NO. 1172.

Equitable Fire Insurance Company of

COPT.] Office, 26 Cornhill, London, July 23, 1852.

A Ta Meeting of the Court of Directors of the EQUITABLE TARE INSURANCE COMPANY: beld July 23rd, 1852.

Resolved, That the Court having learned by report from America, that an extensive Fire occurred at Montreal, on the 8th inst., and although no particulars are yet received, there is reason to fear that it has involved claims of more than ordinary amount upon this Comgany, the Court therefore request that the Local Directors at Montreal will promptly proceed to the adjustment of any claims which may arise from the said Conflagration, and draw upon the London Office for such amount as may be sufficient to enable them to pay such claims in full.

A true extract from minutes.

(Signed)

HUGH CROFT, for the Board of Directors.

VOCAL MTSIC. JOHN RUSS, Teacher of VOCAL MUSIC, respect fully begs to inform his friends and the public that he has been induced to appropriate a portion of his time to the instruction of Private Papils, on the following terms: one-half payable in ad-

For 1 Pupil per Quarter, 2 lessons per weck, £1 10s.

Application may be made at Mr. M. W. Skinner's or at Mr. Wiliam Heard's, Charlottetown.

He would farther intimate that he is prepared to open Schools throughout the Country; he would therefore beg leave to suggest to persons decirous of aquiring a knowledge of this useful and pleasing Science, the propriety of an early application. All letters (post paid) will be punctually attended to.

Also, on hand and for sale, a quantity of MUSIC BOOKS, GA MUTS, &c., &c., adapted to the wants of persons studying Music Charlottetown, August 2, 1852.

TO PARENTS AND TEACHERS

TO PARENTS AND TEACHERS
SCHOOL BOOKS

THE Subscriber has since his entering into the stationery and book business commenced by his father, endeavoured to furnish and keep up a supply of suitable School Books; and while he has kept in view the difficulty experienced by Teachers, in changing from one book to another, occasioned by a want of uniformity in the series of works in use, he has studied to improve those formerly used; and in adopting new ones, has been guided by the leading members of the Board of Education, and some of the best teachers who have given their sanction to his publications. Many of the books imported from the Mother's Country, being found to be too expensive, and the reprints from the neighbouring provinces, not only incorrect, but badly printed, it was thought than attempt to print some of them at home, might meet with success. In order to be able to sell the books at a price within the reach of the bulk of the people, a first number of each work has been printed of those books in general use. The Irish national series, imposted by the Buard of Education as one of the cheapest ects of books that could be procured, has been taken as the basis of the series of books now reprinting. They have been made appliesble to the circumstances of the country by alterations only in such passages as have appeared to require them. In order to suit them to the locality of the Island a fuller and more correct abstract of the Geography of North America, has been substituted, and several shight errors in Spelling and Grammar amended.

The books already published are—
Murray's Second do, with an appendix from Professor Sullivan's Spelling book,
Irish National Second, Third, and Fourth books,

Agriculture.

No. 5.

TO HIS EXCELLENCY THE LIEUTENANT GOVERNOR OF PRINCE EDWARD ISLAND. MAY IT PLEASE YOUR EXCELLENCY;

OF PRINCE EDWARD ISLAND.

MAY IT PLEASE YOUR EXCELLENCY;

I have now to present a summary or digest of the means preposed to improve the Agriculture of Prince Edward Island and greatly advance the general interests of trade, prosperity and commerce: in doing so, your Excellency will please to consider, that it is not assumed to be perfect; but as an elementary outline of an intended provision to meet the peculiar circumstances of the Island, a sort of 'bill' brought in (without permission) to meet the exigencies of the country, to be amended and moulded 'in committee;' subject to this explanation that such an establishment will answer the following valuable purposes: —

1. It will immediately, beneficially, and profitably employ a large amount of labour, in collecting and preparing the organic matter that now lies utterly useless in the sea and on the land; but by such labour will be rendered conductive to the agricultural improvement and enrichment of the country; the capital employed will immediately circulate through all the channels of trade, and the highest inte es be paid for its use.

2. It will, when brought into full operation, greatly increase the amount of the circulating medium of the country, and thus increase the facilities of trade, and secure the more prompt payment of debts.

3. It will greatly improve the 'Fishery'—secure a constant good Fish-market in Charlottetoyn, and will reward the fishermen, as, whether the price I have fixed is enough or not, we can afford to pay them as much as can be required.

4. It will create a sound security for small capital, in transferable shares, paying the highest interest allowed.

5. It will supply the farmer with what he most needs to make his farm profitable—a supply of situable manure for the growth of root crops, and to improve the staple of the soil—of the best available kind—in the most useful form—at the lowest possible price, and on the easiest terms of payment.

6. It will drad a sound practical instruction, in farming, to the rising generations as

lection and preparation to be much better employed in p.eparing his land for the crop.

9. It will enable the farmer to breed and rear a much larger quantity of stock, in much better condition, making them eligible for sale, at least two years earlier than now, and of much larger weight and better quality; at the same time to manufacture a constantly increasing dunghi i for the growth of grain.

13. It will provide the means by which capital may employ laboar in recovering exhausted soils, and thus introduce an agricultural aristocracy, so much needed to develope the fenefits of agricultural aristocracy, so much needed to develope the fenefits of agricultural aristocracy, so much needed to develope the fenefits of agricultura to the community, and render it tenfold more profitable to the small farmer and the labourer, by opening markets for lean stock and labour,—and also by encouraging the immigration of that class of farmers who are better able to feed stock and employ labour; it will enable the farmer to grow, freely, substitutes for the potato, which appears to be doomed, by an all-wise Providence, to a still more protracted inhibition; perhaps, to avert similar calamities that resulted from their too general use, in the land that bears their name, in which it contributed very largely to foster indolence and disease.

and disease.

11. It will enable the farmer to pay his rent, and prevent him dreaming about an Escheat Representative, who will be as little desir.d. and as little needed as the Sheriff's officer or the Weevil.

12. And list not least, it will enable the proprieter to sell his property, whether exhausted or unschausted; and if he will take, in good part, a few hints from a friend, it will enable him to recover his respected con little a property.

in good part, a few hints from a friend, it will enable him to recover his respected condition amongst his tenantry and prevent the miserable dilapidation which he suffers, without rebute, on his property—both its treasures and its ornaments—devastation, sterility and poverty, that makes even a stranger weep to look at it.

