For being drunk and disorderly on Radial car and assaulting two conduc James Heights, of Oakville, was fined \$20 in Police Court this morning James came to the city yesterday, and at eventide he boarded a car to return to his home, but the fire of Bacchus burned fiercely in his veins. When the conductor asked him to contribute to the gross receipts of the company by paying his fare, he became incensed. Quiet per suasion failed to have any effect on the suasion fance to have any driest of the Coakrillian. His isinguage was made up chiefly of descriptive adjectives. When asked to desist, he arranged himself in a puglished attitude and planted a bunch of his knuckles on the conductor's facial protuberance. The eighteen passengers had unmentionable threats hurled at them, but the conductor and motorman put the riotous one off the car. He next boarded a car going towards Hamilton, and again he started to go through the some performance. County Constable Walker happened on the scene atter Heights had made things like a traveling Inferno for five miles, and he was promptly manacled, brought to the city and cast behind the bars.

This morning he said he knew nothing of what happened last night, but the conductors told the foregoing story. Heights is an old man, and looked incapable of causing so much riot.

This was further limited to the discussion of the apparent motion of the stars as seen at Hamilton. A strong plca was made for the study of astronony with the naked eye. A familiar acquaintance with the stars would be a life-long source of pleasure to anyone, said the speaker. Since the invention of the great telescopes the impression reat telescopes the impression to be that only those equipped seems to be that only those equipped with such can study astronomy. But astronomy was a science before the telescope was invented. There is evidence that the ancients were careful observers of the heavens 4.700 years ago, and it is really wonderful what they knew about the subject.

The lecture was illustrated by about thirty larger sides come of which were

thirty lantern slides, some of which were of unusual interest. One mechanical slide illustrated the daily revolution of the star sphere, and this motion was explained by means of several diagrams. The lecturer pointed out that many different phenomena may be explained by this motion, such as the seasons, solar and sidereal time, the varying altitude of the sun, moon and planets during the year, the harvest moon, the culmination of stars, etc. In this connection slides were shown taken from photographs of

GREAT TRUNK LINE IS DEVELOPING.

Plans of Dominion Power and Transmission Company Seem Very Comprehensive.

That the Dominion Power and Transmission Company have things in pretty good shape for its great scheme of an electric trunk line, from the Falls to the control of Middlesex, and from Aylmer to St. Thomas in county mission Company have things in pretty good shape for its great scheme of an electric trunk line, from the Falls to Hamilton, Toronto and Windsor, and that a definite announcement about the plans may be expected as soon as certain applications for charters are dealt with at the present session of the Federal Parliament, is the belief of city officials who have been carefully watching the situation.

Part of the big scheme the company have in view in connection with the extension of its radial line from Oakville to Toronto, is unfolded in applications to Toronto, is unfolded in applications to Parliament for charters, published in the Canada Gazette. One of these applications is for an act to incorporate the Toronto Terminal Company, with power to construct and maintain passenger and freight stations, warehouses and other terminal facilities in and about the city of Toronto. It is understood that this will become one of the subsidary companies of the Dominion Company. The Hamilton, Waterloo & Guelph Railway Company asks for an stood that this will become one of the subsidary companies of the Dominion Company. The Hamilton, Waterloo & Guelph Railway Company asks for an extension of time for the completion of its authorized line, and for power to build from Hamilton to Toronto; also for power to enter into an agreement for a lease or running rights over the lines of the Hamilton Radial Company from Burlington to Toronto, and "for special powers relating to terminals in the city of Toronto."

Another important link in the scheme Another important link in the scheme is believed to be the application which the London & Lake Erie Railway Company, capitalized at \$2,000,000, is making for a charter to operate a line between Brantford and London, running through Paris, Ingersoll and Woodstock, and with running rights over the Brantford & Hamilton Railway. The company is asking for power to acquire or oper. is asking for power to acquire or operate railways intended to be built and operated by the Southwestern Traction Company, and being from Brantford is asking for power to acquire or operate railways intended to be built and operated by the Southwestern Traction No. 7 Ward has decided, on the Company, and being from Brantford, advice of his friends, to run in No. through Paris to Woodstock and from 5 Ward.

The third link in the great scheme is said to be the purchase of the Windsor, Essex & Lake Shore road. The Dominion Company, about two years ago, was making a dicker for the purchase of this road, but the negotiations were suddendropped, presumably until the company got all its charters straightened out and everything in shape to go ahead with the whole scheme.

by ventilating a complaint as to the delay in appointing Judges to the new Court of Appeal in British Cotumbia.

"Mr. Borden, in opening the discussion, which took place on a motion to adjourn and lasted an hour, demanded an explanation for what he described as the extraordinary delay that had occurred in making appointments to the Appeal Court.

Hon. Mr. Aylesworth, in reply, pointed out that the Government in British Columbia had allowed two years and a half to elapse before putting the act constituting an Appeal Court into effect, the act having become law as long ago as April, 1907, and being followed in 1908 by legislation in the Dominion House providing for the payment of salaries to the fludges of the new Court. Alluding to the suggestion that the delay in making the appointment was attributate to political causes, Mr. Aylesworth wondered whether the leader of the Opposition had heard any rumors in the summer of 1908 that these judicial positions were being made a pawn in the political game, and that the Government of British Columbia was waiting in the hope that the delay in making the appointment was attributate to political causes, and or any rath summer, "says H. any rumors in the summer of 1908 that these judicial positions were being made a pawn in the political game, and that the Government of British Columbia was waiting in the hope that the elections in October last years and that an immediate operation with british the elections in October last year might bring a change of Government at Ottawa. That delusion was dispelled, and nothing more was heard of the matter until in April or May of this year, when he discussed the subject at Ottawa with Mr. Bowser, Attorney-General of the Province, who left him with the statement that the act constituting the Appeal Court would be proclaimed on the following day.

Nothing was said about September last the date, and no communication to that effect had reached the Department of Justice. For the delay that had occurred since his return from abroad, four weeks ago, he frankly accepted the responsibility. He had written to Mr. Bowser, suggesting that it would be in the public interest and in the interests of the administration of justice that the new Court of Appeal thould not be composed entirely of men who had had no judicial experience, and to that letter he had received no answer. It was his view that it would be unfortunate to make

appointments to the Court of Appeal appointments to the Court of Appeal until he was in a position to make recommendations for all the judicial positions that would require to be filled in the Province. In these matters it was desirable to go reasonably slow, but he trusted that the appoinments would be made before the end of the present month. If the Government of British Columbia could wait two and a half years before putting the act into force act did not think a delay of a few weeks was a matter for which the Dominion Government could be blamed.

A DREAM CAT.

A Spanish Beauty

"She looked so lovely as she swayed The rein with dainty finger-tips, A man had given all other bliss And all his worldly worth for this, To waste his whole heart in one kiss Upon her perfect lips."

"Honor thy father, that the days may be long in the land," thought Trevannance, gazing on that exquisite face. "It would be a pity to disappoint the two governors, since they have set their hearts on the match; a greater pity to give all this perfect beauty to that dolt, Amethyst. My peerless Rose of Castile, do you dream, I wonder, that your future husband rides by your side?"

And while the cavalier and his lovely lady galloped gayly away toward the setting sun, the beggar in the inky cloak reared himself upright and watched them out of sight with vengeful, tigerish eyes. "Honor thy father, that the days may be long in the land," thought Trevan

For twenty years he has prospered. An earl's coronet, ill-gotten, has graced his head; the women he loved has been his own; wealth and honor and greatness among men, all are his. For twenty years I have been an outcast and a felon, ill and poor, despised and forgotten, and his daughter flings me alms as she would meat to a dog! Well, it is my turn now, and I'll tear the coronet from his head, the honor from his name, the turn now, and I'll tear the coronet from his head, the honor from his name, the wife from his bosom! I'll lower that beautiful, haughty head of yours, my lovely Lary Evelyn, to the dust! Roderick Desmond, in his bloody grave, shall be avenued at least! be avenged at last!"

CHAPTER IV.

She lay on a low couch before the fire—Irez, Countess of Clontarf. A confirmed invalid, she was always chilly. Accustomed to the tropic heat of her own lovely sunlit land, England, with its cold rains, its easterly winds, and damp sea fogs, was only rendered endur able, even in its warmest summe onths, by a glowing fire. She lay back amid the silken, rose

able, even in termonths, by a glowing fire.

She lay back amid the silken, rose-hued pillows of her lounge, watching the red glow of the embers, while the gleam of the wax-lights shone down on her pale, dark, delicate beauty—in the velvety depths of the solemn, shining eyes—on the chiseled, beautiful lips, compressed in a hard, thin line of pain.

She looked like some frail waxen japonica—lovely and fragile, pale as a snow-wreath, and with deep lines of suffering and endurance marking the low brow and delicate mouth.

Beautiful she must be ever, even in decay: but it was a worn and weary

beauty now, and the rare smile that came and went so swiftly was cold as The dainty little boudoir was all that heart could desire, or wealth procure, or refined taste suggest. Its rose hangings gave a delicious air of warmth and mel-lowness. Its silver awinging chandeliers gave a delicious air of warinth and mel-lowness. Its silver swinging chandeliers; its inhaid toilet tables, draped in lace; its lofty mirrors, framed in Dresden; its genimed vases, filled with rarest flow-ers; its crystal carafes of perfume; its wondrous beauties, smiling down from the rose-tinted walls; its exquisite sta-tucttes, agleam in the silvery wax-light—all were perfect of their kind, and fit-ted up a chamber for a queen.

Lady Clontarf, wrapped in a gold-tinted negligee of softest Indian texture, her long, shining nair unbound, lay and gazed with dark, brooding eyes into the crinson heart of the fire.

Outside the rain beat and the wind bew, the tossing trees in the park

As the thought crossed her mind, there came a soft tap on the pane! followed by a sweet, young voire, "It is I, mamma. May I come ine" "Come in, my darling," Lady Clontarf answered. "I have been waiting for words."

know his name. What will happen in ext?"

"Tell me, my dear."

"What he is like? Really, I am not sure that I can. He is handsome, certainly—a stately and gallant gentleman, with the perfect manners and finished ease of a courtier—but what is the color of his eyes, or the hue of his hair, or the shape of his nose, I am not prepared to say. However, mamma"—with her gay, glad smile—"as you appeare interested in the subject, I will take a mental photograph of my preserver, for your benefit, at dinner."

The countess looked up, with earnest words on her lips, but before she could utter them the great-bell upon the windy turret clanged for dinner.

"I must leave you, mamma. Ah, if you could but come down! It is cruel to leave you here alone."

"Better here, my dearest. I would be but the skeleton at the feast, and there is only you to miss me. Go—bellanny and young and beautiful while

She kissed the pale brow lightly, then swept from the room, her silvery drapery floating lightly about her, and with all the lofty, beautiful grace of a young

Left alone, the countess sunk back among the cushions with a heavy, weary sigh.

"She is lovely as a dream! She is hopeful and young—as I was once. Ah, Dios! what a weary while ago it seems! Will they blight her life, too? Will she love this man to whom they will wed her? She does not know. She speaks of him so lightly. If she only dreamed—my beautiful, proud Evelyn!—that, whether she will or no, she must marry him! He is made of iron—her father. What is she that she should centure to oppose his will? She is heart-free now. Oh, pitiful heaven, let her love this man whom she must wed!" Backward her thoughts went drifting nineteen years to a drearily loveless bridal—loveless on her part at least. Gerald Desmond had been a successful

Gerald Desmond had been a successful nan. He had won all for which he had plotted—all. The coronet that had been the dream of his life, the title he had plotted—all. The coronet that had been the dream of his life, the title he had coveted so passionately, the woman he had loved with a fierce, savage, burning love, the heiress whose wealth had restored the greatness and splendor of a fallen name—all had been his! He had taken his seat in Parliament. He had made his name famous as the name of a profound statesman, a stirring orator, a leader among the leaders and law-makers of mankind. His ambition had been satiated to the full. The Earl of Clontarf was a synonym for all that is great and good. He had endowed hospitals, founded asylums, pleaded for the down-trodden and the oppressed, reformed almshouses, and headed munificently every charitable work; and yet, since the fierce fire of his love for the woman he had wed had burned itself out, and that ere the honeymoon morth had ended, there was not in all the with himsdom a more miserable, man these had ended, there was not in all the will kingdom a more miserable man than this hidden assassin who had slain his

passionless as marble, submitting to his caresses, never, never returning them with one word, one look, one thought of love. It was his punishment—or part of it— and the deep, dark, violet eyes haunted him ever like some avenging ghost.

All day long they gazed at him in his daughter's beautiful face, and at night, —oh, Heaven—in the deep, still, solemn watches of long summer moonlight, of wild wintery storm, Rory Desmond rose up before him—the gold-hued hair dripping with brine, the brilliant azure eyes stony and fixed—paic and horrible from his deep sea grave, until his cold drops rolled down the watcher's livid face, and his hands had clinched in agony.

Men wondered why the great statesman's hair had silvered so soon— why, at fifty, he was more worn, and haggard and pallid, and hollow-eyed than men of eighty—and set it down to profound study and ceaseless mental labor. And of all the world—his world—only his wife knew or guessed.

in his frenzy? Had she not heard broken fragments that, strung together, told the whole grisly tale?

Up to that time she had striven to do her duty—striven to like him — to overcome her loathing and repuguance—but she never struggled again.

She had faced him one morning, after some bitter, insulting words flung at her by him, with a terrible light in her eyes that he had reason to remember all his life long.

"Dastard! she cried in a voice that rang. "Coward and traitor! Women of my race have dealt death for a tithe of what you have dared say to me! Utter such words to me again, and, by all I hold holy, I will give you up to the gallows and the hangman, you murderer!"

"You Judas, who sold your master—

lated eyes—the loathing, the repulsion the hatred in her face.

"Touch me not!" she said, wildly, "lest I go mad and tell the world all! Never, while we both live, shall you touch my lips with a husband's kiss—take my hands in a friend's grasp! Oh, surrely I am forgotten of God, or I had never been your wife!"

And then she had broken from him, and for many weeks they had not looked into each other's faces again. And she had kept her word. There had been no open scandal, no public separation. The world saw plainly enough there was little love or union between the husband and wife; but in fashicnable society that is such a common case. Incz Desmond had kept her word—and her terrible secret. She dwelt beneath the same roof for her daughter's sake, but she and Gerald Desmond were sundered as far as the poles.

She lay here to-night in her luxurious little words.

She lay here to-night in her luxurious little room, while the ceaseless rain lashed the windows and the wild wind soughed among the trees, and thought of her wrecked, lost life.

There was a world of despair in the dark, melancholy eyes that gazed in the ruddy fire—a settled night of sorrow. She loved her daughter very dearly—that daughter who looked at her with Rory Desmond's own blue eyes—and for her sake she lived and clung to life. But the end was not far off now. An incurable inward disease had held her victin for years. Any day, any hour, any instant, she might be summoned hastily away.

There had been times when, in the midst of his impassioned caresses, his endearing words, so coldly borne and never returned, he had hurled her furnihim, in a paroxysm of rage and despair and rushed from her presence. There were times when, madly as he worshipped her, he could have taken a dagger and plunged it into her very heart—that heart of ice to him—forever gone with the bright-haired youth so foully slain in his strong young manhood.

And then, as passion unreturned must, that fiery love had died out and given way to sullen hate. Ah! how brief brief the boundary ever is between loving and hating! And the warmer the

They will compel her to marry this man, Well, if she can care for him, as well Vivian Trevannance as another. But before the bridal day she shall know how my life was blighted. Yes, this very night she shall hear my story."

