Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

method

The copy filmed here has been reproduced thanks to the generosity of:

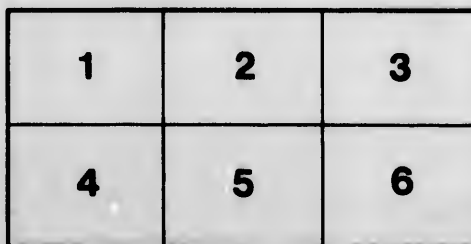

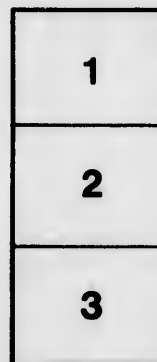

Library Division  
Provincial Archives of British Columbia

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol → (meaning "CONTINUED"), or the symbol ▼ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Library Division  
Provincial Archives of British Columbia

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole → signifie "A SUIVRE", le symbole ▼ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

## PREFACE.

In placing before the public the present edition of the *British Columbia Directory*, it is satisfactory to note that after continuing the publication of the same for fourteen years, and commencing with a book scarcely thicker than the covers of the present work, we have, in this issue, not only a gratifying evidence of its rapid increase in size and volume, but also a remarkable indication of the wonderful growth of this province. Of the four principal towns, three of them, within that short period, have grown from small villages into thriving, prosperous, well-built cities, while, in one instance—that of Vancouver—which ten years ago was unknown in high-sounding, low since that time sprung into existence, and joined her sister cities and mutual rivals in a way that bids fair for her becoming soon the principal commercial centre on the Pacific Coast.

British Columbia as a Province contains 37,000 square miles, and equals the areas of France, Italy, Belgium and Holland all put together, while Vancouver Island alone has an area of 18,000 square miles, and is larger than the combined area of the states of Massachusetts, Rhode Island, Connecticut and Delaware, which contain a population of three millions.

The simple inference to be drawn from this fact is, that Vancouver Island, equally as productive and with a better climate than the states of the Union named, is capable of doing a tremendous amount within its borders & vast and wealthy population. With such a vast area, and so favorable a climate, who can estimate the possibilities of the future growth of this rich and prosperous country. It is a province that can support, easily, fish, timber and everything that can make a country prosperous.

The climate of this magnificent Province is described by one of England's noblest poets thus:—"No words," he says, "can be too strong to express the beauty of this beautiful land where the climate, softer, and more congenial than that of England, caresses at all times of the year the falling yeasts of the woods the loveliness of meadows around you."

With every energy and prosperity awaiting both this province and the British Columbia Directory the publisher with much to refer to, the letter that should have been sent to assist with the liberal patronage which the present issue has received and with a view to increasing its usefulness, and securing better material in its composition, his intention is to have the text in a printed type supported expressly for the purpose of sufficient clearness and beauty to keep the work in type all the year round, an undertaking which will not only involve considerable outlay, but also the importing of the largest quantity of type ever imported into the Province before at one time.

We desire to tender our thanks to the Local Government, the Mayors and Councils of the four cities, and various persons throughout the Province, for having kindly placed at our disposal everything that would aid in making this work a success.

28 BROAD STREET, LONDON, W. 1892

Entered as Second-Class Matter, Second-Class, at the Post Office at Ottawa, Canada, on the 15th day of July, 1882, under No. 1111, in accordance with the Act of the Parliament of Canada, in relation to the publication of newspapers, and authorized for mailing at the special rate of postage provided for in the Act of the Parliament of Canada, in relation to the publication of newspapers, on the 15th day of July, 1882.

Special of the Minister of Home Affairs, 27th July, 1882.

ESTABLISHED,

A. D. 1782.

[UNLIMITED LIABILITY.]

**For Insuring every kind of Property in all parts  
of the World from Loss or Damage by Fire.**

The promptitude and liberality with which its engagements are always met by this Company are well-known, and the importance of its relations with the public may be estimated from the fact that since its establishment it has paid more than Eighteen Million Sterling in discharge of claims for Losses by Fire.

The security offered to the public by the Phoenix Office is unlimited, comprising in addition to a large invested capital of the Company, the whole fortunes of numerous proprietors, composed of some of the most opulent merchants and others in the United Kingdom. Annual and short time Insurance are effected upon all kinds of property in Vancouver Island and British Columbia on the most favorable terms.

Prompt Cash Payments and full power to settle all losses and claims without referring to the Head Office in London.

Rates and Particulars of Insurance may be had on application to

**OWAY KEENO AND VICEROY \***

Oway Keeno cannery and Viceroy cannery, both situated at the head of Rivers Inlet, the property of a syndicate known as the B. C. Canning Co., Ltd., are situated on each side of the Oway Keeno Indian village.

During the past year Robert Draney was manager of the above canneries. He was originally the builder.

There is a church, school and mission houses at Viceroy, besides the cannery and saw mill. The capacity of the cannery is about 12,000 cases per annum; that of the mill is about 7,000 per diem.

The Indians here are considered to be some of the hardest cases on the coast. The missionaries can do nothing with them, and have to give them up in despair.

# ALBION IRON WORKS Co., L'd, Victoria, B. C.

Have the Largest and Best Equipped Shops on the Pacific Coast, North of San Francisco. Works Running Night and Day.

ADDENDA, ADDITIONS AND CORRECTIONS, B. C. DIRECTORY. 21

Altitude 1475 ft. It is a mining, lumbering and transportation centre, the C.P.R. connecting with the Columbia river steamers, three of which will run during the season of 92 to Robson, connecting with the Columbia and Kootenay R.R., and also with the Spokane and Northern R.R., at the Dalles 214 miles below Revelstoke.

The hotel accommodation of the town is excellent, has post, telegraph and express offices, with telephone communication. Mails daily. Methodist, Presbyterians and Church of England missions and a large public school, court house, jail and mining recorder's offices. Four well stocked general stores and three Chinese stores. A smelter of 60 tons a day capacity is in operation and it is probable that the high grade shipping ore of the Herculite section will yield sufficient ore the coming season to test its full capacity. The Revelstoke Lumber Co. employ from thirty to fifty hands, and cut from 15,000 to 20,000 ft. of lumber daily. Capacity of shingle mills 70,000 per day. Population 5000.

**SKIDEGATE** - Queen Charlotte Island \*

Robert Tennant has an oil refinery which pays from \$7,000 to \$10,000 per annum and is known as the Skidegate Oil Refinery. At Clew 4 1/2 to 50 miles from Skidegate, the Queen Charlotte Oil Co. have an oil refinery with a capacity of 45,000 gallons. This is the first year, but it is confidently expected, it will be highly remunerative to its shareholders, Messrs, Oliver, Stapleton, W. H. Smith, Capt. Samuel Williams, T. Shotbolt, Thomas Scott and W. H. Dempster.

## PROVINCIAL INFORMATION.

### Province of British Columbia.

Here the foes of pest of mankind at length  
Threw up the last resistance, and who shall praise  
A Host to Bang, who's not a mind's strength  
Or check his swiftness in the forward race?"

British Columbia sprang into existence as a Colony, only in 1858, consequent on the gold discoveries, the rumors of which, in that year suddenly attracted numbers to its shores. Previously it had been traversed and practically occupied only by the Fur traders, first of the North-West and afterwards of the Hudson's Bay Companies. The adjacent Island of Vancouver, which had been constituted a Colony in 1849, only separated from the mainland by a channel in its narrowest part scarcely exceeding a few thousand yards, had been partially colonized some years before, and it might have been reasonably supposed that these two adjacent and almost contiguous lands with interests so closely united, would have been incorporated under one Government. But the wisdom of Downing Street willed it otherwise. Established as separate Colonies, each enjoyed for some years the honor of paying its own highly-salaried Governor, under the Imperial auspicæ, with the dignity of each enacting its own special laws, not always in strict observance of the interests of its neighbor. Of course this could not last, and in 1866, the common sense of the two Colonies triumphantly elected brought about a union. Subsequently, on the 20th of July, 1871, the united Colony became re-nubilated as a Province of the Dominion, and it may be confidently asserted that no other member of that great confederation has resources so richly varied and inexhaustible, a climate so healthful, invigorating and agreeable, a coast line so magnificent, abounding in excellent harbors, safe entrances to navigable streams and long stretches of inland sea, or sheltered gulfs, sandy bays and inlets, such a wealth of economic and precious metals, timber, coal and fish, none for which nature has done so much. Now so

#### EASY OF ACCESS

From the great centers of population by the completion of the great Canadian Pacific Railway from ocean to ocean. This magnificent line, the largest under one management in the world, and in its luxurious accommodations and comfort for the traveler, stands unrivalled in every respect. The sleeping and dining cars which are to comfort the traveler during the long journey through varied regions of mountain and prairie, are wonders of luxury and ornament, and the equal in elegance of any first class hotels in America or Europe. There is something almost marvelous in the idea of these cars fitted up like the abode of royalty, being built to traverse a region into which the light of civilization has only just begun to gleam. This great

33

boundary line of 49 deg. The other great streams of the interior are Thompson River, entering the Fraser from the east, and the Okanagan and Kootenay, the last two having very eccentric courses. The Kootenay having its source in the same region as the Columbia, makes a long sweep to the south, crossing the boundary line and returning again, discharges its waters into the Columbia. One peculiarity of this region is that nearly every stream of consequence has its origin in, or passes through, one or more long narrow lakes, consisting in many places of simply a broadening of the river, and in others, a well defined lake of considerable area. Such are Shuswap Lake, whence flows the Thompson and Lake Kamloops, through which the same stream passes; also Upper and Lower Columbia and Upper and Lower Arrow Lakes, along the course of the Columbia, and Lakes Kootenay and Okanagan, features of the streams thus christened.

THE COAST LINE

Is the most wonderful in the world. The mountains border closely upon the sea, the shore being indented by a multitude of bays and inlets and fringed by countless small islands between which run tortuous, but safe and navigable, channels. Outside of these, and protecting these inland channels for nearly the entire length of the coast are a series of large islands, the greatest and most southerly of which is that of Vancouver, in which the City of Victoria is situated. In referring to this peculiarity, the Earl of Dufferin, at that time Governor General of Canada, said in a speech at Victoria:

"Such a spectacle as our coast line presents is not to be paralleled by any country in the world. They generally, for nearly a week in a vessel of nearly 2000 tons, would find an interminable labyrinth of water lanes and reaches that would endlessly in and out of a network of island promontories and peninsulas for thousands of miles, untroubled by the slightest swell from the adjacent ocean, and presenting at every turn, an ever shifting combination of rock, verdure, forest, flower, and snow-capped mountain of unparalleled grandeur and beauty. When it is remembered that this wonderful system of navigation, equally well adapted to the largest line of battle ships and the fastest mail steamers, the entire seaboard of some Province and common to all points, comprises more than a hundred miles from the coast with a multitude of valleys stretching eastward into the interior, which at the same time is fringed with innumerable harbours for other local uses, and a navigation at the footwork for inter-communication which are thus provided for the future and future of this wonderful region."

British Columbia upon the whole has been most favored by nature. No wonder that with all her seven forest resources in precious metal, her wool and iron her magnificent fisheries and vast forests, her delightful climate and rich agricultural valleys, her matchless harbours, and her transcontinental railway, she looks forward to a

EMIGRANT NOTES

The white population is increasing at a rapid rate. Of this class, the majority are of English extraction, coming from the mother country, or some of the numerous dependencies of the Crown. There are also French, German, Italian and representatives of every European nation, as well as

many from the different portions of the United States. Apparently incongruous as these elements are, the preponderance of English influence moulds them into a harmonious whole. Law reigns supreme in the Province. Justice is administered with that fixed integrity which is characteristic of the British courts. Crime is at a minimum, and lynch law is unknown. In this respect British Columbia offers a favorable contrast with the region south of the international line. Education receives much attention and most excellent free schools are maintained. There are also higher institutions for the benefit of those desiring a more extended and liberal education than can be obtained in the public schools. Churches are numerous and well attended, and everything indicates that the people are the moral and intellectual peers of the citizens of those much older communities on the Atlantic slope. The magnitude of

THE INDIAN POPULATION

Which is about 20,000 may seem a source of danger to one accustomed to peruse romantic Indian literature, or to reading of the frequent outbreaks among the native tribes living south of the line. Such is not the fact. The intending settler may depend upon finding the Indians peaceably, intelligent, eager to learn, and industrious to a degree unknown elsewhere among the aborigines of America.

The Province is well served with

NEWSPAPERS.

The various journals for a staff which see "Provincial Information" being large, well conducted, and enterprising furnishing complete local and foreign news. The history of the press, and its ultimate success in Victoria if fully written up, would make an interesting chapter of her early days.

THE CLIMATE

For farming, stock, and mercantile pursuits be considered, and this fact will testify we can do business in the future of the Province, over a great part of the State, England, but without the biting east winds. Elevated mountains, of course, give the climate that everywhere belongs to them. The Marston House that expressed himself in regard to it.

No words can be used to express the beauty of the delightful land, where the climate is better and more constant than that of the south of England, except at a distance of the sea, a full description of the lovely scenery of the province. Agreeable as I think the study and dry cold air of the winter, yet there are very many who would undoubtedly prefer the temperature of the winter, who are west of the mountains. From which it is what is called "the climate of the mountains," and the temperature of the winter is great, or greater, moisture. That is, the winter is always the winter of the mountain, small or great.

The following is a description of the climate.

WINTER (1880)

Being the last winter, which is the best, from 30 to 40 inches per day, and 40 inches per day, in the winter, as 75 degrees below 40 below the zero. In some of the mountains, the temperature is 75, and the winter is the best. The snow and the mountains are being slow, the

35

farmer is given ample time to prepare the soil to receive the seed, and, after it has ripened, to harvest and house the result of his labors and toils. A ready market is found almost at the door for the products of his farm, at very good prices, as the following list of ruling rates will demonstrate: Hay, per ton, \$15 to \$20; wheat, and oats, \$30 to \$40; barley, \$35 to \$40; potatoes, \$25 to \$30. The dairy and poultry business can be rendered exceedingly remunerative, the demands at present being far ahead of the supply from local sources, immense quantities of butter, eggs, etc. have to be imported from the East. Fresh eggs always command from 10 to 75 cents per doz. Chickens, by the dozen, realize \$8 to \$10. Turkeys, 50 to 60 cents per pound, geese, from \$2.00 to \$4.00 each, ducks, \$1.00 per pair, dairy butter, 90 to 60 cents per pound, cheese, 25 to 30 cents per pound. The soil generally is of a very productive character, and the climate is considered agreeable and pure, is yet widely unoccupied. In the Sped Lunenburg, Salmon, Okanagan, Kootenay and Okanogan regions there are thousands upon thousands of acres of arable and pasture land yet to be cleared, indeed the capacities for pasturage in the central districts of the mainland are very extensive, and of a character unsurpassed.

### FRUIT, ETC.

Of the temperate zone growth, production on Vancouver Island, along the lower Fraser and in the valleys of the interior. The Province is capable of supplying the Northwest of the Dominion with the choicest of apples, peaches, plums, cherries, etc., and considerable is now being exported, it will before long become an important industry. The southern wine producers a bearing orchard well cared for has a source of income. His neighbors are deprived of it. His grapes are cultivated successfully, and the superior quality ensures for him a ready sale. The yield has been from 1,000 lbs. in ordinary years to 2,000 lbs. per acre in favorable seasons. They have been pronounced superior to, if not superior to, the English. They are of a variety known as the "Grape of the Central Coast" from California, and is said to have greatly impressed in British Columbia.

### GAME.

The Province presents great attractions to the sportsman. Groves of various kinds are found on it everywhere on the Island of Vancouver and the Mainland. Prairie chickens are in all the open valleys east of the Cascades. Ptarmigan on the high mountains and tall lakes and ponds abound with wild geese and ducks. Snipe and pigeons are plentiful. All these afford a grateful addition to the farmer's larder, while for more aspiring sportsmen, in the woods, deer, bear, etc., and in the mountains numbers of goats. The English pheasant, imported some years ago, is now plentiful on Vancouver Island and rabbits on the mainland, but not too numerous to be destructive to crops.

### FISH AND LUMBER INDUSTRIES.

Aside from mining and agriculture, the leading industrial pursuits are the preparing for market, in various forms, of the timber which clothes the hills with a green garment, and the multitudes of valuable fishes which swarm in the adjacent waters. Of these the most important is the salmon industry. Salmon of several varieties crowd in to the inlets and streams of the Province, ascending as far inland as possible to deposit

*strobilata* is found on the Lower Fraser, where it attains great size and beauty. The balsam pine attains a vigorous growth, but it is of little value as timber. Yellow pine (*ponderosa*) flourishes in the interior. The wood is close grained and durable, though very heavy. Scotch fir is found in the interior, as is a Vancouver Island, though of smaller growth. Throughout the coast, east the hemlock grows to large proportions, its bark being especially valuable for tanning purposes. The western hemlock (*ponderosa*) grows to immense size on the mountains along the international line. It is well suited to the coast and as far up the Fraser as Yale. It does not attract the same English saw. Oak grows abundantly in parts of Vancouver Island, being large and serviceable. Alder grows along the shores of the coast, and attains great size. It is useful for burning. Maple is also abundant on the islands and coast up to latitude fifty five degrees. This wood is very useful for cabinet making. The aspen (*populus tremula*) is found in the interior. A great variety of poplar woods along the water courses on the coast, and to the kind to which is denoted by the name of the paper maple.

The saws in the great logging industries in the Province are Vancouver and N.W. Western. There are several large timber manufacturing concerns, which employ a large number of men, and ship out a large quantity of lumber. The Millers of the N.W. Company employ about twenty million feet annually, and employ a large number of men, having numerous saw mills, and a large number of saw mills, and a large number of saw mills. A large number of saw mills are established at the mouth, and ship lumber to the coast, and will be carried on. The exports of lumber from the Province have greatly increased in the last few years, and the quantity of the Province is carried, which is expected in about six months, will give a great impetus to this already important industry.

ANALYSIS OF THE LUMBER

Vancouver Island is rich with as possessing rich stores of coal of a quality unequalled by any yet found in the American Pacific States. Notwithstanding the late depression which has been one of our calamities for some months in 1891 the output of coal from the Province during the year aggregated six hundred and forty four thousand nine hundred and thirty four tons. In addition to the mines worked at Nanaimo, and at Port Hardy, and the Union Coal Company's mines at Courtenay, it is well known that valuable deposits exist in large quantities at other places, and it is expected that these will receive the attention of capitalists with a view to active development. There exist within the limits of British Columbia vast quantities of precious and useful metals, many of which have been systematically and successfully mined in years, while others are only awaiting the development of which they are expected to become a source of great wealth to the Province. The most valuable are, embracing gold, silver, copper, iron, lead, zinc, platinum, phosphorus, graphite, and salt. Of these the most extensive workings are coal, silver and gold. Quartz mining on a systematic basis in the Kootenay district is being rapidly prosecuted, but the progress of this district has been retarded for lack of transport facilities. This difficulty will soon be overcome by the construction of railways connecting with the Canadian Pacific. The attention of capitalists is

39

already directed to the Kootenay country, and with proper machinery and cheap transport, judging from the analysis of recent quartz discoveries, it is probable results will follow fully equal to the expectations of the most sanguine. Prospecting for minerals on Vancouver Island has been vigorously carried out and the indications tend to confirm the fact that the Island is rich in precious metal.

Mining laws are liberal and strictly enforced. Peace and order prevail in the mining districts, and the rights of all are fully protected by law. The era of quartz mining is just beginning to dawn in British Columbia, following the appearance of cheaper and quicker methods of transportation. The richer placer mines, so far discovered, have been more or less worked out, and the yields are falling. But such placers have been more or less completely exhausted early in the history of gold mining countries, as in Australia and California. The best period comes when the minor veins to work on the quartz lodes, which are the gold in the placer men now has been derived. We learn by the annual report of the Minister of Mines for 1899, that in the Kootenay district alone 844 companies were working placer and quartz mines, the estimated value of the yield being, of gold \$71,450, and of silver \$7,098,400. The principal work done so far being little more than prospecting and heavy panning. In several cases the properties are not disposed to make the returns public. Some assays of silver range from 45 to 200 oz. of silver to the ton, with from 50 to 60 per cent lead. No doubt some wonderfully rich developments may be looked for in that region. In conclusion, it may be added that generally throughout the Province, farming, fruit and stock raising interests have been making considerable progress during the past year and for the information of those interested the following data is supplied from the official report of the Dominion Immigration Agent at Victoria.

DATA SUPPLIED BY W. H. DICKLAND, SECRETARY TRADE AND LABOR COUNCIL.

## BRITISH COLUMBIA DIRECTORY.

Lefevre, Executive, Drs John C. Davis, W. J. McGuigan, E. B. C. Hanington; S. H. Lee, F. G. Walker, Esq., B.A. Cantab.

The Council may admit upon the registry any person producing diploma of a public or private college or having a three years' course of study, and if he should fail by evidence of identification and passing a set of oral examinations. Before examination the candidate must pay one hundred dollars for his fees, of which will be returned if a candidate is successful. For further regulations and examinations held, see regulations printed in the November and May of each year.

### Active Militia.

## Education.

Abstracts from the 14th Annual Report of the Superintendent of Education, 1890.

The report of the year is a most gratifying one, showing an enrollment of 8,042 pupils, an increase over the previous year of 1,246. Eighteen additional teachers being required. There are also 8 newly created school districts, in addition to these, schools are now maintained at Chemainus Landing, Sahilton and Salmon Arm. The total number of teachers on permanent staff being 454. The highest monthly salary paid is \$440, and the lowest \$20. Total number of schools in operation being 117.

The expenditure by the Lands and Works Department for the construction of school houses, furniture, repairs and improvements was \$35,076.32, and the total expenditure for all purposes of education during the year \$408,961.15.

The following is the statistical abstract of attendance:

Number of pupils enrolled during the year	8,042
Increase for the year	1,246
Number of boys enrolled	4,129
Increase for the year	597
Number of girls enrolled	3,913

Provincial Museum.

John Fannin, Curator. Hours of admission Daily 9 A. M. till 5 P. M. Saturdays 9 A. M. till 3 P. M.

This institution which was started in October 1887, has made such rapid strides that it has been found necessary to make considerable additions to the building for the receipt of minerals, fossils and Indian curios. The principal display of specimens of natural history is considered to be the finest in the Dominion and the contributions are continually increasing. It is free to the public, being supported by the provincial government. Among the interesting collection of rare animals will be found the Musk Ox and White Goat of the Mountain Sheep, the Beaver, Wolf, and the Grizzly Bear, etc. Birds are also well represented, there being between three and four hundred specimens. The Geological department at present in course of arrangement, when completed, give a comprehensive view of the mineral resources of the Province, and will be of special interest to all concerned in developing the mineral industries, which are likely to prove a source of great wealth in the near future.

In the products of its mountains, rivers and forests, in the treasures which lie hidden beneath its surface, a six hundred miles of sea, few countries can boast so many varied and prolific resources as Great British Columbia, and material evidence can there be found within its borders to form one of the most interesting and instructive collections in the Dominion.

The cooperation of the general public is necessary to insure the museum becoming a really representative institution; it is therefore earnestly desired that geological and natural history specimens from all parts of the Province may be collected by those who have the opportunity, and forwarded to the Curator; the receipt of all such contributions will be promptly acknowledged, and the transportation charges fully paid.

Packages of ores should not be too large, and each specimen should be accompanied with a note of locality, position and extent of formation.

With regard to Indian curios, it is much to be regretted that so many are being exported from the Province. The funds at the disposal

of the museum are quite inadequate to meet the high prices demanded by the dealers, so that it is to be hoped all who can will assist in securing rare specimens, and that persons visiting the outlying districts will avail themselves of their greater facilities for bartering with the Indians, and add to the, at present, somewhat meagre collection now in the museum.

**Dominion Census Returns, 1891.**

The following is an abstract of the result of the population of Canada, by Provinces, from a summary of the census of Canada, laid before Parliament on the 29th August, 1891.

New Scotia,	150,524	Assiniboine, Saskatchewan, and	
New Brunswick,	321,294	Alberta,	61,487
Prince Edward Island,	109,088	British Columbia,	92,767
Quebec,	1,588,456	Manitoba,	32,450
Ontario,	2,412,980		
Manitoba,	134,412	Total population,	4,823,345

The population of the various cities of British Columbia is given as follows:

Victoria,	16,840	New Westminster,	6,641
Vancouver,	14,685	Nanaimo,	4,300

The population of the two British Columbia Dominion Electoral Districts is as follows:

Westminster,	34,000	Yale,	12,000
Victoria,	18,548	Cariboo,	10,000
Vancouver,	18,220

**Provincial Government Lands.**

Crown lands in British Columbia are classified as either surveyed or unsurveyed lands, and may be acquired either by record or pre-emption, or by purchase.

PRE-EMPTIONS.

The following persons may record or pre-empt Crown lands, viz: Any person being the head of a family, a widow, or a single man over 18 years of age, being a British subject, may record surveyed or unsurveyed Crown lands which are unoccupied, unreserved and unrecorded.

Aliens may also record such surveyed or unsurveyed lands, on making a declaration of intention to become a British subject.

G. PHILLIPS, ( DEALER IN STOVES, RANGES AND TINWARE. — SOLE AGENT FOR THE ANTHONY STEEL PLATE FURNACES. 14 Government St. VICTORIA, B. C.

PROVINCIAL INFORMATION.

The heirs or devisees of the homestead settler are, if resident in the province, entitled to the Crown grant, on his decease.

If they are absent from the province at the time of his death, the Chief Commissioner may dispose of the pre-emption, and make such provision for the person entitled thereto, as he may deem just.

PRE-EMPTION FOR PARTNERSHIP PURPOSES.

Partners, not exceeding four, may pre-empt as a firm 160 acres each west of the Cascades, to each partner, and 320 acres east of the Cascades to each partner.

Each partner must represent his interest in the firm by actual residence on the land, of himself or agent. But each partner, or his agent need not reside on his particular pre-emption.

The partners, or their agents, may reside together on one homestead, if the homesteads be situated on any part of the partnership pre-emption.

For obtaining a certificate of improvement, it is sufficient to show that improvements have been made on some portion of the claim, amounting in the aggregate, to two dollars and fifty cents per acre on the whole land.

MINING LAWS.

FREE MINERS.

"Free Miners" only can have right or interest in mining claims or ditches. A "free miner" must be over 16 years of age. His certificate may be for one year \$7, or three years \$15, and is not transferable. He may enter public lands, or, on making compensation, lands occupied for other than mining purposes. To recover wages, must have free miner's certificate.

RECORDING OF CLAIMS.

Claims must be recorded (\$2.50), and re-recorded (\$2.50). Time allowed for record is three days after location, if within ten miles of office — one additional day for every additional ten miles, or fraction thereof. In very remote places, miners assembled in meetings, may make valid rules temporarily. Transfers of claims or mining interests must be in writing and registered. Free miner's certificate after each year \$5.00, may hold any number of claims by purchase, but only two by pre-emption, except in certain cases. Claims may be silently laid over, and have of absence granted in certain cases, but the rule is that every full claim or full interest must be worked either by owner or agent. A free miner can, by record, get a fair share of water necessary to work claim. A claim is deemed open if unworked for 72 hours on working days, unless for sickness or other reasonable cause.

**HALL, GORFEE & CO., Coal Dealers, Agents for the Old Reliable Wellington Coal,**

1001 Broadway, Victoria, B. C. Telephone Victoria, B. C. P. O. Box No. 44. Telephone Call No. 84.

**NATURE AND SIZE OF ORDINARY MINING CLAIMS.**

Claims, as far as possible, are rectangular and must be staked by post or tree. Sizes are, "bar diggings," 100 feet wide at high water mark, and thence extend into the river at its lowest water level. "Dry diggings" 100 feet square. "Creek claims," 100 feet long, measured in the direction of the general course of the stream, and shall extend in width from base to base of the hill or bench on each side, but when the benches or hills are less than 100 feet apart, the claim shall be 100 feet square. "Bench claims" 100 feet square. "Hill claims" base line fronting a stream 100 feet—parallel side lines at right angles thereto at summit of hill. Posts 100 feet apart. Measurements horizontal, irrespective of surface inequalities.

**DISCOVERER'S CLAIMS.**

To one discoverer, 200 feet in length. To two discoverers, 600 feet in length. To three, 800 feet in length. To four, 1000 feet in length, and to each number, for a party, a second party in number, a claim of the ordinary size only.

A new stream, bar, or gravel, or gravel situated in a locality where the discovery has been made for the above purposes, be deemed a new discovery, if the same locality had been previously worked by a different party, or by diggers, however, if the contents of bar diggings shall be found to contain payable gold or silver. A discoverer's claim shall be staked as follows:—

Creek discovery claims shall extend 1000 feet on each side of the centre of the creek, and be staked as follows:—

**CLAIMS FOR GOLD.**

On discovery of a new lode, or vein, containing minerals, six months' exploring operations may be carried on, and a claim of \$1000 on each side of the lode, or vein, may be returned one year. Under other conditions, see Act of 1902.

**MINERAL CLAIMS.**

Mineral claims need not be staked, but are supposed to contain minerals, and are staked as follows:—A lode, vein, or rock in place—1000 feet long, 100 feet wide, and as many as possible, intersecting lines. Mineral claims are staked in equal distances, and are staked with corners on each. The posts shall be numbered 1, 2, 3, 4, and 5, and shall always be numbered 2, and 3, commencing from the centre of the claim, a line shall be run from post 2 to post 3, and from the same straight line to the required distance with the corners as to direction, to post 4, but, as to distance, and to line, as to distance, the distance, in a straight line, between posts 1 and 2, shall not exceed 1500 feet. On each post there shall be written, in plain writing, stating the name of the claim, the name of the discoverer, and the location of the centre line, with the date of the staking, and the element of the ground. When a claim is staked, the discoverer shall enter, within any case post notice to

seen from the next post, the locator shall blaze a line connecting all the posts. In cases where, from the nature or shape of the ground, it is impossible to mark the centre line of the claim, provision is made. See Mineral Act, 1891. Only one claim on the same lode or vein can be held except by purchase. Quartz claims are deemed to be mineral claims.