These high expectations, your Excellency, are not expected from a compost-manure-heap, in its mere abstract power of enrichment, but as setting in operation a radical practical principe, that once set fairly agoing, will be expand the agricultural energy, by immediate profitable results, as will, I believe, fully accomplish what some cool calculators may, perhaps, consider utopian; but when fairly inquired into and duly estimated, my observations and descriptions will not be found enthusistic. I am not promising or expecting the end without the use of the means, it is therefore I appeal to your Excellency; but I do expect the end to be accomplished, where the means are employed—I have seen these means successfully used, and therefore, an confident in like results.

results.

The ingredients I have selected to prepare the manure may not be the best, but I think they are the best we can get at, at present;

The ingredients I have selected to prepare the manure may not be the best, but I think they are the best we can get at, at present; and as it respects the prescription, the relative proportions may need a little medification; and as it respects the cost, I may not be perfectly accurate; but I believe I am sufficiently so to form a sound estimate of the amount of money required to bring the whole into operation, and that one thousand pounds will supply the outifi, and two thousand pounds a sufficient workin, capital. I have not mentioned the income that would accrue as granny rent and working charges upon the manure, without increasing the price beyond my stipulation; and together it may be made to pay its way in perfect safety, and pay abundant interest—the money beingonly required in sn all instalments, spread over two years.

I now take my leave of your Excellency, as Gevernor, and request you to hold a court, in the capacity of Lord Chancellor, at which I will next week enter a sult, praying certain injunctions upon certain parties, whose present con-luct is highly detrimental to the interests of agriculture in Prince Edward Island.

I beg your Excellency to entertain an explanation of my motives in troubling you. I believe, I represent in my family and friends, the class of persons you most need to help the country in its agricultural advancements, and, in that relation, speak out my sentiments plainly; but I hope, respecially tell you our wants. I do not run petulantly away from your shores and proclaim the nakedness of the land up and down the onigrant countries, as many have done. I believe i, to be good land, and I am not at all afraid to commit myself to its interests, if I can see the means (the raw material) by which the machinery can be worked to full time and fall profit. I have endeavoured to set before your Excellency the wants and their supply, and shall leave the subject, in satisfaction to my own unind, in attempting to arouse the public mind to the public interest; and with sincere goodwill t

from whom I have recentled a part of it,
ad a part of it,
I remain, most respectfully,
Your Excellency's
Obodient Servant,
H. A. JOHNSTON. King Square, Aug. 14, 1832.

Miscellancous.

To Avoid Colds.—The best way to avoid catching cold is to accusion yourself to the use of aponging with cold water every morning on first getting out of bed.—It should be followed with a good deal of rubbing with a dry towel. It has considerable effect in giving tane to the skin, and maintaining a proper action in it, and thus proves a safeguard to the injusious influence of cold and sudden changes of temperature. Sir Astley Cooper said.—"The methods by which I have preserved my own health are—temper-

ance, early rising, and sponging the body every morning with cold water, immediately after getting out of bed; a practice I have adopted for thirty years without ever eatching cold.'

Novel Application of Galvanic Action.—In the Ma-Novel Application of Galvanic Action.—In the Madras Spectator, September 18, it is stated, that a person in that town has discovered or substance which he calls fibre (what it is remains a secret), which, under galvanic action, contracts suddenly to one-fourth of it length, 'its power being equal to 100 lb. on every square inch of its sectional surface. 'The inventor has constructed a model engine to show the application of the new motive power. A reciprocating beam attached to an ordinary crank, with fly-wheel of about four feet in diameter, is fitted at each end with a cylindrical piece of the fibre, insulated by a plate of glass. Near the frame is a small galvanic battery. Operations are begun by giving a shock from this battery to one of the pieces of fibre, which immediately and violently contracts, drawing the beam down on that side, and of course communicating motion to the c.ank and flywheel. So soon as the centre has been turned, another shock given to the opposite piece of fibre continues the motion; and the shocks being alternately repeated, the fly-wheel soon gains an enormous speed.—Architect.

Mosaic Golden-Architect.

Mosaic Golden-coloured scales, very soft and glossy to the touc's, readiful golden-coloured scales, very soft and glossy to the touc's, readiful yrubbed between the fingers, and when the colour is brought out by a little friction, having a fine golden metallic lustre; this what is called Mosaic Gold, and is sattensively used for brouging, and by japaneers for gilding ornaments on tea-trays and other wares;—so that here, as in other things, 'it is not all gold that glitters.'

SALT IN MANUFACTURES .-- The uses of salt in manufacture

Salt in Manufactures.—The uses of salt in manufactures are various. It enters into the composition of sal-ammoniac,—of glass,—of oxymuriate of lyme,—of corrosive sublimate,—of Glauber's ann Epsom salts,—and of painter's patent yellow,—and it is used in bleaching,—in glazing earthware,—in assaying metals,—in case-hardening steel, anp in rendering iron malleable.

VEGETABLE SERPENT.—According to some Italian journals, a new organized being has been discovered in the interior of Africa, which seems to form an immediate link between vegetable and animal life. This singular production of nature has the shape of a spotted serpent. It drags itself along the ground; instead of a head has a flower shaped like a bell, which contains a viscous liquid. Flies, and other insects attracted by the smell of the juice, enter into the flower, where they are caught by the adhesive matter. The flower then closes and remains shut until the prisoners are braised anp transformed into chyle. The indigestible portions, such as the head and wings, are thrown out by two aspired openings. The vegetable serpents has a skin resembling leaves, a white and soft flesh, and instead of a bony skeleton, a cartilaginous frame, filled with yellow matter. The natives consider it delicious food.

Horses Killed by Bees.—A curious circumstance occurred a few days back at Guileville, Euro-et-Loire. A small farmer had in a field about 250 beclives, containing a vast number of bees. He cent a man with a cart, drawn by five horses, to remove some earth from the wall near which the hives were placed. The carter having orcasion to go to the farm-house, tied the horses to a tree. Almost immediately after, a multitude of bees, either irritated at the shaking of their hives by the removal of the earth from the wall, or existed by the electricity with which the atmosphere happened to be charged, issued from their hives, as if in obedience to a given signal, and with fury attacked the horses. In an instant the poor animals were entirely covered with bees from head to foot; even their nostrils were filled with them. When the carter returned, he found one of the horses lying dead on the ground, and the others rolling about furiously. His cries attract at several persons; one of them attempted to drive away the bees, but they attacked him, and he had to plangs into a pond, and even to place his head under water for a few seconds, in order to escape from them. The cure of Guilleville also attempted to approach the horses, but he too was put to flight by the enraged insects. At length two fire-engines were sent for, and by pumping on the bees a great number were killed on the horses, or put to flight. The horses, however, were so much injured that they died in an hour. The value of the bees destroyed was 1500f., and of the horses, 2,500f. A few days before, bees from the hives killed 17 goslings.

