In France much anxiety still existed with respect to the formation of a new Ministry.

—The Telegraph furnishes no further intelligence of interest, but we may look for fuller defails to-day.

In another place will be found the telegraphic report of the news by the Royal Mail Steamer America.

The only item of the slightest interest is the announcement that the Russell Ministry is successfully getting through public business, and that the Income Tax is to be continued, but, from a somewhat obscure hint in the report, we presume in a modified form.

Papal of Anti-Papal League to be formed in England, we confess the language of the report is so muddled and contradictory that nothing can be made of it. First it is said to be Papal, and then Anti-Papal—and then the word "See" is used: what it means we know not. Some people seem to entertain alarm east the foreigners congregated in Lou-ion should make an insurrection during don should make an insurrection during the great Exhibition. If any people should be foolish enough to contemplate, or attempt such an act, their punishment will be ferrible; military execution on the spot will be the least they can expect, if they escape the fury of the exasperated inhabitants of the of the exasperated inhabitants of the city and country. The Government are prepared for such an emergency, and, without doubt, have full information.

It, therefore, appears to me, that the Protectionists will play a sure game, if they bring forward a well-considered amendment, and it will non plus the Minister, as he cannot hope to carry a majority with him, seen if he mere so indiscreet as to oppose it. Under these streumstances, the fate of the Bill and the Ministry upon this question alone is very precerious, and it seems to me evident that Lord Stanley and his party can take the exists of general whenever there think the crieff, a distinguished Scottish Judge, and of Sirvers. take the reins of government whenever they think it time to do so.

The Budget being now definitely fixed for this

evening, "unless some new unforescen event supervenes, Parliament has occupied itself with variety of matters to fill up the interval, many of them of pregnant important subjects.

Lord Lyndhurst, who has again turned up the House of Lords, and has spoken on two casions with all his wonted vigor and sweetess of tone, has made out a strong case for in terference against the political refugees now assembled in London. Not only are these men collecting money, and bringing together "men of action," but in the London Police Courts they have been accused of meditating a plot to set fire to the docks! Of course these "glorious friends f freedom" ought to be allowed full swing, the fallest extension of Democratic liberty, and he must be a foul tyrant who would impede and cirumvent their designs. The Secretary of State has however, got his eye upon them, and, although should regret to see the Alien Bill renewed, it mpossible to suffer M. Ledru Rollin to make London the scene of his conspiracies.

Last week Mr. Anderson made an awkward attack upon Free-Trade, on the question of the Differential Spanish Duties. Mr. Moffatt, another Free-Trader, seconded the motion for imposing retaliatory duties on Spanish produce and ships. Lord Palmerston and Mr. Labouchere could offer no excuse for Spain, but the motion was rejected, Mr. Anderson having voted against his own proposition. House or Assement, bith April, 1851.

Whereas the attention of this House has been called by a Message of His Excellency the Lieut. Governor to a Despatch from the Right Honorable Earl Grey, Her Majesty's Principal Secretary of State for the Colonies, with several Desuments accompanying the same, relative to the Railway formerly proposed between Halifax and Quebec, upon which it is desirable that the immediate action of this House should be taken; therefore, Resolved,—That this House fully responds to the sentiments and opinions expressed by Farl Grey in hir Despatch to Lord Eigin, dated 14th March, 1851,—"That the construction of a Italiway from Halifax to Quebec is calculated greatly to advance the commercial and political interests both of the British Provinces of North America, and of the Mother Country," and "that the time has at length arrived when this great National Enterprise may be undertaken;"—but they learn with regret that in a work now admitted to be of "such great importance to the British Empire," Her Majesty's Government is not prepared to contribute any portion of the funda necessary for its construction, and should, as a condition precedent to the Imperial Guarantee, require these Colonies to pledge their whole available Revenues to build the same at their own expense.

Resolved,—That while this flouse will adhere with strict fidelity to the placese given to Her Waisety by the Joint Address of the Houses of to darken the perceptions of the rest of man and The papers announce the demise of Lord Mon-crieff, a distinguished Scottish Judge, and of Sir

—So far as the unequivocal declaration of the French Ministers, and the vote of the Assembly, can affect the law of Frence, it is now agreed that the electoral law of May leaf, and not universal suffrage, is to regulate the election of Presench in the Assembly to abrogate the written constitution, which direct universal suffrage; but they do not go further than to declarate their dissent from the interpretation put upon the law by the Assembly, and some fine day Louis Napoleon may do the same thing. It is very evident that in the departments the Reck are most active. In the Nievre the leaders of the party have the greatest difficulty in preventing a premature rising. At Lyons, St. Etienne, and the great manufacturing towns, the people are not generally employed, discontent is on the Increase, and at such moments the Socialists find it an easy matter to bring over vast masses to their opinions.
