ONIONS! ONIONS! ONIONS! Landing Five Cars

To People Who Are Under Normal Weight Good Advice For Thin, Underdeveloped Men and Women Who Want to Put on Flesh.

Thousands of people suffer from excessive thinness, weak nerves and feeble stomachs who, having tried available flesh-makers, food-fads, physical culture stunts and rab-on creams, resent themselves to life-long skininess and think nothing will make them fat. Yet their case is not hopeless. A recently discovered combination of assimilative agents has made fat grow after years of thinness, and it is also unequalled, judging from reports, for repairing the waste of sickness or faulty digestion and for strengthening the nerves. This remarkable preparation is called Sargol. Six strengthening fat-producing, assimilative elements of acknowledged merit have been combined in this preparation, which is endorsed and used by prominent people everywhere. It is absolutely harmless, inexpensive and efficient.

While this new preparator has from reports given splendid results as a nerve-tonic and vitalizer, its use is not recommended to nervous people unless they wish to gain at least ten pounds of flesh.

PRELIMINARY HEARING IN AUTO LEAGUE CASE

Evidence of several witnesses taken and case put over till Monday morning—Obtaining money under false pretences the charge.

The preliminary hearing of the case where Harold C. Cottrell and Roy M. Grey are charged with obtaining money under false pretences was commenced in the police court yesterday morning and continued during the afternoon, adjourning until Monday morning at 10:45 o'clock. W. J. Mahoney appeared on behalf of the defendants, Police Inspector Wickham for the prosecution and Commissioner McLellan handled the case in the afternoon. Miss Christina Ross the police matron, was sworn in as official court stenographer.

Cottrell and Grey, on the opening of the court were ordered to stand up and the Magistrate gave judgment on the case tried last week, when the prisoners were charged with doing business in the city without a license. They were adjudged guilty and fined forty dollars each, and in default of payment twenty days in jail. After this sentence had been administered the court went into the preliminary proceedings on the other case.

John White.
John White was the first witness called, and testified that Cottrell called on him on Thursday, 11th inst., and previous to this the defendant had been speaking to Walter White, a son of the witness. Cottrell's proposal was to the effect that he represented the International Automobile League of Buffalo, N. Y., and he stated that the league could sell automobile tires at a cheaper rate than the local agents. He stated that his concern made contracts with all tire companies except the Dunlop Company, and the Maltese Cross Company. Defendant told witness that he could furnish witness with all the other makes of tires excepting the two mentioned. As to the mode of doing business, Cottrell said that he was to induce as many automobile owners as possible to subscribe, and that these persons would pay the sum of ten dollars per year as a membership fee, and he also said that up to that time he had obtained about fifty members in the city. Defendant told witness that Grey would remain in the city for about six weeks, and for all subscriptions that Grey managed to solicit White would receive fifty per cent. of the amount, and any subscription to membership that Mr. White would send himself he would receive seventy-five per cent. of the amount. In addition to these offers Cottrell said that he expected to have about two hundred members in the city and county of St. John, that White was to be the sole representative of the League for this district, and would receive fifty per cent. annually of the dues paid into the league.

Signed Contract.
Witness signed a contract and paid fifty dollars down and was to pay an additional fifty dollars when the head office would sanction the contract. He was to receive word on Monday last. If the contract was not sanctioned White was to receive his fifty dollars back from Cottrell. A cheque for the fifty dollars had been given on the Bank of Nova Scotia and had been cashed by Cottrell. The defendant said that witness would receive four hundred dollars worth of stock. Cottrell said he was going to Fredericton, Shediac and Moncton to open agencies. Defendant further stated that his association made large contracts with the large manufacturer and that was the reason they were able to sell the goods at such a low figure. Witness was to have the exclusive agency of the city. To Mr. Mahoney witness said Cottrell gave as a reason for not handling the Dunlop or Maltese Cross tires was that on one time this class of goods was not going well or their satisfaction. He quoted a price for Goodyear tires which was fifteen per cent. cheaper than the figure quoted by the local representative of the Goodyear Company. The chief inducement for witness to pay the dues was the fifty per cent.

would receive from the annual membership dues to the League. Defendant had mentioned the Goodrich and National tire concerns as being among the tires that would be handled, and he said that he was going to have a contract with a man in Cape Breton for Gasolina which would be furnished to members of the league much cheaper than it could be obtained elsewhere. The price quoted by the Goodyear agents was \$42.85, while Cottrell said he could sell the Goodyear tires to members of the league at \$35.70. Witness said that his son Walter White was present during the conversation.

Walter White.
Walter White was called and gave evidence along the lines given by his father. He said that Cottrell had stated that two names were to be sent to headquarters and that the head office would choose one of the names for the local agent. They were also to send round a representative to make fire adjustments once a month and this person would also take stock of the goods that had been handled by the agent. Cottrell had also informed witness that the agent would receive twenty-one and a half per cent. on all sales made to members of the league and that practically all tires on the market with the exception of the Dunlop and Maltese would be handled, and he had contracts with the big tire dealers in the States. The defendant also stated that he would look after the agent's bond and pay the premium. The court adjourned for lunch.

Afternoon Court.
At the afternoon session the testimony of Walter White was resumed. Witness said that his father had accepted the contract and that he (witness) was going to look after the business. John White was to become a member of the league but witness did not see him sign any membership application. Witness did not know that the contract into which his father had entered only mentioned the National tires, and that he would not have the exclusive right to handle tires for the league members. Witness did not know that the league confined itself to such tires and accessories as they were only able to obtain. Cottrell quoted prices from a printed list including Goodyear tires, he said that he had dealers in the States so he could quote low.

To Mr. Mahoney—The price quoted on a Stewart pump was given as the price in the United States and a duty of 42½ added. John White was recalled and said that the papers were all prepared when Cottrell called on him for a signature, and when witness signed he was told he was to have the exclusive right as agent. Witness did not know that the National tire was the only one mentioned in the contract and that other persons would have the same privilege as the agent. If witness had known these facts he would certainly not have signed the contract. He signed no membership application. Witness corroborated his son in the statement that he was to get 22½ per cent. on all sales. The prices quoted by Cottrell was duty, freight and everything paid on the goods and landed in St. John. He believed that the league had contracts with all tire manufacturers.

