It is understood that he assigned his stock and book debts to Zimmerman Bros., of Tavistock, before leaving the city. and that other creditors have con-siderable claims against him.

LONDON, April 24 .- Over an arclike front in Belgian Flanders, which is roughly ten miles long, from the reion of Eixschoote in the north to St. Eloi in the south, French, British and Belgian troops are locked with the Germans today in a series of engagements which recall the fighting of last October.

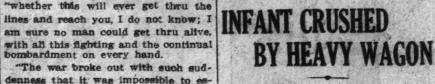

Driven from Hill 60 to the south of Ypres, and failing to retake it by a counter-attack, the Germans launched sudden advance northeast of the own, and after stupefying and killing men in the first trenches with deadly gases, according to British official reports, they drove a wedge of infantry forward, forcing the French, and Bel-glans back toward, and at some points apparently across, the Yser (Ypres) Canal, a manoeuvre which at he same time compelled the British line north, of Ypres to fall back to conform with the French.

of Ypres to fall back to conform with the French. Some Ground Retaken. Altho the advance of the Germans was considerable, extending, according to Berlin despatches, over a front of five miles. French, Belgian and Eritsh forces—the French occupying the centre, te Belgians the left and the British the right of the line—imme-diately initiated a counter attack, the result of which was—to compel the Germans to give up some of the ground Germans to give up some of the ground they had taken and force them in a northeasterly direction toward Lange marck, from which place the attack started.

Some of the London newspapers today characterize this German rush as another attempt to break thru to Calais, and some estimates say they have 500,000 men available for this eflort.

By this time the British are presumably well strengthened and have consolidated their position on hill No. 60. The hardest fighting consequently

is expected north of Ypres. Just as the Germans have been battering the Ypres Salient held by the allies, so the French continue their pressure at St. Mihiel with some suc-

again in Russia to employ his ener-gies against the allies of the Ypres lines. This attempted flank movement is a familiar German manoeuvre. ment is a familiar German manoeuvre. They began an onset Friday on the French lines northwest of Ypres by letting loose a large quantity of as-phyxiating gas which forced the French troops to fail back momentar-ily to the edge of the canal. As soon as the fumes cleared away the French, British, and Belgians counter-atacked, and by last evening had resained part of the lermans are reported to be hurrying troops into Belgium by the thousands to begin a new attack on the allied ines, but they will find a warm reception prepared for them.

Seige Warfare Still.

Seige Warfare Still. Seige warfare being still the order of the day on the western battlefront, every strong position gained by the allies is of great importance. So the capture of hill No. 60, east of Ypres, by the British forces on Sunday night was an achievement of the first order. In the tactics of Gen. Joffre and Sir John French the adopting of methods to produce the greatest amount of ex-asperation among the Germans are noticeable. This being a war of at-trition the object of the allied com-manders is to kill off as many Ger-mans as possible, for even Germany's This approach was ignored Italian cabinet, and he then manders is to kill off as many Ger-mans as possible, for even Germany's stock of men is limited, and the drain on her manhood is beginning to tell. The capture of any great vantage point induces the foolish Teutons to make stubborn attempts to regain their lost territory, and they make heavy counter-attacks with a view to dislodging the allies. In the doing of this they come on in dense masses, and are mowed down like corn before the reaper. Their losses in these op-erations are invariably much heavier than the losses of the allies. So week by week there is a great wastage in human material, which the enemy will find it more and more difficult to re-place. By now the total German losscame forward openly with his pro-posals. The government was then constrained to examine the matter, but an agreement on this question is con-sidered impossible, for Germany and Austria would not consent to give up Trieste, a port which commands a huge German and Austrian trade with huge German and Austrian trade with the Near East. This traffic consists in cheap goods which neither Great Britain nor France produces, but Staly has hopes of capturing it from her former allies. The neutral party, which first held the dictatorship in the Italian neither that a shift the Italian parliament, has of late been weakened by many desertions and a strong war party is grouping itself about the ministry. The Italian army has been entirely reorganized and now consists of a million well trained men. It was nearly in as weak a condition

place. By now the total German lossprobably approach two millions of When Comes Grand Advance?

when the war began as weak a condition when the war began as was Great Britain's. The future only can reveal what Italy will do, but so far she has been slowly drifting towards belige-The grand advance of the allies may not take place in May. The wearing down tactics work out in this way: To down tactics work out in this way: To hold her lines Germany is compelled to keep a force of about 10,000 men a mile. As her casualty lists grow the men who have fallen will be harder than ever to replace. Finally, the day will come when her lines will be held by too few soldiers, and then the allied armies will burst thru. In the mean-time they are being pinned closely to renoy. Marceaux, the sculptor, died last night at his home in this city at the age of 70 years. Many of his works are faby too few soldiers, and then the allied armies will burst thru. In the mean-time they are being pinned closely to the trenches, and cannot get away. The position somewhat resembles that in the Boer War before Earl Kitchener and Lord Roberts reached the field of fank marches which were to conquer the Boers. In proper time a grand fank movement will be initiated by France and Britain that will take the Germans at disadvantage. Joffre is now gradually driving the Germans out of Alsace, so as to prepare the which runs into the Rhine. To meet this threat the Germans are forced to draw reinforcements, not from Ger-many. but from other parts of their lines in France. They also drew on their formations in Belgfum for re-mon are coming up as with a band. Menace on Upper Rhine. The French menace on the Upper mous and occupy places of honor in Paris. He was elected to the Academv of Fine Arts in 1905, the late Paul Dubois. SAYS BATTLESHIP WAS INJURED that a British battleship was severely damaged in the last Zeppelin attack over the Tyne.

During the week reports coming from all sections of the province show ready for development. In order to delay the eventual day of reckoning between Italy and her old enemy, Aus-tria, Von Buelow, the German ambas-sador, opened a campaign of lying and a universal effort to gain licenses for this year, it being recognized that until next May, when the new commission issue their own licenses for the intrigue for which Germany is no-torious. He then indirectly made his first time, they will have no authority to touch any of those granted before. celebrated offers concerning the ces-sation of Trentino to Italy by Austria the cer

time for the city council meeting on Tuesday evening. With argument on this matter delayed, the main issue will be the appointment of an assist-ant to Engineer Macallum E. R. Grav is recommended by the board of control. but some of the aldermen think that the late assistant, W. Hol-lingworth, should be given a show. Consider Bridge Plans.

lays.

Consider Bridge Plans. Great importance is attached to the meeting to be held in the board of trade rooms on Monday afternoon next. at 3.30, of representatives of the various municipalities interested in the exection of a new bridge over the Valley Inn Inlet, in connection with the permanent highway. Chairman G. H. Gooderham is anxious to know just how the bridge proposition stands, as it will have an important bearing on the policy of the commission, and he has written Secretary T. L. Brown of the board of trade for information on the subject, and will be present at the meeting. It is therefore hoped by all interested that a definite decision will be reached either at Monday's meeting or immediately after.

British vessels are avoiding the United Kingdom owing to the probability of their being taken over for government urposes, and such ships will now be commandeered wherever they may be, as necessity arises. The ship owner, at present rates, can make about three

times as much profit on the open mar-ket as thru a lease to the government, The British navy is still actively en-gaged at Gibraltar in stopping steam-ers bound for ports in the Mediterranean, and vessels meet with considerable de-lays.

# MAYOR WAS INDIGNANT

Demanded Explanation Regarding the Handcuffing of Small Boy at Juvenile Court

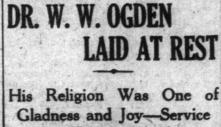

According to a statement made yesterday by the city treasurer's departnent. the regular meeting of the city

council will be held on Friday of this

STEAMERS NEEDED WILL BE TAKEN British Government to Over-come the Scarcity of Suitable Vessels LONDON, April 24.—It is probable that a large number of British steamers in foreign ports will be taken over by the sovernment owing to the exarcity of suitable the taken over by the stated by the admiralty officials that

change," said the mayor. Later in the day the mayor held a conference with Commissoner Boyd, in which it came out that the officials of the Blantyre School are to blame, as they brought the boys to the city and there is no conveyance for them. "However, we will see that the thing does not happen again," said the mayor. mayor.

does not happen again," said the mayor. The tax rate may be brought down to 21½ mills yet. The city has been siven authority to suspend two years' payment of interest and sinking fund on the de-bentures for the duplicate water system —over \$6,000.000—as same have not yet been negotiated. This money, according to Controller O'Neill, may be applied in reducing the tax rate. The debt of the Toronto Street Raliway for snow clean-ing is also another source of revenue that may help. — Steward of Farm. A. A. Gray of West Toronto will suc-ceed John McMillan as steward of the Toronto Industrial Farm. Mayor Church is recommending that the inspection of meats sold in the city be put in the hands of the health depart-ment. He claims that there is much dis-eased meat being sold. — Frederick W. Casct, the owner of a strip of land on Gerrard street, expropri-ated in connection with the Coxwell avenue subway, has been awarded \$21.915 for the property by the official arbitrator. He asked for \$40,000.

Jopling; some eep, some awake, but in all asleep, some awake, but in all are fine expression. Very attractive, also, is his landscape, "The Old and the New in New York." Other notable etchings are a group in brown tones by Wm. Greig of Montreal, several artistic etchings of strong contrasts by Ernest Fosberry of Ottawa, a picture of the barbor of Montreal by Miss Ethel "The Poggi Chapel, Florence," "The Seath a group of four scenes in Italy,

# Greatest Piano Event in the History of Toronto

For seventy-five years we have been supplying the requirements of the Canadian people; thousands of Canada's foremost citizens boast with pride of their possession of pianos furnished by the House of Nordheimer.

# 1840-NORDHEIMER'S-1915 **Gigantic Removal Sale** BEGINNING SATURDAY, APRIL 24, at 9 a.m.

Every instrument now in stock in our old store must be sold before moving into our PALATIAL NEW HOME, at the corner of Yonge and Albert Streets (first street north of Queen). Also we are desirous of making this event a lasting advertisement for the House of Nordheimer, by adding hundreds of new and enthusiastic customers. Never before has such a cluster of world-famous makes been offered to Canadians at prices so low and terms so reasonable.

Some of the celebrated makes to select from are :- Steinway, Nordheimer, Knabe, Chickering, Weber, Haines, Collard & Collard, Mason & Risch, Heintzman, Lansdowne and many others You will find your Piano somewhere in the following lists :--

New Nordheimer Pianos	Other New Canadian Pianos

Several new Nordheimer Pianos, as well as two or	こうしん かってい うちん しんかかい しょうかん 実際になる あたんいか いたんない そうしゃ たいしょう ひろう か

Grands, and a tew known makes, have been catalogued with the list of used Pianos for no other reason than that they are slightly shop-worn or have been used for Recitals or were out with agents. This list also includes Pianos from the studios, colleges and students, as well as exchanged instruments, and presents a variety

**A FEW EXAMPLES** 

Samare Pianos.....\$35, \$40, \$50, \$60 and \$75.

EVERY INSTRUMENT MARKED IN PLAIN FIGURES

When you compare these prices with the pianos to which they are attached, you will realize that this is positively the greatest sale in the 75 years of Nordheimer's history. All Pianos F.O.B. Toronto.

Any of these instruments sold on small cash payments and balance in monthly instalments.

THE OLD STORE 15 KING STREET

**OPEN EVENINGS DURING SALE** 

Architeshop's Palace, Evereux," and "Louver, France," by Herbert Raine, Monireal, and some exquisite small etchings by Ivan Neilson, Quebec, quite delightfully representative of the etch-ing, pure and simple. Other etchers represented are: W. W. Alexander, Mrs. A. D. Patterson, Montreal; Chas. W. Simpson, Owen Staples and J. E. Schell. Each Saturday afternoon there will be a demonstration and proof pulling as last year. On Satur-day the demonstrator was Mr. W. J. Thomson; on the first of May Mr. Her-bert Maw will demonstrate; on the eighth Miss Dorothy Stevens, and on the fifteenth Mr. John Cotton. The exhibition and demonstration are ab-solutely free to the public and all in-terested in etching, either from a practerested in etching, either from a practical er artistic standpoint, will cordially welcomed.

. . . THERE is a very great deal of pleasure in store for those who attend the twelfth annual salon of the Toronto Camera Club, which of the Toronto Camera Club, which opens in the club-rooms, No. 2 Gould street, tomorrow, to remain open until May 1. At a private view were glimp-sed many new and delightful effects in artistic photography, and while the number of prints is not as large as hast year—only about two hundred, and account of the war no German or Austrian plotures being included,— there is no lessening of the quality, rather more beautiful effects being seen, if anything. Interest centres, of course, about the prize-winning plc-sures, and one can agree heartily with the selection of the jury which was the selection of the jury which was composed of Mr. MacGillivray Knowles, Mr. J. W. Beatty and Mr. J. W. Hodgins.

The winner of the gold medal is Mr. W. G. Shields, New York. The pleture —of very decorative character, in rich tones of brown, is entitled. "In the Wasatch Mountains." Very soft and dark in the shadows, the detail is, nevertheless, perfectly brought out, the trees silhouetted against the mountain and the sky.

and the sky. In Class A the silver medal goes to Mr. M. L. Allard, Toronto, his print being a picture of the sands dotted over with figures—the whole composi-tion very delicate and the coloring silver gray. Gray-toned pictures, by the way, predominate in the exhibition, althe there are more than the same th altho there are many noteworthy prints in black and white, sepia, and oddly-colored prints in tints of deep red, green and blue. The bronze medal in Class A goes to Mr. J. H. Ames, while the two landscapes which have while the two landscapes which have won honorable mention are by Mr. L. M. A. Roy and Mr. G. J. Leadiges. In Class B, Marines, the winner of the silver medal, is Mr. G. Washing-ton, whose delicate print is a marvel of reflections and tender shadows. A

TO REDUCE YOUR WEIGHT EASILY AND QUICKLY

If you are overstout the cause of your everstoutness is lack of oxygen-carrying power in the blood and faulty assimilation power in the blood and faulty assimilation of food. Too little is being made into the harder tissue of muscle and too much into little globules of fat. Therefore you should correct the mal-assimilation and increase the oxygen-carrying power of the blood. To do this, go to any good druggist and get of of the order only sold in original pack-ages and in capsule form, and take one capsule after each meal and one at bed-mme till your weight is reduced to what it should be on all parts of the body. The affect of oll of origine in capsule form is perfectly safe.-E. J. T. Any druggist can supply you, or a large

Any druggist can supply you, or a large its box will be sent on receipt of \$1.00. Address D. J. Little Drug Co., Box 1240, Montreal, Can.

 HEBREW BOUGHT THE GERMAN DOLL
 Large Crowd Attended Spring Auction Sale of Unclaimed a Goods

# Perfectly Simple-Simply Perfect

Having perfected a chassis that represents automobile finality in all essentials of design, the Reo designers and engineers now devote their attention year by year, to possible details of improvement and possible reduction in price.

The improvements for 1915 are many and notable. The "refining" process has evolved a car distinctive in appearance; 3<sup>1</sup>/<sub>2</sub> inches larger than last year's Reo; a car of luxurious appointments and unusual riding comfort.

But, basically, it is the same superb Reo that jumped into the lead four years ago. The chassis is fundamentally the same as was then produced-after 23 years of constant experimenting to attain simplicity, accessibility, strength and power.

The underlying principles of this new Reo are those that have sold the car to over 40,000 critical motorists.

been rife as to what President Wilson meant in his recent New York speech when he referred to the climax of the

European struggle and intimated that it was near at hand, it became known

MCCONACHIE,

# SULTAN'S SOLDIERS **DOOMED TO DEFEAT**

Eminent Canadian Authority on Turkish and Egyptian Affairs Discloses Treachery of Germans at Constantinople.

A-task which would only be surpass-ed by an attempt on the part of the fighter and they are not, and while they are clever and the Turk is a German navy to escape from Kiel Harbor faces Germany in her effort to obtain even a semblance of satisfactory

results from the army of Turkey. Such is the opinion of C. T. Currelly of the Royal Ontario Museum, who has spent some years in Egypt and Turkey. The difficulties which Germany must overcome in taking advantage of her success in drawing Turkey into the war are given by Mr. Currel-ly in an interview to The Sunday Worki

He pointed out that while the Turkish army, or to be more exact, the army of the Turkish Empire, might be raised to a very large total the percentage of Turks in it would be vastly outnumbered by men of the unart atives of the province in nany other races found within that empire.

Altho the Turks themselves born fighters and noted for their dar-ing, such was far from being the case honesty, with the other races within the em. Turk in with the other races within the em-pire with the exception of the Kurds. ers. are notoriously dishonest and are some of the provinces of Turkey hardly any Turks were numbered among the population of the entire province. A good example of the posi-tion Turkey is in would be found by supposing Ontario were all Eng-lish Quebec all French, Manitoba al: German. Alberta all Russian, British Columbia all Chinese, the remaining mede that the Turks as Mohamme-dans believed that to die in battle a better and much to be instantly transported to

less stupid person, it is the mor latter who rules them.

Tyrannical Taxes.

The way the Turk taxes the races within his empire is enough to astonish the man who has lived under the democratic laws which prevail within the British Empire. In Syria, for instance, a 60 per cent. gross tax was imposed. This would mean that a farmer or merchant having a revenue of \$1000 a year would have to give \$600 of that up in taxes and live on the \$400 remaining. Mighty little of this ever reaches the Turkish Govern-ment. The unscrupulous hands thru which it passes before reaching head-

men are nauves of the province in which they are, and in the matter of honesty are vastly different from the Turk, who, besides being a good fighter, can be relied upon for his honesty. The sublicit more of the The subject races of the never to be relied upon. The Kurd is about half way between the two ex-

tremes, but more like the Turk than like the others. Regarding the claim sometimes

Columbia all Chinese, the remaining provinces other distinct nationalities and then have Japan conquer the whole country. The confusion of races while moute follow now exists in the Turkish Empire today. Mr. Currelly pointed out that as might naturally be supposed the races of the different crovinces of Turky have no liking for the Turk, whom they regard as

to do so and have not the courage to refuse.

