TORONTO BOARD OF TRADE.

PRESIDENT'S REPORT, 1884.

The year just closed has witnessed a step upon the part of this Board the most important probably in its history, in the successful consummation of a union with the members of the Corn Exchange, under the authority of a special Act, readily granted at the last session of the Dominion Parliament, and by virtue of which, we find ourselves to-day a thoroughly united body, 260 strong, representative of all the important branches of the commercial and industrial elements in the community, the full and vigorous exercise of the important functions vested in the organization. It is not too much to say, that, during the few months which have elapsed since the new departure was taken, the divisions formerly existing between the two corporations has been entirely obliterated in name, and in fact, the closer acquaintance of the members has increased the cordial relations with which the negotiations commenced and concluded, and the anticipations as to the beneficial results of the most sanguine among us have already been more than realized. There is no reason why our numbers should not be largely increased in 1885, and I earnestly invite the co-operation of every member to this end.

The Committee, entrusted with the onerous duty of consolidating the By-Laws of the two bodies, are entitled to your warmest commendations for the promptitude and success attending their labours, the experience they have already had of their operation being eminently satisfactory.

The record of subjects which has engaged the attention of the Board during the past year is both large and important. The meetings have been numerous attended, and much interest manifested in the proceedings of the Board.

THE ESPLANADE DIFFICULTY.

Not a little valuable time was devoted to the subject of the Esplanade difficulty by your representatives at the invitation of the City Council, and although something was accomplished, much yet remains to

ne. The matter is not an easy one of adjustment, and with power-corporations tenacious of their possessions however acquired, and somewhat indifferent to the public rights, on the one hand—and a civic body, traditionally yielding, on the other—speedy redress of grievances is scarcely to be expected. But the imminent danger to life and limb to which our citizens are daily exposed, together with the inconvenience attendant upon the existing arrangements, demand immediate attention, and it is to be hoped another earnest effort will be made by the City Council this year to adjust the matter.

THE MILLERS' GRIEVANCES.

At a meeting called to give them a hearing, the Millers enlisted the spontaneous sympathy of the Board with their grievances, and established the satisfaction of all who were present, the serious disabilities from which they labour, under the operation of the existing Tariff. If some of the members are disposed to point to their position as an instance of the evils arising necessarily from an over-zealous desire on the part of the Government to act the *role* of the old man in the fable of the "old man, the boy, and the ass," this does not prevent all from earnestly desiring to see this important industry freed from the Octopus which has practically paralysed it.

BANKRUPTCY LEGISLATION.

In pursuance of its previous deliverances upon this subject, the Board appointed the Committee, which in 1883, devoted so much time to the preparation of Bills for the equitable distribution of Insolvent Debtors' estates. In April last your President was called upon to address the London (England) Chamber of Commerce upon the subject, at that time agitated by the injustice arising from preferences given local creditors by insolvents, in estates in which their Members were interested. Every strong representation has since been made to us by the Chamber of Commerce from all parts of the United Kingdom, shewing clearly the injurious effect upon the credit and fair fame of our Commercial Community the present state of the law has produced in Britain. This Board has certainly done everything possible from its own sense of the necessities of the case, as well as in response to these representations, to influence the Government to assume the responsibility of the needed legislation, and

in this they have been cordially supported by the Boards of Trades and commercial organizations throughout the country, notably those of Halifax and Montreal.

It is difficult to understand upon what grounds neglect or refusal on part of the Government so to legislate, can reasonably be based.

INTEREST.

The Board will be asked to consider at an early date the propriety of inviting the attention of the Government to the effect upon the Commerce of the Country produced by their entering into competition with the Chartered Banks through their Savings Banks for the deposits of the people, and their maintenance of a high rate of interest thereon. The last loan obtained by the government in England, for a period of years, was at the rate of $3\frac{1}{2}\%$, or thereabouts. On deposits in their Savings banks, which are practically "on Call," the Government is at present paying 4%. The money thus obtained, being largely the surplus earnings of our people, is withdrawn from circulation, it is not available for commercial purposes, but is invested by the Government in a fixed or permanent form, such as public works, &c. The Chartered Banks have, as far as possible, to meet this competition, although in the absence of a lower rate of interest would at present be paid, but the effect of it is to be a gradual but steady decrease in the Deposits with them, and a corresponding increase in the Government Savings Banks.

Here are the figures taken from the latest available returns in this case:

	June, 1883.	June, 1883.
Deposits in Government and P. O. Savings Banks	\$26,219,106 56	\$30,266,600
	Dec., 1883.	Dec., 1883.
Deposits in Chartered Banks, on demand and after notice	\$96,609,000 00	\$92,398,000

There seems no reason to doubt the correctness of the fact alleged, and common action on the part of the Government and Chartered Banks in reducing the rate of interest on deposits by 1 per cent., would be immediately followed by a corresponding reduction in the rate charged by the Banks on ordinary commercial discounts. Such a reduction would only be warranted by the decrease in the value of money in the market of the world, but the maintenance of the present rate on commercial accounts is in itself prejudicial to the commerce of the country and has

Trades and an unfavourable impression abroad in circles imperfectly informed
 of the cause. The best classes of commercial paper are not discounted
 in Canada at present at less than 7%. Similar paper is freely discounted
 in New York at from 3% to 4%. The difference is too great, and if we
 are correct as to the cause, strong representations should be made to the
 Government on the subject. Cheap money is of greater importance to the
 development of all our industries than anything else that can be named.