ELEGANT COMPLIMENT.—When Fonlenelle was 97 years of Horses Killed By BEES .- A curious circumstance

ELEGANT COMPLIMENT.—When Fontenelle was 97 years of ELEGANT COMPLINENT.—When Fortcoelle was 97 years of age, he happened to be in company with the young and beautiful Madame Helvetius, who had been married but a few, weeks: Fortcoelle was always a great admirer of beauty and he had been paying the bride many compliments, as refined as they were gallant. When the guests were sitting down to table, however, he passed her, and sat himself down without perceiving her. "See, now," said Madame Helvetius, "what dependence is to be put in all your fine speeches; you pass on before without looking at me!" "Madame," said the gallant old man, "if I had stopped to look at you, I could never have passed on!"

NEW PROCESS OF MAKING BUITER.-Mr. James Stubbe informs the New Bedford Mercury of a new and simple process of making butter from the cream, which promises to supersede the labour of the churn, at least during the warm season. At his dairy, recently, a quantity of cream that had obstinately refued to become butter under any reasonable or unreasonable amount of "agitation," in the usual mode, was at length emptied joito a clean "salt bag" of coarse cloth and deposited in the ground at a depth of about twelve inches below the surface, to keep cool. On the following morning, it was found that the butter-nilk had entirely separated and disappeared and the butter remained in the bag perfectly nice and succet. He has since frequently manufactured butter by this method with, invariable success, in from six to twelve hours. As an effectual preventive of any earthy taste becoming imparted, to butter, he suggests that the bag containing the cream be placed in arother bag of cloth of the same material. The value of the discovery may be easily tested. ris dairy, recently, a quantity of cream that had obstinately covery may be easily tested.

Rogues generally die poor; what they make in cheating being spent on pettifoggers and law. Out of a dozon scamps who commenced business ten years ago, nine are now in Blackwell's Island, and the other three in the Alms House. "Chat'i is a good horse for a short race, but he lacks bottom for a long run.

The Dutch have a singular contrivance to cure laziness. a pauper, who is able, refuses to work, they put him into a cistern, and let in a sluice of water. It comes in just as fast, that by briskly plying a pump with which the cistern is furnished, he keeps himself from drowning.

The Multiplication Table was invented by Pythagoras, the Grecian philosopher, 528 years before Christ, and is therefore 2,380 years old.

English Mail of July 31.

ENGLAND.

ENGLAND.

THE NEW HOUSE OF COMMONS IN ENGLAND—THE DERBY MINISTRY.—Taking these three elements of discord into view,—I, the Peclites to be tre-tred with; 2, the Palmersten party, however small, to be conciliated; and 3, the Lacasses, Duffys, Bradys, and MacGuires to be bought over, may we not well say, that to bring this 'liberal majority' into the form of an administration, will prove a task even exceeding the temerity of a Russell!

But, it is saked, 'if the majority cannot carry on the government, how is the minority to do it?

We again repeat, that we do not admit the fact, that Lord Derby will be in a minority. But, should it even turn out that he has but 305 votes in the new House of Commons, we met the question by this plain answer: He will carry on the government, as a pub-

lic daty, because he will be at the head of the strongest party in the House. Let the House of Commons consist of:—305 Conservatives, 15 Pecilies, 180 Whigs, 85 Radicale, 45 Irish Brigade, 25 Neutrals—it may and probably will be found, that no other party but the conservatives can carry on the government; and in this state of things it may become a plain day, obvious to all and desied by none, that Lord Derby and his cabinet should, amidst whatever difficulties, abide by the belm and steer the venset through what all admit to be a very intricate and dangerous channel.—London Herald, Ministerialist.

Accounts received from Scotland and the north of England of the prospects of the harvest, are extremely favourable. Hay has been an average crop. Wheat looks well, and will soon be ready for the sickle. Barley is partially cut, and is above the average. Potatoes though failed in localities, are above an average. Beans are deficient in many places. From the south of England and Iroland favourable accounts are also received.

The clearances from the port of London for the gold colonies of Australia, during the week ending on the 27th alt., had been large. They consisted of seven vessels to Port Philip, of an aggregate capacity of 4,200 tons, and one to Geelong (in ballast) of 331 tons. There was also one vessel for Adelaide, of 335 tons, besides two for Van Dieman's Land, of a joint capacity of 940 tons. Spirits and wines continue to be freely shipped, but the proportion of other go da has not been relatively large. The two vessels to Van Dieman's Land, however, took considerable cargoes. The total number of passengers have not been ascertained, but it was supposed to have been nearly 1000.

THE POTATO DISEASE.

THE POTATO DISEASE.

From all parts of the country we have accounts respecting the reappearance of the virulent malady which has of late years committed such ravages on the potato crop. In this neighbourhood, we regret to state, that the disease has been too fatally manifested for several days past; in all cases it has been unusually rapid in its action, and those tubers which were perfectly sound only ten days ago, have been cut off by the mysterious blight for miles around this locality. When first seen on the leaves, none of the tubers were affected, but gradually the haulm withered and blacksned as the blight descended, and we have observed, that although the potato at first sight appears sound to the eye, it yields to the touch a cream-like liquid, with that species of snowy fungus which marked the disease in former years. A correspondent of the London Times, adopting the signature of 'An Eye to the Potatoes,' in the curse of some admirable observations on this subject, makes, the following remarks:—

'The potatoes again show unmistakable symptoms of disease—

following remarks:—

'The potatoes again show unmistakable symptoms of disease—the leaves and stems appearing withered and burnt, and these symptoms were developed immediately after the great thunderstorm of Friday week last—those-plants alone escaping which were under the shelter of some walls. The same effect was produced upon some potatoes of my own, apparently by the same cause, while residing in Guernesy some few years back; and the present result tends to confirm me in an opinion which I was then led to adopt, owing to the development of the disease appearing to be immediately consequent upon the liberation of a large amount of atmospheric electricity, that the potato rot is due to the formation of ozone, which is an alto-tropic or electric and more active form of oxygen.

oxygen.