She drew from her bosom a locket, strung round her neck by a fine gold chain. It held a bright ring of golden hair, and a frank, fair, boyish face, smiling and beautiful, looked up at her—the face of Roderick Desmond.

"My love! my darling!" she softly murmured, "so foully slain in your bright youth by the hand you loved and trusted! My life!—my husband!—Inez will join you soon!"

And then, with that pictured face clasped close, she sank down among the cushions, shutting out firelight and waxlight, and went back over the weary past.

past.
Twenty years drifted away—the lover Twenty years drifted away—the lover of her happy girlhood came back to her over the guif, and lay—at her feet as in the golden days forever gone. And the hours drifted on. There were laughter, and music, and light, and luxury, below stairs, where her husband and daughter were laughter, and the hours a gled gaz girl one were; but she was a glad, gay girl once more, and the wide universe held but one treasure for her—Rory Desmond's love!

Desperado Shoots Himself When Cornered by Posse.

Robbed Same Bank Before and Killed a Policeman. Eudora, Kan., Nov. 13.-Earl Bullock

boy bandit of Lawrence, Kan., accompanied by William McKay, fifteen years old, of Jacksonville, Fla., to-day in an attempt to repeat his exploit of a month \$800 after shooting Fred Starr, a banker and later probably mortally wounding himself when closely pressed by armed itizens.
In his first hold-up of the Endora

State Bank Bullock, who is 17 years old, shot a policeman dead.

As officers had about decided that Bullock had left the State with the loot of the previous hold-up, he and McKayentered the State Bank about closing

entered the State Bank about closing time.

Fred Starr, cashier of the Kaw Valley Bank, of Endora, who was in the State Bank with his day's clearings, stood by as the outlaws held up the State Bank's cashier, Henry Wilson. Although Starr offered no resistance to the hold-up, Bullock shot him through the jaw. Snatching more than \$800, Bullock and McKay fled. Each youthhad two revolvers.

Cashier Wilson spread the alarm and citizens armed with shotguns, rifles and revolvers pursued the bandits across the fields. In attempting to swim the Kaw River, the boys lost ground, and a few minutes later the pursuers were at their heels.

heels.

McKay surrendered, but Builock, wrenching the revolvers from his fultering partner's hands, aped on into a wood, exchanging shots with his pursuers.

The hunted robber gradually lost ground, and, with seant hope of excape, stopped and shouted defiance at the fast

approaching hunters.
"I'll beat you yet!" he shouted, and fired his last remaining bullet through

Would Place the Lords and Tories

in a Bad fix. London, Nov. 13 .- Rumors are curren

London, Nov. 13.—Rumors are current here to the effect that should the House of Lords reject the budget Premier Asquith and his Cabinet will immediately resign with the object of throwing upon the Conservative leaders the duty of providing for the country's financial needs. Whether or not this report is well founded a closer realization of the financial confusion is bound to follow.

The question of the rejection of the budget is giving the responsible Unionist leaders time for a pause for reflection. While it is known that many infibential men on the Unionist side are averse to accept the risk of the almost unprecedented course of rejecting the budget, the leading financial weekly, the Economist, devoted an article to the question, pointing out the extraordinary situation that would follow such action. Duthes of various kinds, it says, sanctioned under the new budget by the House of Commons resolutions, have been enferred since April to an amount exceeding \$55,900,900, and it is assumed that if the budget is now rejected these duties would be recoverable in the law courts.

Added to this is \$170,000,000 of income tax collected, which almost might be required to be refunded. In any case the Economist foresees a terrible financial deadlock.

Mr. and Mrs. I. E. VanDuzer have returned from a trip to California. Miss Mabel E. VanDuzer, of the Aur-ora High School teaching staff spent Sunday with her parents.

A number from here attended the fruit and flower show in Toronto this week.

The teachers report some of the rooms in the public school overcrowded.

Miss Olive M. Foran is visiting friends

in Ookville.

Last Friday evening the commencement exercises of the public school was held in the hall. R. C. Mackay was chairman, and a lengthy programme was given by the scholars. Miss Greta Ormiston, who assisted the scholars as accompanist, was presented with a completa set of Oliver Wendall Holmes poems. J. H. Smith, Inspector, presented the scholars with their certificates. After all expenses were paid, the proceeds of the concert were used to pay for a piano for the school and left a substantial bulance besides. in Ookville

BRITISH LAND TAX.

A great effort is being made by the Chamberlainites and the landlord interests which support them to make it appear that the increment taxation of Lloyd-George's budget is "socialistic" and unjust. Now students of English history are not to be deceived by such cries. As far back as 1782 we find William Ogilvie, in dealing with the rights of property in land, distinguishing between "(1) the original value of the soil, (2) the increased value given to by human labor, and (3) the value which it acquires in the present from its possibility of increased value in the future," and arguing that only the second value belongs to the landlord, the rest being morally the property of the community. The difficulty of separating these values, however, led him to suggest leaving these values to the landlord, but requiring him to contribute to the requirements of the state in return therefor. In the Nineteenth Century Alfred Mond points out that the proposal is simply a reversion to the principle of the land tax under Wil liam the Conqueror. And Ogilvie adds: "No scheme of taxation can be so equitable as a land tax, by which alone the expenses of the state ought to be supported until the whole amount that original value be exhausted." The proprietor is regarded as in a sense a trustee for the state. The German Government, the most

conservative and anti-socialistic of Eu fone, has adopted the principle of the imperial revenue, and it will be embodied in the German land laws of 1912. Till then it is operated as a surtax Prof. Wagner, the eminent German sees no great difficulty in distinguishing between the earned and uncarned increments. "He takes the case of Berlin, and supposes that a man owned land there previous to the years 1866 and 1870. After the two victorious wars, Berlin became the centre of the one of the great capitals of the world. Had the proprietor of that land done anything personally to increase its Since 1893 the Prussian municipalities have been empowered to levy rates on the common or capital value of the land instead of on its actual annual income.

But there is nothing "revolutionary" about imposing such a tax in Great Bri-

tain, as Mr. Mond points out:

The taxation of land as such is perhaps the oldest traditional British tax.
It was indeed for centuries the ordinary It was indeed for centuries the ordinary method of raising revenue for the defence of the country. It was even at its inception a capital tax, varying, under William the Conqueror, by whom it, was first imposed, from one shilling to six shillings on every hyde of land. Indeed, so little is the action of the present Government unprecedented in this matter of the taxation of land that in the eighth year of the reign of Ed. this matter of the taxation of land that in the eighth year of the reign of Edward the Third a complete valuation was made throughout England of the fifteenth part of every township— a valuation upon which subsequent assessments were based. The existing land tax, created in the reign of William and Mary, imposed four shillings in the pound on all real property on the bona fide rack rent. The assessment on the bona fide rack rent shows that already in those days the income from dready in those days the income from

Napoleon I. secured the passage of law in France in 1807 which while providing that a landlord must be comper sated for land expropriated, provided increased value given to the remainder by the expenditure of the public. Tha law also provided that when the value of land was considerably increased be cause of public works the owner might the amount to be determined by legal valuation. Such a law respected rights of the public as well as the individual. It looked to justice.

sarily its true value for the purpose of

A The unearned increment tax should bring in a considerable sum to the com-munity without doing any injustice to the landowner. It is noted by Mr. Mond that in 36 years the rateable value of Swansea has increased by 246 per cent. In that time the public has spent about \$40,000,000 on docks and orks, bringing hitherto worthless lands The landlord reaps all the into value. benefit. The new tax will take some of the increased value for the people. One field of building land in Swansea has been held up for generations by the landlords, and grazed by sheep yields perhaps 5s an acre. In February it was should the community not take a part of this great increment which it has pro-

But the landlords have for centuries gradually appropriated the lands which belonged to the common people, and shifted the burdens of taxation from their own shoulders to those of the disfroitism; that stands for privilege possessed masses. In 1845 Richard Cobden thus told the story:

den thus told the story:

For a period of 150 years after the Conquest the whole of the revenue of the country was derived from the land. During the next 150 years it yielded dineteen-twentieths of the revenue—for the next century down to the reign of Richard the Third it was nine-tenths. During the next seventy years to the time of Mary it fell to about three-fourths. From this time to the end of the Commonwealth, land appeared to have yielded one-half the revenue. Down to the reign of Anne it was one-fourth. In the reign 'George the Third it was one-sixth. For the first thirty years of his reign the land yielded one-seventh soft the revenue. Form 1793 to 1816 (during the period of the land tax), land contributed one-ninth. From which time

MUNICIPAL FINANCIAL AFFAIRS.

It is well worth the while of the Hamilton ratepayer to give some attention to the financial position of the city. He has a very direct interest in it, as he is forced to realize every time a tax bill is presented to him. But it is a peculiar fact that the average citizen deals very differently with the incurring of city debts and obligations which his property is held to liquidate, from the way he deals with his own private engagements.

At the end of the year 1908, the debt of the city of Hamilton was \$5,129,-877. Against that we had a sinking fund (on paper) of \$702,249. That sinking fund, it is understood, is \$22,000 short, due to a decline in interest rate, and the amount of shortage is constantly increasing.

To understand how our burdens have been increasing in recent years, it is only necessary to point out that in 1898 the total indebtedness of the city, including local improvements, was \$3,573,790.

Five years later it had increased to \$4,224,321.

During the present year \$214,165 has been added to the indebtedness, deben tures to the amount of \$60,000 for School Board purposes have been authorized, and \$55,000 for waterworks construction is also to be provided.

That will bring the total amount of the debenture debt to \$5,459,042.

That is a very large sum of money. But it is not the end of the story A large sum of money is required next year for pavements, sewers, sewage disposal works and other city improvements; and there is an active campaign going on to commit the city to a few hundred thousand dollars expenses in an unrestricted contract with the Hydro-Electric monopoly. Even named conspiracy should fail, the year 1910 will probably see the city debenture debt increased to about \$6,000,000.

We are, of course, enlarging our borders, and have this year taken in some what over 1,200 inhabitants. By and by the new district will contribute considerable to the contribute contribute considerable to the contribute contribute considerable to the contribute contr By and by the new district will contribute considerable to the tax fund; but it is hardly to be expected that contributions will for some time to come be in proportion to its necessities. It behooves the people to impress upon the civic business management the necessity of economy. That does not mean that we should not spend money when its spending is wise; but it should teach the lesson of carefully stopping all leaks.

And this constant increase of debt and burdens of obligation is a feature of nuncipal life in Ontario. It is especially so in the urban nunicipalities. The latest Government returns show that the floating debt of the municipalities, which was in 1886 the tidy sum of \$4,841,717, increased in 1906 to \$12,566,149, and the debenture debt increased in the same time from \$29,924,863 to \$77,898,323 Never was there a decrease in any year.

While the population increased from 1,828,495 in 1886 to 2,200,363 in 1907, the taxes increased from \$9,009,385 to \$19,529,258. That is surely a showing to startle the reader.

The average rate of taxation in Ontario municipalities in 1886 was 12.97 mills in the dollar. In 1907 it was 17.00 mills, And the tendency is still upward. The amount of municipal taxation per capita in 1886 was \$4.93. In 1907 it was \$8.88. In other words, the municipal taxes levied in 1886 on the average family of five members was \$24.65. In 1907 it was \$44.40. And the tendency

Municipal Bulletin No. 3 of the Bureau of Industries, recently published gives the returns from the municipalities to the end of 1908; but the figures are not in all cases complete, much difficulty being experienced in getting the municipal officials to give all the information desired. It is not to be supposed that a fair comparison can be made in all cases, but a few items are available from which to judge of comparative conditions at December 31, 1908:

	Taxes.	Net Deb. debt.	Population
Hamilton	. 773,283	\$ 4,427,627	66 967
	4,070,044	23.294.154	997 901
Ottawa	1,127,874	5,407,957	00.004
London	618.304		80,284
Brantford	268,916	3.104,212	49,431

A computation from these figures, which we have already explained, are not to be accepted without allowances in some cases, shows that on December, 31, 1908, the debts per capita (over sinking funds) of these cities were: Hamil

ton, \$66.10; Toronto, \$81.11; Ottawa, \$66.11; London, \$62.81; Brantford, \$57.51.
Of course there may be considerable in the way of "assets" to offset this debt, in city property such as schools, public buildings, works, parks, etc., but these are not regarded in the returns as of a character to represent a credit as against the deebnture obligations of the cities.

The enormous increase in the cost of education has contributed not a little to the embarrassed financial condition of many municipalities. In a few years the cost of our schools has doubled. It is not only that we have more children to educate: the cost of educating them is about double per capita compared with the rate of a few years ago. And still the expenditure soars. The people "squeal" at the tax bills, but they let School Board affairs run along without giving them much attention. It may be worth while to examine what percentage of the taxes of the cities under consideration goes to the School Boards, and is therefore beyond the control of the Councils

It will be felt that the School Boards of the Province should be carefully supervised by the ratepayers. Not having to raise the money themselves, they are tempted to be easy with it. Toronto is just now waking up to the great load being saddled on it by its Board of Education. Ottawa's case is an exceptional one. Hamilton makes as good a showing as most cities of the Province All, however, show that there is need for the exercise of wise economy

The question which the Man who Pays is asking is: When shall we reach the limit of municipal tax demands? The burden has been steadily increasing for the finit of numerical tax demands. The content has been steady increased to be mone-tory twenty years. We are handicapping posterity. There are likely to be mone-tary demands from time to time which may unavoidably increase taxation in special cases. These increases should be but temporary. But it is high time special cases. These increases should be out temporary. Dut it is night time that the overburdened ratepayer should put his foot down hard on the various kite-flying schemes that cunning municipal exploiters and fakirs are constantly hatching. His interests are not their interests; but it is his property that is mortgaged for their earrying out.

to the present (1845) one twenty-fifth only of the revenue had been derived directly from the land. Thus, th land, which anciently paid the whole of taxa-tion, paid now only only a fraction or one tion, pain now only a fraction or one twenty-fifth, notwithstanding the immense increase that has taken place in the value of the rentals. The people had fared better under the despotic monarchs than when the powers of the State had fallen into the hands of a landed oligarchy, who had first exempted themselves from taxation, and next claimed compensation for themselves by a corn law for their heavy and peculiar burdens.

The land taxes of the new budget will wrong no one. They will assert the principle that the land of the nation should help to pay the expenses of the nation in something like its fair share. And they will be the acceptance of the principle that the values produced by the presence of and expenditure of the community is the true and natural fund out of which to meet the communal The landlords may as well note that the day of riding on the shoulders

of the producers is nearly at an end. The Tories who hoped to score against the Government on the question of delay in appointing judges of the British Columbia Court of Appeal, met their match in Hon. Mr. Aylesworth yesterday. The Minister of Justice showed that the British Columbia Government had allowed two and a haif years to elapse before putting the act constituting the courts into effect. That was done in the hope that the Tories would win in the last general election and thus have the appointment of the judges in question. The very men who thus plot-ted and delayed are now complaining because the judges have not been ap pointed since Mr. Aylesworth's return from abroad four weeks ago! What a lot of small tricksters they are!

Public-spirited citizens of Ontario, Lib-erals and Conservatives alike, must stand for the right of civic corporations to make contracts for electric energy as freely with the Hydro-Electric Commis-sion as with private companies.—Toron-to Globe

Nonsense! Not while the Ontario dovernment deprives private citizens of their rights before the law, and sacrifices private interests and public credit to give the Hydro-Electric Commission advantages which it could not have ur on its merits. Honest citizens cannot approve this.