X POSTAGE. X

A reduction in the rate from 3c. to 2c. per $\frac{1}{2}$ oz., in sympathy with the
 reduction of the United States, in view of the buoyant condition of the
 national revenue, would be a popular movement on the part of the Gov-
 ernment, and most beneficial to the commerce of the country. The
 experience of all countries as to the effect of such reductions is favourable,
 the loss of revenue being only temporary, and the gain in a few years
 far larger in the aggregate than it would be under the operation of the
 present rate. The attention of the Government might very well be
 directed to the subject.

ARBITRATION.

The desire is almost universal that greater facilities should be provided
 for the settlement of commercial disputes. Although some headway has
 been made in reducing the "glut" or accumulation of undecided cases in
 the Superior Courts, the delays in obtaining judgments in important busi-
 ness matters are great, and often productive of serious loss and incon-
 venience. Does the remedy lie in the adoption of the maxim, "don't go
 to law," or would it not be wise to promote the more general adoption
 of arbitration in place of litigation in commercial disputes. Freer scope
 would then be given to the commercial instincts and experiences of com-
 mercial men, legal technicalities largely eschewed, differences settled on
 their real merits, on a broad and equitable basis, and at a great saving
 of expense.
 The Board of Arbitration affords facilities for all these, and although
 only three cases have come before it during the year, the results in each
 would be eminently satisfactory.

THE PRODUCE TRADE.

The Grain and Flour business during the year has not been satisfactory
 in every respect. The damage done to the wheat crop by frost was serious

enough in some parts of Ontario as well as in Manitoba, to depreciate quality to such an extent as to make it, in some cases, totally unfit for milling as well as for export. Large quantities both of wheat and rye were heated and became useless for food and were sold at very low prices, entailing heavy loss on the unfortunate holders. The almost constant and steady decline in prices during the year still further rendered the business a most unprofitable one. Altogether the business of the year was probably one of the worst that grain merchants and millers have experienced for many years.

TRADE PROSPECTS.

It would be gratifying if we could say from the evidence before us that the temporary check to our progress which began in 1882-1883 has now come to an end; but the record of failures as reported by Messrs. Wiman & Co. especially in the Provinces of Ontario, New Brunswick and Nova Scotia forbid this. Lessened imports, enforced economy on the part of individuals, and a general taking in of sail, together with a bountiful harvest have tended to avert, as foreshadowed in our last report, anything like widespread disaster. Many of our tariff-stimulated industries, however, have not yet found their way out of the "slough" of over-production.

Our timber trade continues depressed.—A comparatively open market so far, has assuaged the severity of the poverty by which many of our people have been overwhelmed, through the lessened demand for lumber; but the existence of a very considerable amount of distress among the labouring population is not the less real, because it has not found expression in despairing cries. Merchants generally have been disposed to pursue an exceedingly cautious and conservative course in the management of their business, which is highly commendable; but the steady decline in the value of all commodities, extreme competition, resulting in lessened profits, a comparatively high rate of interest and the difficulty of raising expenses, have forced many concerns into conditions of extreme anxiety and peril, deserving of our warm sympathy and the utmost consideration and forbearance on the part of those interested. Perseverance in the measures of vigilance, caution and economy will unquestionably be sufficient until the results of another harvest are determined and there is a more active demand for the products of our forests.

preciated rose from a study of the facts relating to the condition and pro-
 ly unfilled of the Commerce of the City of Toronto with much more pleasur-
 and emotions, and as they are of special interest to us and rather remark-
 low price in view of the general aspect of commercial affairs, I take the liberty
 st. considering your attention to them at some length.

ndered the record of failures in the city shews for the two years

of the millers		No.	Liabilities estimated.
	1883	89	\$2,114,561.10
	1884	72	\$3,945,666.23

if we deduct the estimated Liabilities of the two large British Lumber
 companies included in the failures of 1884 amounting to \$2,500,000, seeing
 e before operations were not conducted in our midst, but simply directed from
 2-1883, a more just representation of the current of business and comparison
 essrs. in the previous year remains.

Brum common with that of the Dominion the volume of business in
 omy onto, as indicated by the statistics of Imports and Exports was less in
 her w than in 1883 but the lessened value of all kinds of commodities has
 last r borne in mind in this connection.

ated in the spring the Railway Companies brought 2,300 buyers to the City
 slough reduced rates as compared with 1,700 the previous season.

at any one visit our Banks between 2 and 3 p.m., and then let him
 ect the head office of the Telephone Company, and he will have evi-
 e of the greatly enlarged use being made of the modern methods of
 ncting business by our business men. The Telephone Company began
 one subscriber on the 13th February, 1879, and on 1st July, 1884,
 had 1000 subscribers, with additions being made at the rate of one
 ien. They have the most completely equipped office in Canada, and
 bly the most conveniently arranged for handling business in the
 l. The use of the Telephone per subscriber per diem here is double
 of any other city in Canada. Their lines are being rapidly extended
 the Province, but this has not diminished to any appreciable extent

the use of the Electric Telegraph. I am informed by Mr. Dwight, indefatigable manager of the Great North-Western Telegraph Company they have now 174 employees in the Toronto office alone, which is a perfect bee hive, full of life and activity. Whereas they had in 1867 one wire, they have now 67, directly connecting them with all the important cities of the Continent, Toronto being the great centre of the telegraphic system of the Dominion. News is collected from all parts of Canada, and papers supplied at the rate of 25c. per 100 words.