To lawfully hold a Crown grant for a mineral claim, it must be surveyed by a surveyor approved by the Land Office; notice of application for the grant must be posted conspicuously on the land and on the Government office of the district, also inserted for sixty days in the Government Gazette and a newspaper, if any, circulating in the district and proof must be given to the satisfaction of the Government officers that \$500 have been bona fide expended in money or labor upon the claim, exclusive of all houses, buildings and other like improvements. Or a Crown grant may be got by paying \$25 per acre to the Government in lieu of representation and expenditure on the claim.

General provisions for ordinary mining claims apply to mineral claims as far as may be.

The preferential location of a mineral claim requires that the sum of one hundred dollars, or more, shall be expended in improvements shall be expended in the first six months of every year upon the claim, to the satisfaction of a Gold Commissioner or Mining Recorder, and that the owner shall have recorded a certificate in the Gold Commissioner or Mining Recorder, to that effect, within six months from the location of the claim, and thereafter within the first six months in every year, and shall have recorded the certificate monthly after its issue.

Leases of mining ground, shaft privileges, &c., may be issued, but will not in general be granted for a longer term than ten years, or for a quantity of ground greater than:

- In dry diggings, ten acres.
- In dry diggings unworked half a mile in length along the high-water mark.
- In bar diggings worked one mile and a half in length along the high-water mark.
- In creek claims on alluvial flats one mile and a half in length.

The right to take surface ditches and drainage need not be declared, but it may be stated that the water taken into a ditch or sluice has to be measured at the discharge point. No water should be taken into a ditch or sluice except in a ditch placed permanently at the place at which the water issues. On a ditch or water course half the quantity that will pass through an opening two feet high by six feet wide, with a constant head of seven feet, shall flow over the upper side of the opening.

COAL LEASING LICENSES.

A twelve-months' prospecting license for 150 acres of vacant coal land in one block may be granted by the Government on payment of \$2500. The licensee may be extended for another year if the licensee has actually explored for coal on payment of \$5000. The license is not transferable without being given to the Chief Commissioner of Lands and Works. If a licensee wishes to purchase the coal lands, he may do so under the Coal Act for \$250 per acre.

BRITISH COLUMBIA DIRECTORY.

TIMBER LICENSES.

Unlicensed persons, except for farm or mining purposes, etc., are not permitted to cut trees on Crown lands. A timber license may be granted for 1,000 acres for four years on payment of \$10.00 annually, and 15 cents for each tree (except hemlock) felled payable half yearly. No person can hold more than one license at the same time, and it is not transferable. Mill-owners cannot saw logs taken from Crown lands (which are included in the license) but less than ten cents are now (until the timber dues of twenty cents per thousand feet board measure) are paid.

DOMINION LAND REGULATIONS.

We have to draw attention to the applicability of the recent Dominion Land Act at New Westminster, that the regulations applicable to British Columbia prior to the first January 1887, since that time applicable, had to be observed for less than 3000 acres. Timber land is now to be granted by competition, the advertising for tender being done from Ottawa.

ALBERNI DIRECTORY.

97

**ALBERNI.**

POSTMASTER, JOHN CARTER MOLLET,

IN THE DOMINION ELECTORAL DISTRICT OF VANCOUVER AND PROVINCIAL OF ALBERNI.

**Alberni Canal.**—A long commodious harbor on the west coast of Vancouver Island, at the head of which is the Alberni settlement. The canal is navigable for a distance of twenty five miles and terminating to the west in the large open roadstead of Barclay Sound.

**Beaver Creek.** See description and list of names.

**Cape Beale.** A prominent point at the western extremity of Barclay Sound, on which a light house of the same name stands, past which ships entering the canal have to pass.

**Great Central Lake.** North east of Sproat's Lake and twenty miles from Alberni, it is a magnificent sheet of water over twenty miles in length.

**Mount Arrowsmith.** A grand mountain peak lying east of the settlement.

**Mount Moriarty.** Another grand mountain peak lying east of the settlement.

**Somass River.** A magnificent stream emptying into the head of the canal, the source of the river is Sproat's Lake, a large lake to the north-west of the settlement.

**Stump Harbor.** The extreme eastern end of Alberni Canal, on which the first saw mill formerly stood.

One leaving Victoria by steamer for the West Coast of Vancouver Island, first passes Race Rock Lighthouse, and Sooke Harbor and Port St. Juan on his right hand, 90 miles from the capital Cape Beale Lighthouse is reached, situated immediately at the entrance of the well known waters of Barclay Sound. After entering either of the navigable channels, the steamer ploughs its way among the innumerable Islands, both small and great, which dot the wonderful inland sea, until it narrows into the Alberni Canal, some 40 miles from the entrance at Cape Beale the head of the Canal is reached, when a magnificent panoramic view of the fertile and extensive Alberni Valley appears to view, surrounded by mountains covered with a dense growth of valuable firs and cedars. The traveller, on approaching the mouth of the Somass River, (where the Alberni townsite is situated), is at once struck with the luxuriant vegetation which meets his eye in every direction. Here is to be found, in abundance, the beautiful maple, the dogwood, crab apple and alder, and all kinds of berry

BRITISH COLUMBIA DIRECTORY

bushes are seen growing and thriving everywhere; rich and tender grass, studded with lovely flowers, meet the eye, and in the rich soil all along the river, in the shade of such a forest, many kinds of tender and beautiful ferns are found in the glory of their element. In this valley good land is to be found in unlimited quantities; fine fruit and vegetable gardens where all kinds of fruits grow to perfection, and where can be seen, in its season, the peach and grape, the water and musk melon, tomato and Indian corn growing to satisfaction. With the exception of three or four old pioneer settlers (who have now passed beyond the field of action), the present settlement may be said to have started in July, 1884, when the Steamer *Nanodya* landed in Alberni a party of excursionists, among whom were the late Hon. Wm. Smith, C. C. L. & W., late Mr. James Fell, ex-Mayor, Mr. Trotter Johnston, Hudson Young, and some 20 others. Among the passengers were John C. Mollet and family, who were the first settlers in the place, excepting those before mentioned. From that time the settlement commenced to go ahead and increase, until within two years there were some 100 claims taken up for agricultural purposes.

Outside the Indians, which are numerous, and the Chinese, the population of Alberni numbers something over 200. There are 3 post offices, viz. Alberni and Beaver Creek in the settlement and Clayoquot on the West Coast. The name of Sayward has been recently abandoned and that of Alberni substituted, it being the main post office in the settlement or district. There are two schools under one Board of Trustees, five mission stations, one for the Presbyterians and one for Roman Catholics at the settlement, and three Roman Catholic along the West Coast, chiefly for the benefit of the Indian population. There are two good stores on the townsite at Alberni, besides five others on the West coast, also a boarding house and sawmill at Alberni. There is a weekly mail service overland from Nanaimo, which is some 54 miles distant.

There are 22,377 acres of land taken up in the settlement, which is assessed for the amount of 880,276. (This does not include the lands taken up around Barclay Sound or along the Coast.) There are still large areas of excellent land lying vacant in the Alberni Valley which only requires opening up by good roads to make them accessible to the steamer at landing, and thus valuable for settlement. These lands can be purchased at \$3 per acre, payable in 4 yearly payments with interest at 6 per cent. Roads and bridges are being constructed and improved from year to year, so that the settlers can now enjoy the luxuries of a buggy or carriage ride. The rivers and lakes are teeming with the various species of salmon and trout in their season, and game of all kinds is very abundant in the valley.

Of the new industries (started or in prospect of being started) since last year, there are two worthy of mention, the first being the discovery of a valuable quicksilver mine on Cannelar Creek, Barclay Sound, by Messrs. German sen and Ehrbridge, who have sold out to capitalists in Victoria. A strong company has been formed and a large party of men have been at work for some time testing the ledge, which so far has turned out most satisfactorily.

ALBURNI DIRECTORY.

109

The second industry to be shortly started is a paper mill on the Sonoma River at Alburni. Mr. Herbert Carmichael has bought 160 acres of land from J. C. Mollet with a magnificent water power, and a paper mill will soon be started, it being the only one in the Province.

The large area of good land in a compact body, the resources of the place in fish and timber, in pasture and minerals, the mild climate and lovely scenery, the splendid water power and privileges, an abundant supply of the purest water all over the valley, and last, but not least, the geographical position of Alburni, all these facts when taken into consideration only tend to one end, viz., that Alburni is destined at no distant day to become a place of importance and wealth. All it requires to secure this position, is development of its resources and radical communication with other places.

A steamer of the Maple, one of the C. P. N. Co.'s fleet is subsidized by the Government to make monthly trips to Alburni, calling at way ports on West Coast and Barclay Sound, and horses and vehicle can be had from Mr. Armstrong (mail carrier) overland from Nanaimo, or vice versa.

ALERT BAY DIRECTORY

101

It is accessible by all steamers leaving Victoria, which call here going and coming. The C. P. N. Co. run a boy twice a month in the summer time, and the steamer Boscowitz also calls twice a month, so, practically, there is weekly communication. Here Messrs. Spencer & Earle have a salmon cannery and get their fish from the Ninkiesh river, just opposite, on Vancouver Island. They have a store in connection with the cannery, and the post office is at their store.

The Church Missionary Society have a resident missionary here, the Rev. A. J. Hall, who with his wife, has labored zealously among the Kwagwilt Indians the last 14 years. He has also succeeded in starting a steam sawmill in connection with the mission, which supplies all kinds of lumber to the neighborhood. There is also a store with the sawmill.

Cornorant Island is only a small island, containing about 1,000 acres, heavily timbered with hemlock, spruce and a sprinkling of red fir; and the land for the most part is almost worthless. Here the Ninkish Indians have their village, and there is a school for Indians on the reserve. The Indian agent for the district has his residence here also.

The land in the vicinity is all heavily timbered with hemlock, spruce and cedar, and here and there are patches of fairly good land.

Settlers are few and far between. Mr. W. May lives at Kluksoy, 11 miles above Alert Bay, and Mr. Robert Hunt occupies the old Hudson Bay trading post at Fort Rupert, in Beaver Harbor, sold by the company to Mr. Hunt some few years ago, which is about 21 miles from Alert Bay; and about 12 miles again above Fort Rupert. Mr. E. Fuzon has a small trading store at Fort Alexander, ten miles above the steamer levee the Vancouver shore and across Queen Charlotte's Sound on their northward journey.

Good underlies all the country between Alert Bay and Fort Rupert, and is found right across Vancouver Island to Rupert Arm on the West coast. At Malcolm Island, a little to the north of Cornorant Island, the Christian Temperance Commonwealth Society have established themselves, the government of British Columbia having granted them a tract of land on certain conditions. Mr. Joseph Spencer is the head of it at present and may be addressed to Malcolm Island. About 4 miles above Alert Bay is Heddlington Island, where Messrs. Huson & Rudge have recently found a very valuable kind of sandstone, which can be seen at Mr. Rudge's marble works in Victoria. It is said to withstand fire equally as well as fire brick. About 5 miles below Alert Bay is Beaver Cove, and a few miles up a small river running into this, an excellent quality of white marble is found. Salmon, in more or less quantities, are found in all the streams that run into the sea, during the months of June, July, August and September. Halibut are also taken in large quantities by the Indians, chiefly at the north side of Hope Island and the islands across Queen Charlotte's Sound towards Kingoomb Inlet. Knight Inlet, which lies to the eastward of Alert Bay, and which is on the mainland of British Columbia, is about 80 miles in length and well repays the trouble of a visit there, the scenery being magnificent nearly all the way up.

## BEAVER CREEK.

POSTMASTER, CHAS. FREDERICK BISHOP

**Beaufort Range.** The highest part of this range is in the district on the north, and the summit is 4200 feet above the level of the sea. Only two parties of settlers have ever been known to cross the ascent. From the top can be seen a fine glimpse of the whole of Alberni valley, Central and Stuart lakes, the headings and passages of the various valleys on the one hand, and on the other the Gulf of Georgia, Duncan and Henry Islands, in which some of the settlers' homesteads can be discerned by the naked eye. Farther off, Texada Island, the view being bounded by the mountains of the Mainland. The views to be seen are well worth the trouble of the ascent. Snow lays in sheltered nooks all through the summer.

**Stamps River** bounds the district on the north, it flows out of Central lake and into the Stamps River at Alberni. Trout and salmon are plentiful. About half a mile off the Beaver Creek road, the river tumbles over a precipice, and through a narrow, rocky gorge with drenching roar into depths below. This is one of the first places that strangers who want to see the sights of the district are taken to.

BEAVER POINT DIRECTORY.

103

The settlement of Beaver Creek section in the Alberni Valley was begun about seven years ago. It is bounded on the north by the Beaufort mountains, on the east by Hill's creek, on the south by Staups river, and extends to Central Lake on the west. It contains excellent farming and timber lands, which can be obtained from the E. & N. Railway Co., or on reasonable terms from the pioneer settlers. A public school has been in operation for the past four years. Religious services are held at present in the school house. It has also a post office. A saw mill is in course of erection. It is from five to twelve miles from the Alberni Landing, where steamers arrive and depart for Victoria. A trunk road runs through the district, which is intended to be carried on to Comox. Deer are plentiful, bear, prairie and beavers are also to be found. Hay, grain and roots yield excellent crops. Potatoes and apples ripen in the open, large and small fruits thrive well. The whole district is well watered by creeks, on several of which water power is obtainable.

## BEAVER POINT.

on Salt Spring Island.

POSTMASTER, ALEXANDER McLENNAN.

IN THE MUNICIPAL DISTRICT OF VANCOUVER, AND THE PROVINCIAL  
MUNICIPAL DISTRICT OF SALISBURY.

Is situated at the south eastern extremity of Salt Spring Island, forming a dividing line between two counties, Impeachment on the north and Sitchele on the south west. It is about 20 miles from Victoria and about half way between Plumper Pass and the northern extremity of Saanich. There is one school, communication by steamboat. The principal industry of the place is fruit growing and general farming. So far no religious services are held here. Population about 50.

POSTMASTER AT CHEMAINUS, DAVID POTTINGER

**Chemainus River.** A picturesque stream flowing into Stuart Channel in an easterly direction to the south east of Horseshoe Bay.

**Horseshoe Bay.** An excellent harbor at the north east extremity of the settlement.

**Kuper Island.** Lying to the south of Thetis Island and both about four miles of the north east corner of the settlement.

**Osborne Bay.** A spacious bay at the south eastern extremity of the district.

In the Provincial Electoral District of Cowichan, and Dominion of Vancouver, on the E. & N. B. R., the station being 52 miles from Victoria and 18 from Nanaimo. It is a farming and lumbering district, on the east coast of Vancouver Island. To the east lays Stuart Channel and the northern end of Salt Spring Island, to the south Saanich and Comoxin districts. The principal settlement is at Horseshoe Bay, a spacious harbor in the northeast corner of the settlement. A picturesque stream named the Chemainus River, flows through the southern part of the district. The whole district, lying as it lies in the northern part of the Cowichan settlement, is picturesque and beautiful in every particular. Good fishing and hunting afford ample recreation to those having leisure.

The principal industry of the section are the Chemainus Mills, owned by the Victoria Lumber & Manufacturing Company, E. J. Palmer, Esq., Manager. These mills, which are a marvel of arrangement and capacity, are a credit to all concerned therewith, and are, without exception, unsurpassed on the Pacific Coast, employing nearly 200 men, with a cutting capacity of 200,000 feet per day. The Company also operate a large store, carrying a

**COMOX DISTRICT.**

COMOX, POSTMASTER J. B. HOLMES. GRANTHAM, P. M. THOS.  
 GREEN. SANDWICK, P. M. ERIC DENCAN.

**Buttle Lake.** A large, beautiful irregular lake, lying to the west of  
 Comox District.

**Baynes Sound.** Separating Denman Island from the mainland, by a long  
 narrow channel of considerable depth and offering good anchorage. It  
 forms the west shore of the district.

**Comox.** The southern postal division of Comox District in the Province  
 of British Columbia and the Dominion of Vancouver Island. It is the landing place of the weekly steamer from Nanaimo  
 distant about 90 miles, and 10 miles by wagon road from Union Mines.  
 There are two hotels and two stores. Elk Hotel, proprietor, George G.  
 McDonagh, and Lorne Hotel, proprietor, Sam. J. Cliffe. The Knights  
 of Pythia have erected a large hall here, and there is a public school,  
 also a Roman Catholic Church and Episcopal Church. Population about  
 200.

**Comox.** Taken collectively as a district, is situated about 140 miles north of  
 Victoria, and on the east coast of Vancouver Island, known on the coast  
 charts as Port Augusta, but familiarly known by the Indian name,  
 Comox, is divided into three postal divisions, namely, Comox, Grantham,  
 and Sandwick. It has communication with Victoria and Nanaimo by  
 steamer, and lying, as it were, in the track of the Alaska and Northern  
 steamship lines. It is the largest settled farming district on the island,  
 and is fast becoming one of the most beautiful settlements in the Pro-  
 vince. It possesses a fine harbor, and the only one on the east coast

north of Nanaimo. Many lumbering camps are erected in the neighborhood, and the Union mines, owned by the Union Colliery Co., turn out a large quantity of excellent coal. The soil is of the best agricultural, and lumbering and coal mining are carried on extensively. A drive or walk through its powerful valleys dotted with farms in a high state of cultivation, would prove to the observer the fertility of the soil. There is no better place for the sportsman in the island, deer, elk, wolf, bears, panthers, geese, in fact every kind of game is to be found in the vicinity, also, different species of fish, such as salmon, trout, whiting and cod are to be found in abundance in the streams, lakes and rivers and waters that surround the district. The educational and religious facilities are well looked after, there being several schools and churches of different denominations, which hold regular services. It has every convenience of a village, there being two hotels, three stores, a public hall, butcher shops, etc. Farms may be bought at reasonable rates, both improved and unimproved. Three miles from this settlement lies the rising town of Courtenay, which is fast becoming a town of importance. It is surrounded by coal fields and will see the proposed railway extension. It has quite a number of settlers who have built their homes there. The saw mill owned by Campbell Bros. is here, and is in good running order, it also contains a fine hotel, in which Mr. Grant is proprietor, also, stores and a livery stable.

**Denman Island.** Separated from the Mainland by Baynes Sound. Has good farming land.

**Grantham.** Is the northern postal division of Comox District, Comox and Sandwick both lying to the south of it. It is entirely a farming section and has a public school, but no churches or hotels. A wagon road runs from Grantham to Sandwick 5 miles, to Comox 7 miles, and to the Union Mines about 9½ miles. Population, 60.

**Hornby Island.** Lying to the east of Denman Island and separated from it by Lambert Channel, but possesses good farming lands and excellent farms.

**Sandwick.** The middle postal division of Comox District. Grantham to the north, Comox to the south. Has a population of about 300. It is in the Dominion Electoral District of Vancouver, and the Provincial Electoral District of Comox. It is distant from Comox Landing 3 miles, Union Village 6 miles, and from Nanaimo 65 miles. John J. Grant is the proprietor of the Riverside Hotel, which affords good accommodations. It contains many beautiful farm lands, farming being the principal industry. Communication is carried on weekly, both by steamer from Nanaimo and wagon from Comox and Union Mines. Two public schools, one Church of England and one Presbyterian Church affords high educational and religious instruction.

## CORFIELD.

POSTMASTER, GEO. T. CORFIELD

In the Dominion Electoral District of Vancouver and in the Provincial Electoral District of Cowichan, situated on the rich alluvial lands of Cowichan, at the head of a bay of the same name, lies this splendid agricultural section on the east coast of Vancouver Island. The whole surroundings of the settlement are very pretty and not unlike the foot of the far famed Cowichan valley. It is a charming spot for either tourist or settler. There is communication both by rail and water, being only two miles distant from Cowichan wharf, M. Pherson's or K. Kooch's stations on the E. & N. railroad. It is the largest tract of fertile land in Cowichan district, and is enormously productive. The largest part of this belt is an Indian reserve even, but the Indians are much more civilized than in most of the districts in British Columbia, and do considerable farming. Two rivers, the Cowichan and K. Kooch, flow through this tract into Cowichan bay, and afford excellent fishing, and in winter wild fowl are very numerous. Mr. Geo. T. Corfield, the postmaster, has a large and well fitted store, and is engaged extensively in raising small fruits, which do wonderfully well in that section. The principal industry of the place is farming. Population 50 whites and 100 Indians.

## COWICHAN.

POSTMASTER, G. B. ORDANO

Cowichan was a subdivision of the district of the same name, situated on the east coast of Vancouver Island, in the Dominion Electoral District of Vancouver, and Provincial of Cowichan, midway between Victoria and Nanaimo, is a fertile agricultural district, well watered by the small rivers, creeks and numerous lakes, and presents a wide field for enterprise. At the present time agriculture is the principal industry of the settlers, and the soil is noted for its productivity. The Esquimalt & Nanaimo R. R. runs through the district and has done a great deal towards its development. The Indian reserve, which occupies several thousand acres lies at the bottom lands of the Koksilah and Cowichan Rivers, the Indians being civilized have taken great interest in tillage, some of the 25 farms which possess its own particular spot. Good roads run all through the district. Game of all kinds abound, and in addition to agriculture, lumbering is carried on extensively. There are also several quarries worked. The scenery is of a most beautiful and attractive, and the climate is all that could be desired.

action. It is in the Dominion Elec. Dist. of Vancouver, and Provincial of Cowichan.

The worthy Postmaster at the head of this article, Mr. Angus C. Fraser, keeps an hotel, and has a very extensive logging camp at the lake. He is a whole-souled man, and is extremely popular. Those visiting the lake will be made welcome, and cannot fail to thoroughly enjoy themselves. The fishing and hunting are excellent, and a holiday spent at the lake is an event to be remembered.

DEPARTURE BAY.

JAS. HARPER, JR., POSTMASTER

Departure Bay is situated three miles north of Nanaimo, in the Dominion Electoral District of Vancouver and Provincial of Nanaimo, on a picturesque inlet of the Gulf of Georgia, and is the shipping point of the well known Wellington Coal Mines. To the south about three miles are the mines, office and blacksmith shops. The largest ocean ships and steamers load at the commodious wharves of the Wellington Coal Co. The place is famous for its excellent coal that commands the markets of the Pacific Coast.

## DUNCAN'S.

POSTMASTER, J. McDONALD

In the Dominion Electoral District of Vancouver and Provincial of Cowichan, is without exception one of the prettiest townships on the Island Railway, it lies half way between Victoria and Nanaimo, and the short distance to either of these cities makes Duncan's a most popular resort, coupled as it is with so many varied attractions for visitors. Hunting, fishing, good drives, grand scenery and a most charming spot all go together to make the visitor take a great interest in the place. It is without doubt destined to become a large and prosperous inland town. Messrs. Lee & Dickie are the popular proprietors of the Alderlea Hotel, it is a most excellent house and anyone stopping there will receive every attention. Mr. W. P. Jaynes, J. P., has done much towards the building up of Duncan's, his energetic business qualities has made him extremely popular, he has lately opened up his double store and largely extended his business operations. The industries of the town are constantly increasing, ash, deer and

pump factory, saw mill and various other industries. The land in this section is exceedingly fertile and the farms generally are the best on Vancouver Island. A large agricultural hall has been built. A new court house and school are now in course of erection. It is the headquarters of the municipality of North Cowichan.

ESQUIMAULT DIRECTORY

121

**Disquard Island**, on which is situated a lighthouse which throws its rays for miles out to sea and into Esquimault's Harbor, which can be entered safely at any time.

**Lagoon**, large sheet of shallow water lying at the mouth of Esquimault Harbor.

**Portage Inlet**, between the boundary line of Victoria District and Esquimault District, and is a continuation of the Victoria Arm.

**Village Bay**, a lovely sheet of water in the east of Esquimault Harbor at the head of which is situated the Royal Naval Hospital.

Esquimault District lies in a westerly direction from Victoria, in the Dominion Electoral District of Vancouver and Provincial Electoral District of Esquimault. It is bounded by Royal Bay and Strathcona District to the south and Victoria Harbor to the east.

Esquimault, situated in a peninsula between the Royal Bay and Esquimault Harbors is celebrated for its beautiful Harbor, which is a safe and well sheltered, and easily entered, for ships of any size. This place was selected by the British Admiralty many years ago as a naval station for Her Majesty's ships. The graving dock is one of the best in the world, being 457 feet long, 57 feet wide, and having a depth of 27 feet. It is fitted with stone and Portland cement. The harbor teems with fish of every description, and many favorites as well as domestic animals. Esquimault is connected with Victoria both by the Electric Traction and the B. C. N. Railway.

Edwood, lying in the west side of Esquimault Harbor, contains good farming lands and several well kept farms. There is a public school for the education of the children, supplied with an efficient teacher, located here.

**METEOROLOGICAL STATION**

Chief Officer - E. Baynes Reed.

Meteorological Station. Since July 1st, 1890, a station has been established in Esquimault under the charge of Mr. E. Baynes Reed.

The station forms part of the extensive system of the Canadian Meteorological Service, under the management of the Director, Mr. Chas. Carmichael, of the Toronto Observatory.

The Esquimault Station is for the Victoria District and is well equipped with the modern instruments for recording and observing the weather, such as electric anemograph for recording direction and velocity of the wind, standard barometers, self recording aneroid barometer, standard thermometers, maximum and minimum thermometers, sunshine recorder, nephoscope for observing the clouds, rain gauge, etc. The observations are taken every four hours, day and night, and are telegraphed twice daily to Toronto, and from thence to Washington.

The station forms the most westerly and northerly telegraph reporting station on this continent and will, it is anticipated, prove a valuable addition to the meteorological service, carrying on, as it does, the valuable work hitherto so faithfully performed by Mr. W. T. Levesque, of the Hudson Bay Company in Victoria.

GABRIOLA DIRECTORY.

125

**GABRIOLA ISLAND.**

**JAMES GRAY, POSTMASTER**

In the Dominion Electoral District of Vancouver and the Provincial Electoral District of Nanaimo, situated on the eastern coast of Vancouver Island, just below the City of Nanaimo. It is about 9 miles long, and on an average of 3 miles wide. It is one of the most fertile and productive islands in the Gulf of Georgia. Between Vancouver and Gabriola Islands are the Narrows, known as Dodds' Narrows, when, at the change of the tide, the water runs at the rate of 10 or 12 knots an hour. Farming is the chief industry of the place, cattle and sheep are also raised in large herds.

There are two schools on the island. The inhabitants have their communication by steamer. Population, 110.

## GOLDSTREAM.

POSTMASTER, JAMES PHAIR

Goldstream is situated in a westerly direction, about 11 miles from Victoria. It is in the Dominion Electoral District of Vancouver, and in the Provincial Electoral District of Esquimalt. It is a very picturesque summer resort, containing a very comfortable and commodious hotel, and most charming for those wishing to stop in a delightful place. Those seeking hunting, fishing, or the many varied attractions of a country home, will find at the well-kept hotel every comfort, Mr. James Phair being proprietor.

Goldstream received its name from an excitement, a few years ago, by gold being found in a stream that runs past the hotel, but was not in sufficient quantities to pay for the work of mining.

It has communication both by railroad and wagon road. The drive from Victoria to Goldstream is a most enjoyable one.

## HORNBY ISLAND.

POSTMASTER, GEO. FORD

Hornby Island situated on the east of Denman Island, and separated from it by Lambert Channel. It is in the Dominion Electoral District of Nanaimo and Provincial Electoral District of Comox. The soil is very fertile, and beautiful farms cover the island. Farming being the principal occupation, a steamer plys between here and Comox, carrying the mail, etc. The school is now in the course of erection, which will provide ample education for the children.

POSTMASTER, J. C. CROZIER

In the Provincial Electoral District of Cowichan, and Dominion of Vancouver, a station on the E. & N. R. R., 35 miles from Nanaimo and 38 from Victoria, lying midway between the Cowichan and Koksilah rivers. Like all the far famed Cowichan valley, it is picturesque and a lovely spot, possessing an excellent climate, and a good place for the farmer, sportsman, tourist, or anyone in search of health. There are two general stores, one hotel and one school. Mr. Marshall is the proprietor of the hotel. Farming is the principal industry.

## McPHERSON'S STATION.

POSTMASTER, WILLIAM JONES.

In the Dominion and the Provincial Electoral District of Cowichan. One travelling by that most excellent road, the Esquimalt & Nanaimo R. R., which has done much to open up the valley of the Cowichan, there are many and varied scenes that are exceptionally pleasing, quite unlike a prairie country, that the sameness of which becomes tiresome. A trip along the Island Railway, as it is familiarly named, affords one continual scenes of beauty that is very changing and pleasing to the eye, at every turn in the road a change of view takes place, broken here and there with hill and dale, lake and mountain, added to which in the Cowichan section are the lovely streams and beautiful farms.

35 miles from Victoria and 38 from the former coal region of Nanaimo is McPherson's Station on the E. & N. R. It contains two general stores, two hotels, one club house and a school. Population 200.

## METCHOSIN.

**Albert Head.** A headland projecting out from Metchosin shore in an easterly direction, on which the Dominion Quarantine Hospital and grounds are situated, Mr. Henry Yates being keeper, distant from Victoria by water about 7 miles, by land 12 miles.

**Beecher Bay.** Possessing the more modern name of Port Beecher, facing Juan de Fuca Straits, at the southern extremity of Metchosin; 21 miles from Victoria by land and 15 miles by water. It is the proposed straits terminus of the North American Railway Company. It is a capacious harbor and a very picturesque place.