The injunction asked for by Mr. Connee to prevent Port Arthur from entering in to a contract with the Hydro-Electric Power Commission has been granted, and the trial of the case will probably come up in the spring. It apears to be another case like that of Galt and sister municipalities of the Niagara Municipal Power Union. The by law voted upon did not set forth a definite contract "so as to enable the voters to judge of that on which they were asked to vote." Mr. Justice Clute holds that the faults of the by-law cannot be cured by the Hydro Electric Act of 1909. Mr. Conmee points out, in addition, that Port Arthur has had an offer by Hon. Adam Beck on behalf of certain capitalists to furnish power at \$5 to \$7 cheaper than the estimates of the Hydro-Electric Commission agree ment which the city is enjoined from signing.

OPENING OF HIGH SCHOOL

Interesting Event In the Valley City Yesterday Afternoon.

Commencement Exercises of the Public Schools at Night.

Presentation of Awards and an Interesting Programme.

Dundas, Nov. 13 .- After nearly twen ty years' agitation to secure a new high chool building for Dundas, that object has been attained The new building was opened yesterday in the ence of a fairly large number of citizens who received the building and its equipment with evident pleasure. If any fault is hereafter found with the building it will probably be owing to its location and perhaps to its not being up to other town high school buildings in outward appearance. It was perhaps put up for less money than any other town high school building in the country in recent years. The one built last year in Oakville cost several thousands of dollars more than this one in Dundas

dollars more than this one in Dundas. That event of always surpassing interest, the high school entertainment, came off last evening. There was a slightly diminished attendance compared with former years, owing in great part to the illness among pupils of late. The entertainers from outside were J. H. Cameron and Dr. Robb. The former in his dialect songs, and recitations, captured the audience to that extent that he was at each number compelled to answer to an enchore Dr. Robb, in his piano selections was no less favorably remained. ano selections was no less favorably re

Trustee J. J. Steele presided and in opening expressed his gratification that, after all obstacles had been surmounted the town had a new high school at last. Inspector Houston, of Toronto, was the principal speaker. He referred to the great advantage of a separate four-room school over the old idea of the three classes in the public school building; eulogized the high school work and staff, and advised the establishment of a technical class in one of the vacant staff, and advised the establishment of a technical class in one of the vacant rooms of the public school building.

Rev. Mr. Harvey opened the proceedings with prayer and Rev. E. A. Irving and Jas Grant gave short addresses.

The new building was beautifully decorated for the occasion by the pupils. Light refreshments were served at the close.

Principal Mcore, of the public school, Principal Mcore, of the public school, for the fifteenth year in succession presented the entrance certificates. In doing so he made the statement that 28 were recommended for the entrance examinations and 29 passed—a number trying who were not recommended. The loss to be sustained by Principal Saunders leaving was referred to, as was also the long, faithful and fruitful servicer of Miss Scott, who lately severed her connection with the kindergarten. Praise was also bestowed on Miss Edith Praise was also bestowed on Miss Edith Franse was also bestowed on Miss Edith Minty, winner of the Grafton scholarship, from the fact that her attendance had been only six months in his class. NEW INDUSTRIES To the Editor of the Times:

To the Editor of the Times:

Sir,—As it is nearing the end of the year, some of us would like to know what has been accomplished in the way of attracting new industries to the city. The Greater Hamilton Association has been advertising us some. The council has also professed to be working. What has been the result? I fear, not much. How could we expect to do much in that way, with one section of the aldermentrying to make the world believe that our town is in the grip of a grasping electric monopoly, and fighting to injure or crush the Hamilton enterprise built with Hamilton money? It would be good for the people to see just what has been done. Other places are getting the new works while our people knock their town.—Kicker.

"I just thought this was such a nice day," said the elderly woman, that I'd better take advantage of it and come to see you. I hadn't been over since you and Herold set up housekeeping, you know! How fine you're fixed!"

you're fixed!"

"Yes, it's a nice flat," conceded the bride. "I'm so glad you came. Take off your coat and hat. I've been so lonesome, it seemed as though I never in the world could stand it!"

"My goodness!" said the elderly woman as she settled herself. "Lonesome? Why. I never heard the like! Why on earth when you and Harold are happy as you can be you should feel lone—"

The bride interrupte! tragically. "That's just it!" she cried. "If we weren't so happy it wouldn't be so bad—but you see, Harold is away!"

"Oh!" said the elderly woman. "I see! And left you behind! Well, why didn't you go along?"

"He couldn't take me," said the bride, saily. "It was a horrid old business affair and he said he wouldn't have an instant to be with me if I went and that it wouldn't be pleasant and I'd be happier at home. But I'm not! I'm perfectly miserable and I wish I'd gone anyhow. I expect he wishes it, too, by this time. He misses me just as much as I do him."

"Of course," agreed the elderly woman. "It's too bad. I remember when I was first married and John went out west prospecting from April till the next November—"

"Then you know just how I feel, don't you?" exclaimed the bride. "It's so much nicer to tell things to a person who has experienced the same things and really understands. Why, the woman in the flat below just laughed at me this morning when she met me on the back porch and I was crying as I took in the cream sand milk. I told her it seemed so sort of pathetic and deserted, that bottle of cream standing there and nobody to use it but myself. It was just as if I were a hermit in a desert or something. She was not a bit sympathetic and deserted, that bottle of cream standing there and nobody to use it but myself. It was just as if I were a hermit in a desert or something. She was not a bit sympathetic and I don't think people like that have much heart, do you!"

"I should say not!" said the elderly woman. "Don't mind her at all! You just tell me all about it!"

"I should say looking out for me and I depend o

house reminds me of him, you know, and when I sit down at the diningroom table, all alone, I can't eat a uning! Not a thing!

"Seemed to me when I came in," said the elderly woman, "that you nid look a little thinner than when I saw you last. Now, you oughtn't to let yourself get that way—it isn't right and Harold wouldn't like it. You just want to eat three good, hearty meals a day and brace up and think of the time when he'll be back!"

"I suppose so," said the bride, dolefully. "But it's so hard."

"I know it," said the elderly woman "When John was away out West, as I was telling you, I'd get the blues frightfully and there'd be weeks at a time when I wanted to die and he done with it. But I saw how foolish it was finally—and so'll you."

"Well, perhaps," said the young married woman, gazing out of the window. "It's nearly time for the postman and I can see him way down the street, but there isn't a sign of him this afternoon. Do you suppose anyything has happened? The mail train might have beeen in a wreck and burned up and in that case I'd not get my letter, would I? Or the collecting wagon's horse might have run away and spilled everything along the street. I'd feel just awful to have any one else get Harold's letter while I was sitting here watching and waiting for it."

"Oh, my!" said the elderly woman comfortingly. "I wouldn't worry about anything having happened to the mail! The postman's just a little late. They are some times, you know. I expect you do count on his letters. Some men are so slack about writing. I've heard of 'em writing every day when they're away, though!"

"Oh, Harold does!" cried the bride proudly. "I couldn't stand it if he didn't and neither could he! It's awful if I couldn't hear from him every day when they couldn't stand it if he wouldn't and neither could he! It's awful if I couldn't hear from him every day when they couldn't hear from him every day when the mill in the defense men are so slack about writing. "Go right ahead," said the elderly woman.

There was a wait of 15 minutes before the young married woman reappeared, a thick letter in her grasp, her face alight.

"I thought that postman would never get to this building," she cried.
"He was so slow!"

"Read your letter," said the elderly woman. "Maybe Harold'll tell you in it when he thinks he can come home.

"Oh, I know when he's coming back," cried the bride. "He'll be back to-morrow morning!"

"Well!" cried the elderly woman in surprise. "That's just splendid! By the way when did he go?"

"The bride looked a little confused. "Why," she admitted, reluctantly, he—Harold left yesterday afternoon!"

VICTORIA FALLS.

Gigantic Power to Become Source of Electric Energy.

A company has been formed to develop the great Victoria Falls, on the Zambesi River, in Africa, as a source of electric energy. These falls rank among the greatest cataracts in existence. The total descent of the water is more than 400 feet. At Niagara the total amount of energy running to waste has been reckoned at 7,000,0000 horse-power, but the corresponding energy of the Victoria Falls is said to be no less than 35,000,000 horse-power. When utilized, it is thought that this energy can be employed by working a large part of the South African Rail, way, and that it can be transmitted by cable and the gold mines of the Rand, 300 miles and more away.

Real useful pockets are inserted at these places between the lining apt the material, and are both smart and secure for the purse, handkerchief, etc. Many coats are collarless, as they look better so with the fur ties and scarves. All coats are lined with a satin to match this year, and sleeves, though fall plain, often show a slight fullness at the top. With dresses and blouses sleeves show a tendency to greater elaboration, and may again have puffs, alashings, tucks, or gathers to samrten them. Guimpes or yokes are as fushionable as ever, but not so large. They are often, indeed, only an inch or two deep, just to give a light touch to the top round the throat. Metallic tissues enter them. FASHIONABLE EVENING WRAPS.

These attractive wraps for after-noon and evening wear indicate that such garments are much more elabtrimmed than for some seaorately

sons.

The one on the left is of deep plum colored satin of a heavy kind, and is trimmed in long lines with white fox fur. Animal heads accentuate the trimming and long sleeves drawing | ed up sharply at one point.

The other cost is of amethyst broad-cloth trimmed with embroidery in different shades of purple. A touch of black here and there adds piqu-

with velvet dresses and so forth, there are exquisite models of the large "chapeau de style" which is never turned down all round in bell shape, now, but has the most becoming curves and tilts, with feathers, aigrettes, or flowers, by way of adornment. The new felts are exquisite, long-haired or close shorn, they are silky and supple as velvet or panne, and the colors I find most popular with the best milliners are copperred, bronze, violine, and green and brown so dark as to be nearly black. Then there is a rich beautiful blue, "corbeau," which is all the rage for gowns and hats, and looks lovely with furs. Evening dresses and wraps deserve a chapter to themselves, and so do motor clothes, there are endless novelties in all quarters of the fashion globe, and the new materials baffle description. For evening dresses they are using two shades superposed in mouseline de soie, for example blue and green, blonde and dead-leaf-pale rose and grey, two shades of blue or red, or black over a color. Princess styles are certainly in the majority for the evening, with lots of drapery, and metallic or silk embroidery. Diamond embroidery reigns supreme at Worth's, and a delicious dinner gown of supple black velvet had its bodice and sleeves glittering with the supreme at Worth's, and a delicious dinmer gown of supple black velvet had its
bodice and sleeves glittering with the
fire of millions of brilliants which were
sewn to black tulle in an indefinite pattern, covering it almost, and there were
little dangles hanging like icicles from
the points of the drapery. Then, the
great man showed me a restaurant frock
in steel cloth trimmed with sable and
veiled with a tunic of sapphire blue
gauze. Steel bead embroidery, edged the
bodice-top, and the sleeves were in steel
grey mousseline desoie. But, I must
not fill my letter with fashions so will

Of course it was necessary to do something to protect them from the miscreants and vandals who have been damaging them from time to time, one wonders where the caretakers kept their eyes to allow of such acts of wanton mischief being perpetrated in broad davlight. But the change is no improvement, and artists who were wont to go and learn from the old masters, to study their wonderful technique, and coloring, say that now they see through a glass darkly, so to speak, they miss the little lines of time, the cracks like 'furrows on the brow of ancient art' which told a tale, whilst to even the casual or

that she herself used a lotion for her complexion which was given to her, or which she found in some old collection of recipes, and it had proved her greatest treasure. Hading exclaimed at the idea of the young looking woman talking needing such aids to youth and beauty. The woman smiled and said she was indeed far from young, and that if Mme. Hading would accept a copy of the prescription of her magic lotion she would give it with pleasure. The sequel of the story is that long afterwards Hading found in her coat pocket a little crumpled paper, with the directions for making up the "eau de jeunesse." She thought she would try it, and it proved all the donor had said in its favor. In a few days it did wonders, taking away the tired, worn look, which after hard

Whilst the Cook-Peary duel is being prolonged and nauseum, it is pleasant to see that an Englishman is quietly reaping the fruits of his labors in the direction of the South Pole, which is every bit as much use to us as the other. Lieut. Shackelton is winning golden opinions everywhere when lecturing.

The crowned heads of Europe are all eager to make his acquaintance; he is a true spirit, straight as a die, and an intelligent, i clear-headed sailor and scientist. It is to be hoped that all will come forward and help in the new polar enterprise now being promulgated by Shackelton's old chief, Capt. Robert Scott, R. N. If funds come in, as it is hoped they will do, the expedition will start before any other nation has time to grab the idea, and surely it will be good news to hear that the Uunion Jack is flying gaily at the South Pole, where there or not one or two Old Glories are decorating the North Pole: By the way, when Shackleton was speaking at the somewhat surprising announcement that no one ever had colds in the polar regions. None of his men caught a veating of a cold till they opened a bale of clothing which had been fastened up in England! Those who went off farther north were soon cured; those who stayed by the ship kept their colds for a day or two, no longer. So we must go to the South Pole, where there are no wicked microbes, and if this is not possible, let us have as many open windows and open surroundings as may be. Without expressing any opinion on the subject of the North Pole controversy. I may say that a most curious varied in the properties of the North Pole controversy. SELFSAME ACHIEVEMENT.

The expressions on the various faces listening to the telegram are an interesting study of the emotions they express, Cook, alone, with a thick chain of press, Cook, alone, with a thick chain of pink roses hanging round his neck—like a festival lamb!—has an inscrutable smile as enigmatical as that of the Louvre "Giaconda." It was a regular coup de theatre; some of the people look astonished, some ironical, some dis-quiete! It is a picture worth preserv-ing as having a certain amount of inter-national interest

right and then to the left, at the same time bending their knees up and down, initiating the balance of the aeroplane. They balance for two steps, then do six waltz steps, then two more balancing steps, and six more "Bostons." This goes on for six rounds, and should be most even and smooth and gracefut, with the whole figure working together. Now the machine descends to earth, so the partners glide forward with their unclasped hands pointing to the ground in front and the other two clasped and raised at the back. Six waltz steps are taken, and it is over. It is No. 2, the continuous flying of the plane, which can go on as long as the dancers like. I have just heard something that may interest some of you, especially those who know and admire Jane Hading for her talent as an actress and her attractive personality. Everyone has wondered how she managed to keep so young and fresh without seemingly "doing her self up" in any way. Well, she has told her secret! A long while ago, after she had been acting in a particularly wonderful day, a woman in the audience congratulated her and said sympathetically that to her it seemed sad indeed that Mme, Hading should ever look older than she then did. She went on to say that she herself used a lotion for her complexion which was given to her, or which she found in some old collection of recipes, and it had proved her greatest treasure. Hading exclaimed at the lidea of the young-looking woman talk; it reals and there are dinners, concerts and dances at which all the "assistants" speak in that tongue, it is really reaction, and it she concerts and dances at which all the "assistants" speak in that tongue, it is really reaction, and its kevnote being its really reaction, and its kevnote being its really reaction, and it is earlied to the complexion which was given to her, or which she found in some old collection of recipes, and it had proved her greatest treasure. Meanwhile the coq piume has assured for itself a front place in the millinery world.

Never has there been known such a variety of these particular mounts, a noticeable novelty being the coq brule, an admirable substitute for the costly Paradise plume. While the great double wings, which, in the hands of a millinery expert, can be manoeuvred into alery expert, can be manoeuvred into al most any aspect, are proving a very host in themselves, they are closely followed by an equally varied choice in quilts and original little feather mounts, especially arranged for the adornment of the Cos-ack toque. Great bows and bands of smooth feathers are a popular but by no means exclusive persuasion, and, similarly with the toque of like character, must of nenecessity soon fall into the uncovetable ruck of things. Where the toque is concerned this is to be regretted, since that represents the species of headgear both becoming and practical.

Knitted Coats.