Turning to our Railways, we find there have been constructed in Ontario since Confederation over 2,734 miles. There were opened for traffic in 1883, 120⁶⁰ miles, and in 1884, 326⁷⁰ miles, while at present there are under construction 466⁸² miles, all tributary to, or centring in, the City. The completion and opening of the C. P. R. to Ottawa during the past year, has opened up a large section of country heretofore difficult of access, the merchants in which are daily increasing their correspondence with Toronto.

The manufacturing industries, which are now suffering most from depression, are not found in our midst. The operatives in most of our factories are fairly employed. An unusually large expenditure by the city authorities on 8⁴² miles of block pavements, and 11⁵⁰ miles of sewers, etc., and new buildings erected to the tune of \$1,188,270 in 1885 has afforded steady occupation to many of our labourers and artisans. The assessed value of Real Estate in the City has increased from \$54,150 in 1884 to \$57,546,816 in 1885, and the population from 95,450 to 100,000.

In the reduced number of failures, a tendency on the part of the Ontario Merchants to concentrate their business here, an increase of correspondence to and from, and larger monetary dealings with the City, an increase in telephonic and telegraphic communications, increasing railway facilities and connections, I find the evidence of progress made in the face of the influences that might reasonably have been expected to have produced a much more depressing and discouraging effect.

While so much may be said of the commerce of the city, its condition from a sanitary point of view and the management of its civic affairs should not be regarded with complaisance by any citizen until they are placed in a more satisfactory state. Pure water and a more satisfactory

place of deposit for the sewage than the bay in front of the city are of infinitely more importance to our progress and prosperity than the proposed erection of a new and costly City Hall or even a new Court House. The manner in which these have received their initial stages gives promise of an addition to our debt, if their erection is persisted in, of probably a million and a-half of dollars and this in connection with the extra burden assumed through the recent extension of the city limits and increased expenditure in all the departments, promise a rate of taxation an early date under which the citizens will groan when too late to be remedied.

It is pertinent to enquire if our business men, in their unwillingness to perform a fair share of the work attendant upon our system of self-government are entirely free from responsibility for the present critical state of civic affairs, to which the Council of this Board has desired me to direct your earnest attention.

To the occasional visitor the City presents an appearance, even at the best season of the year, of thrift and enterprise which are the characteristics of our people, and by which we may reasonably expect them to distant date to advance our City to what it is rapidly becoming—Commercial Metropolis of Canada.

IMPROVED PREMISES.

The Council having decided after due consideration that the present premises being so centrally situated were as suitable as any available, has engaged with the lessee for alterations and improvements thereon that add to the convenience and comfort of the members, and these will be completed at an early date.

The Treasurer's Report appended shows the finances to be in a fairly satisfactory condition and the Council desire to bear testimony to the zeal and efficiency with which Mr. Wills has performed the duties of Secretary.

In conclusion, allow me to express the deep sense I entertain of the honor the Board has conferred upon me in electing me by acclamation its Residing Officer on four successive occasions, and the obligations the members and members of the Council have laid me under by their liberal and courteous and warm support, in the promotion of the work of the Corporation.

HENRY W. DARLING,

President.

THE TREASURER'S REPORT.

To the Members of the Board of Trade.

Your Treasurer begs to submit his Annual Report, and in doing so would congratulate the Board on its continued popularity and usefulness.

We have during the year just closed nearly doubled our membership. This arose partly through the amalgamation of the Corn Exchange with the Board, and partly from the fact that a considerable number of the more spirited of our commercial community enrolled themselves as members, to show their appreciation of the work already done, and a desire to share in what may be in the future achieved by the Board for the advancement of the Trade and Commerce of the City.

On the 31st of December, 1883, we had 148 members; during 1884 we added to the roll 112 more; and now the whole membership amounts to 260. This number, I think, can be greatly increased during 1885 if each of us undertake to bring in an additional member. The Toronto Board of Trade should not have a less membership than 500.

In consequence of some extra outlay, the income from membership and other sources is \$278.78 short of the amount required to cover the year's operations.

It will be observed that the expenses connected with the amalgamation of the Board of Trade and the Corn Exchange amounts to only \$341.50. This arises from the fact that our Solicitor, W. H. Beatty, Esq., made no charge for the time and trouble he took in preparing and having a Bill carried through Parliament. The above amount simply includes Parliamentary and other legal expenses required by the Rules of the House of Commons.

The following figures show our income and expenditure during the last twelve months:

Cash in Bank, Dec. 31, 1883	\$221 31
