ANOTHER DAY OF VICTORIES FOR BRITISH AND BELGIANS

Gains of Greatest Importance Also Made by the Australians Between Cambrai and St. Quentin.

With the British Army in France, Oct. 1.-This was another day of victories for the fighting British army. The Belgians also continued their forward movement.

Gains of the greatest importance ere made by the Australians beween Cambrai and St. Quentin, and seems that they have crossed the

feeing east and northeastward from this region, as well as other regions. The day was an ideal one for flying, and the British aviators, who had not been busy for severa! days, again into their own. The planes flew lew over the enemy masses and pour-ed bullets by tens of thousands into ed bullets by tens of thousands into them, while at the same time bombers picked massed troops and loosed projectiles on them in full flight, inflicting terrible destruction. The better vialbility also allowed the British sunners to do more accurate work.

Once more casualties of great proportions have been inflicted on the Germans, who are now fighting with greatest desperation, realizing that their position in this entire area is more precarious than at any time dufting the past four years.

Hard, Close Fighting.

True, there has been again the hardest of close fighting astride and in the Hindenburg system; but back of here there is open country. Joncourt now is well behind the British lines after brick fighting. The lines are some distance east of Levergles. Estrees, captured once and then lost in a counter-attack, has now been taken again by storm. The Austra-

in a counter-attack, has now been taken again by storm. The Australians smashed well saxward of it, making sure of maintaining their gain. From here the battle line curves back northwestward, passing about 1500 yards southwest of Gouy, which also has been reached by the allied troops, but at the present moment is in German bands. The torch has been applied to Cambral and the town is burning briskly. It is evident that the Germans realize they must get away from this locality, and consequently they are burning Cambral and other places. Great tongues of flame and billows of smoke are rising from Cambral.

Victoria Firemen on Strike As Result of Chief's Discharge

Victoria, B.C., Oct. 1.—Victoria's firemen went on strike at 10 o'c'ock this morning, as the result of the action of the city council last night in dismissing Pire Chief Davison on the grounds of economy and reorganization. The firemen announce that they will deal only with emergency cases. They had asked the council previously for higher wages and the two-platoon system.

Success of Foch's Tactics Deprives Germans of Liberty of Action.

French Headquarters in France, Oct. 1.—Four battles are now in progress from Flanders to the Meuse. They cover a total front of one hundred miles and occupy the Germans to such an extent that they have been obliged to give up the benefits derived from shortening their lines, if the hypothesis is true that they did so in order to obtain reserves with which to constitute a manoeuvring force.

nanoeuvring force.
Instead of employing those reserves in an effort to regain the initiative in certain positions, they have been oblig-ed to call upon them to reinforce the troops in line at points successively threatened and to replace depleted di-

visions.

The success of Marshal Foch's tactics, it is pointed out is not alone in the liberation of villages and towns and prisoners and cannon captured, but in first depriving the Germans of their liberty of action, then requiring them so to disperse their reserves that they were nowhere able to concentrate the masses necessary to maintain their

Austro-Hungarian and German Forces There Are Expected to Make Firm Stand.

London, Oct. 1.—The military authorities are agreed that the allies must prepare for a new campaign in Serbia against the Austro-Hungarian and German forces, which number 150,000, including those in Albania. The German elements are chiefly concentrated in the neighborhood of Uskub, which French cavalry have entered, while the Austrians are expected to defend Nish as well as the confluence of the western and southern Mórava Rivers and the great strategical points down to the Danube.

British Headquarters in France, Oct. 1 .- The battle along the St. British Headquarters in France, Oct. 1.—The battle along the St. Quentin-Cambrai front was resumed this morning on a scale of ferocity unequaled in the present war. The Germans have brought up large reserves and are resisting and countering with desperate determination. The dans north of Cambrai are engaged against at least eight German divisions, nearly 100,000 men.

Joneourt was reported to have been taken early, with a large part of the Naura trench system. The Australians are working up the trenches of the Hindenburg system in the direction of Gouy, and have taken Estrees and an important hill ridge astride the Hindenburg line northeast of Bellicourt.

Time Limit Should Be Fixed for Return to Submit to Military Service.

Ottawa, Oct. 1. — Negotiations urising out of the circumstance that young men from Newfoundland not permanently resident in Canada or permanently resident in Canada or earning their living here are exempt from military service have been in progress between the Dominion Government and the Government of Newfoundland. The central appeal judge under the M. S. A. recently ruled ruled that students coming to Canada temporarily are not subject to the act. the result being that a number of natives of the island colony may avoid their military responsibilities while in the Dominion. The secretary of state for external affairs has suggested that the Canadian Government should stipulate with Newfoundland a limited period with n which residents of either country living in the other might elect to return to their own country for military service, a convention along these lines having been concluded with the United States.