Among the economical garments for school wear are the popular knitted Norfolk jacket and reefer. They are offered by all tailors, but mothers at a distance who have the time to knit may readily make them at home. Girls of all ages wear such coats in gray, white, scarlet, green or the brown shades. Some are handsomely bound with black satin and closed with crocheted buttons. The yarnsh that are necessary for knitting them come in all the standard and fashionable shades. Some, however, are double-breasted. They all have roomy sleeves and turn-over collars, that may, upon occasion, beturned up around the neck. Knitted coats of this are worn over kilt skirts and plain blouse waists.—Harper's Bazar.

If the oaths bill is passed—and it has obtained a second reading in the House of Lords—"kissing the book," the present insanitary and undignified form of oath taking, will practically become a thing of the past. Every witness will be sworn with his hand uplifted, unless he voluntarily objects to being sworn in that fashion or is physically incapable of so taking the oath.

The witnesses who will avail themselves of their option to kiss the book will be even less numerous than those who have been accustomed to exercise

who have been accustomed to exercis

will be even less numerous than those who have, been accustomed to exercise their right to be sworn with uplifted hand. The right has not been exercised, our contemporary adds, because the majority of witnesses, however great their dislike to the insanitary oath, have been unwilling to make themselves conspicuous in a court of justice by making an unusual request.

With the abolition of kissing the book in England the insanitary oath will practically disappear from the civilized world. In France the Judge says: "You swear to tell the truth, the whole truth and nothing but the truth?" and the witness, lifting up his right hand, answers, "I swear." In Austria the witness says, with uplifted hand, "I swear by God the Almighty and All Wise that. I will speak the pure and full truth, and nothing but the truth, and answer to anything I may be asked by the court." Where the Bible has its appointed place in the ceremony it is touched by the hand and not held to the lips.

In Italy the witness placing his hand.

In Italy the witness placing his hand upon an open Bible says, "I swear to tell the truth, the whole truth and nothing but the truth." In Spain the ceremony is similar, though rather more elaborate. Even among less civilized peoples the ceremony of oath taking is destitute of the kiss. A Mohammadan witness, holding the Koran in his right hand, bends down until his forehead touches the sacred volume. Breaking a sauer is one method with the Chinese, slicing off a fowl's head another, blowing out of a lighted candle, all repBA3, resenting, of course, the awful fate that awaits the Chinese witness who does not tell the truth.—Law Journal.

The Bells of the Bastille.

The Bells of the Bastille.

The Bells of the Bastille.

Comparatively few persons have ever heard of the bells of the Bastille, yet they are still in existence. After the destruction of the prison, says the Gentlewoman, they found their way to the great foundry in Romilly, but the manager of the works disobeyed the orders he received and did not destroy them.

Now they are back in Paris, in a private house in the Avenue d'Eylan. On each bell is engraved: "Made by Louis Cheron for the Royal Bastille, in the year 1761." and they are further ornamented with the royal arms and a huge cross.

Prisoner and Wife Give Sensational Evidence at Trial.

Nov. 13.-With tears streaming down his face, Eugene Collins sat in the prisoner's seat in Criminal Court yesterday afternoon and listened to his wife, Mrs. Pauline Collins, tell her life history and her story of her passionate love for Edward Weber, who is alleged to have been shot by Collins while he was walking with the woman in Humboldt walking with the woman in Humboldt Parkway on the night of October 4th. The trial of Collins is progressing this morning before Justice Marcus in Criminal Court and pretty little Claudine Demerest, the sister of Mrs. Collins, is on the witness stand.

Yesterday afternoon was consumed with the taking of testimony from Collins and his attractive wife and when court adjourned last night the multitude was reluctant to leave.

Dr. Fischer, who dressed Weber's wound at the Riverside Hospital, was called as a witness. After describing the nature of the wound and stating that the powder marks on Weber's

the nature of the wound and stating that the powder marks on Weber's arm indicated that the shot was fired from close range, Dr. Fischer said: "I was called to Collins' home to treat Mrs. Collins on the night of September 30th. That night Collins told me that if the law did not take care of his case he would become the law and shoot Weber, who was wrecking his home and driving his wife insane."

I told Collins that if Mrs. Col-'I told Collins that if Mrs. Collins did not change her ways she would have to be confined in an insane asylum or some private sanitarium, for medicine would do her no good," said the physician. With the conclusion of this testimony Assistant District Attorney Bart Shanahan closed his case.

COLLINS A DRAMATIC WITNESS. COLLINS A DRAMATIC WITMESS.

There was a wave of excitement in the court room when Attorney Duane informed the jury that the defense was an absolute denial that Collins did the shooting as is charged. Collins clad in ministerial attire, then walked slowly to the witness stand. His testimony was given in a dramatic manner.

"The first I knew of the shooting," "The first I knew of the shooting," said Collins, "was when my wife came to my room at No. 100 Florida street and, awaking me, said, 'Papa, while we were walking in the park some one shot Eddie. He ran away and I ran home.' I said, 'go to bed little one, you are highly excited." Collins said that he then "curled up and went to sleep."
"Did you ever tell Dr. Fischer that if Weber did not keep away from your wife that you would shoot him?" asked Attorney Duane.
"Never, never!" shouted the witness.

These Rugs are genuine and there's but one odder. These Rugs are genuine and there's but one adjective which can describe them—they're beautiful. They come in all sizes, patterns and colors—from rich, dusky daughters of the tropics to daintily tinted drawing room jewels as delicate in their coloring as the break of a summer dawn.

of a summer dawn.

Our reorganization brought about a decision to hold immediately a sale of every Oriental Rug in stock at a straight reduction of twenty-five per cent. off the special prices marked on every rug. That makes a double reduction—do you catch the weight of this?

We have placed some of these beauties in one of our windows. The

heads of our Oriental Rug Department have also arranged on the third floor a wonderful display which makes an examination of every masterpiece a quick pleasure. An Oriental Rug is like a fine oil painting. It is a thing of beauty, which grows and grows in value and a good one has the subtle power of making its owner jealously fond of it.

Mr. McMurdo spoke first, taking fis subject "Why We Meet Simply Christians." He traced the followers. Christ from the time when they we first called by Him until the present du and showed from the Scriptures the they were first known as disciples, late called believers, then saints, and staleter Christians. The word Christian he believed, was a God given name. People in Hamilton were wondering with and what the people in Ebenezer Hewere. Well, they were simply Christians. So were many, many other they were no better than the saved people in any other place or under an known simply by the name God la given them.

fashion to be known as a Christian, many people called themselves such cause of the earthly glory and influe attached to the name. Things loo very black again until the time of Reformation, but now it is quite popular thing to be known as a Cutan. Such men as Luther, Calvin, Wley, Knox and others were men of the control popular thing to be known as a Chritian. Such men as Luther, Calvin, We ley. Knox and others were men of Go used by Him and blessed by Him. Peop began to follow these dear men instead of following God, and were called afte their names, but they wandered, to certain extent, from the course laid dow by the leaders. Now there are so mai different names and creeds that a youn believer is almost bewildered by the variety and number of denomination and is unsettled which one to join himself to. Why could not all this be eliminated and all the saved take unto the selves no name except that given in the Word of God, Christians? "Thank God said the speaker, "for what Luther, Joh Knox, Wesley, Calvin and others did fus, but let us not take unto ourselve their names, which are not found Scripture, but let us he satisfied an content to meet simply as Christians." Mr. John Carnie spoke from the 5th Romans, on "The State of Man and the Measure of God's Love." He brough out four things in the chapter which as written of the natural man: "withou strength." Of almost equal importance, and correspondingly popular, was the achievement of Canadian exhibitors, which the closing event of the night brought forth. George Pepper's brown gelding, Myopia, of Toronto, won the event by a very clean performance, in which he rose to the height of seven feet one inch. Gossip speaks mysteriously of an impromptu exhibit in the Madison-square Garden ring at the unusual hour of 2. 30 o'clock this morning. The full details of this event, which resulted in the death of one of the best-known horses in the jumping class, are being carefully guarded by those involved. In fact, although it is said that several of the younger generation among the directors and officials of the horse show participated in the events of the early morning, none will discuss the exact nature of the proceedings.

The impromptu session followed a late supper after the close of last night's regular exhibit. The garden was dark, the supper having been held in the directors room, but on the order of someone in authority the lights were turned on. With mone but a few sleepy watchmen to look on, several of the crack jumpers were awakened from their slumbers and brought to the tambark ring. The members of the dinner party erected the brush and rail jumps, and for an hour or more the horses were put through their stunts. One of the horses in the ring was Harry Halloway's famous little jumper, Perfection, which is only 13 hands high. While taking one of the jumps, Perfection fell and broke a leg. Who was riding is a matter of secrecy. Perfection never lived to see daylight again. She was shot within an hour after her accident.

Peterboro' at Parkdale.

Ottawa, Nov. 13.—Everything is quiet in local football circles pending the outcome of to-day's game between the Tiger and Argonaut teams. If Tigers win arrangements will be made to-night for the saw-off at Toronto the following Saturday, while if Argos turn the trick the Ottawa and Varsity delegates will meet Monday to arrange for the Dominion championship saw-off. The Ottawas will spend this afternoon in a practice match against their intermediates. Tom Clancy and Dr. Nagle expect Tigers to win, although they believe Joe Wright's team capable of giving them a good hard run.

Lester Green won the 110 yards footrace for Argonaut football players in uniform yesterday. The race was to have been a curtain-raiser for the football game with the Tigers to-day, but it was run off after yesterday's practice instead. Art Kent was second, Alex. Sinclair third, and Levack fourth. The winner's time was 13 seconds.

if was this way," eaid Butch, after every today's practice instead. Art Kent was second, Alex. Sinclair third, and Levack fourth. The winner's time was 13 seconds.

In the junior city league, the Hurons and Broadviews will play at the North End Park this afternoon. At the Victoria Park the Blue Labels will hook, up with the Tigers.

Why the college football player is in better shape, physically, than the city athlete, is because he spends the winter in doing light gymnasium work, his lungs, heart and muscles are put in good shape so that when he comes out girl in the fall for the football he can stand lots of hard practice at tackling, passing, kicking and signal work. The city athlete usually takes things easy, puts on flesh and yer often goes into a game with the work of the case of the control of the property of the property to the returned from its final practice.

"We sprang a nice surprise at Montreal last Saturday," said Manager Joe Wright, 'and we have one of the same kind in store for the Tigers to-morrow afternoon."

It will be a great game. The Oarsmen have improved a lot in the last two weeks, and are playing a much better game now than they did at the first of the season, while the Hamilton team must win in order to have a chance to play off with Ottawa for the league championship. The Tigers and Argonauts are old rivals, and while there is no ill-will existing between the teams, still the play is sure to be of the most strenuous sort. Then, too, the teams are the heaviest in the league, and that will be at cutside wing. Noreross will take W. Brown's place, as he is now almost fully recovered from the effects of the dislocated shoulder which he received some time ago. There is a possibility of Art Kent playing also, but he will not be used unless it is a bosolutely necessary, as his arm is still sore.

Argonauts will play the same team

In the league and signal work. The city at the leated will help to game only half fit. Among the curious old pieces shown at Green fair were a blue spread 150 years old, done by an ancestor of Mrs. Mehit. Table Mower; a towel woven by one of Burgoyne's soldiers while a captive in the Revolution; a curious pitchippe of wood used by Solomon Jackson while chorister in a Winthrop church in 1800, and old iron dishes shown by Mrs. Amp L. The Logical Cab

Taxicals are fast supplanting the horse-driven cab in all the cities of the world.

The extinction of the horse-drawn cab is proceeding more rapidly this year, so that in another twelve months, perhaps, the hansom, once the typical vehicle, will have disappeared from the streets, except in the outlying districts, where it may linger for years.

The Taxicab is the only logical cab in use to-day

The Public Want Modern Methods

Many of the great fortunes of to-day are built up by those controlling public service utilities. The enormous dividends paid by the companies handling such utilities as the electric light, telephone, telegraph and street car have been amassed because of the demand of the public.

The public are quick to appreciate the advantages of modern inventions and methods.

The public are willing to pay for these improvements; thus explaining the handsome dividends participated in by the shareholders of the companies controlling these public service corporations.

CURIOUS FISH.

Ten Feet Long and Weighing More Then One Hundred Pounds.
One of the most interesting of fish of Japanese waters says the zoologist, s the Oriental sail fish (Histiophorus prientalis). The generic name means the sail bearer and refers to the huge lorsal fin possessed by the species. The fine stands higher than the body above it and is used as a sail before the winds. It is a large fish, ten feet in length and weighing 164 pounds. They swim about usually in pairs in rough and windy weather with the huge fins above the water. It is a favorite food fish and the anual catch is nearly 2,000,000 pounds. The sail fish is caught by means of a harpoon.

played there. Although the Argonauts are confident of putting a crimp in the Tigers' championship aspirations this afternoon, there is not much likelihood of their hopes being realized. Although several changes will take place on the Tiger line-up, the team will not be weakened any, as the new men are every bit as good as those laid off, with the exception of Jack Gray. The team will leave on the G. T. R. special, leaving the King street station at 12.55 o'clock. It is expected that about 400 rooters and supporters will accompany the team. All week local and out- side newspapers have been quoting Outawa piayers as saying that they would rejoice in the defeat of the Tigers, which would hand them the championship of the Big Four. After yesterday's work- out at varsity oval, George Kennedy buttonholed a couple of newspaper men. Trouble was written plainly in the big scrimmager's eyes. "You fellows have been saying that we want Argos to beat the Tigers, said Kennedy, "and I want to correct you. Paris, Nov. 13.—The entire session of the Steinheil murder case yesterday was taken up with an impassioned plea by Advocate General Trouard Riolle for conviction. Mme. Steinheil's counsel, M. Throughout the day Mme. Steinheil scemed terribly depressed. Neither Marietta Wolf, the cook, nor her son, Alexandre, was in the court room to-day, and there was a rumor that they might be arrested to-night.

As the Judge Advocate proceeded he became increasingly severe in his denunciation of the white-faced prisoner, and frequently murmurs of dissent came from those in the rear of the court room.

BRADSTREET'S TRADE REVIEW

C. N. R.'S GROSS EARNINGS

Toronto Saturday Night: The Canadian Northern Railway has come to that point where it is in a position to size up the operations for the year ended the thirtieth of June last. While the result so far as the increase in the gross earnings is concerned was not exactly what the directors had expected it would prove—though, even at that, it compared favorably with the increased mileage operated—the future certainly holds much in store for the company. Already the promoters have under construction five parallel main lines across the wheat belt of the Northwest—a fact that would appear to indicate that the criticism frequently heard regarding the over-doing of railaliel main lines across the wheat belt of the Northwest—a fact that would appear to indicate that the criticism frequently heard regarding the over-doing of railway building in that section has no great depth. When one railway finds it necessary to have five arteries of traffic, there certainly appears to be room for additional companies to feel out other arenues of trade in the same region. The unusually quiet business conditions throughout the Dominion had much to do with curtailing the earnings of the Canadian Northern, but, despite that circumstance, the company's gross carnings, for the first time in its history, crossed the ten million mark, totallnig \$10.581,670. The working expenses were 7.015,405, leaving net earnings of \$3,566,302. The surplus for the year, after the fixed charges were met, was \$646,745.

Petition of the Dreadnoughters to Sir Wilfrid.

Prefer to Have the British Fight Their Naval Battles.

(Canadian Courier.)

