

THE BRIGGS CASE

The Professor Suspended From the Ministry.

Full Text of the Charges

He Will Retain His Position in Union Seminary.

His Opinions in Regard to Errors in the Original Manuscripts of the Scriptures

Washington, D.C., June 1.—The general assembly, at 2:35 this afternoon, adopted the report of the committee signed by Dr. Briggs from the ministry of the Presbyterian church.

The charges originally preferred against Dr. Briggs were as follows: 1. That he was a fountain of divine authority which may be rejected by the church.

2. Teaching that errors may have existed in the original text of the Holy Scriptures as it came from its author.

3. Teaching that Isaiah is not the author of half of the books that bears his name.

4. Teaching that sanctification is not complete at death, which is contrary to the essential doctrine of the Holy Scriptures.

5. Teaching that the church is a fountain of divine authority, which, apart from the Holy Scriptures, may add and subtract to its authority.

6. Teaching that errors may have existed in the original text of the Holy Scriptures as it came from its author.

REVOLUTIONIST'S WIN

The Victory of Sacaca's Opponents Complete.

He Tenders His Resignation

Terrible Slaughter in the Final Battle for the Mastery.

Sacaca Claims a "Moral Victory," As Liberal Principles Will Prevail—A New Ministry Formed and Will Take Office Immediately—The Army Will Disband and Elections Be Held.

Mesaya, Nicaragua, June 2.—The peace protocol arranged by the commission, of which U. S. Minister Baker was president, has been signed, but it has not yet been ratified by the principals.

The conservative demonstration at Orangeville, Cardwell district, to which the farmers were invited, was poorly attended.

Madrid's Favorite Matador Retires. Madrid, June 1.—Lagartijo, the king of matadors and the idol of the Madrid people, made his last public appearance to-day.

The Prospect Brightening. Tacoma, June 2.—The situation at the Merchants' National Bank is unchanged.

The Supreme Court to-day rendered a decision that the Tacoma water bonds were legally issued up to \$1,700,000, and there is much rejoicing throughout the city to-day.

Santa Cruz, Cal., June 2.—John Lumber fell into boiling liquid at the paper mill yesterday and burned to death.

Satellite Touring the States. New York, June 2.—Monsignor Satelli will soon begin an extended tour through the west, which will if the present intention is carried out, be prolonged two months more.

BOUNDARY SURVEY.

Prof. King's Return to Ottawa—To Report in September.

Two Americans Fight a Duel

Telegraphic Advice From British Columbia Cities.

A Laughable Public Meeting at New Westminster—Vancouver Citizens Interview Minister Patterson on the C Battery Question—A Northfield Woman Left Destitute.

Ottawa, June 3.—Prof. King, Canadian commissioner of the Alaskan boundary question, arrived yesterday from Vancouver, and reports that the Canadian and United States survey parties are all under way.

Toledo, Ohio, June 3.—Miss Mira Kennedy, or Sister Cassimer, as she was known after she took the veil, is the beautiful daughter of wealthy Kentucky parents.

City of Mexico, June 3.—The swindling and robbing operations of Mayano and Alonzo, the Spanish firm engaged in the operation of the cotton gin, have proved to have been much greater than at first reported.

Seattle, June 3.—On May 3, Nellie Hoag was accused as a salaried woman in a dry goods store, disappeared from Seattle.

Guadalajara, Mexico, June 3.—It has just become public that a duel was fought in this city last Saturday between two Americans, C. W. Carter and H. T. Templeton.

Ottawa, June 3.—There is some surmise here that Hon. MacKenzie Bowell may be appointed to the position of Chief Justice Strong and the Hon. John Carling.

New York, June 3.—Two hundred and forty first cabin passengers sailed for Southampton on the American line steamship Paris this morning.

WANTED C BATTERY.

But Won't Get It Just Yet—Death of Capt. Scott's Daughter.

Magistrate Plants and the Poor Woman

Disappointed Revolutionists.

Disappointed Revolutionists. London, June 3.—The Madrid correspondent of the Daily News says that sergeant and a few men at Fort Isabel, near Puenta La Reina, in the province of Navarra, tried to raise a revolt.

Glasgow, May 29.—The Glasgow importers of Canadian cattle have sent word by cable to the exporters regarding the requirements of the board of agriculture.

London, May 29.—During the cyclone, which has been raging in the Bay of Bengal, the ship Germania was lost and the crew was saved.

Managua, Nicaragua, June 3.—Charles Deshon, an American, who was recently arrested in Leon and imprisoned on the charge of sympathizing with the revolutionists, has been released at the request of United States Consul Newell.

Montreal, June 3.—Bishop Bond, although there is some improvement in the critical state in which he was three or four days ago, is not yet out of danger.

Tacoma, June 3.—At 12:15 this morning fire broke out in the large mills of the American Strawboard association and destroyed the main plant.

Chicago, Ills., June 3.—The official figures show that during May 1,550,087 people paid for the World's Fair, of which number 22,825 were children, and 346,301 persons on passes.

How to Cure All Skin Diseases. Simply apply SWAYNE'S OINTMENT. No internal medicine required. Cures leprosy, eczema, psoriasis, etc.

IMPERIAL PARLIAMENT.

Mr. Labouchere Questions the Government—Balfour on the Constabulary.

London, June 1.—In the house of commons to-day Mr. H. Labouchere, M. P. for Northampton, asked a series of questions of the government.

Mr. Labouchere, under secretary to the foreign office, in reply to Mr. Labouchere, in referring him to the published instructions given to Sir Gerald Portal when he went on his mission.

In response to inquiries as to the relations between Great Britain and the Triple Alliance in several states that they will be represented very largely at Chicago and propose to make it the greatest reunion of travelling men ever held.

Mr. Arnold-Foster, Liberal-Unionist, M. P. for West Belfast, made a motion to adjourn in order to obtain opportunity for a debate on the growth of crime in the counties of Kerry and Limerick, Ireland, and the alleged failure of the British police to check the increase of crime.

The division on Mr. Arnold-Foster's motion to adjourn resulted in its defeat by a vote of 241 to 208.

Mr. Gladstone accepted the proposed amendment that the right to interfere in hostilities between foreign countries be taken from the powers of the Irish legislature.

Mr. George Wyndham, Conservative for Dover, proposed to exclude from the control of the Irish authorities all the Irish police except the local forces under local officials.