To Mr. Mahoney witness said that this 22½ per cent. was to be on all tires while the percentage on other goods would vary. George A. Wadell of the automobile tire department of the Goodyear Tire and Rubber Co., who came here from Akron, Ohio, to give evidence, was the next witness called and stated that if the Goodyear Company had a contract with a jobber it would be known at headquarters. His position with the Goodyear Company is legal adviser. In this connection contracts executed by the company reach through and passed through his hands for its approval, and all cases in that line are drawn to his attention, or if a corpora-

LATEST INVESTIGATE THE RECENT FIRES IN MUNITIONS PLANTS

Dept. of Justice in U. S. will use all legal machinery available to punish guilty persons.

Washington, Nov. 19.—Although officials of the Department of Justice do not know whether federal laws can be applied to burning of munitions plants they expect to make every possible effort to bring prosecutions, if evidence can be gathered to show that the government is in any way concerned.

Officials are surprised at the non-action of state officials to institute prosecutions as a result of munition plants fires. They feel that labor leaders and employees who were thrown out of work as a consequence of fires should be ready to aid the government.

Agents of the department are investigating the Bethlehem fire to determine whether federal action can be taken.

The policy of the Department of Justice and Treasury Department in handling investigations of bomb plots, munition factories explosions and similar matters was announced tonight in a statement authorized by Attorney General Gregory and Secretary McAdoo. It indicates that in the future the bureau of investigation of the Department of Justice is to be the main reliance of the government in dealing with criminal activities in this country, connected with the European war.

MARKET INERT WITH VOLUME OF TRADING SMALLEST IN WEEKS ON DIRECTORATE OF CRUCIBLE STEEL

New York, Nov. 19.—For the extreme inertia which overtook today's trading no explanation was offered, other than that the market "had gone stale." In the "veritable" Wall Street this was not another way of saying that professional as well as public interest had become stultified for a time and that new conditions or developments were needed to impart fresh energy.

Price changes at the opening were more irregular than usual, although railway shares were again in fair demand at moderate gains. Other issues denoted heaviness, war shares and

Around the City

The Calvin Austin. The Eastern Steamship Co's steamer Calvin Austin did not leave Boston yesterday morning, owing to the heavy easterly gale that swept all along the coast yesterday and consequently there will be no sailing from here tonight.

Arranging for Battalion

A. S. McAllister, the national secretary for the Maritime Provinces, is in town arranging for the next regiment which is to be quartered at the armory. Baths will be installed in the exhibition building and the general work of the Y. M. C. A. will be carried on there. He addressed the senior class on the work of the Y. M. C. A. is doing overseas with the different regiments.

Sunday Church Parade.

Major Barker, officer commanding the 4th Heavy Siege Battery, Partridge Island, reports that the men of the battery are in good health and taking great interest in their drill. A church parade has been arranged for Sunday morning when the battery will march to St. Mary's church, Waterloo street. The regimental chaplain, Ven. Archdeacon Raymond, D. D., will conduct the service and preach.

Boys Entertained

The intermediate boys of the Y. M. C. A. carried out a social programme in their rooms last evening. Selections were played on the Victrola, a reading was given by D. Gordon Lingley and parlor stunts and games were carried out. At the close of the evening refreshments were served. About twenty-five of the boys were present and spent a very enjoyable evening.

Retail Markets

The retail prices in the city market yesterday ranged high in some articles and quite moderate in others. Turkeys were selling from 27c. to 30c. a pound; chickens from 22c. to 25c.; fowl from 16c. to 20c. and geese and ducks sold for any price between \$1.25 and \$2.00. Fresh eggs brought from 48c. to 55c. and case eggs sold for 35c. and 40c. Butter ranged from 25c. to 28c. Many fine birds are on market for Saturday and it is thought reasonable prices will be obtained.

OBITUARY.

James S. Young. Good Corner, N. B., Nov. 17.—James S. Young, of Monticello, Me., died at the home of his brother on the 16th inst. The deceased was born in Bloomfield, Carleton Co., Sept. 12th, 1866; going west at an early age he secured employment in Vancouver, B. C., where he spent thirteen years. The hardships of western life, however, undermined his health and about three years ago he was seized with locomotor ataxia which disabled him and in the autumn of 1913 he returned to the home of his brother, S. O. Young, Monticello, Me., where he had since made his home. Besides a widowed mother and the brother before mentioned he leaves one sister, Mrs. Hazen Hamilton, Fairville, St. John. The funeral was held from his late home, Wednesday, 17th inst., interment being at the Carvell cemetery. Rev. Henry Penna of Centreville officiated. Many floral offerings showed the esteem in which the late Mr. Young was held. The pallbearers were A. C. Carvell, W. S. Black, Wm. Crandfield and Wilmet Porter.

Miss Kathleen M. McGourty

The death occurred on the 19th inst. at the home of her parents, 33 Crown street, of Kathleen M., daughter of Peter and Sarah M. McGourty, in the nineteenth year of her age. Beside her parents, Miss McGourty is survived by three sisters, Margaret, a teacher in St. Malachi school; Mary and Vera at home, and three brothers, Frank and Harry at home and Peter, who is with the 104th Battalion. The funeral will take place from her parents' residence, Sunday afternoon at 2.30 o'clock.

Turkey supper at Wanamaker's tonight, with Cabaret music from 5 to 7.

MR. HAZEN SECURES MORE CONTRACTS FOR ST. JOHN INDUSTRIES

Hon. J. D. Hazen, Minister of Marine and Fisheries, has again shown his great interest in the advancement of the industrial activities of St. John. He has secured for the Canada Brush Co., Ltd., a contract for supplying 115,000 leather brushes for Canadian troops.

FRED M'NICHOL ST. JOHN BRASS BAND OFFERS TO TORONTO BATTALION ITS SERVICES

Bandmaster of Temple Band to join overseas unit—Reports at once. Willing to go as a unit with colored Canadian Battalion.

The many friends of Fred W. McNichol, the bandmaster of the Temple Band, will be pleased to learn that he received a telegram yesterday from Lieut. Col. R. E. Barker, of the 95th Battalion, Toronto, to the effect that he had been appointed as bandmaster of that Battalion. The telegram further ordered Mr. McNichol to report at Toronto immediately on receipt of transportation. Mr. McNichol expects the transportation to arrive in the city today and he will leave for Toronto on Monday to take up his new position.