"We don't want to fight, but by jingo if we do, We've got the men, we've got the ships,

we've got the money too."
-From an absurd and disloyal old

ballad. To the Right Honorable Sir Wilfrid

Laurier, G. C. M. G., P. C., Prime Minister of Canada, and President of the King's Privy Council: The petition of the undersigned

showeth:

That whereas there are those in both That whereas there are those in both Parliament and press, as well as among the Canadian public, who believe that Canada's contribution to an imperial navy should take the form of ships, built, manned and maintained in Canada; we, the undersigned, believe that such contribution by Canada to the defence of the Empire should take the form of money with which ships may be built, manned and maintained in the be built, manned and maintained in th United Kingdom, for the following rea-

sons:

First.—We are not yet sufficiently advanced in Canada in the art of self-government to elect men competent to administer the affairs of a navy. We are merely colonial, subsisting politi-cally by the consent of an Imperial Parliament, whereof our own Parliament is but an unworthy offshoot, destitute of traditions and of statesmen, wholly lacking in the initiative of self-govern-

sent.

Second.—Canada is not a maritime ation. She has but three of her bounary lines exposed to ocean tides and eafaring ships: with but one river on he east capable of carrying men-of-war a far as the city of Montreal, which hough the comparable parts and the comparabl though the commercial metropolis of Canada, is a village not worth while to Canada. is a village not worth while to defend in time of war, with merely four great lakes along part of the southern boundary between us and the United States, under whose flag we should have the protection of a navy built, manned and maintained in America, and subject to the Monroe doctrine. Neither are our Canadian people sufficiently maritime in their habits to furnish sailors for ships built and manned in this country.

Canadian people sufficiently maritime in their habits to furnish sailors for ships built and manned in this country; in token whereof we submit that our thousands of fishermen on the Atlantic as well as those upon the great lakes and the Pacific are by no means proficient in mautical art and not to be considered capable of learning the business of men-of-war.

Third.—In the event of a war imperilling the existence of the empire, we should prefer to fight by means of Dreadnoughts manned by English, Irish and Scotch substitutes whom we are willing to pay out of our abundant revenues to face the common enemy, in order that we may be left free to till our fields, exploit our forests and mines, and operate our factories in perfect peace as becometh a loyal colonial people earnestly engaged in building up the outposts of the empire.

Fourth.—The establishment of a Canadian navy will lead to the building of shippards in this country; which as a landfaring population we object to for the following good and sufficient reasons:

(a) We are creditably informed that

sons:

(a) We are creditably informed that most of the money invested in the ship-building industry will be furnished by English capitalists; and as a young, aggressive and self-reliant people we are naturally averse to letting the English capitalist do more than furnish funds for the building of railways and the financing of civic dehentures, preferring to secure the bulk of our industrial capital from the United States, who are our neighbors and are already engaged in ital from the United States, who are our neighbors and are already engaged in building factories in our midst much more effectively than could be done by British industrial capitalists. Moreover we prefer to think that the day is not far off when Canada will be isolated from the mother country; when the man from New Zealand so beautifully depicted by Lord Macaulay will sit and sketch the ruins of London bridge—in the day when Britannia no longer rules the waves, and when the greatest island the world has even known will be mere-

ly a vast deserted village, while we in Canada will have become a prosperous independent nation subsisting without war, or fighting altogether in the air by means of airships.

(b) It having been already somewhat brusted abroad that the Canadian Government is in favor of establishing shipyards for the building of warships, certain cities and towns are becoming eagaged in an unhealthy and ungodly rivalry, not in the the Province of Quebee upon the River St. Lawrence, but as well upon the Atlantic coast and in the Provinces of New Brunswick and Nova Scotia; which as a contented, unaggressive people we are inclined to view with alaam, believing that pastoral stagnation is much preferable to industrial rivalry. Toronto, Nov. 13 .- "It is not by the ports of the people, baseball, lacrosse and football, that the Lord's Day is desecrated, but by the aristocratic golf association, with which ministers are connected," declared Rev. J. D. Morrow Lor's Day Alliance, which was held at the Central Y. M. C. A. yesterday, In Toronto he did not know a single ath-lete who trained on Sunday, while he was aware of many instances where these same young men had exercised powerful influence to prevent desecra-tion of the Sabbath. Quite a feature of the proceedings was the acknowledgment of the valu-

imported labor whatsoever.

(d) The general tendency of the said industry will be to augment the manufacturing inetrests of a country which was intended by nature and destiny to be purely agricultural; which design of nature we have already begun to subvert in an unholy manner by pushing our manufactures far towards—a—premier place. was the acknowledgment of the valuable work accomplished by the labor able work accomplished by the labor unions in assisting in bringing about a better observance of Sunday, and before the proceedings terminated a resolution was passed expressing the appreciation of the alliance and urging the various branches to secure the cooperation of local unions.

A resolution was also agreed upon

A resolution was also agreed upor appealing to telephone, telegraph transportation companies to make ar rangements so that such of their employees as were obliged to work or Sunday should obtain one day's rest in

manufactures far towards a premier place.

Fifth.—The history of nations conclusively shows that the establishment of the warship-building industry inevitably leads to the building of ships for the mercantile marine; by reason of the fact that once a country has got ships of war it is more worth the while to have ships of trade and commerce as an object of protection; and this country has instinctively decided to discourage the furtherance and extension of our mercantile marine; in token whereof we would respectfully point out that two years ago the total number of commercial ships registered in Canada was only 7,528 with a total net aggregate tonnage of 700,000 tons. Sunday should obtain one day's rest in the week.

At the afternoon session Rev. T. Albert Moore, general secretary, said that, so far as Sunday work on railway construction was concerned, there was no complaint against contractors en-gaged on the National Transcontinental Railway, who only carried on such work as was absolutely necessary for protec-

a total net aggregate tolaring of 100, 1000 tons.

Sixth.—The voting of money by a Canadian Parliament for expenditure by the Parliament of Great Britain embodies the principle of taxation without representation, which in 1776 was the direct cause of the American Revolution, whereby Great Britain turned a resiless colony into a great conversely rival. At the morning session Bishon Sweeny was elected president. His lordship, in accepting the office, expressed his deep sympathy with the work of the alliance and his appreciation of the honor done

him.

The other officers elected were: Mr.

J. C. MADDIGAN.

Dead Principal of Buffalo School A Former Hamiltonian.

Of the late James C. Maddigan, formerly of this city, whose death took place in Buffalo a few days ago, the Buffalo in Buffalo a few days ago, the Buffalo News says: Principal James C. Maddigan. of Public School Ni. 4, on Elk street, died at his home, 318 Herkimer street, at 5 o'clock yesterday morning. The direct cause of death was typhoid fever, with which he was stricken in August. He had suffered pericalically for some time, having been in the hospital last year, and some of his trouble was due to a severe injury received in a football game when in college, though that is not known to have been a serious factor in his fatal illness.

He is survived by his mother, Mrs. Ellen Madigan, five sisters, Mrs. (Dr.) Frank Drake, Mrs. Hourigan, Misses Agnes and Vera Maddigan, of this city, and Mrs. Hugh Sweeney, of Hamilton, Ont.; also three brothers, Fred M. and John M., of Buffalo, the latter superintendent of the Buffalo Structural Steel Company, and Edward, of Winnipeg, Man.

James C. Maddigan was born in Hamilton, 98 years ago, and woord to Mr. Tuttle Greets Friends Awaiting Toronto, Nov. 13.—The friends of Mr. Thomas Tuttle, whose death in the street railway accident at Vancouver was published a few days ago, awaited the arrival of his body at the Union Station yesterday morning when the train from the West came in.

It was with a shock that they found themselves being greeted by the man they had supposed dead. Mr. Tuttle was almost equally surprised to find hinself alive after reading the very circumstantial accounts of his death which his friends had treasured up.

Mr. Tuttle is employed on the C. P. R. car Dundas, his runs usually terminating at Winnipeg, but occasionally they extend to Vancouver. On seeing his name among the victims of the accident they concluded that he was the man.

Conpany, and Edward, of Whanges, Man.

James C. Maddigan was born in Hamilton 28 years ago, and moved to Ruffalo with his father's family when a lad of 12, the father dying five years ago. He was graduated from No. 26 public school, Masten Park high school, and Hobart College, Geneva, the latter in 1905. It was while a student at Hobart that he received the injuries in a football contest from which he ever afterwards suffered. He was athletic by taste and had been a leading member of the Masten park football team.

After a year in the faculty of Ro

College, Jacksonville, Ill., Mr. Maddigar returned to Buffalo, and was elected principal of No. 25 school, on Lewis street, near the stockyards. When Principal James P. McDonough was transferred to No. 24 last fall, Mr. Maddigan took his place as principal of the larger school on Elk street, which has a registration of 800 and an average attendance exceeding 600. He taught also last winter in the night school of the Technical High. One of his "hobbies" was manual training and he had the happy knack of imparting his enthusiasm and skill to and he had the happy knack of im-parting his enthusiasm and skill to the students. He was particularly hardy with machinery and constructed a good working motor boat wholly un-aided.

Personally Mr. Maddigan was one of the most genial of men and he had a host of friends. He took part in the social activities of the community and was a leading member of the Maccabees and the Knights of Columbus. Superintendent Emerson was profoundly stirred by the sad news.

"Mr. Maddigan," he said to a reporter, "was a young man with a career before him. He was alert, enthusiastic, faithful, progressive and doubtless would have attained to great eminence in his profession. Above all he was a very lovable man, whose loss will be keenly felt throughout the department."

By 9 o'clock everything was ready for the speech-making, and the speakers mounted the paltform amid the cheers

Lieut.-Col. Moore was the one who was picked out to present the senior and junior prizes, and he did so in his usual happy manner, which has always won the admiration of the soldier boys He said that, as a large number of prizes had to be presented and the other athad to be presented and the other attractions would necessarily have to be short and to the point, if justice was to be done to them all. He complimented the men and the winners especially upon the good showing that had been made during the year. The men had worked hard and deserved to be rewarded for their efforts. By their good work they were not only showing what they were made of, but were also helping to keep the regiment in the position it was soo proud of. He hoped the efforts of the men of the regiment would result as favorably in the contests of the future as they had in the past. Lieut. Col. A. H. Moore presented the prizes for the marching and firing competition, and he also flavored his speech with many compliments to the companies which had produced such good men. He said that while rivalry existed between the different companies it was of the good-natured variety, and was conducive to the best results, as had been proven. Lieut. Col. Logie presented the prizes tractions would need attention, the

ducive to the best results, as had been proven.

Lieut.-Col. Logie presented the prizes for the company competition and the Mt.Laren Shelter Trench competition. He spoke of the manner in which the men had displayed their ability and of the hard practice that was required before such good results had been obtained. The companies had worked hard, one and all, and were deserving of great credit for the manner in which they had competed. The shelter trench competition had proven one of the most satisfactory in the history of the regiment. In closing he referred to the time that Lieut.-Col. Moore, who is about to retire, had spent in the regiment, and of the efficiency regiment, and of the efficiency The regiment had respected him and had worked hard under him, and it was largely due to that that the regiment held such a pro-

That that the regiment held such a pro-minent place in military circles.

Lieut.-Col. E. E. W. Moore ably re-sponded, thanking the men for their good work while he was in charge of the regiment, and expressing it as his desire that the regiment would give the new commander the support it had given him and would work just as ably as in the past.

The presentation over, refreshments were served and the 13th Band then struck off into a lively tune, which soon had the dancers on the large floor which had been placed in the centre of the space used for drilling. The dancing was continued until 12:30 o'clock, when the gathering broke up. Special cars had been engaged. d been engaged. The complete prize list is:

Reports of Committees—Delegates Enjoy Themselves.

Toronto, Nov. 13 .- That the officers of the American Federation of Labor who a year ago defied the injunction of a United States court did so with a full knowledge of the consequences made clear by President Sam Gompers

made clear by President Sam Gompers yesterday in an address at the annual convention at Massey Hall.

As the majority of the members of the convention were serving on the various Committees on Resolutions, it was decided to adjourn until 9 o'clock this morning. During the afternoon the committees met. Up till noon over one hundred and twenty resolutions had been handed in for consideration. Many of these will be referred to officials and committees, but the most important will be brought before the convention and debated.

TO ENDORSE GLACE BAY STRIKE. Among the most important of those received was one from the Trades and Labor Associations of Canada asking the Federation to endorse the strike of the United Mine Workers in Nova Scotia; one from the Trades and Labor Congress of Canada asking for the appointment of a special organizer who can speak both French and English to work in Quebec and eastern Canada, and one from the International Union of Brewery Workers asking that the constitution of the A. F. of L. be changed "so that the Executive be not permitted to interfere with the internal affairs of an international union, and so that they may not use State or central bodies to take sides in matters to be adjusted by international unions themselves." If the latter resolution is brought before the convention resumes its sessions at 9 a. m. to-day several of the committees will have reports to make on the resolutions, and the real business of the convention will begin. The convention will post in Convension on Saturlay, as the hall will be required for the massed hand sevents of tanges of the day of the convention will be gin.

the convention will not hold any affer-noon or evening sessions on Saturlay, as the hall will be required for the massed band concert at night, and all the seats will have to be replaced on the ground floor. Besides, the conven-tion believes in union hours. Immediate-ly after the morning session is over the ly after the morning session is over the delegates and their wives will repair to the steps of the City Hall, where they are to be photographed.

Sunday will be a busy day with many of the delegates. At Massey Hall at 3 o'clock a great temperance meeting.

at 3 o'clock a great temperance meeting will be held, to be addressed by prominent delegates.

Mr. D. A. Hayes, Vice-President of the Federation, will speak at the even-ing service in Cooke's Church. THE GRAND BALL.

THE GRAND BALL.

Canada and the United States joined hands last night on the occasion of the ball given in the Labor Temple by the General Committee of the local trades unions of Toronto to the visiting delegates of the American Federation of Labor. Promptly at 8 o'clock the guests entered the hall in the order of the grand march. Mr. Samuel Gompers, President of the American Federation of Labor, accompanied by Mrs. McDougall, President of the Ladies' Reception Committee, led the march, and were followed by Mr. J. O'Connell, of Washington, D. C., Vice-President of the Federation, and Mrs. Carey, of Toronto; and Mr. D. A. Carey, General Chairman of the local Reception Committee, and Mrs. J. O'Connell, of Washington. About 350 persons were present.

LABOR REPORTS.

Only Sixty-Nine Strikes or Lockouts Reported For a Year.

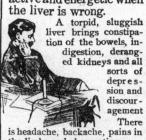

Ottawa, Nov. 12.—The annual repor of the Department of Labor states that in the two years of the Lemieux Act

in the two years of the Lemieux Act, up to March 31 last, fifty-five disputes have been referred for settlement under its terms, and fifty-three were disposed of without strikes or lock-outs.

During the year 315 fair wage schedules were prepared for public contracts, and seventeen complaints were received of non-fulfilment of conditions. The number of strikes and lock-outs, sixty-nine, was smaller than for seven years, compared with 151 the previous year. There also was a decrease in industrial accidents, the record being 1,272 trial accidents, the record being 1,272 fatal and 2,277 non-fatal. Team Prizes:
Tait-Brassey, first prize, cup and \$48.

Homer-dear came home from the that afternoon. He found Blossom ing for him—but not with the custo ing for him—but not with the customary cheery smile of welcome. Indeed, for all the evidence she gave of being aware of his presence Mr. J. might just as well have remained at the bank. She scarcely looked up from her sewing as he entered. Homer-dear drew up a chair beside her and opened the evening paper leisurely. "And what has my little wife been doing all day?" he inquired quite senti mentally.

After an ominious pause Mrs. J. replied, insinuatingly:

"And what has my husband been doing—this afternoon."

"I want to ask you a question and I
want you to answer it homestly."

Homer-dear sat up.

"Well," he agreed, with dignity, "I
will. Fire away—but I resent the implication that I have not always answered your questions truthfully. What
is it?"

