## SHOT AT A CHARIVARI

Stephen Jackson Wounds Two Men in South Monaghan.

Large Party of Young Men Were Serenading Andrew Huggins and His Bride When Jackson Discharged His Double-Barreled Shot Gun, and Edward McGregor and Thomas Parrott Received the Charges.

Peterboro, Oct. 4.—Another shooting accident arising out of the practice of charivariing a newly-wedded couple occurred about five miles from Ballisboro, in South Monaghan Township, Monday night.

A large party of young men were serenading Andrew Huggins and his bride, and were parading down the road in the direction of the house, when Stephen Jackson discharged his weapon, a double-barreled breech-loading shot gun.

The shells in the gun were blank, but Edward McGregor and Thomas Parrott, who were some few feet ahead, received the charges, which took effect in Parrott's right arm and McGregor's left arm.

The injured men were brought to Nichol's Hospital, and the shot removed. They are recovering. Their escape was miraculous.

## CLEVER CHILDREN

Pollard Opera Company Will Play in Chatham—An Interesting History of Their Tour

An organization as unique as it is interesting is the Pollard Juvenile Opera Company.

Made up of infants in the eyes of the law, for all of the little performers are under fourteen years of age, they take the parts which older persons have struggled with and found difficult, and play them with a success and aplomb which their elder and more professional brothers and sisters may well envy.

The little operatic stars hail from far away Australia, but the Antipodal region is but one of many memories to them. Young as they are, the children have travelled over a greater part of the world's surface.

They have been in India, in Japan, they have played in the Straits Settlement, in the Philippines, in South Africa, in the Pacific Islands, and have visited America, and are now touring Eastern Canada for the first time. For their age, the little ones are globe trotters of rare excellence.

Their present tour, beginning in Australia, has taken them to such places as Shanghai, Hong Kong, Yokohama, Manila and many other places of the globe, but rarely visited by such youthful travellers.

The famous Pollard organization had its inception in 1879, when A. J. Pollard witnessed a performance of children. It has grown since then, to what is now a regular school for children. Under the present management it is stronger than ever.

The anxiety to join it is keen in Australia and many children are constantly kept on the waiting list.

An operatic school is no misnomer. The little ones are trained not only in singing, acting and the mysteries of the make-up, but receive a common school education as well.

A teacher accompanies them and they receive regular school work. The little ones are all bright and their aptitude to learn is such that their teachers have to caution them not to work too hard. Their memories are prodigious. They learn the most difficult musical and speaking part without difficulty.

The organization consisting of 40 people is made up mostly of girls—about three of them, the other third boys. Many of the male parts are taken by the girls, who wear male attire with the greatest success.

They are under the management of Mrs. Chester, who fills the difficult part of mother to the entire group. To her they go with their childish troubles and always find a ready and listening ear.

Among their travels the little ones have had some interesting experiences. Among their hosts in their tour of the world they number the Sultan of Johore, who had the time of his dusky life in entertaining the children. They also visited Oom Paul Kruger, who took great delight in furnishing amusement to the diminutive artists.

The late Cecil Rhodes was a great admirer of the organization. It was he who warned the company to leave Kimberly when the Boers were about to shell the place.

**June Bugs Kill Horses.**  
Amherstburg, Oct. 4.—About a week ago a number of horses in this vicinity were taken sick and about 100 have since died. The farmers were at first unable to explain the sudden epidemic, but they are now convinced that June bugs which were mixed in with the hay have been causing all the trouble.

**Twenty Miles Graded.**  
Winnipeg, Oct. 4.—Mr. Jones, divisional engineer for the Portage division of the Grand Trunk Pacific, reports that over twenty miles of grades have been completed, and that good progress is being made. In all about 450 teams and about 800 men are at work west of here.

## OPINION OF SCHOOL BOARD

Every Trustee Working in City's Best Interests Says Chairman Morley

Other Business Transacted at Last Night's Session—The Centre Street Drain

In a few modest and well chosen remarks Chairman W. N. Morley, at the Public School Board meeting last evening, stated clearly his position and the position of his fellow trustees—on the scheme proposed by the City Council, for forming a Board of Education in Chatham, and of thereby doing away with the Collegiate Institute and Public School Boards. After inviting his colleagues to express their opinions on the matter he said:

"I see the Collegiate Institute Board have put their opinions in this matter plainly and forcibly before the public. For myself, I feel satisfied that every member of this Board is working in what he believes to be the city's best interests. We have no private axes to grind but are doing our utmost to keep up the standard of education in our city. I feel in saying this that I am voicing the sentiments of the whole Board, and we are perfectly willing to let our work in the past speak for itself."

Mr. Robertson stated that he was not familiar enough with the details of the new scheme to voice any criticism on it, while Mr. McArthur smilingly added that it didn't seem to make much difference whether the School Board approved of the scheme or not.

