The copy filmed here has been reproduced thanks to the generosity of:

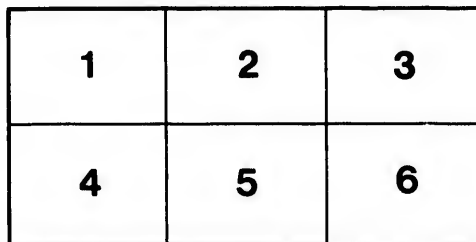

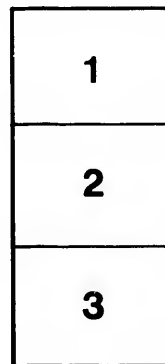

Library of the Public
Archives of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

La bibliothèque des Archives
publiques du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

Also, on Baker's Island a bell which strikes two quick blows each half minute. For better information, a lens panel has been placed in "Hospital Point" Light, which makes a more brilliant light in the line of the ships' channel from Baker's Island than on either side, and serves to keep vessels from danger on either side.

Hospital Point; grey tower; fixed white light, visible 13 miles; on Hospital Point, north side of entrance to Salem and Beverly Harbor.

Fort Pickering Light; red tower; fixed white light, visible 10 miles; on Winter Island, north side of entrance to Salem harbor. On entering Salem harbor from near Hospital Point, get Derby Wharf light in range with Fort Pickering light to clear the Haste Shoal; good anchorage half a mile S W by S from this light, with Derby Wharf light bearing W by S.

Derby Wharf Light; on the end of Derby Wharf, Salem upper harbor; red tower, fixed red light, visible 9 miles.

Marblehead Light, on Marblehead Neck, south side of entrance to Marblehead, and to Salem South Channel; white tower; fixed white light, visible 11 miles; good anchorage half a mile W by S from this light. To enter harbor, bring the light to bear N W, and run for it until within two miles of it, then bring it to bear W N W, and run for it, leaving Marblehead Rock (a high rocky Islet with beacon at top) 150 yards on your port hand, and when it bears S W run N W $\frac{1}{4}$ N until the light bears S by W, then run S W $\frac{1}{4}$ W into the harbor, and anchor between the light and the town.

Egg Rock Light; white tower; fixed red light, visible 12 miles; guide to Swampscot anchorage and to Broad Sound. Leave it $1\frac{1}{2}$ miles on the starboard

Minot's Ledge Light; latitude $42^{\circ} 16m 9s N$; longitude $70^{\circ} 45m 34s W$; entrance to Boston Bay; granite tower, natural color, 100 feet high; fixed white light, visible 17 miles. Davis' Ledge Buoy bears E by S; Boston light bears N W $\frac{1}{2}$ W, 7 miles. This course must be kept good, northerly, to pass Pell Boat, off the north side of the Harding's Ledge (about $4\frac{1}{2}$ miles from Minot's Ledge Light). A good mark to clear the Harding's Bell Boat, after passing Minot's light, is to keep Long Island Head light (fixed white) just open to the north of the Narrows Light, which is a red light.

Boston Light; latitude $24^{\circ} 19m 39s N$; longitude $70^{\circ} 53m 25s W$; on Little Brewster Island, north side of entrance to main ship channel to Boston; white tower; white flash light, flashing once every half minute, visible 17 miles. Also, an air trumpet, giving blasts of 7 seconds, followed by interval of 43 seconds. From Cape Cod highlands the course for Boston Light is N W by W $\frac{1}{4}$ W, which well clears Minot's Ledge and the Hardings; then, when well past Minot's, bring Boston light to bear W by N $\frac{1}{2}$ N and run for it until within $\frac{1}{2}$ of a mile of it or until the Beacon light bears about W by N, then run W $\frac{1}{4}$ S until the Beacon light bears W N W, then run W by N leaving the Beacon light 100 yards on your starboard hand, then steer N W $\frac{1}{4}$ W (keeping the middle of the channel) for the Narrows between Galloups and Lovell's Islands, then about N W $\frac{1}{4}$ N for the bell buoy off Nix's Mate, which leave on port hand, then run W by N $\frac{1}{4}$ N for Fort Independence, leaving the lower middle buoy, red can, No. 6, a good berth on your starboard, and State Ledge buoy, red Nun No. 8 close aboard on your starboard; then run about N W $\frac{1}{4}$ N for the upper middle buoy, black Nun No. 9, which leave on your port, then the course to Long Wharf or to good anchorage is about N W $\frac{1}{4}$ W. If making Boston ship channel from Cape Ann, get Thatcher's Island light to bear N N W from 2 to 3 miles, then steer S W $\frac{1}{4}$ W until Boston light bears W by N $\frac{1}{4}$ N. Then proceed as before given.