"Were—were you at that horrid burlesque theatre this afternoon?"

Homer-dear threw back his head and
roared. Whereupon Mrs. J. became all
the more perturbed and suspicious.

"My, my!" exclaimed Mr. J. "What a

Mr. J. jumped up from his chair.
"Now, look here, Blossom," he ex-elaimed, with visible traces of irritation, "what's the matter? You asked me a question and I answered it truthfully. What is it? Come! Out with it!"
"Are you sawe you have not even here."

"Don't understand what? Tell me!"
"Now, Homer," Mrs. J. began to explain, in a frigid tone, "you see, it was this way. Aunt Amelia and Flo and Mrs. Smith-Jones and I were all downtown shopping this morning. We came across Mr. Thompson—the Mr. Thompson we met at the Smith-Jones' last winter, you remember. He stopped and chatted a while with us, asked after you and remarked sort of casually that much to his regret he had seen you but once since last winter—and that one time was a week ago coming out of the Variety the atre! You can imagine how I felt—right before Aunt Amelia, my own sister Flo, and Mrs. Smith-Jones! And I've said to them so often that I have no doubt in the world about your not going to such places of amusement!"

It was fully a minute before Mr. J. revered his self-possession.

Then she declared, with sobs, that she would a thousand times rather have had him tell her the truth about it and admit his guilt like a man than to lie to her and try to wriggle out of it on a pretext. She wound up by flouncing into the next room and throwing herself, weeping, across the bed.

Hurricane Works Havec on Newfoundland Coast.

St. John's, Nfld., Nov. 12.-Thirty fishing vessels and trading schooners are ashore at various points along the coast of Newfoundland and a halfdozen craft are missing, driwn to sea and possibly sunk, as the result of a gale of hurricane proportions which has raged for three days. Up to a late hour to-night no lives of sea-men on vessels accounted for have been lost

Rough on the Deacon.

A rather pompous looking deacon in a certain city church was asked to take charge of a class of boys during the absence of the regular teacher, says Lippincott's. While endeavoring to impress upon their young minds the importance of living a Christian life the following question was propounded:

"Why do people call me a Christian, children?" the worthy dignitary asked, standing very creet and smiling down upon them.

"Because they don't know you," was the ready answer of a bright-eyed little boy, responding to the ingratiating smile with one equally guileless and

to us because we are used to stranger things. Christ was and is the world's greatest revolutionist. For judgment He came into the world; to reveal to babes the things that are hidden from the wise and prudent; to spread before the poor the riches of the kingdom of heaven; to exalt the humble and to abase the proud; and, above all, to bring right-cousness and eternal salvation to sinners. It seems strange to us, as it did to the disciples, that it should be difficult to bring a rich man into the kingdom of heaven; but many of us have never known one rich man to be brought in, though we have all witnessed the conversion of many poor people. We are almost shocked when some sinner of the vile sort, some Matthew or Magdalene, comes up out of the fillith of iniquity into the life of righteousness. We are offended at Magdalene's nard, and we would like to put on gloves before giving the converted publican the right hand of fellowship; but our Lord puts them before the best Pharisee of us all. He says: "They to whom much is forgiven love much." He is well pleased with their love and zeal. Who knows whether they will not go into the kingdom before us? This exaltation of the low and abasing of the lofty is "to the greater glory of God." "He hath put down the mighty from their seats, and exalted them of low degree." Mary's song of praise cannot be improved by making it read: "He hath made the mighty mightier, and hath taught the lowly to know their place." Nobody could be mean enough to sing that. It is the glory of Christ that he is the Lord of the world, and that he makes the partiality of fate, the injustice and cruelty of the world trivial things and things soon to be forgotten. We thank thee, thou Lord of heaven and earth, that thy mercies are from

PRAYER.

"Hitherto have ye asked nothing in My name." John xv. 24. This is not the language of rebuke; they were not blameworthy. Aforetime they had asked John taught his disciples, and he gave for a simple formula, similar to what them what they asked. Here is a Jewish teacher teaching Jews; no more. He gave them all they could bear, but now he looks ahead. He is in a shipyard, and the frame of the gospel ship is rising. You can see through her timbers; they are not enclosed; the decks are not on; the bulwarks are not up; the launching day is to come, but not yet. On the day of Pentecost was the grand launch, not before. The church was born, the day had come. This is the red-letter day of the church.

Ye have asked nothing, no fault of Our Father in Heaven, we thank Thee for all the rich treasures which Thou hast provided whereby we may grow in grace and in the knowledge of our Lord and Saviour Jesus Christ. We have to and Saviour Jesus Christ. We have to confess with shame that we grow but slowly in the divine life, and that our lives are warped and stunted, so that we are reflecting but feelby the spirit of our Master. Help us to deal faithfully with ourselves, to lay aside every hindering weight, to conquer the sin that so easily besets us, and to open our hearts in prayer to Thee, so that into our lives the Divine fulness may flow, and we shall more and more become like Christ. Amen.

A WHIRLPOOL OF FIRE.

(By A Banker). The recent disturbance of the tele-graphs throughout the world for a space of several hours is surmised by scientists to have been caused by a convulsive outburst of electric energy in the sun of exceptional magnitude, synchronizing of exceptional magnitude, synchronizing with a large "sunspot"— (apparently black, but really brighter than the brightest flame we can produce)—a hauge yawning gap hollowed deep down into the body of the sun; a terrible solar abysm (though not of exceptional magnitude) computed to have been of sufficient capacity to contain considerably more than a hundred globes, equal in size to our earth.

sufficient capacity to contain considerably more than a hundred globes, equal in size to our earth.

Perhaps the most startling and the most inconceivably magnificent spectacle which it is possible for man to witness, is one of these abysmal, fathomless gulfs in the glowing incandescent gases of the solar photosphere as viewed through one of the modern giant telescopes. Cyclones of wild fire whirl and rage in convulsive spasms; now aweeping around the fiery gulf with terrifice energy; now gyrating and rotating, a very whirlpool of glowing tongues of flame; now with a throbbing quiver merging with the blazing turmoil of the encircling cliffs of fire. Hurricanes and tornadoes of mighty flames swirl hither and thither; vast jets of burning gases leap out of the abysm, high into the aether, and brilliant eddying cloud masses hover over the fiery disorder, whirled round and round and hither and thither by the cyclonic hurricanes and whirlwinds. And now—and this startling phenomenon, as observed shortly before the magnetic storm which occurred several years ago, was believed to be the immediate cause of the ly before the magnetic storm which oc-curred several years ago, was believed to be the immediate cause of the "atorm"—a vast, transplendent globe, or sphere of, doubtless, electricity, of a dazzling brilliancy far exceeding that of the sun itself issues from the wall of the fiery orater and flashes like a gigan-tic meteor across to the opposite side,

the sun itself issues from the wall of the fiery crater and flashes like a gigantic meteor across to the opposite side, literally a discharge of globe lightning, the nucleus of which must have been a magnitude far exceeding that of the earth itself, and so intense that, if the theory be correct, it disorganized the electricity of this planet, and perhaps also of every other planet in the solar system.

And if the energy of our own little luminary be so tremendous, what must be that of some of the giants of the stellar world—mighty Sirius, magnificent Arcturus, or fiery Aldebaran' And yet He who by His omnipotent flat created them all, He "who made the worlds," in His infinite love towards His creatures, in order to save them from the punishment due to them for breaches of His eternal laws. Himself bore that punishment, thereby justifying and vindicating all who come to Him for a passport to the glory-land.

OUT OF THE DEPTHS.

OUT OF THE DEPTHS.

From the very lowest there is always a path to the very highest. Lazarus passed easily from the street and the dogs to the angels and Abraham's bosom. Yet he was probably not more attractive or better than many a Lazarus in our streets. The geologist looks always in our valleys for the reests of ancient mountain chains, and he looks on mountain tops for the sediment of ancient seas. To him it does not seem strange that valleys have been exalted and that mountains have been brought lor, nor does it seem strange to any of us. We look in the hovels of Cairo for the descendants of the Pharaohs, and we do not think it strange that the world's salvation has come from a race that the Pharaohs have persecuted despised. These things do not seem strange.

Paul a Prisoner—In Rome.—Acts
28: 11-24, 30, 31.

Commentary.—I. From Melita to Rome (vs. 11-16. 11. After three months—Probably they remained there so long because there was no favorable opportunity for them to go to Rome.

Castor and Pollux.—Castor and Pollux, the name or sign of this vessel, were twinheroes, sons of Jupiter, and favorite gods of the Greek and Roman sailors. 12. 13. Syracuse ... Ribgelum.—Pute-oil—Their first stopping-place was Syracuse, the hief city of the province of Siely, eighty miles north. Here they already the tarried three days for purposes of trade. The truther This is at the "toe" of the Italian boot, opposite Sicily. After one day's detention, a fair south wind enried them swikly northward, 180 miles, to Puteoli. 14. We found brethren with whom they were permitted to remain seven days for rest and Christian fellowship. 15. Appii forum ... three taverns—The journey from Puteoli to Rome, and the Three Taverns, ten mile mourer, Paul was met by Christian broater, Paul was mot by Christian broater, Paul was met by Christian broater, Paul was mot by Christian broater, Paul was met by Christian broater, Paul was mot by Christian broater, Paul was met by Christian broater, Paul was met by Christian broater, Paul was mot by Christian broater, Paul was mot broad, and pepaled, was too much engaged in his deaucheries and pleasures to care with for such a man as Paul or such accusations as were made against him by the entire known world. "Within a circuit of little more than ten miles, more than two millions of inhabitants were crowded, of whom about one million were slaves." Paul ... by

much for such a man as Paul or such accusations as were made against him by the Jews." This lenity was probably due to the commendation of the centurion Julius—Cam. Bib. With a soldler—The custom was to chain the prisoner by one hand to the guard. To this chain the apostle frequently makes allusion in the epistles to the Philippians, Colossians and Eplessians and his friendly note to Philemon. all of which were written during this imprisonment. See Phil. 1: 13; 16; Col. 4: 18; Eph. 3: 1; 4: 1; Philem. 9, 10.

In 1. The first interview with the Jews
II. The first interview with the Jews
tow. 17-22. 17. After three days—Paul
doubtless met the Christians first. This
occupied three days. He then invited the
leaders among the Jews who were not
Christians to meet with them, that he
might preach the gospel to his fellowcountrymen in Rome also. Men and
brethren—"This address to the assembled Jews is of a personal nature, and
is intended to counteract certain prejudices which the Roman Jews might entertain, in consequence, partly, of Paul's
imprisonment, partly of the fact that he
lad appealed unto the emperor, and
partly of any slanders possibly brought
from Judea." Delivered prisoner—In as
mild terms as possible he recounts his
uncalled for accusation by the Jews in
Jerusalem, who delivered him into the
hands of the Romans. 18. Let me go—
He narrates briefly the events given in
chapters 21 to 26. The Roman officials
repeatedly failed to find cause of offense in him.

19. To appeal—Paul declared that his
appeal to the Emperor had become indispensably necessary, because the Jews
opposed his acquittal, to which the Roman authorities judged him to be entitled.
He states that it had not been his intention to bring any accusation against
his people before the Emperor. 20. Hope II. The first interview with the Jews (vs. 17-22. 17. After three days—Paul

tention to bring any accusation against his people before the Emperor. 20. Hope of Israel—The hope of Israel was the general expectation of the Messiah. In Jesus Paul believed that the expected Saviour had appeared, and for preaching this he had been attacked and made a prisoner. He held the same faith as all the Jews, only going in this matter further than they, in that he believed the ther than they, in that he believed the ancient promise was now fulfilled. We, can see from the reply of the Jews that he understood their position exactly.—

Gentiles.

IV. Paul's residence an dministry in Rome (vs. 30, 31). 30. Two whole years—"Why he was not prosecuted before the emperor during this time is not known. As there was no prosecution, Paul was suffered to live in quietness and safety. Nothing certainly is known on the subject. It is evident, from 2 Tim. 4. 16, that he was at some time arrainged before the emperor; but when, or what was the decision, or why he was at last set at liberty, are all involved in impenetrable obscurity."

31. Preaching. and teaching— Paul

ed in impenetrable obscurity."

31. Preaching and teaching—Paul did a great work during these two years in Rome: 1. He preached the gospel to all who came to him. 2. He wrote several epistles which were by far the most important part of his prison activity. Questions.—Give the leading events that took place on the island of Malta. Describe the journey to Rome. How want Paul guarded? Whom did he call together? What reason did he give for being in chains? How did the Jews reply? Where did Paul dwell in Rome? What gospel work did he do? What epistles did he write? When, where, how did he suffer martyrdom?

suffer martyrdom? PRACTICAL APPLICATIONS.

I. Proving God's word. "We came to Rome" (v. 16). At last Paul was in Rome. He had written to the Christians Rome" (v. 16). At last Paul was in Rome. He had written to the Christians of the city, "We know that all things work together for good" (Rom. 8. 28). His coming to them was a vivid illustration of the truth. It had been his heart's desire to preach the gospel in Rome (Rom. 1. 9-13). It had been the Lord's promise (chap. 23. 11). God removed all obstacles, provided that the apostle should go with a military escort, that his expenses should be paid from the royal treasury, that he should enter Rome without an accusation against him (v. 21) and under the protection of Julius Priscus, a man of influence. So "all things," the mob at Jerusalem, the injustice of Felix, the irresolution of Festus, the powerlessness of Agrippa, the shipwreck, the bonds, did "work together." for the accomplishment of his heart's desire. Man's obstacles became God's agents "for good."

II. Paul's message. "Some believed some believed not" (v. 24). The true gospel teacher is a sweet savor of Christ, in every place where he gives his message "in them that are saved, and in them that perish" (2 Cor. 2: 14-16). Our reward will have reference to our message, not to its reception. We are embassadors for Christ (2 Cor. 3: 20).

message, not to its reception. We are embassadors for Christ (2 Cor. 5: 20), to be seech men to be "reconciled to God' (2 Cor. 5: 20). We shall be rewarded. though our message of peace be haught ily refused. We are fishers of men, re sible for tackle and bait, and posisponsible for tackle and bait, and posi-tion and faithfulness, not responsible for catching many or few. We are sowers bound to scatter the good seed of the word, but rewarded accordingly to our faithfulness, and not according

to our faithfulness, and not according to our harvest.

III. Inspiration. 1. God speaking by man for man. "Well spake the Holy Spirit by Isaiah the prophet" (v. 25). "God spake in time past unto the fathers by the prophets" (Heb. 1: 2; 2 Kings 21: 10). "The Holy Spirit by the mouth of David spake" (Acts 1: 16; 4: 24, 25). A psalm of Moses reads, "To-day, if ye will hear his voice, harden not your hearts" (Psa. 95: 7). The writer to the Hebrews, quoting it, declares, "Wherefore as the Holy Spirit saith, To-day, if ye will hear his voice, harden not your hearts" (Heb. 3: 7, 8). 2. God speaking through man to man.

saith, To-day, if ye will hear his voice, harden not your hearts" (Heb. 3: 7, 8).

2. God speaking through man to man.

"Go, and I will be with thy mouth and teach thee what thou shalt say" (Exod.

4: 12, 15). A live coal touched the lips of Isaiah, and then he was bidden to "go and tell" (Isa. 6: 5, 10). At Pentecost "they were all filled with the Holy Spirit, and began to speak with other tongues as the Spirit gave them utterance" (Acts 2: 4). The New Testament writers, quoting from the Old, declare, "That it might be fulfilled which was spoken by the Lord through the prophet" (Matt. 2: 15).

