\$1,400,000,000

That is the value of Canada's manufactures for one year—in money. But what of their value measured in the comfort, the happiness and the well-being of the whole country?

To produce them gives employment to over six hundred thousand workpeople, whose total wages amount to \$288,000,000 each year.

These workers, with their families and those who benefit by their purchasing power, number nearly one-third the population of Canada—supported by Canadian manufactures.

How readily it is apparent that the prosperity and happiness of every Canadian—of yourself—depend on the continuous employment of these people—on the consumption of goods "Made in Canada."

Canadian factories support one-third of our population. Are you helping to support Canadian factories?

Schoolrooms Should Be Absolutely Dust Proof

By DR. LEONARD KEENE HIRSHBERG A.B., M.A., M.D. (Johns Hopkins)

MORE interesting perhaps from a mother's point of view than to the vast number of school children who have poor hearing, bad eyesight, sore throats and defects of one sort or another, is the desire to learn some way by which malarious conditions of the schoolhouse can be frustrated, intercepted or stayed off.

Dr. E. Ward Graydon, the New York director of physical training in the city schools, has developed a campaign of attack against the devastating influences of measles, mumps, diphtheria, scarlatina, "colds" and the rest of the Tartar brood.

The basic principle involved in all offensive movements against microbe invasions must be concerned with the prevention of the infectious materials and the prevention of its extension to other children by coughing and sneezing and the stirring up of schoolhouse dust.

There will be no one to dispute the facts that all the ailments to which children are liable in the school are caught and picked up by the spray from the particles expelled in the acts of talking, singing, kissing, coughing, sneezing and the like.

Up and down the world of dirt and dust there is no better or happier hunting grounds for the bacilli of lockjaw, diphtheria, whooping cough, "cold," influenza and the whole legion of black-headed distempers than the dusty, turbid, soiled and uncleaned fifth of the schoolroom.

Altho sanitary cowstables are nowadays built with concrete, stone or marble floors and walls to obviate the dangers of disease germs, classrooms continue to be constructed of wood, scrubbed once a week or less often.

I, myself, have planted the dust from the crevices of comparatively clean and new school floors to observe the types of malarious microbes present, only to find that the germs of tuberculosis, tonsillitis, bronchitis and the whole host of distempers spread among children dwell and endure in the cracks of benches, floors and walls after the usual cleaning.

The dust may come when everything on the school wall is built of cement or marble. Perchance in the not too distant future some antiseptic oil dressing with a flash point not above 150 degrees will be used twice a day as a mop on the floors, walls and crevices.

Not only will this destroy contagion, but it will make the life and health of teachers, janitors and principals no less than the children free from some afflictions of the flesh.

DOCTORS ASK HANNA TO CHECK CHIROPRACTICE

Whole Profession Opposed to Establishment of Training School, Deputation Urges.

Physicians and surgeons of the province, with their legal counsel, went before Hon. W. J. Hanna yesterday to urge that the chiropractors now operating in Ontario be restrained from erecting a college and establishing their practice by the training of students. Arguments were put forth to show that the whole medical profession was opposed to any such move.

On the other hand, the chiropractors urged upon the minister the increase in numbers of their doctors and the demand for a training school. The arguments on either side were not new to the provincial secretary, the case having almost become a harpy annual, and again his decision was deferred.

It will be remembered that Sir James Whitney at one time spoke of establishing a medical commission, which would deal with this matter among other things.

The deputation was in charge of the Ontario College of Physicians and Surgeons and was presided over by President J. A. MacArthur of London. Messrs. J. S. Hart, A. J. Johnston, E. F. King, C. E. Clarke and others were in attendance. H. S. Gies appeared for the college and A. Gris for the others.

A short business session which followed, the doctors discussed the grievance that they were discriminated against when going to serve in English military hospitals. Action was urged.

A BRIDE'S OWN STORY

By ISOBEL BRANDS

WHY NOT A REALLY WHOLESOME KITCHEN?

At breakfast this morning we discussed cooks, and I told Aunt Susie that a good cook is invariably a crosspatch. He always advised mother to pick the crosspatch of the lot when she had to select a new cook.

"The cross ones," he insisted, "are the conscientious ones who don't mind how long they have to stay in the kitchen."

