RUSSIA.

There is a report of a conspiracy against the imperial government of St. Peteroburgh, mentioned in the account of the Cologne Gazefic, which, if true, is very important. It is as follows:—'Runn's are in circulation of a newly disc vared conspiracy among the nobity at St. Peteroburgh, and of the arrest of sovert considerable persons standing very near the throne The discovery, it is said, was mude by officers of the body guard of the Emperor, whom the conspirators endeavored to bring over to their party, but who revealed the whole matter to the Emperor, whom the conspirators endeavored to bring over to their party, but who revealed the whole matter to the Emperor. Further details are not known. The St. Petersburgh journals make no almison whatever to the affair. But it is not to be expected, that in Russia such events should be publicly announced till three or four mouths after their occur rence."

The Tuscan Moniteur states, that the Dowager Duchees Maria Louiss drove out of Florence in a court carriage by the estate of St. Fredinno. When a mile out of the town, some drunken Austrian soldiers, with drawn bayonets, forced them to descend from the carriage, which the ladies did, and sought refuge in a house. After tearing the cushions of the carriage to pieces, the soldiers attacked the house, endeavoring to force an entrance; but, before they could succeed, some neighbors came and drove them off, declaring that it was "time to rid the country of such low rulfanus." Some of them were arrested, and order was restored by the arrival of a detachment of cavalry.

THE LARGEST ROPE-MAKING ESTABLISHMENT IN THE WORLD.—In Charlestown, in this State, is the largest Rope Manufactory in the world. It belongs to the National Government, and is situated in the Navy Yard, not far from Chelsea Bridge. Here is made all the rigging for the ships of the United States. The work is done by the invention of machinery, invented expressly for the purpose. The building, including the machines, cost about \$330,000; and since being erected and put in operation, the establishment has paid for itself once if not twice over, out of the gains to the government, produced under the admirable system of the officers on this station, over the old made of carrying on the manufacture. The cordage is of the very best description and consters and sea-going vessels are chartered every year at this port, to take the cordage and Government stores to the navel vessels of the United States, in the harbors along our shores, and in all parts of the world. Until recently it was the only public work of the kind in the Union. Now there is another similar to it, built within two or three years, at Memphis.—Transcript.

CLOSE OF THE DEBATE—PRINCIPLE OF THE BIJE AFFIRMED BY AN OVERWHELMING MAJORITY.

FIRMED BY AN OVERWHELMING MAJORITY.

On Saturday, Mr. Locke opened the debate in a skort and sensible speech, advocating the Bill. Mr. Jost spoke in opposition. Mr. Mosher advocated the Railroad, in a speech at some length, and gave a variety of reasons for the vote he was about to give. Mr. Zwicker followed upon the same side, excusing himself for the short address of a previous day. He then had a tooth ache, and he got up to relieve himself, and found that speaking in favour of the measure cured it. Although differing from his colleagues as he was likely to do, he should nevertheless give an independent vote.

The Committee for trying Mr. Campbell's election for Colchester was then drawn.

After receiving Petitions against the returns of several of the sitting members, and drawing an Election Committee—Morse rs. Bent—the House proceeded on

They are of the most approved model and description known to military men, have each been throughly tested any proved by the artillery officers and engineers of the general government. Quite a number of them were east at the foundry at South Reston. Some of them cost 91400 each, if not more. Were their average price, summented, not more than \$300 each, the expense of the whole would exceed \$200,000.

The whole number of foreign immigrants which arrived at New York during the ten months—from January 1 to Oct. 31—was 221, 220. There arrived during the month of October 21, 337, of whom 11,000 were Irish, 6,500 German, and 2,900 English.

the expenses of construction be extinguished, each Province shall retain that portion of the Railroad within its own limits.—And therefore Resolved, That in any agreement among the three Provinces of Canada, New Brunswick and Nova Scotia, this Province ought not to be required to assume a greater responsibility than the construction and operation of that portion of the line within its own territory."

This resolution, like its predecessor, was negatived by a large majority—10 for and 30 against.

Monday was almost wholly occupied by the House of Assembly, in debating whether the three central counties should be assessed in larger proportions than other counties, for the support of the Railway, and the result was the reference of the subject to a special Committee, to report to-day, when the House meets at three o'clock.

THE POYATO BLIGHT.—We are happy to have it in our power to record, that this scourge of the farmer has nearly disappeared from this Province. In a few localities, where the soil is damp and cold, it has displayed itself; but in the great agricultural counties, Kings and Auanpolis, it has almost entirely disappeared. The yield of potatoes the present season exceeds that of any year since the disease first appeared. The farmers in those counties find a ready sale for their surplus, and at remunerative prices; and usver, perhaps, in the history of this Province, were this class more highly blessed, and rewarded for their toil, than during the past year.

inever, perhaps, in the instory of this Province, were this class more highly bessed, and rewarded for their toil, than during the past year.