Now, as the potato disease has been generally found to be the 'Now, as the potato disease has been generally found to be the precursor of cholera, some of our chemical phil-sophers may be led to put the ozone theory (at least, so far as regards the potate disease) to the test of experiment. Surely nothing would be assist than to ascertain the influence of an atmosphere of came upon a potato plant; and if it could be shown that all the symptoms of the disease can be thus artificially produced, at least we should have advanced one step towards the discovery of a remedy for it, and may be, afterwards, for that more telephone soccurge, the cholera.

cholera.

'Catarrhal complains I find, have been very general among my own friends since the late storms, and that this is an ozonic effect Professor Schonbein, to whom we owe the discovery of the substance or principle itself, has placed beyond zerous between the concretently showed by some experiments performed at Brighton, that ozone is generally present in the breeze blowing from the sea; whereas that coming across the Downs is free from it. Those who have consulted Dr. Farre's admirable map of the cholera in his late voluminous and philosephic report upon the subject, will not have faired to observe, that the places where the pestilence domitted the greatest havec, were mostly either on the banks of rivers near the sea, or on the coast itself; and that in the inland districts the scourge was comparatively powerless.'

AUSTRALIA.

AUSTRALIA.

THE AUSTRALIAN DIGGINGS.—In confirmation of accounts already published, we subjoin some passages from the letter of a settler in Australia, dated 'Twofoldbay, Jan. 4.'

We have had much difficulty is getting our sheep shorn and crops secured. Many of the shearers have been carning 15s. s-day. Those of our men who have left us and gone to the diggings have been every one successful; they have been absent about 12 weeks, and have brought back with them from £80 to £120 each. I visited the Turon digging, in company with my brother. We camped out two nights, intending to try and get as much gold as would make a ring or two for my mother and father. The second evening we found eleven small piecus and some dust, which, together, weighed more than a quarter of a pound of solid gold. The morning after we left, the two men who took our places found one piece weighing more than an ounce, and I have since seen by the papere that from the very spot a party got three little trifles of the respective weights of 15lb., 22lb., and 26lb. The largest of these was sold in Sydney for £1230. * • • • • A friend of mine, who has just returned from Melbourne, told me, that he offered a man half-a-crown to take a letter to the post-office, a distance of a few hundred yards. The 'gent' looked disqueted. 'Why,' he replied, 'I would not take my pipe out of my mouth for that sum.' Another offered a diager a shilling to lift a bag of sugar off his dray. The digger looked at him a moment, and then, putting his foot en a sump, said, 'There, the my shee, and 12l give you five shillings.' The writer then refers to the influence which this state of matters must have on one who is the owner of 35,000 sheep, 6,000 or 7000 cattle, besides a great many horses, and adds, that the only hope of the colonist is, that the unther country will seen out men is thousands, and thus give them some chance of getting servants. Australia has also abundant attractions for sportsmen. The writer says,—We had first-rate sport with the hounds last senson.

EMIGRATION TO AUSTRALIA.—As yet no vessel has suiled from the Broomielaw without its full complement of passengers, and in many cases the berths were taken up immediately they were open, and applications had to be refused. It is said, that of 1500 weavers at present unemployed in Falsely 1200 are desirous of emigrating, representing at least 600 individuals. At the present moment there are lying in the Clyde, engaged in loading, the undermoted vessels, all bound for Australia:—The Grampian, 774 tors register; Earl of Dalhousie, 400 tons; Abrota, 294 tons; Nerns, 202 tons; Courier, 233 tons; Sappho, 388 tons. In addition to this, three others have been advertued—manely, the new iron ship Typhon, 1000 tons register, built expressly for the trade; the new ship Aberfoyle; and the Standard. We may mention that all these ships are of a first-rate class, and the accommodation and fittings are superior. Though the emigration fever from Liverpool and Loudon appears to be a little abated, several vessels destined to Australia having taken off their besths, emigration from the Clyde keeps prefly steady. Among the vessels above-named the Absots, which sails on an early day, is nearly filled up, while in the Grampian, which leaves at a later date, three-fourths of the borths have been already engaged. The emigrants are of the usual stamp from Scotland—well-behaved and respectable. The majority are first-class tradesmen from the country; there is only a slight sprakling of townsfolk.—Glangew Constitutionalist.

The Elections are now over, with the exception of the four vennelses still to be filled—Orkney and Wick in Scotland, and Tyrone and Donegal in Ireland. It is yet a different matter to tell what Majority the Perby ministers will be able to command in the house. The classified lists published by leading papers differ so widely that they can be regarded only as a mere approximation to truth.

The Globs cost adown the number at—Liberals 329, Derby-Dissaclites 283, doubtful 38. The Morning Chronicle estimates thus: Ministerialists 200; Whige and more advanced Liberals 310; Liberal Conservatives or Peclites between 50 or 60. The Daily New Leasifies the members under two heads—"Liberal at 712 Liberal A 712 Liberal

BUFFALO, Aug. 4th.—Judge Devoux of Ningara Co., the richest man in that section, died at the Falls, of cholera morbus pesterday. He was 63 years of age. The deaths in this eity the last 24 hours only reach 13 or 14, and the Cholera is disappearing from the localities where it broke out.

At Charlottetown, on Thursday morning, the 19th inst., at the residence of the Bride's father, by the Rev. Mr. Baine, Mr. David Tavlon, of Pictou, Merchant, to Mandarer, cledest daughter of David Wilson, Esq., Merchant, Charlottetown.

At Tignish, by the Rev. Peter M'Intyre, P. P., Mr. Martin Ryan, Teacher, Kildare, to Catherine, second daughter of Mr. Edward Foley, Kildare, Lot 3.

Mr. Edward Foley, Kildare, to Catherins, second daughter of Mr. Edward Foley, Kildare, Lot 3.

Observany.—Died at Bedoque, P. E. Island, on Saturday the 24th of July, Mrs. Crawford, widow of the Rev. Alexander Crawford, formerly Baptist Minister at Tryon, in the 65th year of her age.

The deceased was a native of Bredalbane, Scotland, but in early life she was removed to Edinburgh where she was converted to God by the powerful preaching of the Rev. James A. Haldane. She joined the Tabernacle Church while yet young, and in 1810, in the 22nd year of her age, she became the wife of our highly esteemed and devoted brother, the Rev. Alexander Crawford; and they emigrated to this Island in the year 1813, In 1828 she and the Churches in this Island sustained a heavy loss by the removal of her deeply lamented husband, to the rest that remains for the people of God; and though burdened with the care of seven young children, she obtained help of God, and by His blessing resting upon her own diligence, she was enabled to bring them up in respectability and comfort, to give them a good education, and to set before them a Christian example.