Narrows Light; brown house; fixed red light, on the right hand side of *Deer Island Light*; on the south extremity of the Spit, making out $\frac{1}{2}$ mile to the southward from Deer Island entrance to Boston Harbor; fixed white, varied by a red flash every 30 seconds; also a bell struck by machinery every 5 seconds in foggy weather. This light was lit January 25th, 1890.

Long Island Light; on the N E end of Long Island and southern side of entrance to Boston inner harbor: white tower; fixed white light, visible 16 miles. In coming up ship channel, and after leaving Nix's Mate buoy on the port hand, and Long Island Light bears W by S $\frac{1}{2}$ S, run W by N $\frac{1}{4}$ N for the south end of the Castle until the Castle North Wharf bears N W by W $\frac{1}{4}$ W, or abreast of the State Ledge Buoy (red, No. 8), then N W $\frac{1}{4}$ N to the Upper Middle Buoy (black, No. 9), which leave on port hand, then the course to Long

Wharf is N W $\frac{1}{4}$ W. But if approaching Boston from Cape Ann, via Broad Sound, bring Long Island Light to bear S W by W, and run for it until Deer Island Point Beacon bears N W by N $\frac{1}{2}$ N, three-eighths of a mile distant, then W by N $\frac{1}{4}$ N up the harbor. Strangers should bear in mind that in the middle of Broad Sound there is but 8 feet of water at low tide; but by keeping on the southern side of the Sound, leaving the Graves Whistling Buoy $\frac{1}{2}$ a mile on your port hand and the Devil's Limb Buoy (black can No. 1) $\frac{1}{2}$ mile on port hand, and running straight to Ram's Head buoy (black can buoy No. 5) about W S W, passing Aldrich's Ledge buoy (black can No. 3) $\frac{1}{2}$ mile on port, then leaving Ram's head 50 yards distant on port, and run about W $\frac{1}{4}$ S to clear Deer Island Point Beacon, you can carry 12 feet safely. From the Beacon you will steer W $\frac{3}{4}$ N for lower middle buoy, then W by N $\frac{3}{4}$ N for State Ledge Buoy, when proceed as before given.

Morning and Evening Stars.

Venus is an evening star until February, then a morning star until November, and an evening star the remainder of the year.

Mars is a morning star until October, and an evening star for the remainder of the year.

Jupiter is an evening star until June, when he is in conjunction with the Sun; then a morning star until December, and an evening star for the remainder of the year.

Saturn is a morning star until April, when he is in opposition to the sun; then an evening star until October, and a morning star for the remainder of the year.

Explanatory.

Annular Eclipse—An eclipse of the Sun, in which its whole disk is covered by the Moon, except a bright outer ring.

Aphelion—The point of a Planet's orbit farthest from the Sun.

Apogee—That part of the Moon's orbit farthest from the Earth.

Astronomical Day is reckoned from noon to noon through the 24 hours. Thus, July 21, 9h, is 9h A of July 21, and July 21, 15h, is 3h M of July 22.

Conjunction—A Planet directly between the Earth and the Sun is said to be in Inferior Conjunction with the Sun. A Planet with the Sun directly between it and the Earth is said to be in Superior Conjunction with the Sun. Planets are said to be in conjunction with each other, or with the Moon, when they are in the same sign and degree.

Declination—The distance of a heavenly body from the Equinoctial, measured north or south, in degrees or minutes, on a Meridian.

Ecliptic—The plane of the Earth's orbit, so called because Eclipses can take place only when the Moon is on or near it.

