and made clean and soft.