Mr. Hon. Mr. Balfour, leader of the Unionists, spoke at length in support of Mr. Wyndham's amendment. Clause 3, he said, was supposed to provide that the Irish legislature should not have power to make laws concerning the military or naval forces or the defence of the realm, unless some such check as that suggested by the member for Dover was adopted.

Mr. Gladstone's amendment, Clause 3, he said, was supposed to provide that the Irish legislature should not have power to make laws concerning the military or naval forces or the defence of the realm, unless some such check as that suggested by the member for Dover was adopted.

SHOT BY HIS MISTRESS.

Newark, N. J., June 2.—Lew Brown was shot by his mistress.

World's Fair Receipts.

Chicago, Ills., June 3.—The official figures show that during May 1,550,087 people paid for the World's Fair.

How to Cure All Skin Diseases. Simply apply SWAYNE'S OINTMENT. No internal medicine required.

LOCAL AND PROVINCIAL

News of the Day Selected from Friday's Evening Times.

Out-of-Door. The collier Romulus came out of the Esquimalt dock today and steamed to the outer wharf. She will be further repaired and will then take on a load of coal and proceed south.

Her Catch Sold. The catch of the schooner Mountain Chief, which amounted to only 95 seal-skins, was bought by Morris Gutman, representative of Uhlman & Co. The price paid is said to have been \$1250. The Mountain Chief will return to the west coast in a few days.

The New Collector. Mr. J. C. Saunders has been appointed collector of customs at Port Townsend, vice Andrew Wasson. The Republican customs officers will be looking for new positions in a few days, as it is said that the new collector is going to "decapitate" every one of them.

The Seattle's Injuries. It is said that it will cost between \$15,000 and \$20,000 to reconstruct the City of Seattle, which ran on a sand bank near Marrowstone Point last week. Almost every bolt in the new pier's hull has been loosened and many plates will have to be replaced.

The Haytlen Republic. Inspector Colbentz of the treasury department was in the city last evening. He is at work on the Haytlen Republic case, in which he has been successful in the midst of the fray. The case is becoming more widespread every day, and it is hinted that certain officials of the United States customs service will be called upon to explain their connection with the now famous steamer.

Handsomely Furnished. The C. P. N. Company's steamer Premier is alongside the dock having a new electric light plant put in position. The finishing of the cabins, when the work is completed, will be one of the most handsomely furnished steamers in the northwest. The dining-room has been entirely remodelled and the walls have been covered with delicately tinted raised paper. The upholstery will be superb.

Behring Sea Patrol. H. M. S. Garnet, the first ship of the British Behring Sea patrol, will leave for the north at daylight tomorrow. She will warn the schooners relative to the continuance of the motus vivendi and the Anglo-American agreement as to the zone about the islands. H. M. S. Nymph will go north on Monday. Both ships will carry large quantities of supplies. A committee of sealers met Captain Hughes-Hallett, the senior officer at present at this station, this morning and had a conference regarding the action to be taken by the patrol and the movements of the schooners.

The Sound Boats. There is said to be a steambot sensation in the wind, which, when sprung, will be of far-reaching consequence in every city on Puget Sound. The arrangement is nothing less than the withdrawal by the Northern Pacific from Sound routes. Nothing definite was known until yesterday, when the assertion was made that the City of Seattle had been permanently withdrawn from the Whatcom route. A committee of the Northern Pacific railroad says that the Puget Sound & Alaska line has never proved remunerative to the railroad company. Capt. D. B. Jackson will, it is said, gain control of the company's steamers. He is said to have the indirect backing in his undertaking of the Great Northern, Union Pacific and Northern Pacific railroad companies.

New Vancouver Coal Co. Foreign shipments of coal for the month of May, 1893:

Table with 2 columns: Ship Name and Tons. Includes entries like 1-Str. Polar Bear, Alaska, 33 tons; 2-Str. Montserrat, San Francisco, 1,492 tons; 3-Ship Wachusett, San Pedro, 2,467 tons; 4-Str. Pioneer, Puget Sound, 2,715 tons; 5-Str. Grandholm, San Francisco, 1,620 tons; 6-Str. Bawnmore, San Francisco, 3,063 tons; 7-Str. Mogul, Port Townsend, 47 tons; 8-Str. Oregon, San Francisco, 2,323 tons; 12-Bark Wilma, San Pedro, 2,431 tons; 13-Str. Pioneer, Puget Sound, 2,715 tons; 14-Str. Grandholm, San Francisco, 1,620 tons; 15-Str. Bawnmore, San Francisco, 3,063 tons; 16-Str. Mogul, Port Townsend, 47 tons; 17-Str. Tyes, Port Townsend, 70 tons; 18-Str. Grandholm, San Francisco, 1,620 tons; 19-Str. Bawnmore, San Francisco, 3,063 tons; 20-Str. Mogul, Port Townsend, 47 tons; 21-Str. Tyes, Port Townsend, 70 tons; 22-Ship Louis Walsh, Wilmington, 2,325 tons; 23-Str. Mogul, Port Townsend, 47 tons; 24-Str. Tacoma, Port Townsend, 47 tons; 25-Ship Eclipse, San Francisco, 2,517 tons; 26-Str. Angeles, Port Townsend, 47 tons; 27-Str. Bawnmore, San Francisco, 3,017 tons; 28-Bark Rufus B. Wood, Wilmington, 2,376 tons; 29-Str. Sea Lion, Port Townsend, 47 tons; 30-Ship India, Los Angeles, 2,068 tons.

DE COSMOS VS. TELEPHONE CO. Commencement of the Trial in This Cause Celebrate This Morning.

The case of Hon. Amor De Cosmos against the Victoria Telephone & Electric Co., Ltd., came on for trial at 11:30 a. m. before Sir Matthew Ballie, B. C. J., without a jury. Hon. A. Helmecken appeared for the plaintiff and Messrs. E. V. Bodwell and A. P. Luxton for the defendant company. An interim injunction restraining the company from digging holes, erecting poles and stretching wires in front of the plaintiff's property on government street was granted by Mr. Justice Crease some weeks ago, and this injunction was consequently continued until today, when application was made for a perpetual injunction.