Aunt took it seriously. "A long stay in the average kitchen is enough to make a crosspatch of an angel," she remarked.

"Why?" I asked. "It seems to me that if you really know how to cook, nothing could be nicer than fixing up good things to eat."

"Well," she came back at me dryly, "there often are times when I'd prefer a drive or a game of tennis or a good book on the front porch. And perhaps if you had to stay in a warm kitchen filled with conflicting food odors and not very sunny, you'd long to speak for outdoors that you'd be cross if you couldn't go."

"Then why can't the cook arrange her work so that she can get out?" I asked.

"She can, but that's another story," smiled Aunt. "The main point is that the time she must be in the kitchen the kitchen ought to be healthful so that she doesn't get headache."

"First, see that the ventilation is good. Nobody can help feeling right while filling the lungs with good fresh air. You can get good 'cross ventilation' either by having a current of air pass from two opposite windows, or from a door with open transom opposite a window. On really hot days it pays to have an electric fan in the kitchen."

THE VICTROLA AND THE FAMILY—No. 3

Father

says, "The Victrola has given more enjoyment to all of us than anything I ever bought---and at so comparatively small a cost too.

"I've made quite a collection of Victor Records already: Caruso, John McCormack, Melba, Tetrassini and nearly all the great singers and musicians as well as Harry Lauder and a lot of other popular singers are kept pretty busy now, entertaining in my home.

"I tell you what! Brown and Jones and the other fellows have nothing on me now. They can't brag to me about their Victrolas and classy records any longer, because I've as good as they have."

A BRIDE'S OWN STORY

By ISOBEL BRANDS

WHY NOT A REALLY WHOLESOME KITCHEN?

"Next, eliminate the kitchen odors that are so unpleasant. If you have a fireless cooker, of course, no cooking odors get into the room, and the fireless itself can be ventilated at the end of the day by leaving it open, near the window, when no one is in the kitchen. But if you have any kind of stove, a ventilating hood overhead will absorb cooking aromas and carry them outside."

"It's just that enough to make the kitchen as good as outdoors?" I enquired.

"No, that's just half. Equally important is the lighting. The kitchen should be sunny all over, if possible, but if there are dark corners, never have working tables there. Use the dark corners for storing things for your refrigerator, or supply closet. But your preparing table, sink and stove, the places where you sit or stand doing kitchen work, should be placed in the best light, as near a window as possible.

"As for artificial lighting, it is best not to depend on a central light unless it is the indirect system which diffuses the light over the whole room without forcing a glare on any one particular spot. If possible have the side lights at the walls near your working surfaces."

"In some cases where there was a gas jet suspended in the centre of the room, I've known people to use reflectors which could be moved about in back of the light and so send it to any part of the room desired."

"If you make sure that the kitchen is properly lighted and kept freshly ventilated, you not only make it a more wholesome place to stay in, but it really makes it possible to work better and faster, not to speak of its excellent effect on the disposition of the cook!"

BELGIAN RELIEF FUND AUGMENTED BY \$725

First Performance at Grand Opera House in London a Big Success.

The first of the entertainments in the theatre donated by A. J. Small for the relief of the Belgians, was held in London at the Grand Opera House, and netted the committee in charge of the performance the sum of \$725. There was not one cent of expense attached to the performance—artists, house staff and all help giving their services free and, of course, the house and all appointments being donated by Mr. Small.

The Financial Nightmare of the United States

Some far-reaching problems are up in the United States for settlement. Never was there such a searching of hearts and finances. These problems are not so much the result of the European war as their seriousness has been aggravated by it.

The Bulk of the People's Savings Involved in the Water.

That's another story that must be now told. As we pointed out above, at least ten billion of these securities are held in the United States by individuals or by corporations.

The Men Who Put It Over the People's Savings.

The whole fifteen billions and over are not worth more than seven billions and probably much less. The men of high finance, the great financiers like Morgan and Rockefeller, smaller editions of the type, have floated out these securities on the public.

The Mississippi Farmer Carries the Load.

And now to look at it from another angle. All the money thus invested and activity of the United States, outside of the earth, out of mines and industries, but most of it out of the crops of the great Mississippi Valley.