**Bentick Island.** A wooded island between Race Rocks and the south-eastern point of Metchosin, visible from Victoria, and distant about 12 miles by water. It is a very good spot for small boats.

**Big Lake, or Dr. Ash's Vines.** A beautiful sheet of water 2 miles long between Pedder Inlet and Sooke Basin.

**Bliston Falls.** Near Albert Head. A picturesque fall on a creek of the same name.

**Happy Valley.** Through which runs an excellent road, and possesses excellent timber. The land is generally good. It is situated in the middle of the district.

**Pedder Bay.** A long narrow harbor, at the south-eastern part of the district, said to be a prospective point for a straits ferry landing.

**Race Rocks.** Rocky dangerous shoals about three miles off the south-eastern point of the District, and due east from Beecher Bay. On the main islet or Great Race, as it is known amongst nautical men, stands Race Rocks light 120 feet high, a revolving flash light visible for twenty miles, the present keeper is Mr. Frederick Eastwood.

**Rocky Point and Williams' Head.** Two picturesque spots on the Eastern shore of Metchosin between Albert Head and Pedder Bay.

**Saugster's Plains.** Beautiful open plains twelve miles from Victoria. It is a grand picnicking spot possessing picturesque scenery.

This section of country, properly known as Metchosin, may be more accurately described as a rural settlement on Vancouver Island with an area of 24 square miles, distant from Victoria in a westerly direction about 15 miles, forming a part of the Provincial Electoral District of Esquimalt, and Dominion of Victoria. It is a most enjoyable section for picnicking, hunting, fishing, etc., large and small game are abundant in season and the roads are excellent, affording a most charming resort for riding and driving parties. In visiting the district the eastern road should be taken, while the return trip can be made more enjoyable by returning by the Happy Valley road. This latter road commences near the Metchosin church and terminates near Peat's hotel at Col-

wood. The various religious denominations hold religious services on the Sabbath. Ample educational facilities are afforded by a public school. The settlers, with help received from Victoria, have built a public hall in which parties and dances are held. The resources of the district are fruit, timber and dairy farming. The cattle and sheep runs are good. Hay and grain forms quite an important feature during the present season. The clearing up of new lands and the removal of timber are steadily going on and constantly increasing the area of the cultivatable lands. Pears, plums, apples, gooseberries and most small fruit do well. There is no open government land of value in the district. Farms can be purchased at reasonable rates. To men of means it is a section possessing many advantages, and for those seeking employment there is ample room for industrious farm hands, their services are in constant demand.

## NANOOSE BAY.

POSTMASTER, WILLIAM ROBERTS.

Nanoose Bay, situated 8 miles north of Nanaimo, and in Nanaimo Provincial Electoral District and Dominion of Vancouver, five miles from the Wellington Collieria. It is quite a large bay and affords good anchorage for vessels. It is a farming district and has a road running round the bay through Parksville to Alberni.

## NORTH SAANICH.

**Bazan Bay**, lying on the east shore of the Peninsula is a very open bay, but affords a splendid view of the numerous surrounding islands.

**Deep Cove**, a pretty little bay snugly situated on the north-westerly point of North Saanich.

**Shou Harbor**, situated on the north easterly part of the peninsula, has a fine wharf where the steamers call frequently to and from the Mainland and Island. A flour mill owned by Messrs. Brackman & Ker does an extensive business. (See Brackman & Kerr, Victoria.)

BRITISH COLUMBIA DIRECTORY.

**Union Bay.** A well sheltered and picturesque bay on the western side of the peninsula, forming an arm of the Saanich Inlet.

North Saanich is bounded on the North, East and West by water and is in the Dominion Electoral District of Vancouver and the Provincial Electoral District of Victoria. It is situated in a northerly direction from Victoria City, about 18 miles. The roads are excellent for driving or riding, being macadamized all the way from the city. The soil is a very fertile loam, the crops and fruit grown there are excellent. Farming is the principal industry. The climate is all that can be desired, it is neither too hot nor too cold. Means of communication is carried on both by steamer and wagon road. It contains a good public school and two churches, the Church of England and the Methodist Church. 250 is about the population at present.

POSTMASTER, AT PARKSVILLE NELSON PARKS, AND AT ERR-  
INGTON JOSEPH ALEXANDER McCARTER.

In the Dominion Electoral District of Vancouver and in the Provincial of  
Nanaimo, on Vancouver Island, about 24 miles north-west of Nanaimo. It  
contains one hotel and has communication by weekly steamer with Nanaimo and  
stage to Comox. There is a district school.

Little Qualicum, another settlement with a population of 10, is 8 miles  
further. The industry of both places is principally farming. At Little Qualicum  
a certain amount of fishing is done. They are both very pretty settlements and  
are growing daily in importance. Population 70.

## PENDER ISLAND.

POSTMASTER, WASHINGTON GRIMMER

**Brewing Harbor and Bedwell Bay**—Two splendid harbors are situated on the east and south-east side of Pender Island, in either of them a squadron could ride in safety.

**Hope Bay**—In which is a fine blue freestone quarry owned by Messrs. William Hesson & Sons.

**Lake Robertson**—A mountain lake about ten or twelve acres in extent, and very deep, situated about two hundred feet above the level of the sea and more than one-fourth mile from the west shore of the island.

**Otter Bay**—A deep land-locked bay, many vessels have anchored here, including H. M. S. Warspite.

**Washington Bay**—Where the Government wharf is situated, has fine, deep water, good anchorage and on the line of steambest trade between Victoria, the Mainland and Nanaimo.

The island is located on the C. P. N. route to the mainland on the right hand side going from Victoria to the Fraser River, about thirty five miles from Victoria and the same distance to Nanaimo, Vancouver and New Westminster. It is now being noted for good lambs for the early market, and excellent building stone, many saw logs being shipped to the mainland every year. The island contains between nine and ten thousand acres of land intersected with rocky ridges. The land is highly fertile in the valleys and fern slopes well adapted to mixed farming and stock raising. It is watered by living springs and has much good variable timber. All the land except a Government reserve, is alienated from the Crown. Nearly all the land owners reside on their property and keep clearing and cultivating, sowing seed such as mixed grasses, clover, etc. for their stock. A good bathing resort is needed as there is every opportunity for bathing, bathing and fishing, also riding and driving when the roads are finished lengthwise through the island, as they are located through very picturesque valleys. The openings, for men of money and courage, are good. A post office has been recently opened and other facilities will soon follow. It is in the Dominion Electoral District of Vancouver and Provincial of Island.

BRITISH COLUMBIA DIRECTORY

**Burgoyne Bay.** Lying north of Sansum Narrows, and west of the Island affords good anchorage for vessels. It is a narrow indentation terminating in a sandy head.

**Fulford Harbor.** Penetrates the south eastern end of the Island and at its entrance lies Russell Island, which must be passed on the south side to reach the head in safety.

**Ganges Harbor.** A large, sunniness harbor affording anchorage for ships of all vessels of every size and description, lying on the east shore of the Island. At its mouth lies Prevost Island.

**Long Harbor.** A little north of Ganges Harbor, and may be almost said to be a part of it, so far as it is situated. Two small islands are passed on the way to the head of it.

**Maxwell Lake.** A picturesque little lake situated on the top of a mountain, but contains no fish. A view of the surrounding country can be obtained therefrom.

**Sansum Narrows.** Connecting Satellite and Stewart Channel, lies between Cowichan District and Salt Spring Island. On account of the high reefs on either side the winds are generally unsteady, and as there is no depth of water it can only be navigated by skippers and steamers. Maple Bay, on its northern shore, in the Cowichan District, affords good anchorage.

**Satellite Channel.** Lying to the south of Salt Spring Island, it leads to Cowichan Harbor, Scotch Inlet and by Sansum Narrows into Stuart Channel. It is a mile in width and with no danger.

**Stuart Channel.** About two miles in breadth, lies between Cowichan District and the Island. It contains some good harbors on the Vancouver shore, and on the eastern side affords good anchorage.

**Tricomulie Channel.** Is formed by Thetis Cape and Salt Spring Island on the west side, and Gilsano, Prevost and Bender on the east side. It is separated from Stuart Channel by Salt Spring Island, and is a desirable and safe channel for steamers and coasting vessels. It enters into De La Narrows on the north.

**Vesuvius Bay.** Directly opposite Osborne Bay, on the west shore of the Island, has deep water, but is not recommended for anchorage.

Salt Spring Island, formerly called Admiral Island, is of considerable extent, being twenty-four miles in length and separating Stuart Channel from Tricomulie and Swanson Channels. It is in the Dominion Electoral District of Nanaimo and Provincial District of Ganges Harbor, on its western side and Fulford Harbor on the south east, are both good ports. It derived its name from the fact of several salt springs being found on this island. The southern portion of the island is composed of a lofty ridge of mountains over 2,000 feet high, rising from all sides. Its principal industry is farming. The mail is carried by stevedeek, which calls once a week. Mount Baynes is very remark-

able, being observed a long distance off, and is about 2,000 feet high, while its southern wall is perpendicular.

It is mostly a thickly wooded island, but now having a large extent cleared for habitation, and contains a population of about three hundred and seventy five. There are four schools and four churches and several general stores. The island generally is a very beautiful place. The scenery is grand and the harbors, bays, and mountain streams and lakes are extremely pretty, while the farming lands are very fertile.

SHAWNIGAN DIRECTORY

143

## SHAWNIGAN.

The most southern subdivision of the Provincial Electoral District of Cowichan and in the Dominion of Vancouver.

**Mill Bay and Mill Creek.** The first is a snug harbor at the extreme south eastern corner of Shawnigan, and Mill Creek is a picturesque creek emptying into Mill Bay.

**Saunich Inlet.** An extensive arm of salt water, lying to the east and south east of Shawnigan.

**Satellite Channel.** A beautiful inland water, lying between Salt Spring Island and the northern end of Saunich, and north east end of Shawnigan District.

The lake bearing the name at the head of this article is a lovely lake of transparent water, nestled amongst the beautiful hills so characteristic of Vancouver Island. The lake proper is about 10 miles long and 2 miles wide. Mr. Geo. Keong and his estimable wife, conduct the Shawnigan Lake Hotel, a view of which appears on the page facing this article. The table is excellent and the house is scrupulously clean. A trip over the Esquimalt & Nanaimo Railway, and a stop-over at Shawnigan is one of the fashionable and most pleasurable ways of spending a holiday that is more thoroughly enjoyed by Victorians and others from various parts of the province.

There is excellent fishing at the lake and Mr. Keong has ample accommodation in the way of row boats, etc., suitable for pleasure and fishing parties. The industry of this section of Shawnigan is the large sawmills of the Shawnigan Lake Lumber Co., which has a very large capacity, employing 50 to 75 men. The lumber is sent by rail to Victoria, where it finds a ready market. The firm composing the Company are three well known British Columbians, comprising Messrs. William Munro, E. Morrison, and F. Elford. (See Cobble Hill.)

## SOOKE.

SOOKE P. M., JOHN MUIR, EAST SOOKE P. M., JAS. KEILL, OTTER POINT P. M., EDWARD GORDON.

Sooke, distant 23 miles from Victoria, is a thriving settlement, with a fine harbor called Sooke Harbor, is the most westerly settled agricultural section on the Island. Beautiful scenery on all sides with lovely drives, the road being macadamized all the way from Victoria. It can be reached either by land or water, distance by water about 22 miles. The soil is of a clayey loam and very fertile, all kinds of cereals, fruits and vegetables thrive well. In time it will become a favorite watering place, the climate being milder than Victoria, and also very healthy. Messrs. Muir Bros., carry on a large lumber business. It is known by the name of the "Woodside Mill." Being a favorite hunting ground and abounding in deer, grouse, pheasants and quail, it is in the summer months, or shooting season very lively, a large number of deer being killed every season by the hardy hunters. Fish are caught both in fresh and salt water, of different species. In summer the residents enjoy a fine cool breeze and in winter it is very mild. A very snug little farming district, with every advantage, and a good harbor it will become popular.

There are two schools for educational purposes and religious service is held monthly in the school house. A cooperage was established in 1868 and is now doing a thriving business, run by James Keill and turns out very superior barrels.

## SOUTH SAANICH DIRECTORY.

147

The section of country known by the name at the heading of this article is one of the subdivisions of Cowichan District in the Dominion Electoral District of Vancouver and Provincial of Cowichan. There is daily communication with Victoria and Nanaimo by train over the E. & N. R. R.

There are two Churches of England and one Methodist and two public schools, one store. Population 100. It is purely a farming section, the drives through this rural part of Vancouver Island is extremely charming. The distance from Victoria is about forty miles.

BRITISH COLUMBIA DIRECTORY.

- Cordova Bay.** A large open bay lying to the east of Lake and the Saanich Districts. On the shores of this bay are fine picnic grounds. It also affords a beautiful view across the water.
- Cordova Channel.** Lying to the east of South Saanich, separating James Island from the peninsula, and connecting Bazan Bay with Cordova Bay.
- Cowichan Head.** A sandy point projecting into Cordova Bay and on the east side of South Saanich.
- Eik Lake.** A large and beautiful lake connected with Beaver Lake. (See Beaver Lake.)
- Knocken Hill.** Situated on the boundary line between Lake District and Victoria.
- Mulby Lake.** A pretty little lake on the west side of Lake District.
- McKenzie Lake.** Situated in the south part of the Highland District.
- Mount Newton.** At the foot of which is situated the well known hotel of the same name, which affords ample accommodation at this beautiful resort. It is thirteen miles from Victoria and on the West Saanich Road.
- Prospect Lake.** In the Lake District, derives its name from gold found on its shores. It affords fine sport for the sportsman, teeming with lovely salmon trout.
- Royal Dick.** Situated at the junction of the East and West Saanich Roads, it affords a stopping place for hunters and visitors.
- Saanich Arm.** A large expanse of water lying to the west of the Saanich Peninsula, and extending into the land under different names. The water in the centre is very deep, and affords good anchorage for vessels. It is entered by the Satellite Channel on the north.

The Saanich Peninsula is formed by Lake, North and South Saanich, and with other suburban districts forms part of the Dominion Electoral Division of Victoria District and Provincial of Saanich. The soil is very fertile, and is well adapted for fruits of all descriptions, such as apples, peaches, plums, new berries, strawberries, and numerous others. Two splendid roads traverse the whole peninsula from north to south. One is called the East Saanich Road and the other the West Saanich Road. It is a very picturesque spot covered with small lakes teeming with beautiful fish and also affording great sport for the sportsman. The shore abounds in small bays and indentations. There perhaps is no place that affords more beautiful scenery than this coast and the waters studded with islands. The hotels, of which there are several throughout the District, provide ample accommodation for all visitors, and are near the lakes and hunting grounds. A large agricultural hall was built and an association formed several years ago and a show is held annually, which attracts a large number of visitors. The exhibits are very fine, second to none. The educational facilities are well looked after, there being several neat and commodious public schools. Religious services are also held regularly by the differ-

## SOUTH SAANICH DIRECTORY.

149

ent denominations having their Sunday school classes in the afternoon. Cattle, owing to the mild climate, are easily raised. Visitors and tourists visiting Victoria would enjoy greatly the beautiful drives and lovely scenery in Saanich. The Saanich, Victoria and New Westminster Railway will, when built, traverse the entire length of this excellent peninsula. The building of the road is now only a question of a very short time, as at present it is a necessity to both Victoria and New Westminster, and especially to the District of Saanich. In fact, it is a Provincial necessity and should receive every aid and encouragement.

(Including Beaver Lake, Elk Lake, Royal Oak, Prairie Tavern, Mount New-ton Hotel, Carey Road, Prospect Lake, Cordova Bay.)

BRITISH COLUMBIA DIRECTORY

**Cortes Island.** Lying to the south-east of Valdes, separated from it by Sutil Channel.

**Drew Harbor.** A fine harbor on the east side of Valdes, well sheltered from all winds and affords good anchorage. Rebecca Spit, about one and a half miles long and two or three hundred yards wide, shelters it from Sutil Channel. Here is also a small Indian reserve, but uninhabited.

**Discovery Passage.** The channel between Valdes and Vancouver Islands. This is the route taken by all vessels from B. C. or Puget Sound Ports when bound for the north.

**Gowlland Harbor.** A splendid sheet of water three miles long and about a mile wide, dotted with several small islets. It is sheltered from Discovery Pass by Gowlland Island, lying at its mouth and about a mile long and a quarter of a mile wide, timbered and rocky. On the south of this island is a passage which will accommodate quite a fleet of ships. The post office is located here. Gowlland Harbor, on the south-west of Valdes, lies half way between Cape Mudge and Seymour Narrows.

**Hernando Island.** Lying to the south of Cortes Island, separated from it by Baker Passage.

**Hyacinth Bay.** About two miles and a half above Drew Harbor. A valley runs west from the harbor to Seymour Narrows. A small stream flows into the Bay from Cleason Lake, a beautiful sheet of water nestling at the foot of Mount McLennan, about three miles long and full of the speckled beauties which never yet have been tempted by the vitriol head.

**Quatheski Cove.** Between Cape Mudge and Gowlland Harbor. This is the stopping place generally for steamers calling with passengers and supplies for the island. Mr. Robert Hall keeps a store here. This cove has every facility for building a good wharf.

**Reed Island.** Lying to the east of Valdes Island, has several pretty farms and a store.

Valdes Island, separated from Vancouver Island by Discovery Passage, is about thirty miles long, running nearly north and south. It is bounded on the south by the Gulf of Georgia, on the east by the Sutil Channel, on the north-east by Reed Island and the Mainland, on the north-west by Thurlow Island, and on the west by Vancouver Island, forming at its most south-westerly point the famous Seymour Narrows, which is a grand sight viewed from the rocks at Spring tide, and woe be unto the small boat which gets into its mighty grip, though for about ten minutes at the turn of the tide its waters are as smooth as a mill pond. North of these narrows there is very little farming land. Swamps have been reported to exist. The settlement extends from Cape Mudge to Hyacinth Bay, a distance of about twelve miles and three miles in breadth. The land that is still vacant is covered with timber and has several swamps here and there and is very easily cleared, the soil is a beautiful

brown loam, well adapted for the raising of good crops. The climate is very mild, with very little snow or frost. The waters abound in fish and the woods in game. Deer and grouse are plentiful, but there are no bears or panthers and wolves are very scarce. The cat and hogs roam at large on the fine pasture lands and become fat and good for market. The resources of the Island are stockraising and vegetables. Taking everything into consideration this is the best spot on the globe for the poor man to build his home. Valdes Island is in Sayward District Provincial and Dominion Electoral of New Westminster. Population, about 30.

**VICTORIA DISTRICT.**

**Including Cedar Hill, Oak Bay, Mount Tolmie, Cudboro Bay, Gordon Head, Burnside Road, The Gorge.**

Victoria District covers a large area of land and is bounded on the east and south by Haro Straits, on the west by Victoria Arm and on the north by Lake District. It possesses the most magnificent scenery, and can be easily viewed by climbing to the top of the adjacent hills. The drives to the different parts are excellent and the macadamized roads lend enchantment to the drive. The soil is very fertile, and the climate mild.

**Cudboro Bay.**—Presents a beautiful view, all along its shores are nestled neat little farms and wooded groves. For many years it has been a very favorite resort for pleasure seekers. Excellent fruit is raised and ripened and the crops bear well. The beach shaded by the tall trees and shrubs make it a most desirable bathing place. The vessels passing too

BRITISH COLUMBIA DIRECTORY.

and from the mainland come very near this lovely harbor, there being an excellent wharf at which steamers land.

**Cedar Hill.**—(Mount Douglas) is entirely a farming district and like all parts of Victoria District enchants visitors with its scenery. The climb to the top of Cedar Hill, which is not very laborious, presents a most pleasing sight to the gaze, showing wide expanses of blue sky and seas and woody groves and hidden lakes. It is about five miles distant from Victoria and a fine road leads out to it.

**Gordon Head.**—Situated on the east coast of Victoria District, is a point projecting into the sea (Haro and Rosario Straits). Like all the soil of Victoria suburbs, it is very fertile and several farmers are doing well. A lovely road leads from the city out to Gordon Head.

**Oak Bay.** Is so called from the trees of the same name surrounding its shore. It is a very picturesque little spot with a broad expanse of water in the front, and the homesteads which are numerous, having a back ground of tall green waving trees. It is a most popular resort and is easily reached, as an extension of the Electric Tramway runs right into the head of the bay.

**Mount Tolmie.** Which has been turned into a beautiful park, possesses an excellent drive of a few miles from the city. It is only about a mile from the Electric Tramway line and it is on the proposed extension line. The property which is very valuable is being fast taken up and many fine homesteads are building. It is utterly impossible to describe all the beauty and the benefits to be derived from these several charming suburbs with which Victoria City is so beautifully surrounded.

POSTMISTRESS, MISS K. CARSTAIRS

IN THE DOMINION ELECTORAL DISTRICT OF VANCOUVER, AND PROVINCIAL DISTRICT OF NANAIMO.

Wellington is situated at the northern extremity of the Esquimalt & Nanaimo Railway, and is distant six miles from Nanaimo. It is entirely a coal mining district and a large number of men are employed in the mines. The country round is very rough, but well watered, there being several lakes within the radius of a few miles. The mines are owned by Messrs. R. Dunsmuir & Sons. There are at present three pits in operation, while two more new ones are being opened up. They employ about 800 hands. The population is extremely cosmopolitan, having representatives from every quarter of the globe. During the past year a number of lots have been purchased and a new townsite built up. It contains four churches, one hotel, numerous boarding houses and two stores. The population is continually changing, so that a complete directory to-day may be very faulty in a week's time.

**WESTHOLME.**

POSTMASTER, ROBERT E. BARKLEY

Westholme, also known as Hills Crossing, is situated in the sub-district of Chemainus on the Esquimalt & Nanaimo Railway. There are several excellent farms in the vicinity of rich alluvial soil, with much fine timber. A great part however, is the Indian reserve. Westholme is a flag station and passengers getting on at this point can enjoy good sport fishing in Bonville Creek.

**AGASSIZ.**

POSTMASTER, L. A. AGASSIZ.

IN THE DOMINION AND PROVINCIAL FEDERAL DISTRICT OF NEW WESTMINSTER

It is situated on the right bank of the Fraser River, having a frontage of twelve miles. The C. P. R. runs through the valley and has a station, express and telegraph office. The station being 72 miles from Vancouver. The population is about 125. There are three hotels kept by Mr. R. Probert and Mrs. D. McRae, and the St. Alex Hotel, by Mr. John C. Brown, at the celebrated Harrison Hot Springs, a distance of five miles from the station by stage. It is a beautiful, level valley and almost entirely devoted to agriculture. The Dominion Government Experimental Farm for British Columbia is situated here, and under the able management of Prof. Sharpe. Fish and game abound on the lake and the scenery grand and picturesque, which makes it a popular resort for tourists and others. There is one school, but as yet no church.

## AINSWORTH.

The headwaters of the Warm Springs Mining district, is situated on the  
 shore of Kootenay Lake about 50 miles east of Nelson. It is a base of supply  
 for the mines in the Warm Spring and Lardian districts. Steamer communi-  
 cation is regularly carried on between Ainsworth, Nelson, Bonanza Ferry, Idaho,  
 and intermediate points. Population about 500.

Telephone communication is now made with Nelson over the Kootenay  
 Lake Telephone line.

ALDERGROVE DIRECTORY.

169

## ALDERGROVE.

POSTMASTER, GILBERT LAWRENCE.

This settlement is partly in Langley municipality and partly outside of any municipality, and lies between the latter place and the American Boundary, and is 22 miles east of New Westminster. There are splendid roads through the settlement, the chief one being the Yale and New Westminster Waggon Road. A road known as the Boundary Line Road runs north and south through the settlement, connecting Langley with Lynden and Whistler on the American side. The communication is a mail service, mail arriving twice a week, Wednesday and Saturday, and a telegraph service. There is only one store in the district, which is kept by R. Shearson.

The principal industry is farming, as the soils well adapted for it, as it is a clay loam, which requires very little drainage. There is an abundant supply of fresh spring water all the year round. Highland alder, birch and cherry, with an occasional cedar, and fir are the principal timbers, it is easily cleared, as compared with most timber lands. Farmers are making a specialty of fruit and hops. This settlement has only been settled during the last seven years, and the growth and present appearance of the place speaks well for the industry and intelligence of the people. Population about 700.

## ASHCROFT.

POSTMASTER WILLIAM T. N. BAILEY

Ashcroft, in the electoral district of Yale, is one of the most important stations on the Pacific Division of the Canadian Pacific railway and is located on the south bank of the Thompson River near its junction with the Bonaparte. It is 206 miles from Vancouver and 2098 miles from Montreal. Its great importance as a shipping point lies in the fact that it is the trading post for the Cariboo, Clinton and Lillooet districts, in the northern interior of the province, and the point where all travel to these regions leaves the railroad. Large quantities of freight are taken to these districts in wagons drawn by mules and horses. The B. C. Express Co., carrying Her Majesty's mails, have their headquarters in the town and its stages leave every Monday morning for Barkerville, and Wednesday, Monday and Friday mornings for Clinton, where connections are made with the Lillooet and Dog Creek stages. The various religious denominations hold religious services on the Sabbath in the Town Hall. The Church of England people have recently erected a snug little church. A good public school affords ample educational facilities and a number of children from other towns are availing themselves of the advantages offered. Cattle and sheep find good feed in the hills. All kinds of fruit do well. The climate is mild and dry and extremely healthy. There is a good opening for a first class hotel, and has a population of 2000.

**BARKERVILLE.**

POSTMASTER, JAMES STONE, Money Order Office and Telegraph Office.

Barkerville, in the Dominion and Provincial Electoral District of Cariboo, situated on Williams Creek, at the termination of the Cariboo wagon road, is reached by the British Columbia Express Company's stages from Ashcroft, distance, 285 miles. This creek has supplied many millions of the dollars taken out of the Cariboo district. The shallow and easily worked portion being nearly exhausted, hydraulic pipes now occupy the attention of the placer miners; washing away banks from 40 to 80 feet deep by the help of a great pressure of water. Many quartz reefs are to be seen cropping out in and about

**BLAINE,**

Including White Rock.

P. O. BLAINE, WASH

Just where the International boundary line strikes Semanlo Bay a town site has been located on both sides of the line. The growth on the American side has been really wonderful. A year ago there was nothing. Now there is a town of over 2,000 inhabitants. Although a great many lots have been sold on the Canadian side of the line, very few buildings have been erected as yet. Messrs. Helfron and Murphy have a large hotel, The S. Leonard, which is right at the boundary.

At White Rock, one and a half miles from the iron post which marks the boundary, the Royal City Planning Mills have built a wharf, hotel and store. They have also opened a lumber yard and intend erecting a sawmill. Lots sell from \$150 to \$200. The shipping facilities are much better here than at Blaine, as there is deep water close to shore, whereas at Blaine wharf approaches are over a mile in length.

vast numbers of natural meadows. Only those nearest to the wagon road are now occupied, and on which large quantities of first class hay are put up, at an average cost of \$2 per ton. There is an extensive range surrounding the valley, on which large herds of cattle and horses thrive. The chief industries are dairying, stock raising, and winter feeding of steers for the spring markets. There is a very large area of Government land, including many fine natural meadows, open for settlement. This is a chance for industrious families of small means to go into dairy, and men of capital can purchase improved property at low prices, from which large returns could be made by wise use of money. The valley is crossed about its centre by the Cariboo Main Trunk Wagon Road, on which a weekly mail is carried, and over which many large freight trains pass; this makes a market for any surplus hay and grain the settlers wish to sell. All the various routes of the proposed Cariboo railway converge in this valley, and run up it. The proposed new short road to the great hydraulic gold fields of Horseshy and Forks, of Queenelle, diverges in this valley from Cariboo Trunk road. The dairying and husbandry are unexcelled in the Province.

**CACHE CREEK.**

(See Fraser's Valley)

Cache Creek Valley, in the Electoral District of Yale, is situated in the Cariboo. Wagon Road, six miles from Ashcroft. Villages ranging from Ashcroft to Barkerville pass through the centre of the valley. It is almost entirely devoted to agriculture, some of the best farms in British Columbia being found here. Besides timber, large quantities of horses and cattle are raised. The cattle are driven off to the hills and valleys away from the main trading, and this district furnishes a great part of the meat for the Vancouver and Vancouver markets. The Cache Creek Valley is settled as far as 120 miles from the Cariboo. Wagon Road, and extends all the way to the coast. The climate throughout this section of the country is dry, and not in general known as well as it is, or remarkably well. In winter the thermometer often registers 40° below zero, but the war is so clear and bright, that one rarely feels the cold.

**CASSIAR.**

Including McDame Creek and Laketon.

The District of Cassiar is situated in the north western portion of the Province. It is the sparsely settled district, there being only a few farms along the Stucken river, which supply the miners with vegetables. The features of the country are magnificent. The rivers and lakes are numerous and teem with fish, while game of all kinds abound.

McDame Post or Sylvester Landing is on the left bank of the Dease River, just below the junction of McDame Creek with Dease River. The Hudson Bay Company has a trading post here.

Laketon Post is on the left bank of Laketon River, opposite the confluence of the Dease and Laketon Rivers. Here also is a Hudson Bay Company's post.

Black River Post, on the left bank of the Black River, a little below the confluence of the west and south branches, about 100 miles from McDame Post.

Centerville, or McDame Town, is about 14 miles north west of Sylvester's Landing, on the left bank of McDame Creek. Here is situated the Court House, Calbraith, Grant & Cook's general store for the supply of the miners,

### BRITISH COLUMBIA DIKE FORN

with Edward Metcalf store keeper and collector of revenue for the Government of British Columbia. The principal mining on McDame Creek extends about a mile above the town, and two miles below, while about four miles above town is Holloway's Bar on the right bank of McDame Creek.