### Two Big Obstacles.

Lack of ammunition and equipment and of an adequate commissariat de-partment are the difficulties which are acing Germany with the Turkish army problem. They were difficulties which fould prove unsurmountable and which would ultimately spell defeat for the German-Turkish alliance. The organi-zation in consequence will become more of a comic opera army than anything else so far as ultimate effectiveness is concerned.

Some years ago Turkey sent a regi-ment forth with the necessary com-missariat "forgotten" by the officials who had been given the money to sup-

So lax is the organization of the Turk-ish army that powder may always be purchased from the soldiers, who resoldiers are "supposed" to receive both food and pay, but they get an insuffi-of young men who would otherwise have cient supply of the former and rarely ever the latter, as it stays in other

hands before it reaches them. Altho the officers in the army are for the most part both honest and courageous, the officials of that country are largely composed of knaves and cutthroats, who have gained their posts thru murder and treachery of all forms and a somewhat to that pra in and in a somewnat similar manner to that practiced in some of the South American republics. It would be hard to find a more corrupt set of officials anywhere. to the The publics. It would be hard to find a more corrupt set of officials anywhere. Germany may attempt to supply the Turks with ammunition and food, but ty the time it ats pussed that the names of the crooked officials the chemes of the solders ever getting an adequate supply would be poor indeed. To this, of course, the must be added the difficulty which would be more indeed. To the supplies past the alles thru to Turkey. Regarding the size of the army which might be opssible to assemble as many as a million or more soldiers, but it would be a terrible thing for the soldiers if this were done. They would perish either thru lack of ammunition to properly defend themselves from attack or by practically starving to death thru an insufficent supply out done sold by be due about equally to both causes.

would break down under but very little chance of centuries to wipe out such an empire as Turkey had proved to be had arrived and it should be taken advantage strain. Individually the soldiers of the Turkish

Individually the soldiers of the Turkish army are slovenly to an extreme. It is quite the usual thing to see them with buttons off their coats and one trouser leg rolled up and the other down. This will be far from pleasing to the German officers who are being placed in com-mand and who are used, to see-ing troops perfect in appearance and kept under the strictest discipline. The Turks, on the other hand resent dis-In the opinion of Mr. Currelly no one would be more pleased to see the over-throw of the present official rule in Turkey and to see it replaced by a re-sponsible form of government than the Turkish people themselves. Almost with-out exception the official class governing in Turkey today came from the other Paces of the excepte and minut different Turks, on the other hand, resent dis-cipline, and should the German officers attempt to enforce a harsh discipline is would mean that they would lay them-selves open to a revenge, which is gen-erally fulfilled by a shot or a stab in the back.

A thing that had held back Turkey Asia Minor nearly went bankrupt at who had been given the money to sup-ply it. The result was the regiment lost seven men per day of starvation. Went from there to Russia. This condicommercially was that the Mohammedan religion forbade it sfollowers from loan-ing money at interest. Being a very religious people they strictly adhered to this principle and when in need of money went from there to Russia. This contra-tion of affairs was due mainly to the practice of the Turks in seizing every-thing for the army that they could make the of and leaving the country in an alwere as a consequence obliged to borrow it from those who had no love for the Turk. They were thus compelled to pay exorbitant rates of interest which in some cases exceeded several times over the original amount of the loan. Under a proper form of gov-ernment laws could be enacted which would prevent the Turks becoming victims of such usury. The Mohamme-dan religion, while preventing its fol-lowers from practising it, did not protect were as a consequence obliged to borro move it from their cartridges in order use of, and leaving the country in an al-to obtain money to buy, tobacco. The most destitute condition. They will now exorbitant of young men who would otherwise have been available for the army there. Causes of Campaign.

try as well as in the towns. The Grand Duchy of Baden has been plagued with crows, who have eaten Speaking of the causes which led up t the spring wheat. The government has offered the equivalent of one cent he Turkish oampaign, Mr. Currelly exlowers from practising it, did not protect them from the usury of others. pressed the opinion that Turkey herself did not want to enter this war. She was uled by an official class composed of

Marriage Customs.

treachery, and not as representatives of the people. These officials, however, did not desire the war any more than the people did. It was a case of their trying to fool Germany and being played for

Marriage Customs. A wrong impression was general the regard to the marriage customs of the Turk. While polygamy and harems were much in evidence among the other races of the empire, it was a very rare thing for a man of Turkish blood to have more than one wife. The principal reason for this was that the women of Turkey would not stand for it. As a matter of fact the majority of the Turkish women were as well if not better educated than those of any other race. Mr. Currelly states it has been conceded by Europeans who have lived in Turkey that the Turkish women rank higher in point of education than those of any other country. Contrary to what may have been thought elsewhere, the Turkish women seem to know more than their husbands and instead of being slaves to them rule their husbands with a ools themselves, instead. The intention was to receive bribes from Germany to induce Turkey to enter the war, but to never let such a thing happen. These officials are past-masters in the art of excuse-making, and, as now with Italy, it would have been a case of entering the war "tomorrow," but never today. They realized that the moment Turkey entered the war, these bribes Turkey entered the war, these bribes would cease and that, instead, enormous expense and chances would have to be borne by their own country. The Germans were too smart for them, however, and seeing the way matters stood had the warships "Goeben" and "Breslau," eent into Turkish waters and placed under the Turkish flag. This accomplished, the Germans lost no time in having these vessels fire on the allies. The result was that Turkey was dragged into the war despite herself. An apology had at once been made, but other acts had quickly followed and it had been found impossible to withdraw. slaves to them rule their husbands with a rod of iron. As far as they were concein-ed they would not permit polygamy, and they pretty much have their own way in the matter. It was among the other races of that empire that harems were so plentiful so plentiful.

Must Punish Treachery.

Currely expressed the hope that the allies had defeated Turkey Britain would not be so weak-as to condone her treachery. The

nen who have worked their way up by

FREIGHTER SUNK IN THE NORTH SEA LONDON, April 24, 2.37 p.m .- The reighter Ruth was suck by a German submarine on Wednesday when about 06 miles east of May Island, in the North Sea. The crew was rescued, and was landed at Leith, Scotland.

The Ruth left Leith with a cargo of coal for Gothenburg. Captain Andersen, her skipper, who is a Swede, reports that the first torpedo discharged by the submarine missed its mark. The second torpedo struck the Ruth amidships, wrecking the vessel. The sixteen members of the crew were all Swedes. They drifted about in small hoats for twelve hours before being picked up.

According to Mr. Currelly there was no DANISH STEAMER CAPTURED. According to Mr. Currelly there was no race outside of the British so fitted to become part of and live up to the tradi-tions of the British race than the Turks. They possessed courage, honesty and ethics and lived strictly up to their re-ligious beliefs. It would be the best thing that could happen to them if they were taken in as part of the British Em-pire and they would prove worthy of be-ing taken into it. COPENHAGEN. April 24.-The Danish steamer Nidaros, 631 tons net, has been captured by a German war-ship in the North Sea and taken into port at the Island of Svit. one of the North Frielder

HICAGO, April 17.-Steve. Well Steve the old seasons opened up and they still got me seting on the bench yet but as soon is this here Williams looses his horse shoes I will be in there evry day and then watch out and Daubert and all of them will half to take back there seats. But I wisht I could of bit a round the 8 Club will open for its seven days of flat against this here St. Louis club and I bet I would of hit a round the 8 hundred mark against the pitching like they been showing us and who ever told them they was pitchers should ought to be on the stage geting laughs.

Well Steve that was a hole lot of bunk a bout Gussys old man ng treatened with tyford and all as he had was a bad cold but it Leaf Stakes and added money will hang bok 2 drs. to find it out and hes all O. K. now and no more chanct of im dyeing then as tho the brooklyn should win the penant but the its throwed a scar in to evry body so as when the old man got well Secretary Praser has received word by body would say my what grate drs. they was to not leave him die when he was so sick and all the time he wasent no sicker then I and ou and when we got home last Monday and the minut I seen him I nowed thew wasent nothing the matter with him accept he was nowed thew wasent nothing the matter with him accept ne was heaveing and grasping like he had a bad cold so Gussy says lissen to him breath he must have the tyford or some thing and we better call in a speshal dr. and I says how much will they charg and she have 0 a bout \$25,00 and I says your crazy to throw your old mans call in a speshal dr. and I says how much will they charg and she says O a bout \$25,00 and I says your crazy to throw your old mans money a way on speshal drs. when they aint nothing the matter with him and she says suppose he would die so I says well suppose he would die then you would have a extra \$25.00 to pay out of what ever he leaves for you and what would you of got for your money because if a mans going to die he would rather be a lone by him self and his famly with out no spashal dr. in the house with a beerd and white west and if hes going to die he will die just as soon with out no help from no speshal dr. So she says all right she would wait a wile and the next A. M. he wasent grasping no wheres near like he had of been and he ett enough breakfast as much is a horse would eat and if he can eat like that when hes got tyford and pretty near dyeing I would hate to pay for the grosery bills at the bucher shop when hes feeling all O. K. so I says to Gussy well it looks like I stoped you from throw-was trying to spend some of your money on a speshal dr. yest, and i wouldent leave her throw the money a way and he says no but I bet you would of gave \$25.00 if the speshal dr. had of garnteed to hill me and I says your a sick man and I dont want to start no argu-munt with wor where exist man and I dont want to start no argu-munt with wor where exist man and I dont want to start no argu-munt with wor where exist man and I dont want to start no argu-munt with wor where exist man and I dont want to start no argu-munt with wor where exist man and I dont want to start no argu-munt with wor where exist man and I dont want to start no argu-munt with wor where exist man and I dont want to start no argu-munt with wor where exist man and I dont want to start no argu-munt with wor where exist man and I dont want to start no argu-munt with wor where exist man and I dont want to start no argu-munt with wor where exist man and I dont want to start no argu-munt with wor where exist man and I dont want to start

of the great international hexathion. This is the biggest athletic contest ever at tempted. Ninety-nine Y.M.C.A.'s on the North American Continent competed, di Vided into three classes. Fourteen ware in Class A, forty-three in Class B, forty two in Class C. \$452 different individuals competed, and Toronto Central finished ing as follows: Ban Francisco, 501; Toronto Central, 4749. A number of records were broken, and wherever the contest was held interest in athletics has been stimulated. The ten francisco, 557; Toronto Central, 4749; Toronto West End, 45661-3; Brooklyn, Bedford, 45651-2; Louisville, Ky, 4465; Newark, N.J., 41334; Brooklyn, Central, 39581-5; Chicago Central, 3949; Buffalo Central, 560 Soconds, 2, J. McBorneri, San Francisco, 57 10%"; 2, P. Guyler; Endifferent individuals second to San Francisco, with Roo chester third; El Paso, Texas, fourtha and Brooklyn Navy fifth, Toronto West End sixh. Standing of individuals entered in at is events was won by St. tasking of Chicago Central, with a score of 649%. J.

Tavier, Time 1:45:

and if you dident oppen up the windows of the st. car you would smuther your self to deth so I was seting in a oppen window looking out of the window on the way to the ball pk. and a sinder blowed in to my eye and I couldent get it out but I dident say nothing a bout it on the bench or in the club house because I thot Bresnahan had forgot all a bout me and would leave me set on the bench like usule ye. forgot all a bout me and would leave me set on the bench like usule and I was seting there in missery on acct. of the sinder in my eye but I wouldent say nothing a bout it because I aint 1 of these here babys that crys when there hurt but 1st thing you know a long come the 8 inning and this here Doaks pitching and all of a sudden Bresna-han hollers to me to go up and hit in the pinch. Well Steve if I had been 1 of these here babys I would of said a bout 1 of my eyes bean shut and refussed to go up there but I dident say nothing but at that Bresnahan should ought to of seen just looking at me that they was some thing wrong but no he dident see nothing and I guess he must be  $\frac{1}{2}$  blind so I had to go up there the way I was and what chanct did I have Steve no chanct at all. I have Steve no chanct at all.

Well they was 2 on base and 2 out and Doak throwed me a spiter and I had him out guest and was laying for it and I cracked it right on the nose down the left foul line like a shot out of a canon and the boys on the bases come runing in and I was pretty near 2d. base when I herd the umps holling foul and I thot at 1st. he must be kidding because the ball hit 5 ft. in side the line but I seen in a minut he wasent kidding and I thot Bresnahan would have sence enough to make a holler and he dident say a word so I seen it was up to me so I says to the umps whats the matter with you and he says shut up and get in the game you hig bucher and when you hit 4 some where

so I says to the umps whats the matter with you and he says shut up and get in the game you big busher and when you hit 1 some wheres near fare I will give it to you and I says you wont never see 1 farer then that 1 and he says no not with you hitting so I says shut your mout so he dident have no come back and they wasent nothing for me to do but pick up my bat and when Doak come with an other spiter and I had him guest right again but the ball start right in at my knee and broke down a bout 2 ft. and a ft. out side the plate and this here bum calls an other strike. Well Steve I seen a lot of muck umpireing but never nothing like that and I says Get your even and this here built cans an other strike. Well Steve I seen a lot of punk umpireing but never nothing like that and I says Get your eyes oppen you big bum and he says what for you aint got nothing to show me so I says You ought to be standing out the side of the ball pk. on the side walk with a dish in your hand for peopl to drop there money in to it and ware a sine I am blind and he dident have nothing to say to me back so Doak comes again with an other spiter or that is he was trying to thrw a spiter because I can tall a mile a way what hes throw he side walk with a dish in your hand for people to drop there have nothing to say in the have a sine I am blind and he dident have nothing to say in this data ware a sine I am blind and he dident have nothing to say that he set is the was a spiter because I can tell a mile a way what he such a time to the maxe and if did new they wasent going to be no brake to it is a string and if did new they wasent going to be no brake to it is a string and if did new they wasent going to be no brake to it is the way what he can make his spiter bocause I knowed it was going to be a spiter and it come low and out the cant make his spiter brake and it and may falt if hes such a bun a man they say that he set of the set of the control of the set of the cant make his spiter brake and it and may falt if hes such a bun a man they say the beart of the set of the set

# Dunlops Whitewash

In a second division game Dunlop Rubber Co. won their fourth straight game when they defeated the Bank of

game when they defeated the Bank of Commerce at Little York, on Satur-day afternoon by the score of 4-0. Dunlops started the game minus three of their best players, but even with-out them were oble to win easily. Woods scored the only goal of the first half, when he dribbled the ball from centre field right into the net. It was a clever piece of work and he deserv-ed all the credit he got for it. In the second half Barron started the scoring with a neat shot from the side, which bounced over the goalkeeper's head Irwin. Shaw, Daiziel, Ross, Collins, Mar-tin, Sturgess, Morgan. Referee-W. Murchie. Martin set the ball rolling for Baracas before a good crowd. Baracas went down, but Apps cleared with a nice kick. McKay returned to Sturgess, who opened the score for Baracas with a nice kick. McKay returned to Sturgess, who opened the score for Baracas with a nice kick. Infield making a good attempt save, but just failed to reach the ball. After a spell of midfield play, Hunt got away on the right and put in a beautiful-cen-tre, but Stewart cleared easily. Fidler got thru, and forced a corner for the Al-bions, Hunt placing it nicely, but Crouch-er headed over. From the goal kick, Sturgess secured and ran thru, putting in a soft shot, which slipped thru Enfield's legs. He injured himself in the attempt to save and had to leave the field for which a next shot from the side, which bounced over the goalkeeper's head into the net. Two more closely follow-ed the first, they being scored by Woods and Sharp respectively, the latter being scored on a penalty kick. Dunlops have a fast bunch of players, playing well together ell the time set Dunlops have a fast bunch of players, playing well together all the time and should be pretty well 'up in the final games. The bank team could improve themselves a lot if they would play more together. They lack the most necessary art of the game. The teams: Dunlop Rubber Co.: Coombs, Thomp-son, Yates, Lowe, Cooper, MacLennan, Sharp, Barron, Howson, Woods, Cor-sey.

sey. Bank of Commerce: Hickman, Den-ison, Wright, McRobert, Barr, Bart-man, Valentine, Witt, Winhill, Taylor, Ellis.

# BERKELEY BEATEN

West Toronto defeated Berkeley by 1 to 0 in a fast game at Riverdale on Saturday afternoon. Baillie got West Torontos' goal in the first half and Berkeleys thierd in vain to even up in

the last half. The teams: West Toronto (1): Barkas, Brown, McDonald, Debling, Bennett. McKenna, Johnson, Hailey, Herring, Baillie, Brookes

Berkeley (0): Hogie, Stubins, Hyde, A. Perkins, Reeder, Mann, Payne, Strutt, Drummond, H. Perkins, Flemng. Referee—Mountain.