Mr. Richards, in opening the case, explained that the action was brought for an injunction to restrain the telephone company from erecting poles and stretching wires in front of the plaintiff's property, situated on the west side of Government street, near the hotel Victoria, and almost opposite Brackman & Ker's store. The plaintiff was the owner of a large brick block, and the defendants had already dug holes opposite it for the purpose of erecting huge, unsightly poles, or rather trees, on which to stretch their wires. This was an interference with the plaintiff's rights, and all that was necessary for him to show was that the defendants were doing him a common law injury. Of course the defendants sought to justify their interference under chapter 65 of the local statutes of 1892.

The Chief Justice said there is probably no doubt as to the common law injury, but the question is: Has not Mr. De Cosmos, and, indeed, have not all of us, consented that the Telephone Company may put their poles exactly where they please and use poles as large and as thick as they like? Here is an act of parliament which gives the municipal council full authority to authorize the erection of the poles. Is there anything in the act to prevent the com-

IMITATED A BROTHER'S ACT

Andrew Kirk Sends a Bullet Through His Brain a Week After

HIS BROTHER CUT HIS THROAT

No Reason Known for the Deed—It Was a Deliberate Suicide—It is Said That a Third Brother Drowned Himself in Scotland.

A week ago yesterday, at the hour of noon, James G. Kirk ended his existence in a little cottage on the Esquimalt road, where he lived with his brother, Andrew Kirk, and the latter's wife. He drew the blade of a penknife across his jugular vein and when found was dead. He was under the influence of a desire for sympathy at the illness, or a desire for relief from a sudden prostrated pain were surmised as causes for the deed.

This morning, at nearly the same hour, Andrew Kirk, the surviving brother, sought the seclusion of the front bedroom in the same cottage and sent a bullet through his brain. He fell to the floor and died almost instantly. Mrs. Kirk, attracted by the report of the revolver, rushed to the front of the house. One glance into the room was sufficient, and she ran on to the roadway calling for help. Twice she fell on the road before she reached the Half Way House, two doors below her home.

The deceased woman was taken in charge by several lady friends, and a party headed by Mr. Jones went back to the house. There was nothing to be done but to telephone for the police officer of Esquimalt, and a coroner's inquest was held.

A Times reporter was at the house a little after noon and was admitted by the deceased woman's sister, who seated herself on the edge of the bed, for he had fallen forward upon the floor. His back was bolstered up against the side of the bed and his head hung sideways on his shoulder. The heavy revolver lay on the floor and the arms were at the sides of the body. A bullet hole was visible in the forehead, where the ball had entered. The clothing was saturated with blood, which dripped on the carpeted floor. Kirk was in his shirt sleeves.

The Kirk cottage is one of the prettiest on the Esquimalt road. It is painted white, and is surrounded by gravel walks and lawns. The house is neatly furnished and bears evidence of care and scrupulous cleanliness. It is the second house below the Halfway House.

As far as known Andrew Kirk's reason for suicide was as mysterious as that of his brother. He never showed any symptoms of mental derangement. Andrew was quiet and reserved. He was a native of Victoria, and his elder brother killed himself. "I would not have been so much surprised had it not been so," he said. However, there was never anything remarkable about his actions.

He worked as a machinist at the Albia Iron Works and enjoyed the respect of his employers and fellow workmen. The latter say that he took the death of his brother very much to heart, and was melancholy at times. He was at work this week as usual.

The deceased was about 45 years of age and was a native of Victoria, Scotland. He came here from that country several years ago. He was married two years ago, a few years before the death of his brother. He had a son, James, who was born in Victoria. He had no other children. There will be a funeral in Victoria tomorrow morning. It is not likely that any new facts will be brought out at the inquest. The date of the inquest will not be fixed until after the inquest.

EDUCATION ONLY.

One By-Law Carried Yesterday Afternoon. Only one of the four by-laws submitted to the ratepayers yesterday was carried, the education by-law, by a majority of 54, the others being overwhelmingly defeated.

SEWERAGE BY-LAW. North ward 79 216; Central ward 105 216; South ward 75 128; Total 259 450; Majority against, 240.

ELECTRIC LIGHTING BY-LAW. North ward 114 196; Central ward 84 121; South ward 75 128; Total 255 406; Majority against, 171.

EDUCATIONAL BY-LAW. North ward 194 131; Central ward 60 71; South ward 102 102; Total 356 304; Majority for, 54.

PARK BY-LAW. North ward 34 95; Central ward 34 95; South ward 78 124; Total 186 414; Majority against, 228.

ADDRESSES OF WELCOME. St. Luke's and St. Michael's Greet Bishop and Miss Perrin.

A reception to Bishop Perrin and Miss Perrin was held yesterday at St. Luke's church. J. W. Tomlin presented Bishop Perrin with the following address on behalf of the congregation: To the Right Reverend the Lord Bishop of Victoria.

We, the Rector and Churchwardens of St. Luke's and St. Michael's (Cedar Hill Parish), in the Diocese of Victoria, desire to welcome Your Lordship to the diocese. We, the Rector and Churchwardens of St. Luke's and St. Michael's, in the Diocese of Victoria, desire to welcome Your Lordship to the diocese.

Churchwardens of Cedar Hill Parish. Miss Alice King, on behalf of the

ORPHANS' HOME BUSINESS

Twentieth Annual Meeting of the P. O. Home Held Last Evening.

ANNUAL REPORTS READ AND ADOPTED

Sixty Four Children Cared for During the Year—Aims in Connection With the New Home—An Encouraging Financial Statement.

The annual meeting of the British Columbia Protestant Orphans' Home was held last evening, President F. H. Worlock in the chair.

After prayers and the reading of the minutes of the last meeting the following report was read: In submitting to the subscribers the twentieth annual report the committee have again, thankfully acknowledged the liberal support accorded to the institution.

During the year the Protestant Orphans' Home has been incorporated under the Friendly Societies Act, 1891, in legal form.

The management of the Home and the care of the children individually by the matron, Mrs. Walker, is a source of great satisfaction to your committee, and to this cause and untiring exertions of the ladies' committee, the continued success of our home is largely due.

We have to tender our thanks to Dr. Milne for his generous and prompt attention whenever his services have been required. We are pleased to add the children are all now enjoying good health.

The total number of children cared for and provided with a home during the year was 64; admitted, 20; taken out, 22; at present in the home, 42 girls and 22 boys.