Estimates of gold taken out of these sections during 1889 was \$28,310. The Chinese here have a small farm, and raised in the summer of 1890 about seven or eight tons of pot toes, besides other vegetables. The population consists of 18 whites, 2 colored, 1 Mexican, and 41 Chinese. Communication in the summer once a week by H. B. Co.'s boat from Porters Landing, east of Denso Lake. In the winter there is only very occasional communication.

## CHILCOTEN.

(See Hancock.)

Chilcoten, in the Esquimalt District, is a new open country. At present stock raising is the only industry, as the means of communication are very bad. Game is wonderfully plentiful, and occasional hunting parties go from the coast here for the sake of sport. The climate is very dry but healthy.

**Hope Slough.** Extends from the north eastern corner of the settlement in a direct westerly line, entering the Fraser River after traversing the settlement for a distance of 12 miles. It has two tributaries, Camp Slough entering from the northeast, and Elk Creek from the south west.

**Lucka Creek.** And other tributary streams flow through the centre of the settlement, in a northerly direction, towards the Fraser.

**Sumas Lake.** Lying to the south west of the municipality, contains about 16 square miles the outlet being the Sumas River, which flows into the Fraser.

The Municipality of Chilliwack, in the Provincial and Dominion Electoral District of New Westminster, contains within its bounds township 26, a part of 23, 22 and 27. It is bordered on the north, for a distance of 15 miles, by the Fraser River, on the south west, by Sumas Lake and River. It is a fertile valley, from 10 to 15 miles wide, surrounded by high mountains. The soil is a clay loam and very rich, the crops raised are unexcelled. This section is one of the most productive farming districts in the Province, and all kinds of fruits, vegetables and cereals ripen to perfection. It is noted for its

excellent butter, which has a clean, mellow flavor, and is made in large quantities. There is a fine dairy tract east to west. The post office is centrally located, and has two sub-offices, one situated at Sarny, distant four miles, the other at Simons, distant six miles, daily delivering mail and back for mass. The educational facilities are good, there being six schools, with efficient teachers, there is also four millinery, with four three-roomed stores, three blacksmith shops, two harness shops, a grocery store and a telegraph office. A fine town has been developed by the Chilliwack Railway Company, about half a mile from the present town, and at the rate of making operations are now going, the two towns will shortly be connected. A new tramway has been started, and, judging from the amount of fruit grown in this valley, will prove a very profitable undertaking. The saw mills are running to their fullest extent, and a third one is planned for 1912, which will greatly add to the bright prospects of the settlement. The new railway mail and truck delivery has been started, in fact the whole place seems to be entering into a new era of prosperity, and benefited by Chilliwack which ranks among the leading towns of the Province of British Columbia, situated as it is in the centre of one of the most agricultural and fruit growing districts in the Dominion.

The race of humans are highly civilized, living in the houses and possessing great comforts. Their principal industry or occupation is logging, many of them are employed in the saw mill at Papeum by Messrs. Knight and other saw mills. Papeum, 10 miles distant, is mainly situated at the foot of Papeum Mountain. These enterprising mill owners have leased a large extent of wood land, by which they are enabled to transport their logs to the mill, by which they avoid the expense of hauling them to the mill. This self-sufficiency of timber is not only by water power, the water taken from a picturesque little lake about three-quarters of a mile from the mill.

The Agricultural Association of Chilliwack hold an annual fair, which is considered to be the largest in the Province.

The excellent water supply is within easy reach of Chilliwack, and so are the famous Harrison Hot Springs. Salmon and sturgeon are plentiful in the Fraser, and other of the many streams. A heavy branch of Chilliwack railway has been constructed, which is a great benefit to the community, the tourist, sportsman, and the pleasure-seeking pleasure and revenue to the business and professional classes. Chilliwack has numerous resorts for the beach in the Province.

# CLAYTON.

Clayton, (C. W. C. way) formerly called, the Serpentine Flats, is a part of Surrey municipality, near the base of Serpentine River. It embraces some of the richest land in Surrey. The New Westminster and Yale Wagon Road runs through the centre of the district, which is purely agricultural.

**CLINTON.**

In Dominion Electoral District of Carleton and Provincial of Alibonot. Here the Courts of Assize are held twice a year and the land business of the District is carried on. It is situated in the Upper Valley, on the Cariboo wagon road, 32 miles distant from Ashcroft. There are many interesting points in the neighborhood, but Kelly's Lake, well known for its trout, is the scene of the chief. The town looks very picturesque in appearance, and the Government buildings at the lower end, situate on a plateau, the grounds surrounding them, which are well kept by Mr. Smead, the Government agent. M. F. W. Foster has a large store here which is not surpassed anywhere in the Province outside of Vancouver. The British Columbia Express Company carry mails and passengers to this place three times a week. There are two very good hotels the proprietors of which are Marshall & Smith and Mr. John P. Keel. M. E. Bell has a general store.

POSTMASTER, R. B. KELLY

Along the line of the beautiful Canadian Pacific Railway, which joins New Westminster, Port Moody and Vancouver, at a bend in the road lies the little suburban settlement of Westminster Junction, a very thriving and popular resort, added to which are the attractions of Mr. R. B. Kelly's excellent hotel. This thriving country village is daily growing in importance. The excellent situation of this resort will tend to increase the popularity of the place.

## DELTA MUNICIPALITY.

POSTMASTER AT LADNERS, T. N. HIBBEN

Population 2,000

This happy and fertile agricultural and pastoral section of the District of New Westminster, occupies that portion of the South Arm of the Fraser River that extends from the Municipality of Surrey, on the east, to the Gulf of Georgia, on the west, embracing within its borders some of the most land on the Pacific Coast; the section being noted for the remarkable fertility of its soil. The settlement comprises over 40,000 acres of rich delta land of black loam with a clay bottom, yielding immense crops of timothy hay, oats, barley, wheat, mangold wurtzel, turnips, carrots, potatoes and fruit. Over 25 tons of potatoes have been raised on an acre of Delta land. There are eight salmon canning establishments situated within the Municipality, viz: Delta Canning Co., Harlock Packing Co., Wellington Packing Co., British America Packing Co., Canoe Pass Canning Co., E. A. Wadhams Cannery, Fairlay, Durham & Brodie's Cannery, and the British Columbia Packing Co.

## ELGIN.

New South Wales, B.C.

POSTMASTER: JOSEPH NICHOLSON, JR.

A country place, 10 miles south of Sarny, in the Electoral District of N. Westminister, New South Wales. It lies on the wagon road to Blaine, from which it is distant five or six miles, and it is distant from New Westminister 13 miles. Stages run daily from Blaine to New Westminister, calling at Elgin on the way. There is a good hotel and store here, owned by Samuel Clay of Vic.

torix. There is some remarkably fine farming land on this flat, but it requires dyking, and it is very little above ordinary high tide mark. A fine dyke has just been constructed across Mud Bay from Blackie's Spit to the high level on the Delta, which will reclaim a large tract of land hitherto worthless.

## ENDERBY.

(See Spallumcheen and Vernon.)

POSTMASTER, OLIVER HARVEY.

IN THE DOMINION ELECTORAL DISTRICT OF YALE KOOTENAY, AND PROV. OF YALE.

The centre of trade for the Spallumcheen valley and the East Salmon river district, is situated on the bend of the Shuswap or Spallumcheen river, a distance of eleven miles from Mara lake and twenty six miles from Sicamous. Being at the head of navigation, it has been until the present time, the natural outlet for the trade of the Okanagan country in general. The townsite is beautifully located on a level flat, backed by rolling park like hills, and is surrounded by some of the finest wheat producing land in the Province. The British Columbia Milling Company's flour mill, the only roller mill in the Interior, and having a capacity of over 100 barrels per day, is situated on the bank of the river, and employs a large number of hands. The flour produced here is noted throughout the Province for its superior quality. During the entire period of the construction of the S. & O. Railway, which is now almost entirely completed, the head offices of the railway company have been located in the town, which has been the centre of operations during construction. The station and freight sheds are already completed, and the line of the railway traverses the townsite. A steamer, owned by the Milling Company plies three times per week to Sicamous the junction of the C. P. R. and S. & O., carrying freight and passengers. The town already boasts a school, and a Presbyterian and Episcopal church, a church school, and is growing steadily. A pork packing factory has been started, and brick making purposes, because of its leading industries in the near future.

**GUICHON.**

POSTMASTER, THOMPSON SHERMAN

In the District and Provincial Electoral District of New Westminster, is distant from the city of New Westminster about thirteen miles and being only one mile from Ladner's Landing, the two places are rapidly growing together. It has one hotel, which is well kept by Messrs Sherman and Hinchcliffe. In the immediate neighborhood is some of the richest agricultural land on the Pacific Coast, the crops grown being simply enormous. The soil is a clay loam sediment in places covered with a black vegetable deposit. Farming and salmon fishing and canning are the principal industries. There is daily communication by steamer with Victoria and New Westminster. The population is 300, having one church (Roman Catholic) and one school. Game is very abundant, particularly ducks and geese, and every autumn numbers of sportsmen avail themselves of the opportunity to fill their game bags with comparatively little trouble and large quantities are shot for market. It is a capital place for spending a holiday, the rooms at the Port Guichon are clean and the meals are excellent.

## HALL'S PRAIRIE.

POSTMASTER, DAVID W BROWN.

A subdivision of Surrey Municipality, eighteen miles from New Westminster, just north of the international boundary, and is in the Dominion and Provincial Electoral District of New Westminster. Farming is the principal industry carried on, and the soil is very high and dry. The Fairhaven & Southern Railway Company intend to make it a station, as, so far, all communication is carried by stage, which runs from New Westminster. There is one public school, but it has no church; the Presbyterians have services once every two weeks in the schoolhouse. It has two general stores, carried on by Wm Brown and H. Thrift, and also has a fine hotel, of which Mr. J. L. Murphy is proprietor.

JAMES WARDLE POSTMASTER.

In the Dominion Electoral District of Yale Kootenay and in the Provincial and Dominion Electoral District of Yale. It has two hotels, two general stores, two churches of England, one Roman Catholic and one school. The principal industry of the place is farming, mining and sporting. It has communication with both steamer and railway. It is one of the most beautiful and delightful spots on the Fraser River, it is noted for its extreme beauty and for its excellent trout fishing. It lies between high mountains and is fringed by the Fraser River, and for a health resort it cannot be beaten.

Hope is also the head of navigation and a distributing point to the Small-kameen, Okanogan and Rock Creek countries and to the famed Ashcroft hunting grounds.

There are considerable mines in the vicinity viz. The Eureka Silver Mine, the Hope Mine and the Shunah, which will all be worked when capital is available.

**ILLECILLEWAET.**

POSTMASTER, ALLEN C. McARTHUR.

IN THE DOMINION, FEDERAL DISTRICT OF VANCOUVER AND PROVINCIAL OF KOOTENAY.

Illecillewaet is on the main line of the Canadian Pacific Railway, and is one of the principal stations on the line and is 107 miles from Vancouver. It has a post office, express office and a regular billing station.

There are a large number of excellent silver and lead claims within two miles of the station. The development work now being done will, it is expected, prove beyond a doubt that there are several mines in this part of Kootenay District.

It is the starting point for Fish Creek, where there are nine or more claims all pronounced by mining men to be the best heating surface prospects in Kootenay. It has a population of 100 and contains two hotels run by S. Anderson and T. Richardson. The altitude of Illecillewaet is 3,503 feet.

## JOHNSON'S LANDING.

See New Westm. Island

This station, C P R, 50 miles from Vancouver. It is entirely a farm-  
 ing settlement. New Westm. Island, in the Fraser River, is situated 20 miles from  
 the river, but is so fertile, like all such spots, as to be a very fertile.

**KEITHLY CREEK.**

Including Harvey and Snow-Shoe Creek.

POSTMASTER, G. A. VEITH

Keithly Creek is situated about 18 miles beyond the Quiesnelle Forks, and includes a mining town, in the Electoral District of Carleton Place. Communication is carried on by road twice a month. It is reached by the Carleton wagon road which leads past the Quiesnelle Forks, up the northern arm of the Quiesnelle River to the Creek. The Victoria Hydraulic Mining Company, located in the vicinity and employ on an average, 60 men, both white and Chinese, constructing ditches and other works in preparation to opening up the mine. The South Fork Hydraulic Co. Ltd., is also located near this place, they employ about 40 men, white and Chinese on the work, preparatory to the opening up of their mine.

## KETTLE RIVER.

(See Grand Prairie.)

The Kettle River, which follows a general eastern course along the boundary line, is now fairly well settled. All kinds of fruit, vegetables and grain can be grown in abundance on the rich sandy loam composing the river banks, while the mountain sides are covered with luxuriant bunch grass. Game of all kinds abounds, and the Kettle river has long been famed as a trout stream. At the lower end of Kettle river, known as Grand Prairie, there is a thriving settlement, the farms and gardens being a credit to the energy and industry of the owners. Just within the international boundary line, Kettle River passes through a narrow gorge, and falls of over 200 feet are formed. The land in the vicinity of these falls has been purchased with a view to utilize this magnificent water power for milling purposes. The surrounding country being well timbered, a thriving industry is likely to result in the near future.

**KOOTENAY DISTRICT.**

(See Index for various towns.)

This district embraces the whole Columbia Basin in British Columbia. The geography is puzzling in the extreme. The Kootenay River rises (latitude 51° 15' N.) in the Rocky Mountains, and flows south into Montana and Idaho, passing the sources of the Columbia, its parent stream. The Columbia flows north (from lat. 50° 12'), forming a great bend beyond the Canadian Pacific Railway, and returning southward to a point 15 miles north of the International boundary, there it receives the Kootenay tributary, upon its return from the

228

BRITISH COLUMBIA DIRECTORY.

United States. There is thus an actual island six hundred miles round embraced in the great bends of the two rivers, and comprising the whole Selkirk and Purcell Ranges. East Kootenay consists of the upper Kootenay and Columbia valleys between the Rocky and Selkirk Ranges. Great bend is the sweep of the Columbia, north of the Canadian Pacific Railway, round the northern end of the Selkirks. West Kootenay is the Columbia Valley from the Canadian Pacific to the International Boundary, and the Kootenay Valley from the return of the river from the United States to its junction into the Columbia. Kootenay Lake is comprised in this western valley of the Kootenay.

East Kootenay, the district lying between the Rocky Selkirk systems, on some 2,500 feet above the sea, and its valleys of the Upper Kootenay and Upper Columbia, enjoy a fine dry climate, and are well suited for cattle raising. Open forests, fine timber, and benches covered with bunch grass, are the leading characteristics, and the climate and scenery make the district especially desirable for those making new homes in the west. At the principal town Golden, on the Canadian Pacific, there is a smelting plant, for treatment of the ores of neighbourhood silver mines in Mount Stephen and the Spallumcheen Valley, and these are expected to sustain a considerable population. Donald is situated at C. P. R. crossing of the Upper Columbia and has a divisional terminus. A wide canal has recently been constructed by the Kootenay Valley's Company, connecting the Kootenay River with the sources of the Columbia, and here is situated the town site of Graham.

Further down the Kootenay, and at the mouth of Wild Horse Creek, famous for the gold excitement of 1863, 1864 and 1865, when a thousand men were getting from one to three oz. a day to the hand, is Fort Steele and Galbraith's Ferry. This is the point of departure by the Meyer trail for West Kootenay. In Crow's Nest Pass, at the head of Elk River, there are fifteen seams of coal in one section, and some of them are very large.

Great Bend, this region is an undeveloped mineral country of great importance, as shown by operations on the western portion round McCullough Creek. It is yet difficult of access and little known.

West Kootenay consists of two distinct regions. The first is the Columbia Valley territory to Revelstoke on the C. P. R., which is also at the outlet of the Illecillewaet Valley. Silver is the principal product, for besides the mines in Great Bend country, heavy shipments may soon be expected from Illecillewaet, where there is a flourishing camp. Upon the Columbia are the beautiful Arrow Lakes, a body of water lying between the Selkirk and Gold Ranges.

145 miles south of Revelstoke and 15 miles north of the Boundary, is the outlet of Kootenay River. This river, after passing round its great bend through Montana and Idaho, re-enters British Columbia between the Selkirk and Purcell Ranges, and then falls into Kootenay Lake, which runs northward some 65 miles. Half way down its course is the branch, called the West Arm, whence the Lower Kootenay descends by a series of five cataracts to the Columbia at Sproat's Landing. Upon Kootenay Lake are the Warm Springs and Hendry's

mining camps. The population of the region is about 80,000. At the Hendry's Bend, there are about 80 feet of talists. The King Belt of gold belt on the Canadian Pacific is already about above mentioned of what will be The Spokane, Columbia, and the boundary on the Kootenay Lake. The sea level of the Lower Kootenay are well calculated. Access to the landing, and distance by train charges. Access from for \$3.00 to \$5.00, 50 cent profitable investment.

mining camps, and at the former is the town of Ainsworth, with, at this time, a population of about 50. The camp has several hundred silver claims, most of which show remarkably fine prospects, and some are of exceptional promise. At the Hendryx camp is the Bluebell Mine, where two contiguous ledges of about 80 feet each are being prospected at an immense outlay, by Eastern capitalists. The Nelson Camp, in the West Arm, includes the magnificent Silver King Belt of silver claims on Tond Mountain, and the scarcely less remarkable gold belt on Eagle and Forty-Nine creeks. Copper in large bulk has also been found, and the Queen Victoria claim has just been bonded for \$50,000 by Canadian Pacific Railway officials. Nelson, the central depot for this camp, has already about 40 houses, and is rapidly growing into a city. Sproat's Landing, above mentioned on the Columbia, will soon be a flourishing town, and the Canadian Pacific Company are now connecting it with Nelson by the first link of what will ultimately become the railway system of the southern interior. The Spokane Northern Railway is now heading for the boundary on the Columbia, and the Northern Pacific will probably build a line this year to near the boundary on the Kootenay, both with the design of tapping the silver camps on Kootenay Lake by means of steamboat connections.

The scenery on Arrow and Kootenay Lakes, and the splendid cataracts on the Lower Kootenay, no less than the almost unequalled fishing of the district, are well calculated to attract tourists.

Access may be had by steamer from Revelstoke on the C. P. R., to Sproat's Landing, and thence by pack trail to Nelson. The steamer fare is \$7.00. The distance by trail is twenty miles, and saddle horses are to be had at moderate charges.

Access from Kootenay, Idaho, on the Northern Pacific, is by stage 52 miles, for \$3.00 to Bonner's Ferry, and steamer thence to Nelson is 100 miles, for \$5.00. 50 cents is the general charge for meals or bed. There is ample scope for profitable investment, but little for idling men without means.

LANGLEY DIRECTORY.

231

## LANGLEY MUNICIPALITY.

POSTMASTER, LANGLEY—J. M. DRUMMOND.  
POSTMASTER, LANGLEY PRAIRIE WM. MURRAY.

This municipality includes Langley and Langley Prairie, lies on the south side of the Fraser river, and commences at a point about  $9\frac{1}{2}$  miles above the city of Westminster.

It extends from the Fraser till within  $2\frac{1}{2}$  miles of the boundary between Canada and the United States. It is a little over 10 miles square, containing about 110 square miles.

It forms part of the Westminster Electoral District, which sends three members to the Local and one to the Dominion Parliament.

It has a present population of nearly 1,300. It is an agricultural district of great richness and beauty, and most conveniently situated as to markets, being within easy distance of both Westminster and Vancouver.

There is no waste land in the whole municipality, and only small portions that can be called light or poor soil, and even these parts, under fair cultivation, will raise good average crops. The most of the land is good, being a rich dark loam, with clay subsoil. There are some exceedingly rich belts, such as the low land lying along the bank of the Fraser in East Langley, from three to four miles in length and about two miles wide. The Salmon Prairie, near Fort Langley, containing about 2,000 acres, a large tract of land in the north west part of the municipality. Also Langley Prairie, which was long the property of the H. B. Co., and now one of the most desirable localities on the lower Fraser. Beggar's Prairie, in the south of the municipality, containing about 1,000 acres of the choicest land.

There is no Government land open for settlement in the municipality. There are a number of lots held by speculators, and a few as timber limits, all the rest of the land is occupied by actual settlers, who are rapidly making for themselves comfortable and beautiful homes in this new Province.

As the settlers are of a very desirable class, sober, industrious and law-abiding, this district is rapidly advancing, internally, socially and morally. Roads and bridges (where needed) are being constructed all through the district, so that there is scarcely a bachelor's dwelling that has not a fair road to it. The municipality is all divided into school sections. There are eight school houses, and two more in the course of construction.

The various religious denominations are also well to the front, and the interests of the community in that direction are carefully looked after.

As the whole district is nice rolling land, with the exception of the prairies, it is all well watered and easily drained.

232

BRITISH COLUMBIA DIRECTORY.

The land is well suited for all kinds of grain, such as wheat, barley, oats, peas, etc., and these are grown in large quantities, also hay and roots. It is specially adapted for fruit cultivation, and settlers are going largely into that industry. Hops are also raised to some extent, and promise well.

There are two creeks that flow through the locality, the Salmon creek and Nicomeck both rising in the east of the municipality. The Salmon creek flows into the Fraser river, near the fort, the other in a south-western direction into Mud bay. Trout are plentiful in both these streams. Game of all kinds are also plentiful in the locality.

There are two saw mills in the municipality, one, Mr. H. West's, about three miles above Fort Langley, on the north side of the river, the other, Mr. Boyl's, on the Yale road, above Murray's corner.

The chief points of interest are—1. Fort Langley, one of the oldest white settlements in British Columbia, it being one of the chief stations of the H. B. C. Near this is the old Derby township, which was intended by Colonel Moody as the site for the Provincial capital. It is now unused, except as a point of transit. At the southeast corner there is quite a little village, including two hotels, the Commercial House, kept by Mrs. Eliza F. Wile, and the Langley House, by Mr. Peter Brennan. There are also two general stores—the H. B. C. store, under the able management of Mr. J. M. Drummond, and the other by Mrs. T. W. There is also a doctor, blacksmith and a butcher, and a little way up the river a grist mill, J. Hossack, proprietor. There is a daily mail from Port Henry, also telegraph office.

Mr. Alexander Mays, who settled in the village, has had a piece of his land surveyed into lots, and a number of them are already sold. The price \$50 per acre.

James Hays, residing opposite side of the road, is also prepared to give ground to intending settlers.

There are the most beautiful and picturesque spots in the Fraser river, and especially those above Langley.

There is a stage, which, like the Early Queen, Captain Young, runs between Langley and Woodhouse, leaving Langley in the morning and returning at night.

Murray's corner, a mile from the landing, is Murray's Corner, where there is a large store, kept by the energetic management of Messrs. Ralston & Deane, who are also doing a large business, a Presbyterian church, a Wesleyan mission and a school house.

It is expected that the new line of a railway may pass through the municipality, and this, if carried out, will be a place of importance.

Along the Yale road, just above the Yale road, is Shortreed's Corner. Here there is a large store and post office, kept by Mr. Robert Shortreed, also a large sheep pen, and a little farther on a school house. The country round this is well settled, the land good, but somewhat hard to clear. This locality is sure to become one of the very best agricultural districts in

## LILLOOET.

POSTMASTER, C. A. PHAIR.

IN THE DOMINION ELECTORAL DISTRICT OF CARIBOO AND PROVINCIAL OF LILLOOET.

Is situated on the right bank of the Fraser River in a beautiful and fertile  
 valley, and is surrounded by mountains rising to a height of six thousand feet.  
 It is connected with Clinton and Ashcroft by good wagon roads and to Lytton  
 by a good trail. It is 47 miles distant from Clinton, 60 miles from Ashcroft  
 and 40 miles from Lytton. It has seven stores and two hotels. Within three

miles of it is the beautiful Seaton Lake—16 miles in length—abounding in fine trout, many weighing 10 pounds. It is also a resort for invalids. The quartz ledges on Cayoosh creek are only distant eight miles, the richness of which will shortly astonish the province, when mills are erected thereon. Gold mining is its chief industry. The amount obtained in its neighborhood annually is worth about \$70,000. All kinds of fruit, including peaches and grapes, grow so perfection. Two years ago the government built a bridge across the Fraser at this point costing \$20,000.

The district at large comprises grazing, agricultural and mineral lands. The various benches on both sides of the Fraser and Bridge rivers are attracting capitalists and several companies have already secured leases and are mining them by the hydraulic method with very good results.

Mountain sheep, goats, deer and bear, besides smaller game, are abundant on both sides of the Fraser and Bridge rivers. Several gentlemen from England during the last four years hunted the big horn or mountain sheep here and secured many fine heads. The Indians realize considerable money from furs.

The climate is temperate, dry and healthy, and the land, when irrigated, is very fertile. The yield and quantity of its wheat cannot be surpassed.

The present government has been most liberal in granting money for roads, bridges and schools.

**Pemberton Meadows.** This is the only part of the district that needs no irrigation. The land is very rich and yields large crops of hay. A large number of new settlers have pre-empted and purchased land there this spring. They have no wagon road to Lilloet yet, so it is very difficult to drive cattle to market over the trail.

## Maple Ridge Municipality.

Pitt River and Port Hammond.

POSTMASTER, ARTHUR J. LAZENBY.

This important and extensive municipality is situated on the right bank of the Fraser river, on which it has a frontage of 16 miles. It extends from Stave river, on the east, to Pitt river, on the west. It is for the most part lightly timbered and easily cleared, but very little remains vacant. At Pitt river there are large prairies, known as the Pitt meadows. These meadows comprise from 30,000 to 40,000 acres of level land, but are so very little above the level of the Fraser that they are subject to annual overflows from that river. This renders them worthless for anything but dairy purposes. Dyking has been tried to prevent the encroachment of the river, but so far without avail, as the subsoil seems to contain so much quicksand that the water rises inside the dyke to the same level as the outside. A company received a charter for dyking these lands, but it expires during the course of the current year.

## MATSQUI,

Or St. Mary's Mission

(See Mission City)

Matsqui is the district of New Westminster, forms part of the municipality of Chilliwack, and is one of the best agricultural districts in the north side of the Fraser. It is distant 40 miles from Vancouver, and about 30 miles from New Westminster. The settlement contains many thousands of good fertile land. St. Mary's Mission, with a school for the boys and girls, is situated here. A mile below the station the southern branch of the C. P. R. crosses the Fraser. The completion of this work makes Matsqui a central point. Fruits that kinds do well, grapes ripening in the open air.

## MISSION CITY.

POSTMASTER, J. TRETHERWAY.

In the Dominion and Provincial Electoral District of New Westminster, the post office is named Matsqui. This embryo city being situated at the junction of the Bellingham Bay and British Columbia railroad with the C. P. R., about thirty miles from New Westminster, is likely to become a place of considerable importance. It has already four hotels, with a population of about 200, and four general stores and a wash and door factory. There is one Catholic and one Methodist church, with two schools. The land in the vicinity yields an abundant harvest, and its proximity to the markets of New Westminster and Vancouver renders it a very desirable place for the growing of small fruits. Trains, both east and west, stop here and connect for Washington, Oregon and California, and steamers plying up and down the Fraser river all call, thus affording the best communication.

MOODYVILLE.

POSTMASTER, ALFRED NELSON CODRINGTON KING.

In the Dominion Electoral District of New Westminster and in the Provincial Electoral District of the same, situated on the north shore and directly across the beautiful harbor of Burrard Inlet, distant about three miles from the city of Vancouver and nestled at the foot of the picturesque hills that skirt Burrard Inlet, on that side of the water is the busy town bearing the above name. Communication with Vancouver by ferry and telephone. The principal industry of the place is manufacturing lumber for export, the Moodyville saw mill turning out 100,000 feet per day of 10 hours. There is also a school and a Church of England mission school. It is a pretty town site, well watered, and the harbor, like that of Vancouver, is excellent.

## NELSON, B. C.

POSTMASTER, J. A GILKER.

The eastern terminus of the Columbia and Kootenay Railway, 30 miles from Nelson, on the Columbia river, is situated on a bench overlooking the Kootenay river, about 23 miles west of Kootenay lake, and is the distributing point for all supplies for the different mines throughout West Kootenay. It is well supplied with hotels and general stores, and promises, through its contiguity to the Toad Mountain and Ainsworth mines, to become the Denver of British Columbia. Steamers ply regularly to Bonners Ferry, Idaho, Ainsworth, Balfour, and other important points on the lake, and a large and constantly increasing business is done with many camps located and daily being located in the district. The Cottonwood creek, which runs through the centre of the townsite, furnishes an unlimited water supply, which is now being used by the Nelson Waterworks Company. The Canadian Pacific Railway Company's telegraph gives Nelson communication with all outside points via Spokane Falls, and the Kootenay Lake Telephone Company place the town in touch with Balfour and Ainsworth, and also with almost every mining claim of importance in the Toad Mountain and Warm Springs districts.

The population, which last year only aggregated about 200, now numbers 1,000, and is being augmented almost daily by arrivals on trains and steamers, and is expected to reach over 2,500 before spring, 1892.

## NEW CALEDONIA.

The New Caledonia District is one of the largest of the Hudson Bay Co.'s trading districts, being upwards of 300 miles square. It comprises part of three electoral districts, viz: Cariboo, Cassiar and New Westminster. It includes most of that district commonly known as the lake country.

The resources of this district are confined to peltries and gold. The amount of furs procured annually is very much less than in former times, owing to the fact that the country has been burned over so frequently of late years. It is now hard to find any extent of country that has not been burned over quite recently. If the government does not take active measures to prevent the Indians and others from allowing fires to spread, the whole country will be ruined so far as timber and furs are concerned

NEW CALEDONIA DIRECTORY.

259

Gold is found on the Fraser, Parsnip and Nechaco rivers, and in the Finlay branch of the Peace river. The whole of the northeastern portion of the district is considered auriferous, and no doubt the near future will see many new mines developed.