While our lamented sister was a thorough Scotch Baptist in principle, she was eminently Catholic in spirit, She loved and honored all who loved and honored Christ. Her delight was with the excellent of the earth. She was a kind-hearted and amiable woman, and affectionate and excellent mother, and a consistent and intelligent Christian. A. she lived the life,

honored all who loved and honored Christ. Her delight was with the excellent of the earth. She was a kind-hearted and amiable woman, and affectionate and excellent mother, and a consistent and intelligent Christian. As she lived the life, so she died the death of the righteous. With an abiding faith in the great atonement and finished work of the Lord Jesus, and the sure promise of a God that cannot lie; with a hope that had triumphed over all discouragements, sorrows and conflicts, of this state of suffering and trial, and with a calm resignation to the divine will that made her ready to depart and be with Christ which is far better, and willing to abide in the flesh, if such were the Great Master's will, she sweetly fell in Jesus, and passed without a murmur, a struggle or a sigh, from this wilderness of tribulation and toil, to yonder bright world of bleesedness and reward. Bleased are the dead that die in the Lord from henceforth: yea, saith the spirit, that they may rest from their labours, and their works do follow them.

The body of sister Crawford was committed to its kindred dust on the 27th, in the sure and certain hope of a glorious resurrection to immortal life, at the appearing of our God and Saviour Jesus Christ. The Rev. B. Boulter gave out a hymn, the Rev. John Knox read a portion of the 15th Chapter of 1st Epistle to the Corinthians, and the Rev. Malcolm Ross offered prayer. The funeral sermon was preached mane liately after the burial, to a large and extensive congregation by the Rev. Jehn Knox. The text was from the Gospel according to St. John, xi. 25, 26, ''l am the resurrection and the life,"—&c., and the topics were Jesus, the efficient cause and grand demonstration of the resurrection. I am the resurrection—Christ, the first fruits of them that slept; Jesus the author of permanent being and exalted blessedness to his chosen and faithful saints; He is their life, and they shall never die; and the living and strong consolation with which the subject abounds to all Believers who have lost C the living and strong consolation with which the subject abounds to all Believers who have lost Christian friends.—
Believest thou this !—Communicated.

THIS Institution will continue to be conducted on the same principles which have rendered it so generally popular, and secured for it such extensive patronage from almost every part of these Provinces. It has now been opened and in successful operation upwards of nine years. The arrangements which were made to accomplish the important object for which it had been founded, were such as obtained for it from its very commencement, a very high position in the public estimation. And those, upon whom the direction of its affairs has develved, have been encouraged and stimulated, by its prosperity, to continued efforts to render it, in all its departments, ever increasingly efficient. Every year in its bistory has consequently been marked by valuable additions to its educational facilities, and by more or less extensive general improvements throughout the Establishment.

GREAT BRITISH QUARTERLIES, AND BLACKWOOD'S MAGAZINE.

LEONARD SCOTT & CO.. NO. 84 GOLD ST., NEW YORK. CONTINUE TO PUBLISH THE FOLLOWING BRITISH

THE LONDON QUARTERLY REVIEW, (Conservative.)
THE KDINBURGH REVIEW, (Whig.)
THE NORTH BRITISH REVIEW, (Free Church)
THE WESTMINISTER REVIEW (Liberal.)

BLACKWOOD'S EDINBURGH MAGAZINE, (Tory.) THESE Reprints have been in successful operation in this country for tuenty years, and their circulation is constantly on the increase, notwithstanding the competition they encounter from American periodicals of a similar class, and from the nonzerous Sciencias and Magazines made up of selections from foreign periodicals. This fact shows clearly the high estimation in white they are held by the intelligent reading public, and affords a guarantee that they are established on a firm basis, and will be contisted with the service of the contistency of the contistency with the contistency of the contistency with the contistency of the continuous of the contistency of the con

rantee that they are established on a firm basis, and will be continued without interruption.

Although these works are distinguished by the political shades above indicated, yet but a small portion of their contents is devoted to political subjects. It is their literary character which gives them their chief value, and in that they stand confessedly far above all other journals of their class. Blackwood, still under the masterly guidance of Christopher North, mantains its ancient celebrity, and is, at this time, unusually attractive, from the serial works of Bulwer and other literary notables, written for that magazine, and first appearing in its columns both in Great Britain and in the United States. Such works as "The Castone" and "My New Novel," (both by Bulwer), "My Peninsular Medal," "The Green Hund." and other serials, of which numerous rival editions are issued by the leading publishers in this country, have to be reprinted by those publishers from the pages of Blackwood, after it has been issued by Messra. Scott and Co., so that Subscribers to the Reprint of that Magazine may always rety on having the earliest reading of these fascinating tales.

HUGH STEWART.

August 24, 1852.

Valuable Pasture Lot for Sale,

TO be Sold by private Contract, that beautifully situated plot of ground, the property of John Nicholl, being pasters Lot No. 530 in the Royalty of Charlottetown, comprising 20 acres of excellent LAND with the Büldings thereon. This Property is well enclosed, and for the most part with a dyke fence; and the greater part of it is cleared and under cultivation.

part of it is cleared and under cultivation.

The property can be viewed at any time on application to John Nicholl on the premises.

An unquastionable Title will be made to the purchaser, and possession can be had at once. For terms and further particulars, apply to John Longworth, Esq., Barrister at Law. Charlottetown, Aug. 24th 1852.

FREEHOLD PROPERTY in Prince Edward Island.

in Prince Edward Island.

THE FARM lately occupied by the Subscriber of 100 acres, about 60 of which are within sences, and in a good state of cultivation, with the buildings thereon, consisting of a Cottage, a large Barn and other Out-houses, a Well of excellent water is in the yard. This valuable Property is pleasantly situated within a sew chains of the Public Wharf at Green's Shore, commands a beautiful view of Bedeque Harbour, Northumberland Strait, and New Brunswick in the distance; a large supply of mud suitable for manure is on the premises and a great quantity of Seaweed can be obtained on the shore; it would form a pleasant residence for a genteel family, or for any person wishing to carry on Agriculture, Shipbuilding or Mercantile pursuits. There are Packets running weekly between the above wharf, Shediac and Charlottetown.

ALSO, near the above-named Wharf, FOUR WATER LOTS Nos 1, 2, 3, & 4; each containing 3500 square feet, with privilege to build to the channel, a distance of 200 feet. A good Dwelling-House, Stable and Granary, a well of excellent water with a peam therein, are attached to Lot No. 1, and a Dwelling-House stands on Lot No. 4.