# CORINTHIANS WON FROM CONSUMERS

legs. He injured himself in the attempt to save and had to leave the field for trainer's attention. Hunt took his place. Davenports came right back, and War-dell shot high over when well placed. En-field resumed his place in goal. Daven-ports now met a further misfortune, Ma-son having to go off with a wrenched ankle. Wildash made a fine run on the left and put in a lovely centre, but Shaw cleared with a nice kick, and Sturgess secured to put his side three up. It was found that Mason had dislocated his ankle, and the doctor had to be sent for. Half-time score, 3-0. Davenports resumed with ten men, and Half-time score, 3-0. Davenports resumed with ten men and very even play was the order for a time. Brookes got in a nice shot, which was only inches wide. From a breakaway by Baracas, Martin put his side four up. The Albions now had a further misfor-tune Ange their good right hast barter

In a rather listless game at Kow Gardens on Saturday afternoon Co-rinthians walked away from the Con-sumers' Gas Company outfit to the tune of four to one. The Gas men fail-ed to bore in and the Corintaian backs held them safely at all times. At that the winners did not show the differ-ence which merited such a majority. In fact, they were inclined as a team to play more spectacular than effective football. The Albions now had a further misfor-tune Apps, their good right back, having to leave the field with a badly-cut ear. Playing with only nine men the Daven-ports got down, and Brooks put in a beauty, missing the mark by inches only. Apps now resumed with his head well bandaged, and cleared his lines well on two occasions. Davenports continued to press, and only the fine work of Stewart in goal kept them from scoring. First

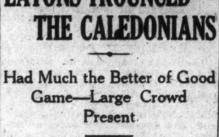

Corinthians opened the scoring after about twenty minutes of play, and kept the game forced until very nearly the end of the first half, when the red

the end of the first half, when the red and black uncovered a spurt and soon notched the evening up taily. With both teams tied they went at it the second half very hard, but the pace told on the Gas Co. boys and they aviated. One after another the tallies went into the net and one of them dribbled thru the legs of Rastick which should have been easy to handle. Even a penalty kick did not help Con-sumers, as Parker succeeded in put-ting the sphere ten feet outside the post.

The teams: Corinthians (4). — Goal, Weston: backs. Norman and Wood; halves, God-dard, Green and Thompson; forwards, Dagley. Leyland, Thurstons, Lyttle and Bourke.

Consumers' Gas (1) — Goal, Eastuck backs, Parker and Twist; halves, Grif-fiths: Nicholls and Williams: forwards, Curtiz, Simpson, McLaughlin, Stewart and Smyth

Referee-Kerr.

In ideal football weather Cale-

102-104 Adelaide St. W., Toronto. The Canadian Firm. 2467 tant with a fine shot, which gave the goalie no chance. A good bristling game thus ended in favor of Eatons, by 5-1. The line-up was as under: Caledonians: Goal, Herdman; backs, McGraw, Maxwell; halves, McGrath. Pearson, Gibb; forwards, Turnbull, Clark, Warwick, Redan, Crawley. Eatons: Goal, McCracken; backs, Tweedie, Glichrist; halves, McAdam, Baldwin, Kengan; forwards, Phair, Dunham, Worall, McNeilly, Molyneux. Referee: C. M. Hall.

# Why It Pays to Be Well Dressed

¶ The Canadians, in common with the Americans, are famous as a well-dressed nation. We judge each other mainly by appearances. Our fathers did so before us, and it has now become almost an instinct. ¶ Under these circumstances no man, no matter what his calling, can afford to go shabby; especially considering the present stage of efficiency and economy the tailoring busi-ness has reached. Nowadays, the small cost of a good suit is an investment that pays big dividends

in prestige.

Detroit,

and how they No. 6, Elliott Ng

Opened the Gates to the Waiting Enemy. and been burned upon the lordly. funeral pyre with all the other sacri-

coast on which little sailing ships of ancient Greece landed their fighters for the slege of Troy. The soldiers described by Homer in his immortal classic were protected with steel shields, but the ships they sailed in were strangely different indeed from the armored monsters of the deep that entered so many centuries later upon the subjugation of Turkey's forts.

Homer's story has for its keynote the stealing of Helen, the beautiful wife of Menelaus, by the handsome son of Priam, King of Troy. The Greeks, led by Agamemnon, brother of Menelaus, set siege to Troy. This slege, made famous by Homer's epic, \* lasted for years. Walled Troy was vastly more difficult to the soldiers of that day than the stoutest of modern forts with powder and dynamite to face. Homer's vivid tale recounts the last 51 days of the long siege. There had been battles and single combats between the heroes from the Greek and the Trojan side. Hector had been slain, and his body dragged around the walls of Troy by his conqueror. Patroclus had falles

fices, but in vain. Troy still stood safe. Until at last it was suggested in council to build a huge wooden horse, in whose body 50 Greek soldiers might be shut up. To present this horse to the Trojans, pretend to abandon the slege, but return and enter the gates when thrown open by the Greeks. This plan was adopted. The Trojans received the horse and drew it within the walls of the city. The Greeks withdrew to the island of Tenedos. but returned under cover of the night. Meanwhile the Greeks in the horse had made their way out and opened the city gates that their comrades might enter. The armies of the Greeks forced their way in through the open gates and Troy

was burned. The stealing of Helen and her re-turn have been the theme of count-less works of art. These and other incidents of the Trojan war have em-bellished priceless vases, have been modelled in silver and bronze and marble, and painted by artists of every civilized nation.

The blind poet, Homer, is supposed to have lived about 1000 years B. C. This was not so long after the events of which he wrote, for Helen was taken to Troy in 1204, B. C., the Greeks invaded the country in 1193, and Troy fell on June 11,/1184, B. C.

How Salisbury Plain looks today-Covered with barracks and huts it is housing a hundred thousand of Kitchener's newest soldiers-The drill grounds are in the background. The plain is dry and pleasant now.

Annie Laurie Settles Perplexing Points in The Love Affairs of Girls --- Gives some Plain Advice to Soldiers and Their Sweethearts and Also Answers the Letters of Young Men Who Find It Hard to Make Their Own Decisions.

the Laurie will welcome letters of inquiry on subjects of fem-interest from young women readers of this paper, and will reply in in these columns. They should be addressed to Miss Annie , The Sunday World, Toronto.

ANNIE LAURIE: I am 22 years of age, and have tess keeping, company with a young man for about a year. I think quite a lot of him. He told me some time ago I was the only fif he ever loved or would ever to with. He said he went out with another girl, but he had to inte her back home, as he thought much of me he could not feel contented in another's company. He asks me, if he would be true to much of me he could not feel contented in another's company. He asks me, if he would be true to mich of weeks ago I was coming home from a place of musement, wher, another friend of mine stepped up and asked if he could take me home. I told him that my boy friend was com-ing to meet me, but yet he would not take the hint to go. My friend was on the opposite m 22 years of age, and have

y friend was on the opposite of the street and saw us. So ropped him a few lines next and explained all to him. But was sore and said it was all fault. He has not been to see

me since. Now. Miss Laurie, I am a person who does not like to have any enemies. I try to use all my friends the best I can. I have any use for this running around with every one I see. When I have friends I like to keep them. I feel awfully worried about my boy friend. He won't even give me an answer in what he intends doing. I would not mind so much only my girl friend got married, so you see I am quite lonesome-please let me know what I should do. And I will take your good ad-vice,

GOOD many times. Madeline, we can be too kind and thoughtful. It doesn't seem

to bear; for him it may be the great-est happiness in the world to be in position to take care of those to whom he owes you. Annie Laurie.

DEAR ANNIE LAURIE: I have been keeping company with a young man for over three years. He has been receiving a good salary most of the time, and has gotten into the club habit, which he has promised me to give up, but does not seem for want to keep his promise. He gave me a diamond ring last December, around Christmas time. But I am not sure whether this is an en-gagement ring or not, as he did not say.

gagement ring or not, as he did not say. I have not been out with another fellow since I have kept his com-pany, and am true to him, as I love him truly. But lately he has treated me with indifference, and I cannot understand this as I have always treated him respectfully, and do everything he wants me to do. But he will not do anything I want him to do. He likes to be boss. I would like your advice on the matter.

### Broken Hearted.

G OODNESS me, Broken Hearted, Why should you have a broken heart? But you may have one if you don't find out quite soon whe-ther the young man from whom you accepted that diamond ring meant it as an engagement pledge, or merely as a Christmas gift. If you are en-transe to him you certainly should not to out with any other young man. 'Annie Laurie.

DEAR ANNUE LAURIE: I am twenty-one years of age, in business for myself, and also have a friend in business, but, dear Annie Laurie, he is a gambler and has a pool room. My folks like him, but do not know he gam-bles. He tells me he loves me and wants me soon for his own. I do wants me soon for his own. I do love him so, but there is just one. thing. He has been engaged to another young lady for about four years and I have only been going with him for one year. About a month ago he asked me to marry. I do love him, but do not know whether it is safe to marry a gambler. He is six feet tall, with dark big blue eyes and light hair, and is so good and kind to me. He never looks at another woman, but is terribly jealous of me, for he has been told by lots I am a handsome girl, or young lady. Dear Annie Laurie, please advise me. Broken Hearted Blue Eyes.

DEAR ANNIE LAURIE: DEAR ANNIE LAURIE: f am 18. I go to one of the big churches in the city and I sing in the choir. About five Sundays ago -a young man about 18 came to our church and sat near the front -he has been there constantly since. When he had been there two Sundays he smiled and spoke to me after service. I nodded and walked home with my girl friend. Should I have stopped and spoken to him, or did I do right in walk-ing away? He waits outside even there

He waits outside eve evening and follows m not forward in speaking I do not know. Plea what to do, as I am o plexed as to know

HE'LL FIND a way to be pro-perly introduced to you. Dorothy, and then you will have no regrets—it's the best way, and has been for many a long year. Annie Laurie. Distracted. D ISTRACTED, if I were you I would not allow the man to whom I was engaged to think lightly of me; better have him think you a little distant; his affection will last longer. will D

DEAR ANNIE LAURIE: DEAR ANNIE LAURIE: I am a young girl nineteen years of age I have been en-gaged to a young man nearly four months. He has asked me to inarry him in three years. Our people don't agree to us going together. We love each other very much, and don't know what to do. Do you think it is right for us to be going together? Would you kindly advise what to do? Dimples.

Dimples

Dimples. I is very hard, my dear Dimples, for me to tell you whether or not you should go with this young man to whom you seem to have secretly engaged yourself—because I don't know why your parents object to him. If I were you, I would re-member that my mother and father love me better than anyone else in the world, and that they wish only for my happiness. That will help you to solve your problem. Annie Laurie.

Annie Laurie.

# ABOUT SOLDIERS AND FROM THEM

DEAR ANNIE LAURIE:

May I come to you with a few small matters which I have been small matters which I have been trying to figure out for myself? Is it right for a girl. who is nearly sixteen to allow boys to call? If so, what time should they go home? What time do you think a girl should leave a private dance or card-party? In what way could I show a certain person I did not cars to be in his company, without hurt-ing his feelings? Do you think I am too young to go to a large school dance with a boy friend?

doing wrong, what would you ad-vise me to do? Gretchen. - afraid of it, and its long train of un-happiness. If she's worthy of the I feeling you have for her, she'll stop it uch — and that right away, too. vise me to do? Gretchen. WELL, my dear Gretchen, I wouldn't worry too much about what has happened in the past, if I were you, but I would take care that such things did not continue to happen in the future. Why don't you tell him that you do not love him less, but that you have re-cently felt that you love him too much to permit him to get a wrong impres-sion of you? Annie Laurie.

Annie Laurie.

DEAR ANNIE LAURIE: I am twenty-two years of age, have a good position, but only a small salary. My friend, with whom I am keeping company, is twenty-four. We both love each other and get on fine together. Now, Miss Laurie, would it be fair to her if I asked her to be-come engaged, knowing we will not be able to get married inside of four or five years? of four or five years?

DEAR ANNUE LAURIE: Do you think it is wrong for an engaged girl to sit on her lover's knee, and to be subjected to kisses which last several minutes? I do not like to speak to my mo-ther on such subjects, so I thought I would appeal to you. Distracted. Jack. TWENTY-FOUR is not so great an age that there cannot be happi-ness in the many years to come. If she is willing to wait for you it would certainly be fair to ask her to wait.

Annie Laurie.

DEAR ANNIE LAURIE: I am nineteen years of age and conjudered quite handsome by my lady friends.

I am very much in love with one

I am very much in love with one girl about my own age. Do you think it would be advisable to pro-pose to her? I have been in the habit of wearing my hair in the brush-cut style, which the boys tease me about, but the girls all like very much. Would you advise me to change it ordeave it as it is?

. I am now seventeen and he twenty-one. He went away to live for a while, and only came back to town this winter. He says he thinks it is quite all right for him to kiss me as he used to. 1 don't mind a bit myself. What shall I do? him to kiss me as he used to. 1 don't mind a bit myself. What shall I do? Rosebud. WORRIED," your problem has been that of many a lass ever since the world began, and with gladness that you have waited

DEAR ANNIE LAURIE:

I am a boy of nineteen, and have been keeping company with a young girl, whom I admire very much. She also has many other admirers, but I am always treated well, and when going to see her am

weil, and when going to see her am very welcome. The other night, after I had fin-ished talking to her on the 'phone, and she had told me that she was retiring early. I happened to be walking along the street with one of my boy friends, when I met her with another boy. The following evening there being a dance held at the club. I had invitations to go with her, but I cancelled the enwith her, but I cancelled the en-

gagement. Did I do right? Please advise

MY DEAR Jack, did you give her w chance to explain? Perhaps she was the victim of circumstantial evidence and may not really have been at fault at all Why don't you see her and give her that chance to explain? I think you owe it to her. Annie Laurie.

possible, but sometimes people think there is no end of our patience. Why don't you try not seeming to care so much? It might help.

Annie Laurie

EAR ANNIE LAURIE: I love a young man very dearly, and I think he loves me, or at least, did love me. Lately we have been drifting apart. He seems cool, and we can never agree on any subject. We have been keep-ing company for some time now, and I would like to always be his best friend.

Dear Annie Laurie, please tell me a way to make him love me

esain in the old way. Peg. MY dear Peg, there is no mystery at all about making one who once loved you love you again. Perhaps you have not been as sweet (ampered, kindly, or as patient and unselfish as you once were toward him-be just as nice as you were, try is make everyone love you and then he cannot help loving you, too. Annie Laurie.

BAR ANNIE LAURIE:

26

anadian

I am eighteen years old, and have been keeping company with a very nice gentleman for some lime, He has a very bad boy friend with whom I dont' agree. He tried to come between us and has suc-ceeded. He has told untruths about me to my friend, and my boy friend has believed them and won't listen to my story. I am a good girl, and never go out at night much. Worried.

DEAR ANNIE LAURIE: I am a poor working girl, and about a year ago 1 met a very nice and well-to-do young man. Since that time he came to see me very then they a phoning bindees often, always showing kindness and affection towards me, and now e asks me to marry him. I love him with all my heart, but I told him I had to help my parare very poor. He said i could help them just the same when I was married. ase tell me if I could, be-

here i am the only one that helps them along. I could not see them in poverty, and my friend could set another nice girl, I am sure. Do you think he really likes me? I am plain, and do not wear clothes Red Hair. S.-Could a poor girl ike me happy by marrying a rich an? I am twenty and he is

ARE him at his word, my dear, and marry him. He must love you with all his heart, or he de not have asked you to be his

You are so sweetly unconscious Your own good qualities that hap-

the burden you are trying

W ELL, Broken Hearted Blue Eyes, if your sweetheart loves

you enough he will give up gambling to win you for his wife. My dear. don't marry a gambler. You know as well as I do that unhappiness lies in such things, and I only wish that my advice may coincide with your letter. Ask him to give up gambling, make it the price of your love. Annie Laurie.

Annie Laurie. DEAR ANNIE LAURIE:

Last summer I met a young man, of whom I think a great deal; and he thinks a lot of me. He was called away on business, but ex-pected to be back in a few weeks. It is now a few months, but he has not returned yet. I receive three letters a week. He has asked me to go where he is and be married. Do you think it is my place to go? F. I. G.

WORRENED, the man who talked about you and told those un-truths is no more bad than the boy to whom he told them, and whe told you. If I were you, I would see the boy whom I like, and who bore the report of these untrue stories to me, and I would tell him a final time that they are untrue and give time that they are untrue, and give him his choice of believing me, or never seeing me again. Annie Laurie. DEAR ANNTE LAURIE: Intere some woman Irlend of yours in the town where he now is whom you can visit, and who will be a wit-ness of your marriage? If the answer to every one of these questions is yes, then go, my dear, and may the wedding belis ring very happily for Annie Laurie. you.

DEAR ANNIE LAURIE: I am seventeen, and have been keeping company with a boy five years my senior. I like him very much. but he does not know it. I am of a very independent na-ture and somewhat of a spitfire. I am very sorry of this, for I ad-mire mild girls. He is much the

same and so you see we clash. We spat continually, but always make up. I hate scrapping, even if we do make up. I can't tell whether he likes me or not. Sometimes I think he does, then again I imagine he doesn't. He told a friend I was a puzzle

to him.

Now, dear Annie Laurie, do you hink if I were a little less inde-pendent, and let him know I like him a little bit we would get along any better?

### Toronto Girl.

M<sup>Y</sup> dear little girl, seventeen shouldn't worry so terribly hard about anything save overcoming a "spitfire disposition." Perhaps if you were "mild" he would The form good qualities that hap-iika you all the better. But don't let match. PAGE FIVE

DEAR ANNIE LAURIE: I am a young girl of twenty, and am acquainted with a young and am acquainted with a young man of twenty-three. My parents wish me to marry him, but I do not love him. He is very honorable and has a fine position. I like him real well, but you know that isn't love. Would you please tell me what I should do? Billie.

PERHAPS, my dear, Bille, you don't know whether you love him or not-love that is not wildly romantic sometimes develops into the finest love of all, with mar-riage. Could you give him no? Would riage. Could you give him up? Would you be happy never to see him again? Test your "liking" by these questions,

and your problem may be solved. Annie Laurie.