Fort St. James on Stewart's Lake, about a mile from its outlet, is the head post of the district. The fort is built on rising ground, and commands a beautiful view of the lake and surrounding mountains. Agriculture here has always been fairly successful, but has been confined to barely, oats, potatoes and vegetables. Wheat has been tried, but with no measure of success.

Fort George, at the junction of the Nechaco with the Fraser, is the most southerly post. Here is an Indian village in the vicinity. Farming operations are here conducted on about the same scale and with the same measure of success as at Fort James.

Mr. Charles Ogden is the officer in charge of the Post. There are no white residents.

Fort Fraser is another post on a lake of the same name. There are two Indian villages but no white residents. Good crops of barely, oats and potatoes are raised, the company wintering most of their horses and mules here. Mr. William Sinclair is in charge of the post.

Stony Creek Post is situated about 30 miles east of Fort Fraser. It is a post of little importance, as the country around it has been hunted and tramped over so much that the furs are quite exhausted. There are two Indian villages, but no resident whites. Nothing in the way of farming can be done here, owing to the frequency of summer frosts.

Fort McLeod, on McLeod's Lake, was once a very good fur post, but furs are now very scarce. The waters of this lake find their way to the Arctic ocean by way of the Peace river. Mr. E. S. Peters is in charge of the post.

Fort Connolly, on the lake of the same name, is situated among the mountains, and is somewhat inaccessible. There are no residents, either Indian or white. The post is visited periodically by a few Siccanies and Atnas. The trade is considerable. The salmon ascend to this place, and form the main subsistence of the Indians, and it may be said that the salmon form the main subsistence of all the Indians in the whole district, except those who hunt on the last of the divide. Mr. T. R. Alexander is at present in charge of the post.

Fort Babine, on the north end of Babine Lake, has no white residents, excepting the officer in charge, Mr. Angus McIntosh. The waters of this lake find their way to the Pacific ocean by the Skeena river.

There is no postal system through this district, letters only being conveyed occasionally by the H. B. Co.'s pack trains. There are no roads, only trails, made for the pack horses. Most of the miners who frequent the Omineca, winter elsewhere.

## NORTH-WEST COAST.

The North-west Coast district as it is commonly called, includes all that immense stretch of our northern coast line extending from Alert Bay on the south to the Alaska boundary line on the north. It belongs, properly speaking, to the Skeena division of the Electoral District of Cassiar. It is a section of the Province of British Columbia, which at no distant date will become one of the most important wealth producing portions of the Dominion, having unlimited possibilities of expansion in fisheries, timber and the products of the mine. As yet the only industry to which attention has been particularly directed, is the canning and salting of salmon, which has wonderfully increased during the past two years.

The waters of the coast teem with fish of almost every description; the most important, so far as known, being the halibut, skil, oolaban, herring and dog-fish. During last year no less than six American schooners were reported on the halibut banks in Queen Charlotte Sound and Hecate Strait, they being engaged in salting the fish and conveying them to the San Francisco market, where they find a ready sale. Thus being a profitable business, and our Government not thinking it necessary to keep a cruiser on the Pacific Coast, these schooners continue to peach on the banks with impunity.

The skil fisheries were carried on continually during last year the west coast of Moresby Island, Queen Charolette group About one thousand barrels of fish were salted, but there does not seem as yet to be any market for them.

NORTHWEST COAST DIRECTORY.

263

As a food fish there is not the slightest doubt that the skil or black cod is second to none.

There is, so far, only one dog-fish oil refinery in operation, that of the Skidgate Oil Company on Graham Island, managed by Mr. Robert Tennant. Another one is in contemplation to be erected by a well-known Victoria firm on Bank's Island in connection with a salmon cannery. A ready market is obtained for all the oil at present manufactured.

The salmon canning industry is very extensively carried on at Naas and Skeena Rivers; also at Lowe, Smith, Gardiner and Rivers Inlet.

The timber consists principally of spruce, red cedar, hemlock and yellow cedar or cypress, the latter being especially prized for finishing lumber and turnings, on account of the beautiful polish it takes. There are only three small water-power saw mills located on the coast, and they are all constantly employed in turning out box lumber and other material for the various canneries.

The means of communication are anything but satisfactory. There is no mail contract let, the C. P. N. Co. being paid by the postal authorities at so much per trip for carrying the mail. It is no uncommon occurrence during the winter months for a period of six or seven weeks to elapse between mails, but in the summer season they arrive about once a fortnight. The C. P. N. Company despatch a steamer to Naas and way-ports about twice a month, extending their trip to Queen Charlotte Islands if sufficient inducements offer. The "old reliable" of the Northern Coast, the steamer "Boscowitz," under the careful command of Captain Williams, the veteran steambent man of the coast, can be always depended upon for two trips per month. These steamers call regularly at Alert Bay, Rivers Inlet, Bella-Bella, Skeena, Metlakahla, Fort Simpson and Naas River in the order named, and occasionally at Smith's Inlet, Gardiner's Inlet and Queen Charlotte Islands. Communication with Lorne Creeks, Forks of Skeena and Omineca is kept up by canoes during the summer months, but during the winter the river is frozen over and consequently there is no traffic from November till the first of May.

**NORTH ARM.**

POSTMASTER, WM. H. EBURNE.

This settlement includes the north side of Lulu and the whole of Sea Island, together with a number of smaller islands and the south shore of the mainland, extending from New Westminster to the Gulf of Georgia, a distance of about sixteen miles, and lies in New Westminster District. A part of what is known as North Arm lies in the municipality of Richmond, and Dominion and Provincial Electoral District of New Westminster.

A large portion of the cultivated land is in meadow timothy, which generally yields from two and a half to four tons per acre.

Oats form the principal crop in the cereal line. The average yield may be stated at about seventy bushels to the acre.

Root crops are largely grown and yield most abundantly. With so near and good a market as Vancouver a large number of persons have turned their attention to market gardening, but have formidable rivals in the "Heathen Chinese," not a few property owners having leased land at exorbitant rates to the Celestia's.

There are three schools, one on Lulu Island, one on Sea Island, and one on the mainland. There are two churches, a Presbyterian on Sea Island, and the other, a Methodist, on Lulu Island. Service is also held every Sunday in the school house on the mainland by Methodists and Presbyterians alternately.

Two canneries are in successful operation, owned by J. H. Todd & Son and D. H. Munn & Co. There are four stores, one at each of the canneries, one on Lulu island, and one on the mainland, but which the proprietor, W. H. Eburne, intends to remove to the upper point of Sea Island, at a point about midway between Sea island and Lulu island bridges.

The settlement has the convenience of two postoffices, one on the mainland, known as North Arm, the other on Lulu island, known as Sea island, but which names are very misleading. A list of persons receiving mail matter at North Arm post office is given. Population, about 250; in the busy season as many more.

## OSOYOOS.

POSTMASTER, THEODORE KRUGER.

A country post office in the Dominion and Provincial Electoral District of Yale. Osoyoos Lake is the lowest and most southerly lake in British Columbia. Osoyoos is the centre of travel between British Columbia and Washington. The principal industry carried on is stock raising. The beauty of the lake and its climate makes it a fine spot for those in serch of health, and also pleasure. There are two general stores and an hotel, and the mail is carried by wagon and pack train.

POSTMASTER, THOS. ELLIS.

A most picturesque spot, nestled at the foot of Osoyoos lake. Mr. Thomas Ellis has a famous stock ranch, which occupies the east side of Okanagan lake and river for miles, and on the west side is the Indian reservation. Penticton is distant from Vernon some 85 miles by water, to which a steamer plies regularly. All kinds of game abound in the surrounding mountains, deer being very numerous; while the lake teems with magnificent fish and the resort of numberless wild fowl, which provide good sport for the huntsman. This section is in the Dominion Electoral District of Yale-Kootenay, and Provincial Yale.

BRITISH COLUMBIA DIRECTORY.

**PORT HANEY.**

Port Haney, in the Electoral District of New Westminster, forms part of the municipality of Maple Ridge. It is situated on the right bank of the Fraser river, 13 miles by water, or 18 miles by rail, from New Westminster, and 26 from Vancouver. It is a flag station on the C. P. R., and has daily communication by water with New Westminster, the steamers running up and down the river calling there. It is a very important point on the river. Here are situated three large brick yards, owned respectively by Messrs. Becket & Co., Sinclair & Parry. About 150 men (principally Chinamen) are employed here. Large sheds have been erected, under which the brick are manufactured, burned and stored. There is an unlimited and inexhaustible supply of clay, which, by experts, is pronounced to be equal in quality to the celebrated English pottery clay. These brick are all made by machinery, some being pressed and cut by wire, others being machine moulded. The re-pressed brick made here is quite equal to the imported Santa Cruz brick, and has the advantage of being much lower in price. Vancouver and New Westminster form the chief market for these bricks, which sell in the yard at from \$8 to \$12 per thousand, the re-pressed being worth \$22. These yards have a railway siding to facilitate loading.

Mr. Samuel Robertson, of Port Haney, is supposed to have the largest bearing orchard in British Columbia, having over 25 acres, from which he gathers an immense crop. There are two stores, two hotels, post office, school and two churches at Port Haney. Besides brick making, fruit raising and farming, there is another very important industry, viz., salmon freezing. The Frazer River Freezing Company has a large establishment here for freezing salmon, employing about twenty hands during the summer months of July and August and part of September. The salmon are laid on wooden trays and enclosed in the receiver, where they are exposed to an icy blast from a refrigerator. They are then packed with ice and stored until the winter, when they are shipped East, Winnipeg, Toronto, Montreal and New York being the chief markets. The capacity of the concern is 150 tons of frozen fish.

**PORT KELLS.**

Including Barnston Island and Annieville.

Port Kells is situated on left bank of Fraser river, about 10 miles above New Westminster. A townsite has been laid out there and lots are now on the market. The townsite is situated on a slightly elevated plateau, gently sloping towards the Fraser river and Serpentine flats. It is partly in the municipality of Surrey, and partly in Langley. There is daily communication with New Westminster and other points on the Fraser, and will have a station on the New Westminster Southern Railway, which is now completed.

An immense deposit of iron ore has been discovered. This ore has been analyzed and is said to be hematite and limonite of the best quality. So far nothing has been done towards working this mine

At Annieville, a mile or so below Port Kells, is a large brickyard. The proprietors of the brickyard intend going fully into the manufacture of pottery, as the clay there is of the very best quality, experts claiming that it is equal in quality to that used in the great potteries in England.

The land is lightly timbered in the whole vicinity.

A school house is to be built immediately.

Port Kells is connected by wagon road with the main wagon road of the New Westminster district, namely, the Yale and New Westminster trunk road, over which in early days all the Cariboo freight was carried.

A bridle path also, called the "Telegraph Trail," connects it with Langley.

## QUESNELLE.

POSTMASTER, A. McNAUGHTON.

Quesnelle, in the Dominion Electoral District of Cariboo-Lillooet and Provincial of Cariboo, is beautifully situated at the confluence of the Quesnelle and Fraser rivers, and is reached by stage from Ashcroft, on the C. P. R., distance, 225 miles. There are two large stores, not including two Chinese. The Hudson's Bay Co.'s Post makes Quesnelle a centre for collecting furs from the surrounding districts, and does a large boating business with other posts up the Fraser. The Chinese, not so numerous as formerly, work bars on both rivers for gold. The farmers around and below Quesnelle supply all the farm produce consumed by the miners around Barkerville. Messrs. Reid & Johnston's flour mill is situated across the Quesnelle river, from and to the south of the town. The climate is the healthiest in the district. Government Agent and Road Superintendent, Jas. H. St. Laurent; Telegraph operator, J. E. Bowron.

## QUESNELLE FORKS.

POSTMASTER, W. STEPHENSON.

In the Dominion Electoral District of Cariboo and Lillooet, and the Provincial of Cariboo. The Government agent is Mr. Wm. Stephenson. It is reached by a good pack trail from 150 mile house. Distance about 60 miles.

Quesnelle Forks was one of the first mining camps in Cariboo district, the camp being established in 1859, and there has been continuous gold mining in the south and north forks as well as in the main Quesnelle mine up to the present time, and considerable improvements are now being made by the construction of ditches for the opening up of hydraulic mines, which will considerably increase the population. At present the principal part of the labor supplied is Chinese. It is anticipated that this section of the country which has given so much gold for such superficial work as has been done, will, with capital and hydraulic mining to wash away the gravel hills, or with proper machinery and appliances to reach the bottom of the rivers and to bed rock in the deep ground, astonishingly rich results will follow.

FOR RELIABLE INFORMATION correspond with F. J. COULTHARD & Co.  
 NEW WESTMINSTER, B. C. P. O. Box 244. Telephone 107.

**REVELSTOKE.**

**AT ONE TIME CALLED FARWELL.**

**POSTMASTER, F. B. WELLS.**

Revelstoke, in the Dominion Electoral District of Yale and Kootenay and Provincial of Kootenay, is situated about one and a half miles from the station (a railway divisional point) on the Canadian Pacific Railway, distance from Vancouver 381 miles, from Montreal 2,524, altitude 1,475 feet. A new town is fast springing up adjoining the railway station. It is a supply centre for the West Kootenay District. The Columbia River Transportation Company's steamer makes regular trips to Sproat's Landing at the mouth of the Kootenay, calling at Hot Springs and Deer Park. The Columbia is navigable southward to the International boundary, 200 miles, and expands into the Arrow Lakes about 12 miles below Revelstoke. The famous Toad or Mineral Mountain is reached by the steamer, which passes within 26 miles. The hotel accommodation is excellent—two—the Victoria and Central being located in the old town, and the C. P. R. boarding house in the new.

RIVERSIDE DIRECTORY.

281

land was utterly useless without dyking, and a company called the Matsqui Dyking Company obtained about 6,000 acres from the Government and an assessment from the settlers for building the dyke. This work is now completed. The Dyking Company will sell their land in small farms of 80 or 100 acres, so that in a couple of years this will be a flourishing settlement.

Abbotsford, a new townsite, has been laid off in this district, and lots are now on the market. It is on the crossing of the Mission extension of the C. P. R. and the New Westminster and Yale wagon road. The site has been cleared. Messrs. Rand Bros., of Vancouver, are the agents for the property.

Riverside was formerly known as Matsqui, and mail came there for both sides of the river, but when the C. P. R. was built, and the mail was left at the Mission, that office took the name and paraphernalia of the Matsqui office. This causes considerable inconvenience to strangers.

Grapes do remarkably well on the high land.

**SARDIS.**

POSTMASTER, A. S. VEDDER.

Is in the Dominion and Provincial Electoral District of New Westminster. The nearest town is three miles distant, and it is about 50 miles from the city of New Westminster, with which there is daily communication by river steamer from Centerville. The settlement has three churches and two schools, but no hotel, one general store. The principal industry is farming and dairying, the valley being very fertile, surrounded by high mountains. The soil is a rich loam, the crops raised being only excelled by some of the land at the mouth of the Fraser river. All kinds of fruits, vegetables, and cereals do well, it enjoys a remarkably fine climate, and the people are thrifty and intelligent above the average.

SODA CREEK DIRECTORY.

291

The scenery surrounding it is very grand and imposing, especially the Canyon of the Fraser, about a mile below the village, where the Indians in the season can be seen perched on the ledges of rock or platforms, scooping in the silvery salmon in large numbers, five and six fish being usually caught each dip of the net.

It is a veritable "sportsman's paradise" for fishing and shooting, game of all kinds being plentiful. Often deer are seen on the opposite bank of the river in droves from six to ten, and beauties of speckled trout are plentiful in the streams and lakes in the near neighborhood.

The climate is simply perfection both summer and winter for invalids. A medical doctor (Dr. Jas. Clark) has lately been permanently located here, which will make it more of a sanitarium than formerly.

A steamboat of over 300 tons has been making weekly and semi-weekly trips to Quesnel, some 60 miles, carrying freight and passengers towards the Cariboo mines.

It is the shipping point for the agricultural part of the Cariboo District, being very centrally located for that purpose.

A good steel cable ferry, with a large scow, has been erected, which will be a great convenience to the farmers and tourists going to the Chilcotin country.

There are telegraph and express, post and money order offices, with weekly mails to and from the town. A good flour mill, blacksmith shop, two hotels and general stores, where the good things of this life can be supplied to the outward and inward man. Private residences can be furnished to families by the hotels if required.

## SQUAMISH VALLEY.

A beautiful valley situated at the head of Howe Sound about 35 miles distant from Vancouver city, containing an area of about two miles in width, and twenty in length. It is well adapted for all kinds of agricultural purposes. Hop growing is likely to become one of the principal industries of the place, as they seem to do remarkably well here. Cattle do well out all winter. There is a large tract of timber on the north east end. This valley is drained by three rivers, Squamish, Mamcum, Cheacumas, all of which abound with salmon and trout.

When the road now being built is completed, there will be a very enjoyable drive, also excellent hunting. Quite a number of visitors come up in the summer and return very much pleased, and congratulate the inhabitants on having one of the best valleys in British Columbia. An immense seam of hard coal has been found in the near vicinity. The hotel kept by Mr. Mashiter affords good accommodations for visitors. There is steamer communication once a week to the head of Sound. Game is in abundance ranging from a grouse to a grizzly. The clearing up of lands is steadily increasing and the area of cultivable lands extended. Plums, apples, pears, currants, gooseberries and all kinds of small fruits do remarkably well. The speculators and Indians hold quite a lot of good land.

**STANLEY,**  
Including Van Winkle.

POSTMISTRESS, MRS. L. M. DODD.

**Burns Mountain,** a large quartz-bearing mountain, three miles from Stanley. On its summit are beautiful dry meadows, making magnificent picnicking grounds. Fine views of the Rocky Mountains can be obtained from the top, as well as several pretty lake views.

**Chisholm Creek,** a small creek flowing in a southerly direction and emptying into Lightning creek, just at the back of the main street.

**Last Chance Creek,** a small creek flowing in a northerly direction and emptying into Lightning creek a short distance below the town. This creek, as well as Chisholm, is gold-bearing; but both differ from Lightning in that the bed rock is much nearer the surface, and consequently the gold is easier got at. In Lightning creek the bed rock is from 60 to 80 feet below the surface. Most of the ground from the surface to the bed rock is low gravel, so that the water easily soaks through, and passes in such quantities that it is utterly impossible to carry on mining operations without the assistance of large pumps.

**Lightning Creek,** a beautiful stream of clear water running just behind the town. Trout come up it to spawn, and some weighing 14 lbs. have been caught. It is a gold-bearing creek, and vast quantities of gold dust have been taken out of it.

**Stanley,** in the Dominion and Provincial Electoral District of Cariboo, is chiefly a mining town, and is distant from Ashcroft about 280 miles, and is reached by road, upon which the B. C. express stage travels. Four general stores and an hotel is built here. Population, about 150.

BRITISH COLUMBIA DIRECTORY.

Gulf of Georgia, in the Dominion and Provincial Electoral District of New Westminster. This gives it a fine harbor deep enough for the largest ocean vessels to ride, and free from obstruction of ice in the winter, which makes it the gateway of the Fraser river valley and gives it command over the vast commerce of the greatest river in the Province. Another matter of importance is the fact that the steamers navigating the Fraser require to be built so as to draw but little water, and are unfit for the navigation of the waters of the Gulf, while the gulf or ocean steamers are unable to do the river business. As a consequence this city is bound to be the point of transshipments of freight from one class of steamers to the other, and this in connection with its advantages of harbor, will make it the place for storage and distribution, building up ship-yards, docks and other shipping facilities. It already has one splendid wharf, which is being supplemented by another of greater capacity.

The salmon fishing and canning business has taken its stand as the first industry in the Province, and the great volume of the catch is within sight of this place.

It is also backed by a farming country of wonderful fertility growing crops of marvelous productiveness. Adjoining it on the north and east are 30,000 acres of these lands, while in front of it, across the Fraser are 50,000 acres of the same incomparable soil.

The finest brick and pottery clay have been discovered in unlimited quantities, and steps to utilize them in manufacture are already taking shape.

Natural gas has been found, and already utilized in lighting the principal streets. Experienced experts pronounce it to be pure in quality and there is every indication that when developed, as it shortly will be by a powerful company now forming, it will become a most important factor in the prosperity of the place, furnishing heat, power and light.

The climate is the same general character as elsewhere along the coast, with the exception that there is less rain, the clouds not precipitating their moisture so readily as farther inland, and with the further pleasant exception that the breeze in summer makes that season of the year most delightful. It is confidently believed that the place will yet become famed as a summer resort.

The scenery is by no means so tame as might be supposed from its location on level land. On the contrary it is of the most inspiring character, turn which soever way you will and you behold a "sea of mountains" to which distance only lends enchantment to the view; while the Fraser in front and the Gulf to the west with the prairie at your feet extending for miles, gives diversity and an added charm.

It is not therefore astonishing that this place which was started less than two years ago a "ready" plain, should have made great advances. It has two large canneries within the town site, while several others are but a short distance removed, two hotels, two general stores, book and news store, seed store, opera house, paint shop, blacksmith shop, harness shop, lumber yard, sand and lime yard, two butcher shops, fruit store, post office, telephone station, two stage lines, steamboat agencies, real estate agencies, etc.

 Water, Steam and Hot Air Heating, P. O. Box 16. Tolo. 153. Plumbing, Gas Fitting, Hot  
 Galvanized Cornice, Iron or Tin Roofing. **NEW WESTMINSTER, B. C.**

During the past few months it has built about one mile and a half of sidewalks, and spent \$10,000 in opening up new streets. A gravel and plank road is being built between it and Vancouver, and another is to be built to New Westminster, two and one-half miles of which is already finished.

It has regular steambot connection with Victoria, Vancouver, New Westminster and Nanaimo, and between it and Vancouver two lines of railway are to be built, one of which will be an electric tramway, and the other is now under construction. Another tramway will connect it with New Westminster. The charters for which have already been obtained.

Still more important will be the Victoria, New Westminster line. Whereby, this place will be more directly connected with both these cities. Powerful ferry steamers will connect with this point from which a branch will connect Steveston with Vancouver.

## SUMAS.

POSTMASTER, DONALD MCGILLIVRAY.

In the Dominion and Provincial Electoral District of New Westminster. As one ascends the Fraser river, above New Westminster city, the view of Sumas and the surrounding country becomes visible. This section of Chilliwack has long since been noted for the rich agricultural ground contained within its border. Like the greater part of the Lower Fraser country the land is low, but of unsurpassed fertility. All the small fruits bear well. Apples, pears, plums, strawberries, etc., prove a remunerative crop, and their quality is excellent.

Dairy farming is carried on extensively. The general appearance of this section of the district at all times attracts attention to those who have settled in Sumas. They have done well and built up about themselves beautiful homes. Population, 200.

## SURREY MUNICIPALITY.

For information and directory of the different portions of Surrey, see Mud Bay, Brownsville, Elgin, Blaine, Hall's Prairie, Clover Valley, Surrey Centres Clayton and Port Kells.

This municipality is a very large one, containing 120 square miles. It runs from Fraser river to the International boundary, and from the municipality of Langley to the coast and municipality of Delta, The New Westminster Southern Railway, now completed, runs from north to south through this corporation, passing from Brownsville to Blaine, through Port Kells, Clayton, or as it was formerly called, The Serpentine Flats, Surrey Centre, Clover Valley, Hall's Prairie and Kensington Prairie. This road will prove of great

benefit to Surrey, as it makes easy communication with both the Sound cities and New Westminister. The whole district has made wonderful strides during the last two years. There are now five school districts, viz, Mud Bay, Clover Valley, Hall's Prairie, Kensington Prairie and Port Kells, each having a good school house and resident teacher. There are seven post offices, viz, Mud Bay, Elgin, Hall's Prairie, Clover Valley, Surrey Centre, Clayton and Port Kells, with mails twice a week. The road system is good, and is being improved yearly. Lumbering is carried on extensively, and a saw mill and feed crusher has lately been started in Clover Valley or Nicomekl river. The soil is very fertile. There is every indication that at one time the Fraser river ran through the Serpentine Flats and along the basin to Mud Bay, this flat being gradually filled up, and now it is one of the most fruitful valleys in British Columbia. At Blaine, two town sites have been laid out, one to be called Blaine and White Rock, respectively, but so far little has been done towards building. During the summer of 1890 a dyke was built from Blackie's Sp it on the Surrey side to the high land opposite, which will prove a great boon to all the settlers in the Mud Bay Flats, and will reclaim a large tract of land hitherto worthless.

The whole district is well watered. Besides the Fraser river, the Serpentine and Nicomekl rivers flow through the valley, nearly its whole length. As the land on the banks is level and little above ordinary high tide mark, the tide ebbs and flows in the rivers. This makes it very convenient for traffic, as freight can be taken down the river on a scow, or lighter with one tide, and the empty vessel brought back on the next tide. A scheme has been projected by which a canal will be cut across the Delta from Mud Bay to Fraser river, a distance of five miles, which, if done, will give easy water communication with New Westminister. The drawback to the outer districts of Surrey is the distance from market, as up to date, freight and produce have to be hauled on wagons to Brownsville, opposite New Westminister, in some instances over twenty miles, so that this canal, if successfully carried out, will prove a great step towards the further advancement of the district.

Surrey is also well represented in church matters, having regular service, by Church of England, Presbyterian and Methodist ministers. There is also an agricultural association with a good, strong membership.

Comparatively little land still remains vacant, but farms can be bought at a reasonable figure. The population is estimated at 1,600 souls.

## SURREY CENTRE.

POSTMASTER, J. CHURCHLAND.

This portion of Surrey embraces that section around the junction of the Coast Meridian Road and the McLennan Road. It is a rolling section of coun-

## VERNON.

(See Spallumcheen.)

POSTMASTER, DUC GIROUARD.

Vernon, in the Dominion Electoral District of Yale-Kootenay and the Provincial of Yale, the natural centre of the largest and richest agricultural district in the interior of British Columbia, is situated on the line of the S. & O. railway, a distance of four miles from its terminus on Okanagan lake. The location of the town renders tributary to it the thriving settlements of the Okanagan and Lower Salmon river valleys, Priest's valley, the farming and stock raising districts of the Coldstream and White valleys and the mineral regions of Cherry and Cedar creeks. It is also the general distributing point for trade in the Osoyoos Division of the Yale District, of which it is the governmental centre. Since the construction of the S. & O. the growth of the town has been very rapid, it having more than doubled in size and population during the past year. The situation of the townsite is all that could be desired, and the surrounding scenery very attractive.

The country on all sides is rapidly becoming noted as the beau ideal of the sportsman and tourist, while the salubrity of the atmosphere and the genial climate are calculated to transform it into a fashionable health resort for invalids. Owing to its position, Vernon appears destined to become the railway centre for that part of the interior of the Province lying to the south of the present line of the C.P.R. Two railway companies have already obtained charters enabling them to construct from Vernon south to connect with the U. S. railway system at Osoyoos lake and the construction of a line from Vernon to Nelson via the Coldstream and Fire valleys is expected to be begun next spring, a charter having been obtained for that purpose by leading provincial capitalists.

The town already possesses four good hotels, and a fifth, the largest in the interior, is in process of construction. An Episcopal, a Roman Catholic and a Presbyterian church are about to be erected. The buildings put up this year are of a superior order, a good sized brewery being amongst the number. The growth of the town cannot fail to keep pace with the development of what may safely be termed the garden of British Columbia. Vernon already possesses a newspaper, the "Vernon News," which enjoys a large local circulation.

## YALE.

POSTMASTER, J. W. LOWES.

The population of Yale is about 200. It is one of the principal stations on the Canadian Pacific Railway, and has daily mails each way. It is so situated that it can be reached either by land or by water, and is in the Dominion and Provincial Electoral District of Yale. It has three general stores, all carrying on a good trade, three churches, Church of England, Roman Catholic, and Methodist, and also a school for educational purposes. Two hotels have been erected in the place, the proprietors of which are Mrs. Jessie Reevesbech and Frank Crotty, thus affording accomodation for visitors.

Tourists going there are very much pleased with the place, the views from different standpoints being lovely.  
 102 miles from Vancouver.

## CITY OF NANAIMO.

The City of Nanaimo is most favorably situated on an indentation of the east coast of Vancouver Island, forming a splendid natural harbour, nearly opposite the terminus, of the Canadian Pacific Railway, at the city of Vancouver, on the Mainland of British Columbia. While Nanaimo is at present within connection with the C. P. R., by practicable railway ferrings across the Straits of Georgia, the distance can be abridged to an hour's journey, by means of a projected and feasible railway route from a well sheltered shipping point on the south-east corner of Gabriola Island, to the Port of Nanaimo, and on the completion of this connection with the great continental highway, its continuation by means of trunk lines of railway from Nanaimo to the North of Vancouver Island, and thence to the Ports on the North-west Pacific nearest to Japan and China, will be the natural course of development, and must rapidly be accomplished. Thus is Nanaimo assured in the enjoyment of the advantages of its fine geographical position, as well as in its command of the chief safe and commodious deep water harbour facilities on the east coast.

The calm and land locked bay of Nanaimo is secured from the force of all storms, by Gabriola, Newcastle and Protection, the surrounding islands, but there are two clear channels for passage into the Straits available at all seasons of the year, and at every stage of the tide. There are no bars to navigation, and the anchorage is good. Many of the largest steamships and sailing vessels afloat, frequent the port of Nanaimo, and are loaded with the utmost facility and despatch at the great loading wharves, alongside which the deepest ships can ride safely. The annual tonnage of vessels arriving and departing amounted for the last fiscal year for Nanaimo port, to 1,203,643 tons including foreign and coastwise shipping resorting to the port.

A dry dock of the largest capacity, and most approved model, is projected for construction at a site offering superior natural advantages, and near the shipping wharves.

