## Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming are checked below.

- Coloured covers / Couverture de couleur
- Covers damaged / Couverture endommagée
- Covers restored and/or laminated / Couverture restaurée et/ou pelliculée
- Cover title missing / Le titre de couverture manque
- Coloured maps / Cartes géographiques en couleur
- Coloured ink (i.e. other than blue or black) / Encre de couleur (i.e. autre que bleue ou noire)
- Coloured plates and/or illustrations / Planches et/ou illustrations en couleur
- Bound with other material / Relié avec d'autres documents
- Only edition available / Seule édition disponible
- Tight binding may cause shadows or distortion along interior margin / La reliure serrée peut causer de l'ombre ou de la distorsion le long de la marge intérieure.
- Blank leaves added during restorations may appear within the text. Whenever possible, these have been omitted from filming / Il se peut que certaines pages blanches ajoutées lors d'une restauration apparaissent dans le texte, mais, lorsque cela était possible, ces pages n'ont pas été filmées.
- Additional comments / Commentaires supplémentaires:

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

- Coloured pages / Pages de couleur
- Pages damaged / Pages endommagées
- Pages restored and/or laminated / Pages restaurées et/ou pelliculées
- Pages discoloured, stained or foxed / Pages décolorées, tachetées ou piquées
- Pages detached / Pages détachées
- Showthrough / Transparence
- Quality of print varies / Qualité inégale de l'impression
- Includes supplementary material / Comprend du matériel supplémentaire
- Pages wholly or partially obscured by errata slips, tissues, etc., have been refilmed to ensure the best possible image / Les pages totalement ou partiellement obscurcies par un feuillet d'errata, une pelure, etc., ont été filmées à nouveau de façon à obtenir la meilleure image possible.
- Opposing pages with varying colouration or discolourations are filmed twice to ensure the best possible image / Les pages s'opposant ayant des colorations variables ou des décolorations sont filmées deux fois afin d'obtenir la meilleure image possible.

This item is filmed at the reduction ratio checked below /  
Ce document est filmé au taux de réduction indiqué ci-dessous.

10x		14x		18x		22x		26x		30x	
								<input checked="" type="checkbox"/>			
12x	14x	16x	18x	20x	22x	24x	26x	28x	30x	32x	

The copy filmed here has been reproduced thanks to the generosity of:

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol  $\rightarrow$  (meaning "CONTINUED"), or the symbol  $\nabla$  (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole  $\rightarrow$  signifie "A SUIVRE", le symbole  $\nabla$  signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

*NOTE.*

Vendors are responsible for the accuracy of information furnished by them to the official Food Inspectors of this Department. If through ignorance, carelessness, or for other cause, they make false statements, involving injury to manufacturers, the manufacturers so injured may exact indemnification by legal process.

A sample of White Pepper, sold by Cameron & Downing, Vankleek Hill, Ont., was stated by them to have been furnished by the Pure Gold Manufacturing Co. Ltd., Toronto. They have since made the following statement :—

“ This certifies that we did not purchase at any time or receive from the Pure Gold Mfg. Co. Ltd., Toronto, White Pepper, and that the reference in Bulletin 203, page 10, sample No. 42801 (Pepper), issued by the Department of Inland Revenue, is inaccurate in stating that the said white pepper was obtained by us from the Pure Gold Mfg. Co. Ltd. ”

Dated at Vankleek Hill this Thirtieth (30) day of June, 1910.

(Signed) CAMERON & DOWNING.

In the presence of D. J. COUTURE.

Mr. John T. Conway of Perth, Ont., acknowledges misstatement to our Inspector of the facts regarding a sample of White Pepper, as follows :—

“ This certifies that I did not purchase or receive from the Pure Gold Mfg. Co. Ltd., Toronto, any White Pepper during the term between December 31st, 1907 to October 1st, 1909, and that the reference in Bulletin 204, page 10, sample No. 42803 (Pepper), issued by the Department of Inland Revenue, is inaccurate in stating that the said White Pepper was obtained by me from the Pure Gold Mfg. Co. Ltd. ”

Dated at Perth this Eleventh day of July.

(Signed) JOHN T. CONWAY,

In the presence of A. J. GIBSON.

### BULLETIN No. 210

#### Liniment of Chloroform *Linimentum Chloroformi*

OTTAWA, June 21, 1910.

W. J. GERALD, Esq.,  
Deputy Minister of Inland Revenue.

SIR,—I beg to hand you a report upon the examination of 72 samples, purchased throughout Canada in February, March and April of the present year, as Liniment of Chloroform.

The British Pharmacopœia directs this liniment to be prepared from equal parts of Chloroform and Liniment of Camphor. According to Squire's Companion (p.375) it should have a specific gravity of 1.212, and should yield a residue of about 37 per cent. Liniment of Camphor is a solution of 1 part of camphor in 4 parts of Olive Oil. The fixed residue above referred to, as characteristic of Liniment of Chloroform, consists of the Olive Oil introduced with the Liniment of Camphor.

It is sufficiently evident that all the samples now reported have been intended to conform to the requirements of the British Pharmacopœia; (1) in which case the Liniment of Camphor employed should be that of the B. P. This is important, since the Liniment of Camphore of the U.S.P., although having the same content of camphor, is directed to be made with Cotton Seed Oil instead of Olive Oil.

All but 17 samples of the 72 samples now reported, contain Cotton Seed Oil, and have therefore been prepared with an adulterated Olive Oil, or with the Camphor Liniment of the United States Pharmacopœia.

There can be little doubt that Cotton Seed Oil is a satisfactory substitute for Olive Oil in camphor liniment; nevertheless I am compelled to declare all the samples of Liniment of Chloroform containing Cotton Seed Oil technically adulterated, since the British Pharmacopœia expressly requires Olive Oil to be used, in the preparation of Camphor liniment. This liniment is made with Olive Oil in most European countries; but Portugal employs Almond Oil; Austria, Hungary and Russia, Sesame Oil. The United States of America is the only country authorizing the use of Cotton Seed Oil; and it would appear that, in each country a selection of a suitable oil native to that country, or most easily obtainable in it, is made.

As this is the first time that Liniment of Chloroform has been inspected under the Adulteration Act; and, as further the adulteration found is for the most part of a

purely technical kind, and not detrimental to the efficiency of the article as a drug, I would respectfully recommend that no prosecutions be instituted upon the present report.

A word of warning to the drug trade may be permitted. So long as the British Pharmacopœia is our legal standard of reference, its requirements should be followed to the letter. It goes without saying that tampering with drugs is a thing that cannot be tolerated. While some of these, as in the present instance, are not so potent as to make slight variation in composition a matter of great moment, the rule is that danger to health, or even to life, is incurred by failure to maintain exact observance in their preparation. It is due to the physician, as well as to the patient, that the articles he prescribes should absolutely correspond to pharmacopœal requirements.

I would further recommend the publication of this report as Bulletin No 210.

I have the honour to be, Sir,  
Your obedient servant,

A. MCGILL,  
*Chief Analyst.*

(1) The Linimentum Chloroformi U.S.P., is prepared from soap liniment and chloroform in the ratio 7 : 3. Soap Liniment U.S.P., has the following composition :—

	grammes.
Soap (dried and granulated).....	60
Camphor.....	45
Oil of Rosemary.....	10 cc.
Alcohol.....	725 cc.
Water.....	Q.S.
To make.....	1000 cc.

This would give 4.2 per cent residue (soap) and 30 p.c. chloroform to the Linimentum Chloroformi of U.S.P., with 3.15 p.c. camphor, instead of 10 per cent as in B.P.