The reverses of this class, for the last few years, have not been without their beneficial influences. They have taught them how to hisband their resources, and how to retrench many of their extravagances, and also the necessity of zealous industry. If they have anly wisdom to profit by the experience, they will find in the end that they were never more the recipients of the favours of Providence, than when the curse of blight and mildew seemed heavy upon their fields. We have as fine a country as the san shines upon; all we want to make it the happiest, and wisset, is men who can appreciate its worth, and improve its natural advantages to their utmost capacity for good.—\*\*Acadian Recorder.\*\*

Morally in a Windom.—\*We are pained to hear that a fearful mortality has been raging in Windoor for the space of several weeks, in the form of Searlet Fover. Its ravages have been chiefly among children, some families having lost as many as three within a few days. A number of adults, also, have fallen victims. The disease is of the most viculent and deadly kind, and terminates fatally in a few hours. Many a home has been made desolate, and many a heart too, by this fearful securge.

We had prepared an article on the "Tenant Com-pensation Bill," which is unavoidably deferred until our next issue. It is an important question, and one which will require more space than our present No. would admit.

To the Editor of Hassard's Gazette.

Dear Sir;
Many rumors having been circulated in this community prejudicial to the Dafayette Insurance Company of Indiana, of which the Hon. W. W. Lord, James Purdic and Benjamin Davies, Esquires, were the local Directors, and of which I had the honor to be the Agent for this Island; and some censure having been attached to the directors and myself for lending our names, as it has been charitably affirmed, for the purpose of decsiving the public, I think it due to the directors and myself to state, that before a Policy had been issued in this Island due inquiry had been made as to the stability of the company, and that the directors and myself were satisfied, from information we received from reliable sources, that the Company was bone-fide; and to confirm this impression, a highly respectable Sarrister in New York thus writes:—"I think that you may acfoly engage as their Agent and without fear of being in any way decsived."

amount the trade now in your hands, you will lose no time is giving information to the home Office, so that the same can be speedily adjusted and paid.

"I bet to assure you, that in your connexion with the company, you have merited and still posses the confidence of our officers and directors."

Upon the receipt of this letter, I discontinued issuing policies; and as most of the parties interested in outstanding risks were absent, and could not be treated with, I made out lists and sent one to each of my Agents at Halifax, Boston and New York, to get re-insurance effected at the expense of the Lafayette.

Sent one to each of my Agents at Hallias, Sosion and New York, to get re-insurance effected at the expense of the Lafayette.

In due course I received answer, viz:—from Halifax, "declining to name a premium;" from Boston, "no office here would look at them at this season of the year;" and from New York, "I have been unable to get any of the company to name a rate."

Subsequently I received a letter from the Secretary, setting forth the desire of the Company to wind up their business instanter, and he saya, "You may have some difficulty in effecting this object for the Company, but please inform each assured, that it may be for his interest to seek indemnity in some other company."

Immediately on receipt of this letter, I addressed a note to each of the assured, or their agents, to the above effect. Having heard the rumour that had been industriously circulated by some ill-natured persons, doubting even the existence, as well as the solvency of the company, I addressed a letter to Messra. Gibson, Stockwell & Co., weathy Bankers at New York, and by last mail received the following reply, dated 25th October:—

"The Insurance Company at Lafayette are perfectly good."

York, and by last mail received the following reply, dated 25th October:—

"The Insurance Company at Lafayette are perfectly good for, and will pay any losses that may have occurred through your agency. We are their Bankers here."

Having thus, at some leneth, placed all the facts before the public, I think that it will acquit the Directors and myself of imprudence is lending our names to this Company—that everything has been done by me that could be done under the circumstances; and that the Company is not only substantial and bana-fide, but also able and willing to pay any losses that may have been sustained.

I am, yours truly, Charlottetown, Nov. 18, 1851. CHARLES YOUNG.

LUE ASSURANCE.—We have so often arged apon our readers, the wisdom—in many cases the duty—of providing for the support and comfort after their deaths, of those dependant upon them, by insuring their lives, that it must appear like a "t twice-told tale" to revert to the subject. At the same time, should the perusal of our present remarks induce one head of a family to adopt our advice, and, thus, secure a provision for these, who would, otherwise, be impoverished by his death—an event which awaits us all.