The city of Nanaimo is beautifully located, it has a frontage of several miles upon a broad sheet of water, and recedes from the shore by easy gradients to the western verge of the town site, for about a mile where an elevation is reached, from which is afforded a grand panorama of scenery as the spectator views the whole horizon. O'Connor Power when recently making a tour of Vancouver Island, was enraptured with his prospect from the hill side, and thus recorded his sense of the grandeur of the scene, in a communication to the press. "A short run of about an hour brings the traveller from Chemainus to Nanaimo, which with its abundance of coal and iron, side by side, (as it were), is known as the "Newcastle of the Far West." The railroad depot occupies an elevated position from which a magnificent view presents itself. Just beneath you lies the inner harbor, deep, placid, and sheltered at every point, and affording safe

BRITISH COLUMBIA DIRECTORY.

anchorage for craft of every description, from a canoe to a line of battle ship. The primitive old fort, overlooking the water is the "Bastion," and is an old mark of Hudson's Bay rule. Beyond the harbor you see the rolling waves of the Straits of Georgia, and looking across to the mainland opposite, you behold the rugged snow capped peaks of the wild Coast Range, now rising like clear crystal spires in the sun, now robing their majestic forms in shrouds of mist, and finally retiring with the parting day until they are lost in the lowering clouds &c." Viewing the town site from the same (or better) vantage ground, the most ordinary observer cannot fail to be impressed with the possibilities of extension, and the active improvement going on, on every hand. Conforming to the contour of the country, a large portion of the city site is laid out in semi-octagonal plan with cross streets radiating from the city front, where, however the business street is much more crooked than the proverbial rams-horn, having been built along the base of the hills at a time when, to use the words of an old settler, the houses were just thrown in anywhere and in the existence of a busy city at that site was never thought of. This was back in 1854 or thereabouts, when the Hudson's Bay Company first started to dig a little coal out of the rocks and put up a few houses. Now the old fashioned street is full of business and activity, and behind it a large and handsome residence district has grown up, filled with tasteful houses standing amidst their own shrubbery on the wide and well graded streets.

The nomenclature of the streets and squares is an interesting study which affords a clue to some of the distinguished and enterprising capitalists who promoted and have fostered and developed the coal industry of Nanaimo until it has arrived at its present immense proportions: there are Robarts street and Lubbeck square, after the well known bankers of London, and Fitzwilliam and Milton streets, in honor of the scions of the noble Earl of Fitzwilliam, who have in early days made the tour of the province, notably, Lord Milton, whose travels in the upper country are part of Colonial history. The memory of the late Justice Haliburton, a former chairman of directors of the Vancouver Coal Company, and of world wide renown as the writer under the nom de plume of "Sam Slick," is perpetuated by one of the longest streets. And the honorable directors of the company, Galsworthy, Tendron, Prideaux, Selby, Irwin and Fry, Campbell, Young and other supporters of the company's adventure, with other celebrities, such as Robins, Finlayson, Robson, Dansmuir and others, are handed down to posterity as familiar household words.

A large reservation of ground, used by the company as a "home farm," and at present bearing the euphonious name of "Wake siah Park," will probably, at no distant period, be included together with the "five acre lots," in the limits of the city corporation, so rapidly is the city advancing westward that the company will no doubt throw open the land for settlement, when a legitimate demand arises, and its actual occupation and improvement is assured.

Nanaimo was incorporated in 1874, on the application of a number of its then small population, which was bitterly contested at the time, but the sequel

has proved the wisdom of the action of the government of the day, and from its inception the course of municipal existence, although not always running smoothly, has been one of steady progress, resulting in the foundation of a city that is destined to attain a position of commercial and industrial importance only second to any on the Pacific Coast.

For some years the city has had waterworks, and gas works and telegraph and telephone services, and lately Mr A. Shaw has introduced electric light works, the only thing it lacks being the electric tramway which, however, has been chartered by the city council and an act of the provincial legislature, and is now in course of construction.

Besides the railway to Victoria there are well formed wagon roads from the city to the farming districts of Cranberry, Cedar and Oyster, and through them to Cowichan and Victoria on the south; westerly to the Harewood estate, towards Mount Benson and the Little Mountain, and northerly to the rising town of Northfield, named after the North or New Wellington coal field of the New Vancouver Coal Co., which is being vigorously mined and shipped to an eager market over the company's Northfield railway and loading wharves at Newcastle Point. Northfield claims to be a thorough "union mining camp," is an extraordinary instance of rapid growth of a coal mining town, being only lately platted and sold. It is now thickly populated by a thriving and well contented people, who, excepting the tradesmen and artisans engaged in building houses, etc., are entirely employed in the company's New Wellington coal mine there.

The City of Nanaimo and suburbs, with the 6,000 or 7,000 inhabitants, owes its prosperity and its very existence to the New Vancouver Coal Mining and Land Company, which, in 1862, bought and obtained a transfer from the Hudson's Bay Company of the valuable Nanaimo estate, with the collieries, its town and other buildings, sawmill and shipping wharves, including all the dominant foreshore and other rights and privileges, held by the H. B. Co., by virtue of its special charter and grant from the crown. The mines and works of the New Vancouver Coal Mining and Land Co. form the main resources of the town, and the great bulk of its inhabitants are directly or indirectly dependent upon the success of the coal industry, which is promoted so energetically by the company. For several years after the commencement of its career the company was struggling against many difficulties. Natural "faults" in the subterranean strata and other causes, together, effected discouraging results, so that the total output between 1862 and 1883 only ranged from 20,000 to 90,000 tons of coal per annum, the highest figure being reached in 1883. In 1884, by more energetic management, the output of coal rose to 103,000 tons and steadily increased until a production of coal from the mines of the New Vancouver Coal Mining and Land Company amounting in round numbers to 500,000 tons per annum has been achieved, with a most promising outlook for a further increase in the demand for the famous Nanaimo, Southfield and New Wellington coal, mined by this company only. Of the immense output about 400,000 tons were exported and about 60,000 tons were dis-

tributed in local sales, and the remainder put for consumption in the furnaces of the thirty or more engines of the company itself, which use an average quantity of 100 tons a day. To meet the great extension of the company's business the capital of the company was augmented, but by no means correspondingly with the expansion of the concern.

The company has at present five mines open and four in active operation—all commenced since 1884. They run down to great depths, and have double shafts (or pits) for ventilating, the law not allowing more than a limited number of men to work in a mine with but one shaft. The gross output from these mines has aggregated 2,000 tons a day. The mines and coal fields of the company extend up and down the coast for ten miles, and most of the property intervening is owned by the company, whose landed and mineral estate exceeds 30,000 acres in area. The company formerly owned the whole of Nanaimo and still hold a considerable area of the townsite, together with Newcastle, Protection and three or four other islands lying along the coast. The miners, excepting those at Northfield, all live in Nanaimo and on the suburban "five-acre lots," the company running work trains from the city to its outlying mines, thus enabling its employees to enjoy the advantages of city life. The railroads connecting the shafts with the shipping wharves at Nanaimo and Newcastle Point (Northfield wharf) are of many miles in length, and are all of the standard gauge, ensuring complete intercommunication with the Esquimalt & Nanaimo Railroad, a privilege of which other mining companies having differential gauges are deprived, and in this connection it may be mentioned that the proprietors of the E. & N. railroad have been most accommodating to the New Vancouver Coal Company in furnishing sidings and other facilities for traffic.

The Esplanade, or Eastfield shaft, which is the largest mine of the company, is at Nanaimo, within 50 yards of the company's offices and warehouses, on Farquhar street, and an enormous outlay has been made in its equipment and development, but until last year a series of "faults" of the most difficult and apparently insurmountable character have impeded the works and threatened to suspend them entirely. These difficulties have, however, been successfully overcome, and a very large area of coal ground, extending at a depth of 600 feet, far under the waters of Nanaimo harbor, has been proved or "won" in mining phrase. During the past year reserves of coal have been opened that will yield an output of over 1,000 tons per day for many years. This "No. 1 shaft, Esplanade," is a prominently characteristic feature of the coal mining city of Nanaimo, its lofty and massive chimney pouring forth black smoke all day and night the year round—its great furnaces and boilers, its powerful engines (made by Oliver, of Chesterfield, England), and the endless steel cable hoisting the coal cars from the depths at the rate of half a minute—all are striking objects to the observer. This shaft goes down for 600 feet, as also does the "air or ventilating shaft," within a stone's throw from the hoisting shaft; both are circular, and of 16 and 18 feet in diameter respectively, and there are over ten miles of drift passages and slopes in connection with the foot of the hoisting shaft. The engines can hoist 1,000 tons in eight hours, besides

319

pumping water if required. The company has established an electric power house near the pit bank of the Esplanade shaft, and from the powerful dynamos the underground traction and other practical operations in the mine can be furnished with electric motive force, and probably the mine will, in course of time, be lighted by electricity.

The New Vancouver Coal Mining and Land Company are also proprietors of other collieries at Southfield, Chase and Nanaimo rivers (a little to the south of Nanaimo) upon a large proved coal area of the company's estate there, of over 2,000 acres, as well as the Northfield colliery, from which the best coal mined on the coast is produced, known as "New Wellington." the output from Northfield colliery is now a large one, considering the short time of the pit's life, but as the underground workings extend the quantity of coal produced will be enlarged to an amount more nearly adequate to the demand, which greatly exceeds the company's present power to supply. The success of the Northfield colliery, and the production of the best bituminous coal ever mined, is an accomplished fact, in the face of prophecies and predictions of failure that were enough to stagger the heart of a giant, and the miners themselves, who are shrewd judges of prospects "below the surface," are exhibiting their strong faith in the future success and prosperity of the mine by building up the town of Northfield to an extent that will soon make it a suburb, if not an integral part, of the city of Nanaimo itself.

The principal portion of the exports of coal from the port of Nanaimo is shipped to San Francisco, San Diego and Los Angeles, in California, while other shipments are made to the Hawaiian Islands, and to Portland, Oregon, and far north to Alaska and Petropaulovski. There is also a large demand for use in the Province, and transient steamers and vessels are loaded on calling at the wharves. This local or "domestic" consumption is considerably increasing, owing to the growth of Provincial industries and to the excellent quality of the coal now produced, making it more economical for householders to use for fuel than the old-time cordwood and blocks of forest timber. The coal is carried principally in American bottoms. The harbor of Nanaimo is always well stocked with shipping, either loading or waiting their turn—generally from four to a dozen steamers, ships and other sea-going vessels may be seen riding at anchor or at the wharves, in addition to the regular coasting steamers and smaller craft. The company alone has an average of about 150,000 tons of shipping under charter, and other ships are chartered by the buyers or call on their own account. With the great demand of the market of late the company has found even its extensive output unequal to furnish supplies called for, and necessarily declined many orders. Consequently the company has started the sinking of new shafts. One is now down about 500 feet at a site on Protection island, owned by the company, where a very fine vein of coal was struck at about 550 feet deep. When this new shaft is finished the coal will be worked far under the sea of the Strait of Georgia, where there is room for many years mining and a practically inexhaustible field of good coal. The company have going in full force exploration operations with three diamond drilling machines

of powerful make and some capable of piercing to a depth of 3,000 feet and from thence bringing up an entire core or section of the measures or strata being passed through of several inches in diameter. These drilling operations are carried on ahead of the workings both at North and South "Fields," and the coal measures of the "Harewood" part of the company's estate are being prospected by diamond drill with satisfactory results. Near the site of one of the bore-holes to the dip of the Northfield mine, a pit (or shaft) is being sunk to the seam of New Wellington coal proved to be there.

The machine shops, blacksmith and carpenter shops are replete with all modern appliances and labor-saving contrivances, as well as lathes for heaviest work and for fine use, boring, cutting and fitting machines, steam hammers and blowing fans, etc.

The whole plant and equipment of the collieries of the company, including the many fixed and locomotive engines, and the capital rolling stock of loading, freight, ballast, flat and passenger cars, are in perfect order, and are being worked up to their highest efficiency.

There is telephonic connection by the company's private wires between the superintendent's office and every pit-head, loading wharf and workshop, and engine house, from Northfield to Southfield, and also with the C. P. R. telegraph in the city, thus using about 12 miles of wire, in addition to the ordinary connection with the city telephone system.

The land department of the New Vancouver Coal Mining and Land Company is of itself attaining extensive proportions, and has required most anxious attention in order to secure the best results from the disposition of the company's land, such as its due settlement and improvement by purchasers. In all respects, however, the sales and other dealings of the management with the town and suburban and country lands of the company are upon a just and liberal basis, and have hitherto proved mutually advantageous to the settler or occupant and the company. The town and other lands are open to acquisition to all bona fide purchasers upon reasonable terms, upon condition of actual use and improvement of the same in a manner suitable to the environments. If anything, preference is given, by the company to its workmen in the dealings with the lands, with marked advantage in all instances, but particularly with respect to the opening up of a large area of suburban land into five-acre allotments, and the letting of the same to workmen on liberally long terms of payment with right of purchase conditioned upon certain annual amelioration of the property. These "five-acre lots," as they are termed, in the hands of frugal and industrious workmen, have contributed largely to the advancement of the prosperity of the occupants, and caused the clearing and cultivation of a surprisingly large expanse of land at the back of the city that, with its forest and swamp, formerly blocked all progress westward, and now the want is of a continuation of a road to Mount Benson, which has already been made more than half way to the summit, from which one of the most magnificent views on the island can be enjoyed by citizens or tourists at the expenditure of only a few hours' walking (and climbing) exercise. Many ladies, and even children,

have made the comparatively rough ascent from the end of the road, which the completion of the road would render easy of accomplishment.

The demand for the company's five-acre allotments has exceeded the ability to supply the applicants, until further surveys have been undertaken, and this is good evidence of the popularity of the policy of management of the lands and of the general prosperity of the people at Nanaimo. The head office of the New Vancouver Coal Mining and Land Company is in London, and John Galworthy, Esq., is the president of the company. It has a branch office at San Francisco, and is represented in most of the coast cities.

The vast interests of the Company in Vancouver Island are under the direction and control of Samuel Matthew Robins, Esquire, J. P., whose ornate and cosy villa is easily found nestling amongst the shrubbery of its well kept grounds on the seashore of the esplanade at Nanaimo.

The employees of the company number about 1,500. The miners work 8 hours a day and are almost unexceptionally contented and well to do. The company have hardly ever had any disputes with their workmen, nor is it the intention that the miners shall have just cause for complaint. The works and the whole city and its surroundings bear evident signs of thrift and order, and Mr. Robins, the able superintendent, has been known to say that during the seven or eight years of his management and administration of the company's affairs he has never uttered nor received from his employees a single angry word.

Of the City of Nanaimo proper and its varied town and commercial and industrial interests hardly too much can be said in its praise for its patient endurance of past vicissitudes, during the passage of the coal mining industry through its shady and fluctuating career; but the present position and prospects of the city are of the most promising character, and of this its citizens and tradesmen who are capitalists have not been slow to take advantage by the erection of many fine business blocks and residential buildings, of a style and finish that are creditable to the rising city, and the huge three and four storey brick blocks now in course of construction are alike evidence of the growth and stability of the place and its commercial interests. Vying with sister cities, Nanaimo citizens are arranging for the establishment of a first class hotel, suitable for the higher rank of tourists and equal to all the demands of the travelling public. The scheme is in the hands of the Board of Trade, who are energetically pushing the hotel to completion. Not that Nanaimo is without very fair hotel accommodation at the present time, as not a few of the score or so of licensed houses in the city are well kept and provide pleasant and convenient entertainment, and six of the leading hotels are commodious brick buildings. However, the addition of the new hotel is a foregone conclusion, and it will fill a useful place in the commercial and social life of the community without lessening the trade of the present hotels, but by the attraction of a greater influx of visitors will rather add to the prosperity of those who have vested interests in the hotel trade.

BRITISH COLUMBIA DIRECTORY.

The city is well provided with shops, stores and offices of the multifarious variety of a modern city, which are all doing a brisk business, particularly on the great pay-days of the mines, when large sums are put into circulation, aggregating nearly \$250,000 a month from all the industries tributary to the city. All wages are paid uniformly in hard cash, and with unflinching regularity and a large and healthy trade in the town is the result.

The city wharves are scenes of busy life: the daily discharge of eastern freight brought per steamer Cutch, via Vancouver; the San Francisco and Portland imports per steamers Empire and Michigan, and other calling steamers with the east coast steamer Isabel and the fleet of small steamers and sailing craft trading to the port, cause a lively traffic from the wharves to the city warehouses which is steadily increasing. Wharf extension is in contemplation, and is now pressing needed to meet the requirements of steamships and craft mentioned, besides the Fraser river trade carried on by the plucky company owning and running the City of Nanaimo between this port and Vancouver, New Westminster and lower Fraser ports. Return cargoes of mineral, lumber, quarried and measurement stone (of the famous Newcastle quarry) and general products are taken from Nanaimo in reciprocal trade, to a considerable extent, but as yet the balance of trade is against the coal city, whose capacity for absorbing colliery supplies and necessaries of life manufactured or produced in sufficient quantity by provincial manufactures and island farmers is of much larger volume than is commonly understood.

The local industries, other than coal, comprise the well appointed "Nanaimo Sawmill," of Mr. Andrew Haslam, whose recent enterprise in building at the Nanaimo ship-yard, the staunch powerful and swift steamer "Estelle", an achievement reflecting great credit upon Mr. Haslam for far seeing business tact and energy, and the steamer will undoubtedly prove a source of profitable income to its owner, as well as a useful addition to the steam fleet of the port. At the sawmill are steam factories for all sorts of wood-work, doors, sashes, etc., which are worked upon a large scale, and will in the near future find an outlet in exportation. The mill is fitted with the most improved patent saw and other machinery, and has been able to keep up with an extraordinary demand for the extensive building going on in the locality. The British Columbia Tanning Co., Limited, have established an extensive leather and shoe factory on the bank of the Millstream in the city. The factory is worked by steam power and is possessed of the most improved machinery and appliances. This industry has a great future before it and will yet justify its aspiring name under the able and practical directorate and management now in charge. The Nanaimo foundry of T. & N. W. Dobson, thoroughly experienced mechanical engineers and foundrymen, is furnished with appliances for producing castings of all kinds and the performance of engineer's and machinist's work. The workshops are being extended to make room for the growth of business, and being upon the water front are convenient for steamship work. The Nanaimo Machine Works of Mr. Robert Wenborn, are kept busy in the various branches of machine work, and are well adapted for first class-work. Almost adjoining are the electric light

works of Mr. Alexander Shaw, having dynamos equal to the lighting of the streets and buildings of the city in an efficient manner with Arc and incandescent lamps, and the supply of motors for ordinary purposes. The city is poled and wired throughout with heavy insulated electric conducting wires, many private houses are lighted by this means. The Municipal Corporation have, in addition to gas lamps, a number of Arc lamps lighted by the electric works. Not that the Nanaimo Gas Co's are in the shade, on the contrary the demand has so largely exceeded the Company's power to supply that an enlargement of the retort house and its appliances and of the gas holder has become needful and is being carried out under the resolution of the shareholders, who are confident of the soundness of their investment. The mains are laid along the leading streets and to the coal loading and town wharves add also to the Esplanade Shaft Works, where gas is used, to the exclusion of the old time fish-oil lamps. One of the most successful enterprises of the city is the Nanaimo Water Works Company, which has supplied the city with pure mountain water without a mishap for some years. The water mains are spread all over the city, and reach to the limits, so that for domestic and gardening purposes there is no want of this most necessary article of life at Nanaimo. The mains supply the shipping at all the wharves, and also the engines of the Esplanade Colliery, locomotives and workshops, and it is proposed to lay a main under the harbor to the New Vancouver Coal Co.'s mine on Protection Island, in order to ensure a permanent reservoir of water there. The waterworks are capable of almost indefinite expansion, and it is one of the most promising concerns on the Island.

There are several breweries, two are of brick, and of good architecture and fitted with modern machinery, viz: The Nanaimo Brewery, and The Union Brewery, both owned by joint stock companies, besides these are the Empire and Lansdowne Breweries, of fair pretensions, and all turning out large quantities of beer in bulk and family kegs and bottles, some of which is shipped up and down the coast.

The carriage, wheelwright and general smithing and farriery works of Mr. Ralph Craig, on Bastion, Street Bridge, are quite an extensive manufactory in themselves, and some of the best work in all branches is carried out. Steam power is used and many workmen are regularly employed. The old established shipsmith and general blacksmith, farriery and wheelwright shop of Messrs. Kenwick & Horne, on the city front, near the old Bastion, is equal to any emergencies that may arise in their line, and has produced some heavy mining and other machinery as well as fine work. The carriage works of McDonald & Andrews, recently erected on Chapel street, are roomy and replete with carriage work of fine grades as well as good wheelwright work in all branches, and carriage painting is a speciality.

Cigar, candy, soda water, clog, medicinal and other factories incidental to a progressive town are in a flourishing condition at Nanaimo.

A Co-operative store of the Nanaimo Equitable Pioneer Society, is conducted on the well-known principles of co-operation in trade, and is largely owned by members who are workmen in the city and district. A splendid

324

NANAIMO DESCRIPTIVE.

brick block has just been completed by the Society. At its first inception this "Co-operative Store," appeared to menace the well being of the traders of the city, but after several years of experience the course of trade has been found fairly equalized, as buyers will in the long run resort to the market most satisfactory to themselves, and there being no frienship in business; and while the Society carry on successfully a very extensive concern prosperously, on strictly co-operative principles, there is an abundance of trade outside their operations, for all comers.

Of public buildings, there are several of good pretensions. The post office and custom house, combined in a splendid three-storey stone building, that would do credit to a city many times the size. The court house, and public school houses, also the Nanaimo Public Hospital, are prominent buildings. Since the formation of a company of militia, a drill shed has become in demand, and will doubtless be erected by the Dominion, at an early date. The fire department has outgrown its present engine house, and the City Corporation intend to erect a fine brick building as an engine house that will do justice to the engines and apparatus in possession of the brigade, which meritoriously won and proudly holds the championship of the last Provincial tournament. There are several stations of the department in the city, and hydrants are placed at most serviceable points which are well served by the waterworks at a pressure sufficient to throw streams over all existing buildings, in a word Nanaimo is as well provided as any city of its size in the matter of fire department, engines—one a steamer of Merryweather make, hose reels and an abundance of hose, with a first rate water service.

The Municipal Council of the city consists of Mayor and nine Aldermen, three for each of the North, South and Middle Wards. The assessment of the real estate, (improvements not reckoned), foots up to \$1,110,264, values being stated on a liberal, moderate basis. During the past two years an expenditure of \$60,000 has been incurred by the Corporation in opening and grading some 5 or 6 miles of new streets, and in other city improvements. The city owns a valuable plot of land on which stands a City Hall, and Council Chambers, leaving plenty of spare space for further erections. The sanitary condition of the city is well looked after, and an exhaustive by-law is promptly applied in delinquent cases. A city licensed scavenger is authorized to remove all nuisances, and keep all premises clear. A system of drainage is under consideration, for which the situation and grades of the town site are extremely favourable. As well as grading the streets, miles of sidewalks have been laid, giving pedestrians a means of access to distant points in all weather. Under a special by-law a powerful steam rock crusher and steam drill will be set to work, and the city will enter upon an era of macadamized roadways, much needed where traffic is heaviest. Several of the public squares and the park have undergone improvement by grading and fencing, and an ornamental lake formed in the park. On Dallas square a handsome band stand is erected in compliment to and for the use of the Nanaimo Silver Cornet Band, whose summer afternoon performances have delighted crowds of citizens resorting thither for promenade. The band is

renowned for its skill and splendid equipment of instruments and uniform, it is a favourite institution of the city, which is justly proud of the "Nanaimo Band." Altogether the energy and administrative ability displayed by the Mayors and Councillors of the city and their excellent officers in pushing the city ahead so as to be abreast of the times, is worthy of commendation, and has won the confidence of the citizens at large, and it is apparent that no reasonable efforts will be wanting on the part of the Municipal authorities in the future administration of civic affairs to accomplish the advancement of the city, and as in the past, the hands of the city fathers for the time being will doubtless be strengthened by the support and assistance of Mr. S. M. Robins, the superintendent of the New Vancouver Coal Mining and Land Company, whose interests are so thoroughly identified with those of the citizens, and who so largely contribute to the revenue of the Corporation.

The real estate of the town in the hands of private owners, is well held and owing to the very liberal terms of payment given to the purchasers by the company, the change of ownership is infrequent, but values have legitimately increased tenfold during the past two years, which is a most satisfactory showing, as there has been no artificial "boom" at Nanaimo.

The educational advantages of the public school system of the Province are fully enjoyed by the citizens of Nanaimo, where there is a high school, which is successfully conducted by a first-class professor. Besides there are two large school houses for boys and girls respectively, and ward schools in convenient situations; all being in charge of able and popular teachers. The numbers of scholars in attendance at all the schools exceed the school accommodation so far as to necessitate the erection of new buildings, a duty that the trustees will not fail to perceive and perform.

The convent school of St. Ann affords a good means of education for young children, a large number of whom are entrusted to the sisters of that institution by parents desiring private tuition,

The convent is a three storey building with mansard roof, and is one of the principal buildings of the city. It is surrounded by extensive grounds. At the north side are the church of St. Peter and Young Men's Institute of the Roman Catholic Church.

There are two parishes of the Anglican Church, having the churches of St. Paul on the north side of the city and of St. Alban on the south, with school and mission house attached, while in connection with St. Paul's there is a fine Institute and a large roll of members. The hall of St. Paul's Institute is well provided with library, newspapers, piano, billiard table, stage or platform for entertainments, etc.

The Methodist church is an imposing edifice on the corner of Wallace and Franklyn streets, with lofty spire. A large piece of land adjoining is partly occupied by the parsonage, but there is space for school house and other buildings needed for church purposes, and several lots to spare.

The Presbyterian church, only lately erected, has already become too small for the large congregations that attend the services, and a new church is con-

NANAIMO DESCRIPTIVE.

templated, and something superior in architectural effect may be expected. The old church, as is the old Methodist church, is used as a ward school. The Presbyterian manse, built on the church ground, is a roomy and well built dwelling house.

The First Baptist church, on the hill formed by Winfield Crescent, is a prominent object from all points of view, and is a pretty building. It is lighted by electricity.

Other church buildings, are the Methodist church in South Haliburton and the St. Alban's Mission on Gillespie street, also the Indian Mission church (Anglican) at the reserve, connected with which is the Dominion Indian school, recently built and organized.

The Nanaimo Telephone Company has a long list of subscribers, and the wires extend to Wellington on the north, and as far as Cedar district on the south. The service and plant of the telephone company are in excellent working order and the operations of the company are conducted to the entire satisfaction of the public. The demand for the service is growing daily, and the financial success of the enterprise is assured.

The C. P. R. Co.'s telegraph is at the public command, and will shortly be extended to Comox and Alberni. The line is well patronized at Nanaimo, and only needs an addition to the staff of operators and extended hours to make the service equal to the public demands.

The Bank of British Columbia has a branch in a brick block on Front street, where a savings bank department is available for the people's savings.

It has been stated that the bank of Montreal will at an early date establish a branch in this city, and will build a suitable banking house.

The Dominion Post Office Savings Bank is also available, and has a considerable share of the deposits.

The Nanaimo Building Society and also a branch of an eastern building society have good membership in this city. By the help of these provident associations many houses have been put up that would otherwise have had to abide their time. As it is, Nanaimo is inadequately supplied with dwellings, and there is scope in this direction in connection with real estate sales, and of this real estate men and capitalists would do well to make note.

The Free Press newspaper and printing office, for many years proved equal to the local demand for news and controversial matters. Several attempts to run a second paper in the city have met with financial disaster.

The Chinese storekeepers and residents are located at a point entirely isolated from the dwellings of the citizens, and only laundries in the city are tenanted by Chinese. It has been several times proposed to start a steam laundry owned by customers and worked on co-operative plans, but as yet this industry awaits the organizer who has the ability and application to manage the undertaking.

The Young Men's Christian Association is well established in rooms with a gymnasium in the Oddfellows' block on Victoria Crescent, where the visitor

NANAIMO DESCRIPTIVE.

327

and stranger are ever welcome. The Y. M. C. A. intend to build premises that will be a credit to the city, and provide much needed extension of room.

The Masonic block on the corner of Skinner and Commercial streets, in the upper storey of which the lodge meets, has become valuable for business purposes, and it is stated a Masonic temple will be erected on the fine tract owned by the order on Front street, and formerly the site of the Methodist church. The Oddfellows' Hall in their block on Commercial street, near the north-east end of the long bridge, and the Forester's block, also containing their hall on the north-east corner of Bastion streets, and the Good Templar Hall on Grace street, are good buildings and evidence of the thrift of the Societies owning them. The orders of Workmen, Knights of Pythias, the Loyal Orange Society, and the Druids are at present using the halls of sister societies, but will in the near future become established in buildings of their own, and so add to the number of imposing blocks recently built in the city.

The present city hall is an old institution, where public meetings are held and the Salvation Army conducts its services; but the city is ripe for a new hall and civic buildings—another source of city embellishment.

Three or four livery stables furnish spick and span turnouts, and carriages, vehicles and sleighs are as well horsed as in any city in the Province.

The fine rural drives will repay those who undertake them, and for genuine sport in hunting and fishing the district around the city cannot be beaten.

A fine cricket ground, also used for football and baseball matches has been generously set apart by Mr. Robins for the reception of the young men who have formed clubs that have taken up the challenges of Victorians and Mainlanders, and fought many a hard battle for supremacy on the ground.

For boating, whether with sail or oar, the Nanaimo harbor offers scope for adventure, as well as smooth water for fine weather sailors—as many as a hundred boats have been seen on the water on a fine day. Two boat builders have large stocks of boats of every description for sale or hire.

The Nanaimo Opera House is a three-story brick, recently built, and provides a roomy and well arranged theatre, where most successful entertainments have been given by first-class artistes. It is a favorite place of resort. The upper stories are used for hotel purposes.

The climate of Nanaimo is remarkably mild at all seasons, and most salubrious, making the city a desirable place of residence for people of independent means and leisure for life's enjoyments.