DEAR ANNIE LAURIE: I know a young man I like very much and I know he likes me, but about a month ago he offended me. I have only seen him two or three times since. He spoke to me as friendly as ever and I spoke to him, but very coldly. What shall I do, wait and see if he asks forgive-ness, or shall I be as friendly as ever with him?

Anxious PERHAPS-whatever the offence was, my dear, he has been pun-ished sufficiently. Don't keep him forever under your displeasure. Be as

friendly with him as you were be-fore, trusting that he will not repeat his mistake.

Annie Laurie. DEAR ANNIE LAURIE: I am in love with a young man whom my parents do not care for. I am eighteen years of age, and my parents will not let me see or write to him. He is not in a very good position just now, but he has good prospects. I don't think that

should keep us apart. I met him a few days ago and he asked me to elope with him. Between us we have enough money to start housekeeping comfortably. Would you advise me to do as he wishes?

Peg P. N<sup>O,</sup> my dear Peg, I wouldn't elope: just wait a little while and everything will come out all right, if you love each other very, very

much. You seem a good, sensible girl; there are years before you; you are just beginning life. Don't start it with estrangement from your parents. Leave the test of time and constant love for each other to reconcile them to the match they more wave theart will Annie Laurie

DEAR ANNIE LAURIE: DEAR ANNIE LAURIE: I am sixten years of age and have been keeping company with a man of thirty-seven. He says he loves me and whenever I see him he wants me to sit on his knee and caress him. This offends my sense of propriety and I can't make him understand why I object. Please tell me what I should do in this case and I will be very grateful. grateful. Bashful Friend.

S IXTEEN, my dear, and keeping company with a man of thirty-seven! He is old enough to be your father. What advice can I give you, my dear, but never to see him again? Annie Laurie. again?

DEAR ANNIE LAURIE: My sister is keeping company with a nice young man. They are not engaged, but he comes four times a week and stays till eleven o'clock at night. Is that right? Blue Eyes

Blue Eyes. W ELL, my dear Blue Eyes, don't you think your mother and father are better judges of what is right than you are? They wouldn't permit your sister to do any-thing that isn't right—but it does seem as if your sister's sweetheart did call very often on me, to whom he is not engaged, doesn't it? Annie Laurie-

Annie Laurie. DEAR ANNIE LAURIE:

I am eighteen years of age, and have been going with a gentleman twenty-six years of age, for some time. I love him dearly, and I know for a fact that he loves me very much. He takes me out a great deal, but never asks to come to the house to spend the evening. I think he would like to, but is too shy to ask, and he never goes to call on other girls. It perplexes me very much. I always treat him nicely, and all my family like

Annie Laurie.

him very much, and treat him accordingly. I would be very much obliged to you, dear Annie Laurie, if you could tell me the reason for this.

Cutey.

WHY DON'I' you ask him to come to your house for dinner the to your house for dinner the very next time he takes you

out? Perhaps you haven't really in-vited him at any time to spend an evening-so how can you expect that he feels he is really welcome in your

once in a while. Annie Lauire. home

than eleven. If you keep early hours and talk it all over with your parents, I cannot see any harm in the parties, I wouldn't try to show any one I didn't like him unless he was really wicked—just don't think too much about it and the rill all address that about it, and it will all adjust itself. Annie Laurie.

DEAR ANNIE LAURIE: I came to this country two months after war broke out and I have a bit of capital, but I have enlisted with the 2nd contingent I have no relations and no friends un this country, only a few ac-quaintances, but there is a girl working in one of the department stores here whom I would very much like to know, as I am sure that on my part it would ripen into more than mere friendship. I know that she is not engaged and thought I would like to know her very much. We have no mu-tual friend who could give me an introduction to her, and I am afraid that she would be offended if I spoke to her without being introduced, as she seems to be that sort of girl. I should judge her to be about twenty years old and I am twenty-four.

I had been doing very well since I came here, before I enlisted, and I should like to know that there is someone thinking about me while I am in the trenches in France.

My people are from the old country but I was born in South America. Please tell me how I

whom you want to play a very kindly part? If you are earnest in what you have written me, if you mean every word, why don't you go to the man at the head of the department in which ment, because she has a habit which I do not approve of, and of the head of the department in which she works, pledge him to secrecy, tell him precisely what you have told me, and ask him to help you? There is no doubt in the world that he can help you and do it in a kindly way that will make it all seem perfectly natural and right to the girl for whom you other fellow to go home with her. She has always given me first

seem to care so much.

flirt, but I feel satisfied she is not. It would almost break her heart if she knew this, and I. would have proposed, were it not

> Will you kindly advise me how to overcome this. and whether it is wise to mention her habit to her or not?

for this.

I have been going with a young man over a year, and I allow him to kiss me. Is it wrong? He says he loves me, and he always treats me grand. I hope to be more than a friend to him some day. But I am afraid he will lose his respect

B.M.D. Y ES, B. M. D., let the boys call on you if your parents believe them to be the right sort, but don't let them stay very late, unless there are a number of young beople-school and late hours don't mix very well. I'd leave the evening weith

when other people take him with so Mittle seriousness. Why don't you go to work and get to interested earning a place for yourself in the world there'll not be much time left for anything else? About that time instead of you wondering whether you'd better come or go, hither and yon to please the passing fancy of some one else, the tables will be turned-you will be the one to say where others shall go. Ferhaps the girl likes you, and per-haps not-work and laugh-and be happy.

Annie Laurie.

Annie Laurie.

Hamilton.

DEAR ANNIE LAURIE:

When I was about seven years old I used to play with a little boy of eleven. We used to be, great friends, and to kiss cach other all the time.

FROM YOUNG MEN

I am a boy of 17. and like a girl who loves me very much, but is 10 years my senior. Would it be a nice thing if I should go out with her and find her love very true, even tho she is older than myself, and would it be right if she should drop her present friend?

There is one more thing I would like to ask you, the young ady has an sunt in another city where she is going to spend the summer months, and asked me why I didn't go to that city and get a job. Now, Annie Laurie, I want you to give me a lot of con-sideration in this letter.

DEAR ANNIE LAURIE:

### SYNOPSIS.

Sanford Quest, master criminologist of the world, finds that in bringing to justice Macdou-gal, the murderer of Lord Ashleigh's daughter, he has but just begun a life-and-death struggle with a mysterious master criminal. In a hidden hut in Professor Ashleigh's garden he has seen an anthropoid ape skeleton and a living inhuman creature, half monkey, half man, destroyed by fire. In his room have appeared from nowhere black boxes, one containing diamonds torn from a lovely throat by a pair of armless, threatening hands, both with sarcastic, threatening notes signed by the inscrut-able hands. He is arrested for the murder of his valet, Ross Brown, and a Miss Quigg, in his rooms. Laura and Lenora, his assistants, suspect Craig, the professor's valet. Lenora is abducted by the threatening hands, but is res-cued. Quest clears himself of the murder charge, but fails to trap Craig. In his rooms another black box appears in the rifled safe and, returning the diamonds a second time, the accompanying note tells him he has no chance against the inherited cunning of ages.

# SEVENTH INSTALMENT

### THE HOUSE OF MYSTERY

### CHAPTER XVI.

CHAPTER XVI. S OMETHING in the nature of a conference was proceeding in Quest's study. The professor was there, seated in the most comfortable easy-chair, smoking without relish one of his heat's best cigars, watching with nervous impatience the closed door. Laura and Lenora were seated at the table, dressed for the street. They had the air of being prepared for some excursion. Quest, realizing the professor's highly-strung state, had left him alone for a few moments and was studying a map of New York. The latter, however, was too ill-at-ease to keep silent for long.

for long. "Our friend French," he remarked, "gave you no clue, I suppose, as to the direction in which his in-vestigations are leading him?" Quest glanced up from the map. "None at all. I know, however, that the house in which Lenora here was confined is being watched placeby."

closely." The professor glanced across towards the table before which Leaora was seated. "It seems strange," he continued, "that the young lady should have so little to tell us about her incar-

Lenora shivered for a moment. "What could there be to tell." she asked. "except that it was all horrible, and that I felt things-felt dangers-which I couldn't describe." The professor gave vent to an impatient little ex-clamation

The police boat gives chase. <text><text><text><text><text><text>

"Inspector French speaking," he annou "Kindly tell me what is the number of the teles from which I am speaking, and who is the

He listened to the reply and asked another ques-

The insected to the reply and asked another quer-tion. "Can you tell me when this instrument was last used? . . . When? . . Thank you!" The inspector hung up the receiver. "The subscriber's name," he told them dryly. "is Brown. The number is not entered in the book, by request. The telephone was used an hour ago from a call office and connection was established. That is to say that someone spoke from this telephone." "Then if your men have maintained their search properly, that someone." Quest said slowly. "must be in the house at the present moment." "Without a doubt," the inspector agreed. "I should like to suggest," he went on, "that the two young ladies wait for us now in the automobile. If this man turns out as desperate as he has shown himself ingenious, there may be a little trouble." They both protested vigorously. Quest shrugged his shoulders. "They must decide for themselves." he said. "Personally, I like Lenora, who has had less ex-perience of such adventures, to grow accustomed to danger. . . With your permission, inspector, I am going to search the front room on the first floor before we do anything else. I think that if your before we do anything else. I think that if you wait here I may be able to show you something directly." Quest ascended the stairs and entered a wholly unfurnished room on the left-hand side. He looked for a minute contemplatively at a large, but rather shallow cupboard, the door of which stood open, and tapped lightly with his forefinger upon the back part of it. Then he withdrew a few feet and, drawing out his revolver, deliberately fired into the floor, a few inches inside. There was a half stifled cry. The false back suddenly swun open and a man rushed out. Quest's revolver covered him, but there was no necessity for its use. Craig, smothered with dust, his face white as a piece of marble, even his jaw shaking with fear, was wholly unarmed. He seemed, in fact, incapable of any form of resistance. He threw himself upon his knees before Quest. rectly.'

"I haven't," Laura faltered, trying to open her eyes, "and I'm not going to, but I think my arm's broken, and my side hurts." "The fellow's not down here, anyway," Quest declared. "Let's help her upstairs and get her out of this devil's house." They supported her up the steps and found a chair for her in the hall. She was white aumost to the lips, but she struggled bravely to keep con-sciousness.

sciousness. "Don't you bother about me," she begged. "Don't let that blackguard go! You find him. I shall be all right."

The inspector swung open the telephone cup-board and called for an ambulance. Then Quest, who had been examining the staircase, suddenly gave a little exclamation

"He's done us!"<sup>s</sup> he cried. "Look here, French-this is the original staircase. There's the leather loop. I know it because there was a crack on the fourth stair. When we rushed down the cellar after him, he swung the thing round again and simply walked out of the front door. Damn it, man, it's

They hurried outside. French blew his whistle. One of the plain-clothes men came running up from the avenue. He was looking a little sheepish. "What's wrong?" French demanded. "He's gone off." was the unwilling reply. "I guess that chap's given us the slip.""

suess that chap's given us the slip." "Speak up." French insisted. "The only place," the man went on, "we hadn't our eyes glued on was the front door. He must have come out thru that. There's been a motor-truck with one or two queer-locking chaps in it at the corner of the avenue there for the last ten minutes. I'd just made up my mind to stroll round and see what it was up to when Jim, who was on the other side, shouted out. A man jumped up into it and they made off at once." "Could he have come from this house?" French asked sternly. "I guess, if he's come out from the front door he might have done it." the man admitted. Quest and the inspector exchanged glances. "He's done us!" Quest muttered—"done us like a couple of greenhorns!" The inspector's rubicund countenance was white with fury. His head kept turning in the direction of Laura, to whom the professor was busy rendering metal.

"If I never take another job on as long as I live," he declared, "I'll have that fellow before I'm thru!" ....

### CHAPTER XVII.

<text><text><text><text><text><text><text><text>

Lenora sighed as she picked up her bug: "If it weren't for Laura." she said, "you'd it pretty hard to keep me away. I think that could see, the handcuffs put on that man it wou the happiest moment of my life." "We'll get him all right," Quest promised. member me to Laura." "And present my compliments, also," the pro-sor begged. Lenora left them. The professor bit and

The inspector nodded. "Say, that fellow's some sport!" he remarks miringly. "You wouldn't believe it just to him. That staircase this afternoon, tho, he teaches one not to trust to appearances. T think he had a truck waiting for him a corner of Gayson avenue." Quest replied the machine my men went after. The men like river thugs, altho I shouldn't have though if the professor hadn't used the word 'river p It's quite clear that they took Craig down river. There's only one likely ship sailing and that's the Durham. It's my belief Cm

her." The inspector glanced at the clock. "Then we've got to make tracks," he dec "and pretty quick, too. She'll be starting somewhere about number twenty-eight dock, a way down. Come along, gentlemen." They hurried out to the automobile and a off or the docks. The latter part of their joo for the docks. The latter part of their joo was accomplished under difficulties, for the was packed with drays and heavy vehicles, huried thru the shed on to the river wharf was no signs of a steamer there. "Where's the Durham?" Quest asked one

was no signs of a steamer there, "Where's the Durham?" Quest asked one of carters, who was just getting his team together The man pointed out to the middle of the where a small steamer was lying. "There she is," he replied. "She'll be off i few minutes. You'll hear the sirens directly a they begin to move down."

Quest led the way quickly to the eige of wharf. There was a small tug there, the cre which were just making fast for the night, "Fifty dollars if you take us out to the Du and catch her before she sails," Quest shout the man who seemed to be the captain. "Wh you say

The man spat out a plug of tobacco from

"Td take you to hell for fifty dollars," he swered tersely., "Step in. We'll make 't, i look slippy."

look slippy." They clambered down the iron ladder and ju onto the deck of the tug. The captain seized wheel. The two men who formed the crew, too their coats and waistcoats. "Give it to her, Jim," the former ordered. then, here goes! We'll just miss the ferry." They swung around and commenced their jou Quest stood with his watch in his hand. They setting up the anchor of the Durham and from y up the river came the screech of steamers best to move on their outward way. "We'll make it all right" the captain assured

"We'll make it all right," the captain assure They were within a hundred yards of the l other side of the steamer another tug shot out turning back towards New York. Huddled the stern, half concealed in a tarpaulin, was in a plain black suit. Quest, with a little sho cognized the man at the helm from his long eard. "That's one of those fellows who was in truck," he declared. "and that's Craig in the su We've got him this time. Say, captain, it's tug I want. Never mind about the steamer. U it and I'll make it a hundred dollars!" The man swung around the wheel, but he gian at Quest a little doubtfully.

eral good-morning. His eyes rested last and long-est upon Laura, who seemed, however, unconscious of his presence. "Now then, French," Quest began, as he returned his greeting, "take a cigar, make yourself comfortable in that chair and let us have your news. As you see, we have obeyed orders. We are all ready to follow you anywhere." "It won't be to the end of the world, anyway," the inspector remarked, as he lit his cigar. "I am going to propose a little excursion down Gayson avenue way."

The inspector nodded. "We have had those boys at the station." he went on, "and we have questioned them carefully. It seems that after they had picked up the ball, a man came out of the side entrance of the house, saw them reading Miss Lenora's message, and shouted after them. The boys had sense enough to scoot. The man ran after them, but had to give it up. Here is the description of him."

nose was a little hooked, and they both remarked up-on the fact that altho he should after them, he used no swear words, but simply tried to induce them to This description suggest anything to you, "Craig," Lenora said firmly. It is a very accurate description of Craig," Sanford Quest agreed.

Suddenly half of the stairs turned around and Craig disappeared.

"Back to that house?" Lenora exclaimed with a grimace

The inspector nodded.

The inspector took a piece of paper from his pocket. They all waited breathlessly. "Had to drag this out of the boys, bit by bit," the inspector proceeded. "but boiled down and put into reasonable language, this is what it comes to: A man of medium height, rather thin, pale, and after running a short distance he put his hand to his heart, as the out of breath. One of the boys thought his nose was a little hooled and ther better

"I am not speaking of lancies," he persisted. "You had food brought to you, for instance. Could you never see the hand which placed it inside your room? Could you hear nothing of the footsteps of the per-son who brought it? Could you not even surmise whether it were a man or a woman?"

Lenora answered him with an evident effort. She had barely, as yet, recovered from the shock of those awful hours.

"The person who brought me the food," she said, "came at night-never in the daytime. I never heard anything. The most I ever saw was once-I happened to be looking towards the door and I saw a pair of hands—nothing towards the door and 1 saw a pair of hands—nothing more—setting down a tray. I shrieked and called out. I think that I almost fainted. When I found courage enough to look, there was nothing there but the tray upon the floor." "You never heard, for instance, the rustling of a gown or the sound of a footstep?" the professor usized "You could not even say whether your jailer

"You could not even say whether your jailer was man or woman?"

"All that I ever head. "All that I ever head was the opening of the door. All that I ever saw was that pair of hands. One night I fancied—but that must have been a

"You fancied what?" the professor persisted.

"You fancied what?" the professor persisted. "That I saw a pair of eyes glaring at me," Lenora replied, "eyes without any human body. I know that I ran around the room, calling out. When I dared to look again there was nothing there." The professor sighed as he turned away. "It is evident, I am afraid," he said, "that Miss Lenora's evidence will help no one. As an expert in these affairs, Mr. Quest, does it not scem to You that her imprisonment was just a little purposeless? There seems to have been no attempt to harm her in There seems to have been no attempt to harm her in any way."

any way." "Whoever took the risk of abducting her." Quest pointed out grimly, "did it for a purpose. That purpose would probably have become developed in course of time. However we look at it, Mr. Ash-leigh, there was only one man who must have been anxious to get her out of the way, and that man was Craig."