Last night Bandmaster McNichol said that he expects to take six members of the Temple Band with him as well as two other bandmen not connected with that organization. After he arrives at Toronto and has a consultation with the officer commanding the battalion he will know better just how many men he will need. Five battalions are being mobilized in Toronto, and the 95th is one of the newest.

WOUNDED CANADIANS BEAR THEIR SUFFERINGS WITHOUT A MURMUR

London, Nov. 19.—Lieut. Col. J. M. Elder, of Montreal, writes from No. 3 Canadian General Hospital (McGill): "What impresses us more than anything else is the fine, uncomplaining and often cheerful spirit of the patients, men with the most ghastly wounds never utter a sound of complaint, but accept it all with stoical indifference to pain, and gratitude for the least attention."

PREFERENCE IN FRENCH CIVIL SERVICE FOR DISABLED SOLDIERS

Paris, Nov. 19.—The chamber of deputies today adopted a bill giving preference in the government service to men mutilated or disabled in the war. This preference extends to every branch of the civil service, and not merely to one half of the places, as had been ordered under a ministerial decree.

ROOM FOR MEN IN EXHIBITION BUILDING HERE

Military authorities in Halifax evidently mistaken concerning quarters for soldiers.

Mayor Frink has taken up with the military authorities at Halifax the matter of quartering the men of the 140th Battalion in St. John. Lieut. Col. George W. Fowler, has about 600 men in Sussex ready to be transferred to the new battalion.

ARTHUR ESTEY COMING HOME

Was with Ammunition Column and was injured by fall from horse.

SAY PHYSICIAN WAS JUSTIFIER IN REFUSING TO PERFORM OPERATION

Chicago, Nov. 19.—Six physicians, composing a coroner's jury, today held that Dr. H. J. Halseiden, who permitted an infant, John Bollinger, to die, when an operation might have saved him to a life of unhappiness as a defective, was morally and ethically justified in refusing to perform the operation which his conscience did not sanction.

MOVEMENT LAUNCHED FOR ESTABLISHING A WORLD SUPREME COURT

New York, Nov. 19.—The first formal steps in a campaign for the creation of a World Supreme Court, for the judicial settlement of all international disputes, were taken at a luncheon given here today, which was attended by men prominent in public life from all sections of the country.

Plain and Fancy White Shirts; also latest designs in Colored Shirts in Soft Fronts, Starched Semi-Booms and Pleated Booms with starched attached cuffs, also with the famous Columbia Cut turn cuffs.

Manchester Robertson Allison, Limited. Also some great bargains in Full-Dress Shirts, Heavy Wool Shirts and Drawers, Heavy Black Worsted Half Hose. MEN'S FURNISHINGS DEPARTMENT.

CONSIDER THE GRINDSTONE, HOW IT IS DUG UP IN CHUNKS AND MADE OF USE TO THE WORLD

STONEHAVEN IN GLOUCESTER COUNTY SUPPLIES HALF THE GRINDSTONES MADE IN CANADA

And Has Been Doing it for Quite a While—Quarries Have Been Reclaimed from the Sea and Are Protected by Massive Dykes—Work Can be Successfully Carried on Only in the Warmer Months.

If you wish to establish a foundry, a watch factory or some mercantile business, your choice of location is unlimited. If however you prefer to engage in mining, lumbering or fishing, for instance, your location is more or less settled. If we call the first class of industries man made, and the second natural ones, then it is for its natural industries that New Brunswick is most famous. Certainly in this province, lumbering, mining and fishing are the chief industries. In mining—though a natural industry—New Brunswick ranks low among Canadian Provinces. Indeed, excluding Prince Edward Island, we usually rank lowest, the total value of the product of our mines, quarries, brick yards, etc., being about a million dollars. Our mines are not very important in the world's affairs but among our mining industries are some which though small, are unusual and for that reason interesting.

The Quarries on the Beach
Such a one is the Grindstone industry at Stonehaven, Gloucester County. Stonehaven is situated on the south side of the Bay Chaleur, eighteen miles east of Bathurst. If you are travelling between Bathurst and Campbellton and after you have a few miles north of Bathurst, you look down the Bay, you can often see the smoke from the boilers at the quarry in Stonehaven. You get to Stonehaven by taking the Carquet & Gulf Shore Ry. from Bathurst. On leaving the train, your first impression of the place is that the only form of industry there is farming. However a half a mile brings you to the shore. The bank of the cliff here is 50 feet or more in height and on the beach below the cliff is situated the quarry of the Read Stone Co. Ltd.

Half the Grindstones in Canada
Here are produced over half of the grindstones quarried in Canada, and if we consider only the small grindstones such as the reader is accustomed to see, then this quarry accounts for practically all the Canadian production. Grindstones six and seven feet in diameter were a strange sight to the writer's eyes. No doubt it is only a minority of the people who know that these larger sizes are made at all. The first question naturally asked is "what are these stones used for?" Generally speaking every edge tool is ground on a grindstone as part of its manufacture. In the making of axes, scythes, chisels, cutlery, saws, etc., grindstones play an important part. Around the plant of Henry Dismore & Sons, Philadelphia, is built a wall, over a mile long, made entirely of the worn out centres or "butts" of grindstones.

Make Some Pretty Big Ones
At this quarry, stones are made in all sizes from 8 inches in diameter for kitchen grindstones up to stones 64 inches in diameter by 14 inches thick. This is the largest size commonly used and weighs over 3-1/2 tons. Stones from 12 to 30 inches in diameter are made in great quantities for the general hardware trade, principally for use on farms, lumbering operations and in shops. Stones from 30 to 45 inches in diameter are used principally in machine shops. Stones larger than this are made in special sizes for special purposes. For instance, stones 50 inches by 4-1/2 inches were being made for The Starr Mfg. Co., Dartmouth, N. S. for grinding plates. Stones 60 inches by 4 inches are the common size for grinding granite cutting tools in New England States. Stones 40 inches by 12 inches were being sent to Indiana for grinding the backs of hand saws.