ALSO, on the opposite side of the street, TWO LOTS—Nos. 5 & 6—of 75 by 100 feet each. On No. 5 stands a Dwelling House.

ALSO, on the second street from the Wharf, and fronting North,

House.

ALSO, on the second street from the Wharf, and fronting North,
TWO OTHER LOTS—Nos. 7 & 8 of the same dimensions as
the last. All the above cited lots are well calculated for business
stands either for Mercantile or Mechanical purposes.

ALSO, FIFTY ACRES OF LAND situated on Township No.

stands either for Mercantile or Mechanical purposes.

ALSO, FIFTY ACRES OF LAND situated on Township No.

25, formerly 'Maxfield's Property,' all within fence, and mostly under cultivation, with a New Saw Mill in excellent working order and a good Mill House. This Property is situated in the heart of a flourishing settlement, and commands two good Mill Streams capable of driving a large amount of Mill Machinery.

ALSO, on the same Township, and part of said 'Maxfield Property,' FOUR FARM LUTS of each 96, 82, & 53 acres, unimproved, and 50 acres, 25 of which are cleared; these lots all front on the public Road.

ALSO, all that well-known FARM AND BUSINESS STAND at Indian River, Township No. 18, late the property of William Wallare, of 44 acres, held under lease for 999 years, at an annual rent of One Shilling per acre, with the Buildings thereon, consisting of a DWELLING HOUSE, BARN, STORE, GRANARY and other Out-Buildings. A well of excellent water is in the yard. Twenty acres of this tarm are within fence and under good cultivation; the situation of this property gives to it many valuable advantages either for business or mechanical purposes, it being at the junction of the Indian River, Malpeque, and St. Eleanor's Roads, near to a School and to the Catholic Chapel and in the midst of a flourishing and wealthy community.

ALSO, at Seven Mile Bay. Township No. 27 near the Catholic

of the Indian River, Malpeque, and St. Eleanor's Roads, near to a School and to the Catholic Chapel and in the midst of a flourishing and wealthy community.

ALSO, at Seven Mile Bay, Township No. 27 near the Catholic Chapel, about 30 miles from Charlottetown, TWO FARMS of 120 acres each, on one of which there is a new House partly finished, a large New Barn, 30 x 44 feet and other out-building; these Farms are beautifully situated, fronting on the Strait of Northumberland, with a gradual descent to the shore where an abandance of Seamanure can be easily procured. About 70 acres of each of these farms are cleared and under good cultivation, and each has a piece of Sait Marsh attached to it from which about 6 stacks of hay may be cut; the remainder of the land is covered with wood suitable for Lumber, Fuel or Fencing. A Post Road runs through these Farms enhancing their value.

ALSO, near these two Farms, a FARM fronting on the Post Road, containing 70 acres: it has been but little cultivated, but has a good growth of wood and is capable of being made an invaluable property, the soil being excellent and easy of cultivation, in addition to possessing many of the natural advantages possessed by the last-mentioned farms.

ALSO, THREE HUNDRED ACRES Wilderness Land on Township No. 8, with a public Road and an excellent stream

on Township No. 8, with a public Road and an excellent stream of water running through the tract; this property is well wooded and watered, and is in the immediate neighbourhood of mills.

ALSO, ONE HUNDRED ACRES Land on Township No. 15, at Fifteen Point, part of which has been under cultiva-

15, at Fifteen Point, part of which has been under cultivation to several years.

ALSO a DEED, and all the Subscriber's interest in and to the Farm now in the possession and occupation of Martin Doyle, on Township No. 3, containing 100 acres.

Immediate possession of and good Titles given, with the above Properties: and should they not be disposed of by private Sale before the First day of September next, all that portion of them situated on Townships Nos. 25, 15 & 8, will be sold by PUBLIC AUCTION, at the Mill formerly called 'Maxfield's, Mill,' on that day, at the hour of 12 o'clock, noon.

For further particulars please apply to

(From Chambers' Edinburgh Journal.)

THE LETTER FROM HOME.

BY THE REV. JAMES GILBORNE LYONS, L. L. D.

A youthful stranger walk'd alone,
In a great city's busiet place;
He heard not one familiar tone,
He saw not one familiar face:
He saw not one familiar face:
He tod that long and weary street
Till day's last beam wax'd faint and dim,
But some were nigh to cheer or greet—
Not one was there to smile on him.

He saw before him thickly press. The sude, the beautiful, the prood, And felt that strange deep loneliness Which chills us in the selfah crowd: Ay! though his heart was stern and strong, And scorn'd each soft and wailing mood, lite felt a sore and saddening throng Of doubt and wasting cares intrude.

While yet he mused in bitter thought, white yet he mused in bitter thought, A messenger appear'd at hand, Who to that mourning pilgrim brought A letter from his own fair land: Exger, as if it searched a mine, His eye the welcome page explor'd; And as he read each glowing line, Hope, gladness, life, were all restor'd.

Yet mightier than the voice from home, Which serv'd the drooping exite's breast. Those words of Thine, Redeemer! come To calm our fears and give us rest. When, in some end and sunless hour, We pine for smiles and tones of love, They bid us look, through storm and shot To Thee, our Light and Life above.

I MET HER IN A FESTIVE THRONG.

(Lines for Music.)

I met her in a festive throng,

"Mid brilliancy and glee,
As fairy-like she swept along,
She shone à star for me.
I saw her smile, her soft, dark eyes
In radiant gladness gleam d,
A ray of light caught from the skies,
To me her beauty seem'd.

I heard her speak, such silvery notes In dreams of night I hear, When melody around me floats, And lovely things draw near. Her form was musical with grace, Enchanting, fresh, and free;

Enchanting, fresh, and free; There was a beauty in her face, LIFE.

ar earth, as it rolls through the regions of space,
Wears always two faces, the dark and the sunn;
And poor human life runs the ame sort of race,
Being sad on one side—on the other side, fanny.

Darieties.

THE GLOBE WE LIVE OR .- It is known as a fact in Geology, at below the depth of 30 feet, the earth becomes regularly warm-THE GLOBE WE LIVE ON.—It is known as a fact in Geology, that below the depth of 30 feet, the earth becomes regularly warmer as we descend. On an average the increase is at the rate of one degree Fahrenheit for every fifty feet. At the bottom of the mines of Cornwall, a depth of one thousand two hundred feet, the thermometer stands at 88°, equal to high summer heat. At this rate, rocks and metals would be melted twenty miles below the surface, and down in the bowels of the earth, several hundred miles, the heat would be twenty thousand times hotter than melted iron. Who can wonder at earthquakes, when all things rest on a molten sea of fire.