Agricultural progress is being made by a persevering farming community around Nanaimo and on the adjacent islands, and the certain and remunerative market always found among a mining population is a sure stimulus to exertion that should eventually and rapidly build up a prosperous farming and horticultural district, mutually supporting and supported by the city.

Nanaimo is fortunate in having a Board of Trade alive to the interests of the city and its commerce, and has an excellent personnel of leading citizens and merchants.

NANAIMO DESCRIPTIVE.

Just on the eve of publication a passing notice of Nanaimo, from the pen of a prominent Eastern divine, appeared in a leading paper, from which it is felt pardonable to quote in aid of the attempt to do some measure of justice to the city in so limited a notice as our space affords: "Seventy miles north of Victoria, on the east side of the island of Vancouver and close down to the water's edge, stands the city of Nanaimo. The streets are laid out in a rather irregular kind of way. Whether the irregularity was caused by the nature of the ground on which the city is built, the site being a hillside, or by the eccentricity of the people who founded the city, I cannot say, but certainly the place is unique in its plan, or perhaps I should say, want of plan. The irregularity of the streets, however, does not interfere with business. Nanaimo is the coal city of the coast, and so excellent is the fuel found there that it overrides all fiscal laws and more than holds its own in the markets of San Francisco and other cities. The supply seems practically unlimited. The amount of money that changes hands seems fabulous to economical Eastern people, and one cannot resist the conclusion that some day Nanaimo may be the greatest money producing spot on the coast. The human family cannot do without fuel more than without food. Let any man look at the coal fields of Nanaimo and then at the wheat fields around Brandon and say if the Almighty has not given us one of the richest countries on earth. If Canadians cannot develop our resources and govern this splendid land honestly they deserve to be scourged. A nobler heritage was never given to any people. Canada was nothing compared with Canada."

There is a field at Nanaimo for the introduction of capital in the starting of industries for manufacture of articles of utility of many descriptions. There is an abundance of clay, and yet the brick fields are in their infancy; pottery and piping are in large demand, and as yet no pottery has been tried. Ship building, and especially the building of steam and electric launches and small craft has been neglected, although most eligible sites can be found for building slips along the city front, and lumber of approved quality is close at hand. The shipwright's branch of trade is one that ere long will take an important place at Nanaimo, and the first to enter the field will command the choice of site for his yard. A furniture factory has been projected, and in the hands of practical men, will prove a paying investment. There is room at Nanaimo for tailoring and shirt factories for the making of clothing now imported or brought from other cities. A match factory would find employment, and many other openings will suggest themselves to enterprising business men with capital. There is an extensive manufactory of the Hamilton Powder Company situated at a little distance northwesterly of the city limit, where a first-class article of blasting and sporting powder is made in large quantity, as well as giant and high-class explosives.

SOLICITOR.—Mr. C. H. Beevor Potts, a Barrister and Solicitor, has his office on Commercial street. He is recommended as a thoroughly reliable and competent lawyer, and worthy of every confidence. \*

VICTORIA CITY DESCRIPTIVE.

407

## VICTORIA.

For Population see Census, Page 89.

The capital of the Province, the seat of government and the headquarters of all the Dominion and local departments, including "C" battery of the Canadian Regiment of Artillery. It is beautifully situated on the extreme south-eastern extremity of Vancouver Island. The marine position of Victoria as a commercial centre and as a nucleus for foreign trade is extremely favorable, and the fact of its being the first available seaport north of San Francisco confers on it additional importance. The inner harbor of the city is completely landlocked, and gives accommodation to all vessels whose draught of water does not exceed eighteen feet. Larger vessels discharge at the outer wharf, and at Esquimalt, three miles distant, an extensive harbor capable of receiving vessels of the largest class. The universal verdict of travellers is, that Victoria is the most pleasant and delightful city on the Pacific coast. There are several which are larger, and are more noisy and bustling, exhibiting that genuine spirit of "rush" which is so dominant in the American character, but none so charming in all its adjuncts and surroundings, so pleasant as a place of residence, or so attractive to visitors. Not that there is less proportionate business transacted there, for an examination of her commercial enterprises will show them to be numerous and extensive, but there is a pleasant absence of that hurly-burly which attends the transaction of business on the American side. Though situated on an island Victoria has a central location. It is distant 38 miles from Port Townsend, 18 miles from Port Angeles, 100 miles from Seattle, 128 miles from Tacoma, 72 miles from Vancouver, 73 miles from New Westminster, 72 miles from Nanaimo and 750 miles from San Francisco. With these ports on Puget Sound there is communication twice a day, one steamer leaving every morning except Sunday at six o'clock, and another every evening except Saturday. The Canadian Pacific Navigation Company's palatial steamship Islander leaves every morning except Monday for Vancouver, connecting with the C. P. R., while various other steamers run to and fro at different times. Victoria is the distributing point for most of the wholesale trade of the Province, while all, or nearly all, the trading posts on Vancouver Island and the north-west coast of the mainland obtain their supplies here. The fur sealing trade, of British Columbia is almost entirely owned and controlled by Victoria capital and most of the vessels employed in the business are built here, winter here, and are fitted out from this port. This trade is one of the most important in the Province, as it requires very large capital to engage in it, and usually

### VICTORIA CITY DESCRIPTIVE.

yields large returns. Victoria is probably more affected by the "Behring Sea" difficulty than any other port in Canada, being the headquarters of the sealing fleet. This industry is largely increasing year by year, and during the past season a fleet of 41 vessels, representing a capital of \$400,000 in vessels and equipments, and a total crew of about 800 men were fitted out in Victoria alone, to hunt in the northern waters.

#### THE FACILITIES AND FINANCIAL CONDITION.

The city enjoys the fullest mail, telegraph and telephone facilities. The electric lighting is effectively done, and the planting of masts 100 to 150 feet high in prominent parts of the city, with powerful lights at their heads, is a novelty, but is also extremely beneficial and gives abundant light, covering a large area. The systems employed are the incandescent and the arc. There are within the city limits upwards of five miles of electric street railways and the system extended beyond has done much towards the advancement of the city, as it has made all points easy of access. The inauguration of this modern improvement is largely due to the energy of the Hon. D. W. Higgins, the president of the company. Property has largely increased in value along the line of the tramway, and residences being built further out of town. As showing the wonderful growth of the city, it may be mentioned that in 1881 the white population was 6,800, and the assessed valuation of property \$2,749,075. In 1891 the white population was 19,015 and the assessed valuation \$17,700,000, and when the new city limits are included, in 1892, the assessment will be increased by about \$7,000,000. The old city limits covered an area of about 1,800 acres, but during 1891 the limits were extended and now occupy an area of over 5,400 acres, or about  $8\frac{1}{2}$  square miles. The almost perfect sanitary system and the plentiful good water supply tend much toward the prevention and spread of sickness, and an extension of the sewerage system is now in course of construction, involving an expenditure of \$250,000. The financial condition of the corporation is sound and substantial. The assets, taken on a thoroughly commercial basis, are more than triple the liabilities; the burden of taxation is extremely light, being only one per cent. on the assessed value, the assessment being made on an extremely low basis. There is also a small indebtedness against the city, but the assets, by way of waterworks, municipal buildings and real estate alone are over double the amount. In addition to the daily service to the mainland by the fast and magnificent steamers, Victoria is connected with San Francisco, China and Japan by regular lines of steamships.

#### HEALTH OF THE CITY.

As a healthy resort Victoria stands pre-eminent on the whole Pacific coast, the death rate in 1890 being only twelve per thousand, and even these low figures are considered high. The health officer, Dr. Milne in his report for that year says: "It is gratifying to note, although we had a visitation of la grippe last winter, and the fact that the city has increased in a marked degree in population, there were only 24 interments more than last year, while of this number

a larger proportion than usual were from drowning and other accidents." The extraordinary low death rate may in a great measure be accounted for on account of the city occupying such a salubrious situation, and possessing as it does such a wonderfully fine climate. To this may be added the intelligent attention which is given to its sanitary, cleanly, and healthy condition.

### ROADS AND ATTRACTIONS.

The streets in the city are all well macadamized and are kept in excellent condition. Outside the city limits, the roads are equally good and furnish most excellent and charming drives, leading through lovely scenery, and to many elevated points, notably in the vicinity of the residence of the Lieut.-Governor, Blanchard avenue, head of Pandora avenue, Church hill, and from Mount Tommie, the eye is enchanted with the picturesqueness of the landscape, and the pretty houses embowered in ivy, honey-suckle, and other creeping plants and neatly trimmed lawns, from these eminences views of the straits of Fuca, and the snow capped Olympic range, on the one hand, vie in grandeur with the island dotted Gulf of Georgia and its back ground of Cascade mountains. To the tourist Victoria offers many attractions. The scenery is grand, the drives and resorts numerous, and among the many advantages she can boast of, not the least is that the sportsman can within easy distance from the city roam over undulating downs and grassy hills, enriched by the most romantic surroundings, and fill his bag with quail, snipe and grouse, or bring to the earth the bounding deer,—amongst other fish, the lively trout, and in the bays of the sea the wily salmon, with which the waters are at all seasons stored.

### CLIMATE.

The climate is all that could be desired, always cool and pleasant in summer, the evenings are somewhat chilly even then, but never cold in winter. The thermometer rarely falls below 16 degrees above zero. It is remarkably dry for this section of the country, the average rainfall only being about 34 inches. On no other point on the coast north of San Francisco is the rainfall so small. The air, however is sufficiently charged with moisture to prevent drought. The humidity of the atmosphere, and the mildness of the climate, modified and tempered as it is by the Japan currents, makes the vicinity of Victoria admirably adapted for

### FRUIT AND HORTICULTURE

and that it is the garden spot of Canada has never been appreciated or understood, even on seemingly poor and light soil fruits grow and yield the most magnificent returns. Pears for instance are generally supposed to require a heavy, rich, dark soil in order to obtain successful results, but here gravelly ridges, apparently worthless and possessing little or no nutrition, are capable of producing this fruit to perfection. Here where the land is directly affected by the sea breezes, where the atmosphere is humid and the climate genial, grapes can be raised in great abundance, especially the hardy varieties. Peaches,

VICTORIA CITY DESCRIPTIVE.

prunes, apricots, filberts and in fact any fruit grown in the temperate zone attain here their highest perfection, and some of the finest specimens exhibited at eastern fairs have been the production of this section of the country.

#### INDUSTRIES.

Among the the many industries of Victoria a few might be mentioned, particularly Messrs. Hall, Ross & Co.'s large roller flour mill in connection with their rice mills. The flour mills have a capacity of 200 barrels per day, and the rice mills about 20 tons per day. The wheat is partly raised in the interior, and partly in the neighbourhood. The rice is imported in the paddy from China, Japan and Siam, and is cleaned and made ready for market in the mills on Store street. The Albion Iron Works are the largest iron works on the coast north of San Francisco. They manufacture stoves and all manner of brass ware, besides engines of all descriptions and boiler making. Messrs. Spratt & Gray have a large foundry and machine works. The estate of Wilson Bros & Co., also do an extensive foundry business. There are two extensive furniture factories, besides several smaller establishments in the same line of business, and a large boot and shoe factory, shipping goods to the whole Province. Besides these industries, ship building, sash, door and lumber mills of all kinds, blacksmiths, farriers, an extensive blank book manufacturing, binding and rubber stamp making establishment, manufacturing jewellers, brick makers, marble works, breweries, a paper mill, and other manufactories and businesses too numerous to mention. (See biographical sketches.)

#### THE PRESS.

The press in Victoria is ably represented. There are two daily papers, each publishing a weekly edition. There is also one weekly commercial journal. The Colonist, the pioneer newspaper in the Province, having been established in 1858, issues every morning except Monday, and is in politics Conservative. It is one of the most complete establishments in Canada, occupying a handsome building on Government street, and does a large general job printing business and lithograph work of all kinds, especially the printing of hundreds of thousands of colored labels used by the salmon canneries of British Columbia. The Times issues every evening except Sunday. Established in 1884, it exhibits enterprise, neatness and good business ability in the management; its politics are Liberal. (See page 86.)

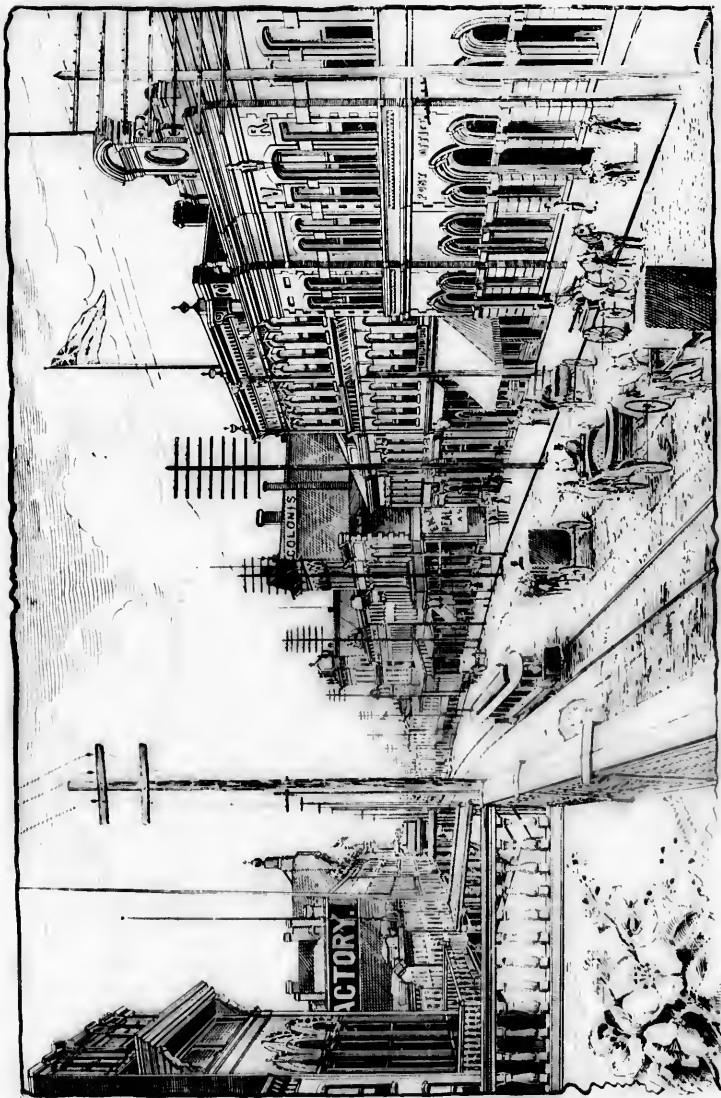

#### PROGRESS IN BUILDING.

The building industry has kept pace with the many other growing industries of the city. In 1883 building permits were granted to the value of \$400,000. During the intervening years it proportionally increased year by year, until in 1890 it reached the high figure of \$2,000,000, and during the past year an amount exceeding this considerably has been expended. Amongst the many buildings lately completed and in progress may be mentioned the magnificent Agricultural Hall, Rock Bay hotel; the extensive Five Sisters' block;

Williams' brick building, on Broad street; Jewell's four-story brick block; Wilson & Dalby's; the new City Market, to cost about \$110,000; the new Driard hotel; Garesche, Green & Co.'s bank; the magnificent Roman Catholic Cathedral, a composite of brick and stone; Collector Milne's new building; the magnificent Dallas hotel; new Gorge Road Methodist church; the Colonial Metropole, built by Thos. Tugwell; the handsome Janion hotel, on Store street; the New York hotel, on Yates street; the Pierre, Doane and Lange blocks on Douglas street are but an incomplete list of the many new brick, iron and stone buildings just completed, while mortar and brick and stone are laying on every street, showing plainly that in Victoria this is a building "age;" while the Church of England people are also taking active steps towards building a new cathedral, which will cost, it is estimated, in the neighborhood of \$200,000. The Methodist denomination have also completed a magnificent stone church, costing over \$80,000. Altogether, the city numbers over 4,000 buildings, consisting of wholesale and retail business blocks, hotels, warehouses, an opera house, churches and residences, many of them palatial in size and appearance. It is a source of satisfaction that while no undue real estate "boom" has landed in Victoria, at the same time a strong, healthy advance in property has been obtained, the increase of values in many cases 400 to 500 per cent., and the volume of business has been most satisfactory to our merchants, who enjoys the proud position of being the "gem" of this western portion of the Dominion of Canada.

### BOARD OF TRADE.

Although there is no Chamber of Commerce, Victoria has a living, active, influential and powerful Board of Trade, who are doing excellent work for the commerce of the city in fostering and encouraging its industries, and in guarding and protecting its rights and liberties. Their vigilance is ever watchful, and their promptness and energy in finding fresh fields of enterprise and new markets for their products are indefatigable and unceasing. Over 100 bankers, merchants, manufacturers, ship owners and professional men are enrolled as members, and they also prove their usefulness by working in harmony with the City Council, and are enabled to offer hints and suggestions to that body, calculated to promote the city's interests and public good. The most prejudiced mind must admit that the prospects for Victoria are very bright.

### EDUCATION.

Victoria is admirably provided with the best facilities for the proper and advanced education of the youth of the city. The Central and High schools—three in number—are located on a fine healthy site, surrounded by ten acres of tastefully arranged grounds, and, combined, form one of the finest educational institutions in the Province. The buildings, constructed of Victoria bricks, are all separate from each other, and are designed specially for the use intended, being bright and cheerful, well ventilated, possessing a perfect sanitary system and furnished with every necessary appliance for instruction. They comprise

VICTORIA CITY DESCRIPTIVE.

one high school for the advanced education of both boys and girls, one boys' graded school of eight divisions, and a girls' graded school of a similar number. There is also one graded school of three divisions in Victoria West and four ward schools in different parts of the city. At present there are about 2,000 pupils receiving instruction in these city schools alone, having a staff of thirty certified teachers, some of whom have graduated from colleges in Great Britain and Canada with high honors. The direct or detailed management of the city schools is under a board of seven trustees, three being appointed by the Government and four by the City Council. The salaries of the teachers are fixed by the Legislature and are very liberal. The total valuation of Victoria school properties, including land, buildings and equipment, stands on a moderate estimate at \$175,000. The basis upon which the educational superstructure of the Province is built is broad, liberal and non-sectarian, and the object of the Act is to set forth clearly and decisively: "To give to all children a thorough, pure and secular education." The curriculum or course of studies in the Victoria high schools is of a very high standard, and it is necessary for any pupil seeking admission into any Dominion university to satisfy the examiners that such candidate is proficient, not only in elementary subjects taught in lower forms, but also in higher mathematics, classics, including Greek, natural philosophy, chemistry, zoology, botany and astronomy, algebra, general history and literature, in which candidates to pass must obtain at least 40 per cent. of the required marks in each subject. This is the requirement laid down by the Education Board. The convocation, which consists of 127 members (see list of names of members in Provincial information), graduates of some of the best Canadian, English, Scotch and Irish colleges, residents in all parts of the Province, have under consideration securing a site of twenty-five acres, charmingly situated in one of Victoria's most salubrious and popular suburbs, overlooking the Straits of San Juan de Fuca, and in the near future suitable and complete university buildings will be erected.

**MANUFACTURING ADVANTAGES.**

As the manufacturing centre of British Columbia, Victoria not only claims to occupy the leading position, but justly deserves this rank. The many natural advantages which the city possesses—inducement and opportunities which are unequalled by any other city in the Dominion, and in addition a constantly increasing home demand—is by her admirable situation and unrivalled shipping facilities, in a position to reach the market of the entire world much more expeditiously and cheaply than almost any other point on the Pacific coast, a feature which cannot but invite the attention and command the consideration of all who may contemplate the erection of any industry—small or great—in this section of the country. So great are the advantages offered, so broad the field of operation, and so unlimited the resources upon which to draw, that the industries and manufactures of Victoria should be, and will be numbered by thousands instead of hundreds. South America, Australia, Japan, China, India

413

and Oceania are open for all, and in closer proximity to this city than any other north-western point. With the development and utilization of the inexhaustible iron resources abounding on Vancouver Island, it seems, in the condition of things to-day, but an idle tale to point out the grand opportunities and fields of operation which this single mineral affords, its vast deposits, and its unequalled purity, the abundance of timber for charcoal, limestone, and bituminous coal for coking purposes, and all that is now wanted to make pig iron, is will, brains and money. No better market can be found for these three commodities than at Victoria. What a revolution the first ton of pig iron would cause? It would be the harbinger of immense rolling mills, the supercedence of iron for wooden shipbuilding, the manufacture of steel rails, and even ordnance and armour plate might follow. Victoria is a wealthy place, people have become millionaires almost in spite of themselves, and would be ready to give substantial financial backing to this or any other enterprise calculated to encourage the growth and importance of the city and Province by the turning to profitable account her many natural resources. Hitherto two things have militated against these developments, the scarcity and dearness of labor and the sparseness of the population. But these conditions will right themselves in time. Already that great transcontinental line, the Canadian Pacific Railway, is reaching out its arms to every part of the Province. Other railroads are now projected, and will soon be built, and good wagon roads are being constantly constructed, furnishing means for rapid and cheap transportation, working even in advance of the usual pioneers, and opening up for settlement and the development of its vast resources, the richest country in the world, and seeking to make Victoria, what she is sure to become, the greatest centre on the Pacific coast for all kinds of manufactories and industrial enterprises.

**SOCIAL.**

As a truly social city, Victoria is almost alone on this coast. The chief aim of its business men being not solely the making of money, but a proper distribution of their time, between work and pleasure, office and home, commercial pursuits and social duties, and the obvious result is a people cheerful, intelligent courteous and genial, always ready to join in the refined pleasures and social requirements for which the city is noted, and as well prepared to sternly meet every emergency and vicissitude of life.

Wealth broadly speaking is not the line which separates its contented and prosperous inhabitants into groups and clans, and while there is a dividing line as there ever must be in cultivated society, it is not loudly proclaimed, nor visibly seen, being known more by intuition, and in consequence, acknowledged and felt as the only means whereby culture and refinement, intelligence and integrity are freed from the disregards and violations of social law, so often noticed in many new cities which are rising into prominence, and in which money, place, power and name are only thought of, and sought for. Here the foundation of society was firmly laid by the first English and Scotch settlers.

### VICTORIA CITY DESCRIPTIVE.

Traders then, in the early days of the country, they are now the leading commercial men and manufacturers of the city, whose worth and character are recognized by all. Men, who, while possessed of fortunes, make no vulgar display of their wealth. Quiet and unostentatious in manner, conservative in action and speech, retaining still the courtly grace and polish of the old school, they form an element highly respected, valued, and necessary to the solid reputation of the city.

#### RESORTS IN AND AROUND VICTORIA.

**Agricultural Grounds**—Situating near the Driving Park, in one of the principal avenues leading from the city to the romantic and picturesque shores of Cadboro bay, the electric street cars running directly to the grounds. A magnificent exposition building was erected last summer. Victoria with her characteristic enterprise and public-spiritedness, combined with the association in furnishing the necessary funds, and this structure is not only an ornament to the city, but of inestimable value to the entire Province. The main portion is 60x180 feet, with two projecting wings from the centre of 25 feet each, making the entire width 110 feet, 52 large plate windows extending from the floor to the roof, making it almost a crystal palace. The main roof is 56 feet high, surmounted by an octagonal tower, rising to a height of 140 feet, having an open cupola resting on a colonnade, which supports a flagstaff, making the total height 170 feet. At either end of the building is an ornamental colonnade cupola, giving the entire structure a very imposing appearance. Around the outer edge of the dome is an open balcony some 75 feet from the ground, from which a view of unsurpassable grandeur and loveliness is obtained, overlooking, as it does, a scenic picture unrivalled in natural charm and beauty. The ground floor of the main building contains 26,160 square feet. The entrances are at each end of the building through wide and lofty porte cocheres. From the centre of the main floor a handsome arcade rises to the galleries above, and forms an imposing feature of the interior decorations and finish. A magnificent ornate fountain beneath the arcade sends its curling spray amid rare exotic ferns and flowers, and adds life and brilliancy to the charming scene. The galleries, which contain 10,260 square feet of space, are used for lighter exhibits, and are reached by four wide staircases placed at the extreme corners, and from this elevated position a view of the entire main floor may be obtained.

**Beacon Hill Park**—Is the pride of the city, one of her chief ornaments and a bright jewel among the many which stud her crown of attractions. Lying to the south of the city, and overlooking the Straits of San Juan de Fuca, it commands from its highest point a view of surpassing grandeur many miles in extent. Inland, the mountains and valleys of Vancouver Island stretch out their varied vistas to the delighted vision,

VICTORIA CITY DESCRIPTIVE.

415

dotted with city, hamlet and farm, sparkling with lake, and fringed with the emerald of noble forest, presenting panoramas upon which no one can gaze without acknowledging its surpassing beauty. The park is the resort of the athletic and sport-loving people. Nestling at the base of the hill and amid groves of grand old oaks and firs, beautiful lakelets peep out from shaded corners, and cosy retreats invite the wanderer to repose. Scattered here and there in attractive quarters may be seen some of the native animals and birds of the country, from the shaggy bear and grim wolf to the gentle deer and timid hare. It is a breathing place, a spot in which to forget the outside world with its care and anxiety, its bustle and confusion, and to find amid its tranquil scenes the rest and solace which nature freely offers to all her worshipers.

**Clover Point**—Is the most southerly point and is only a short distance east of Beacon Hill. At the end of this point is the mouth of the great main sewer now under construction.

**Church Hill**—Where the present Church of England cathedral now stands, commands a fine view of the city. On this site a new edifice will be constructed, said to cost \$250,000.

**Douglas Monument**—Erected to the memory of the late Sir James Douglas, Governor of the colony, by the citizens of Victoria, among whom he was greatly respected and beloved. The site is a very beautiful one, situate in the grounds of the Provincial Government buildings on James Bay.

**Foul Bay**—Is situated at the south-eastern extension of the new city limits, and is a beautiful bay, however inaptly it may have been named. The drive there is charming, particularly the road passing Ross Bay Cemetery.

**Gorge**—Reached by a lovely drive from the city, is another of the many attractive spots frequented by residents and visitors. The name amply expresses the nature of this enchanting retreat, but conveys only a faint conception of its beauties and attractions, its romantic scenery and its picturesque surroundings. An extension of Victoria arm, from the harbor facing the city, it winds among the hills north of the town, the silvery waters nestling among bowers of evergreen, only ruffled by the gentle zephyrs which fan its placid surface, and lapping the moss-grown, rocky banks which live on its shores. No words can describe, no brush portray the beauties of this exquisite scene. Here and there, spreading out into miniature lakes, and again into gloom and shadow under the fringing headlands which tower above it then narrowing into a rushing torrent as it dashes through the closing defiles which seek to stay its progress, it is truly a scene of sylvan beauty, a retreat of quiet loveliness, a spot where health comes for the lingering, and recreation, for the

VICTORIA CITY DESCRIPTIVE.

simple acceptance of all it has to offer. Upon its liquid bosom dart the swift shells of the oarsmen, float the pleasure laden barge, and skim the white winged yacht. Upon its shores merry parties fill the dim old forests with shouts of joy and gladness, and gather the treasures of fern and flower, with which they abound.

**Holland Point**—Lies directly south of James Bay, and conveniently reached by the electric street railway and Dallas road, it commands a fine view of the entrance to the harbor.

**Indian Reserve**—Contains about 108 acres on the west side of the harbor and is connected with the city by two bridges, one being that of the E. & N. Railway, which has a swing to allow the passage of vessels. A large number of Indians are generally camped on this reserve, especially in the fall of the year, when they come to Victoria to make their purchases of supplies, and which amounts to a large sum of money.

**Laurel Point**—At the entrance of James Bay and on which is located the large furniture manufactory of Sehl & Co.

**Outer Wharf**—Is situated at the entrance to the harbor and affords a landing place at all stages of the tide for the largest vessels afloat. Mr. R. P. Rithet, one of Victoria's most enterprising citizens, owns the wharf, and is now having constructed a large breakwater and extension to this dock, which, when completed, will very materially increase shipping accommodations. The Pacific Coast Steamship Co.'s steamers call here twice every five days on their way to and from San Francisco, and arrangements have been made for the C. P. R. company's and the Upton China lines of steamers to call here each way, the latter making this their terminal point.

**Old Cemetery**—Is between Quadra and Vancouver streets, now never used for burial purposes, the new cemetery being at Ross bay. The first burying ground in Victoria was a small town lot, 60x120, at the corner of Johnson and Douglas streets, now the business centre of the city.

**Ross Bay**—Fronting on this bay is the new and beautiful cemetery above referred to, which will amply repay visiting.

**Rock Bay and Esquimalt Road**—Is at the north end of the city and is crossed by a long bridge over which the electric railway cars run to Esquimalt, which is reached in about fifteen minutes from the post office, Victoria, the distance about three and one-half miles; it lies on a peninsular separating the harbor from the Royal Roads. Its superior facilities caused the British Admiralty to select it for a naval station many years ago. Here are also an arsenal, where large quantities of naval and ordnance supplies are stored, a naval hospital, a dock yard and powder magazine. The Dominion Government have built an immense

dry dock, sufficiently large to admit of any of Her Majesty's ships of war being docked therein. Its dimensions are, length, 400 feet; depth, 26 feet; width of entrance, 90 feet. It is substantially built of concrete, faced with sandstone, at an expenditure of nearly \$1,000,000. At Rock Bay are the Rock Bay saw mills the largest excepting the Victoria Co.'s. at Chemainus, on Vancouver Island, they have a capacity of 65,000 feet of lumber per day, besides 25,000 lath. These mills cover a large area, and are fitted up with all the latest and most improved machinery, having also in connection two completely equipped planing mills. Two engines 16x18 and 20x24 with three 24 feet boilers, each containing five 9-inch flues—furnish the motive and generating power, sawdust alone being used as fuel, which is also supplied to the Electric Tramway Company, on the opposite side of Constance street. The refuse is burned in the immense furnace attached to the mills, while the slabs, which in so many mills are similarly disposed of, find a ready sale in the suburbs and outlying districts. These mills, together with the lumber camps and steamer "Hope" give employment to over 150 hands.