This suggestion will be communicated to the governor of Newfoundland. Sir Alexander Harris, with an expression of the hope that the government of that country will consider the expediency of taking steps to arrive at an understanding with Canada in regard to the matter.

PEED UP PRODUCTION OF COAL ACROSS LINE

Washington, Oct. 1.—Greatly increased supplies of coal to meet the demands of the nation's vast military program, and to assure adequate supplies for domestic needs are expected by officials to result from the increased production campaign launched by Fuel Administrator Garfield, calling for an increase of 161-2 per cent. in the bituminous outout, and an increase of six and one-third per cent, in the anthracite output in the next six months.

The bituminous fields are asked for an average production of 12,234,000 tons weekly, an increase of 1,731,000 tons ever-production during the same period last year, and the anthracite mines are asked to average 2,030,000 tons weekly, an increase, as compared with the winter months of last year, of 121,000. Maintenance of these quotas, Fuel Administrator Garfield has said, "will give us all the coal needed this winter."

Dining-Room Furniture in Period and Characteristic Designs

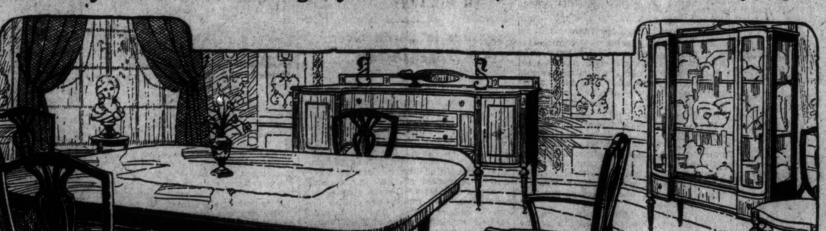

Drawing Your Attention Particularly to Sets of Mahogany and Walnut, in William and Mary, Queen Anne and Adam Effects

In these days of limited production such an extensive and varied assemblage of new furniture is something to be vastly appreciated by anyone intent on the furnishing of dwelling place, club or hotel. Our buyers have put their numerous resources to the extreme test--with the result that a splen-

did array of new and standard designs in American and Canadian cabinet-making is presented for your inspection---furniture to meet

The furniture our artist shows in the dining-room sketched above—developed in mahogany with the straight lines, classic medallions and "tooth" grooving characterstic of the famous brothers Adam. Notice the shield back chairs-they have blue leather seats-and the long, low lines of the sideboard. Consisting of beautiful oblong table-with two reserve leaves-sideboard, serving table, china cabinet, and set of five chairs and one arm chair, the set is priced at \$633.00. It may also be had

A delightful set of walnut furniture is a faithful copy of the cabinet-making of Queen Anne's day, boasting the graceful cabriole leg, with ball foot, serpentine

front, with "antique" handles on the drawers and cupboards, the latter being inset with panels of burl walnut. The china cabinet is delightfully quaint with its walnut

doors, and the dinner wagon rejoices in a capacious cupboard beneath its wide serving top. The seats of the six chairs are covered in green leather, and the table is oblong, with two extra leaves. Price for 10 pieces

A good example of the design associated with William and Mary is found in a walnut set with long, low sideboard, the cup-shaped leg and curved under-base, typical of the period. The table is round-with usual every type of furnishing of living rooms, dining-rooms, bedrooms, halls, and sunrooms.

For today the magnificent display of dining-room sets will be specially emphasized --- a display in which the exquisite simplicity of Adam designs and the grace and charm of those

of Queen Anne and William and Mary periods play a prominent part. Following are a few examples;

> extra leaves -- the serving table boasts the same useful cupboard described above, the china cabinet has wooden doors and the six chairs are covered with tapestry. Price for 10 pieces \$406.00.

And to be seen in the dining-room of the Furnished Home-another walnut set in the massive, handsomely carved style of the Italian Renaissance, so eminently suited to some spacious, ceremoniously decorated rooms. The chairs are upholstered on both seats and backs, and covered with tapestry, and in addition to china cabinet, table, dinner wagon and sideboard, is a chest for linen or silver. Price for 11 pieces \$1,400.00.

1.—Some particularly valuable territory was won by the British first and thirty-second divisions on the front between St. Quentin and Le Catelet. This included the whole of Le Tronquoy and its formidable tunnel system, with more than 500 prisoners.

The comparative slowness of the progress in the last twenty-four hours is accounted for no less by the wild weather than by the stern enemy resistance. The advance has been sure, however, even if it lacked speed, and in the face of the conditions it may be considered remarkable that the attacking forces should have gotten on thru the Hindenburg network as far as they have.

Important captures of guns by the Belgians are reported. They took some very heavy naval pieces on railway mountings near Staden.