The professor's manner betrayed some excitement. "Then will you tell me this?" he demanded. "The young lady is confident that she locked Craig up in the coach-house and that the key was on the outside the coach-nouse and that the key was on the outside of the door, a fact which would prevent the lock being picked from inside, even if such a thing were pos-sible. The window is small, and up almost in the roof. Will you tell me how Craig escaped from the coach-house in order to carry out this abduction—all within a few minutes, mind, of his having been left there? Will you tell me that, Mr. Sanford Quest?" the professor concluded, with a note of triumph in

"That's one of the troubles we are up against, "That's one of the troubles we are up against. Quest admitted. "We have to remember this, tho. The brain that planned the two murders here, that stole and restored Mrs. Rheinholdt's jewels, that sends us those little billets-doux from time to time. quite capable of finding a way out of a jerrybuilt garage."

The professor sniffed. He turned once more to Lenora.

"Young lady," he said, "I will ask you this. I do not wish to seem obstinate in my refusal to accept Craig's guilt as proved, but I would like to put this simple question to you. Did Craig's demeanor during your conversation seem to you to indicate the master criminal? Did he seem to you to be pos-sessed of supreme courage, of marvelous intelli-

rence?" Lenora smiled very faintly. "I am afraid," she replied, "that this time I'll have to satisfy the professor. He was white and trembling all the time, I thought him an arrant coward." The professor smiled beautifully as he slanced The professor smiled beautifully as he glanced ound. He had the air of one propounding an unround. nswerable problem.

answerable problem. "You hear what Miss Lenora says? I ask you whether a man who even knew the meaning of the

word fear could have carried out these ghastly crimes?"

crimes?" "I have known cases." Quest observed. "where the most cold-blooded criminals in the world have been stricken with the most deadly fear when it has come to a question of any personal danger. However," ha added, "here comes our friend French. I have an idea that he has something to tell us." They glanced expectantly towards the door as French entered. The inspector, who was looking

French entered. The inspector, who was looking

The professor looked troubled, also a little per-plexed. He said nothing, however. "Under these circumstances," the inspector con-tinued. "I have had the house watched, and I pro-pose that we now search it systematically. It is very possible that something may transpire to help us. Of course, my men went thru it roughly when we brought Miss Lenora away, but that wasn't any-thing of a search to count, if the place really has become a haunt of criminals."

What about the ownership of the house?" Quest asked, as he took up his hat.

The inspector nodded approvingly. "I am making a few inquiries in that direction." announced. "I expect to have something to re-

port very shortly. professor stood drawing on his gloves. The

The professor stood drawing on his gloves. The vague look of trouble still lingered in his face. "Tell me again," he begged, "the name of the avenue in which this residence is situated?" "Gayson avenue," the inspector replied. It's a bit out of the way, but it's not a bad neighborhood." The professor repeated the address to himself

The name," he admitted finally, as they moved towards the door, "suggests to me."

towards the door, "suggests to me, I must confess--we are going to see the house inspector?" "We are on our way there now, sir-that is if the young ladies are willing?" he added, glancing at

"We've been waiting here with our hats on for the last half hour," Laura replied promptly. "You've stretched your ten minutes out some, Mr. French."

The inspector manoeuvred to let the others pass on, and descended the stairs by Laura's side. "Couldn't help it," he confided, lowering his tone a little. "Had some information in about that house I couldn't quite size up. You're looking well morning, Miss Laura." this

morning. Miss Laura." "Say, who are you guying?" she replied. "I mean it," the inspector persisted. "That hat seems to suit you." Laura laughed at the top of her voice. "Say, kid." she exclaimed to Lenora, "the inspec-tor here's setting up as a judge of millinery!" Lenora turned and looked at them both with an air of blank astonishment. The inspector was a little embarrassed.

"No need to give me away like that." he muttered, as they reached the hall. "Now then, ludies and gentlemen, if you are ready."

They took their places in the automobile and drove

off. As they neared the vicinity of Gayson avenue the professor began to show signs of renewed un-house he gave a little exclamation. His face was grave, almost haggard.

"Mr. Quest," he said. "Inspector French, I deeply regret that I have a statement to make." They both turned quickly towards him. The in-spector smiled in a confidential manner at Laura. It

spector smiled in a confidential manner at Laura. It was obvious that he knew what was coming. "Some years ago," the professor continued, "i bought this house and made a present of it to—" "To whom?" Quest asked quickly. "To my servant, Craig." the professor admitted with a groap.

Lenora gave a little cry. She turned triumphant-

"All recollection as to its locality had escaped me," the professor continued sorrowfully. "I remem-ber that it was on the anniversary of his baving been with me for some fifteen years that I decided to show with me for some fifteen years that I decided to show him some substantia! mark of my appreciation. I knew that he was looking for a domicile for his father and mother, who are since both dead, and I requested a house agent to send me in a list of suit-able residences. This, alas! was the one I pur-

Quest glanced around the place. "I think," he said, "that the professor's statement now removes any doubt as to Craig's guilt. You

are sure the house has been closely watched, inspec-"Since I received certain information." French re-

PAGE-SIX

He threw himself upon his knees before Quest. "Save me!" he begged. "Help me to get away from this house. You don't belong to the police I'll give you every penny I have in the world to let me sol!" let me go!

Quest smiled at him derisively.

Quest smiled at film derisively. "Get up," he ordered, Very slowly Craig obeyed him. He was a pitiful-looking object, but a single look into Quest's face showed him the folly of any sort of appeal. "Walk out of the room." Quest ordered, "in front -so! Now turn to the right and go down the stairs.'

They all gave a little cry as they saw him apthey all gave a little cry as they saw him ap-pear, a trembling, pitiful creature, glancing around like a trapped animal. He commenced to descend the stairs, holding tightly to the banisters. Quest remained on the landing above, his revolver in his hand. French waited in the hall below, also armed. Leure griovad Lange's are in contrast. ned. Laura gripped Lenora's arm in excitement. "They've got him now!" she exclaimed. "Got armed "Got him, sure

On the fourth of fifth stair Craig hesitated.

him. sure!" On the fourth of fifth stair Craig hesitated. He suddenly saw the professor standing below. He gripped the banisters with one hand. The other he flung out in a threatening gesture. "You've given me away to these bloodhounds!" he cried—"you. for whom I have toiled and slaved, whom I have followed all over the world, whom I have served faithfully with the last breath of my body and the last drop of blood in my veins. Tou have brought them here—tracked me down! You!" The professor shook his head sorrowfully. "Craig," he said, "you have been the best ser-vant man ever had. If you are innocent of these crimes you can clear yourself. If you are guilty a dog's death is none too good for you." Craig seemed to sway for a moment upon his feet. Only Lenora, from the hall, saw that be a leather loop hanging from the banisters. Then a wild shout of surprise broke from the lips of all of them, followed by a moment of stupefied wonder. The whole staircase suddenly began to revolve. Craig, clinging to the banisters, disappeared. In a moment or two there was a fresh click. Another set of stairs, almost identical to the first, had taken their place. "The cellar!" Quest shouted as he runhed down

"The cellar!" Quest shouted, as he rushed down the stairs. "Quick!" They wrenched open the wooden door and hur-

They wrenched open the wooden door and hur-ried down the dark steps into the gloomy, unlit cellar. The place was crowded with packing-cases and two large wine barrels stood in the corner. At the further end was a door. Quest rushed for it and stood on guard. A moment later, however, he called to Laura and pressed his re-volver into her hand.

"Stand there," he ordered. "Shoot him if he tries to run out. I'll search in the packing cases. He might be dangerous.

He might be dangerous." The professor, out of breath, was learing against one of the pillars, his arm passed around it for support. Lenora, with Quest and French, searched hastily amongst the packing cases. Suddenly there was a loud crack, the sound of falling masonry, followed by a scream from Laura. French, with a roar of anger, rushed towards her. She was lying on her side already half covered by falling bricks and masonry. He gragged her away, just in time. "My God, she's fainted!" he exclaimed.

Lenora, who, with her hat on, was packing a small bag at the other end of the room, glanced up

"The man is a demon!" she exclaimed. "He would have sacrificed us all, if he could. When I think of poor Laura lying there in the hospital crushed almost to death so that he could save his miserable carcass, and realize that he is free, i feel-"

She stopped short. Quest looked at her and

She supped short. Quest looked at her and nodded. "Don't mind hurting our feelings. Lenora," he said. "French and I are up against it all right. We're second best, at the present moment — I'll admit that—but the end hasn't come yet." "I am sorry," she murmured. "I was led away for a moment. But, Mr. Quest." she went on piteously. "can't we do something? Laura's so brave. She tried to laugh when I left her an hour ago, but I could see all the time that she was suffering agony. Fancy a man doing that to a woman! It makes me feel that I can't rest or sleep. I think that when I have left the hospital I shall just walk up and down the streets and watch and search." Quest shook his head. "That sort of thing won't do any good," he de-clared. "It isn't any use. Lenora. working without a plan. That's why I'm here now, waiting. I want "Who are we," the professor asked describe."

to formulate a plan. "Who are we," the professor asked drearily, "to make plans against a fiend like that? What can we do against men who have revolving staircases and trolley-loads of river pirates waiting for them? You may be a scientific criminologist. Quest, but that fellow Craig is a scientific criminal, if ever there was one."

Quest crossed the room towards his cigar cabinet, and opened it. His little start was apparent to both of them. Lenora laid down the bag which she had just lifted up. The professor leaned forward in his

"What is it, Quest?" he demanded. Quest stretched out his hand and picked up from the top of the cigars a small black box! He laid it "Unless I am very much mistaken," he said, "it is

"Unless I am very much mistaken," he said, "it is another communication from our mysterious friend." "Impossible!" the professor exclaimed hoarsely. "How can he have been here?" Lenora cried. Quest removed the lid from the box and drew out a circular card. Around the outside edge was a very clever pen and ink sketch of a lifebuoy, and inside the margin were several sentences of clear handwriting. In the middle was the signature—the clenched hands! Quest read the message aloud: In the great scheme of things, the Supreme Ruler of the Universe divided an inheritance amongst His children. To one He gave power, to another strength, to another beauty, but to His favorites He gave cun-ning.

ning. They all looked at one another. "What does it mean?" Lenora gasped. "A lifebuoy!" the professor murmured. They both stared at Quest, who remained silent. chewing hard at the end of his cigar. "Every message," he said, speaking half to him-self, "has had some significance. What does this mean—a lifebuoy?" He was silent for a moment. Then he turned suddenly to the professor.

suddenly to the professor.

suddenly to the profersor. "What did you call those men in the motor-truck, professor-river pirates? And a lifebuoy! Wait," He crossed the room towards his desk and re-turned with a list in his hand. He ran his finger down it, stopped and glanced at the date. "The Durham." he muttered, "cargo cotton, destident nation, Southampton, sails at high tide of the 16th. Lenora, is that calendar right?" "It's the 16th, Mr. Quest." she answered. Quest crossed the room to the telephone. "T want number one Central," he said, "Thank you! Put me thru to Mr. French's office. Hello, French! I've got an idea. Can you come round here at once and bring an automobile? I want to get down to the docks-not where the passenger to get down to the docks—not where the passenger steamers start from—lower down. . . . Good! We'll wait."

We'll wait." Quest hung up the receiver. "See here, professor," he continued, "that fellow wouldn't dare to send this message if he weren't pretty sure of getting off. He's made all his plans beforehand, but it's my belief we shall just get our hands upon him, after all. Lenora, you'd better get along round to the hospital. You don't come in this time. It's hard enough to have Laura laid up—can't risk you. There'll be a little trouble, too, before we're thru, I'm afraid."

A THE-TOBONTO SUNDAY WORLD

"Say, what is this show?" he asked. Quest opened his coat and displayed his He pointed to the inspector.

"I want that have a sub-alin," he announced. "Say, you ain't the river police?" "I'm Inspector French from headquarters," with Continued on Page Seven.

of a crib to lie down in. The housemaids called hfm the Camel. I introduced him as "the Tamil," but they knew nothing of the ethnological subdivisions of India. They called him "that" there beastly camel," and I saw by the light in his eye he under-stood only too well. Coming up the staircase he confided to me his views about the housemaids. He had lived at the docks too long. I said they weren't. He said they were.

<text><text><text><text>

out of the skylight on the roof and sat there till J came home. In the dawn he was very penitent. He had mis-arranged his drink; the original intention being to sleep it off on my hearth rug, but a housemaid had invited a friend up to the chambers to look at him, and the whispered comments and giggles made him angry. All next day he was restless, but attentive. He arged me to fly to foreign shores, and take him with me. When other inducements fai'ed he re-iterated that he was a "native ki-lis-ti-an." and whetted his knife more furiously than ever. "You do not like this place. I do not like this place. Let us travel damn quick. Let us go on the sea. I cook blotters." I told him this was impossible, but that if he stayed in my service we might later go abroad and enjoy ourselves. cook blotters. I told nim this was impossible, but that if he stayed in my service we might later go abroad and enjoy ourselves.
But he would not rest and sleep on the rug and tend my shirts. On the morning of the Rewah's arrival he went away, and from his absence I fancied he had failen into the hands of the law. But at midnight he came back, weak and husky.
"Have got him," said he simply, and dragged his ulster down from the wall, wrapping it very tightly round him. "Now I go 'way."
He went into the bedroom and began counting over the tale of the week's wash, the boots and so forth. "All right," he called into the other room. Then came into say good-bye, walking slowly.
"What's your name, marshter?" said us. I told Mim. He bowed aud descended the staircase painfully. I had not, paid him a penny, and since he did not ask for it. counted on his returning at least for wages.

I have tried to deal with those housemaids in every possible way. To sling a blunt "Annie" or "Mary" or "Jane" at a girl whose only fault is that she is a heavy-handed incompetent strikes me as rather an insult, seeing that the girl may have a brother, and that if you had a sister who was a ser-vant you would object to her being howled at up-stairs and downstairs by her given name. But only ladies' maids are entitled to their surnames. They are not nice people as a caste and they researd the ladies' maids are entitled to their surnames. They are not nice people as a caste, and they regard the housemaids as the chamar regards the mehter. Consequently I have to call these girls by their Christian names and cock my feet upon a chair when they are cleaning the grate and pass them in the halls in the morning as tho they didn't exist. Now the morning salutation of your Kadir Baksh or my Kadir is a performance which. Turveydrop might en-vy. These persons don't understand a nod: they Kanr is a performance which Turveydrop might en-vy. These persons don't understand a nod; they. think it as bad as a wink, I believe. Respect and courtesy are lost upon them, and I suppose I must gather my dressing gown into a tail and swear at them in the bloodless voice affected by the British female who—have I mentioned this.—is a highly composite heathen when she comes in contact with her sister clay downstairs.

her sister clay downstairs.

The sister clay downstants. The softer methods lay one open to harder sus-picions. Not long ago there was trouble among my shirts. I fancied buttons grew on neck bagds. Kadir Baksh and the durzie encouraged me in the belief. When the lead colored linen (they cannot wash, by the way, in this stronghold of intidels) shed its buttons. I cast about for a means of rénewal. the strong of the way, in this stronghold of inidels) shed its buttons, I cast about for a means of renewal. There was a housemaid and she was not very ugly and I thought she could sew. I knew I could not. Therefore, I strove to ingratiate myself with her, believing that a little interest, combined with a little capital would fix these buttoes with a little believing that a little interest, combined with a little capital, would fix those buttons more firmly than anything else. Subsequently, and after an interval— the buttons were dropping like autumn leaves — 1 kissed her. The buttons were attached at once. So, unluckily, was the housemaid, for I gathered that she looked forward to a lifetime of shirt sew-ing in an official capacity and my Revenue Board contemplated no additional establishment. My shirts are buttonsome, but my character is blasted. Oh, I wish I had Kadir Baksh!

This is only the first instalment of my troubles. The heathen in these parts do not understand me;

### y unwashed. But he came from the east.

somewhere near my chambers (I have forty things to tell you about chambers, but they come later), and generally look after my things. In the intervals of labor I would talk to him in his own tongue and we would go abroad together and explore London. Do you know the Albert Docks? The British-India steamers go thence to the sunshine. They sometimes leave a lascar or two on the wharf, and, in fact, the general tone of the population there-abouts is brown and umber. I was in no case to be particular. Anything dusky would do for me, so long as it could talk Hindustani and sew buttons. I went to the docks and walked about generally I went to the docks and walked about generally I went to the docks and walked about generally among the railway lines and packing cases till I found a man selling tooth combs, which is not a paying trade. He was ragged even to furriness and very unwashed. But he came from the east. "What, are you?" I said, and the look of the missionary that steals over me in moments of agitation deluded that tooth-comb man into answering, "Sar. I am native ki-lis-ti-an." but he put five more syllables into the last word. last word.

"There is no Christianity in the docks worth a tooth-comb. I don't want your belief, I want your jat," said I.

"I am Tamil," said he, "and my name is Ramasawmy."

It was an awful thing to lower oneself to the level of a colonel of the Madras army and come down to being tended by a Ramasawmy; but beggars cannot be choosers. I pointed out to him that the tooth-comb trade was a thing lightly to be dropped and

taken up. He might injure his health by a washing, but he could not much hurt his prospects by coming along with me and trying his hand at bearer's work. "Could he work?" Oh. yes, he didn't mind work. He had been a servant in his time. Several servants in fact in fact.

"Could be wash himself?" "Ye-es." he might do that if I gave him a coat—a thick coat—afterward and especially took care of the toothcombs, for they were his little all. "Had he any character of any kind?"