Since our last report, Mr. S. M. Robbins, of Nanaimo, has greatly assisted us by having collected his estate to the city on behalf of the home, which has contributed \$405.85 to our funds. We have also benefited during the past year by the receipt of a legacy of \$300 from the estate of our late lamented president, A. A. Green.

In addition we have to acknowledge donations of clothing, fruit, vegetables, etc., from many kind and thoughtful friends.

The applications for admission being greater than our building could accommodate, your committee have rented an adjoining cottage, which has been occupied by us for some time. With this additional room we hope to be able to meet all requirements until the new building is finished.

Your committee, in their last report, referred to the insufficiency of accommodation in view of the increased demands for admission, and expressed a hope that they would soon be enabled to provide a more commodious building. This anticipation they are about to realize, owing to the generosity of the late John George Taylor, who bequeathed his estate to this institution, which realized the magnificent sum of \$30,358, and which sum we have received from the trustee, Mr. F. R. Brown. Your committee appropriated the whole of this sum to building purposes; they purchased a suitable site, lot 28, Hillside avenue, containing 12-40-100 acres, and called for plans with the following essential provisions:

(a) The building must make provision for 100 children in all being an equal number of both sexes, for whom sleeping accommodation, consisting of 100 beds, and conveniences must be entirely separate.

(b) The building must be substantially built of brick or stone, and must be provided with heating apparatus throughout.

Your committee have to thank Mr. Thos. Alton for his valuable aid, and also Mr. R. Owen Alton, who visited several similar institutions in England and furnished us with drawings which formed the basis upon which all plans sent in were to be prepared, thus giving a great amount of valuable time and experience gratuitously to our aid. Thirteen sets of plans were sent in and each one duly considered. One set of plans which proved to be that of Mr. Thomas Hooper, architect, of this city, was selected. The building is now under construction, and after due deliberation, the contract was allotted to Messrs. McGregor & Geesey, at \$29,000. The building is rapidly advancing, and your committee have arranged for the laying of the cornerstone by the grand lodge of A. F. and M. on the 24th inst.

Your committee have to thank Mr. R. McKay Frapp, architect, of Vancouver, for his valuable aid in preparing every detail of each plan, and so making them in making their selection. Mr. Frapp very generously donated his fee of \$50 to the funds of the institution.

It now only remains to refer to the treasurer's report appended, containing full details of receipts and disbursements, contemplating the necessary expenditures in our larger building, we shall have to ask our friends for additional aid, in order to meet our daily expenses; but we feel, in the future as in the past, we shall not ask in vain.

The finance committee presented a report recommending the payment of \$200 to John Dowley, of Spring Ridge, for the use of the institution, and the report was read and accepted. Council then adjourned.

FRED H. WORLOCK, President.

REASONS ADVANCED AT THE INQUEST FOR THE SUICIDE OF ANDREW KIRK.

An official enquiry into the facts surrounding the strange suicide of Andrew Kirk was held yesterday afternoon by coroner James G. H. Essler, jury members were selected: William Holmes, foreman, Richard Graham, Charles W. Knox, John Day, George Carter and Joseph Price. Mrs. Adams, who was with Mrs. Kirk when the suicide took place, was the first witness examined.

Mrs. Adams went to the Kirk cottage about 11 o'clock to do some sewing. A little while Mr. Kirk, who had \$2,680.94, leaving a balance on hand of \$2,103.78. The building account showed receipts from the executor of the estate of the late J. G. Taylor of \$30,358, out of which \$12,600 was paid for 12 40-100th acres, Hillside avenue, for site for building, and \$500 architects' fees; in fact, leaving a balance out at 5 per cent. interest of \$17,258.

The treasurer's accounts had all been examined and certified to by the auditor, Mr. W. H. Mason.

On motion of Mr. Shakespeare, seconded by Bishop Crige, the reports were adopted.

The committee of management for the ensuing year was elected as follows: Rt. Rev. Bishop Crige, Rev. Mr. Cleaver, Rev. Dr. Campbell, Rev. P. McF. Macdonald, Rev. E. Robson, Messrs. Percy Brown, Chas. Hayward, Herbert Carmichael, N. Shakespeare, F. H. Worlock, Henry Jewell and James Hutchison.

The following ladies' committee was appointed: Mrs. Crige, Mrs. Williams, Mrs. Clark, Mrs. Thomas Earle, Mrs. Kent, Mrs. Hutchison, Mrs. N. Shakespeare, Mrs. Higgins, Mrs. G. L. Milne, Mrs. Sargison, Mrs. Hayward and Mrs. Gillespie.

Mr. Hutchison, the treasurer, reported having received \$18.75 from R. Sellick on behalf of the contracting plasterers of the city. A motion was passed thanking the plasterers for the donation.

It was decided to have the following inscription on the corner-stone of the new home: "B. C. Protestant Orphans' Home, erected 1893. This site was purchased and building erected with the legacy of the late John G. Taylor, Esq., of \$30,358, and most cases removed the tumors. At Graysville or by mail, 49-50 St. Swanton St., Philadelphia, Pa. Lyman Sons & Co., Montreal, Quebec, Canada."

The high water which has for several days flooded the streets of Bonner's Ferry is subsiding.

It is reported here this week that small-pox is prevailing at Revelstoke.

On Saturday, June 17th, there will be a race in Kaslo for \$500 a side between E. B. Coy's brown mare, Daring, and Wilson's black of Nelson.

The members of the Masonic order at Nelson have completed the necessary preliminary arrangements and applied for a charter.

The local lodge will start off with more than 30 members.

Capt. Davies is down from the Bonanza mine in Kootenay.

On Wednesday the steamer Nelson made her quickest time from Nelson arriving in Kaslo at 4 o'clock.

It has been reported that Mr. Musgrove, the former publisher of the Examiner, left Kaslo without paying his debts.

General Dispatches.

Berlin, June 1.—The Cologne Gazette publishes this morning a leader supposed to be inspired, warning "the people of Alsace and Lorraine that if they elected deputies opposed to the army bill they would be regarded as doing their utmost to menace the integrity of the Empire."

London, June 1.—Advices from Corea say that placid quietness throughout the country has been restored.

Paris, June 1.—The deputies passed today the electoral bill, amended so as to exclude from the chamber all salaried public officials and all clergymen.