YOUTHFUL NEGLECT.—Walter Scott, in a mirrative of his personal history, gives the following caution to youth: "If it should ever fall to the lot of youth to perses these pages, let such readers remember, that it is with the deepest regret that I recollect in my youth—that through every part of my literary career, I have felt pinched and hampered by my gnorance, and I would at this moment give half the reputation I have had the good fortune to acquire, if by doing as, I could rest the remaining part upon a sound foundation of harring and science."

How small is the diameter of the human throat, and how short How small is the diameter of the human throat, and now mice its measure? Yet it will give the same note with the pipe of an organ eight feet in length! and the valve which covers it, and plays with electric swiftness. [imitated by the reed of the organ] is, as is well known, a very little thing; yet with the contractions and expansion of the throat, it will utter a scale of seventeen degrees.

Power or LETTERS. - Which three letters in the English Power of Letters.—Which three letters in the English alphabet are the most foreible! N R G, (energy.) Which two are the most hatful! N V, (envy.) Which two contain the least! M T, (empty.) Which four are the most corpulent! O B C T, (obesity.) Which four the most faded! D K, (deagy.) Which four have a title of honor! X L N C, (excellency.) Which three most wearisome! N U E, (enui.) Which five are a popular doctrine! X P D N C, (expediency.) Which three are a mournful pnem! L E G, (elegy.) Which three are a famous city! U T K, (Utica.)

What female recluse is that whose name read backwards and for-

wards, is the same? Nun.

What lady-like designation is that which is spolt backwards and forwards the same? Madam.

What lady's name is that which is spolt backwards and forwards the same? Even.

What time is that which, spelt backwards and forwards is the same? Noon.

What portion of a young lady's dress is that which spelt backwards and forwards, is the same? Bib.

A CURE FOR WARTS.—Take a leaf of a plant called a house leek, which is quite common about househo'ds, peel it, bind it upon a wart when you go to bed. In the morning, the wart will be softened to such an extent that you may pull half of it off. Repeat the application two or three nights, and the excrescences will disappear, leaving up mark behind.

THE PAIGLEY SISTERS AND SAUT WATER.—"Jenny," said heely Paisley spinster to her sister, "we maus get the saut water, my checks are as white as clouts, and so were Betty Tamsen's, but she gase to Ganrock three weeks ago, and came home as red's a rese, and was married four days after." But how can we drink the nesty saut water, Kate?" replied Jenny. "Toots, lassie, saut or fresh, sweet or sour, I'll drink ony thing for a man !", "Heth, and use wad J, Kate? see let's aff to Ganrock the morn, for every body's there already, and they'll no leave a drap that's drinkable."—Glasgow Post.

RECREATION.—Make thy recreation servant to thy business, lest thou become slave to thy recreation. When thou goest up into the mountain, leave this servant in the valley; when thou goest to the city, leave him in the suburbs, and remember the servant must not be greater than the master.

EXERCISE.—Walking is the best exercise. Habituate yourself walk very far. We value ourselves on having subdued the horse our use ; but I doubt whether we have not lost more, than we as used by it. No one thing has occasioned so much degenerate the human body. An Indian goes on foot nearly as far in a yes an enfeabled white does on his horse, and he will tire the thorse. A little walk of half an hour in the morning, when you tries is advisable; it shakes off sleep, and produces other good test in the animal commony.

BY APPENDING S.—He who toils with pain will ease.

No dans outside, no quacks within. Forbearance is tit, jewel. Something is learned every time a good paper, is to supply the hand is the way to stop the mouth. Who aims need will be above mediocrity; who aims at mediocrity

any complain of neglect, who never tried to attract regard.

THE ROAD TO HEALTH!

THE ROAD TO HEALTH!

IN LIOWAY'S PILLS

CURE OF A DISORDERED LIVER AND BAD DIGESTION

Copy of a Letter from Mr. R. W. Kirkus, Chemist, 7 Pres co
Street, Liverpool, dated 6th June, 1851.

To Professor Holloway.

It six,—Your Pills and Ointment have stood the highest on our sale list of Proprietary Medicines for some years. A customer, to whom I can refer for any enquiries, dealives me to let you know the particulars of her case. She had been troubled for years with a disordered liver, and had digestion. On the last occasion, however, the virulewice of the attack was so alarming, and tha inflammation set in so severely, that doubts were entertained of her not I cling able to hear up under it; fortunately she was induced to try your Pills, and she informs me that after the first, and each succeeding does, she had great reflec. She continued to take them, and although she used only three Boxes, she is now in the enjoyment of perfect health. I could have sent you many more cases, but the above, from the severity of the attack, and the speedy cure, I think, speaks much in favor of your astonishing Pills.

Some Extraordinary Cure of Regumatic Fever, in Copy of a Letter inserted in the Hobert Town Courier, of the of the 1st March, 1851, by Major J. Welth.

Margaret M'Consigna, nineteen years of age, residing at New Town, has been suffering from a violent rheumatic fever for upwards of two months, which had entirely deprived her of the nose of her limbs; during this period, she was under the care of the most cuinent medical men in Hobart Town, and by them her case was considered hopeless. A friend prevailed upon her to try Holloway's celebrated Pills, whigh she consented to do, and in an incredibly short space of time they effected perfect cure.

CURE OF A PAIN AND TIGHTNESS IN THE CHEST AND STOMACH OF A PERSON S4 YEARS OF AGE.

CHERRY AND LUNGWORT.

Coughs, Colds, Hoarsness, Spittin of Blood, Night Sweats, Asthma, Liver Complaints, and CONSUMPTION.

DO NOT NEGLECT IT. Consumption can be and has been cured.

in thousands of cases, by this only certain remedy,

JUDSON'S CHEMICAL EXTRACT OF CHERRY AND LUNGWORT,
and no remedy has ever before been discovered that will certainly

Cure Consumption.

The most strongly marked and developed cases of Pulmonary Consumption, where the lungs have become diseased and ulcerated and the case so utterly hopeless, as to have been pronounced by Physicians and friends, to be past all possibility of recovery, and at times thought to be dying, have been cured by this wounderful remedy, and are now as well and hearty as ever. It is a compound of medications which are peculiarly adapted to and essentially necessary for the cure of COUGHS AND CONSUMPTION.