Reclaimed From the Sea
This quarry is unique in this fact, the areas worked have been in turn reclaimed from the sea by the building of dams. This has been no small undertaking. The dam around the present quarry which has just been

finished, is over one quarter of a mile long, and in all about a mile of dams has been built here. Anyone who has seen the Bay Chaleur in a storm will know that these dams are no flimsy affairs. They have been built chiefly of timber cribwork filled with stone and heavily rip-rapped on the side exposed to the sea. The dams have been made water tight by the use of a clay puddle pounded tight.

Trimmed by Machinery
After the dam is built the water is pumped out and quarrying operations start. The stone lies in horizontal sheets of varying thickness, the total depth of rock being about 25 feet. A steam channeller, steam and air drills are used as required and by the use of these and with powder and wedges the rock is quarried to the required size. It is then hoisted to the "dump" where the stonecutters take it and shape it round. From there, if it is not too thick for a single grindstone it goes direct to the lathe to be finished. If the block is sent to two or three feet thick it is sent to the saws and cut to the required thickness. This applies to the larger stones, say 48 inches in diameter and larger. The smaller stones are split out of the irregular shaped pieces that come out along with the larger stones. The stones are cut round and shaped as a rough grindstone. In the older days the grindstones were finished by hand by means of chisel and mallet. Now the rough grindstone is taken to the mill where the eye is drilled and the stone turned on a lathe in a very short time. Indeed an expert turner will finish a small stone in five minutes. Many of the small grindstones, particularly the thinner ones, are made by sawing large blocks of

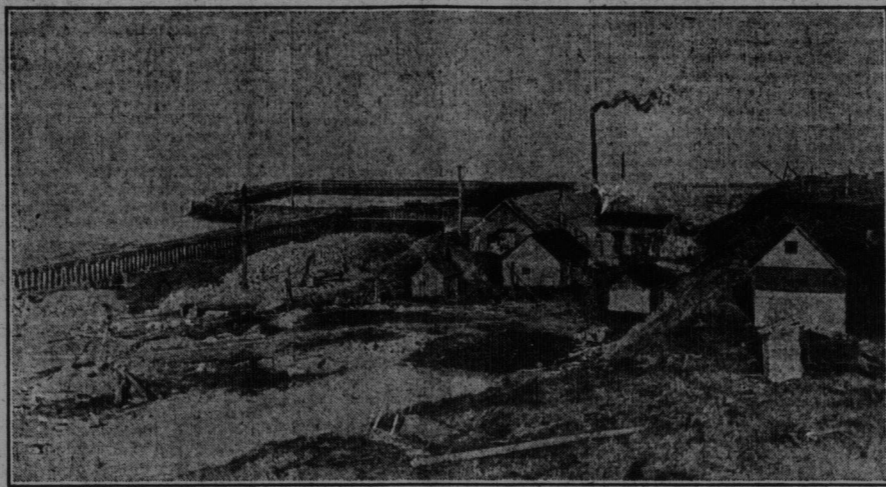

the mill machinery. This consists of an air compressor for the hammer drills used in the quarry, three gang saws, eight lathes, two scythe stone grinders, shingle mill for making shooks for scythe stone boxes, besides the necessary hoisting and pumping machinery, exhaust fans, etc. Water for the boilers is piped from a reservoir half a mile away. A good public wharf provides accommodation for water shipment.

Sawing Through Boulders
Stone saws in operation are an unusual sight to the uninitiated. The saws themselves are merely strips of steel from 1-8 to 1-4 inches thick by 4 to 10 inches wide and usually 10 or 12 feet long. Sometimes teeth are notched in the cutting edge. Perhaps twenty or more of these blades are

used at a time and are set in a gang. Here they swing back and forth and while sand and water is poured on top of the block, the saws under a forced feed slowly cut their way through the stone. The sawing speed here is from 6 to 12 inches per hour. In granite and marble the speed is from 1 to 2 inches per hour. In place of sand, crushed steel and steel shot are often used as the abrasive, particularly with granite and the harder stones.

Heavy Machinery in Use
The quarry is well equipped for handling stones. Three derricks are used at the quarry, two at the mill with a third in course of erection, and three at the wharf and station, while a travelling derrick operating under its own power and equipped with an orange peel bucket has been used for stripping purposes. One steam plant of 50 H. P. operates the hoisting machinery for the quarry derricks. Another of about the same capacity handles the pumping plant and the steam channeller. A 100 H. P. plant runs

An Industry Which First Saw Light, Between Tides, at the Head of the Bay of Fundy, and for More Than One Hundred Years Has Gone Along in Its Own Quiet but Prosperous Way, Continuing as One of New Brunswick's Least Known but Most Interesting Industries.

GENERAL VIEW SHOWING DAMS, MAIN MILL BUILDING, PILES OF LARGE AND SMALL GRINDSTONES, ETC.

NEW BRUNSWICK STONE LEADS ALL AMERICA IN QUALITY

the "Canada Red End" there is little hand grinding required to finish the stones. In making an oval stone like the "Bay Chaleur" more hand grinding is required. The stones are attractively labelled and boxed in 1-4 gross boxes. The company operates a small quarry at New Bandon, a mile east of Stonehaven to obtain a fine grit stone that is used in their "Acme" scythe stones. This stone is of a very fine grit, suitable for oil stones, and besides being used for scythe stones is shipped in the rough for polishing marble.

Half the Output to the U. S.
About 2500 tons of grindstones are shipped each year. Half of this goes to the United States. About three quarters of the total output is shipped to the States, many shipments going by rail. In Canada stones are shipped to every province of the Dominion from Nova Scotia to British Columbia. In the States shipments are made as far south as Carolina and Tennessee and as far west as Illinois and Indiana. The New England States are the principal market. Canadian stones supply perhaps 5 per cent. of the U. S. requirements. The United States stones are cheaper in price owing to lower cost of production and as we are smilingly told, poorer in quality. The great sandstone quarries near Cleveland, Ohio, are over 200 feet deep and are of a very solid formation. However, the Canadian quarries produce stones that are superior for certain kinds of grinding, and for this reason have a good demand in the States in spite of the higher price. Many United States stones are shipped to Canada on account of the lower price. Ontario is the chief purchasing province, and hence the transportation charges are less from the States than from New Brunswick. The figures given by the Dept. of Mines relative to the production of grindstones in Canada and the imports and exports are as follows for 1911, 1912 and 1913:

volume of such business is small and is chiefly done through Halifax, New York and Boston jobbers. The scythe stones are shipped chiefly to Canadian points. A number of cars of rough blocks of stone are shipped to the States to be manufactured into scythe stones there.