All of the members at the meeting, however, agreed that the sentiments expressed by Chairman Morley were perfectly in accord with their own.

There were present at the meeting Chairman W. N. Morley, and Trustees Draper, Robertson, Benson, Lenfestey and McArthur.

## CENTRAL SCHOOL SEWER.

Chairman Morley drew the attention of the managers of the Central School to the fact that the Board of Health had called attention to the condition of the Centre St. sewer.

Mr. Robertson replied that he and Mr. Paxton had interviewed the city engineer and he assured them the Central School sewer is all right and in good working order.

Mr. Morley—The managers of the school should look after the supplies and see that they are locked up.

Mr. Robertson—Unfortunately the locks were out of order when school closed and the supplies could not be locked up.

## MIKE HEALY WAS KILLED

Chatham Man Met Death on the Rail at Bothwell Yesterday

Engineer Saw Him on Track but Was Unable to Stop Train

Bothwell, Oct. 3.—Michael Healy was accidentally killed here late this afternoon.

Just as the eastern flyer was approaching the engineer noticed a man in a stooping posture, as if he was picking something off the track.

The engineer whistled, but no attention was paid to the approaching train. He tried to stop his train, but was unable to do so. Healy was struck on the side and hurled back upon the station platform.

When picked up by the agent, and those who had witnessed the accident, Healy still breathed, but soon expired after without regaining consciousness.

## ANNUAL TEA

A Very Successful Event Held in the Victoria Avenue Methodist Church

The annual tea meeting held in the Victoria avenue Methodist church last Monday evening was very largely attended. The ladies of the church who had the management of the affair in hand deserve great credit for the splendid success of the evening. The good things provided in the Sunday school room the assemblage adjourned to the church, where an excellent program of speeches and music was given.

Rev. F. E. Malott presided over the meeting as chairman and splendid addresses were delivered by Rev. Dr. Battisby, Rev. Mr. Hodgins and Rev. Mr. Rutledge.

The musical part of the program was especially enjoyable and included selections from the Victoria avenue Methodist choir, solos by Miss Gertie Potter, Miss Olive Richards, Miss McGeorge, Miss Somerville, Miss Barassin, Miss Peate, Harry Flowers and Arthur Martin, and a splendid duet by Mrs. John Cooper, soprano, and H. D. Smith, tenor.

The receipts were very satisfactory and the event was pronounced by everyone present a magnificent success.

EXCELLENT PARTRIDGE SHOOTING.

Following is report received from Mountain Grove, on the main line of the Canadian Pacific Railway, 163 miles east of Toronto, regarding Partridge Shooting in that section:

"Prospects for partridge shooting in this section are decidedly favorable, and if sportsmen will take the trouble to go back from three to five miles of the station of the C. P. R. they will find the birds still more numerous. Comfortable board can be obtained with the settlers at a very reasonable price. In November twelve miles further back there is good deer shooting, some very fine specimens having been shot last year."

### ANNOUNCEMENTS

At The Grand—

On the Bridge at Midnight—Oct. 5.  
Pollard Australian Juvenile Opera Co.—Oct. 7.

(Supplied to The Planet by Press Agents.)

### "ON THE BRIDGE AT MIDNIGHT."

A noted production is due here to-morrow night, Klime & Gazzolo's "On the Bridge at Midnight," which is a remarkable example of a true comedy drama. It is in the fine contrast with the sensational horseplay very often foisted on the unsuspecting who seek real dramatic entertainment. Messrs. Klime & Gazzolo have not depended, as producers of the most commend-

able attractions, on the celebrated scenic superiority of "On the Bridge at Midnight," including the great bridge scene, but have supplied a deeply interesting, wholesome story of humor, pathos and romance woven together with naturalness. Such comedy characters as Reddy, the newsboy, and Germany, the professor, arouse the most genuine laughter because truly humorous. The serious roles are pictures from life and especially convincing as played by the exceptional company presenting the play this season.

The most unique and distinctive amusement organization in the world, the Pollard Australian Lilliputian Opera Company, composed of children ranging in age between seven and thirteen years, is now making its third annual tour of America and Canada. This, however, will be the first time the company has ever appeared in eastern Canada. They come to the Grand Opera House for an engagement of 14 nights and Wednesday matinee, opening on Saturday, October 7th.

OLIVE MOORE, AGE 10.

In "The Geisha," one of the operas to be given by the Pollard Juvenile Opera Co. at the Grand Opera House.

The repertoire here will be as follows: Saturday night, A Runaway Girl; Monday night, The Belle of New York; Tuesday night, Geisha; Wednesday matinee, Pinafore, curtain at 4 p. m.; Wednesday night, A Gaiety Girl. Popular prices will prevail.

## DEFENCE OF INDIA.

Major Vanderzer Says He Has Been Robbed of Important Plans Between Toronto and Buffalo.