We are well aware that life assurance is frequently and beneficially resorted to as a menus for facilitating pecuniary arrangements of every description; but, in the vast majority of cases, we believe, it is adopted by the right-hearted and affectionate father, to sward poverty and distress from the lot of those who are desere to him than life, in the event of their being deprived of his protection and care. Life Assurance, of all the investions and discoveries of modern times, is most eminently calculated to prove the stay of the widow and orphan—to protect them from the cold selfshness of the world—and therefore is it that we lose no opportunity of explaining its morits, and enforcing them upon the attention of our readers.

The besiness of the National Loan Fund Society is rapidly increasing—by their annual report of this year, it will be seen that they is seed 1056 policies in 1850. The General Agency in this city, under the direction of an influential and experienced Local Board, has done a large business and is distinguished for its prompt adjustment of claims.

A body, supposed to be that of an American fisherman, was discovered to be lying on the beach at New London, on Priday, the 14th inst., it was immediately taken charge of by James Campbell, Equ., and conveyed to a house, and as soon as a coffin could be prepared, he was interred in the nearest church-yard. But what his name was, or to what vessel be belonged, remains enknown. The flesh was entirely off his head and face, so that nothing remained but the bare skull, his hands were also off by the wrists. His dress consisted of a blue shirt, jacket, waisteast and trowsers, of blue pilot cloth, a suit of oil clothes and a pair of American made boots. There were no papers found, but on his right arm were two marks resembling a heart and a half-moon; he was about 6 feet high, and stout in proportion. He has ladeed found a grave among strangers, but it may be a consolation to those who moura lost fleeds, that every act of kindness and sympathy which humanity could suggest, or the most affectiouate friend desire, were performed for his mortal remains.

Oh, where, my long lost one, art then?

'Mid Aretic seas and wintry skice?

Deep, Polar night is on me now,
And hope, long wreehed, but mocks my cries:

I am like their from frozen plains
In the drear zone and sunless ning
My dying, lonely heart complains,
And chills in sorrow and despair,

Tell me, ye Northern winds! that sweep
Down from the rayless, dusky day—
Where ye have borne, and where ye keep,
My well belor'd within your sway;
Tell me, when next ye wildly bear
The ley message in your beath,
Of my belored! Oh, tell me where
Ye keep him on the sheres of death!

Tell me, ye Polar seas! that roll
From ice-bound shore to sunny isle—
Tell me, when next ye leave the Pole,
Where ye have chained my lord the while!
On the bleak Northern cliff I wait
With tear-pained eyes to see you come!
Will ye not tell me, ere too late!
Or will ye mock, while I am damb!

Tell me, oh tell me, mountain waves!
Whence have ye learned and sprung to-day?
Have ye passed o'er 'life' eleeping graves
'That ye rush wildly on your way?
Will ye sweep on and bear me too
Down to the caves within the deep?
Oh, bring some token to my view
'That ye my loved one safe will keep!

Canst thou not tell me, Polar Star! Where in the frozen waste he kneels?
And on the icy plains afar
His love to God and me reveals? Wilt thou not send one brighter ray To my lone heart and aching eye? Wilt thou not turn my night to day, And wake my spirit ere I dio?

Tell me, oh dreary North! for now
My soul is like thine Arctic zone;
Beneath the darkened skies! bow
Or ride the stormy sea alone!
Tell me of my beloved! for I
Know not a ray my lord without!
Oh! tell me, that I may not die
A sorrower on the sea of doubt!

A MONARCH'S DEATH.

Sad at heart with life, and weary—
Fature hopeless, cold and dreary,
Ever void of friendship's token,
In the world was he alone:
Bitter lot for suffering mortal;
Worse that he, with spirit broken,
Sat upon a kingly throne.

Youthful days a sunshine wearing, Beauteous bride his kingdom sharing, Every fairer hope besteaking Life for him wore robes of blva: While the bridal year was waning, She, with meekness ancomplaining, Brighter worlds of comfort seeking, Left a broken heart in this.

Lonely now—by all forsaken,
Fresh his early memories waken,
Ficturing her sweet face and figure
Through the mists of forty years;
Tenderly upon him smiling,
Fancy paints her, grief beguling,
Till the truth, in all its rigour,
Leaves him nought but fruitless ten

Busy thoughts his bosom thronging, Sudden rose a fearful longing As if there all hope was centered, Once more on her face to gaze; Quickly to the church he wended, Down the rugged steps descended, Silently the vault he entered, Tried the coffin-lid to raise.

Off it flew. How still within it
Lay that form; and for a minute
Life seemed in the coffin lying,
So unchanged the well-know:
Beautiful as sleep, yet calmer,
Canningly the skilled embalmer,
As for ever they were flying,

One last, lingering look is taken; And the aged monarch, shaken By the face that never alters Gazing on in youthful bloom Gazing on in youthful bloom,
That sad vision unavailing
Turns to leave, but vigour failing,
On the very threshold falters,
Finding there the welcome tomb.