Nationalization of Railways Suggested.

The only possible way out of the situation—and some of the sanest minds in the States are now suggesting it—is that the nation take over the railways as public property. They say that unless this is done far-reaching financial disaster must come any day and it is likely to come within the next few months.

Margin Speculation to Be Prohibited.

The people of Europe may have five billions of their money in these securities now and they may gladly be willing to take forty per cent. in two per cent. United States bonds to save something; and certainly the holders of the ten billions in the United States ought to be glad to get something that will partly retrieve their mistakes.

What President and Congress Can Do.

And so the interested parties and the big papers are imploring the president and congress to come and save them by making the innocent public (who have no hand in this high finance) pay increased railway rates, and thus halting and dressing up the goods so that others of the innocent public will come in and buy them on margin to the profit, once more, of Wall street; and also raising, once again, in mad speculation, the savings of the people in banks, trust companies, insurance companies.

The Lesson to Canada.

We write this not as against the United States, but as a warning to Canada and Canadians. We've been doing a lot of stock-watering; and we already feel the pinch of high railway rates caused by improvident capitalists. The United States will only save itself by forcing those in trouble to skin their own stinks.

A MEATY VOLUME OF HISTORY

VOLUME V OF LARNED'S HISTORY OF THE WORLD SHOWS CAUSES OF EUROPE'S WAR.

The student of the present war in Europe need go no further back than the Crimean War in 1854. Beginning with that, and following with the Austro-Prussian War, the Franco-German War and the Balkan War of recent years, the reader will be able to follow intelligently the present developments of the fearful struggle now going on in Europe.

O'Keefe's PILSENER LAGER. How can anyone doubt the concentrated strength, the mental and physical refreshment, in a bottle of O'Keefe's "PILSENER" Lager, when Prof. Gaertner—in his famous book—"Manual of Hygiene"—states that "one quart of beer is equal in food value to three and one-tenth pounds of bread, and one ounce of meat." Of all pure foods O'KEEFE'S PILSENER LAGER can be said to be absolutely pure. Scientifically brewed in the O'Keefe way from only the finest Pilsen, choicest Barley Malt and filtered WATER it is absolutely pure and healthful, rich in food values and mildly stimulating.

ST. MICHAELS READY FOR THE FINALS

Hand Varsity Seconds a Whitewash in Intermediate Intercollegiate Fixture.

St. Michaels won their intermediate intercollegiate group when they defeated Varsity II by the overwhelming score of 22 to 0 at the stadium.

The play after this tells the story: A short run by Crawford and Corkey and line plunges carried the ball to Varsity's line, Nealon being shoved over for a touch.

In the second quarter St. Michaels carried the ball from their side of centre over for a touchdown on short half-back runs and line plunges.

After the rest play hovered around centre for some time until Crawford caught a punt from Saunders and carried the ball for 40 yards.

Wouldn't You Like to Be Here Like Hank Gowdy?

Columbus, his home town, gave Hank Gowdy the greatest of welcomes on the return of the batting hero of the Boston Braves to the franchise. Hank was originally a bat boy. He started out to play ball seven years ago at Lancaster, and two years ago was with Buffalo in the International League. Among other things The Columbus Journal said of the reception: "There may never be in Columbus another function like the one of last night. It was quite apparent at North Columbus that the Columbus Automobile Club had done its promised part in getting the first escort out in (torus). To the United States army boys, the Columbus amateurs, Ohio State University students, North and other high school students, in loads of more tender years and people in general much credit is due. Today the country will know that 40,000 were in on the Gowdy welcome-home party. Gowdy was the centre of the main party in the white and gold electric car driven by J. M. Stevens, were Mr. and Mrs. Gowdy, the catcher's parents; his sister, Miss Irwin, and his uncle R. J. Burkhart of Sandusky. It was the greatest night of his life for Patric Gowdy, while Mrs. Gowdy was overwhelmed. "I don't know what to think of it all," he said, "but I am glad to be back in my home town. When the hat was made at the north gate of the state house a Battery C detachment was in action firing salute from a cannon placed within the grounds. Hundreds of people swarmed around the auto and police were forced to cut a path so that entry into the capital building could be made. Governor Cox was the first speaker.