Catarrh of the Stomach Is Dangerous

Thousands Have It and Don't Know It," Says Physician. Frequently Mistaken for Indigestion—How To Recognize

"Thousands of people suffer mere or less constantly from furred, coated tongue, bad breath, sour burning stomach, frequent vomiting, rumbling in stomach, bitter eructations, gas, wind, and stomach acidity, and call it indigestion, when in reality their trouble is due to gastric catarrh of the stomach," writes a New York physician.

Catarrh of the stomach, is dangerous cause the mucous membrane lining of stomach is thickened and a coating

because the mucous membrane lining of the stomach is thickened and a coating of phlegm covers the surface so that the digestive fluids cannot mix with the food and digest them. This condition soon breeds deadly disease in the fermented, unassimilated food. The blood is polluted and carries the infection throughout the body. Gastric ulcers are apt to form, and frequently an ulcer is the first sign of a deadly cancer.

In catarrh of the stomach a good and safe treatment els to take before means a teaspoonful of pure Bisurated Magnesia in half a glass of hot water as hot as you can comfortably drink it. The hot water washes the mucus from the stomach walls and draws the blood to the stomach, while the bisurated magnesia is an excellent solvent for mucus, and increases the efficiency of the hot water treatment. Moreover, the Bisurated Magnesia will serve as a powerful but harmless antacid, which will neutralize any excess hydrochloric acid that may be in your stomach and sweeten its food contents, Easy, natural digestion witheut distress of any kind should soon follow. Bisurated Magnesia is not a laxative, is harmless, pleasant and easy to take, and can be obtained from any local druggist. Don't confuse Bisurated Magnesia with other forms of magnesia, miks, citrates, etc., but get it in the pure bisurated form (powder or tablets), especially prepared for this purpose.

New York, Oct. 1.—Major league baseball, insofar as it concerns the National League, will be officially terminated at the annual meeting of the association to be held in this city on Dec. 10. At the gathering the senior organization will formally wind up the business affairs of the season just closed and enter upon a hiatus which will remain undisturbed until such time as internationa, affairs appear to warrant a revival of the professional end of the national game.

This, at least, is the intention of the magnates at the present time, and nothing short of a most sensational change in the war status within the next two months will cause a shift in the plans of the league. It requires a long period of preparation and much detail work, prior to the opening of each pennant race, and it is recognized that in the present unsettled state of baseball affairs it would be impossible to renew the operation of the circuit without ample time in which to formulate arrangements. A declaration of peace coming late next spring would prove of little value to the big league clubs, according to the opinion of prominent magnates.

It has been pointed out that the players of the bareous teams would be scattered to the four points of the compass; that some of the baseball parks will have been adapted to other forms of business; that problems would arise during the readjustment period which have never confronted baseball managements, and that the best policy will be to make haste slowly. General opinion appears to support the idea that a new and better order of professional baseball will come for the attain problems would be lost if the big leagues rushed blindly back to the game at the first hint of an opening. It is understood, however, that the magnates will not the their hands by any definite statements or arrangements, but will leave the affairs of the organization in such a fluid state that business be resumed at the proper moment with as slight a jar as possible. The office of the league will be continued, and Secretary Heydle

FIRE **PREVENTION**

Extracts from

PROCLAMATION

Issued by His Honor the Lieutenant-Governor of the Province of Ontario.

Whereas next to the care of those who are offering their lives on the front line of battle, the conservation of all our energies and substance is our most important problem; our most important problem;

And whereas the saving of human life, thrift, and the prevention of loss of property through destruction by fire, is an aid which every one should give willingly to the community at large;

And whereas the reckless and impoverishing fire waste that confronts the people of our Province is appalling;

Therefore, believing that the loss can be minimized only by awakening in the public mind a universal watchfulness against carelessness, accumulation of rubbish and unsanitary conditions;

Because of this great need and in order to arouse a sense of watchfulness, carefulness and cleanliness, and to create a greater personal responsibility in reducing the number of preventable fires; We have thought fit, by and with the advice of our Executive Council for Our Province of Ontario, to name, and do hereby name Wednes-

McIntyre Again Prominent in Trading.

Despite the irregularity in the New York market yesterday, the general tone on the Standard Exchange was one of continued firmness, with Dome, Dome Extension and McIntyre supplying leading features, Dome sold here at 11.00; equaling the record set up in New York, but the stock fell back to 10.00 at the close of the big market, when a decline, including 'peace,' as well as 'war,' stocks, was in progress, Dome Extension, in on the other hand, displayed consistent strength, opening at 16, unchanged from Monday, and rising to 17, with the gain of the full point retained at the finish. Dome Extension is now at the highest point in months, and buying of an 'inside' description shows no sign of slackening, McIntyre was in good demand at from 150 to 148, closing at the latter figure. The annual report is likely to be made public in a week or ten days, and it is announced that the meeting will take place on Oct. 28, Hollinger was up a point, at 5,00, and Hattie was given strong support, rising two points, to 55. Other firm spots among the gold stocks were: Vipond, at 12½, are advance of 1½; Porcupine Crown, at 15, a gain of ¼. Thompson-Krist was steady at 15, as an aftermath of its recent advance of or several points.