Elongation—The distance of a Planet from the Sun as seen from the Earth.

Equinoctial—The circle in the heavens traced by the Earth's Equator.

Node—That part of the orbit of a heavenly body which intercepts the Ecliptic.

If the body is passing from south to north, it is called the Ascending Node; if from north to south, Descending.

Opposition—A Planet with the Earth directly between it and the Sun is said to be in opposition to the Sun.

Penumbra—That portion of space around the shadow of the Earth, in passing through which the Moon diminishes in brightness in consequence of a part only of the Sun's rays reaching her surface.

Perigee—That part of the Moon's orbit nearest to the Earth.

Importer Teas and Liquors, Agent Celebrated Pelee Wines.

J. H. CONNOLLEY, Photographer, 75 Charlotte Street, St. John, N. B.

Perihelion—That part of the Planet's orbit nearest to the Sun.

Quadrature—Two heavenly bodies are said to be in Quadrature when they are distant from each other by one-fourth of the Zodiac, or three signs apart. The Sun's Declination and fast or slow of clock are given for apparent noon or time of passing the Meridian of St. John.

The Moon's Southing is given in Astronomical time for the Meridian passage at St. John; and her Declination, when on the Meridian.

The Rising and Setting of the Moon are given for every day in the year.

TIDES.

The Tides in the Calendar are the Morning and Afternoon Tides at St. John and Charlottetown. In the Tide Table (page 47) will be found Constants for finding the time of High Water at each of the places given in the table.

It will sometimes be found that when a Constant is added to the time of High Water at the port of reference the sum exceeds 12 hours; in this case subtract 12 hours from the sum, and the remainder will be time of High Water at the required port on the succeeding afternoon or morning, according as the tide at port of reference was a morning or afternoon tide.

EXAMPLE.

High Water at St. John, January 6th.....	11h. 25m. A.
Moncton, add.....	54
	<hr/>
	12h. 19m.
Subtract.....	12
	<hr/>

High Water at Moncton, January 7th 0h. 19m.

It will sometimes be found that a Constant to be subtracted is greater than the time of High Water at the port of reference; in this case add 12 hours to the time at the port, subtract the Constant, and the remainder will be time of High Water at the required place for the previous morning or afternoon, according as the tide at the port of reference was an afternoon or morning tide.

EXAMPLE.

High Water at Charlottetown, January 24th.....	0h. 21m. M.
Add.....	12
	<hr/>
	12h. 21m.
Newcastle, Beaubere Island, subtract.....	4 15
	<hr/>

High Water at Newcastle, January 23rd,..... 8h. 6m. A.

To find the length of the day—subtract the time of sunrise from 12 hours, and to the difference add the time of sunset.

To find the length of the night—subtract the time of sunset from 12 hours, and to the difference add the time of sunrise next morning.

FORECASTING THE WEATHER.

Men have, from a very early period, studied the weather, on account of its great influence on their pursuits, in order, if possible, to predict its nature, and prevent those losses to the farmer and the sailor which result from violent storms.

The earlier students based their predictions on the phases of the moon, but an examination of the Greenwich observations for more than half a century

E. G. SCOVIL, 62 Union Street, St. John, N. B.,

75 Charlotte Street, St. John, N. B., J. H. CONNOLLEY, Photographic Studio.

has shown that this theory is entirely unfounded. Weather prophets like Moore, Zadkiel and Vennor claim in their almanacs to be able to forecast the weather day by day for a whole year; but meteorological science in the British Isles, and the Signal Service of the United States, with the Weather Bureau of the Dominion, does not claim to forecast, with any certainty, the weather for more than three or four days at the most.

If an observer could obtain, at regular and repeated intervals, readings of the Barometer at stations distributed over a large area, he would be enabled to trace the march of the storm, for it has been found that the wind always blows towards the place of the lowest barometer reading; and so, by means of the telegraph, he may warn those places the storm is approaching. Still, mistakes are often made, and the forecasts are not always infallible, so that much remains to be done before meteorology can be ranked among the exact sciences.

TIDE TABLE.