Buffalo, Oct. 2.—Major H. Vanderzer of the Indian diplomatic corps, who arrived here yesterday, has announced that important plans for the defence of India had been stolen from him while he was on his way from Toronto to Buffalo.

It is reported that the plans had been given by Gen. Kitchener to be conveyed by Major Vanderzer to the imperial government.

Verification of the story, which was "carried" exclusively by one of the morning papers, could not be had today. Vanderzer could not be located.

## GRAND JURY FOR EQUITABLE.

The District Attorney Will Make Announcement on Thursday.

New York, Oct. 3.—District Attorney Jerome announced in court yesterday that he would make public next Thursday his decision in regard to the necessity for an extraordinary grand jury to consider Equitable Life Assurance Society matters.

The accountants yesterday began investigation of the books of the New York Life Insurance Co. in behalf of the insurance commissioners of the States of Tennessee, Wisconsin, Minnesota, Kentucky and Nebraska.

The examination will take two months and nothing of the details will be made public until it is ended.

## CLAIMS TITLE IS IMPERFECT.

The transfer of the stock of the Equitable Life Assurance Society from James H. Hyde to Thomas F. Ryan was attacked in an amended plea filed on Saturday with the attorneys of the society by counsel representing Herbert C. Tull of Philadelphia.

Mr. Tull's suit was to determine the ownership of the surplus of the Equitable Society. The amended plea stated that Mr. Hyde could not give a good title of the 502 shares of stock to Mr. Ryan because it was merely held in trust for him until he was 30 years old, which age he has not yet reached.

Thus, it argues, Mr. Ryan was unable to give a good title to the stock to the trustees, Grover Cleveland, Justice Morgan J. O'Brien and George Westinghouse.

## STRANGER THAN FICTION

A Remedy Which Has Revolutionized The Treatment of Stomach Troubles.

The remedy is not heralded as a wonderful discovery nor yet a secret patent medicine, neither is it claimed to cure anything but dyspepsia, indigestion and stomach troubles with which nine out of ten suffer.

The remedy is in the form of pleasant tasting tablets or lozenges, containing vegetable and fruit essences, pure aseptic pepsin (government test), golden seal and dandelion.

It is the most remarkable success of Stuart's Dyspepsia Tablets, a remedy practically unknown a few years ago and now the most widely known of any treatment for stomach weakness.

This is the secret, if there is any secret, of the remarkable success of Stuart's Dyspepsia Tablets, a remedy practically unknown a few years ago and now the most widely known of any treatment for stomach weakness.

### Plenty of Public Libraries.

Dr. May, inspector of public libraries for Ontario, has returned from an inspection tour through Northern Ontario. He reports the libraries in that part of the Province as in good condition, and a number of new ones have been established recently.

There are about 500 public libraries in Ontario, of which 146 are free. The Provincial Government makes an annual grant to every public library equal to the amount provided by the municipality or other corporation for the purchase of literature. But the amount granted to any library for one year is limited to \$250.

Dr. May states that last year the Library Boards spent about three times as much on their libraries as was given in grants by the Government, very many of the towns and cities expending much more than the limit of \$250.

### "Steal Not This Book."

Students of sociology who are fond of tracing back the customs of latter day man to the practices of his remote ancestry will note with interest the fact that there is authority at least 600 years old for the entry, "Steal not this book for fear of shame," by which schoolboys proclaim their ownership of a work.

In a curious volume in the Bodleian library, formerly belonging to the monastery of Robert of Sussex, is the following inscription: "This book belongs to St. Mary of Robert's bridge. Whoever shall steal it or sell it or in any way alienate it, let him be anathema maranatha."

In the course of the fourteenth century the book came into the possession of John, bishop of Exeter, who seems to have been somewhat troubled by the inscription as being likely to give rise to injurious suspicions with regard to himself.

Whoever shall steal it or sell it or in any way alienate it, let him be anathema maranatha.

## AN OFFICIAL BASEBALL

STORY OF THE SPHERE AND HOW IT IS MADE.

Rubber Core, Cement, Hundreds of Yards of Wool Yarn and Two Covers Used in Manufacture—Requirements of the Ball As to Size and Weight As Laid Down By Baseball League Magnates.

This is the story of a baseball: It begins with a rubber core. Then it extends through hundreds of yards of wool yarn to a horseshoe cover. More hundreds of yards of wool yarn give the resiliency, or "bounce." Then come cement and an outside cover within the prescribed weight and circumference.

THE EARLY STAGES OF A BASEBALL DURING MANUFACTURE.

conference laid down by the league magnates.

If some of the old yarn balls made by mothers and grandfathers had been preserved they would be priceless today as relics. Those balls were "swatted" out of shape in the twinkling of an eye.

