Have we not public clargymen, lawyers, dectors, note and agents? The capital which was invested in educating them, and of which they during the legitimate fruits, is beyond the reach of any creditor. It is their exemption, and calculated at a money value, far exceeds even the most liberal scale a wanded to the agriculturists in the United States. There can be no violation of morality or justice in suffering a farmer to record a Homestead mortgage for \$500 on his farmthe act is performed publicly and openly the in formation available to any subsequent creditor. It injures no one, but it creates a home feeling and sense of security and happiness, which materially conduces to the well-being of individuals and the safety of society.