The time of High Water in the following places will be found approximately by adding to or subtracting from the time of High Water at the given port of reference, as follows:

Sign + add; Sign - subtract.

Court of Divorce and Matrimonial Causes.

Judge—Hon John James Fraser; Registrar—F A H Straton. Terms: The fourth Tuesday in February, June and October.

County Courts.

The Courts were established by 30th Victoria, cap. 10, passed June 17, 1867, and are now regulated by the Consolidated Statutes, cap. 51, as amended by Act 45 Vic. c 9, and subsequent Acts. The Act 45 Vic, c 9, authorized the appointment of one Judge for the Counties of Charlotte, Carleton, Victoria and Madawaska; one Judge for the Counties of York, Sunbury and Queens; one Judge for the Counties of Westmorland and Kent; one Judge for the Counties of Northumberland, Gloucester and Restigouche; one Judge for the Counties of Kings and Albert; and one Judge for the County of the City and County of St. John; provided that Court for the City and County of St. John

THOS. L. BOURKE, LIQUORS and CIGARS, 11 and 13 WATER STREET,

THOROUGH TRAINING IN BUSINESS, SHORT-HAND, and TYPE-WRITING.

shall not have or exercise any jurisdiction in any cause in which the City Court of St. John has jurisdiction.

The act also authorizes the appointment of a Clerk for each Court, who shall be an Attorney. The sittings of the respective Courts shall be held at or near the County Court House in the shire town.

The County Courts have not cognizance of any action—

1st. When the title to land is brought in question; or,

2nd. In which the validity of any devise, bequest, or limitation is disputed.

Subject to the above exceptions, the County Courts have, by Act 45 Vict., c. 9, jurisdiction, and may hold pleas in all personal actions of debt, covenant, and assumpsit, when the debt or damages do not exceed the sum of \$400; and in all actions of tort, when the damages claimed do not exceed the sum of \$200; and in actions on bonds given to a Sheriff or otherwise in any case in a County Court, whatever may be the penalty or amount sought to be recovered.

The Act 45 Vict., c. 9, would seem to give the County Courts jurisdiction in same classes of cases which were excepted from its jurisdiction by the Consolidated Statutes, c. 51, sec. 7.

Sittings of the County Courts.

The Courts hold Terms every year in each County, which Terms commence as follows:

Albert County—On the fourth Tuesday in June, and on the second Tuesday in November.

Goods sent in execution of an order, however small the quantity may be, or articles sent by one private individual to another, not being actually trade patterns or samples, are not admissible as such.

Patterns and Samples for the United States, 1 cent per 2 oz., the initial prepayment being 2 cents. Limit of weight, 8 oz.

Packets of Patterns or Samples, addressed to any place in Canada, can be registered on affixing thereto registration stamps of the value of 5 cents, in addition to postage stamps representing ordinary postage rate, provided such packets be presented for registration.

Registration.

All classes of matter addressed to places in Canada, the United States, Newfoundland, Great Britain, or any Postal Union country, may be registered for a fee of 5 cents for each article in addition to the postage; and letters may be registered to most of the countries not included in the Union. Registered articles should be prepaid.

C. E. BRACKETT, 86 PRINCESS STREET, ST. JOHN, N. B.

Fruits and Farm Produce a Specialty, M. McLEOD, 83 Prince Wm. Street.

Every article intended for registration must be handed in at the wicket, and a receipt obtained therefor; on no account must it be dropped into a letter box. The registration fee should be paid by registration stamp.

The sender of registered articles addressed to any Postal Union country may entitle himself to a certificate as to the disposal of said article by the Postmaster at the office addressed, on prepayment of an additional fee of 5 cts.

Registration stamps cannot be accepted in prepayment of postage.

Re-Directed Letters.—Letters re-directed to places in Canada and the United States, *without being taken out of the Post Office*, are not liable to any additional postage.

Letters sent to or received from a country of the Postal Union, and afterwards re-directed to any place in Canada, or to a country in the Postal Union, will be forwarded even if taken out of the office and re-addressed; but if re-addressed to a place where there is a higher rate of postage, the difference of postage will be chargeable.

