WAS HEAA COWARD? BY BA. Bobinso CHAPTER I.

CHAPTER 1 Two naval officers, Steve Reyburn and the writer, were standing, one morning, in 1864, on the deck of the United States steamer Wilderness, off Wilmington, N.C., riewing a blockade-runner which had been captured the night before, and opeculating as to what portion of this prize would finally puss to their account. After a brief discussion of the matter, Reyburn suddenly changed the subject by exclaiming:

asser a prior discussion of the matter, Reyburn suddenly changed the subject by exclaiming: "Doc Higgins is a coward !" "Not W hat makes you say that?" "Because he is. If you had seen him at night, you'd have been disgusted rist him."

left the deak, we were headed seaward, and we're now, no donkt, in deeper water." Quick as the change could be effected, the doctor moved his position so as to bring the heavy timbers between him and the stern of the vessel, which pod-tion, he naturally reasoned, was then to-ward the fort. I looked at the doctor, but, though I said orthing. I could not help thinking of the agony of mind which must be for-menting him. To be thus haunted by the phantom of possible danger; to live in constant dread of impending evil; to sit and listen and magnify every sound, trying to understand and to explain it; to shiver and shudder and groan and sweat with terror, night after light, would cortainly drive the man mad, un-less something happened to break the influence which seemed to control him. "Doc," I said, determined to suggest something to kelp him out of his trouble, "take an opinte, and--" "Hark!" integrapted the doctor. "What was that!" "I listened, and this time I heard a its pathened and this time I heard a "Because he is. If you had seen him last night, you'd have been disgusted with him." ""It is'll you what he did. When the head from the fort burst in the water-tank Doc Higgins stood beside it, and, of course, got a drenching from the water out of the man-hole. Instead of stopping to see what the damage was, he ran into the engine-room, trembling the a great calf and mopping his face with a handherchief. When I asked him what the matter was, he gauged out something about the shell, that some of our men had been killed, and that he was dripping with blood. For a minute, I thought he had spoken the truth; but as soon as I could get a good look at him, no could see that his handkerchief was as white as if it had just been washed at had here aligneted with him. I white as if it had just been washed at had here aligneted with him. I white as if it had just been washed and only been wet with tank water." "Of course-acon as I could first says who tas here aligneted with him. I when a see had his handkerchief was as in when he held his handkerchief was an o blood on it, he was the mout the steam synthing." "Did he say anything." "Did he say anything a surgeon the beleft the engine goom. It was that which he left the engine som. It was the beleft he engine som. It was the beleft he engine som. It was the beleft he shall better the beleft he align a surgeon the beleft he and him. Stere." "You re no hard on him. Stere." "Listen! There it is again! What is it?" I listened, and this time I heard a dramming noise on the bottom of the vessel. "That's a fish, doc; that's all. What they call dram-head. Plenty of them in these waters. We must be pretty well of shore by this time. By the way, the moon rises at six bells, and the captain's running out so as not to be caught map-ping. Turn in, doc, turn in! We're all right for to night anyhow." "The doctor, at this cheering bit of in formation, gathered courage enough to leave his post of shelter and go to the deck to satisfy himself if we were indeed in deeper water; after which he roturned and went to his bunk; where he was soon salee.

and went to his bunk, where he was soon seleo. After breakfast on the following morn-ing, Reyburn again opened the subject of the doctor's peculiarity. "Have you changed your mind about Doc Higgins" he asked. "No, not as to his being a coward. It's a remarkable fidentick! There is nothing remarkable about it! It's as plain as the nose on your face!" "Well, since you're determined to have it so," I replied, resolved not to argue the matter. "I cannot help it. It's and ruly sorry for the man, though. I don't know when my sympathy went out more fully to another than it dil last night to the doctor. It was truly pitable to see him, a strong, large-heated fellow like that, so utterly nn-like himself."

of teshing children. Fine man that for, an emergency." "Yon're too hard on him, Steve." "No, I'm not; and depend upon it, be-fore we've been on this blockade a week, you'll find I'm right. What such a man ever came into the navy for is beyond me. Here he comes now." Reyburn had hardly finished speaking, when I heard the cheery voice of the doctor"

"That's quite a prize we captured last might," asid the doctor. "Yes," responded Reyburn, "and"--pointing to a hole in our hurricane-deck —"that quite an opening that shall made. Did you notice it?" I was anianned of my companion for harsemark, but the doctor appeared not to notice; for he replied: "Yee, I looked at that first when I ame on deck. Eve also been looking at the water-tank. After a pause the doctor continued: "You may be sure Fil never forget that water-tank. I be-hive I was as thoroughly scared last night as it is ever possible for a man to be. When I runked into the angine-room, I thought I was soaked to the shin with blood. The water was ware: that served to heighten the delinsion, and aa-isfed me it was blood. If the water had been cold, I should have known better." "It was only nerrousness, doo," I said.  "He'd botter resign," said Reyburn.
 "He certainly was never cut out for the navy."
 Later in the day, having an opportunity to argage the doctor in conversation.
 I asked him if he was always timid in the dark.
 "Yee," he said, with a shudder, as if some horrible memory had been suddenly awakened. "Darkness always upsets me completely: makes me sad and gloomy. Here, on this blockade, it converse the most fantastic and distressing experiences, from which there seems to be no secone. Time drags heavily, minutes expand into hours, sometimes, and I suffer the torments of the damed.