San Francisco, June 1.—U. S. Commissioner Sawyer is engaged in hearing testimony in the cases of the seven Chinese recently smuggled into the United States by way of Victoria.

Chicago, June 2.—The case of the State of Illinois against the whiskey trust, better known as the Distilling and Cattle Feeding Company, is again before Judge Tuley this morning.

San Francisco, June 2.—Six creditors of the State Investment Insurance Co. petitioned the superior to order to declare the company an insolvent debtor.

San Francisco, June 2.—Director Holden of the Lick Observatory, telegraphed to the United Press this morning that there is a fine group of spots on the sun which can be seen with the naked eye.

San Francisco, June 2.—Six creditors of the State Investment Insurance Co. petitioned the superior to order to declare the company an insolvent debtor.

Chicago, June 2.—The committee of arrangements having charge of the great anti-trust convention, which opens in this city on Monday next, has received advice from two-thirds of the states of the Union intimating that either the governor thereof or commercial organizations had designated delegates to represent them in the gathering.

Chicago, June 2.—The committee of arrangements having charge of the great anti-trust convention, which opens in this city on Monday next, has received advice from two-thirds of the states of the Union intimating that either the governor thereof or commercial organizations had designated delegates to represent them in the gathering.

BRITISH GIPSY ROYALTY.

How Gipsy Kings and Queens of To-Day Rule Their Domains.

MONARCHS WITH ABSOLUTE POWER

A Famous Scottish Gipsy Royal Line—Traced and Vagabond Prince Robert—Romantic Yarns of American Gipsy Life.

London, May 22, 1893.—There is no where in the entire range of sociology and study and observation so grotesque and yet so genuine a thing as Gipsy royalty.

The first Gipsy I ever saw was a princeling, afterwards a queen. That was 40 years ago.

The snow was beaten into her glossy, black hair, which was matted wildly about her shivering form.

Then taking both of us—myself "rising five," as the farmers say, and this plump, green-eyed, leathery old woman—she marched us up-stairs, away into the garret, and put us, still together, into the snugnest of trundle-beds beside the hearth.

Imperial Parliament.

Debate on the Home Rule Bill—Canadian Cattle Again.

London, June 2.—In the debate in the house of commons on an amendment offered by Mr. E. W. Byrne, Conservative M. P. for South West Essex, the Irish members showed for the first time that they thought the government was conceding too much without consulting them.

Right Hon. Joseph Chamberlain said that to permit such use would be tantamount to permitting the formation of armed forces which might be improperly employed.

Thomas Sexton, Nationalist for North Kerry, spoke in opposition to the proposed amendment.

William Broderick, Conservative for the Dublin division, also spoke in opposition to the proposed amendment.

End of Volapuk in France.

Many persons will perhaps breathe a sigh of relief upon hearing that Volapuk is doomed in this country at last.

How to Get a "Sunlight" Picture.

Send 25 "Sunlight" soap wrappers (wrapper bearing the name "Woman Look Out Sooner Than A Man") to Lever Brothers, Limited, 43 Scott Street, New York.

I. R. Bailey & Co., coal and wood dealers, have been assigned.

LOCAL AND PROVINCIAL

News of the Day Selected from Friday's Evening Times.

News and Newspaper. The News, six column quarto in size, will be issued weekly at Mission City, B. C., beginning this week.

The Late S. Gillespie. The remains of the late Samuel Gillespie, who died in Portland last week, were brought over from Nanaimo yesterday and interred at Ross Bay cemetery.

Collector of Customs Hated. An open letter denouncing Capt. Hansen, the Flying Dutchman, is on a sailing cruise. He says he is out on the Emma from June 15th to 30th, and that the vessel will not raid the islands.

Sub-Lieutenant D. G. Poore has been transferred to H. M. S. Champion from the Garnet. His brother officers of the Garnet named the captain's galley and rowed him to land and the vessel to nurse their disappointment, curse their "coach," and receive the sympathy of their penned-up compatriots.

The remains of Andrew Kirk were buried in Ross Bay cemetery yesterday. The funeral was from Foresters' Hall, and was under the auspices of the A. O. U. W. Rev. Dr. Campbell and Rev. Mr. Bryant, both brothers in the order officiated. The funeral was largely attended.

Thomas Nevins, engineer on the quarantine steamer Earle, was fined \$50 and costs in the provincial police court this morning for smuggling clothing from the steamer Tacoma. Nevins wore two suits of clothes ashore each time. His numerous changes of clothing aroused suspicion. He pleaded guilty to the charge.

The Romaine-Champion incident has produced the following paragraph in the Naval and Military Record: "The obvious moral to be drawn from this incident is that the Admiralty should take steps to construct a naval dock at Esquimalt, as, indeed, in other parts of the world where the accommodation for ships of war is inadequate."

The Alaska excursionists are beginning to go home. The steamer City of Tokpa arrived from the Sound last evening and left for the north at 4 this morning. She had a number of excursionists on board, including her first trip on Wednesday, taking a lot of passengers.

Mr. G. Calder and Miss Elsie L. Winsby were married on Saturday evening at 74 Cook street, by Rev. Dr. Campbell. Miss Margaret E. Sinclair was bridesmaid. W. T. Kennedy supported the bride. The happy couple will live in Victoria.

Nearly all Canadians and Americans who make the trip across the Atlantic go with the intention of visiting Scotland in their tour. Appreciating this fact the Caledonian Railway Company has issued for special distribution in America during the World's Fair year, a handsome and useful guidebook, with the title "Tours in Scotland."

A BIG CATCH.

The Carlotta G. Cox in Hakodate on Saturday With 1900 Seal Skins. The schooner Carlotta G. Cox was in Hakodate, Japan, on Saturday with a catch of 1,900 seal skins. Such was the pleasing forecast contained in a cablegram received on Saturday afternoon by E. B. Marvin & Co., her owners, from Capt. Byers, master of the schooner. The Cox had to come into Hakodate for water and to receive instructions from her owners.

SEALS ARE PLENTIFUL.

