REPORT OF MINISTER OF MINES.

Decrease in Gold and Large Increase in Coal.

The report of the minister of mines for the year ending 31st December, 1884, shows that there is still another decrease in the output of gold, the total being 776,160, or a decrease of \$68,000 from that of 1883.

The number of miners engaged has also decreased, being 1,847, in comparison with 1,960 of the previous year, while the average yearly earnings per man is \$208, a decrease of \$6, and the lowest \$188.

The total output of gold in any one year since 1865, when the total was 1,000,000, was \$3,730,850, with 4,000 miners, an average earning per man of \$934. In 1875 the output was \$2,474,904, with 2,292 miners. An average wage of \$1,222, the highest of any year in the mining industry.

The total output of gold since the last six months of 1884 has been 640,072 lbs.

The reports from the various gold commissioners of the districts are printed with the usual detail, and contain a large amount of statistical information in reference to the operations for the year and progress of retrograde work.

It is interesting to note that in this district there has been a slight decrease in the number of white miners, and a corresponding increase in Chinese. The number of white miners is 1,847, and the number of Chinese is 1,000.

The government assistance would give more substantial results if a thoroughly reliable and competent quartz assayer were to examine the ledges and give a practical opinion of their value; or if the bona fide company would consent to prospecting on promising enterprises.

Williams creek is referred to as being about plain out, with the exception of a few alluvial deposits.

Lower Antler creek is now mined exclusively by Chinese. The Nason quartz mine has made extensive preparations to push their claim, and good results were expected. Gross creek is now mined by the same company, and it is believed that legislation would appear to be necessary in view of large claims being held by absentees.

The lighting of the assay office at Barkerville is referred to as being a loss to the community, as it was discouraging quartz mining. The hope was made that it would again be opened.

The approximate yield of gold in the districts, in the progress of the country, many old quartz ledges having left the district. This is accounted for by the high price of provisions, and the fact that the railway line, which the quartz ledges have been higher than that of quartz ledges, which are not so richly and anxiously looked for, when an attempt is made to progress.

The report of Mr. J. L. Crisp, gold commissioner, is not very encouraging. The total output of the district is \$1,010,000, by 180 miners, whites and Chinese being equally divided. Deane, the largest quartz mine, is now worked, though there were a few good claims on Thibault creek, but the output is not the largest amount, \$53,000.

Mr. F. Sout's report of this district shows a large increase in mining operations of that of previous years, the output being \$107,834, an increase of \$28,000 over the previous year. A very large amount of the increase is due to the Bridge river mines, in which section the mines are nearly all white men. The discovery of Jas. McKinlay is referred to, and the prospect that it will be developed, if found without fracture below the foot.

The lack of enterprise in opening up the auriferous belts of the district is referred to, and also on the Big Slide.

YALE AND LYTON. The gold mining operations in this district are confined principally to the mines of the Fraser. The total output in Yale and Lyton divisions was about \$15,000, with no new developments except the record of claims opposite the town of Yale.

KAMLOOPE. There is nothing to report from this section, except that a prospecting party who had been out for a lengthy period met with poor results.

Mr. Vowell's report gives the output of this district at \$60,386, the largest amount of the year. The output is \$36,730. These returns are considered satisfactory as compared with last year.

The output of the latter place mines met with poor success owing to the constant high stage of water.

There were 49 claims being worked in 49 claims being worked in Kootenay Lake and 139 in the Kootenay region. The prospect was that the quartz mines would be extensively developed during the season of 1885. The necessity of an assay office for the district was referred to on account of the rapid increase in quartz mining.

COAL MINING. The report of the output of coal for the past year shows an increase of 181,070 tons over that of 1883 from the various tons of coal were exported. This gratifying circumstance is referred to as adding greatly to the general wealth of the province.

The principal market for the coal was that of California, to which point the losses for the last twelve months are \$200,000. The local consumption amounted to 87,485 tons, 30,000 tons more than that of the previous year. Of the 1,039,075 tons of coal imported into San Francisco, British Columbia contributed the largest amount, 291,546 tons, being next with 180,497 tons.

The working of the various mines of the province are exhaustively referred to in the report and a great deal of statistical information given.

The report shows that the miners engaged in 1,244, with an average earnings of \$250 to \$124 per day for whites and \$1 to \$1.25 for Chinese. Of the latter 603 are employed. The value of the plant used in mining is \$700,000 for all the mines.

NAVY.—The flagship Triumph, which will be in about six weeks, is under command of Capt. Ross, an old Victoria man, and is being built by the Victoria shipyard. The ship is to be commanded by the Hon. Mr. Ross, who has been here about five years ago. Admiral Lord Horsey was the first to command the ship, and he was the first to be in charge of the ship. The ship is to be built at the Victoria shipyard, and is to be launched in the month of August.

NAVY.—The shipyard at Victoria is now working on the ship, and is to be launched in the month of August. The ship is to be built at the Victoria shipyard, and is to be launched in the month of August.

What Some People Say.

That Sir Charles Tupper recently attended a meeting in London and declared that Canada is ready and willing to provide a living for 100,000 of the waifs and street Arabs of England.

That supporters of Victor Napoleon have issued an election manifesto, which declares against "republicanism" and appeals for the support of all who are opposed to a republic, promising them fair representation on an electoral list.

That a few days since the grasshopper descended upon the Naima vineyard, near Folson, in such numbers that the immediate effort was necessary to prevent the absolute destruction of the vines. All the irrigating ditches were filled with water, and the grasshoppers were washed down and destroyed.

That the number of grasshoppers which were destroyed is estimated at 60,000.

That Mrs. Delaney, long having been torn limb from limb by Indians, hatched into mischief by squaws, and otherwise horribly ill treated, is now safe with General Middleton. After this one will never know what to believe.

That we have heard of many men men, but the climax appears to have been reached in the case of the vandals who pillaged the delicacies sent by the people of Winnipeg to assuage the sufferings of the sick and wounded at Saskatoon. It is not worth while trying to ascertain the names of these wretches in order that they may be made public and contrasted to the public infamy which they justify.

That great excitement was created in Okanagan, shortly Waterloo, by the attempted murder of two Hindus, one of whom, returning to their barracks, they were fired at from behind a hedge by some unknown person, but happily escaped without receiving any injury.

That Lord Rowton (Montague Cressy) will be made private secretary to the Queen.

That yesterday was the 70th anniversary of the battle of Waterloo.

That there was a general strike among the clerks at noon yesterday at San Francisco.

That the Beaver, the first steamer on the waters of the Pacific, is offered for sale.

That the Duchess of Montrose lights her training stables with electric lights.

That a trout that got away rarely weighs less than seven or eight pounds.

That Helen of Troy was the first woman who went to Paris and leave her husband at home.

That the London World asserts that Irish Jews have improved lately almost as much as Scotch Jews have deteriorated.

That the Victoria, which a few months ago stated that Victoria was in a state of decline and depression, is now a young India as far as the progress of the country, many old quartz ledges having left the district. This is accounted for by the high price of provisions, and the fact that the railway line, which the quartz ledges have been higher than that of quartz ledges, which are not so richly and anxiously looked for, when an attempt is made to progress.