Missed at length—in fruitless seeking
Pass the night, and morning breaking,
Everything their search delaying,
Till it chanced his steps were seen,—
Lifeless, in the vault they found him,
With the dead one's arms around him,
He had sought the besom, dying,
Where his love had ever been.

## Darieties.

DEATH OF A MINER.—A curious instance of avarice on the gart of a man named Murdoch Manro, was discovered by his death which happened at Kelty lately. He came to live in Kelty about 88 years ago, and during the greater part of that time was employed as a labourer on the Blaindam estate, until a few weeks back, when from his enfeebled state of houlth, he was engaged in breaking road metal up till a few weeks of his death. He lived with a widow in Kelty, and on the occasion of his death. He lived with a work out of doors, when a neighbour happened to look in to enquire for Mardock, and it was discovered he was dead. Upon opening a chest, the first thing that presented itself was a bank cheque to the walne of £790 of the Bank of Scotland, Edinburgh, neatly folded in a piece of paper and sewed inside an old jacket. In the centre of the chest there were £213 in £1 and guinea notes, partly of the British Linen Company, and of the Bank of Scotland, of date 1812; and strewed along the bettom £24 in silver were found, rolled up in sums of 20s each, and some is 0\frac{1}{2} in copper cein—the whole amounting to no less a sum than £1,647 8s 0\frac{1}{2}d. He was not least suspected, of having money, but looked upon as one deserving chartry, so much so, that Sir Chas. CHERRY AND LUNGWORT,

Coughs, Colds, Hoarsness, Splitting of Blood, Night Sweats, Asthma, Liver Complaints, and CONSUMPTION.

DO NOT NEGLECT IT. Consumption can be and has been cured. in thousands of cases, by this only certain remedy, JUDSON'S CHEMICAL EXTRACT OF CHERRY AND

LUNGWORT, and no remedy has ever before been discovered that will certainly Cure Consumption.

The most strongly marked and developed cases of Fulmonary Consumption, where the lungs have become diseased and ulcerated and the case so utterly hopeless, as to have been pronounced by Physicians and Griends, to be past all possibility of recovery, and at times thought to be dying, have been cured by this wounderful remedy, and are now as well and hearty as over. It is a compound of medications which are peculiarly adapted to and essentially necessary for the cure of COUGHS AND CONSUMPTION.

Its operation is mild, vet efficiency, it locens the pulsery which

COUGHS AND CONSUMPTION.

Its operation is mild, yet efficacious; it loosens the pilegm which creates so much difficulty, relives the cough and assists nature to expel from the system all diseased matter by expectoration, producing a delightful change in the breathing and chest, and this, after the prescriptions of the very best medical men and the inventions of kind and sorrowing friends and Nurses, have failed to give the smallest relief to the Consumptive sufferer. THOUSANDS OF CONSUMPTIVE

THOUSANDS OF CONSUMPTIVE persons have been deceived repeatedly in buying medicines which were said to be infallible cures, but which have proved only palliatives, but this medicine is not only a palliative but a cure for ulcerated lungs. It contains no deleterious Drugs and one trial will prove its astonishing efficacy better than any assertions or certificates in curing consumption and all diseases of the Lungs, such as Spitting of blood, Coughs, pain in the side and chest, night-aweats, &c. &c.

such as opitting of 8100d, Coughs, pain in the side and chest, night-sweats, &c. &c.

About 1000 certificates of almost miraculous cures, performed by this medicine, from some of the first Doctors, Clergymen and Merchants, have been sent us for this medicine. but the publication of them looks too much like Quackery, [we will show them to any person, ealling at our office.] This medicine will speak for itself and enough in its own favour wherever it is tried.

Caution.—This medicine is put up in a large bottle and you must find the name of Judson & Co., Proprietors, New York, on the splendid Wrapper around the bottle. All orders must be addressed to Comstock & Brother, No. 9 John St. New York.

COLORS THE HAIR, AND WILL NOT THE SKIN.

This dye may be applied to the hair over night, the first night turning the lightest RED or GREY HAIRLO a dark brown, and by repeating a second night, to a bright jet black. Any person may, therefore, with the least possible trouble keep his hair any dark shade or perfect black; with a positive assurance that the dye, if applied to the skin will not colour it. By an occasional application, a person turning grey will never be known to have a grey hair. Directions complete with the article. There is no colouring in this statement, as one can easily test.