Then a kid cover was sewed over the yarn ball. It was cut in eighths of a circle, just as an orange skin is divided. This was promptly knocked off in the second inning, but it gave a third inning for the yarn.

To appreciate the mechanical part of modern ball manufacture it must be understood that the ironclad rules of both the American, National and International league clubs call for a ball.

"Not under five ounces or over five and one-quarter ounces in weight.

"Not under nine inches in circumference or over nine and a quarter inches."

These limits are arbitrary. To meet them a rubber core that is molded and weighs but one ounce is used. This rubber core is wound with a specially spun wool yarn. This yarn has a strength that will permit of the use of machinery that is kept under "lock and key." In short, a weak thread in the winding means the loss of core and body up to the point where the break occurs. There is no knotting to overcome defects.

## JOHN HAY AT HOME.

Late Secretary of State of the U. S. Had One of the Most Stately Homes in Washington.

The death of perhaps the most notable of living Americans, except Thomas Edison, will, no doubt, let loose a flood of descriptive matter concerning his environment. John Hay had one of the most stately homes in Washington on Lafayette square across the way from the White House. The famous diplomat and literary man, Lincoln's secretary during the war and biographer afterward, was of Scotch descent, and his grandfather left Kentucky for the north because he hated slavery. That gives some clue to the generations of Covenanting stock that went to the making of John Hay's moral nature. In his library Mr. Hay was most frequently found in recent years when not at the State Department. It is one of the largest and most artistic rooms in the house. The ceiling is of paneled oak with deep caissons, on the squares of which are golden disks, smallest at the edges. Low bookshelves line the walls, and here is a superb writing desk of oak it one end. There are chairs richly upholstered in plush and soft velvet at the windows. The fireplace is of herse d'orient, a yellow-streaked marble. On either side of it are massive settees of oak with thick, inviting cushions. Over the fireplace in a frame of elaborately decorated gold is Sassoterra's Madonna and Child. Some rare art treasures and mementoes are preserved in this library. One is a portrait in oil by La Farge of New York of Henry James at the age of twenty-two years; another is a bas-relief in bronze of W. D. Howells, made in Florence by Larkin Mead, but the most precious memento of all is the manuscript of Abraham Lincoln's second inaugural speech presented to Col. Hay by the martyr President three days before his assassination. This speech is engrossed on vellum in a splendid volume of monocois, with fly-leaves of white satin. In the parlor of Col. Hay's house is a curious Spanish Cabinet of the seventeenth century. The handsome dining-room looks out upon Sixteenth street. In one end of this room there is a fireplace constructed of emerald-tinted Irish marble, and the walls are paneled in rose mahogany of a very delicate shade.

## MISS BEATRICE GRIMSHAW.

Plucky Irish Girl Who Travels Alone in Fiji Islands.

There is a plucky Irish girl named Beatrice Grimshaw who is probably having a higher average of adventures per week at present than any other girl living. Becoming tired of editorial work on an Irish cycling paper, she conceived the idea of setting out, alone, to roam the south seas, where pirates, cannibals, and leper colonies abound.

She is having all the excitement she hoped for. She has kept as far as possible out of the track of the monthly mail steamers, traveling about as the sole passenger on irresponsible little

schooners to islands where a white woman never had been seen before, and landing wherever possible for exploration tours. In places where the fact that Miss Grimshaw is a crack shot with a rifle comes in handy—like the further fact that she is a champion swimmer.

In a letter home she tells of traveling through trackless islands of the Fiji group with only some Fijian carriers as escort. Miss Grimshaw writes that she had an amusing reception in one place where the natives women had never seen a white woman before. They insisted on feeling of her to make sure she was real; but their hearts were won instantly when the visitor showed them how she did up her hair. The men were so shy up her hair. The men were so shy up her hair. The men were so shy up her hair.

"Ragging" in the British Army.  
A recent case of "ragging" on board the British cruiser Kent has been promptly followed by the supersession of Captain Douglas A. Gamble, her commander, who has been compulsorily retired on half pay for allowing such an occurrence on his ship, and by the punishment of others concerned in the affair. The "ragging" occurred in the gun room, where the midshipmen attempted to strip and flog an unpopular comrade. The latter promptly drew a revolver and shot one of the midshipmen in the mouth. The admiralty announces that it is determined to put down "ragging."

Golf in China.  
Golf is greatly indulged in by the parva officers and European residents in China. In consequence the Chinese boys have grasped some idea of the game, and they are frequently seen amusing themselves with an old stick converted into a club and a real golf ball which some gaffer has lost.

The Letter-Box

ALD. AUSTIN SPEAKS.