Matter which Cannot be Forwarded Through the Post.—Any explosive substance, glass, liquid, or other matter likely to entail risk or injury to the ordinary contents of the mail, will be sent to the Dead Letter Office, Ottawa.

Spectacles and eye-glasses, if securely put in cases not likely to allow the contents to escape if broken in course of conveyance, may be sent by Post within the Dominion on prepayment of parcel post rates.

Letters containing gold or silver money, jewels, or precious articles, or anything liable to Customs duties, cannot be forwarded by post to any of the Postal Union countries except the United States.

Important.—A letter once posted becomes the property of the person to whom it is addressed, and must be forwarded according to its direction. On no application, however urgent, can it be delivered back to the writer, or to any other person.

Sale of Postage Stamps.—Any person, other than a postmaster, who engages in the sale of Postage Stamps or Stamped Envelopes, without being duly licensed by the Postmaster General, is liable, on conviction before a Justice of the Peace, to a penalty of \$40 for each offence.

Request Letters.—Unregistered letters from places in Canada, Newfoundland and the United States, enclosed in envelopes having *printed thereon* a REQUEST that the letters be returned to the sender if not delivered within a certain specified time, will be returned as requested, if not delivered at the time stated.

Useful Hints.

Never send money or other articles of value through the Post Office except either by Money Order or Registered Letter.

Make complaints and inquiries in writing.

Envelopes closed and simply clipped at the ends cannot be forwarded by Book Post. Affix stamps securely, and on the upper right hand corner.

Register all valuable letters.

Send money by Money Order whenever practicable.

Preserve, and request correspondents to preserve, envelopes of missent or delayed letters.

Business men should be careful to authorize but a limited number of persons to receive their letters, and only those in whom they have full confidence.

Have a letter box on the door of residence and office.

Letters addressed to mere initials, or fictitious names, will not be delivered, unless addressed in care of a resident, or to some box in the Post Office.

Mutilated Stamps.

Letters having mutilated stamps, or stamps so soiled and defaced as to make it impossible for the sorting clerks to decide whether they have been used before or not, will be sent to the Postmaster General for his adjudication.

Post Bands and Stamped Envelopes.

One cent post bands for newspaper or book packet wrappers, and one and three cent stamped envelopes are issued by the Department, and may be had at the stamp vendors at a trifle above their face value.

Merchants' Boxes.

Rent of small box \$4, and of large box \$8 a year.

Though every effort will be made in sorting letters to place them in the boxes, when the party addressed is known to have a box, the Postmaster does not hold himself responsible for this always being done, the primary rule being that all letters bearing the number of the house and name of street go there by letter carrier.

An order to place in a box letters belonging to another person than the owner of the box cannot be recognized unless such letters are addressed to the care of the box or its owner.

Letters for the member of a firm should be addressed to the care of a firm or the number of the box.

Box holders would facilitate the work of sorting by requesting correspondents to add the box number to the address of their letters.

St. John Letter Carriers' Delivery.

Letters and Papers should be addressed to Street and Number.

Change of Residence should be promptly notified to the Postmaster.

Two deliveries daily, commencing at 8 a. m. and 3.45 p. m.

All letters mailed at the St. John Post Office within fifteen minutes of the hour fixed for morning and evening deliveries will be dispatched by such deliveries.

Letters not bearing the name and number of street, addressed to parties whose address may be known to the Carriers, will be delivered by them. It is always best, however, to have name of street and number of house supplied.

All empty packages to pay half the rate of full packages, and on all goods wares and merchandise not hereinbefore enumerated and rated, to pay at the rate of twenty cents per ton, weight or measurement, at the option of the collector, lessee, or proprietors of the wharf whereon the goods may be placed.

Time Ball, Post Office Building.