These facts are warranted by the gentleman who manufactures it, who is the celebrated Chemist, Dr. COSSTOCK, author of Comstock's Chemistry, Philosophy, and other works, and School Books, well known and widely celebrated by the public.

CURE OF A DISORDERED LIVER AND STOMACH, WHEN IN A MOST HOPELESS STATE.

Extract of a Letter from Mr. Matthew Harvey, of Chapel Hall Airdrie, Scotland, dated the 18th January, 1850.

To Professor Holloway:
Sira,—Your valuable Fills have been the means, with God's blessing of restoring me to, a state of perfect health, and at a time when I thought I wan on the brink of the grave. I had consuled sourcal eminent Doctors, who, after doing what they considered my cane shapeles. I ought to say that I had been suffering from a Liver and Stomach complaint of long standing, which during the last two years got as much worse, that every one considered my cane in a last resource got a Box of your Fills, which soon gave relief, and by persevering in their use for some weeks, tagester with rubbing night and morning your Cintment over my chest and stomach and right side, I have by their means alone got completely cared, and to the astonishment of myself and every body a ha knows me.

Extract of a Letter from Mr. William Smith, of No. 5, Little Thomas Strest, Gibson Street, Lambeth, dated December 12, 1849.

To Professor Holloway.

Sin,—I beg to inform you that for nearly 5 years I hardly knew what it was to have a day's health, soffering from extreme weakness and debility, with constant nervous headaches, giddiness and sickness of the stomach, together with a great depression of pririts. I used to think that nothing could benefit me, as I had been to many medical men, some of whom, after doing all that was in their power, informed me that they considered that I had some spinal complaint beyond the reach of care, together with a very disordered state of the stomach and liver, making my case so complicated that nothing could be done for me. One day being unusually ill and in a dejected state, I saw your Fills advertised and resolved to give them a trial, more perhaps from curiosity than with a hope of being cured, however I soon found myself better by taking them—and so I went on persevering in their use for six months, when, I am happy to say they effected a perfect cure.

CURE OF ASTHMA OF TWENTY YEARS STANDING,
Extract of a Letter from Mr. J. K. Heydon, '18 King Street,
Sydany, dated 10th November, 1849.

To Professor Hollowar.

Sin,—I have the pleasure to inform you that many extraordinary cures of Asthma have been effected here by means of your Fills. One is that of a lady residing near the "Razorback," who after having for Twenty years been unable to make the slightest exertion, suffering very fearfully from shortness of breath, coughing and spitting, but is now, (to use her own expression) able to run up to the top of that mountain. Another case is that of Mr. Caton, Tailor, Hutchinson's buildings, Clarence-street, who was so dreaffully had that he was confined entirely to his bed-room or its mountae, prior to his commencing with your Fills, and attended regularly by his medical man, who pronounced hin to be in a dping state, yet he, likewise, to my knowledge, has been restor

STOMACH COMPLAINT.

Extract of a Letter from His Lordship, dated Villa Messina
Leghorn, 21st February, 1845.

To Professor Holloway.
Sin,—Various circumstances prevented the possibility of my thanking you before this time for your politeness in sending me your Pills as you did. I now take this opportunity of sending you an order for the amount and at the asme time to add, that your Pills have effected a cure of a disorder in my Liver and Stomach, which all the most eminent of the Faculty at home, and all over the Continent, had not been able to effect; no, not even the waters of Carlshad and Marienbad. I wish to have another the current of the Faculty at home, and all over the Continent, in case any of my family should ever require either. Your most obliged and obeclient Servant.

Bliss' Compound Cod Liver Oil Candy.

A new and effectual remedy for Coughs, Common Colds, Cold in the Head, Hoarseness, Bronchitis, Asthma, Tickling in the Throat, Catarrh, Diseases of the Lungs and Bronchal Affections.

This favorite remedy is composed of Pure Cod Liver Oil, combined with other valuable ingredients, which completely disquise the regulative tasts of the Oil, without detracting from its medicinal victues, presenting it in a form by which it can be administered. to the most delicate invalid, without inconvenience. The medicinal influe co of this Candy pursues the exact tract of the inflammatory action, causing cough. First, southing the organs of the voice, its sedatative influence, passes along the mucous lining of the windpipe into the bronci, and allaying pulmonary irritation, giving case and comfort to the chest, restoring the voice to its accustomed clearness and powers; Congealed Phlagm, Acrimony in the Pluids, and Obstructions in the Glands, are gently and asfely discharged by easy expectoration. It never diagress with the stomach, a common cold yields to its benigs influence in a few hours, and when resorted to, before the complaint is far sdranced, all danger of Consusarrion is entirely prevented.