"Had he ary character of any kind?" He thouht for a minute and then said cheerfully: "Not a little dam.' Thereat I loved him, because a man who can speak the truth in minor matters may be trusted with important things, such as shirts. We went home together till we struck a public bath, mercifully divided into three classes. I got him to go into the third without much difficulty. When he came out he was in the way of cleanliness, and before he had time to expostulate I ran him into the second. Into the first he would not go till I had bought him a cheap ulster. He came out almost clean. That cost me three shillings altogether. The ulster was half a sovereign and some other clothes ulster was half a sovereign and some other clothes were thirty shillings. Even these things could not hide from me that he looked an unusually villainous

creature. At the chambers the trouble began. The people in charge had race prejudice very strongly, and I had to point out that he was a civilized native Christian anxious to improve his English—it was fluent, but unchastened—before they would give him some sort

for wages. It was not till next morning that I found big dars drops on most of my clean shirts and the housemaid complained of a trall of blood all down the staircasc. "The Camel" had received payment in full from other hands than mine.

- Well! Doctor Bosh came in one night To call on Pa you know; He looked around and said: "My! My! What's this? What's this? Ho! Ho!
- "Two growing boys, tho fat as fat, A tonic they must need; I'll make one up and send it in,

To SEE it made your eyes pop out,, To SMELL it made you cry.

That day, my dears, passed all too quick, The hours really flew; When half past eight came, John and Tom, Just felt most awfully blue.

- "Well boys, come on," poor Pa calls out. "Can't shirk your duty now; Just look this medicine in the face, You'll get if down somehow."
- To see them look so sad. And, my! that bottle staring there, Would make you feel quite bad.

"Now 1, 2, 3, come, Johnny first, SIX TABLE SPOONS you know, Is what the doctor said you need,

# --- ADVENTURES OF THE TWINS AND GOOD, KIND, DEAR DOG MUTT ---JOHN AND TOM'S SPRING TONIC AND WHAT HAPPENS.

E SMILING FACE CIUB

'Twill be a kindly deed."

Next morning bright and early, yes, The bottle came, oh my!

To TASTE it—No one dared as yet; But Pa looked 'round and said: "You'll start to take it, boys, tonight Before it's time for bed."

Poor John and Tom came creeping in,

It's odd, but it is so."

THAT AWFUL TABLE SPOON, Oh! Oh!

Then 1, 2, 3—What's this?—Look!! Look!!! Such grand and glorious pluck! He litted up that bottle, yes— AND DRANK IT gluck! gluck! gluck! Look at the S (first letter of SMILE) he is making with his tail, just to cheer himself up.

THAT AWFUL SMELL, Well! dear me, yes,

'Twould make you roar and cry. And that was just what Johnny did-Began to howl and roar;

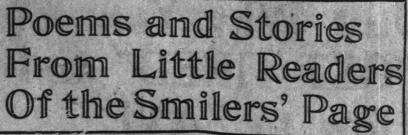

Then Tom joined in and such a din You never heard before.

The people from the houses near, Came tumbling, jumping out, "Ho! Murder! Fire! Thieves! Police!" They run along and shout.

Poor Pa picks up a TEA SPOON then; He tears his hair and cries. "Come just take this, a TEA SPOON full, It's here before your eyes."

Well! Mutt, good dog, was there of course, And great was his distress; He showed more brains than Pa or all, I really must confess.

For when he heard the noise and roar, He just looked 'round, you see,

172 Caledonia road. Here is a little verse I am sending: It an't no use to fret-Just take it as you find it; It's the best old world you've been yet, So laugh and never mind it. Sent in by Dorothy Cruttenden.

A RIDDLE.

Black we are but much admired-Men seek for us till they are tired. We dirty the house, but comfort men. Tell me, this riddle if you can. Answer: Coal. Yours truly,

Edwin Roadknight, 16 Brooklyn avenue Toronto, Ont.

Dear SMILERS:

Dear SMILERS: I have been reading the Sunday World for about a year. I like read-ing about all the SMILING faces, and would like to receive a button and join the club, and will try always to have a SMILING face. I am sending in a little poem which I would like to see in your paper. At Grandma's. I must wear my buckle shoes. And mustn't kick my feet When we go to Grandma's Sometimes for a treat.

Baby wears her broidered dress And her frilly hood, When we go to Grandma's We must both be good.

We must kiss her carefully. Never be too rough. Never speak to loud to her, And yet speak loud enough

We must only play with things That she lets us touch, Never be too shy to talk, And never talk to much.

We have tea at Grandma's (But it's milk you know), Out of cups that mother use Years and years ago.

Baby dropped a saucer once. But it didn't break. We must never spill the crumbs When we're eating cake.

We must show how much we've grown, And she lets us see Pictures of her little girls Not as big as min.

Jack Frost waited in the garden, Till May came dancing along; Wrapped in her furs so warmly, And humming a little song; And she bounded along so lightly, And never once had a fall, And SMILED in his face so brightly, Jack Frost could not catch her at

one of them and also my two little friends would like to join it and we would try to smile all the time and we would like to have those S. F. C. buttons very much. I hope you will send them. I am sending this little verse to be put in the SMILERS page.

Yours truly, Mildred McCague, Irene Smith, Jane Risebrough.

Newtonbrook. Two robin redbreasts built their nest within a hollow free, The hen sat quietly at home, The cock sang merrily, And all the little young ones said: Twee-twee, twee-twee, twee-twee. One day the sun was warm and bright and shining in the sky, Cock robin said, "My little dears. Tis time you learned to fly"; And all the little young ones said: Til try; Fll try; Fll try.

The Snowman. Once upon a time there was two ittle girls who lived in the country and their names were Doris and Mary. Doris was eight years old and Baby Mary was only four. This morning, atter they got up, they found the earths all white. "Oh!" said Doris, "I am soing to make a snowman today." After breakfast was over they went out into the garden. They worked all morning at him and by dinner time he was all finished. In the afternoon the two little girls came out of the house and they had an old coat and hat with them. They put it on the snowman. Doris said he was quite a time looking gentleman. Next day when Doris and Baby Mary started to cry, butwars to see their snowman he had gone way. Baby Mary started to cry, butwars just then she remembered that she must SMILE because she belonged to the SMILLING FACE CLUB. And she began to smile and laughed to think house at osmile and laughed to think house at osmile and laughed to think house at more and have the sware MIT Shaw street. 177 Shaw street,

Jack Frost. Jack Frost looked in at the window, One bitter, cold winter day: He wanted to pinch the fingers, And nose of little May. But May was having her breakfast, Of hot new mikk and bread, So he said, "I must wait and catch herias When she comes out instead."

Dear Editor, I hope it is not too long. From yours truly, Garnet and Ruby Siford, Garnet, age 7. Merriton, Ont.-Ruby, age 12. Our Ponies.

rich and fair.
And Beauty's father plucked a rose within that garden fair.
He plucked the rose for Beauty, and as he turned away
He heard a roar, and saw the beast, who sternly bade him stay.
"Prepare to die." the monster said; his form was fierce and wild.
"Forgive me, Sire," the father cried, I plucked it for my child;
My little daughter, Beauty," "Then, send her here to me,
Or, by my faith." the Beast replied.
"Til hang you to a tree."
The father told the dreadful news, but Beauty knew no fear;
"Til gladly go," the brave girl said.
"and take your place my dear."
So off she went but strange to say, the Beast was vory kind.
The gentlest, truest, noblest Beast that you could ever find.
He fell 'n love with Beauty, and begged her every day. 1 have a little pony. So very soft and brown, And every morning just at nine. I ride him up and down. My sister, Belle, she has one too, And every morning she rides to. school.

1915 Bathing Suits as they are Really Worn

Toronto Will See Some Charming Effects at The Island and The Beaches This Summer If We Can Accept the Winter Resort Prophecies As a Guide.

PAGE TEN

DROPHECIES about bathing suits are not always fulfilled. Designers vent their imagination creations of various sorts, and se often make up a brilliant and fantastic forecast in spring days. More convincing are bathing clothes actually in use by the fashionable, and es we in Canada cannot boast a beach

open at this early date we must travel south where hundreds of Canadians have fled to escape the melting snows and cold winds. It so happens that fashion is citing the styles inaugurated at Palm Beach but Canadian women quite often refuse to wear the curiosities thrust upon them from that quarter and so it is much more probable that a correct forecast of styles can be gained from Canadians rather than from Americans.

The question is indeed of vital

# **Reproductions of Famous English Recruiting Posters**

In The Sunday World of May 2, next week, will be started a series of reproductions of the finest and most effective posters used in raising England's great army. They will be shown in the original colors. The Sunday World's engraving equipment and color printing presses-unnapproached in Canada-permitting reproduction in a faithful and striking way.

Not often does The Sunday World announce its features in advance, preferring to let one Sunday's issue stand as a guide to the newspaper enterprise and artistic worth of the issues that will follow, but a departure from this policy seems proper because of the great interest the posters are bound to provoke.

The first of the series will be "The Veteran's Farewell," a poster-picture full of the spirit that animates England, and a splendid sample of art work. It will appear on the cover of the Magazine Section.

south, including Kiev and Odessa while Turkey will take the whole of the Caucasus, including the govern-ment of Saratov. (The Tageblatt publishes an article by an Austrian pro-fessor which demands a similar dismemberment of Russia). Egypt fails to Turkey, which will

simply declare the Suez Canal shares void. India will be given complete sekgovernment, while Ireland will be made an independent state with some kind of

German guarantee. While the inhabitants of the conquered provinces will be forced to serve in the German army, they will have no voice in the affairs of state nor any representation in the reichstag. They will have "parliaments" at Warsaw and Brussels, but these will, 'of course." have no voice in imperia questions.

The war indemnity must follow the policy of "bleeding to the white." All the countries concerned must be absolutely crippled forever. Her Rudolf Martin thinks that \$30,000,000,000 should be demanded by Germany and Austria alone. England should pay \$18,750,000,000; France, \$6,250,000,000; Russia, \$3,750,000,000 and Belgium (which is to be annexed!), \$1,250,000,-

Responsible publicists like Count Reventlow and Major Parseval believe, or, at any rate, say they believe, that Germany's military situation is now such that the government can safely outline a program of annexa-tion even if no details are supplied,

# **Young Architect Faces Uphill Fight** When Starting Out

Finds it Very Hard to Get a Connection and Hard to Educate a Client Up to the Dignity of His Profession-Toronto Men Tell What They Have Had to Contend With.

BY I. B. WRENSHALL. HE LEAST appreciated of all the

professions, yet one of the most important, when one considers developed the most wonderful design that the whole surroundings of our lives are concerned with it-is architecture

Correspondingly difficult and uphill is the commencement of the young architect, for he has not only the difficulties which are attendant upon beginning in any profession, but he has also to educate his clication, but he is the commencement of the young has also to educate his client up to were more willing to spend money on the dignity of his profession, and the training and knowledge which he has acquired before he opened up his cffice. There is anything but the same implicit faith placed in the same implicit faith placed in the architect which is given to the aver-age doctor or lawyer by the "man on ideas. The contractor practically lays the street," who comes to him for it all out help. The average citizen, when he is "The average citizen, when he is

willing to allow that part of the trans-action to be in the bands of the archi-tect, he at least knows quite well how much moncy he has to spend and acts accordingly, keeping the former up to his own personal ideas. If he

up to his own personal ideas. If he called in a doctor, or went to a lawyer he would depend upon their professional knowledge, and would never think of diagnosing for them,

but the average man-or woman lated to the fine arts, architecture in

but the average man-or woman either-has his own ideas—as upon art—upon architecture. Everyone knows more about how a certain pic-ture should be painted than the artist, and everyone knows more about what style a house should be than the architect. Then there is fashion, with which he has to contend. If mansard roofs are the ruge-Mansard roofs must be put in even if the whole soul of the architect revolts against them. And so on ad infinitum. These facts some-what complicate the situation, and as a prominent architect remarked re-cently. "I had a young fellow come to me the other day—he wanted to be an architect—but when I told him some of the difficulties we had in beginning, and the troubles that were con-stantly corpenies up, he decided to the difficulties we had in beginning. and the troubles that were consolutely correct.

stantly cropping up, he decided to The junior partner of one of the choose another profession. The junior partner of one of the big firms of most important of the big firms of When a young fellow is just thru architects gave his opinion that the

much better results, aestheically as well as practically. "He is a stranger, and that fact must "With regard to the training of an

be overcome before he can hope to architect," he said, "a great many have any work to do. His great diffi- men practice who have no university culty is in making a connection. A training, and in fact a few years ago young architect simply must belong there was no such thing as a proper architectural course, but within the to all the cluos. And he must above all things mix socially. He must know plenty of people, for if he doesn't he will never get known, and that's the most important thing in life for him in starting out, and the hardest problem he has to face. As soon as he does get known his friends will end him work. Very often his first client comes to him something like this: "A man is planning to do some

say. 'Why not give your work to "Before the course was established at the university, the Ontario Associa-the university, the Ontario Associa-tion of Architects held examinations, him,' and the commission comes along. It's the greatest asset an that. They are trying to get legislaarchitect can have, an important con- tion thru to make it compulsory for a nection, and if necessary he must spend all his early years in obtaining fore practising architecture, but fore practising architecture, but it is a hard task to decide whether a man it, half starving if necessary, and

it, hair starving in necessary, and a hard task to decide whether a man struggling for years sometimes, until he gets along. Once he has his con-nection he can sit back out of the nection he can sit back out of the struggle and work his own clientele. anything along this line or not. There are other difficulties and

Competitions Often a Help trials which we have," he continued,

"Chief among them is drawing plans "After a man leaves college if any of for nothing. I can safely say that since I started in, I have actually may get work of his own to do, but as may get work of his own to do, but as than I have for definite work, and my than I have to do it for 'prospects.' For instance a man thinks of building a hotel, and is being backed by a pro-moter. The promotor manter to constant to the work and prometry conmoter. The promoter wants to see some plans drawn up before he adparts of the work and properly conduct the office. Here the junior memvances his money. They come to the young architect, and the builder thinks bers do the more practical work, the tracings, and the working out of plans everything will go thru all right. The that the older men have sketched. architect draws out the plans, but in They are on small salaries to start on, but they work up and can get to the end the whole thing falls thru, and the architect gets nothing. be chief draughtsman or even get tak-en into the firm as their importance

"Stingy in Canada"

"There's a great deal of chance work "But there's one most important merin it, that's the weak point of the whole profession. There's too much item, and that is the connection. If item, and that is the connection. If a man has a wide connection and can bring in plenty of work the firm will value him accordingly. But there are chances of advancement for the young of getting out preliminary plans. It you refuse to do it they'll go to some-one else, and you'll miss the work if it really comes to anything. In this country, which is young and not too make their way thru competitions. Some of the best known architects in portunity, quite, for a young man this city have sprung into prominence starting out in architecture, as there by entering a public competition and is in other countries which have had by some stroke of good fortune putting in the winning design. They got always follows a period of commercial prosperity as is evidenced by Egypt, Greece, Rome, England, and then the Canada there is no distinctive oreation in design, in fact ed as many as fifty or sixty competi-in America, altogether, it might be said that there is no design expres- and all that work has gone for sive of nationality. We are merely nothing."

Made Strong and Well by DR. CASSELL'S TABLETS The following extraordinary cure of a man who suffered from such complete Nerve Fallure that he had not moved for diffuteen months, and had to be fed as he lay, aroused such widespread interest has year in the Mother Country that we new publish it for the benefit of our Canadian friends. Here is the wonder-ful story of Mr. Thomas Sedgemore, of Lyndale Cottage, 19 Chapel street, Bud-leigh Salterton, Devon, England. He

Hilda Cooper.

I was completely helpless, could not move hand or foet, and had been in this emdition for eighteen months when Dr. Cassell's Tablets cured me. The trouble first showed itself in the year 1908, and I ought advice. This proved useless, and h I was steadily getting worse. I was ad-hied to go to an institution where I whould have the very best skill avail-ble. I was an out-patient there for four months, but nothing they could do for me was of the slightest avail. On the antary, the trouble got worse. When I u Went I was just able to hobble on sticks from the station, when I was taken out of these Tablets, she can go about by herself. The cause of the trouble was her being knocked down by a bicycle when she was three years old. She was very much bruised, but seemed to get over it quite well. Some years later, however, she complained of pains all over her body, and began to lose the power of her limbs, and began to lose the power of her minus, until soon she was quite helpless. We had the best advice, but the case was considered incurable. She became a helpless cripple, unable to move hand or foot, and it was thought that she could not hive more months. m the station, when I was taken out

not live many months. "However, finding that everything we tried failed, I thought I would just ry what Dr. Cassell's Tablets would do. The result amazed me. The first sign benefit was that Hilda "mproved general health. She began to eat bett Then slowly, but quite surely, power i turned to be Walter turned to her limbs, and she was able to get up for a little. It is only six months since I first got the Tablets, and now she is cured and is in the best of health."

SUNDAY MORNING

The Tired Business Man's wife Tired Business Man does not acc how in the world she can ever do it. "How shall I get along without you?" said the Tired Business Man. "We have not been separated for twenty years—not while I was at home; of course, when I have to make trips, it cannot be helped. But this idea of your going away and leaving me for six weeks, why it is preposter-ous! What in the world shall I do about things?"

ous! What in the world shall I do about things?" said the wife of the Tired Business Man. "Why." said the Tired Business Man. "all kinds of things—breakfast on time and the right kind of things for dinner, and"—his face brightened with a look of inspiration—"my but-tons;; how am I going to keep them sewed on?" "I will sew them all on before I go,"

"I will sew them all on before I go," said the wife of the Tired Business Man.