Capt. Seale, late of the schooner Deeahk of Neah Bay, arrived in the city on Saturday evening on the Kingston. Said he to a Times man this morning: "I left the Deeahk at Neah Bay last week after a successful cruise off the mouth of the straits and the west coast of this island. Since May 14th we have killed five days and got 210 skins. The seals were very thick and are so now. There are six little schooners down there now working and all are doing well. The seals are nearly all cows and bulls, pups are very scarce. The cows are very fat and I don't see any idea that these seals do not all go to the Bohring rookeries. Many of them could not reach there in time to bear their young. I think that it will be found some time that they go to other islands."

STEAMER DANUBE'S TROUBLE

Detained in Quarantine Although There Was No Smallpox. Capt. Irving Will Sue for Damages.

Capt. Meyers Makes a Statement Regarding the Treatment His Vessel Has Received Since Her Arrival at Portland.

Over at the Victoria dock the steamship Danube is lying, and the Oregonian. She was released from quarantine on Saturday morning, and at 10:30 o'clock Collector Lotan, armed with a big bundle of certificates and accompanied by Interpreter Richards, went aboard and began the work of questioning the passengers to ascertain whether they were returned merchants entitled to land or returning coolies endeavoring to evade the laws made and provided for their exclusion from this land of the free and discontented of other nations.

The Danube's commander is not satisfied with the treatment his vessel has received since her arrival in Portland. "Now that Dr. Wheeler and the city board of health have had their way of playing at quarantine with the Danube and her 500 Chinese passengers," said Capt. Irving yesterday, "I would like to give you the details of how it was played. If any one really having had experience in smallpox cases will come forward and say that the process adopted by Dr. Wheeler in this case would have prevented the spread of the disease, I would like to see the person."

"After the Danube arrived in this port was fully 38 hours before she was ordered to be quarantined, no other communication with the shore or vice versa. Then, again, it was fully 48 hours after being quarantined that any steps were taken to prevent the spreading of the disease by vaccinating the people, and this after Dr. Wheeler had treated the ship's crew and the newspapers to the effect that the only way to prevent the disease from spreading was to vaccinate every one on board the ship at once. The first vaccination of 60 persons was done on Monday, the 22nd, and the process was not completed until Friday the 26th. After that time, or very nearly eight days after the ship arrived in port, this vaccination, I am told, has taken no effect on the crew and the passengers."

That a disease born and bred in the centre of the city and that it was the centre of the city mortality statistics, Madame Lafosse, now domiciled in the big Saltywater Hotel, has just completed a century of existence. But for a small-pox epidemic in her youth, she would have lived to see the present day. She is now 100 years of age, and she is as hale and hearty as a young girl. She is the daughter of a Frenchman and a Canadian. She was born in France, and she has lived in Canada for many years. She is now living in the big Saltywater Hotel, and she is very happy. She has many friends, and she is very well liked. She is a very interesting person, and she has many interesting stories to tell. She is a very good example of a long life, and she is a very good example of a happy life.

THE GRIPPE MICROBE.

Dr. Pfeiffer, the discoverer of the specific germ which causes influenza, has recently published the results of his important experiments with the influenza microbes. Examination proved that the deadly germs are most easily found in the mucus of the nose and throat, and in the mucus of the lungs. The germs are also found in the mucus of the eyes, and in the mucus of the ears. The germs are also found in the mucus of the mouth, and in the mucus of the throat. The germs are also found in the mucus of the stomach, and in the mucus of the intestines. The germs are also found in the mucus of the bladder, and in the mucus of the rectum. The germs are also found in the mucus of the vagina, and in the mucus of the uterus. The germs are also found in the mucus of the prostate gland, and in the mucus of the testis. The germs are also found in the mucus of the penis, and in the mucus of the scrotum. The germs are also found in the mucus of the anus, and in the mucus of the rectum. The germs are also found in the mucus of the bladder, and in the mucus of the rectum. The germs are also found in the mucus of the vagina, and in the mucus of the uterus. THE GRIPPE MICROBE.

Dr. Pfeiffer, the discoverer of the specific germ which causes influenza, has recently published the results of his important experiments with the influenza microbes. Examination proved that the deadly germs are most easily found in the mucus of the nose and throat, and in the mucus of the lungs. The germs are also found in the mucus of the eyes, and in the mucus of the ears. The germs are also found in the mucus of the mouth, and in the mucus of the throat. The germs are also found in the mucus of the stomach, and in the mucus of the intestines. The germs are also found in the mucus of the bladder, and in the mucus of the rectum. The germs are also found in the mucus of the vagina, and in the mucus of the uterus. The germs are also found in the mucus of the prostate gland, and in the mucus of the testis. The germs are also found in the mucus of the penis, and in the mucus of the scrotum. The germs are also found in the mucus of the anus, and in the mucus of the rectum.

LACROSSE.

The Weekly Times

Victoria, Friday, June 9, 1893.

A NEW RAILWAY BUILDER.

There appears in last Sunday's issue of the San Francisco Call an editorial article headed "A Railroad to Hudson Bay," which for a combination of blunders and misstatements would be hard to beat. It is so artistically and amusingly incorrect that we cannot forbear reproducing it in its entirety. It is too good a job to be lost. This is the way the Call makes "ducks and drakes" of our geography:

Our neighbors in British Columbia are excited over the prospect that they are going to have another transportation route to Europe. It is not understood that the projectors of the Canadian Pacific ever made anything out of it except to excite the Canadian government, but from that source they got so much that others have been stimulated to follow their example. The new route which has been talked of for ten years—is to open a virgin country, in which there will be no stint of land grants.

It will start from Victoria on Vancouver Island and will cross the Strait on a bridge especially built for its use. From New Westminster it will follow the coast of the Canadian Pacific across the Rocky mountains and down their eastern slope into the Saskatchewan valley is reached. It will pursue the valley to the mouth of the river in Lake Winnipeg; thence it will strike across, pursuing a course slightly east of north. It will cross the Fort Churchill, in the months of July, August and September, freight steamers will ply to the north. It is calculated that this will be the shortest route from the Pacific coast to Liverpool.

Building railroads through snow deserts between points which are neither distributing markets nor depots for mercantile products is not regarded in this part of the world as a sound enterprise, but the English seem to take a different view, for they are said to have subscribed for a large issue of bonds of the Hudson Bay Railway Company, which Mr. Sutherland, the president, has offered them. There is some good land in the province of British Columbia, in Saskatchewan and Kenatin. They are full of fine timber and there are indications of mineral wealth. The country for the year is divided into a winter of nine months and a summer of three. A country must be very productive where three months' subsistence can support three months' subsistence. And in regions so remote from the centers of consumption it costs all that produces are worth to them to market. There are no finer wheat countries in the world than Manitoba and the border counties of Dakota; the country is fertile, the soil is of common average; but it is very doubtful whether in either the wheat grower can make wages. If any profit is realized it goes to the carrier.