The Cobalts showed no important changes, La Rose, which has fallen into inactivity after three weeks of brisk trading, came out at 50½, a point below the bid price of Monday, and Kerr Lake was also easier, at 5,75, McKinley-Darargh was steady at 40½, and Ophir at 6. Timiskaming sold off ¼, to 30, and Petrerod.

Montreal, Oct 1.—Prices moved irregularly on the Canadian stock exchanges today, strength in certain directions being offset, and something more, by heaviness in others. Net losses were in a considerable mejority over net gains at the close, Fairly sharp setbacks in leaders, like the steel issues, with smaller declines in the power and paper group, tended to give the market a rather heavy appearance, when the chief features of strength were stocks of limited market interact, like the milling stocks and specialities, such as Woods Manufacturing and Maddonald Company.

Steel of Canada yleided 1%, to 70%; mader sales of about 250 shares. Both closed at their lowest.

Paper stocks fell back also, altho more flowly. Brompton, Riordon and Spanish River pref, sold off from a good-sized fraction to a point. The proper stocks were extremely quiet, with Montreal and Laurentide fractionally lower, Canada Steamships also yields a fraction.

The annual meeting of the McIntyre Poscupine Mines has been called for October 26. The financial statement will probably not be ready for another week or ten days, but it is understood that results have been quite satisfactory for the twelve months ended June 30 last. The mine is being operated quite satisfactorily at the present ON TORONTO EXCHANGE ated quite satisfactorily at the present time, according to the management.

Sales of stocks on the Toronto Stock Exchange in September this year are nearly double those of the corresponding month of 1917. On the other hand sales of bonds show a falling off, while transactions in mining shares were much below 50 per cent, of those of a year ago. The figures compare as follows:

Cement, Steel Stocks and Canada Steamships Weaken Under Pressure.

The pronounced irregularity in New York with decided weakness toward the close naturally exercised a depressing effect upon the Toronto exchange yesterday, and losses were fairly general, with Cement, the steel stocks and Canada Steamships the chief sufferers. Brazilian far outstripped other issues in activity, with transactions of nearly 750 shares, and its tone was strong in the early trading, but it yielded to unfavorable influences in the afternoon, closing at 48%, a point below the best price, for a net decline of %. The steels were lightly traded in, but yielded readily in sympathy with the break in United States Steel. Steel of Canada at 70% showed a loss of 1%, and Dominion Iron at 50% a decline of 1%. Cement weakned 1% to 66%, and Canada Steamship at 47 was a full point lower. Five share of Nova Scotia Steel came out at 65%. The first sale of C.P.R. here in soch time was at 170%. Barcelona was firm at 12, and the Russell Motor issue strong, the common at 90% and the preferred at 91. Maple Leaf common, so in the morning at 130, half a point above the previous high record, but sagged 129, showing no net change from the previous level. Toronto Railway with the first and third issues being shad. %, while the second issue was % higher the day's transactions: Shares, 180 war loans, \$16,300.

BUSHEIS FOR EXPORT

When Cansdism Mills Are Supplied, More Wheat Will Be Exported.

Winnipeg, Oct. 1.—The arrangements by which the Dominion Government undertakes to surpervise the purchase of the wheat crop will be followed by an agreement with the different dealers in Canada, by which they will be allowed a portion of the purchases. In this way the dealers will do the buying and turn the wheat over for export to the British Import Company at the seaboard. The total amount for export a this time will be \$5,000,000 bushels. Later on, when the requirements of Canadiam mills are supplied a decision will be reached as to what additional amount will be allowed for export.

MONTREAL PRODUCE

Montreal, Oct. 1.—A weaker feeling developed in the local market for oats, and prices declined ½c to 1c per bushel. There was a better demand from country buyers, and a fair amount of business was done, with sales of car lots of No. 3 Canadian western at 97½c, extra No. 1 feed at 97½c, No. 1 feed at 96c, No. 2 feed at 39c, Ontario No. 2 white at 91c, and No. 3 white at 90c per bushel ex-store.

The demand from all sources for spring wheat flour continues good for both prompt and nearby delivery.

There were no new developments in the market for mill feed todey.
There was no further change in the condition of the market for baled hay to day.

On account of the continued unfavorable weather, the very bad condition of the country roads, the receipts of potatoes on the city market today were comparatively small for the season of the year.