2日1臺墨圖總加臺出出國口思12

### Who'll Sew the Button?

"Well, if you must I suppose you must." So the wife of the Tired Business Man is going on her trip after all, but before she went the Tired Business Man made her go over every single article in his wardrobe twice and sew all the buttons on over and over twice. I think the wife of the Tired Business Man really did not intend to go for wery long. But the "Button, button, who will sew the button," outlook irritated had burned down the very day that she packed her trunk. "Now," said the wife of the Tired Business Man. "If he had only said to ne. Teannot be happy without you. We have lived together for twenty years, and the world is not right to me unless you are here with me. I want you to look at I want you to talk to, I want you to talk to me I want you there to be soary when something goes wrong and to be indignant when somebody thinks I am not as clever as the new man at Smith's or the old man at Rob-inson's. J want you to langh at my funny storles and to smile away my troubles—nobody else will do. I married you because I wanted you, and I would have been very happy to stay. "But this Button, button, who's got the button? conversation brought it home to me all at once that my husband has grown to regarding me simply as a convenience—like an easy chair or the morning paper or the cup that holds his coffee—not even the coffee in the cup, or the news in the paper. Not holds his coffee—not even the coffee in the cup, or the news in the paper. And holds his coffee—not even the coffee in the cup, or the news in the paper. And holds his coffee—not even the coffee in the cup, or the news in the paper. And holds his coffee—not even the coffee in the cup, or the news in the paper. And holds his coffee—not even the coffee in the cup, or the news in the paper. And holds his coffee—not even the coffee in the cup, or the news in the paper. And holds his coffee—not even the coffee in the cup, or the news in the paper. And holds his coffee—not even the coffee in the cup. The news in the paper. And holds his coffee—not even th

# **Can-Openers and Corkscrews**

V/HAT have we here, young lady?" demanded Bob, gripping my hand harder as I tried to pull it away and conceal the bandaged third finger

"Nothing much," I lied earnestly. "Stuck a needle in my finger when I was mending."

I had heard Bob say so often that I'd always better let the grocery man open cans for me—or Bob himself would be glad to do it—that I was determined not to let him know how I achieved a

generous two-inch gash on my finger hat afternoon "Ouch!" I cried out, as he closed an iron fist on the obstinate hand. "That

hurts horribly."

burts horribly." "Oh, then it can't be just a little pin prick. Come on, do tell me what you've done, so that I can help, maybe. My guess is the breadknife or... You know what I've always said, Bub-bles. You're the ninth wonder of the world, but there are just three things which neither you nor the cleverest woman you know can do. Item one, take a cork out of a bottle without dropping half the cork in the interior; item two, drive a nail straight; item three, open a can with an ordinary, able-bodied can opener. without opening up a finger or a hand

an ordinary, able-bodied can opener' without opening up a finger or a hand at the same time." "But I tried to open the can just the way you do," I protested. "I don't see why it doesn't work for me just like it does for you." "Just so," agreed Bob. "No man knows why. So, hereafter, won't you please entrust the can-opening func-tions of this household to me?" "No use promising that right off," I demurred, "for I certainly should feel horribly ashamed of myself. Fil tell you tomorrow," I agreed finally, a bright idea entering my mind. Certainly I knew that there must be some kind of a can opener that a wo-man of average strength and intelli-

some kind of a can opener that a wo-man of average strength and intelli-gence could use, and so I visited sev-eral house furnishing and hardware stores, and looked over dozens of kinds. Finally I found one that looked right. I wasn't satisfied even with its prac-tical looks, but I bought a small can of corn and actually tried it myself in the store before I bought the can opener.

man's Fatherland?" and the "Sword Song," being among the very finest in the poetry of any nation. Then there are the charming love-lyrics of Goethe, in which the writer not merely displays his artistic genius, but unveils his inner soul, self-love and self-pity being the alternate key-note-the major and minor tones of his own life. His "Briar-rose," how Goethe-like, with its painful sugges-tion. how dainty withal. His poems entitled "Found," and "The Wander-er's Night Songs" are as simple and sweet as nature itself, and compel one to admit that the writer of "Faust," with all his worldliness, was not lacking in thoughts incomparably sublime.

pass on ideals formed on such a basis, is surely patriotism in the highest desree. sublime

Uhland, too, filled Europe with the beauty of his melody, his songs being caught up and sung as enthusiasti-cally by other nations as by his own, the best of these being "The Passage," "The Castle by the Sea," and the sweetly pathetic "Serenade" of a dy-ing obid FINE SEWING FOR

"What sounds so sweet awake me? What fulls me with delight? O, mother, look! Who sings thus So sweetly thru the night?

hear not, child, I see not; O, sleep thou softly on! Comes now to serenade thee, Thou poor sick maiden, none!

it is not earthly music, That fills me with delight; hear the angels call me; O. mother. dear, good-night!"

Then, too, where can be found sweeter lyrics than those of Heine? Poor, disappointed, suffering Heine. His poems are gems of exquisite bril-liancy and unutterably sweet, among the most beautiful being "Thou'rt like a lovely floweret," "The sea it hath its pearls," and "The Lorelei," the latter having been sung forever into

Its pearls," and "The Lorelet," the latter having been sung forever into the folk-lore of the Rhine. Why, then, this minor chord of "The Hymn of Hate?" Why this:

"Hate by water and hate by land, Hate of the head, and hate of the

hand; Hate of the hammer and hate of the crown,

Hate of seventy millions choking down."

For centuries the poets of Germany sang in tune with peace and good-will. A comparison of the "Hymn of Hate" with Schiller's "Hymn of Hope" may be interesting:

'A still small voice in every soul Of happier days keeps chanting; And eagerly on to the golden goal We see men running and panting. The world grows old and grows young

again; Still this hope of improvement haunts man's brain.

Hope welcomes to life the smiling Her light shapes round the schoolboy swim; Hope fires the young man with

visions wild: And she goes not under the earth with him, When his race is run, and the grave

doth ope; On the brink of the grave he planteth -Hope.

It is not an empty, flattering dream, Offspring of idle thought; Thru every heart it sendeth a gleam Of that better world we've sought.

And what the voice within us speaks Deceives not the soul that trustingly seeks."

regard to women's political rights, there can be little doubt that the rights she ought to have will come to Hospital Ship Fund last August, and her all the more quickly if she ac-cepts her first responsibilities and throws her best efforts into their ful-filment. If we were able to perform all the duties of Canadian womanhood and to the change in the year's program of a united effort in rendering aid to all the duties of Canadian womanhood according to their highest significance, what a force we might be in the em-pire! We are apt to think of patriot-ism as if it were something outside the empire. For this purpose the patriotic and relief committee had been organized, and it reported over \$500.00 collected during the winter, 83 articles and apart from everyday affairs. But for women to train themselves, first, by the use of all possible advantages of education and culture, and then of clothing (for the poor of Toronto as well as for the Hospital at Exhibition camp), and 200 swabs made, and 3500 yards f bandages rolled by the 17 sew-

THE LITTLE FOLKS

HERE has never been greater vogue for smocking than there has been this year on frocks for little girls and blouses for very little boys. It is dainty work, but it takes a great deal of time and many mothers are glad to have help in little matters

yards f bandages rolled by the 17 sew-ing circles which had been formed Similar work has been carried on with even greater vigor recently by the university hospital supply commit-tee, which began work practically two weeks ago, and now reports 1622 gar-ments ready to send forward with the university hospital supplies—many of which were made by the sewing circles which have largely financed them-selves. Of these articles the circles of the north east riding glone have con-tributed 562 garments (Mrs. G. B. Ball's 4 circles making 386, and Mrs. Adam Ballantyne's 5 circles, making of this sort, and it is pleasant employ-ment for women who like fancy work. Ball's 4 circles making 398, and Mrs. Adam Ballantyne's 5 circles, making 224). Mrs. J. Wesley Bundy's 3 ex-ceptinally active circles of the north west riding produced 227 garments, and the remaining ridings provided 61. Special donations amounted to 532 garments, which includes 38 sets of pyjamas from the women of Walk-arton and \$15. (in sheets) from Mrs. A woman who is used to sewing for her own children can work up quite.a clientele among her wealthier friends and neighbors by making clothes for their children and putting on them the delicate handwork which is so great an addition to children's garments. Pettidelicate handwork which is 50 great an addition to children's garments. Petti-coats and bloomers for dancing school, sheer little frocks, ruffled blouses and the sleeve insignas and anchors on the boys "dickies" all should be made by hand if one can do it, or pay for hav-ing it done. In a good neighborhood a little shop of the committee in charge of the hoscoats and bloomers for dancing school, sheer little frocks, ruffied blouses and boys' "dickies" all should be made by hand if one can do it, or pay for hav-

for children's garments can often be made to pay very well. No large stock pital at Exhibition camp, who traced in trade is necessary unless one cares to go into ready-made wear. the work of the hospital from the time it was opened on Nov. 41, 1914 to the

and easy chairs in which the convalescenis sat round the three big stoves it was a thoroly warm and cheery Hospital Ship Fund last August, and place on cold winter days. from one of an educational value to one

The work of this association was not to care for the patients or to manage the hospital—which are in the hands of trained experts—but to furnish it of trained experts—out to turnish it and supply comforts for the men be-yond the necessities provided by the government. Hence the kitchen at, the end was supplied by this associ-ation with all the necessary cooking utensils—and the government provided the stoves the laws camp near and the stoves, the large camp pans and "dixeys" and a large refrigerator.

But the increase of patients necessi-tated the opening of one stable after another until four were brought into use, three of which were divided into sections for various diseases, such as preumonia, suspected meninigitis, etc., and 2 isolation wards for infec-tious diseases—diptheria and mumps. One contains the pack store with One contains the pack store with shelves up to the celling, where sup-plies are kept and the men's uniforms in kit bags, tagged with their names. The fourth is used as the medical of-ficers' quarters, and upstairs in the loft is a bedroom furnished for the 2 senior officers. In another a little 2 senior officers. In another a little sitting room is fitted up for the nurs-ing sisters, who are non-resident, and wear pretty blue uniforms with lieu-tenant's badges, and soft white ker-chiefs on their heads. One has a fumigating plant for disinfecting, and in the original hospital six chairs were installed for the use of the dentists, who mave their services, not' to the hospital patients alone, but to the whole camp.

hospital patients alone, but to the whole camp. The government supplied the stoves, 5 some long tables, beds, mattresses, blankets, sheets, pill s and pillow cases and this association has been able to supplement these in a large degree, and so add greatly to the men's comfort. Up to Monday, April, 19, 1844 patients have been admitted to the hospital, and this association has amply and regularly provided for them such luxuries as preserved and especially fresh fruits; and the sewing-circles have been kept busy making all the garments needed by them in the hospital. ospita

hospital. Over \$3000.00 has been expended by this association on the hospital alone, all of which has been given willingly by members and their friends, and for which no appeal has been made to the public, and no demand has been made to the public, and no demand has been made upon the association's income from fees,

The treasurer's report showed the total receipts of the association to be \$2879.82, with a balance on hand of \$485.73.

Tea was served and a picasant so-ciable hour spent after the transaction of business and the election of officers which resulted as follows:—

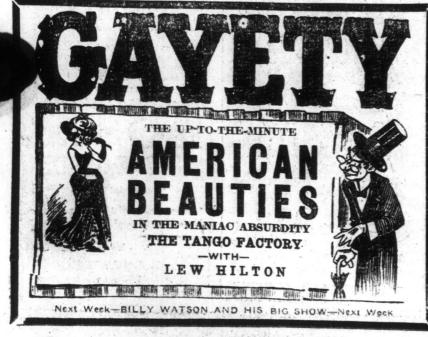

Three year old plants plooming varieties-red, light pink, dark pink, white and

FOR THE MOTORIST Hats, Wraps and Accessories for Use in the Automobile Arrive in New Models.

FADS AND FANCIES

Victoria cases with fitted easels are new and attractive. They are shown in all the leathers and in buff and gray beaver.

Upholstered foot rests are fitted for Martous purposes Some are for general use, some have shoe polishing outfits, while others hold extra luncheon bottles and boxes. The extra wide rests are for extra wraps and

Patent leather hats in exclusive shapes, lightly made, are smart for touring wear. With them are worn

### THE TORONTO SUNDAY WORLD.

FIGHTING THE GERMANS IN NORTHERN FRANCE

# APRIL 25 1915

shaded vells made in the Georgett model. They are worn with the Eng-lish tweed rainproof coats in models with convertible collars and full sack backs.

"Taxi" trunks are made with compartment trays. They are of tan vulcanized fibre and have convenient carrying straps. Some are arranged with removable hat and shoe compartments below the tray.

Mohair robes with plaid tweed lin ings and leather bindings are smart for spring use, and come with various sized checks in the linings and in the best tans and browns. Later in the season unlined robes with stitched hems wil be in favor.

Extra horns to be fastened inside the tonneau for the owner's use, in case the chauffeur does not discover a danger quickly, are fastened with suede straps with snap catches. The are of the siren style.

### THE HAYNES LIGHT SIX.

"The greatest factor in securing a clean-cut, compact, and accessible motor car is the combining of the fore-thoughts to the exclusions of the effect thoughts is the exclusions of the distributor of the Haynes' Light Six. "It is approaching the impossible in obtaining the greatest accessibilit when several features are added t the car after it has once been built. Every car shows how well it has

been planned in all details. "It has been the common practice to use a piece of sheet iron or alumplue to serve as a stove for heating the air that is supplied to the carbure-tor. A little forethought on the part for. A little forethought on the part of the designer would have enabled him to have seen that better results in the obtained by casting a small can be obtained by casting a small hox integral with the exhaust manifold.

"A long, exposed intake manifold is really an afterthought. The cylinders are usually designed first, and then are usually designed first, and then some way is devised for getting the gas into them. A few of the later de-signers nave kept the idea in mind of getting the gas into the cylinders-with the least condensation, when the cylinder casting was designed, and cylinder casting was designed, and have accordingly eliminated the ex-posed intake manifold, and kept all of the intake passages within the cylin-der casting. The result is shown by a more flexible motor with less parts and clean-cut appearance "Once in a while.

a motor ity the magnelo or generator ed on one side, and the wires led on thely over or around the motor to the mark plugs. By the time the owner annoved with oil-scaked wires and PDark plugs.

is amoved with oil-scaked where he owner is amoved with oil-scaked where and loose connections several times he be-gins to realize that a little fore-thought on the part of the designer would have placed the isnition gen-erator on the same side of the motor as the spark plugs. The same rea-soning applies to all of the accessor-ies embodied thrucut the car. "Little thought is ever given to the location of the gasoline tank until the chassis is laid out. Then the tank is usually attached by additional brac-ets. In the more refined design, the bracket finds little prominence, and the chassis by being carried at the rear between extensions of the side frame members. The car that has the maximum number of built-in parts is like the house with built-in furniture. he the house with built-in fur It is more compact, easier to b prod far more serviceable, q peenemical in all respects."

# This is the New Six—Spirited and Light

T is like a spirited horse-alert, lithe without a pound of unnecessary weight to carry. Yet this could hardly be called a "starved" Six, ĸĸĸ There is no skimping.

Mitchell engineers play the game safe. They could have made it 2900 pounds, but they preferred to take no chance and allowed a 200 pound margin of safety, making the actual weight 3100 pounds.

They intended first to put this car out four months ago, but they waited so they could have everything on it that other Sixes have, for they knew they had a better car technically.

This car now completes the list of Sixes around \$2300 that buyers care to choose from.

Mitchell Light Six-two, five or six passengers-6 cylinders-45 horse power

It lays claim to their interest for three reasons.

-116-inch wheel base-34x4 tires ...

It is larger in size—128 inch wheelbase.

It is quicker in action—livelier engine. It is smarter in appearance-\$100 extra in coach work.

Most Sixes at this price have good enough chasses, but fall down when it comes to the body and coach work. That's why after 60 days' service you see so many shabbylooking bodies.

Mitchell found it had a \$100 margin and instead of putting the money in the bank, put it in the body of the car.

Anyone with half an eye can see the high finish coach work, the genuine hand buffed leather in the seats, the carefully fitted doors, tailored carpeting in the tonneau floor -these and a hundred other little items that create charm in a car.

Its spirit you will like-one mile's ride will captivate you.

THE MITCHELL LINE FOR 1915-Mitchell Special Six-5 passengers-6 cylinders-50 horse power-132-inch Mitchell Special Six-6 passengers, same as above..... Mitchell Six De Luxe-7 passengers-6 cylinders-144-inch wheel base-60 2600 horse power-37x5 tires ..... F. O. B. TORONTO, DUTY PAID.

to rest. W. B. Stoner, chairman of competitions of the C. M. A., gives notice that the rules governing competitions may

undergo some change or be amended in the near future and would suggest that any member who would suggest that any member who would care to advance any proposals on such do so at once, when full consideration will be given same.

A Gas Horse Hostelry. The only repair shop, independent of dealers, and catering to the motor-cyclists entirely is the idea of a well known motorcyclist, one who has been connected with the repairs of many makes for some time. Frank Rynex is favorablly known to

many riders for his -courteous as-sistance in their time of trouble and there is no doubt of his ability to do good work. He is now located in a workshop of

his own near College and Spadina, reached by a lane just at 439 Spadina. That a proper outfit will be installed for all kinds of jobs is assured by him and he extends a cordial invitation to all riders to call.

Most motor crankcases are made oil Most motor crankcases are made oil tight at the seam by the use of a thin paper gasket. If the motor has not been taken down for some time the gasket will stick to one of the sections and be torn and rendered useless. On replacing a paper gasket, shellac it firmly to one side of the crankcase only, making sure that no shellac adheres to the other surface. Then powder the other surface with graphite. The result is that the gasket never will stick to the graphited side and will not need replacing every time the motor is taken down.