Stonehaven Opened in 1856
The Reads have been quarrying at Stonehaven since 1856, when Mr. Joseph Read of Minudie, Cumberland Co., N. S., purchased quarries here. At that time several parties were operating—the industry had been started in the 40's. Now, besides the Read quarry there is only one small quarry operating at Clifton, two miles west of Stonehaven, owned by the W. R. Knowles Co. Ltd. There is no production at this quarry this year. In the

early days at Stonehaven, the grindstones were quarried on the reefs at low tide, floated or hauled ashore, and finished by hand. These were perhaps the picturesque days of the industry when men worked often to the waist in water, by day and by night as the tide suited. Stormy weather meant a partial stopping of the work. Shipments were made by scowing the stones out to schooners in the offing. At this time probably 300 men were employed. Later came machinery, and better shipping facilities, and now about 100 men are employed during the summer. Quarrying starts in May and ends in October. It is impossible to work when there is danger of the frost cracking the freshly quarried stone.

Product Import Export

Year	Product	Import	Export
1911	...	\$22,000	\$4,000
1912	...	111,000	26,000
1913	...	51,000	129,000

The production of grindstones has remained practically constant during the past twenty years. The great growth in imports has been largely caused by imports of stones for pulp grinding. England supplies nearly all the requirements for this class of stone, both in Canada and the States. It is difficult to explain the fact that the value of the exports are greater than the production in 1913. If these figures are correct it means that stock from previous years was exported, or what is more likely, the re-export of pulp grinding stones.

A Scattered Market.
Grindstones are shipped from Stonehaven to Newfoundland, the West Indies and shipments have been made at times to Mexico, South Africa, South America and even to England. The

THE FOURTH GENERATION OF THE READS OF SACKVILLE NOW OPERATING AT STONEHAVEN

Great-Grandsons of the Original Lessees of the Fundy Quarries are Manufacturing by Most Modern Methods—An Industry With a Very Unique History—Stone of the Highest Grade.

brown stone found at that place. The other officials of the company, Messrs. Gordon and Herbert W. Read are at Stonehaven. Amos Comeau, superintendent of the Stonehaven quarry has been with the Reads for nearly 60 years, starting as a small boy. He has seen the industry develop from a crude beginning to a stage where steam does all the heavy work that was formerly done by hand.

Started Near Minudie
The Grindstone industry of Canada had its beginning at the head of the Bay of Fundy, near Minudie, N. S., probably by the French, for local use, before the British occupation. Afterwards a British officer of distinction, Joseph Frederick Walleat DesBarres, later Governor of Prince Edward Island, secured a grant from the Crown, of Minudie and adjacent country, many miles in extent and including the grindstone ledges at "The Jogins" as that part of the Bay shore was then called. This was probably about 1764. It may be interesting here to note that the name "Jogins" spelled in different ways, is found all over the Maritime Provinces, as Aboushagan in New Brunswick, and Cheogogin in Nova Scotia, all probably derived from a French word meaning "a fishing place."

Read and Seaman in 1815
DesBarres later leased these ledges to his former tenants of Minudie, both French and English, who made grindstones by hand in a co-operative way. About 1815 Joseph Read and John Seaman, who came from Sackville, N. B., about 1808, leased farms from DesBarres' agent, acquired control of these ledges as shown by an old lease from the proprietors, and began re-

grew rapidly and was extended to other locations on the Bay of Fundy, both in Nova Scotia and in New Brunswick, the great tides of this bay baring the ledges of rock twice daily, allowing the rock to be excavated when the tide was low. With the rising tide boats were fastened over the loosened rock and large blocks were floated to high water level in convenient caves where, after the tide had fallen smooth workmen shaped the stones by hand into the grindstones of commerce. When a sufficient quantity had accumulated at any one place a vessel would come for them, grounding in a prepared berth near the grindstones (there were no wharves) and they would be hoisted on board by the quarrymen, no light task as many of these stones weighed over three tons. Later oxen and horses were used for hoisting. Quarries were also opened at other places in both these provinces, at several points in Pictou Co., N. S., at Shediac, Fox Creek, N. B., along the Miramichi River and at Stonehaven, the growing industries of the United States demanding larger and larger quantities for their factories and these provinces were the chief sources for these supplies.

Survival of the Fittest
But the abrogation of the Reciprocity Treaty and the imposition of high duties by the United States in the sixties, the opening of large quarries in Ohio in the seventies and the great improvement and extension of railway transportation all operated against the Canadian industry, and only the best of the Canadian quarries have survived. The Read Stone Co. Ltd., at its various quarries, has been the principal producer for years. The other operators at present are The Macmillan Grindstone Co. Ltd., near Woodburn, N. S., and The Dorchester Stone Works, Ltd., near Dorchester, N. B. The Miramichi Quarry Co., Quarryville, N. B., get out a considerable quantity of pulp grinding stones each year.

Demand is Always Strong
In all probability none of the Canadian quarries have any difficulty in selling their output, probably the greatest difficulty is in filling their orders, in normal times at any rate. In some cases, however, it is difficult to get a price at which the stones can be quarried at a profit. This explains the lack of growth of the Canadian grindstone business. The war has affected the business at Stonehaven considerably, the production being much less this year than usual.

For Invalided Soldiers
Representations have been made to Mayor Frink that during the winter there will be frequent arrivals of parties of about two hundred wounded soldiers invalided back from the front. It has been suggested that a committee of ladies and gentlemen be formed to act as a reception committee for these men and His Worship has accordingly called a meeting to which all interested are invited at his office on Saturday afternoon at three o'clock.

