About 100 bu. Mangold and 100 bu. Turnips, also 1 Cow 8 yr. old. Wm Wells, Waterdown, Ont.

For Sale

3 heavy Horses and 1 light Horse cheap. Also a good job for the horses. Phone 36 ring 4

Greenville

Mrs. Griefes of Stoney Creek has been visiting friends here.

A number of our young people held a very pleasant Hallow'en party Saturday evening at the home of Mr. Herb. Mondens.

Mr. and Mrs. Walker have moved to Hamilton.

Miss Phyllis Soper has been spending a few days here with Miss Audrey Hopkins.

Fire Prevention Essays

Essay Winning Medal from Ontario Fire Prevention League

Fire Prevention

Fire Prevention is a very important thing, and it saves millions of dollars a year, if we only knew it. Last year the total loss in Ontario, not including forest fires, was nearly eleven million dollars. Not one of these fires needed to be, if we had used the proper method of preventing them. That method is what I am going to give you now.

Do not store your hay away for winter when it is damp for it may heat and cause spontaneous combustion. Don't allow children to play with either bonfires or matches. Never throw away lighted matches, cigars or cigarette stubs. They may catch fire on some dry grass and the flame may spread. Keep matches in a metal box with a cover. Do not go into dark closets, bedrooms or cellars using matches to light your way. Do not use gasoline, or any oil similar to it, to light a fire, or to quicken a slow fire. It may result in death. Don't put ashes in wooden boxes or barrels. Hot ashes will take fire themselves, as sometimes they have little bits of coal mixed in with them. Keep the burners of oil lamps and stoves clean, and never fill them while they are lighted. Don't have storage closets under stairways, as fire in these places cut off your main exit. Don't store oil, paint, grease or fats in the house. Keep them outside if possible. If not able to keep them outside, put them in a metal box with a lid on. Don't neglect to have the chimney flue cleaned at least once a year. Do not store gasoline in anything but airtight metal cans painted red, for danger. Don't look for a gas leak with a lighted match, or candle. You might suddenly find it, to your sorrow.

Very often there are men, women and children burned to death mostly through carelessness. About five times as many people are burned to death as are killed on railroads (steam or electric). The death rate is nearly thirty thousand human beings yearly. If the clothing should catch fire, do not rush around, for it fans the flame, and makes it increase. It is best for someone to roll you in something woolen (not cotton) and roll you about.

A chimney fire may be extinguished by pouring buckets of sand or earth, down the chimney. Chimneys should rise at least 3 above the roof.

When selecting a place to build a camp fire see that it is free from dead leaves, dry grass, or underbrush. Moss or dry turf may smoulder for some time before bursting into flame.

In escaping from a fire, put a wet handkerchief or cloth over your nose and mouth, and creep along with your face downwards. Never tear the clothing from a person who is afire. Cut it off.

October the 9th has been appointed as "Fire Prevention Day" throughout North America. An opportunity will be given for a clean up, and this day will help waken the public mind to prevent the enormous waste caused by fires.

Florence Mitchell, Sr. IV.

Fire Prevention

We have heard a great deal lately about fire prevention, due mainly to the warnings sent out in the form of timely literature on the above sub-

ject and also due to the efforts of the Ontario Safety League to educate the people in such ways that unnecessary and preventable fires might be entirely eliminated thus saving the citizens of our fair Dominion a great deal of loss. The Deputy Governor General of Canada has issued a proclamation setting aside a day each year to be known as Fire Prevention Day and requiring the people of this county to use every precaution for the prevention of destructive fires.

At this time of the year when so many dry leaves are gathered and burned, a word of caution might be added. Do not light bonfires during a high wind, and at any time have a bucket of water at hand in case of fire spreading through dry grass or by sparks to buildings or fences. The indiscriminate use of gasoline or other inflammable oils is responsible for many serious accidents. Overheated stove pipes or defective chimney flues also cause much damage, especially in homes where the lives of our loved ones are endangered. All chimneys and pipes should be carefully cleaned, and any other source of danger be inspected and necessary steps taken to prevent loss of life or property.

It is the duty of every boy and girl in our land to do his or her share in helping to carry out this commendable work of fire prevention.