The new automobile parasols are practical and strong. They are of plain, heavy silk, shirred at the edges between the ribs and have hinges for turning the parasol so that it may shade the carrier at any angle. The handles are of heavily carved wood, while the frames are braced in such a way that it is next to impossible to, blow them wrong side out. Responses Thru Use of the Dailies in the Studebaker Corporation's Publicity Campaign.

How feet and three stories in height.

# What 4 Years **Did for This Hudson**

**APRIL 25 1915** 

The HUDSON, Light Six came out first as a 1914 model. But two years had been spent in developing it, and two years have been spent on it since.

So this new model is the result of four years of refinement. Not only by Howard E. Coffin, its famous designer, but by our whole corps of engineers.

One result shows in its lightness-2870 pounds. It is the lightest 7-passenger Six. And lightness denotes refinement. Every needless pound is a crudity, due to wrong materials or less skilfull designing.

Other results show in finish, luxury, beauty and equipment. Every detail in this HUDSON shows the final touch.

# **25-Million-Mile Tests**

But the best thing those years have don is to prove that the car is right.

Over 10,000 owners have now driven this car, perhaps 25 million miles. Half of them have proved it two seasons.

Canada's problem now, M. McLean said, "in a great degree is to work up to the railways we have. Railway development has cheapened the cost of movement. Averaging the ten-

Chicago capitalists have taken near-ly 25 per cent, of the stock in the Sheepshead Bay Speedway Corpor-ation, the company that is to build a mile speedway at the old Sheepshead Day meet track for all classes of goods. and the long and short haul, it is found that a dollar moves a ton of freight about 130 miles. Lower grade commodities which move in bulk are Bay race track. The company has been carried 250 miles at a dollar a ton. In highway transportation, the most neglected part of the Canadian field the average distance, a dollar moves a ton is four miles-if motor tractions, the distance is from six to seven miles. These figures, Mr. McLean re-

marked, give an indication of some of the problems the board has to deal with After touching on the choice in the

matter of management which he ex-plained is now between public owner-ship and private ownership, plus regulation, the speaker outlined the development of railway regulation in Canada down to the establishment in 1903, of the Board of Railway Com-missioners. Originally composed of pendently. To some extent its funcgovernment, and the latter's political 94,000 Tariffs

freeponsibility is still, tretained thru the provision of an appeal from a decision of the board to the governor-So far Mr. McLean had dealt with in-council, and the governor-in-council of his own mction, has also power to review or rescind or vary the ac- 94.000 tariffs were filed with the board tion of the board. Appeal is also alwhile the interstate commerce lowed to the supreme court of Canada on questions of law. 150.000. Tariffs are filed for freight, passenger, pullman, parlor, telephone, telegraph and express charges. Here Mr. Maclean then proceeded to explain the powers of the board whose

as, for example, at highway crossings. Dangerous features that arise are as far as possible eliminated by such means as diversion of the road, the installation of electric beils, speed limitation, crection of gates or separabeils, speed tion of grades. Railways constructed after April 1, 1909, pay the full cost of protection—if before that date the cost is divided. Some years ago parliament created a fund of \$250,000 a year for a period of years, known as the grade crossing fund, out of which the commissioners may give grants in aid of protection. Other provisions are necessary when one railway wishes to cross another.

# Inspect Railway Stock

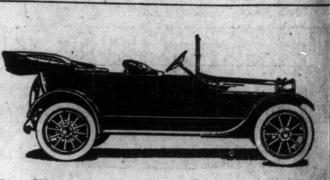

The board also maintains a con-tinuous inspection of the rolling stock. During the last year reported on no less than 110,000 freight cars were inspected and about ten per cent. removed from service. Boilers were also looked after and regulations enforced for the safety of the men work ing the trains. Last year 1639 rail-way accidents were investigated for the purpose of finding out how far they were, preventable and how they three members it has now six who can occurred. Mr. McLean referred here be div'ded into sections, acting inde- to the extent to which individual caretions have been conditioned by the older railway committee of the half were trespassers. lessness adds to the accident list. To Children Who Draw Best Flag

The World Film Corporation's slogan, "Watch Us Grow-Grow With Us," is being vividly exemplified by the Toronto branch of that organiza-tion. Under the hustling methods of the present management the slogan has been an extremely easy one to obey. Geniality seems to be the watchword of the World Film office at Toronto. No demand is too large or too un-reasonable for a genuinely sincers ef-fort to comply with it; no complaint too trivial to be thoroly investigated. The organization of the office is complete in every detail, headed by Edward A. Golden, and with Manager Solomon in charge of the business end of the office, while Phil Kahn has charge of the press work and explains to the exhibitors how they may profit by more and better advertising. The business developed until it out-grew its former quarters at 167 Yonge street, and a removal to larger offices The following are the prize winners in the Flag Contest held by Manager

# The First Star in Moving Pict ure

O<sup>N</sup> occasion, I have referred to Sarah Bernhardt as the first thespian of fame on the so-called "legitimato" stage to venture into pictures. But in this I was wrong. Before "the Divine Sarah" made her daring leap from the stage to the screen, an American comedian of national renown forsook musical comedies for picture work, and gained the same measure of success as had pre-viously been his on the specific screen. viously been his on the speaking stage. This man's name

Do you remember back to the days of "The Umpire"--the exceedingly successful musical comedy from the LaSalle Theatre in Chicago? Well, that play had as its star a rotund comedi-an of the first water, genial Fred Mace. Later, he had to his credit on the musical comedy stage, the parts of Mr. Pineapple in "A Chinese Honeymoon" and the Sandman in "Piff, Paff, Pouff." His last appearance upon the speaking stage was as Col. Popoff in "The Chocolate Soldier." and those or my readers who saw the original performance of that, about four years ago, at the Royal Alexandra, will surely admit his artistic and intensely humorous performance.

### **Going Into Pictures**

And then the Biograph. at that time perhaps the most prominent of the established motion-picture companies, made him an offer. With the same keen farsightedness that has gained him the fortune he has, he realized the infinite possibilities of the new amusement, and, appreciating into what a tremendous thing that industry might grow, he accepted. At that time such an action was an unusual thing. Pictures, "the five-cent shows," were con-sidered a cheap form of amusement, good for children or the ignorant masses, and one into which no actor of reputation would enter. Consequently, it was really not surprising that Mace's associates thought he had severed his connection with the world of respectability; he was, accordingly, ostracised People looked at him with amazement; he was the man who had sold his birthright. birthright.

birthright. "But," Mace said to me with a smile, "everyone of those chaps has since come to me looking for a job." Mr. Mace and Mack Sennett immediately went into the business of producing, "The Two Sherlocks," a series of comedy detective pictures that had wide vogue. During this period Mr. Mace was featured in a play called "One-Round O'Brien," which had perhaps the widest circulation and the longest popularity of any picture of its kind. It is interesting to note that this play was but seven hundred feet long, an apt illustration of the information in my last Sunday's article.

## Forming the Keystone

Forming the Keystone
 Mace, after leaving the Biograph, became one of the originators of the Keystone Company, today unequalled as the producers of comedy pictures, and one of the most prosperous and popular concerns in the world.
 Then, under the "Majestic" firm he put out the "Apollo" brand.
 His greatest stroke of business was when he secured the signature of which her picture may not be photographed, for any purpose, except thru his agency. Mr. Mace is himself a professional motion-picture cinematographer, and realized the value which her pictures would be sure to have. Consequently, he had written for her "Threads of Destiny." a play in five parts, in which she played the principal role.
 He photographed certain of the Parisian scenes of this play in Paris last year, making his escape from that city just one day before war was declared. Then the rest of the picture was completed. When I inform my readers that an extraord rele per week is the usual quota. it may be appreciated what an extraord ordinary amount of work had to be done to get the greater part of five reeis finished in but little more than seven days.

## The Johnson-Willard Fight

In the last few weeks Mace's name has again assumed important propor-tions because of his connection with the Johnson-Willard fight. H. H. Frazee, the New York theatrical magnate, was the spirit behind the enterprise, and Mace, realizing the enormous value pictures of the fight would have, secured

Mace, realizing the enormous value pictures of the fight would have, secured the camera privileges of the event. With four camera men as his assistants, Mace left New York to take pic-tures of the fight. The preparations were quite unusual. Instead of having a single camera grinding at the fight from a certain distance, with a desultory view of the crowd, the four men, placed at various distances from the ringside, were able to obtain many angles of the great contest. Then, too, they were suff-ciently well versed in the intricacies of their profession to train their instru-to some pitch of more than usual excitement, with that result that these pic-tures, in human interest, excel those taken of any previous fight. Several days beforehand Mace and his assistants were around the training camps of the two fighters, taking intimate and interesting pictures of the two ment. And on the day of the fight itself, the many interesting events con-nected with the event, such as the coming of Senor Menocal, President of Cuba (under the direct supervision of whom the fight took place), were filmed. Soon to be seen by millions of interested people. During the fight proper, Mace, close to the ringside, took a continual series of close-up pictures, with the result that the completed film, as displayed when the pieture is ready for the market, will be an extraordinary presentation, showing, close-up, each important blow and its effect, and from a distance the sparring and other important features, the whole interspersed with photo-sparhs of the crowd present, showing the mingled feelings that animated them as they witnessed the premier sporting event of the year.

### EARL White was just a little tow-headed kid of five when, in 1894, she was taken away from her little log cabin in the Ozark Mountains of Missouri to join a traveling company of "Uncle Tom's Cabin" after she had persuaded a visiting member of the company that "I tan act." It was at "\$5 a week and grub" that the traveling company made arrangements with her parents, and it looked a big sum to them. She stayed syear and when her parents moved to Greenbridge she returned home and spent six years at school. One day a circus came to town and Pearl incided she wanted to be a bareback rider, so that night when the train ruled out she left with them. She stayed with them and then jumped to the stage, playing with many companies until she signed with Pathe. It was as Pauline in the "Perils" that she first made a name for hersil, and so popular was she that she is being again starred in "The Expiets of Elaine." She will make her debut to a Toronto audience in the ner future, and will probably repeat her earlier triumphs.

duced in Paris and in Milan, Italy, will be shown in Toronto for the first time at the Garden Theatre on Monday, Tuesday and Wednesday, with matimees every day. Anecdotes of the Fight

Mace had many interesting things to say of the fight. Naturally so, for he was perhaps more intimate with both men than anyone anywhere. One of these had to do with an Englishman who sat at the ringside. Around his belt was strapped a belt to which a motion-picture camera was attached; this camera was worked by a touch on a button, which released a spring that un-wound no less than three hundred feet of film. With this machine, the Eng-lishman had photographed three rounds of the fight before he was discovered and him.

and his film taken from him. and his film taken from him. And the anecdote, a little touch of that human element which brings even events of this nature close to the average mind and the average feelings. is 'the event that occurred the morning after the fight, when Johnson. the defeated man, came to the boat with which Willard was leaving, early in the morning. He sent for the new champion, and when the guant Willard appeared, Johnson, with tears streaming down his face, took him by the hand,

and said: "Good luck, big fellow. I just want to give you a little piece of advice. You're going to make money—lots of it. Just save it—that's all—and, I wish you all the luck you wish yourself." Mace will be in Toronto for several weeks. He is having the pictures of the fight developed and printed at the local moving-picture studio, and as a further proof of the great publicity an actor on the screen gains with the populace he was recognized by movie fans at least six times during a half-hour walk we had this week. The screen lost a big favorite and a clever man when the business end claimed him. I think he will be seen again soon. Let us hope so. When a man has the combination of business ability, great act-ing proclivities and a wonderful charming personality, he is singularly blessed."

The U.S. and The War

President Wilson's policy towards the European war has been to many at once a surprise and a disappointment. In his desire to preserve an attitude of unconditional neutrality, and no doubt conscious of the weight of responsibility resting on him as chief ex-.

ecutive of the greatest of neutral nations, he has allowed no hint to escape touching his own judgment of the war, its cause, or the issues that are involved. His address last Tuesday at New York to the members of The Associated Press, disclosed his detached attitude of mind and his determination to keep the United States, as far as he can do it, aloof from the great issues involved in the European war. The United States and its interests he places first, but he also hopes that by preserving a policy of strict neutrality he is paving the way for the United States to become the arbiter of the warring nations. President Wilson's ideas, are no doubt in accord with his own high standards of duty, but his failure to protest against German disregard of international law and treaty obligations, has not been accepted without protest, even in his own country.

## \* \* \*

Not the least powerful of these protests is contained in a pamphlet just issued by Morton Prince, under the caption: "Is the American Conscience Dead?" printed originally in part in The Boston Herald of April 3. It is a strong arraignment of German

### The American Conscience

methods and starts out by asking: "Does Silence Give Consent?" Mr. Prince recapitulates each item of the long indictment of Germany from the moment when Germany broke the moral and international law of nations and invaded a neutral state-Belgium-to her latest atrocity of destroying by submarines the merchantmen of the enemy, without first rescuing the passengers and crew. To that long and terrible list of outrages committed without regard to moral, international or humanitarian obligations, "The American answer was silence." "How long," asks Mr. Prince, "is this kind of warfare to go on without awakening a response from the 'American conscience?" He does not mean from the govern-ment at Washington which has "already committed itself to silence." He means a public remonstrance from the sentiment of the communities in which we live, let them express it by any means and in any form they will.

### 1. . . .

Trend of American Opinion

President Wilson is very reluctant, indeed absolutely refuses to express an opinion on the rights and wrongs of this war. But Mr. Prince is not alone in the United States, is indeed among the great majority of Americans, when he holds that "by not protesting

against the 'scrap of paper' doctrine and the invasion of Belgium and all the barbarities that have been practised against that brave little nation, the United States lost the great opportunity that was hers of taking a position in this world as a great moral force—a position rightly due her. If," he continues, "the United States had done that, she would have been, not only such a moral force in this war, but in time to come, after peace has been restored, having shown the courage of her con-victions, she would, by force of character, be recognized in the council of nations as a dominant factor in determining the general acceptance of, and submission to international laws, that in the future will limit the barbarities of war, and perhaps even secure an international court with power to prevent them." But that possible position is no longer tenable, because the United States has made the great renegation.

2 2 1

The play-

ple have to submit, and so thoroly are the youth of the nation indoctrinated with that notion, that they submit to restrictions on their individuality that would be impossible in a British community. Germany is a military state.' Its soldiers are not under the control of the German people, but are at command of the Kaiser. His own published addresses, dating long before the war, show that he regarded the army as his own personal servants sworn to carry out his ideas, even if their own homeland and their own fathers and mothers, brothers and sisters, wives and children, suffered to the death. That is an entirely medieval notion, but it represents what Prussian militarism is attempting to do in the twentieth century. The attempt is foredoomed to failure and the allies will do splendid world service when they make it impossible of accomplishment.

WINDOW GLEAMS

sume.

That court did not go into the merits of the conviction, but merely held that upon the face of of the record it did not appear that the State of Georgia had sentenced Frank to death without due process of law.

come a cause celebre has recently been passed

upon by the Supreme Court of the United States.

The Frank Case

The case of Leo Frank, which bids fair to be-

In the United States, crimes and criminal law are not as with us under federal jurisdiction. Each state is sovereign in that regard and no one convicted in a state court of murder, or other infamous crime, has any right to call upon the federal government for relief unless he can show that he is being deprived of his life, or liberty, as the case may be, without due process of law. Frank was found guilty of murder by a jury in Atlanta, sentenced to death by the court and the sentence was affirmed by the highest court of the state. He claimed, however, that the trial was a mere travesty because the jury was intimidated by mob violence. That mob violence was feared and threat-

ened is evident from the fact that Frank was not in the courtroom when the jury brought in the verdict, having absented himself on the advice of the trial judge who feared he might be lynched if the verdict was not guilty. The case itself is a complicated one and the evidence entirely circumstantial. Anti-semetic bigotry is said to have influenced public opinion and to have had its effect upon the jury.

General Botha's Task

ations in German Southwest Africa, where Gen-

eral Botha, premier of the Union of South Africa

Little has been reported regarding the oper-

of most arduous treking in the heart of a hostile country. The general also pays a special tribute to Colonel Vandeventer and the southern force. who after advancing thru the German border defences and pushed north from the Crange River, over 300 miles of most difficult mountainous and sandy country, converted by the Germans into a desert by the removal of stock and the wholesale poisoning of the wells. In recognition of his success, Colonel Vandeventer has been promoted brigadier-general. The combined southern, central and eastern forces will now operate as the southern army as distinguished from the northern army based on the British enclave of Walfish Bay.

# Learning Law

The Imperial Privy Council has decided that railway company may contract itself out of liability for negligence even tho the contract be not made with the person injured and he has no actual knowledge of the same. In the case before the court, the plaintiff was on the train in charge of a horse belonging to his master under a contract which provided for his being carried free, but exempted the company from liability for any accident which might befall him. The injured man had the contract in his possession but did not read it.

The lord chancellor in tendering judgment, observed that the plaintiff probably did not know what the law of Canada was on this point. Probably not, as it appears that the six judges of the Supreme Court of Canada were equally ignorant, not to mention two judges of the Ontario Court of Appeals and the learned judge who presided at the trial of the case.

It took several years and a trip to London to learn what the law was in Canada. The Privy Council seems to have been as positive one way as our Supreme Court was the other. Surely this case furnishes a strong argument for simplifying our legal procedure and for reducing the number of appeals. The Privy Council should not be burdened with our domestic disputes in which no constitutional questions are involved.

> Land for city parks assessed at \$600 an acre turns out to be worth \$12,000 an acre. But what's in an assessment, some real estate Shakspere might ask.