The Ball will be hoisted half its elevation each day (Sunday excepted) at fifteen minutes before one o'clock. At one minute before one o'clock it will be hoisted its full height; and at one o'clock, mean time, the Ball will be dropped. A chronometer keeping correct Greenwich time should then show 5h 24m 16s, and the difference between this and the time shown by a chronometer is its true error on Greenwich time at the moment. As the above hour of one o'clock, when the Ball drops, represents 5h 24m 16s at Greenwich, the error of a chronometer may be ascertained, no matter where the ship is lying. Masters of vessels arriving at Saint John should compare their chronometers by the Time Ball, as it will enable them to get the sea rate, which frequently varies from harbor rates. Latitude 45° 16' 42" North. Longitude in time 4h 24m 16s West of Greenwich. D. LEAVITT HUTCHINSON, *Director*.

P. S.—Any shipmaster entering this Port, keeping a Meteorological Register, who may be desirous of having the accuracy of their barometers verified, can do so by comparison with the standard at the Observatory. D. L. H.

THE G. & G. FLEWELLING MFG. CO., HAMPTON and ST. JOHN, N. B.,

CANADIAN STORM WARNINGS,

ISSUED FOR QUEBEC AND THE MARITIME PROVINCES.

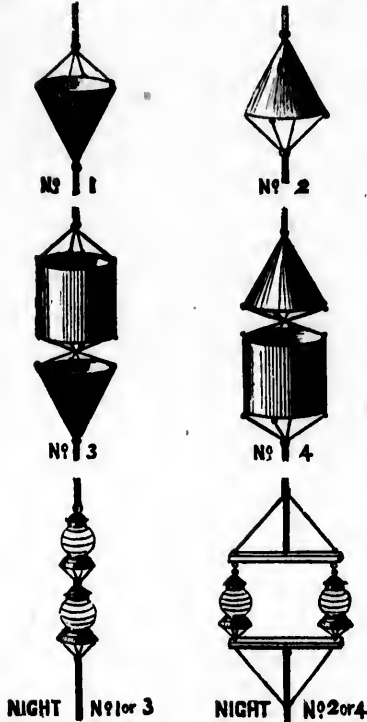

Fig. No. 1—This signal indicates "moderate gale is expected at first from an easterly direction."

Fig. No. 2—This signal indicates "moderate gale is expected at first from a westerly direction."

Fig. No. 3—This signal indicates "fresh to heavy gale is expected at first from an easterly direction."

Fig. No. 4—This signal indicates "fresh to heavy gale is expected at first from a westerly direction."

The Cone, when hoisted by itself, indicates that it is expected that the wind will attain a velocity of 30 miles an hour, but will not exceed 40 miles; and it is not intended that an ordinarily well found vessel should stay in port, but simply as a warning to mariners that strong winds are expected from the quarter indicated.

The Drum will always be hoisted when the velocity of the wind is expected to exceed 40 miles an hour.

The night signal corresponding to Nos. 1 and 3, is two white lanterns hanging perpendicularly.

Night signal corresponding to Nos. 2 and 4, is two white lanterns hanging horizontally.

Note 1—Mariners will be able to obtain further information from Storm Signal Agents, or by consulting the daily probabilities.

Note 2—Mariners must always bear in mind that the storm signals are merely cautionary, and do not necessarily mean that a storm will occur at the place where the signal is displayed, but that one is expected either there or within such a distance that vessels leaving port would be liable to be caught in it.

Synopsis of the Fishery Laws of the Dominion of Canada as regards Salmon and Trout.

Net fishing of any kind is prohibited in public waters, except under leases or license from the Department of Fisheries.

The size of nets is regulated so as to prevent the killing of young fish. Nets cannot be set or seines used so as to bar channels or bays.

The netting of trout is prohibited. A general weekly close time is provided in addition to special close-seasons. Salmon nets must be raised from 6 p. m. on Saturday to 6 a. m. on Monday, and angling for salmon is prohibited from 9 p. m. on Saturday to 6 a. m. on Monday. Close time for "fly-fishing" for salmon begins 15th August.

The use of explosive or poisonous substances for catching or killing fish is illegal.

HAVE YOU TRIED THE AMERICAN LAUNDRY, ST. JOHN, N. B.?

(Notice has been given that a standard regulation salmon net will be established and adopted by the Department of Fisheries, to come into use in the year 1891, and therefore no other net will be sanctioned for the capture of salmon in any of the waters of the Bay Chaleur or elsewhere).