Its operation is midd, yet efficacious; it loosens the phlegm which creates so much difficulty, relieves the cough and assists nature to expel from the system all diseased matter by expectoration, producing a delightful change in the breathing and chest, and this, after the prescriptions of the very best medical men and the inventions of kind and sorrowing friends and Nurses, have failed to give the smallest relief to the Consumptive sufferer.

THOUSANDS OF CONSUMPTIVE persons have been deceived rejeatedly in buying medicines which were said to be infallible cures, but which have proved only palliatives, but this medicine is not only a palliative but a cure for ulcerated lungs. It contains no deleterious Drugs and one trial will prove its astonishing efficacy better than any assertions or certificates in curing consumption and all diseases of the Lungs, such as Spitting of blood, Coughs, pain in the side and chest, night-secats, &c. &c.

About 1000 certificates of almost miraculous cures, performed by this medicine, from some of the first Doctors. Chrosumen and bles.

About 1000 certificates of almost miraculous cures, performed by this medicine, from some of the first Doctors, Clergymen and Alerchants, have been sent us for this medicine, but the publication of them Loks too much like Quackery, [we will show them to any person, calling at our office.]—This medicine will speak for itself and enough in its own favour wherever it is tried.

Caution—This medicine is put up in a large bottle and you must find the name of Judson & Co., Proprietors, New York, on the splendid Wrapper around the bottle. All orders must be addressed to Comstock & Brother, No. 9 John St. New York.

To Owners of and Dealers in Horses. CARLTON'S FOUNDER OINTMENT,

CARLTON'S FOUNDER OINTMENT,

For the cure of Founder, Split Hoof, Hoof-bound Horses, and contracted and Feverish Feet, Wounds, Bruises in the Flesh, Galled Backs, Cracked Heels, Seratches, Cuts, Kicks, &c.. on horses.

CARLTON'S RING-BONE CURE.

For the cure of Ring-bone, Blood Spavin, Bone Spavin, Windgalls, and Splint--a certain remedy.

CARLTON'S CONDITION POWDERS FOR HORSES AND

The changes of weather and season, with the change of use and feed, have a very great effect upon the blood and sinuous fluids of horses. It is at these changes they require an assistant to nature to throw off any disorder of the fluids of the body that may have been imbibed, and which, if not attended to, will result in the Yellow water, Heaves, Worms, Botts, &c. All of which will be prevented by giving one of these pe wders, and will at any time, cure when any symptoms of disease appear, if used in time. They purify the blood, remove all inflammation and fever, loosen the skin, eleases the water, and invigorate the whole body, enabling them to do more work with the same feed. The action of these powders is direct up n all the secretive glands, and therefore has the same effect upon the Horse, the Ox, the Ass, and all Herbivorous animals—all diseases arising from or producing a bad state of the blood, are speedily cured by them. CATTLE

rom or producing a bad state of the blood, are speedily cured by hem.

Remember and ask for CARLTON'S CONDITION POWDERS,

and take no others.

CARLTON'S NERVE AND BONE LINIMENT FOR and for the cure of all diseases of man or beast that require external application, and for contracted cords and muscles, strength as weak limbs, and is also used for spruins, bruises, saddle galls, swelled legs,

times, and is also used for spruins, or uses, saudie gates, seeted negritions on horses.

Carlon's articles for Horses and Cattle are prepared from the recipies of a very celebrated English Farrier, and will cure in ninetynine cases out of one hundred of any of the above complaints. They have been used by Farmers, livery-men, stage proprietors and others with the most marked and decided success.

Caution.—None can be genume unless you find the name of J. Carlton Comstock, on the Wrapper of each article.

COMSTOCK'S VERMIFUGE.

COMSTOCK'S VERMIFUGE.

This is the most extraordinary remedy for Worms ever used; it effectually eradicates Worms from both Adults and Children. It cannot harm the most delicate infant or strongest Adult, and never fails to completely root out and destroy all kinds of Worms. The cest, 25 cents per bottle, puts it within reach of all, and all parents who are without it, are wantonly exposing the laws of their children to those fell destroyers of youth, "Worms." Look for the name of Comstock & Brother, proprietors, on the Wrapper of each buttle.

To the Old and Young!! Ho ! ye Red Heads and Grey!!! PHENOMENON IN CHEMISTRY ! !!!

EAST INDIA HAIR DYE.

COLORS THE HAIR, AND WILL NOT THE SEIN.

This dye may be applied to the hair over night, the first night turning the lightest RED or GREY HAIRIO a dark brown, and by repeating the ingitest the or of art first in a user oroun, and of repeating a second night, to a bright jet black. Any person may, therefore, with the least possible trouble keep his hair any dark shade or perfect black; with a positive assurance that the dye, if applied to the skin will not colour it. By an occasional application, a person turning grey will never be known to have a grey hair. Directions complete with the article. There is no colouring in this

rections complete with the article. There is no colouring in this statement, as one can easily test.

These facts are warranted by the gentleman who manufactures it, who is the celebrated Chemist, Dr. Comstock, author of Comstock's Chemistry, Philosophy, and other works, and School Books, well known and widely celebrated by the public.

Deafness.

Use Dr. LARZETTE'S ACOUSTIC OIL, for the cure of Deafness-Also, all those disagreable noises, like the buzzing of insects, falling of water, whizzing of steam, which are symptoms of approaching deafness. Many persons who have been deaf for ten, fifteen or twen-ty years, and were subject to use ear trumpets, have after using one or two bottles, thrown aside these trumpets, being made perfectly well. It has cured cases of ten, fifteen, and even thirty years standing of deafness.

HAY'S LINIMENT FOR THE PILES.

The worst attacks of the Piles are effectually and permanently cured in a short time by the use of the genuine Hay's Liniment. Hundreds of our first citizens throughout the country have used this liniment with complete success.

Caution—Never buy it unless you find the name of Comstock & Courton—All of the abovenamed articles are sold only in New York, by Comstock & Breither, No. 9 John Street, see doors from Broadway.

York, by Comstock & Brether, No. 9 John Street, are doors from Broadway.
Sold in Charlottelown, P. E. Island, by T. DESBRISAY, W. R. WATSON, JAMES GILLIGAN, M. W. SKINNER Druggists. In Pictou, at the Drug Stores; also by one Storekeeper in every Town on the Island. Enquire for Comstock's Almanac for 1851, which will be given to all gratis.