To the Editor of The Planet:

Dear Sir,—Will you permit me some space in your journal in order that I may publicly protest against the action of Colonel Rankin in making the insinuation that animosity towards Principal Twohey was the motive or had anything to do with the recent resolution of the Council re Board of Education. So that your readers may see the point I object to I will repeat the remarks made by the Colonel, as printed in Tuesday's Planet:

"There is another matter to which I somewhat hesitate to allude," continued Colonel Rankin, "but I believe that this is a time for open, free and fearless speaking. There must be straightforward and plain, outspoken conduct in this very serious and important matter. There are reasons said to be discussed in 'private caucus'—and, moreover, it has been told me on the street several times that this matter is aimed at our esteemed and valued principal, Mr. Twohey. I have been told repeatedly that the aim is to oust Mr. Twohey from the principalship. Is there anything in such a strange and remarkably persistent rumor?"

Now, I also believe in free and fearless speaking, and it seems to me that the Colonel is not consistent in his remarks, as in one sentence he advocates open, free and fearless speaking, and in the next imputes motives which would only have as their basis religious animosity, to some party whom he, in his fearlessness, does not name.

Now, if the Colonel believes in free speaking, why does he not mention the name of the party that is being connected with the story as told him, on the street and in which he places sufficient credence to repeat it for publication? Why should the Colonel, in order to give expression to personal animus, make a statement of this kind in such a way that the general public might attribute it to any of the Council, as they all supported the measure. As I happened to be the Alderman who introduced the Board of Education question, I feel especially called on to repudiate the Colonel's statement.

I gave the notice of motion in Council regarding the matter, and had not discussed the question in any form whatever, previously to doing so, with any person, and have not at any time heard any suggestions or references made with respect to Principal Twohey in connection with this question.

I might say that so far as Mr. Twohey is concerned I believe there

BONG BONG ISLE

B. C. Whitney's Charming Musical Comedy Greeted by Full House—Miss Hill Cordially Received

The Isle of Bong Bong was greeted with the largest house of the season at the Grand last night and presented in very pleasing manner the excellent Whitney production. While the production cannot be said to be the equal of its delightful sister, "The Isle of Spice," which played here recently, it was in every sense most enjoyable.

Miss Alice Yorke (Cordie Hill) was given a most enthusiastic reception to which she gracefully responded and her work was much admired. John Ransome as the "Count" took the house by storm. He was inimitable.

The staging was quite elaborate and the scenic effects splendid. The company throughout was a good one, graceful girls, stalwart soldiers and admirable choruses combining in a very agreeable ensemble.

Chatham has been fortunate in securing so many good things this season—and the end is not yet. The splendid patronage demonstrates that Manager Brisco's efforts are appreciated.

Yours sincerely,  
CHAS. AUSTIN.

The World's Greatest Skin Soap.

The World's Sweetest Toilet Soap.

Sale Greater than the World's Product of Other Skin Soaps.

Sold Wherever Civilization Has Penetrated.

Millions of the world's best people use Cuticura Soap, assisted by Cuticura Ointment, the great skin cure, and purest and sweetest of emollients, for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes, itches, and chafings, for annoying irritations, or too free or offensive perspiration, for ulcerative weaknesses, and many sensitive, antiseptic purposes which readily suggest themselves to women, especially mothers, as well as for all the purposes of the toilet, bath, and nursery.

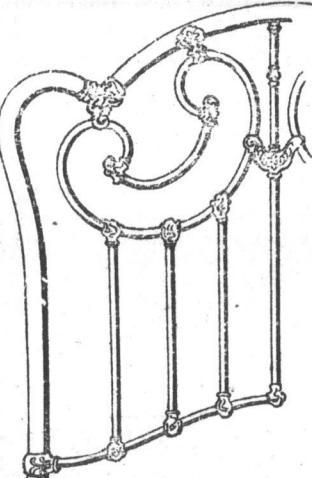

Cuticura Soap combines delicate emollient properties derived from Cuticura, the great skin cure, with the purest of cleansing ingredients and the most refreshing of flower odors. No other medicated soap ever compounded is to be compared with it for preserving, purifying, and beautifying the skin, scalp, hair, and hands. No other foreign or domestic toilet soap, however expensive, is to be compared with it for all the purposes of the toilet, bath, and nursery. Thus it combines in one soap at one price the most effective skin and complexion soap, and the purest and sweetest toilet, bath, and nursery soap.

The women bore a hole in their top lip and gradually increase this until it is able to inclose a disk of wood two and even three inches in diameter. A Mubira woman came to call on us whose disk measured two and five eighths inches across. The size of the wood inserted proclaims the rank of the person. Peasants are only allowed to wear pieces of stick of the same dimensions as a match.

The weight of the wood causes the lip to fall down over the mouth, and in order to eat it is necessary to lift up this shutter with one hand while the other conveys the food to the mouth. Frequently the lip breaks under the strain put upon it, in which case the disconnected ends are carried back and tied to the ear—"On the Borders of Pymy Land."

Ives' Brass Beds give brightness and dignity to a room.