Dorothea Greene, Jr. IV.

A Guarantee

The publishers of The Family Herald and Weekly Star of Montreal are doing the right thing with the public. Ninety per cent. of newspapers have already raised rates. The Family Herald publishers guaranteed a full year's subscription at the old rate \$1.50 a year to all who remit before December 1st, 1920. We learn that many old subscribers are renewing for two years in advance and being added. It is a great paper and the best value on the Continent.

Wonderful improvements have lately been made in The Family Herald. Members of the Imperial Press Conference, who lately visited Canada, say it has no equal in the British Empire. Canadians should appreciate such a paper at the price. After December 1st they may have to pay more.

THE WATERDOWN REVIEW

Issued every Friday morning from the office, Dundas Street, Waterdown. Subscription \$1.00 per year. Papers to the United States, 50 cents extra. Advertising rates furnished on application.

G. H. GREENE

FRIDAY, NOVEMBER 5, 1920

For Suffering Children.

No stronger call could be made to humanity than that of suffering children, and on their behalf particularly the Canadian Red Cross will appeal throughout Canada during Armistice week. Each provincial division of the Red Cross will have charge of the arrangements in its own province, and all Red Cross work should put down as a top priority. Immediately write your local branch or with the headquarters of the Provincial Division if no local branch is organized.

Our Wheat Fields.

At no time in the history of Canada has her wheat fields meant so much to the world as now. Canada produces wheat of the finest grades and in such large quantities as to place the Dominion well up among the wheat-producing countries of the world. Both Federal and Provincial Departments of Agriculture have done their share in improving wheat varieties and extending the growth of this necessary cereal. An interesting account of the work that has been done is contained in the May number of the Agricultural Gazette, the official organ of the Department of Agriculture at Ottawa. It is there shown that the most widely grown varieties were developed by Canadian scientists. Preston, Stanley, Huron, Bishop, O.A.C. No. 104, Marquis, Ruby, and Prelude have each their valuable factors. The history and characteristics of each are given. The Seed Branch and the Department assist the Canadian Seed Growers' Association in extending the growth of pedigreed varieties. The Seed Branch itself encourages seed crop competitions and seed fairs, tests seeds for farmers and merchants, inspects seeds on sale, and has, through the Canadian Seed Purchasing Commission, ensured supplies of dependable seed wheat during recent years.

Monument to Men's Folly.

"The run of sockeye salmon in the Fraser river, once the greatest salmon river in the world, no longer can be called great," declared J. T. Babcock, Assistant Commissioner of Fisheries for British Columbia, in addressing the Canadian Fisheries Convention in Vancouver. "The Fraser is fished out," he said, "and this condition is a monumental record of man's folly and greed." The only redeeming feature is that it is not too late to take steps to restore the Fraser to its former greatness, he added.

Canada's Greatest Dam.

The greatest dam in Canada has recently been finished, impounding the waters of the Jordan river, near Vancouver. It is of concrete construction, nearly 900 feet long, and the total height measuring from the breast to the bottom of the buttress foundations is 126 feet.

An Actor in Khaki.

A good story is told of a young actor enlisted in Canada, and in his difficulty what was more natural than that he should turn to his profession for help, for he had been trained with the greatest actors in the land. He practiced in seclusion, and one day, when his trained recruits had been drafted and a new batch had appeared, he strode to the job in the full panoply of the Cockney drill sergeant, pungent with the wit and wisdom of the Mile End Road. He never had a greater success in any part, and if his points were not applauded they were promptly obeyed.

Oil-Burning Locomotives.

Oil-burning locomotives are now used in twenty-one states, on fifty-three railroads and on 32,000 miles of track in this country. They consume 42,000,000 barrels of oil yearly.

Carrying a Load.

Many a man who objects to carrying a bundle home from a dry goods store goes home from her club loaded.

Typus in Canada.

In its earlier days Canada suffered from the ravages of a disease then known as "spotted fever" but now known generally by the name of typhus. It is a disease that spreads rapidly and is very destructive of human life. In the years 1846-47 it was brought to Canada by immigrants and caused great loss of life. It is only by taking urgent measures to stamp it out in the centres where it is now raging that it can be prevented from extending.