Whimsical as the Hudson Bay route seems to us at the present time, it will be remembered that not very long ago the Canadian Pacific appeared as equally visionary. It also runs through a snow desert, and from Sault Ste. Marie to the west slope of the Rocky mountains it traverses a country which is largely unfit for agriculture. Yet the road is in operation and is competing actively with the road to the north, which carries the traffic. So the Siberian railroad, which has got through eastern Turkestan, and is on the frontier of Mongolia. It crosses a country which is utterly hopeless; yet the cars will presently be running, and in the case of another Russian famine the goods will be shipped to San Francisco, to Vladivostok for consumption west of the Ural.

Whether anything comes of the Hudson Bay route is a matter which it is not easy to say. It is likely to stimulate inquiry into the possibility of railroading in Alaska. In that territory there is fertile land, the wood, gold and other minerals. The best country in the territory is on the Upper Yukon, and at present the only means of getting there is by a stern boat. It is a short distance to the north of the river from St. Michaels. A short railroad from Chilcot to across the range to the lakes which are the head waters of the Yukon would place the gold diggings and the Pelly within three weeks of San Francisco. It is not easy to see where such a line could find traffic enough to pay interest on its cost. But all the gold in the confuents of the Yukon is not used in the territory. The discovery of a new El Dorado in the Arctic regions is among the possibilities of the future. At any rate, if the Hudson Bay route is to be a railroad to Hudson Bay we ought to be able to spare a few millions to furnish our northern territory with an outlet.

If any man can crowd into the same space more errors than this contains we would like to hear from him. But there is an admirable continuity through it; the Call, having started this road on an eccentric line, keeps it running about north by south all the way. Then it will be apparent to the reader that only from Victoria to New Westminster would be able to find enough grub in their three months of summer to keep them through the nine months of winter. Living in a "bore" region, shipmen make a wonderfully, it would be a good thing for the Call writer if he could only spend a year or two in such a place. In the meantime he might by an atlas or go to school again for a little while.

PRESBYTERIAN "HERETICS."

Rev. Dr. Briggs contends that his trial and suspension by the General Assembly were unconstitutional; that the Assembly usurped powers belonging to the presbyteries alone, inasmuch as it undertook to make "amendments of definitions of faith and law." He regards himself as holding no doctrine not recognized by the Presbytery standards, and therefore accuses the governing body of having drawn up new laws in order to make him out a heretic. This is certainly logical and consistent ground for Dr. Briggs to take, but that success awaits his appeal to the presbyteries is at least doubtful. Whatever irregularities he may be able to show in the procedure followed regarding his case, it will be hard for him to convince the majority in the church that the views set forth in his now famous inaugural address are in accordance with the church standards. Assuming that he will succeed in securing his trial, and refusing even to accept the assertion that the original writ-

ines were completely inerrant. Though the conclusion that such a fundamental difference should lead to separation may have been reached in an irregular and unconstitutional way, as judged by the church's rules, yet it seems to us that it is the only logical conclusion. The new writ which undoubtedly suffers from the result of the trial, for there are many clerical and laymen who sympathize with Dr. Briggs and accept his views as correct. Union Seminary stands by him, and is therefore placed with Lane Seminary outside the walls of the Presbyterian Church. There is undoubtedly a growing tendency among members of the church to set aside certain of its doctrines, and it is a question whether this revolutionary feeling will not spread so widely as to cause either the church's disintegration or a revision of its standards. There is another instance of this tendency in the Canadian Presbyterian Church, and one which may lead to a trial similar to that of Rev. Dr. Briggs. An address was delivered at Queen's University not long ago by Rev. Professor Campbell, of the Montreal Presbyterian College, in which opinions not far different from those of Dr. Briggs were expressed. Dr. Campbell made the declaration that the canonical scriptures are the word of God, and admits their authority; but he asserts that the character of God as set forth by Old Testament writers is contradictory in itself and totally unlike the Father whom Christ revealed in his lifetime on earth. This is not a direct repudiation of the doctrine of inerrancy, but it is so close to it that Dr. Campbell's utterances are more than likely to be called in question before the church courts.

IN FULFILLMENT OF ITS PROMISE, THE SAN FRANCISCO EXAMINER HAS ELIMINATED ALL ITS CONTEMPORARIES IN THE "BIG PAPER" COMPETITION.

The Examiner's last Sunday's issue is of 120 pages, with a colored supplement, thus far outrunning the record made by the New York World. The matter in the Examiner would in fact make a book of quite respectable size. It is an interesting volume, too, for California is its theme, which is very exhaustively treated, and California is always an interesting subject to the world at large. The paper will wish to increase their knowledge of that land of flowers and fruit and gold will find the means in this mammoth issue of the Examiner. For both originality and general excellence this special number deserves the palm.

THE WINNIPEG FREE PRESS APPEARS IN A "NEW DRESS" AND LOOKS EXCEEDINGLY WELL.

We know of no paper that better deserves such a decoration, for the Free Press keeps well to the front in the matter of ability, enterprise and good qualities generally.

POWERS OF MAGISTRATES.

Appeal for Habeas Corpus—Short Assizes and Pharmacists' Convention.

New Westminster, June 2.—The steamer Courser, while passing through the strait between the two islands, was struck by the heavy rollers of the sea. The vessel was forced to land at the base of the mountains. The passengers and crew were rescued without injury. The vessel was wrecked on the rocks, and the cargo was lost.

THE JAPAN BRINGS THE FIRST THOMPSON RIFLE.

Vancouver, June 2.—The Commissioner of Lands and Works has increased the price of the first Thompson rifle, which was brought to Vancouver by a Japanese merchant. The rifle is of the latest make, and is considered one of the most reliable of its kind.

EXHIBITION FOR EXHIBITION.

The Court Goes to View a Body-Weather for May.

Nanaimo, June 2.—The Royal Templars from all parts of the province congregated in the public park yesterday and held a sort of demonstration. Unfortunately the weather was not suitable for the occasion, so that sports had to be abandoned. Among those who addressed the meeting were J. C. Brown, M. P. P., Rev. Mr. Lorimer and Rev. Mr. De la Parra.

