The Pacific Railway Bill.

The Pacific Railway Bill.

In the British House of Commons on Tuesday, the Bill graining the Imperial guarantee of the loan in aid of the construction of the Canada Pacific Railway, was passed through its second reading by a vote of 117 to 15. On the motion being brought up, Sir Charles Dilke denounced the vicious system of guaranteeing enterprises and works for which the tolonies were not yet fit. He insisted that the guarantee for the Bill under consideration was in the nature of a bribe for concessions Canada had made in regard to the fisheries, so that the provisions of the treaty of Washington might be executed. He pronounced the Pacific Railway a gigantic Parliamentary job, and concluded by moving that the second reading of the Bill be postponed six months. Mr. Gladstone said the guarantee had no connection whatever with the Treaty of Washington. Action on the Bill had been purposely delayed until that Treaty was settled. The object of the measure was not to give Canada so much hush-money, but to recognize the just demand she had on England. In the Fenian raids on her territory, Canada had suffered on England's account, and Canada had elected to cancel the debt we owed her in this way.

The Daily News says that the Canada Pacific enterprise is of a very mixed and doubtful character.

Mixa and Matter.—Prof. Agassizhas propounded a new theory of life, and in the closing one, which he gave least week, he advances what is certainly an original, and will be considered an extraordinary theory. He declares that the relationship of animals is "an intellectual unity, not a material connection." He denies that those relations coincidences, similarities, are the result or evidence of law. He regards all organic life is bearing only the characteristics of the work of conscious mind, as distinguished from the product of unconscious forces. The assertion will no doubt, stardle many a sayan from his studies, and put Dauwin on his mettle. The statement of the American police opper is totally opposed to that of this celebrated English writer on the developement theory, and we may expect ere long to see a vigorous battle waged between the two as to the truth of their respective systems.

Guelph, Jan. 25, 1873.

As Mr. STEWART is leaving for the British and Continental Markets in July, he has determined to reduce his large stock of Dry Gcods and Clothing by \$20,000 this month. To effect this he has resolved to allow a discount of 10 per cent. on all purchases of \$1 and upwards. So rare a chance of securing cheap goods seldom occurring, the public should avail themselves of making and saving money. Quotations of prices being no real criterion of cheapners, being no real criterion of cheapness, an inspection of goods is solicited.