Many artistic home furnishers have adopted the metal bed instead of the cumbersome and sometimes unsanitary wooden beds. A metal bed adds grace and beauty to a room, imparts an atmosphere of dignity often-times hard to secure with a wooden bed. Its lines are light and graceful and if it is an Ives bed it will be handsome and artistic in design.

Ives beds are always beautifully designed because Ives artists are the most proficient metal designers in America. They have made Ives' famous for high class metal bank and hotel fittings.

Ask to see an Ives bed and you will like it.

## ARMY STRIKE-BREAKERS

Berlin Electrical Works to Be Manned by Army Artizans.

Arrangements Made to Bring In 150 Enlisted Engineers From the Torpedo Battalions at Kiel—Guard Regiments Ordered Home as a Precautionary Measure Against Strike Excesses—Car Service Stops.

Berlin, Oct. 2.—The negotiations between the electrical companies and the employees for higher wages were broken off to-day and a general strike in the works manufacturing electrical apparatus and supplies has been ordered for to-morrow. Part of the employees of the power and lighting works went out on a sympathetic strike to-day without awaiting the result of the conference of the labor leaders with the employers. Consequently one-third of the street cars were stopped.

The municipal government, acting on the principle that unlighted streets are a danger to the public, has ordered fifty engineers from the fire companies to the various power houses. As the army contains many thousands of trained workers in every trade, the company has applied to the minister of war for temporary details of engineers and stokers. These have been refused on the ground that it is unnecessary at present, but arrangements have been made to bring 150 engineers from the torpedo battalions at Kiel.

The war ministry has also declined to issue an order announcing to discharged soldiers, about 200,000 of whom have served out their term, that strikers and stokers could find employment with the electrical companies, but the army administration will offer no objection to battalion commanders giving out such notices.

Two guard regiments now manoeuvring in the country have been ordered to return immediately to Berlin as a precautionary measure against strike excesses. They will arrive here to-night. Half the street car service is now stopped.

# MOTHERHOOD

## How To Gain The Happiness Of Children

Motherhood is woman's highest sphere in life. It is the fruition of her dearest hopes and most holy desires. Yet thousands of noble women, through the derangement of the female generative organs brought on by female weakness and disease, are unable to produce children!

Ninety-nine times out of every one hundred Lydia E. Pinkham's Vegetable Compound will so restore and strengthen the female organism as to make child bearing possible, easy, and safe.

## Lydia E. Pinkham's Vegetable Compound

with its record of thousands of cures, is the remedy for women. Thousands of women are happy mothers of beautiful children to-day because in time of need they took Lydia E. Pinkham's Vegetable Compound. No matter what your female weakness or disease, it will afford you speedy relief and cure. Every woman who desires to become a mother should read these letters:

Dear Mrs. Pinkham:—I had been married seven years and had no children, owing to a female weakness and womb trouble, which caused me severe suffering each month. A lady advised me to try Lydia E. Pinkham's Vegetable Compound, and I did so, and now I have no more pains and am perfectly well, besides having a fine baby boy.  
Mrs. ROSA F. KAREL, Ravenna, Neb.

Dear Mrs. Pinkham:—Before my baby was born I was in very poor health, and life did not seem worth living. As soon as I began to take Lydia E. Pinkham's Vegetable Compound I began to get better; in fact, I feel that this medicine really saved my life and the life of my child, for it not only helped me during child-birth, but made me well and strong after the child came. I wish every expectant mother would take Lydia E. Pinkham's Vegetable Compound.  
Mrs. M. KNEER, Hebron, W. Va.

Actual sterility in woman is very rare. If any woman thinks she is sterile, let her write to Mrs. Pinkham at Lynn, Mass., whose advice is given free to all would-be and expectant mothers. Her letter will give you valuable information.

**STEPPING STONES.**

I held it truth with him who sings  
To one clear harp in diverse tones  
That men may rise on stepping stones  
Of their dead selves to higher things.

But who shall so forecast the years  
And find in loss a gain to match?  
Or each a hand through time to catch  
The faroff interest of tears?

Let love leap grief, lest both be  
drowned;  
Let darkness keep her raven gloss;  
Ah, sweeter to be drunk with loss,  
To dance with death, to beat the  
ground!

Than that the victor hours shall scorn  
The long result of love and boast,  
"Behold the man that loved and lost,  
But all he was is overborn!"  
—Tennyson.

**MILLIONS IN GOLF.**

**Estimate of Money Spent by Players of the Royal Game.**

The sum of nearly \$50,000,000 is expended yearly on the game of golf, and of this sum about a third is spent by England and about a fifth by Scotland. There are no fewer than 879 golf clubs in England alone. The United States has 769; Scotland, 622; Ireland, 134 and Wales, 43. There are sixty-three dotted over the continent, and no British colony is without one and in many cases several links. Round numbers there are 3,000 golf links in the world.