Rev. G. A. Tovey has met with success in his efforts to secure the erection of a monument to the memory of the late Mr. John D. Brown, who died in 1858.

BOAR-HUNTING IN INDIA.

Sir Edwin Arnold's Unexpected Encounter with a Shooting Quail. It was a pretty broken country round Poondu, not far from Poondu, in the Bombay presidency—a country of trap hills, and vast plains, which, in the winter, splits open in summer time with immense wide fissures, into which the lizards and field rats take headlong, and the quail, as Sir Edwin Arnold writes Sir Edwin Arnold in the London Telegraph, had been shooting quail, with none but native attendants, and the sun shone and the western horizon came to the edge of a deep river, which was surrounded by green bushes, between which showed patches of yellow grass.

Down that nullah, Garhi-paran (protector of the poor) there are plenty of deer and hare, and, perhaps, a leopard, answered Sir Edwin Arnold's question. "Get you of the people of the village," I answered, "the morning early and let us beat the nullah from top to bottom. We can do it."

"I am aware of that your honor," answered Mr. Fuller. "Every shoemaker, tailor, mechanic and itinerant laborer is presumed to know the law. Yes, every man is presumed to know the law, except the chairman of the vestry committee in Oldtown, Mass., told me that he once belonged to a debating club of which the chief justice, when a boy, was a member. One evening a capital punishment was the subject debated. The decision of the club and two clergy members went for hanging. Young Fuller was opposed.

SPORTING INTELLIGENCE.

Matters of Interest Going Forward in the Sporting World.

ZIMMERMAN HURT. Dublin, June 7.—A. Zimmerman, the American champion bicyclist, was winner today in a mile invitation match race participated in by bicyclists from various parts of Ireland. Zimmerman was easily won by two lengths in 2:47.5. O'Neill, of Dublin, was second, and O'Callaghan, of Cork, third. Later in the day there was a race for the twenty-five mile championship. Of the twenty wheelmen who started three fell on the first lap. Zimmerman at an early stage in the race came in collision with great violence against the rail which encloses the track. Three of his teeth were crushed out, and he was otherwise injured to such an extent that he was compelled to retire from the race. Kenny, of Limerick, won, making the distance in 1 hour 12 minutes, 26 seconds. Camp, of London, was second. Zimmerman's injuries, though painful, are not serious.

WON BY THE COLLEGE.

Corrig College played a single innings match with the Rev. J. B. Hewitson's team on Beacon Hill yesterday afternoon. Score—Corrig College, 63; Rev. J. B. Hewitson's, 48.

NELSON SUGGESTS.

Echoes of the Camps Around Kootenay's Capital. (The Nelson Tribune.) There are at present in Kaslo twenty-five places where light sleds and heavy sleds are being made ready to haul to the arctic.

Mr. Justice Walker and Attorney-General Dine of Victoria, and Attorney-General W. H. Nesbit, are at the sitting of the assize, at the only outside heavyweights in the county. About 30 men are at work on the Kaslo-Slocan wagon road, and should be ready for a couple of days before the teams can be taken through to the coast. Except one land slide, the road is in fair condition to the Ten-mile house.

Messrs. Stevenson & Mikal have for the last ten days been engaged in repairing the wagon road to the No. 1 route. Yesterday they had this activity interrupted by a heavy rain. Several of the men were killed and several injured. The road was closed for several days. The men who were killed were: John Smith, James Brown, and John White. The injured men were: John Black, James Green, and John Grey.

The Kootenay Placer Mining Company have been to begin sluicing on the place of the Lower Mine creek in the Pand d'Orville district. The ditch is now in working order. In some of the places where the gold is being sluiced, the gold has already begun.

A Financial Wedding Out. Springfield, Ill., June 8.—Vice-President Stevenson, who is in the city on business, said yesterday in answer to a question as to what he thought of the financial condition of the country, "I do not think there is any occasion whatever for alarm in legitimate business circles."

CANADIAN DISPATCHES.

The News of Eastern Canada in Short Paragraphs. A young man named McCabe, son of a primary school teacher at St. Catharines, was arrested at Winnipeg for stealing a cheque for \$550 from the Inland Revenue department.

Hotel Life in China. Hotels in China are quite uniform architecturally. They never differ in point of cleanliness and other details, but they are almost invariably built in the form of a quadrangle inclosing a court.

Man Where Diamond-Flashing Clerks Don't Appear. In the hotel life in China, the clerks are quite uniform architecturally. They never differ in point of cleanliness and other details, but they are almost invariably built in the form of a quadrangle inclosing a court.

THE AMERICAM ARMY. Sals Writes of His Experience in the War of the Rebellion. Let it be distinctly understood that in the field and in camp the Union army, which, as I have frequently said, was eventually 1,000,000 strong, was so far as the men and their equipment were wholly and completely a teetotal army.

Recorder Lendrum reports business at his office booming. The big tunnel is being bored at the rate of seven and eight feet a day. The Columbian Consolidated Mining Company is making arrangements to mine in the Prince Edward territory.

Swindling in Wall Street, according to the New York World, has cost many hundred millions of dollars. It has resulted directly from the practice of fraud and from the toleration of such practices.

Leprosy in India. "The British Medical Journal says: India has decided in accordance with the terms of the report of the leprosy commission, that it is unnecessary that any further official segregation of lepers or for the compulsory segregation of lepers or for the prohibition of a large scale and out of public funds of isolation hospitals."

THE COAL OF THE WORLD. Facts Relative to the Production of Last Year. Mr. Frederick E. Sward, editor of the coal trade Journal, has recently published his annual book of valuable information relative to coal production, prices, transportation, etc., both at home and abroad.

HOW PERFUMES ARE MADE.

A Process Necessitating Knowledge and Quick Perceptions. The manufacture of marketable perfumes from flowers is delicate art in which both chemical knowledge and quick natural perceptions are required for success.

ter, and the yield under the best conditions hereof is not expected to exceed a measure crop. In Italy the drought has come to an end, but it remains to be seen how much injury has been done to the crops, which according to the reports of the several of the governments, but is more favorably spoken of, and the outlook for spring wheat is described as satisfactory.