LARGE GRINDSTONES—SMALL GRINDSTONES CRATED FOR EXPORT IN FOREGROUND.

ular shipments of grindstones to the United States in small vessels. It is known that for some years these shipments went only as far as the United States frontier port of Eastport, where they were transferred to United States vessels to be forwarded to Boston and other places. This business of forwarding was in the hands of Messrs. G. & J. Hobbs, of Eastport, and members of this firm were frequent visitors at Minudie for many years afterwards. Tradition says that the navigation laws of the United States did not allow Provincial vessels to go beyond a frontier port at that time. The grindstone business has practically been in the hands of the Read and Seaman families ever since, and the Messrs Read now operating at Stonehaven are great grandsons of both the original lessees, Joseph Read and John Thomas Seaman. Joseph Read 2nd, went with his first cargo to the States in 1824 and shortly afterwards opened a branch office and warehouse in Boston that was maintained continually until 1888 by himself and successors. The business

Social Notes of the Week

HAMPTON

Hampton, Nov. 20.—Mr. and Mrs. Freeman and little daughter who have been guests at the Riverview Hotel for several weeks left on Thursday for New York en route to their home in Trinidad.

Mrs. John E. Irvine and Miss Kenneth Schofield have returned from a pleasant visit in Montreal. A wedding of much interest to the Hampton community took place on Tuesday evening at 8.45 o'clock when Miss Della Victoria Appleby, daughter of Mr. and Mrs. Robert N. Appleby, became the bride of Mr. Frank W. Compton, a popular young druggist of this place.

Hampton, Nov. 20.—Mr. and Mrs. Freeman and little daughter who have been guests at the Riverview Hotel for several weeks left on Thursday for New York en route to their home in Trinidad.

WILL LEAD IN SUFRAGE CONVENTION

Mrs. WINSTON CHURCHILL

Mrs. Winston Churchill has joined the group of lobbyists as chairman of the Committee on Arrangements for the forty-seventh annual convention of the National American Woman Suffrage Association, to be held in Washington December 14 to 19.

Woodstock, Nov. 18.—Capt. E. Raban Vince, 1st Company Engineers, and Major A. Nevill Vince, 12th Battalion, of the King's Liverpool Regiment, both sons of Mrs. D. McLeod Vince, after a strenuous time on the firing line, are enjoying a short furlough in London, England.

Westfield Beach, Nov. 18.—Mr. and Mrs. C. H. Hutchings are the last of the suburbanites to close their cottages here and return to St. John. They left for the city on Tuesday.

Brighter Children. Children are probably brighter today than a generation ago—but are they stronger? That's a grave question. So many pinched faces, dulled eyes and languid feeling make us wonder if they will ever grow into robust, healthy men and women.

Gray Hair. Dr. Tremaine's Natural Hair Restorative used as directed is guaranteed to restore gray hair to natural color or money refunded. Positively not a dye and non-injurious. For sale by the Ross Drug Co., Limited, 100 King Street, St. John, N.B. (postpaid). Write Tremaine Supply Co., Dept. "J," Toronto.

SHEDIAC

Shediac, Nov. 18.—The Red Cross Society held its weekly meeting on Tuesday with a larger attendance than usual. The receipts from the afternoon tea on Saturday were over \$20.

Newcastle, Nov. 19.—E. A. McCurdy, manager of the Royal Bank and R. A. N. Jarvis attended the funeral of Sir Charles Tupper at Halifax, Tuesday.

Dorchester, Nov. 18.—Mr. Phillip Palmer, who has been the guest of Mr. and Mrs. M. G. Teed, left on Tuesday for Ottawa.

Woodstock, Nov. 18.—Capt. E. Raban Vince, 1st Company Engineers, and Major A. Nevill Vince, 12th Battalion, of the King's Liverpool Regiment, both sons of Mrs. D. McLeod Vince, after a strenuous time on the firing line, are enjoying a short furlough in London, England.

UNCLE DICK'S TOY FUND FOR SOLDIERS' CHILDREN

This week I am pleased to be able to acknowledge further receipts towards the above fund. This of course does not by any means represent the full amount collected, but shows the amount actually received. I trust you will all do your very best, make this amount increase each week, but naturally you must have the collecting cards to enable you to gather the money for the fund, so, will those who have not as yet written, send at once.

Table with 2 columns: Name and Amount. Includes entries for Geraldine Ryan (.50), The Standard (3.00), Ronald McLean (2.40), and Gerald Lipsett (1.50). Total amount: \$7.80.

Will those of my kiddies who wish to have a collecting card please send me in their names and addresses.

UNCLE DICK, The Standard, St. John, N. B.

and be marked in the top left hand corner "Children's Fund."

Uncle Dick's Chat With the Childrne

My Dear Kiddies:— As each week comes around, there seems to be a great deal to tell you all, and this time it is about the special contest particulars of which will be found on this page.

Walter Ritchie—I received your letter to help in the words contest, and am glad you are having the certificate framed, and also that you like same.

Edward Ritchie—I have no doubt that you will receive the certificate in due time, and you will have word as to your receiving it all right.

Willie Harris—Many thanks for the game which you have sent, and which I am publishing this week. You were very thoughtful in a day or two, and I hope you will like same.

Dean Drott—I am pleased to welcome you to our large Corner, Dean, and trust you will continue to enjoy same. I hope you will try in the new contest this week.

Earle V. Hinton—you have not previously written me, have you Earle? I hope you will continue to enjoy the Corner, and do your best in the different contests.

Albert Buraglia—you have made a splendid drawing, Albert, and I am sure if you work hard and study sketching carefully you will make utique a good artist when you grow up.

Hazen Heatherington—Many thanks for your letter. I am pleased to welcome you to our large Corner, and trust you will continue to enjoy same, if those who are, will please send me the like to have a collecting card?

Thelma Steeves—Thanks very much indeed for the three dollars which you have been able to collect, in aid of the Toy Fund. I am sure you are all doing extremely good work.

Ronald McLean—I was very glad indeed to receive the result of your hard work on behalf of the toy fund for soldiers' kiddies, namely \$3.40, and thank you very much indeed for same.

Myrtle Cox—I am sure Myrtle, you deserve very great praise for the way in which you always respond when there is any work to be done for the Red Cross.

Harriet Vanstone—I was pleased to receive your letter, together with the interesting particulars of the game "Jerusalem," which I am publishing.

Cherrie Felkins—Many thanks for your letter, together with your attempt in the word contest. The result of this will of course not be known until next week.

Muriel Hunter—I was very pleased indeed to see that you are sending seventeen face cloths. You have been

Scout News How to Run a Troop.

The monthly meeting of the local association of the Boy Scouts was held in Bond's cafe, last Monday evening. A. C. Skilton being in the chair.