Estimates show that not less than \$15,000 has been sunk in each of these clubs and the preparation of their courses, so that there has been a total permanent investment of about \$45,000,000. Few of these clubs are run on less than \$5,000 a year, and many of them cost ten times that sum.

The revenue is usually not entirely derived from subscriptions. Profits on catering and refreshments, green fees paid by visitors who use the links and various other items swell the clubs' revenues and make them equal to the strain put upon them.

Taking the average, these 3,000 golf clubs of the world cost about \$20,000 each year to run. The average membership is about 200, and the average subscription being \$30, the total amount paid in subscriptions by the 3,000 golf clubs is nearly \$20,000,000. But besides these golfers there are many thousands unattached, so that the entire golfing population of the world is about 750,000, not including the professionals, caddies and others who are intimately concerned.

A short calculation will show that with the club dues, extra green fees, purchases of clubs and balls and the many other expenses of the player, prominent among which are the railroad fares from residence to links, it is inevitable that the golfers must spend at the very least \$50 a year. Many spend that sum, and there is one well-known amateur who gives his golfing expenses as \$3,800 yearly. But at the modest average of \$50 yearly the three-quarter of a million golfers would spend among them \$75,000,000 a year.

Then each of them possess an outfit, the average cost of which is \$20. Many players use but seven sticks, and few use more, but most players have at least twelve. Thus the golfing public has sunk about \$15,000,000 in the purchase of clubs. One amateur confessed that his twelve clubs were priceless, because he could not replace them to his satisfaction, but that they cost him in actual money \$585.

The little ball has been the basis of enormous business enterprises in both England and America. Till lately the ordinary gutta-percha ball, which is comparatively cheap, was used, and it formed an insignificant part of a player's expenditures. But now the new ball has a core of gutta-percha strands wound at a tension, and its cost is much greater. Besides, it is easily damaged and made unfit for further play, so that comparatively few are used for more than three or four games. They vary in price from 25 to 75 cents, the popular ball being that of the middle price. The average amateur spends about 75 cents a week on balls, though many are known to spend \$5. But averaging on the minimum the golfers of the world fritter away the sum of \$25,125,000 on balls.

**Rules For Long Life.**

These rules for prolonging life have been laid down before the Royal College of Physicians, London, by Dr. Herman Weber.

Moderation in eating, drinking and physical indulgence.  
Pure air, out of the house and with in.  
Keep every vital organ in constant working order.

Regular exercise every day in all weathers.  
Sleep only from six to seven hours, going to bed early and rising early.  
Daily baths, warm one day, cold the next.

Regular work and mental occupation. Cultivate placidity, cheerfulness, hopefulness. Control passions and nervous fear. Strengthen the will in carrying out whatever is useful. Check the craving for stimulants and anodynes.

**Upright Writing.**

England every day sees less and less of the slanting style of handwriting, consequently the percentage of her short-sighted, round-shouldered scholars is small as compared with the 40 per cent. and 50 per cent. of French and German. Here is the description given by a noted specialist as to the position which is taken by the body when writing a slanting hand—"the style in Germany and France, the thorax is oblique as regards the edge of the desk; the left shoulder is raised; the right shoulder is lowered; the vertebral column is curved toward the left and toward the front; the axis of the eye is oblique; the exerting book itself is oblique like the body, and the child looks at it obliquely." How is it in Canada, where any old style of handwriting is allowed?

**Strong Statement of Mrs. James Hughes, of Morley, Ont.—She's Strong and Healthy Once More.**

Morley, Ont., Oct. 2.—(Special).—What Dodd's Kidney Pills are doing for the suffering of that place, is well known to all. It is only when some courageous woman breaks the secrecy that covers woman and her troubles that a passing glimpse of their great work is given. For this reason, a statement made by Mrs. Jas. Hughes, of the place, is of more than passing interest.

"I was a great sufferer for four years," says Mrs. Hughes. "I was treated by five doctors and a specialist from the U. S. I tried nearly every kind of medicine I could hear of, but none seemed to do me any good. 'I was in bed for nearly three years. I had pains in my spinal column, in my head, over my eyes, across my back and through my left side. I took fourteen boxes of Dodd's Kidney Pills, and now I am strong and able to do a good day's work, thanks to Dodd's Kidney Pills.'"

Fortunately, however, the car was running slowly.

**A JUDICIOUS INQUIRY.**

A well known travelling man who visits the drug trade says he has often heard druggists inquire of customers who asked for a cough medicine, whether it was wanted for a child or for an adult, and if got a child they almost invariably recommended Chamberlain's Cough Remedy. The reason for this is that they know there is no danger from it and that it always cures. There is not the least danger in giving it, and for coughs, colds and croup it is unsurpassed. ## MRS. KYLE JUSTIFIED

Verdict of the Jury "Not Guilty" in Killing Magee.