Shorthorns Took First.

In the block test at the last fat stock show, held at Buenos Aires by the Rural Society of Argentina, animals of the Shorthorn breed were first and third in a class of 13, while second and third places were taken by an Angus cross and a pure-bred Angus respectively.

A RED CROSS BRIDGE.

Food Plentiful In Canada, Scarce In Europe—Needs of the Children.

The development of the dairy industry of Canada during the past two decades has been surprisingly rapid. Quick to realize the profits to be derived from milk production and the great value of dairying in conserving the fertility of the soil, the Canadian farmer has not hesitated to increase his investments in dairy cattle. The industry expanded during the 4 years of world war. Canada, being distant from the theatres of war, although handicapped by the drafting into military service of half a million of her most vigorous manhood was able to continue the development of many of her important industries, particularly agriculture.

It was not so in Europe. There the fiery blast of war, which left profits in some parts of the world, almost extinguished not only industry but national life itself in other. The drain upon manhood was so great that now in hundreds of thousands of families no adult males remain. Europe moreover is filled with orphan children whose prospect of life is marred by the lack of all that is necessary to bodily and mental growth. In most cases the earning power and consequently the purchasing power of their families is utterly destroyed.

Turning again to Canada we find there a surplus production of the commodities that are so badly needed in Europe. Condensed milk for instance is a commodity that is a prime necessity for the children of the poor communities of Europe but the nations to which they belong have no means of purchasing it for them. The Canadian Red Cross is going to endeavor to supply part of their needs by means of a general appeal for contributions to be made during Armistice week on behalf of the British Empire Fund, which is to be used in the humane task of relieving the sufferings of millions who are stricken by famine and disease. Part of the fund will be used for purchasing in Canada suitable supplies and thus the Red Cross will furnish the bridge across which some of our surplus milk will reach the enfeebled children in war-stricken areas. Those who assist will not only have the satisfaction of having contributed to relieve the sufferings of others less fortunate but by helping others will thereby indirectly help themselves.

FROM GENEVA.

Organizer for League of Red Cross Societies Tells of Need of Europe's Orphans.

"While we at home are intent on industrial expansion and a place in the sun, Europe in its war-weakened condition is fighting for its very existence," said Donald W. Brown, director of the department of organization in the League of Red Cross Societies of the World, which has its headquarters at Geneva, Switzerland. He visited Toronto to learn the peace program of the Canadian Red Cross Society and to establish closer contact between it and the League.

Millions of War Orphans.

Having just arrived from Europe, Mr. Brown was able to give the Canadian Red Cross some first hand information concerning the people of Europe. He called attention particularly to the condition of the children, so many of whom are now orphans. While the exact number who have lost one or both parents during the war cannot be determined, the most conservative estimate places the number at over ten millions. This number seems quite consistent with the heavy war casualties among so many nations.

Dependent Upon Charity.

The condition of these children is in most cases very pitiable. Many of them have no homes and they are dependent upon whoever may be charitable and kind enough to help them. But there are few who are able to give such help for the mass of the people of Russia, Poland, parts of Roumania, Czecho-Slovakia and other countries are so poor that they have not necessities for themselves. Consequently in the great area between the Baltic, the Black and the Adriatic Seas, there are millions of children who face the next few years, and particularly the coming winter, without hope of proper care unless outside assistance is given them.