IV. Preaching and teaching. Paul preached and taught "with all boldness" (v. 31, R. V.) He never sought the approbation of the crowd, nor strove to please the ear of the people. He never thought of himself, only of his message. He dared to tell those obdurate Jews that they were rejected, and the salvation of God was sent to the Gentiles because their hearts were gross, their ears dull and their eyes blinded (Matt. 3: 15). So to-day we should dare to declare to hardened sinners that they are closing their eyes to the deformity of sin, the vanity of the world, the beauty of holiness the purity of Christ the glory of God, the desirableness of theaven, and the certainty of hell. How the ancient Egyptians conducted a State postal service. How the ancient Egyptians conducted a State postal service more than 2,150 years ago is shown by a papyrus on view at the Imperial Postal Museum in Berlin. It dates from the time of Ptolemy Philadelphus, who reigned, says the New York Sun, from 230 to 247 B. C., when postal deliveries were confined to stations along the Nile. The papyrus is of the nature of a waybill and bears the signatures of five pestal officials who would correspond to the present sorters, postmen and branch superintendents. The document reads somewhat as follows:

On this, the 16th day ... I, Alexander, received the following: For apploints of the Exchequer, I letter packet; for Apploints of the Exchequer, I letter packet for Menodorus, I letter packet; for Chelos, I letter packet to Bivered the above into the hands of Nicodemus, this the 17th day ... It is noteworthy that the time of the dispatch of parcels is given with routine-like regularity. Mention is further made of letter packets to the chief of the elephant hunt; to Theogenes, the tax collector; to Zioles, the chief of the exchequer at Hermopolis, and various other departmental chiefs.

ERHAPS, in friendship, I might be led to obtruding advice upon you, if you extended some slight encouragement."

Leroy glanced rather sullenly into the face of the speaker, a face that held an ated hint of earnestness behind its bantering smile. But it was hard to be sullen with Boyston.

"I think in all probability I already know what you would say." he answered, after a pause. "I've heard enough in half whispers and seen enough in eye talk to form material for a guide through life," he added, bitterly.

"You mistake," said Boyston, disposing himself comfortably in the stern of the rowboat. "I prefixed my offer by saying 'in friendship.' I regard it as entirely unlikely that any one has yet furnished you with a passage under that chapter heading."

The two naval officers were out for an excursion from Norfolk. Leroy was idling with the oars of their little snubnosed craft. On in the Roads a sloop of war and a smaller armed schooner breasted the rising tide with stiffened hawsers.

Leroy, for all that he had instantly thrown himself on guard against the first word that showed the drift of his friend's thoughts, was conscious of a sharp curiosity to know what the other might say to him For months he had felt the pressure of critical and adverse comment among those about him. The at-mosphere in which he moved had been charged with Wherever he went an exasperating, sidelong leer of cynical amusement had followed him. At least, so

he had come to feel.
"Well, what if I extended that slight encourage nent?" he returned, with some hesitation.

"That opens up quite another field," said Boyston, with his lazily humorous smile. "If you are wondering about the results, it's quite possible you'll try to throw me out of the boat before I've finished.

"The trouble with you, Leroy," he went on more briskly, sitting up, "is that no one was ever permitted to chase you up the street with a hazel switch or throw stones at you or call you names or shake you out of yourself. You're too confoundedly touchy and self-serious and romantic. And, beyond that, you've an absolutely fiendish temper. There," he added. with a deprecatory gesture, "that's a sample, and I'm

Something in the whimsical transition touched the other's rudimentary sense of humor and he found the grace to laugh. "I stood that well," he said. "Suppose you slap on sail."

"And you won't fly into a typhoon or anything of

"No. It will be amusing."

Led Him to Strike.

Royston saw clearly enough that the mood was passing one, foreign to the gloomy, mystical and wholly vain character of Leroy. He foresaw, too, that the license he sought could lead to no result, and his easy impulse was to draw back. But a certain reserve of dogged belief in exhortation, a heritage. perhaps, from his roundhead ancestors, led him to

"Well, then, of course you know it's aboutwoman," he began, awkwardly. Leroy nodded, and a shadow fell athwart his thin, pale face. "As you say, you've gained a fair idea of what people think.' his companion went on rapidly. "but it isn't that I want to repeat gossip. I'm not a meddler. But I speak from my own knowledge. Leroy, when I say that she is bad, cruel, and wholly unworthy the attention of you or any other decent man.

"Hold on now!" He held up a hand before Leroy's impetuous gesture. "I have your permission, and, by hookey. I'm going to run this out. From my own knowledge, I said. Listen. I'm older than you, six years older in the service. Will it make the thing any plainer when I say that in my first winter here I went through what you are going through now? And with the same woman! I know her, Leroy, better than you do; better, I think, than you ever can.

"She swept me stem and stern, as she has you She was forty then. You needn't glare. This isn't bearsay you're getting now. A marvellous woman, I grant, but just about twice your age. Do you understand? Leroy, there came a time when I saw the soul within her. I say, keep away from her, Leroy, you will see it some day, and it may be too late.'

Both men were breathing hard as Boyston's crisp, hard phrases came to an abrupt halt. Leroy had dropped the oars and his hands were clenched. He unclasped one to pass it across his face with a be wildered air. Then the glitter broke in his eyes and he fixed Boyston with a savage glance. His words came low and fluttering as he rose, half crouching.

"That's all. Do you hear? That's all. Damn you! Wait till I get a grip, a grip. I'll tear the throat from you." He moved stealthily along, holding by the gunwale, fragments of speech whimpering from his lips. A quick wave of fear passed over Boyston, for flash he recognized something that made his interference worse than useless-the essential madness of Leroy. Even while the creeping menace ap proached him he had time to cry to himself that he was too late, that the woman had worked her will upon this victim.

Then he awoke swiftly to action and Leroy stopped short, staring into the levelled muzzle of a short barrelled pistol. The threat of death behind the cold. round eye of the weapon reached the disordered brain and Leroy sank back on his thwart. The whirling wrath ebbed and he sat listless, looking out over the stretch of water to the war vessels at an chor in the Roads. Boyston, suddenly embarrassed, lowered his pistol and watched the other curiously.

Minutes passed without a word between them. Then Boyston broke the silence in a matter of fact tone.

"Yes," said Leroy, listlessly, and he picked up the oars once more. It was a long and unpleasant jour-After landing the men separated without salutations. Leroy hurried along a street that led to the southern outskirts of the town.

came down the stairs and greeted him, taking both his hands in hers with the quick soft pressure that had been his welcome upon recent visits. If he had had a question ready it fled at the touch. He could but hold her and gaze upon her. Truly, she was a marvellous woman, tall, regal, splendid, with a warmth of coloring and perfection of form that brought to his mind some rich, smooth, subtly scented fruit of the tropics. Another might have said that her maturity was too pronounced, might have thought her too exotically vital, but Leroy, fascinated, pos sessed by her beauty, was conscious only that to him

They sat and talked, and after a time the young man thought of the happening of the day and the reason for his seeking her out immediately. He spoke of it timidly, mentioning Boyston and intimating that there had been a quarrel over words of his.

"Another of them," she answered, nodding. "Paul, do you think that I have lived here so long without making enemies? It has been my misfortune, and still, in a way, my happiness, that there have been few I could call my friends." The glance that accompanied her speech thrilled him. The theatrical and studied effectiveness of her manner seemed sublime nobility in his eyes. She rose and stood above "I know this man Boyston, and others. You will find many of them here in Norfolk, in the harsh, scandal loving circles of the navy, who take no shame to attack * woman, to drive sharp shafts of hate and lying ridicule against her name."

Her Opportunity.

She was pacing the floor with magnificent stride, one hand held hard upon the other. "What way have I for defence? How can I strike back? I had been waiting for this, that they should whisper vile things to you, Paul. And I had promised myself that when the time came I would tell you the story of it all. I have never told it yet. Her passion fired him and he leaned toward her eagerly. She passed and repassed before him, head erect, eyes flashing, with all her magnetism aroused and all her force exerted for the part she was to But there was truth in her words. She had waited for this moment-fifteen years. She had winnowed man after man, and all had failed her, all but Paul Leroy. Him she was determined she must win. She led him deftly, with master hand, for she had lived, had kept her youth, had battened and thrived and grown desirable in the hope of one consummation—the sating of her revenge. She stopped and faced him at last. "I have never told this to any living person," she began, "and perhaps that fact may add solemnity to what I am about to say. For me, God knows, it is solemn enough, as you shall hear. Years ago, so long is it now that I am afraid to remember, I met a man. I was a young girl, he a dashing, handsome officer. I gave him my love, and he returned it. We were to have been married."

She pansed, apparently overcome with emotion, and he writhed in his chair. She resumed in a tense voice. "Suddenly there came an order sending him to a distant port. He comforted me and promised to a distant port. He comforted me that we should have the cerem me that we should have the ceremony on the day he sailed. Paul Leroy, the last sight I had of that man—the last, I say—was the day he made me that promise. He did not come again. I learned that he had gone to his vessel and had left the country."

Decatur lowered the letter he was reading and looked thoughtfully into the fire. It was early in January, 1820. For more than a year he had been aware of an increasingly malign influence exerted upon his life, working silently, unswervingly, im-

for a meeting between Barron and myself?

"He has renewed his correspondence these three months," answered Decatur, simply.

"Certainly there is no shadow of necessity for such an affair," spluttered Bainbridge, in whom fears long set at rest were suddenly revived. "The man must be mad. You have dealt most patiently with him, Stephen. You have given him every honorable explanation while preserving your own reserve. It was definitely understood that all difficulty had been smoothed between you."

"So it was," said Decatur, "but he conceives that I have repeated my offences. Bainbridge, it is not Barron who has moved in this matter. He is a weak, well meaning soul, though hot tempered. But I have much regard for him and I feel assured that his in dependent judgment would not encourage such a hounding course as he has pursued. ter proved to be an order from the British vice admiral to search the Chesapeake for deserters from the British navy.

Barron refused to allow such a search and the Leopard opened fire. The Chesapeake, newly from the shipyards, was not in full preparation for combat, and Barron struck her colors. She was boarded, the crew was mustered and four of them were taken as alleged British deserters. When news of the outrage became public there was an outbreak of fierce indignation and a court of inquiry was appointed. Decatur served on this court against his will. He informed Barron's counsel that he had already formed an unfavorable opinion, but no protest was entered against him.

The finding was against Barron and he was suspended from command in the navy for five years. He engaged in the merchant service and at the end of his suspension the War of 1812 was in progress. He was very slow in reporting for duty and did not return to the United States until 1818. When, after this delinquency, he sought restoration to the service he was opposed by all the navy commissioners, and particularly by Decatur.

Barron had believed that Decatur was moved by personal enmity from the first. He was confirmed in this view he his later disappointment. He protested rather sharply. Decatur answered in a series of mild, sane, reasonable letters, in which he gave in detail his reasons for opposing Barron. He based them upon feelings of public duty alone and distinctly disavowed any hostility. After considerable correspondence Barron apparently was satisfied.

This was the story that Bainbridge went over in Decatur's Washington house that night, and he conclusively proved, to his own satisfaction, that the renewal of the correspondence could have no more se-

did not differ with him further and his old triend had quite argued himself into an easy state of mind again before he took leave.

On January 16, 1820. Commodore Barron wrote Decatur that whenever the latter would consent to meet him he was at liberty to consider the communication as a challenge. Decatur replied, naming Commodore Bainbridge as the one fully authorized to act for him. On March 8 Captain Jesse D. Elliott, representing Barron, conferred with Bainbridge on board the war vessel Columbus, which then lay in the Potomac. The terms agreed upon were as follows:—

"It is agreed by the undersigned, as friends of Commodore Decatur and Commodore Barron, that the meeting which is to take place between them shall take place at nine A. M. on the 22d instant at Bladensburg, near the District of Columbia, and that the weapons shall be pistols: the distance, eight paces or yards; that, previously to firing, the parties shall be required to present, and shall not fire before the word 'one' is given, nor after the word 'three;' that the words 'one, two, three' shall be given by Commodore Bainbridge."

Heard with Despair.

Heard with Despair.

On his way to visit his principal Bainbridge met friends of Decatur, who eagerly inquired as to the conditions of the agreement. When he told them of the distance named they were in despair. They reminded him that a short distance was all in the favor of the older man and that Decatur, as the challenged party, had the clear right to the advantage of a greater space. This view had escaped Bainbridge, who hastened to explain his mistake to Decatur. The latter had deliberately refrained from suggesting any such advantage to his second and assured him that he was satisfied. His one comment was:—

"Bainbridge, do you know that this is the fourteenth anniversary of my wedding day?" Bainbridge stoutly informed him that it was a good omen, but Decatur shook his head.

When others remonstrated with him concerning the terms he said:—"It is too late to make objections. If other terms had been fixed it was my determination not to return his fire. Now all I can do is to wound him in a part not vital."

"But you may pay your life for that," said one.

"I cannot help it," replied Decatur. "I would rather lose my own life than take that of a fellow creature against whom I have no ill will."

It was with such sentiments and such intention that Decatur drove with a few friends to the field at

"By whom is he egged on?" asked Bainbridge, mystified.

"I will put no name to it," said the other. "But there is a strange incident of my early life which, rightly or wrongly, I have always associated with these frenzies of Barron's. Call it instinct if you like. I have never tried to verify it, nor do I find it consistent with bonor to do so now.

"It was in 1806, a short time before my marriage. I met a young woman at the home of a friend, and for some weeks saw her from time to time. It is not seemly, nor is it recessary, that I should go into unpleasant details of our acquaintance. Enough that I

rather lose my own life than take that of 3, fellow creature against whom I have no ill will."

It was with such sentiments and such intention that Decatur drove with a few friends to the field at Bladensburg which was the scene of so many deadly conflicts. The opposing party was awaiting them. The ground sloped a little, and Commodore Barron, who won the choice of stands, chose the lower end as most favorable to hitting his adversary in a vital spot. After the weapons had been loaded and they were in position Bainbridge repeated the instructions and warned them that he would count quickly.

"Have you any objection to saying them now as you intend to give them?" asked Barron. Bainbridge compiled with the request.

The two men, ready for combat, were gallant and dignified. Neither showed the least concern or nervousness. They eyed each other calmly for a moment. "I hope, sir," said Barron, addressing his opponent in a steady voice, "that if we meet in another world we shall be better friends than we have been in this."

'I have never been your enemy, sir," returned Deseemly, nor is it recessary, that I should go into unpleasant details of our acquaintance. Enough that I have never had to reproach myself in any degree for my share in it. The incident was brought to an abrupt termination by a violent misunderstanding of my intentions and motives on the part of the woman. Hers was an ill balanced, rengeful and uneven nature, with unexpected and shadowy depths.

"I thought that the matter was over, indeed, I had almost forgotten it, when, some six years later, I was almost drawn into a meeting with a man with whom I had no possible grievance. It was sharply brought to my notice afterward that the man concerned had been deliberately urged to challenge me by this same woman. The reasons for her persistent malignancy lie in her character, which I cannot fathom. But, Balphilder I feel, with the character that the

we shall be better friends than we have been in this."
"I have never been your enemy, sir," returned Decatur calmly. As afterward pointed out, there was an opening for a reconciliation here, but neither second made the necessary suggestion.

The spectators stood aside.
"Present." shouted Bainbridge sharply.

Both duellists brought their weapons to a level and took careful aim.
"One, two"—began Bainbridge rapidly.