When Verdict Was Announced Judge MacMahon Announced Concurrence, and, Turning to the Accused, Said: "You Are Discharged." Whereat the Large Audience Present Spontaneously Applauded.

Woodstock, Oct. 4.—After three hours' deliberation the jury in the Kyle case returned a verdict of not guilty at 9 o'clock last evening. "We believe the woman was perfectly justified in doing what she did," were the words of the foreman.

"I thoroughly concur in your finding," said Judge MacMahon, who, turning to the accused, said: "You are discharged."

With spontaneous applause the large audience present showed their approval of the verdict.

Throughout the entire day Mrs. Kyle faced the ordeal with a calm, almost defiant air, but the verdict brought to her face a look of relief.

The trial presented no sensational features. Magee was proven to be a worthless character and a betrayer of women.

It was shown that he had taken liberties in the Kyle home and had received no encouragement from Mrs. Kyle.

Judge MacMahon's address was strongly in favor of acquittal.

## BURNED BY LIGHTNING.

Three Erin Men Have a Very Narrow Escape From Being Killed.

Guelph, Oct. 4.—During the thunderstorm Monday morning Ronald Letich, Erin, narrowly escaped being killed by lightning.

He, his father and the hired man were on the stoop of the house watching the storm, when all at once the three were prostrated from a shock of electricity.

Ronald suffered most. The fluid ran down his back, burning it severely, tearing the boots off both feet and one of his socks.

The other two men, although stunned for a time, are not, it is supposed, seriously injured.

The lightning ran into the cellar and made a big hole there.

TO A COMMISSION OF THREE.

Newfoundland Premier's Choice For Boundary Settlement.

London, Oct. 4.—Sir Robert Bond, in the course of an interview, stated that the Newfoundland Government had not yet considered the despatch from the Canadian Government regarding a decision upon the Labrador boundary line being left to the Privy Council, consequently the statement made that the matter was left to the Privy Council was incorrect.

Personally he is of opinion that the course agreed upon at the Halifax conference in 1892 would be preferable, or it might be more satisfactory to submit the question to a commission of three, one to be appointed by each of the contending parties, and the third by His Majesty's Government.

## OPINION OF SCHOOL BOARD

Continued from Page One.

an account from McCall Bros. for oil. He thought being that we have a local dealer in oil, W. W. Scane, that purchases should be made from him.

Mr. Robertson replied that he had given the order to McCall Bros. and it was merely an oversight that it was not ordered from Mr. Scane. The oil that had been purchased from Mr. Scane barely did the work in the Central and more oil had to be purchased in order to oil the floors in the McKeough school.

A letter was received from the secretary of the Library Board quoting \$5 a month as the rental for the library auditorium where one of the classes of the Central school is being held—Fyler.

CENTRAL SCHOOL DRAINS.

Mr. Robertson for the special committee on improvements to the Central school drainage, reported that in times gone past the drains have been flooded with each heavy down pour of rain. A new system of drainage has been installed by Mr. Besset, one of the best systems ever put down in the city. There has not been one drop of water in the basement since it was placed in running order. The committee also asked power to tint certain walls in the school.

The report was adopted. The report was adopted to grant the Central school \$25 for music during their fair.

The invitation to meet the Minister of Education, who comes to Chatham to present The Planet Junior essay medals and open the Central School Fair on October 24th, was accepted.

Tenders were received for heating the new addition to the Central.

Mr. McArthur objected to awarding the contract until the committee which was appointed to meet the Steam Heating Company made their report.

Mr. Bensen for this committee reported having met the company, who were willing to lay their pipes to the school and heat the addition this year by metre providing the School Board will accept a reasonable tender for heating the whole school the year following. It would not pay them to lay down their pipes to heat the addition alone.

The tenders had been opened by the Central school managers and Mr. McArthur objected to this irregularity, as they should have been opened at the Board meeting.

It was decided not to make the figures in the tenders public and to call a special meeting of the Board Wednesday night (to-night) to deal with the heating of the Central school.

Mr. Robertson recommended that Mr. Edwards, janitor of the Central, receive an increase in salary from \$23.80 a month to \$30 a month.

Mr. McArthur objected to this, as he understood the janitor devoted only part of his time to attending to duties at the Central, while a

janitor who devoted all of his time at the McKeough school only received \$10 more a month. He thought men should be well paid, but the scale for paying them should be made as fair as possible. This matter was also laid over until to-night.

The inspector's report was read and adopted.

PAIN ABOUT THE HIPS.

It is a common complaint with women. The right treatment is Nerviline, which penetrates to the source of the pain immediately. Nerviline warms and soothes the affected parts, draws out the irritation and pain, allows the patient ease after one rubbing. No liniment so economical and safe. Nearly fifty years in use, and the demand immensely greater every day! Nerviline must be good.
