[FOR THE PROVINCIAL WESLEYAN.]

The Nurserv Fire. I am sitting by the hearth-stone.

At the twilight's shadowy time And I'm thinking of the faces, That were round it in lang-syne. There were some I saw in infancy, Which now have passed away ; Some, I would give a world of hope, To look upon to-day.

"I often try to picture How they looked upon me then But ere I could have lisped a name They fled from mortal ken. I know that for each starry brow A crown of life is won'; And dare not murmur that so soot Their earthly work was done

But oh, when I feel lonely, And sad among the rest-How do I yearn to lay my head Upon my mother's breast. She was the first fair flowret To bless this dear old home The first that bloomed in loveliness The second sadly gone.

For one, by one, from the old hearth. A face was missed for ave ; Some, lenda light to other homes, For some, we look on high. I'm sitting here to-night with those, Who watched thom in their bloom Wondering if we shall be missed. Or flit like them, full soon.

I'm wood'ring if in coming years, Within this dear, dear home-Another race shall call it theirs. And all of us be gone I cannot bear to think of this, A holy place it seems ; The room whence fied a spirit home, Where ended earthly dreams. A holy place ! a saint of God "Here met the conqueror death. And shouting vict'ry through the Lamb, Yielded his parting breath.

I could not bear that stranger feet, Should come, and go at will ; Where, with a sacred influence, His mem'ry lingers still. I trust 'twill always be-our home, While one fond heart is left

In which enshrined with holy things, Ilis treasured name is kept. I trust that years, long years to come May find the hearth kept bright, And those, who love each other now. Still clust'ring round its light.

### Angels.

The shadowy forms are hovering In the air around us spread, And we feel their hallowed presence. In the daily paths we tread ; Their soft eves are kindly glistening Down in many a golden beam : Theirs the hands that gently scatter Heavenly roses on our dreams

Richest gems of thought they bring us From their far and distant home-Though they often make us sadder. We are better when they come. And they wave sweet spells of music O'er troubled hearts to glide And uphold souls almost sinking Down in life's cold rapid tide

They sustain, and cheer, and comfort. When our spirits fall and shrink, Save us from the dark abysses When we tremble on the brink Soft they chide when fiery passions Would our hasty bosoms stir., They grow sad and deeply sorrow When our human spirits err.

Low they speak in soothing whispers. When in grief we bend and moan And soft they bear us messages From the sainted loved ones gone They can still the fever burning In our sickened, weary hearts-They unclasp the crystal fountain Whence the cooling tear-drop start

They in-weave the costly pleasures. That our deeper spirits know, And tune the crushed and bruised heart-Thrilling with a secret woe. Of our better thoughts they waken All that's pure, and high, and true. And they prompt the kindly impulse Of the little good we do.

O, they bring us daily visions Of a world more pure and fair. While their sweet, low voices whisper God, and love, and home are there. They still keep a deathless vigil At the portals of the soul- 1 They that tread the angry tempest, When the waves of trouble roll

Through the vale of gloomy shadows Safe our fainting souls they bear, While the tuneful songs of heaven Soothe us in our passage there. O. how rich, how high, how precious, We must be in God's pure sight, That he sends us guardian angels From his realms of fadeless light

occupied a seat near the G. W. P. By dis-promote the great and good cause with which law in any case, against any person or owner of rule of action never to make the soil less occupied a seat near the G. W. P. By dis-pensation the officers and brethren of the pensation the officers and brethren of the Division were permitted to sit in regalia. The large room was well filled, and alto-gether the scene was cheering and imposing. The determined the scene was cheering and imposing the laws of the United States, and in accordance is scene was cheering and handwas course—for your growth in the scene was cheering and handwas course—for your growth in the scene was cheering and handwas course—for your growth in the scene was cheering and handwas course—for your growth in the scene was cheering and handwas course adjournment, and, taking their stand a short all the virtues that adorn the Christian-and for for sale, but kept for the private use of the per- too large an amount of injurious matter your joyful entrance into "that haven of rest, son so importing them. Will any person who where sorrow is never known, and where love reads the law; deny this? And the only arbi-The importance of a deep soil is great, try principle of the law is, that it does not pro-vide a class of legalized agents at every turn, to where that soil can be composed of proper tempt the unfortunate, and decoy the unwary to ruin; and it punishes those who would inflict. All the seasons I have ever heard or read such injuries upon others ; while the law leaves in favour of deep soils, have, in my opinion every one free to gratify his own appetite ; with possessed weight. But many, taking it for this difference, however, that he is required to granted that deep ploughing will produce furnish the means for his own gratification, withdeep soils, have sought to bring about that out the accommodations which the license system affords. So a person may swallow arsenic, drink end so speedily, that the meagre crops which sulphusic acid, or any other poison that may suit they have gained after pushing down the his taste, and not be liable to punishment by plough has damped their ardor, and some any civil statute ; but the law regards his act in of them perhaps have said that " the newsa very different light, when he attempts to admi papers are all full of falsehoods." nister a similar does to another than himself.

only know how .- C.r. N. E. Farmer.

