Farms in the Canadian Northwest! Free

Manitoba, Assiniboia, Alberta, Saskatchewan.

THE Government give one quarter section (160 acres) free to every bona fide settler. A second quarter section can be pre-empted by deferred payments. The Canadian Pacific Railway Company has a large quantity of the best farming lands for sale at \$3.00 PER ACRE,

In Manitoba, 2,000,000 Acres; In Assiniboia, 4,000,000 Leres; In Alberta, 3,000,000 Acres.

Under the Ten Years Credit Plan, the purchaser pays only one-tenth of the purchase money in cash; the balance is payable in nine annual instalments with nterest at only 6 per cent per annum.

SPECIAL TERMS FOR FAR MERS.

To enable Farmers to meet their payments from the products of the land, they can have their instalments fall due in each year after harvest.

REDUCED PRICE. The Company are making special effort to secure the settlement of their lands, and are offering a REDUCTION in the price of those listed at \$4 per acre and upwards; in most cases arounting to FROM 25 TO 33 PER CENT.

Do not purchase Lands until you know OUR PRICES and TERMS. If you do not intend purchasing write for the NEW PUBLICATIONS just issued by the Company. These will show you have a when to

SECURE A FREE HOMESTEAD OF 160 ACRES, And give you fects regarding successful Farmers that will surprise you.

The Canada Northwest has the most productive soil in the world. Its wheat fatches the highest price; its live cattle are admitted to the English market, while United States cattle are not. There is a market for the farmer at every station; and there are schools and churches where there are settlers. It is not subject to drought nor floods, to grasshoppers or to cyclones or tornadoes. Ask any Canadan Pacific Railway agent for books and maps concerning it; ask for "Farming and Ranching in Western Canada." or the "Free Farms" map, or "Actual Experience," and read the testimony of men who have gone there from Eastern Canada. Young women are in great demand; they find occupation as domestics directly they arrive, and readily get married to prosperous young farmers. Young men or young women can start life there almost without money. They make the money there; and independence is gained in a very few years by the thrifty.

The old settlers of Prince Edward Island should use their influence with the young men who intend emigrating to keep hem within the Dominion, where they are offering better advantages than in the United States and do not lose their ationality.

Lose no time in getting to the West and choosing your location. First come first served. Apply to any Ticket Agent, to C E. MacPHERSON, St. John, N. B.; or Jt.). HEBER HASLAM, Special Agent C March 2nd, 1892.

To be cautious in the choice of medicines. Many are injured by trying experiments with compounds purporting dear. The most reliable medicines are costly, and can be retailed at moderate prices only when the manufacturing large quantities. It is economy,

## To Use

Ayer's Sarsaparilla, the valuable components of which are imported, wholesale, by the J. C. Ayer Co. from the regions where these argicles are richest in medicinal properties. "It is a wonder to me that any other than Ayer's Sarsaparilla has a show in the market. If people consulted their own interest, they would never use any other; for it is not only the best, but, on account of its coacentrated strength and purity, it is the most economical."—James F. Duffy, Druggist, Washington st., Providence, R.I. Dr. A. L. Almond, Druggist, Liberty, Va., writes: "Leading physicians in this city prescribe

This is To Michael O'Brien, of Rogersville, in the even better than mulching the plants | County of Northumberland, Trader, and before the snow falls. The first freezing does not injure the plant. It is the alternation of freezing and thawing in the spring that is the most hurtful.

KEEP SOME BEES.

Every farmer ought to keep a few stand of bees. His land and the neighborhood around him supplies the bee pasturage free of cost. If not used it is wasted and possibly worse, as the bees aid in fertilizing many kinds of blooms that would es se be barren. There is a yearly profit in the honey as well as the interest of keeping their cows at all times. The first freezing does not injure the plant. It is the alternation of freezing and thawing in the spring that is the most hurtful.

It is pretty generally accepted belief that the morning milk of a cow is richer in butter fat than the even ing milk, and the explanation given for it is that the cow is resting a night, and so loses no fat through muscular exercise. If this is true is affords a strong argument against pasturing and in favoring of soiling and in favoring of soiling and in favor of the practice of the Swiss and other European dairy ment of keeping their cows at all times. all others whom it may concern.