At the second count both men fired so exactly together that but one report was heard. Almost instantly, as if a giant hand had seized him from below, Barron sank to the ground. Decatur stood a moment, gazing at his adversary through the drifting smoke wreath. Then he pressed a hand to his right side and collapsed. "But does the letter mention her?" referred to as a man and is given an initial as designation. But that does not change my conviction. She could not well carry on her plan in person. She has some go-between. I do not know him nor do I care to search him out. The result of the whole affair is that Barron will not rest satisfied until I meet him. So be it. If he continues to force me I must, in justice to myself, give him his will. I regret it, Bainbridge, deeply."

Bainbridge, more uneasy than he cared to show, protested that Decatur's idea was fanciful and tried to shake him from it with a biuff laughter. But the great sea fighter only smilled calmly and held to his position.

"Why, of all men, should your termagant Borgia pick old Barron. He's no marksman. If I mistake not he can scarce see across the room. One would as soon chose a blind and ancient dray horse for a duellist as he," insisted Bainbridge.

"What matters that" said Decatur. "He is still sturdy, can still puil a trigger. A lucky shot, a favoring chance may speed his bullet. And he is the only man now alive with whom I have ever had a difficulty. Barron is as good as another for her purpose." great sea fighter only smiled calmly and held to his

ment, gazing at his adversary through the drifting smoke wreath. Then he pressed a hand to his right side and collapsed.

"I think I am mortally wounded." he said as his second rushed to him. "I wish that I might have fallen in defence of my country."

It was found that the ball had passed through his abdomen. Barron was wounded in the thigh, as Decatur had planned. Decatur was raised and supported a short distance, but could not endure the pain. In their preoccupation his attendants had not observed the direction they took, and when the naval hero sank again he was lying almost by the side of Barron. Barron believed, as did his seconds, that he also would die. During the excitement that followed the two men were left by themselves within a few feet of each other. They carried on a conversation as they lay there, both expecting death. What they said has never been known, but their tones were friendly. It is likely that in that moment the matter of the "secret agency" was explained and forgiven.

Decatur died at half-past ten o'clock that night after intense suffering. Barron recovered.

In the profound grief that swept the country at the death of its most popular and successful naval commander lesser events received little attention. Few persons took any interest in the fact that a week later Paul Leroy, a young officer, committed suicide at Norfolk and that a woman rather unfavorably known in that town was removed to an insane asylum.

He ignored me, I continued to live in Norfolk. I had no refuge from my shame. I tried to live it out and down. But the truth was known and I was marked. Since that time my name has been one to bandy with, a thing to fit in with vile phrases. That man is still alive, honored, respected, influential. They are banded with him and against me. He has encouraged them. To save his own honor he has had them pour the evilest inventions upon me, slander, innuendo, open insult. There is the basis of all you have heard and much that you have not.

There is the basis of all you have heard and much that you have not.

"What do you say to my story. Paul Leroy?" she asked in conclusion, turning the full power of herself upon him. The man was crouched in his seat. There were strange sounds in his throat. His face was white and drawn. For the second time that day the gilter broke in his eyes and his hand passed restlessly across his face.

"The name," he murmured. "Give me the name. Who is the man? Tell me, the name." She had won. She caught him by the arm, bringing her hot, flushed face close to his, breathing her warm breath against his cheek. His hands were clenched upon the arm of the chair. "The name," he repeated.

"Stephen Decatur," she whispered.

wide experience, relates a few interesting incidents happening during his successful career.

A very ludicrous scene took place while he was with the company playing a long run of that sensational melodrama, "Jesse James." In one of the acts an old man is brought on to the stage with hands heavily secured with chains. On this occasion the property man was unable to find the chins in time for the scene, so the stage manager directed the old actor to go on without them, but to hide his hinds behind him as though they were manacled in that position, thus conveying to the audience that he was bound.

All went well until during the excitement of the scene and the rendering of the old man's line, "Were I not weakened by starvation I would break these chains that bind me and rend you limb from limb." The old actor at the same time was making vigorous feints as if trying to break loose from his fetters, his hands perfectly free behind him. And that is where a big laugh came in for the actor had inadvertently turned partly around so that the audience caught sight of his really unbound hands. This situation, so paradoxical to his lines, was too much for the audience and also the players on the stage, and the melodramatic impression intended was utterly destroyed.

At another time Burrows had a big scene ruined by an amusing accident which happened to his heavy man, whom in the action of the play, he was supposed to kill. This actor had in his pocket a metal box filled with matches, which in the "fall" of the scene became accidentally ignited. To the surprise of the audience and the dismay of Burrows, the supposedly dead man partially arose, and, feeling hurriedly over his apparel in the vicinity of his pocket, grasped the box of burning matches and threw it into the wings, then comfortably simulated death again.

At the Colonial

Manager Hooley, of the Colonial, is putting on for Monday and Tuesday one of the finest and most interesting picture novels ever produced. It illustrates the escape of a band of convicts from jail and shows them burrowing under their prison walls, racing across the fields with the guards after them, holding up a train, and compelling the engineer to drive them into the mountains. There they are recaptured after a vigorous fight with the military. The show will include four other films of dramatic and, humorous interest, while Miss La Viere, the popular soprano, and George Drennan-have been each supplied with new and appealing illustrat-Manager Hooley, of the Colonial, is George Drennan-have been each sup-plied with new and appealing illustrat-ed songs. At Bennett's

The Bennett bill next week will be distinguished by the wide diversity of attractions which go to make up the show. Chief of these will be the Sleedes, a notable English pantomime company, which has been scoring a substantial littine its first appearance in America some months ago. The Sleedes, according to the critics, have one of the cleverest organizations ever brought from across the pond. Their offering is entitled "The Mysterious Hotel," an act in which what the magicians of the old days called "black art" is used for comedy effects. By illusion and with the aid of mechanical contrivances some exaid of mechanical contrivances some extraordinary happenings take place. One of their most interesting deceptions is that in which water apparently flows from the finger tips of some of the per-formers. The act is elaborately staged

The Sign of the Boot' is an original little comedy sketch which will serve to introduce to local theatre patrons. Frank Orth and Harry Fern, the musician and the messenger boy. Both are capable comedians, and they have an offering that is said to provide fifteen minutes of hilarious fun.

An act that will appeal particularly to women and children is that of Galetti's monkeys and baboons. One of the best tricks is a trotting race in which coached grave the trotters and the baboons the drivers. Small sukkies are used, and the skill shown by the baboons in driving is said to be remarkable. A shaving parior scene, in which one monkey tries to shave another, is a comedy feature of the act. The customer has not much faith in the operator's skill or motive, and the barber shop is the scene of a bare-knuckle fight. The press notices

BRITISH FLAG

Raised in Honor of King Edward's Birthday.

Plainfield, N. J., Nov. 12.-Edmund A. MacKenzie, a business man of New York, has written to the police of this place asking what law or section of place asking what law or section of the constitution of the United States governed the local police when they ordered him to lower the British flag, which he had hoisted in honor of King Edward's birthday, last Tuesday. The incident has caused wide-spread comment not at all complimentary to the police officials. Mr. MacKenzie ordered the flag displayed at the gaff of the staff on his premises just over the city line in Fanwood township.

The flag had been flying but a minutes when it was seen by the driver of a laundry wagon. This man sought the nearest telephone and notified the police of the fact, and a patrolman was despatched to Mr. MacKenzie's home with orders to have the flag hauled down. When the policemen got there the flag had been lowered and stowed away in its locker.

lic clergy here to-day refused absolution to Catholic children in the public schools who are using the text books interdicted by the Church.

This action on the part of the clergy is in fulfillment of a warning sounded when the Church put its ban upon certain books used in the public schools, and which were held to be offensive to Catholicism. The Government has refused to modify the character of the text books, which include works of history, and an active fight has been instituted by the clergy at many points throughout France. An element among the parents of Catholic pupils thought it better not to oppose the Department of Education, and this element has now made its members liable to the punishment inflicted at Nantes.

Will Dedicate Most Beautiful Masonis Cathedral in the States.

THE NEW CATHEDRAL AND WM. GEAKE, WHO IS IN CHARGE OF THE DEDICATION.

Fort Wayne, Ind., Nov. 13.-Masons here and all over the country declare that the Scottish Rite Cathedral, to be dedicated here next Wednesday with deducated here next weenesday with impressive ceremonies, is the most beautiful and best higher Masonic building in the country, if not in the whole world. Masons conversant with organization homes bear out this statement. Certain it is that the structure is wonderfully greeful and invosing It cast \$15,000. it is that the structure is wonderfully graceful and imposing. It cost \$150,000, the money being conttributed by Masons in this jurisdiction. In the basement of the building are billiard and bowling rooms, furnaces, etc.; on the second floor is a monster banquet hall, capable of seating 1,000 persons. The third floor is occupied entirely by the lodge and social rooms, while on the fourth floor is the monster auditorium with regula- ication

tion size stage and seats arranged around a big working space in the style of a Roman amphitheatre. This auditorium is declared to be unexcelled.

Present at the dedication will be thousands of Masons from all parts of the United States. The consecration ceremonies will be in charge of Barton Smith, thirty-third degree, of Toledo, the second highest Mason in America, the honor having been delegated to him by Samuel Crocker Lawrence, thirty-third degree, of Boston, the highest Mason in the country, who is unable to attend the event because of illness. Wm. Geake, thirty-third degree Mason, of Geake, thirty-third degree Mason, of this city, head of the local Scottish Rite, the highest Mason in Indiana, and member of the country supreme council, has charge of arrangements for the ded-

The bride and brides maid entered the room, where they were met by the groom and groomsman to the strains of the Lohengrin wedding march, which was played by Miss Myrtle Hartman. The bride looked charming, dressed in white organdic, trimmed with Valenciennes lace and ribbon and carried quouet of white carnations and maid a bouquet or white earliants and state of the groom, acted as bridesmaid, her attire being a handsome old rose princess gown. She also carried a bouquet of carnations. Mr. Fred. H. Roehm, of North Tonawanda, was best man. The groom's gift to the bride was a handsome gold bracelet, 'to the bridesmaid a brooch set with brilliants and to the best man a pair of gold cuff links. After the ceremony a dainty wedding dinner was partaken of and the young couple received many congratulations from their friends. Mr. and Mrs. Roehm left for a short honeymoon trip to Buffalo and Tonawanda and returned to Brunner for a few days before taking up their residence in Hamilton. nhair fern, Miss Kate Roehm, sister

A very enthusiastic and profitable meeting was held by the St. Hilda Chapter, I. O. D. E., on Tuesday, November 9, in the Y. W. C. A. parlor, Mrs. H. H. Robertson presiding. A letter was received from a former Hamilton lady, who resides in Toledo, Ohio, enclosing money for two years' membership and a badge. Another letter from a lady residing in the west gave the information that chapters were being organized throughout western Canada. An unusual amount of business was transacted. A copy of Miss Catharine Hale's "Flag Song" will be presented to Mr. James Johnson for use in the schools. Mrs. H. H. Robertson read a concise and interesting paper on her visit to Gaspe, giving a description of the famous Perce Rock, the occupation and social condition of the inhabitants and the general poverty of the fishermen. Mrs. Robertson spoke with emphasis of the good very enthusiastic and poverty of the fishermen. Mrs. Roberson spoke with emphasis of the good manners and politeness of the children, which was a subject of remark by most of the visitors. The meeting closed with a hearty rendering of the national a them, as it was the King's birthday.

WORK OF SCENE PAINTER.

Miniature Cardboard Models Made of Every Stage Setting.

The theatrical scene painter often orks in the playhouse itself, where you will find him on a platform at the top of flight of iron stairs at the back of the

He must have vast spaces for his work, as the great sheets must hang at full length. For this reason the rear of a theatre stage, though bleak, dusty and a uninviting, is a commodious place. On both sides of the paint bridge you will find various canvasses of different size. Here will be an immense sheet cut to the dimensions of a back drop, and on the other side of the bridge you will find

When it is finished the manager looks it over, and if he is satisfied with it he can buy it outright for \$50, and have some one else take up the scenery, or he can negotiate with the artist who made it to complete the setting of the play.

Each piece of scenery has a technical name. The canvas that forms the background is called the back drop. The isolated partitions that are set one back of the other at the side of the stage are the wings. Then there are the single leg drop: but if the canvas reaches not only across the bridge, but spreads to the floor on both sides it is known as a double leg drop. Disappearing Animals.

Dr. A. E. Shipley, F. R. S., in speaking of the extinction of a number of the world's interesting animals says the European beaver had nearly gone; the European bison was represented by a few wild specimens in the Caucasus. The American bison was reduced to a few lerds most carefully preserved by Government.

The destruction of the fur seal threat-The destruction of the fur seal threatened soon to be complete, and the Greenland sealing industry was now nearly a thing of the past, so few seals were there, though forty years ago they were being killed at the rate of 100,000 a year. Whales were also disappearing.

The busybody who always has a finger in the pie doesn't always pull out a plum.

A family tree is seldom so productive of fruit as a good business plant.

Only three were killed last year by Brit ish whalers, and the whales on the New ish whalers, and the whales on the New foundland side were also disappearing.

At the present time certain Norwegiar whaling companies had been actively en 'gaged in killing off as fast as they could what remained of the various kinds of whales. These were killed chiefly for their blubber, but the economy of the whale factories rivalled that of the Chicago pork packers.—London Globe.

RUSSIA'S SALT LAKES.

Vast Territory Containing Many Rich Deposits Easily Worked. Salt lagoons and lakes are distributed

over most parts of the Russian empire, showers to-night and on Sunday. and principally in the region of the Black and the Caspian Seas. The production of salt is one of the rapidly-developing industries of the country. In the salt lagoons during the dry and warm season there may be found the natural evaporation, which is so great that from the oversaturated brine great quantities of crystals of salt are precipitated. These salt lagoons, marshes or lakes give annually as much as principally in the region of the or lakes give annually as much as 1.000,000 tons, although they have been known to yield 1,500,000 tons when seasons have been particularly dry and

warm.

Such work is done principally in the Provinces of Taurida, Kherson and Astrakhan. The Basegunchak Lake, located within the last-named province, gives in favorable seasons enormous quantities, sometimes nearly 400,000 tons. The bottom of this lake consists of thick layers of salt, and the visible supply has been computed at nearly 100,000,000 tons.

Another lake, the Elton, contains a larger reserve of solid salt along its bottom, measuring 40 square miles. Beginning not far from the Sea of Azov, ginning not tar from the Sea of Azov, embracing all the north and east of the Caspian Sea and extending to the east and northeast of this, is a vast terri-tory. larger in area than France in which every lake and standing pool of

which every lake and standing pool of-water is brackish or salt, and only run-ning water is fresh.

Hundreds of these lakes could be profitably worked for salt if required, says the Chicago Tribune. Many of the lakes contain besides common salt other compounds embedded in the brine or embedded in the sediments of their bottoms. These compounds are valuable in homeopathy.

A Fisherman's Fib.

A Fisherman's Fib.

Three hundred and twenty-one years ago this week the Spanish armada had been practically destroyed or scattered, with a loss of thirty-five ships and thirteen thousand men, and thus Philip's plans for the subjugation of England were finally crushed. It is remarkable that a fisherman's lie had a wonderful lot to do with this happy result, but fish stories have always been groverblat, and no doubt the Elizabethan fisherman thought it perfectly justifiable to do thought it perfectly justifiable to do evil that good might come. This was why he told the Spanish admiral that a storm had driven the English ships back to Plymouth and that most of our mariners had gone home. So the Spaniards came on and met their fate—all through that ancient fisherman's fib! This raises came on and met their fate—all through that ancient fisherman's fib! This raises a question which Weekly Mercury readers may very properly discuss while away on their holidays—whether it is right to tell a lie under any circumstances even to save one's country! George Washington wouldn't do it in regard to a certain famous apple tree, but would he have told a lie to save the States? That is the question—Liverpool (Eng.) Mercury, August 14, 1909.