O ! trim me up, or cut me down

And reared a prouder head.

Full sixty years the wintry blast

And Autumn's scorching sun

But now my days are run.

Have beat upon my spreading brow,

Beside this road I've lived and grown,

But ruder hands my boughs have seized

And dropped my fruit for all :

To weary souls my shade I've lent

From branches thick and tall.

And tore them fierce apart :

Nor saw my bleeding heart.

To many a bird I've given a nest,

And reared their tender young :

But sadly have my limbs been bruised

Old age, I know, would fain complain

But cease, my voice, my heart is weak,

And boast its pristine power ;

Behold my limbs, the hoary moss

I'm but a cumberer of the earth-

My fragment branches yet point up,

My bed invites the plough.

But weak and barren are ;

I've needed better care !

O ! trim me up, or cut me down-

Is thick upon them now ;

My day is but an hour.

When stones were at them flung !

The old tree sadly said ;

-----

The Old Tree's Lament.

When young I had a handsomer form.

It is quite evident, from the special pleading which has already been employed on the subject, ing, that the fears of a certain class are beginning

reform in this direction, will not be amongst the least benefitted in the end; while thousands of the victims of appetite, and the more wretched than widows and orphans, would hail such an

# Agriculture.

# Ploughing---Deep or Shallow.

Almost every man who takes up the pen, in these days, advocates deep ploughing. However, it is unquestionably true that there are two sides to this, as well as to gard to the depth to which the ploughman should put down the plough. These circumstances are of great importance sometimes to young farmers, who are under the necessity of making yearly payments for farms which they have purchased partly upon credit Take, for instance, an old farm, which

has been subject to shallow ploughing and iong cropping and use without much manure. Such land generally has a subsoil which is in a very poor state, while the active soil is very shallow. Much land may be found of gratification of initiating into our Order, many serve them from the snares of this insidious foe; this kind, where the active soil is not more brethren, of whom a large portion were military men :---of these last, 90 have joined us within pernicions effects were produced. They would very moor : while the subsoil is cold and very poor ; while the subsoil is cold and unfit to favour vegetation.

It is this class of farms which are, in the defence in order to preserve the subject of their

Well, I am of the opinion that the un-

The deputation appeared shortly after the useful and happy course\_for your growth in the laws of the United States, and in accordance because there is too deep ploughing for the amount of the manure, or because there is amount of the manure, or because there is of fragments of wood, small broken pieces to devote his remaining days to prison laof the branches, or leaves, or other parts of bours, and have already commenced a subthe tree. If we could examine it chemical- scription to that end. Would it were larger by, we should find yet more strikingly that |-n o t for his sake, so much as for the honour it was nearly the same as wood in its com- of the town in which he lives and which he position. Perhaps, then, it may be said, has served so well .- English Paper.

the young plant obtains its wood from the earth in which it grows? The following experiment will show whether this conjecture is likely to be correct or not. Two hundred pounds of earth were dried in an oven, and afterwards put into a large earthen vessel; the earth was then moistened

with rain water, and a willow tree, weigh- Per Moro Castle, Micmac, Bioomer, and Steamer Niagara ing five pounds, was planted therein. Du-ring the space of five years the earth was carefully watered with rain water or pure water. The willow grew and flourished, and to prevent the earth being mixed with We advise them to consider the old sayand to prevent the earth being mixed with

"A little learnidg is a dangerous thing," and to prevent the earth being mixed with and plunge their heads deeper into the study of that greatest and most becessary of all sciences, the science of agriculture. There is no great difficulty in accom-plishing anything that we desire to, if we only know how.— C.r. N. E. Farmer.

and, on-being weighed, was found to have A large Stock of Gents Paris Silk Hate, gained one hundred and sixty-four pounds. And this estimate did not include the weight of the leaves or dead branches which in five years fell from the tree. Now come the application of the test. Was all this obtained from the earth? It had not sensibly diminished; but in order to make the ex--had gained one numeric and exception the offers at very low rates, and invites particulate to the product of the space of time was not obtain-rained in this space of time was not obtain-transfer to the space of time was not obtainbelieve to repeat our question,—" Where does the wood come from ?" We are left with only two alternatives; the water with which it was refreshed, or the air in which it lived. It can be clearly shown that it was not due to be well and the state of the state are required to make immediate payment to JANE CORNWALL Adver-A whip-stick or my flowers they craved, was not due to the water ; we are, conse-wonderful conclusion, it was derived from

the air. Can it be ? Were those great ocean spaces of wood, which are as old as man's introduction into Eden, and wave in their vast, offer and solitary luxuriance over the fertile hills. and plains of South America, were these all obtained from the thin air? Were the particles which unite to form our battle ships Old England's wall of wood, ever borne the world about, not only on wings of air, but actually as air themselves? Was the firm table on which I write, the chair on which I rest the solid floor on which I write, the chair on which I rest actually SEEDS. 1852. I rest, the solid floor on which I dwell, once in a form which I could not as much as lay my finger on, or grasp in my hand?