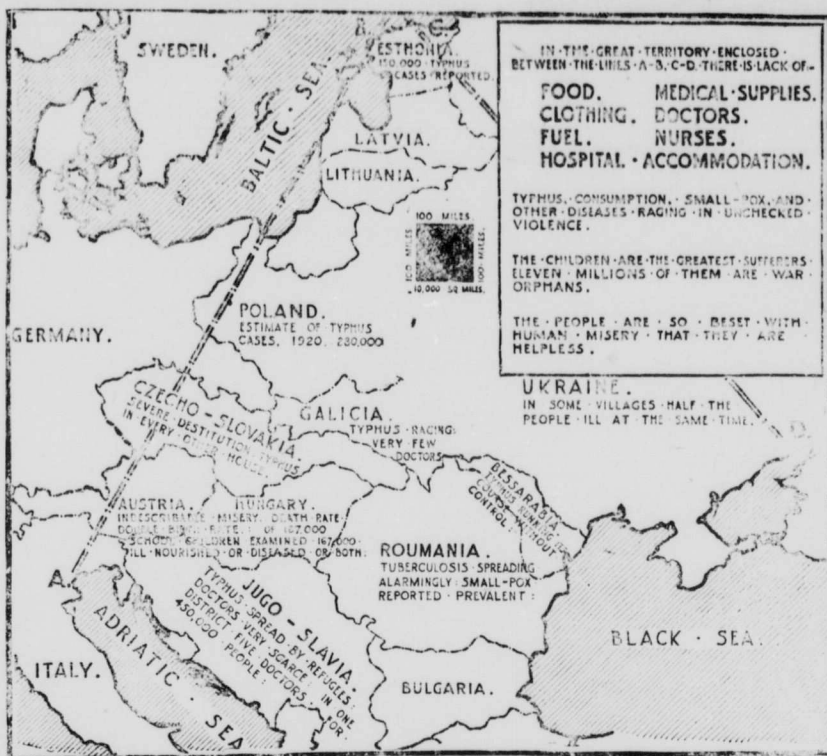

Disease Prevalent.

In addition to the unhappy condition of the children the adult populations are in the direct of misery on account of disease. Suffering has been accentuated by lack of food and clothing, nursing and medical attention, and tuberculosis, smallpox, typhus and dysentery are continuing unchecked.

Typhus which has so often proved a scourge and menace to the human race is again prevalent, and unless checked will most likely extend its ravages to an alarming degree.

British Empire Appeal.

For these urgent reasons, Mr. Brown said, the League of Red Cross Societies has made an earnest appeal to the people of the British Empire and he was glad to hear that the cause of the suffering children was being taken up in Canada. He had learned that an appeal on behalf of the British Empire Fund would be made in Canada by the Canadian Red Cross during Armistice week and wished for it every success.

Study this Map

It tells—but only partly tells—the Story of Misery in Central Europe.

Within the great territory between the black lines millions of destitute children are doomed to grow up weak and deformed through want of fats, milk and sugar, unless immediate help comes from without

HERBERT HOOVER, invited to speak at a Canadian Red Cross meeting, said:

"Our problem over the forthcoming winter appears to be about 3,500,000 to 4,000,000 children.

"These children are the obligation of every man, woman and child in the Western Hemisphere, for we have suffered less; but, beyond this, they are a charge on the heart of the whole world."

The Canadian Red Cross

appeals on behalf of

The British Empire War Relief Fund
(To Combat Distress and Disease in Europe)

\$10.00 will save a child; \$1.00 will give it "saving" food for a month. Help in this humane work by sending or bringing your subscription to the nearest local Red Cross Branch or to The Canadian Red Cross Society, 410 Sherbourne Street, Toronto.

Two Explorers.

Martin Killin and Adelbert Gumaer, the last two members of Vilhjalmur Stefansson's Canadian Arctic Expedition to leave the Arctic, are reported aboard the trading schooner Anna Alga, which is working its way toward Nome.

Killin and Gumaer were not members of Stefansson's original party. They were members of a party Storker Storkerson, Stefansson's lieutenant, led on to an iceflo last year in the hope that the Arctic drifts would carry the floe westward to Siberia. After spending eight months on the ice the men found themselves about fifty miles from their starting point. They all came ashore and Storkerson and one other member headed overland for the outside world. Killin and Gumaer boarded the Olga and started for Nome.

Storkerson's trip outside was his first in eleven years. He has been an explorer, trader and trapper along the northern rim of the continent ever since 1908. He expects to associate himself with Stefansson in handling the Canadian Government's proposal to stock the northern tundra plains with reindeer.

Dogs Eat Esquimo Church.

In the Hudson Bay country, where the dogs are half wolves, a band of these famished animals actually ate up a church. The Esquimo Christians had built a tiny chapel to hold twenty people. But the poor converts did not long enjoy the little church, of which they were so theologically proud. The building was of whalebone, an edible substance, and one Sunday the pagan dogs ate every morsel of the sacred edifice.