Some interesting suggestions were made as to the best way to spend the evening with the boys in their club rooms, and those present gained much information on the subject.

German Street Troop
Members of the German Street Troop took part in the unrolling of the roll of honor in German Street Baptist Church last Sunday.

Chipman Troop
The Chipman Troop have recently lost their Scoutmaster, Mr. Hugh Hamilton, who has recently enlisted in the 104th Battalion.

Patrol Leaders
The following is a part of a special article written for the Scout, Eng., and these columns of The Standard:

The war has brought you Patrol-leaders your chance and in many cases you have taken it. Scoutmasters have been called away from their troops to take service for the Country, and in many cases the Patrol-leaders have formed themselves into a Court of Honor and have run the troop in the absence of the Scoutmaster.

I always considered the patrol as the important body in the Scout movement, but since the war it has shown more than ever that it is the unit that can be relied upon to do its duty well.

For the tasting contest, prepare various articles for the boys to taste. The boy who guesses correctly the most things wins.

The hearing test is best done in this manner. Let someone read a short paragraph, the competitors have to write down as much as they can remember.

Parties of Scouts are advised to carry a white light as the head of their column, the red one at the rear.

Dr. Holmes, the well-known skin specialist, writes: "I am convinced that the D. D. D. Prescription is as much a specific for Eczema as quinine for malaria."

HIGH HAIRDRESSING

Curls too Frivolous for Many - French Twists Still in Vogue.

It is curious how slowly the mode changes in hairdressing. We still have coiffures which, even if they are not exactly pasted to the head in their flatness, are still far from bouffant.

Older women like, as a rule, the rolled puff (or twists of hair arranged on top of the head. Curls are a bit too frivolous for many young women of the more serious character.

Some veritable Madame de Pompadour styles of hairdressing have been noted recently. In a theatre audience a young girl of debutante age had her very blond hair brushed right back over her face, as in one famous picture.

The clipped coiffure seemed to have gone out of style; possibly those who followed this mode did not care to clip their locks a second time.

Formerly lay stress on having a well groomed head, we are still a long way behind Paris in this respect. Part of this comes from an odd disinclination to wearing transformations—a thing that does not trouble the average French woman a bit.

Eyelashes and Eyebrows. Thin brows and lashes are very of ten the rule nowadays. A tendency to dress the hair so that it covers the eyebrows is in many cases responsible for this, for it is bound to wear away the eyebrows and impede their growth in time.

Very straight eyebrows are not pretty, but you can improve them if you take a little trouble. This is the way recommended.

Apply a little vaseline to the eyebrows then carefully manipulate them with the fingers, twisting them with a

Germans Imitate Trade-Marks of Neutrals To Hold Their Commerce

Scrapping Their Dies of "Made in Germany," They Have Created a Flourishing Traffic to South America and Thence Back to British Markets in Articles Apparently the Product of Neutral Firms.

(N. Y. Herald)

London, Nov. 18.—By no means the least interesting chapter to be written of the European war is that concerning the commercial machinations by which Germany has been blinding trade defences calculated to counteract and undo the economic pressure placed on her by the Allies, writes a commercial correspondent who has had long experience in dealing with the business houses of Germany.

As the war advances, he says, the secrets of the careful devices of the German war lords in the commercial arena are leaking out and the Allies are beginning to see what tremendous and unscrupulous forces have been organized against them.

There are, broadly speaking, three main descriptions of commercial conspiracy which Germany is using in the present war to prevent the strangulation of her export trade. The first device was to have ready and waiting secret agents as employees in the great number of works on the enemy side of the frontier, which in the early conquest of territory would fall into German hands.

This was projected two, and even three decades ago, and the German officers now controlling the output of the many mills, factories and iron-works in Northern France and in the eastern-area of the war have, as expected, Germans in the pre-war period, been fulfilling the orders of the German War Staff as directly as any commandant to the field. Secondly, German undertakings in foreign countries which cannot be traced to the true quarters, are far more numerous than has been supposed.

The substitution and flagrant defiance of the merchandise marks set of all countries is being practised most skilfully and extensively by Germans at the present time. German houses have been only too happy to "scrap" the dies with which they have previously stamped their goods "Made in Germany."

The marketing of the numerous "fake" English and other commodities thus produced by the German factories is effected through neutral countries. Germany has neighbors whose frontiers are guarded in a military sense, whose commercial defenses are never open for the assistance of the Hun merchants and their hirelings.

There is a flourishing trade flowing at the present moment from Germany to South America, and thence back to British and other buying markets.

The Belgian government has taken the precaution of passing a law declaring null and void contracts, with which it is discovered, German manufacturers have been blinding hand and foot Belgian tradesmen to compel them to deal in German produced goods for a certain number of years after the war. This has been largely attempted in both Belgium and Holland.

Before the war there had been springing up in Germany chocolate and soap works of considerable size, which were beginning to prove formidable competitors in England. This market, of course, was closed altogether to those exporters on the outbreak of war, but by ingeniously copying the trademarks, boxes and general style and get up of the goods of a number of chocolate manufacturers, the German factories have managed to dispose of quantities of their chocolate through neutral countries. Moreover, they have actually used those chocolate boxes as a means of disseminating German "war news," doubtless with the view of influencing opinion in neutral and also allied countries.

It has recently come to light that boxes of chocolate bearing imitations of the name, brands and trademarks of the well known firm of Messrs. F. K. Callier, of Broc, Switzerland, have been circulated in this way in Russia.

For some time, apparently, nobody doubted the genuineness of these goods, it was only when the fact of their containing German papers came to the ears of Messrs. Callier, who immediately instituted an inquiry, that this further instance of German duplicity was unmasked. The Huns had not been tampering with genuine boxes of Callier's chocolate, but had imitated boxes, wrappers, trademarks and all.

This revelation opens the eyes of many persons to the extraordinary ramifications of the German system of commercial warfare. Germany is certainly developing her organization against commercial defence quite as vigorously and circumspectly as her military dashes against the steel walls which encircle her.

HOW LONG WILL THE WAR LAST?

The War Against Health is Quickly Ended By "Fruit-a-lives"

MRS. DEWOLFE

East Ship Harbour, N. S.

"It is with great pleasure that I write to tell you of the wonderful benefit I have received from taking 'Fruit-a-lives.' For years I was a dreadful sufferer from Constipation and Headaches, and I was miserable in every way. Nothing in the way of medicines seemed to help me. Then I finally tried 'Fruit-a-lives' and the effect was splendid. After taking one box, I feel like a new person and I am deeply thankful to have relief from those sickening Headaches."

Mrs. MARTHA DEWOLFE.

"FRUIT-A-LIVES," the medicine made from fruit juices, has relieved more sufferers from Headaches, Constipation, Stomach, Liver, Kidney and Skin Troubles than any other medicine.

50c. a box, 6 for \$2.50, trial size, 25c. At all dealers or sent on receipt of price by Fruit-a-lives Limited, Ottawa.

any member of our Association who may become incapacitated or who gives up his life for our country. I am, yours truly,

T. W. R. ELLIS, No. 41,000. Fredericton, N. B., Nov. 19th, 1915.

WEDDINGS.

Woods-Wilson.

A quiet wedding was solemnized at the home of Mrs. Jas. Wilson in St. Stephen on Thursday, the 4th inst., when her daughter, Miss Florence Wilson was united in marriage to Mr. Charles Woods, of Chatham. The ceremony was performed by Rev. H. S. B. Strothard, of the Methodist church.

"HUSKIES" FROM YUKON FOR SERVICE WITH THE FRENCH ARMY AT FRONT

Pack of famous Memaluke dogs from north are Yukon man's contribution to the cause.

Victoria, B. C., Nov. 19.—Canadian enthusiasm reaches high water mark here in British Columbia. In proportion to its population this province has given of its sons more than any other province of the Dominion, and in addition its recruiting stations have sent forward the enthusiasts from the Yukon who at any cost of personal hardship insist upon doing their bit for the Empire.

More than two hundred have come down from the sparsely settled north, and more are coming. The government does not pay their way in. The expenses of travel and equipment paid by Mr. J. W. Boyle, president of the Canadian Klondike. The others have come "on their own."

British Columbia's boast is that it is the most loyal part of Canada, meaning by this the most English and therefore most loyal to the Empire. Victoria, the capital, is the centre of this sentiment. Victoria is making good this boast, but Victoria is not alone. There are towns and villages at the north now populated only by aged men and women and children because every man of military age has joined the colors. Not content with sending its men, the Yukon country has made another contribution to the cause of the Allies. "Scotty" Allen has sent his pack of Memaluke dogs, known in the vernacular as "huskies," for service with the French army in operation where snow dogs may be of use.

More than one hundred of these have been sent forward to Calgary to be shipped with the next Canadian contingent. The racing of dog sleds is the great winter sport at Dawson. "Scotty" Allen, one of the most famous drivers, has the best dogs in the Yukon country. They came down in charge of attendants, who give them all the tender care given to race horses. "Scotty" has contributed his mite, full measure and running over. Victoria is also sending over the eyeing brand of Scotch. This is its new regiment of Highlanders. It is a brave lot. I have seen this outfit on parade and will be surprised if it does not surprise its Scottish compatriots quite as much as it does any enemy contingent it may meet.

It is difficult to imagine, for many of the Yukon and North Country men are in it, but with the great majority knowledge of Scotch is strictly liquid. Its comradeliness is the distinguishing characteristic of this battalion of British Columbia Highlanders. In its ranks are Americans, Englishmen, Italians, Russians, Irishmen, Galicians, Hindus and half castes, with now and then a real Scotchman to give it a touch of verisimilitude. However, it is essentially Canadian, being perfectly representative of the population of the Canadian Northwest. One of the Americans, who showed me his honorable discharge from the United States Army, said that more than 90 per cent of the men were Americans, not Canadians of American birth but American citizens, who have enlisted here in Canada. Many of these men have seen service under the Stars and Stripes. A Seattle man just in from Calgary, where one of the largest training camps is located, told me that the American contingents are regarded as the fittest and most promising that have been seen in the country. It may be so, but it is exceedingly difficult to discover any difference between Americans and these Canadians of the Northwest.

Will Your "Boy" Spend Christmas "Somewhere in France"? Then help him spend it Merrily!

Nothing is too good to send to the boys who are serving King and Country. But let our gifts show thought and judgment as well as goodwill and love.

Among the few really acceptable gifts—smokes and pipes, chocolates and sweet biscuits, fountain pens and tooth brushes, toilet and shaving supplies—the Gillette Safety Razor ranks as a warm favorite, for one of the real luxuries of trench life is a clean, comfortable Gillette shave.

It's a luxury the lucky ones share with their pals, so send along plenty of extra blades. If he has a Gillette already, a few boxes of blades will go far toward making him the most popular man in his Company.

Welcome as it is on the firing line, the Gillette is even more keenly appreciated in the hospitals. With it the wounded can shave themselves safely, easily and regularly. They certainly do enjoy the Gillette—and Doctors and Nurses can scarcely speak well enough of it.

Gillette "Bulldog" and Standard Sets cost \$5.00 each—compact Pocket Editions \$5.00 to \$6.00—Combination Sets, including Soap, Brush, etc., \$6.50 up. If you wish it, your Druggist, Jeweler or Hardware Dealer will arrange delivery through us, at the Front, of the Set you select, without shipping expense to you.

Gillette Safety Razor Co. of Canada, Limited

Office and Factory: GILLETTE BLDG., MONTREAL.

SIR WILFRID'S SEVENTY-FOURTH BIRTHDAY

Special to The Standard.

Ottawa, Nov. 19.—Sir Wilfrid Laurier tomorrow celebrates his 74th birthday. The great number of congratulatory messages which he has been wanting to receive in recent years from friends far and near, will no doubt be more numerous tomorrow than ever, for his health seems to steadily improve after his operation several months ago, and he is apparently some distance yet from the termination of his long and useful career in the public service of his country.

He will go to his office in the morning as he has been doing every day lately, and in the afternoon at his home with Lady Laurier, he will receive a host of birthday callers.

It is understood that Sir Wilfrid has abandoned the southern trip which it was thought he would take this fall or winter.

REAL ESTATE RECORDS

Saint John County

G. H. Evans to Wm. Lawson, \$1, property at Martenon.

S. H. Ewing et al to R. K. Cameron, \$1, property at Simonds.