**Royal Jubilee Hospital.**—This noble institution, supported by the benevolence and charity of the city, entered upon its career of mercy, May 22, 1890, when it was formally opened by H.R.H. the Duke of Connaught, during the visit of the Royal party here, and is one of the gifts in honor of Her Majesty's jubilee year from the citizens of Victoria. Its total cost was something over \$55,000 exclusive of the handsome grounds upon which it is located, which amount was raised partly by private subscription, supplemented by a grant of \$20,000 from the local government, and to-day stands as a monument to the beneficence of its founders and a credit to the city. The electric railway runs past the hospital grounds on the Cadboro Bay road, which by its picturesque surroundings, has grown largely in favor, and is fast becoming one of the popular residential portions of the city.

**CANADIAN PACIFIC NAVIGATION CO., Limited.**

This Company was incorporated in the spring of 1883, and commenced business with the steamers "Princess Louise," "Enterprise," "Otter," "R. P. Rithet," "William Irving," and "Reliance." Shortly afterward the steamers "Western Slope" and "Gertrude" were purchased, and in July of the same year, the fast and commodious steamer "Yosemite" was added to the fleet, which has since been increased by the purchase or building of the following steamers and steamships, viz: "Wilson G. Hunt," "Maude," "Premier," "Sardonyx," "Islander" and "Danube," thus placing the company in a position to transact any business in connection with water transportation that the public may demand, and offering superior inducements for the public patronage, by the number of steamers being a guarantee to fulfil any undertaking in the water transportation of British Columbia.

### VICTORIA CITY DESCRIPTIVE.

Daily trips are made between Victoria and Vancouver, connecting with Bellingham Bay and British Columbia R. R. for Puget Sound ports, tri-weekly trips between Victoria and New Westminster, there connecting each trip, during river navigation, with river steamers of the same company, for Hope, Popeum, Sumas, Chilliwack, Langley and way landings on Fraser river; semi-monthly trips to Fort Simpson, Metlahkatla, Skeena River, Bella Bella, Alert Bay and intermediate ports on the Northern coast, which, when inducements are offered, are extended to ports on the West coast and those of Queen Charlotte Islands, carrying Her Majesty's mails over these various routes

Regular monthly trips are made to Alberni and ports on Barclay Sound. Trips are also made to Butte Inlet and other points, as occasion requires.

During the tourist season of 1892, trips will be extended to Alaska.

This company has been since its inauguration under the able management of Captain John Irving. The Board of Directors are :

T. R. Smith (President), Sir J. W. Trutch, Thos. Earle, Esq., M. P., R. P. Rithet, Esq., Capt. John Irving (Manager), and Messrs. F. W. Vincent, G. A. Carleton and C. S. Baxter fill the positions of Assistant Manager, General Freight Agent and General Passenger Agent

The general offices of the Company are at No. 64 Wharf street, being adjacent to their wharves and warehouses.

### B. C. BOARD OF TRADE.

Office, Bank Building, Government street. Annual election of officers, first Friday in July. OFFICERS, 1891-92—Thomas B. Hall, President; A. C. Flumerfelt, Vice-President; F. Elworthy, Secretary. ## ALBION IRON WORKS CO., L'd, Victoria, B. C.

Make a speciality of Heavy Forgings, Brass and Iron Castings, Steel Girders, &c.

426

VICTORIA CITY STREET DIRECTORY.

The amount of hay or straw permitted to be stored for every livery stable and hack stable must not exceed fifteen tons. For storage or sale, fifteen tons, for private consumption, two tons.

### Fire Alarm Directions.

Obtain key at the nearest house to Alarm Box.

Open outer door of Box. PULL DOWN BRASS HOOK ONCE ONLY AND LET GO. (Brass Hook is plainly in sight projecting from inner door.)

Remain at Box and direct firemen to the fire.

Never turn in an alarm for a fire seen at a distance, unless sure that firemen pass the Box on the way to the fire.

Failing to hear firebells immediately after pulling brass hook, telephone No. 538 or No. 539. Key will remain in box.

777

# VANCOUVER.

\*For Population See Page 89.

Compiled from the last annual report of A. H. B. Macgowan, Esq, Sec'y to Vancouver Board of Trade, with corrections to date :

**Vancouver City Assessment for 1891.**—The very competent City Treasurer, Mr. Baldwin, completed his work as Assessor, and his returns show these figures, viz :

Against, for 1890, \$9,517,280. Increase \$2,460,095.

**Streets.**—Graded, 59.35 miles; Planked, 6.30 miles; Gravelled, 1095 miles; Sidewalks, 46.35 miles. Sewers laid ab ut 7 miles.

**Schools.**—1 High School, 1 teacher; others, 4 buildings (2 brick, 2 wood), occupied at present by 21 teachers.

A very fine collegiate school has just been opened by Chas Whetham, Esq., which will supply a long felt want in the Province.

**Water Supply.**—Continues to be abundant and of a first-class quality, giving general satisfaction.

**Weather Report.**—Mr. William Pickering of this city has favored the News-Advertiser with the following record, kept by him, of the weather in Vancouver, during the year 1890.

1890.	Partially.				
	Snow.	Wet.	Wet.	Dull.	Fine.
	13	27	92	61	172

In the year 1889 there were only 6 days on which snow fell and 205 fine days: in 1888 there were 3 days on which snow fell and 195 fine days.

**Health Inspectors Report.**—The Health Inspector reported as follows: I have to congratulate you on the entire freedom from contagious disease of this city during the year just closed and the absence of any epidemic. The general health of the city has been remarkably good, while showing a remarkable decrease in the death rate of former years in proportion to the increase of our population, also proves conclusively that the huge outlay which the city has been put to in the construction of sewers and the extension of surface drainage is now bearing fruit in a manner gratifying not only to those inaugurat-

\* The census taken by directory enumerators during the latter part of November, gave the city a population of 17,368.

VANCOUVER CITY DESCRIPTIVE.

ing those improvements, but to the citizens at large, who, from a sanitary standpoint, are now reaping the benefit therefrom. You will find cause for congratulation in the fact that Vancouver stands to-day the healthiest city on the continent of America, as proven by the extraordinarily low death rate of  $7\frac{1}{2}$  per 1,000 in a population estimated at 16,000; or deducting from the list of deaths those dying by accident, suicide or murder, we have a total death rate from natural causes for the year 1890 of 95 only, which gives a death rate of only 5 15-16 per thousand, a rate hitherto unheard of in mortuary tables. The city of Pullman, Ill., noted as a model of sanitation, gives a death rate of  $7\frac{1}{2}$  per thousand. Trusting the foregoing will be deemed satisfactory, I close with the assurance that with the further extension of drainage carried out as now proposed, the introduction during the year of the system of scavenging adopted by last council and a further extension of the water service to those parts of the city not now supplied with pure water, a further reduction in the death rate may be anticipated with a consequent rise in the scale of healthfulness of Vancouver.

JOSEPH HUNTLEY,

Health Inspector

December, 1887, 738.92; 1888, \$1,543.75; 1889, \$752.50; 1890, \$3,926.50. The figures for last six months include the receipts for the Inland Revenue Division of Vancouver, which covers the whole Mainland.

**Sugar Refinery.**—Chief among the new industries of Vancouver is the Sugar Refinery of the British Columbia Sugar Refining Company (Limited). The only establishment of the kind in Western Canada, it will properly command not only the trade of this Province, but that of Manitoba and the Northwest Territories. The full capacity of the refinery is 200 barrels per day.

The first foundation stone was laid July 8th, 1890, and the building was finished and the machine y in working order on January 21st, 1891. The rapidity with which the work of preparation and building were carried out and the completeness of the equipment when finished, reflecting the greatest credit upon the executive ability of the practical and energetic manager, Mr. B. T. Rogers.

The barrels are furnished from the cooerage of Mr. Eastman, situated near the refinery.

**Shipping.**—The following is a list of steamers owned here as near as could be gathered at the time of writing, with tonnage and owner: Active, 200, R. C. P. Mills Co.; Agnes, 30, Capt. Babington; Alpha, 40, Imperial Steamship Co.; Bella, 45, Hastings Sawmill Co.; Clyde, 40, Capt. Hawes; Cutch, 400, Union Steamship Co.; Earl, 49, D. McGilveray; Ezerman, 8, J. Williams; Etta White, 60, Moodyville Mill Co.; Gypsy, 12, Hastings Mill Co.; Leonora, 16, Union Steamship Co.; Mamic, 70, Leamy & Kyle; Mermaid, 53, Alexander & Co.; Millie, 8, Fader Bros.; Nagasaki, 12, Capt. Steves; Pearl, 20, Imperial Steamship Co.; Rustler, 40, H. R. Morse; Senator, 18, Union Steamship Co.; Skidegate, 28, Union Steamship Co.; Stella, 12, Hastings Mill Co.; Spratts Ark, 307, Hugh F. Keefer; Swan, 10, Capt. R. Couth; Tepic, 65, Evans, Coleman & Evans; Vancouver, 40, Capt. R. Couth; Velos, 49, C. W. Murray & Co.

The Union Steamship Company have now preparing in Scotland three steamers of dead-weight capacity of 350 tons each, average speed to be nine knots. These steamers will be imported in sections and put together here.

**Ship Building.**—In the yards on False creek are found a goodly number of busy mechanics plying their occupation as ship carpenters—quite a new line of industry for the Terminal City. The present engagements of these yards are:

VANCOUVER CITY DESCRIPTIVE.

Four schooners, 80 to 100 tons each, intended for sealing and fishing purposes.

One steamer, for Capt. Rogers, of the steamer Robert Dunsmuir. She is to be some 155 feet long, and it is predicted that it will be a good one that will cut the water fast.

There are tenders called for four or five other schooners, so that the sound of axe, adze and hammer will be heard for some time with present undertakings, even in this, the commencement of what must go on to be an immense line of business.

**Woodwork and Lumbering.**—It will be seen from the following figures that lumbering continues to be a leading industry of our city. The eleven mills most closely connected with Vancouver have a daily capacity of about 700,000, or over 200,000,000 per year.

The Hastings saw mill, the largest on the Inlet, having now a capacity of some 90,000,000 feet per annum, has, owing to the extensive alterations and repairs being made to it, been in active operation only about six months of this year. It is among the most complete mills on the coast in point of facilities for cutting and shipping. It is lighted by incandescent electric lamps, the power being supplied by special plant on the premises. The following is a statement of the company's business during the portion of the year it has been in operation: Lumber produced, 14,600,000 superficial feet; value, \$175,000. Lumber shipped, foreign, by sea, superficial feet, 10,699,000 rough, 544,000 dressed, 107,600 pickets, 17,020 laths, bundles. Lumber shipped east by rail, superficial feet, 407,000 rough, 23,300 dressed. Lumber sold, local, superficial feet, 1,953,000 rough, 388,000 dressed, 3,106 laths, bundles. Totals, superficial feet, rough, 13,059,000; dressed, 955,300; pickets, 107,000; laths, bundles, 20,108. Sailing vessels loaded, 14; tonnage, 16,861. Number of men employed at mill, 150; number of men employed at logging camps, 150; wages, \$150,000. Number of cattle and horses employed at logging camps, 70, and one locomotive. Two steamers, towing ships, logs, etc., and employing 15 to 10 men. Stevedores and logshoremen, 25 to 30. One of the shipments for the year was three pieces, each 60 feet long by 3 feet square, containing 6,480 feet, board measure, each. They went to Montreal.

The Moodyville saw mill, which has been running steadily throughout the year, has, during the twelve months, made some important improvements in the way of machinery, and is now in a position, when running to the full extent of its capacity, to cut over 70,000,000 feet per annum. This mill, the oldest on the Inlet, has the best facilities for producing and shipping lumber, and its trade, both foreign and domestic, is rapidly increasing. The following is a statement of the business done last year: Amount of lumber manufactured, 18,554,738 feet. Value, \$213,695. Shipped foreign, 16,117,443 rough lumber; 800,000 dressed; 18,486 bundles laths; 81,200 feet pickets. Nineteen vessels; tonnage, 20,865. Shipped local, rough lumber, 1,327,295 feet; dressed, 350,000 feet; laths, bundles, 4,000; 172 knees. One hundred men employed

at the mill. Seventy-five men employed at logging camps. Amount of wages paid monthly, \$6,000. One store at mill; 10 men employed; wages, \$600 per month. Fifty men employed as longshoremen. Ten yoke of oxen employed at the present time in the three camps working.

The above two mills, up to the present, do the principal part of foreign lumber shipping of the port, during the year 1890 making shipments to Australia, Apia, Adelaide, Callao, Delemane, N. S., London, Falmouth, Melbourne, Port Perie, Queenstown, Valparaiso, Sydney, Shanghai.

**British Columbia Lumber.**—The Canadian Review, in reviewing the lumber trade for the past year, says: "Advices from British Columbia state that the capacity of the mills of that Province is being taxed to the utmost in supplying the rapidly increasing demand for Douglas fir, which is being transported to Australia, China and South America."

Two sticks sawed at Burrard Inlet, and used on the Montreal harbor improvements, are said to have been the largest ever transported through Canada by rail. Both were the same size, and measured 60 feet in length and 3 feet square, containing 6,480 feet each, their combined weight being a fraction over twenty-five and a half tons. Owing to the high cost of transporting such large timber by rail, it is expected that cargoes for the Eastern States and Canada will go by vessel via Cape Horn.

The first shipment of lumber, consisting of seven carloads, from British Columbia market, passed through Canada last week via the Canadian Pacific railway.

A new departure in exporting lumber has been made at Vancouver. The ship Titian has loaded at the Hastings mill a lumber cargo for Wilmington, Delaware. This is the first British Columbian lumber ever shipped to an American port on the Atlantic seaboard, and as it is for use in the U. S. navy yard, it will be seen that the quality of British Columbia timber is appreciated by the Government of the United States. In fact, the decision of the management of the Mare Island navy yard was that British Columbia timber for masts, spars, etc., could not be surpassed in excellence, while Washington timber was refused. The export duty on lumber for the United States having been reduced, it is thought that a large and profitable trade to the eastern coast of the American continent can be established, and the Titian will only be the first in a procession of lumber-laden ships towards the same destination.

The Royal City Planing Mills Company, on False Creek, has, during the year, made many important improvements and additions to its institutions. Among them are: In machinery, a sander for polishing; a relisher and a wedge cutter; a pulley morticer; a planer and two shaving exhaust valves, costing in all about \$3,600. They have also added to their buildings a standard hot blast dry kiln, the only one in the province, and two other kilns, at an outlay of \$6,000. A refuse burner is another convenience which they have built at a cost of \$10,000. Besides rough and dressed lumber, for which they find a market in China, Japan, the Northwest Territories, the eastern provinces and the local trade for all they can produce, this company does a large

VANCOUVER CITY DESCRIPTIVE:

local business in manufactured goods, such as doors, windows and house furnishings. Exhibits from this department of their business carried off the silver medal against the Dominion at the last industrial exhibition held at Toronto. Their pay sheet per month is \$4,000; number of men employed, 100; amount of rough lumber manufactured during the year, 8,660,000 feet; amount of dressed lumber manufactured during the year, 4,340,000 feet; total quantity, 13,000,000 feet.

The Vancouver Saw Mill Company, situated on Burrard Inlet, is being fitted up by the present management with a view to shipping by water. The consequence has been that the mill has not been in operation for more than a few months. It is expected that after the improvements have been made that the mill will have a capacity of 45,000,000 feet per year. During the time the mill was in operation during the past year 5,000,000 feet were produced. Of this there was shipped to Sydney, Australia, 850,000 feet, and to the Northwest Territories, by rail, 200,000 feet. The balance of the quantity manufactured was either sold to the local trade or is now in stock. Fifty men were employed, and the pay roll was \$2,000 per month.

Geo. Cassady & Co.'s door and sash factory on False Creek, does a large local business in the manufacture of mouldings, house furnishing, doors and sashes, and also in cedar shingles. They employ about 40 men, many skilled mechanics. For the manufacture of their doors and sashes they cut their own lumber. A large percentage of their mouldings are made from California redwood, which they import specially for that purpose. In addition to their sash and door business this firm manufactures yearly about 5,000,000 shingles, 75 per cent. of which are sent to the Northwest Territories and Manitoba.

The Commercial Mills on False Creek, have during the past year done a large business, both in rough and dressed lumber. The mills have a capacity of 50,000 feet per day and have been running steadily. The market for their product is Victoria, New Westminster and local points. The firm, Messrs. Leamy & Kyle, also do a considerable business in building steamers, scows and schooners. During the year considerable new machinery has been added, and several buildings. The employees, including those at the logging camp, number 70 men.

Messrs. Slater & Co.'s mill on False Creek, at the foot of Cambie street, has a market for its production both in the East and the United States, as well as in this Province. The Company turns out a large quantity annually, and during the past year has enlarged its business connections and greatly increased its trade.

Mr. Ernest Buse has a fine mill on Burrard Inlet, near Hastings. Capacity, 27,000, with intention of doubling this during present spring. Makes a specialty of cedar for factory work. Has a complete outfit for planing, matching, moulding, etc., etc., and general house finishing work. His market has been local and with the interior, but with proposed increase in capacity, an export trade is anticipated.

VANCOUVER CITY DESCRIPTIVE.

783

The North Pacific Lumber Co., a branch of the MacLaren-Ross Co., have a splendid mill at Barnet, on Burrard Inlet, with a capacity of 100,000 daily, principally for export trade.

The Port Moody Milling Co. added a large amount of machinery to their mill during the past year. Among the other improvements in this line was an engine, a boiler, and a moulding machine, the latter the only one of its kind in British Columbia, and of most perfect make. During the year the mill produced about 4,000,000 feet of lumber which was consumed entirely by the local trade.

H. R. Morse & Co.'s mill, on False Creek, has a capacity of about 30,000 000 per year, and they ship to almost every market, by water and rail, as well as supplying a large portion of the local trade. This firm purchased this mill from Fader Bros. during the year, and placed the business on a solid foundation. In connection with this mill is a large sash and door factory. This firm is at present building a tug boat for their increasing business, their foreign shipments being per Augusta, for Valparaiso, 512,652 rough, 116,821 dressed lumber; per Hamburg for Callao, 1,186,284 rough, 179,931 dressed lumber.

The Vancouver Manufacturing and Trading Co. (Limited), has an extensive plant, occupying about 6½ acres of land on False Creek at the foot of Granville street, and comprising saw and planing mills, with a factory for the manufacture of pails, tubs and barrels, by the latest improved American machines. The furniture factory is fitted up with the best machinery obtainable for the manufacture of all classes of office and household furniture, including mattresses, bedding and upholstered goods; also chairs of all descriptions, washing machines, butter workers, brick barrows, dry earth closets and special ices. The door and sash factory is provided with the newest and best Canadian and American machinery, and additional buildings are in course of erection for its accommodation. The company also manufactures and deals in hardwood, rough and dressed lumber, clear cedar lumber for factory use, shingles, flooring, rustic mouldings, balusters, newel posts, etc., also mantels, doors, sashes, &c. About 35 hands are employed. The capital stock of the Company is \$100,000.

Of other extensive wood-working establishments we find the following, viz: The extensive furniture factory of F W Hart, whose works have been referred to in previous issues of this Board. As the town advances so does Mr. Hart's business, and also the pay list of his employees.

Messrs. Irving & Strahan have also increased the power and the number of employees. Wood turning, planing, jig saw work, house furnishing, etc., being their specialty.

**Foundries.**—The Vancouver Foundry and Machine Works Company (Limited), has been fully occupied during the year, and has found employment for about 55 men. The value of the work turned out exceeds \$100,000, and the prospects for 1891 are excellent. During the year the Company has doubled the size of its foundry, and improved its facilities in other directions.

## ALBION IRON WORKS, CO., L'd, Victoria, B. C.

The only Manufacturers in the Province of French Ranges, Cooking Stoves, Heaters, Parlor Grates & Fenders

### VANCOUVER CITY DESCRIPTIVE.

The Directors have now under consideration a scheme for largely extending the capacity of the works, and it is also intended to build a shipway for convenience in repairing vessels. The Company is prepared to undertake any class of work in engines, boilers, etc.

**B. C. Iron Works.**—Among the new institutions in active operation is the British Columbia Iron Works, recently incorporated. This company has a paid-up capital of \$30,000, and has leased an excellent site for its works on Powell street, and one possessing good water frontage. The company began building their workshops last Autumn, and now occupy and have them in full running order. They will pay special attention to the manufacture of milling, marine and mining machinery, and have engaged a good staff of skilled mechanics from the East.

**Sundries.**—C. H. Strutt & Co., Tanners and Curriers, have a capacity of eight packs of leather a month; employ 4 men; and manufacture harness leather, bridle leather, saddle leather, tan leather, wax calf, grain calf, wax upper, grain upper, wax kips, russett kips welt, leather end buckakin, also tan and dress leather of all descriptions. All the work is done by steam and on the latest principles of tanning.

The B. C. Fruit, Canning and Coffee Company are meeting with great encouragement, and it is gratifying to find on sale in most of our leading grocery stores the jams, canned fruits and coffee of this local firm.

The Vancouver Candy Company are coming to the front rapidly; they make a superior article of confectionery and are finding a ready sale for the same.

The Dawson Baking Powder Co. is achieving marked success.

**Woolen Mill Proposed.**—The World has been favored with an advance copy of the prospectus of a company now in process of organization which will do considerable toward building up the city of Vancouver. It is proposed to form a company of local parties with capital stock of \$100,000 in shares of \$100 each to enter into the manufacture of woolen goods, including chiefly flannels and tweeds with carpets to be added eventually. Employment would be given to a large number of men. The project is meeting with great favor with the leading men of the city and matters will be in shape for the company to consider the question of building. Machinery will be imported from England, and a gentleman with a thorough knowledge of the Huddersfield woolen business engaged as manager.

For the encouragement of those considering the advisability of establishing factories or industries here it is pleasing to note that our people almost immediately give the local manufacturer the preference. In no place has this been more fully realized than in British Columbia.

**Vancouver Dry Dock.**—On the 22nd January the ratepayers of Vancouver voted upon and carried a by-law granting a bonus of \$100,000 to an English company undertaking the building of a dry dock in Vancouver. The dock when finished will be one of the largest in the world. It will have no

**Buildings.**—Considering that the two years previous to 1891 so much  
building was done in Vancouver the results for the year have been most satis-  
factory.

Some four hundred residences have been erected, and amongst the fine  
business blocks that appear as results of the year, might be cited: The splen-  
did Building recently built and occupied by the Bank of British Columbia,  
the Metrople Hotel, corner of Cordova and Abbott streets; the Dougall House,  
corner of Cordova and Abbott streets; the Major Block, on Water street; the  
Gold Block, on Water street, and the Callister Block, on Cordova street, all  
have handsome and substantial piles of stone and brick. To fully enumerate the  
improvements in this line would take more space than at this time of writing  
can be given, sufficient to say, that the skilled workmen have been kept pretty  
fully occupied.

1892 will witness the following additions: A station house for the Canadian  
Pacific Railway Co. A new Post Office and Custom House. Large additions  
to Hotel Vancouver. A splendid new Bank of British North America Building.  
All of which promise to be fully equal to the rapidly growing necessities of  
the Town.

Amongst the industries brought into operation during 1891, are the Sugar  
Refinery, capacity, 200 bls per day, built capable of extensions and supporting  
a cooperage near at hand. The B. C. Iron Works—an extensive Foundry,

## VANCOUVER CITY DESCRIPTIVE.

**Boiler and Machine establishment.** Four Ship Yards are in operation, one for iron, the others for wooden vessels; a number of steamers and sailing vessels have been turned out and others are building. Capitalists with headquarters here for B. C., have secured a controlling interest in a number of the world-renowned Salmon Canneries of the Fraser River, thus making this place to a great extent, a centre of trade for this industry. A number of large Eastern manufacturing concerns have also opened branch offices and warehouses here.

An Electrical Tramway now connects New Westminster with Vancouver.

The above figures are connected with a youthful city, yet one so well known as to render it almost unnecessary to note that it is situated on the north shore of Burrard Inlet (which makes its harbor) and a magnificent harbor it is, a splendid, almost land-locked sheet of water, some twenty miles long, by one to three miles wide, capable of safely accommodating the navies of the world, and on which ice is unknown.

Nature having provided one of the finest imaginable harbors and one of the most suitable sites for a great city, the Canadian Pacific Railway Company naturally adopted the position as the terminus of their extensive line, which now makes part of the great rapid transit route between Great Britain and the Orient. This action on the part of an immense corporation, the extent of whose connections closely identifies them with the best interests of the British Empire, at once made the promises of future greatness for Vancouver City beyond the doubtful stage.

In 1886 great things were expected for this Pacific coast town, and these expectations are being realized, as shown to some extent by the following figures:

Increase in duties collected .....	70 per cent
"    "    total revenue .....	57 per cent
"    "    sales of postage stamps .....	25 per cent

in each for twelve months ending 30th June, 1891.

The ordinary observer can readily see at a glance that this rapid advancement in Vancouver has been brought about by natural location as a connecting link between railways and shipping, admirably adaptable as the leading receiving and distributing point of a province possessed of immense resources in mineral, piscal, agricultural and arboreal wealth. By its mild, equable and most healthful climate and by its rapidly increasing population, being an energetic, hard working, thrifty, law-abiding class.

At the writing, reports from the mineral sections point to the excitement of early days in British Columbia being repeated in the near future, and just so sure as this comes about Vancouver will, by her favorable position, reap her full share of the advantage.

Of some forty saw mills in the Province, a dozen or more are tributary to Vancouver, their shipments to foreign places bring ships of many different nations to its harbor. The immense forests of our country guarantee a continuation of this.

## VANCOUVER CITY DESCRIPTIVE.

787

Unlimited fishery grounds contiguous to Vancouver abounding with wealth await intelligent attention to make them a great stimulus to the trade of the city.

A grand climate, most productive soil, good prices and a rapidly increasing population in other lines guarantee the agriculturist a good return for his investment and labor—particularly in small farms and market gardens near to Vancouver.

The residents believing in a national policy are anxious to have industries, and our manufacturers often find an early extension necessary to their factories, a case in point being the sugar refinery which commenced operations early in 1891. Others have had to increase their capacity, such as foundries, furniture factories, breweries, lime kilns, brickyards, cigar factories, &c., &c., might be noticed at length did space permit. Suffice it to note that we have a considerable number of flourishing industries in our midst, yet there is room for more.

Being the objective point of about all the lines of transcontinental railways and of many Pacific ocean steamship lines, Vancouver's anticipations are by no means small. Prospective connections being as follows: Direct steamship line with Australia. Direct steamship line with Alaska. Considerable additions to our local coasting fleet and improvements on those now employed. A railroad along the North Arm of the Fraser river between New Westminster and Vancouver reducing the time between these points very materially. Railway and bridge or railway ferry to Ladner's Landing and southeast from there, directly connecting Vancouver with an immense farming section and with a system of railways south of it. An electric tramway to Lulu Island. Vancouver's connections with the outside world and the different points in the Province may be summed up in part as follows: The Canadian Pacific Railway with all eastern points, and United States Pacific coast, Sound, up-country and other places. The Canadian Pacific Railway Company's magnificent steamship line to China, Japan, &c. The Canadian Pacific Navigation Company's steamers to Victoria. The Union Steamship Company's steamers to Nanaimo, Comox, U. S. service, Moodyville, &c. &c. Steamers "Robert Dunsmuir," "Eliza Edwards," and others to Nanaimo, Ladner's, New Westminster, and Lulu Island. Steamer "Saturna" gives connection with Howe Sound, &c. The C. P. R. runs three and the electric tramway four trains daily between New Westminster and Vancouver. The fine new steamer "City of Nanaimo" built in Vancouver for Capt. Roger's, will be a further valuable connection for Vancouver with other parts of the Province.

**Electric Tramways.**—The Vancouver Electric Light and Tramway Co. was organized in 1890, and the electric lighting and tramway plant set in complete and successful operation. Vancouver is now well lighted with both arc and incandescent lights, and has ten miles of street track laid and six cars running; the whole management and operation of the system giving complete satisfaction to the public; a further extension of five miles of track is contemplated for next season.

VANCOUVER CITY DESCRIPTIVE.

A strong company has been formed to connect New Westminster and Vancouver by an electric tramway. Their road is going to be pushed through without delay.\*

Another electric tramway line is talked of and the line surveyed between Vancouver and a point on Lulu Island, opposite Ladner's Landing, which, if constructed, there is every prospect of its being successful, will give direct and speedy communication with a very rich agricultural section, and divert to this city the whole of its trade.

**Railroads**—Of which all are of more or less interest to the trade of Vancouver, and the number at present under consideration quite sufficient to write a book about; I will be content to notice a few.

The Westminster & Southern, lately opened in such a grand manner, gives us with its connections a railroad clear through to California.

The line from Mission through Chilliwack will open that splendid agricultural district to us.

The Shuswap and Okanagan will open up and make tributary to this city one of the large tracts of British Columbia agricultural lands.

The Columbia and Kootenay, with steamboat connections, leading in among the riches of the mines, will lend importance to the Terminal City as a point of supply.

**Statistics Regarding Vancouver's Industries.**

The following statistics are taken from the address of His Worship Mayor Oppenheimer to the City Council, 1891. He has pretty fully covered the ground; and although I have given a good deal of time to the preparation of somewhat similar figures, I have taken the liberty of copying his *en bloc*.

Industries.	Invested Capital.	Annual Wage.	No Empls.
Newspapers.....	\$ 50,000	\$ 55,000	86
Job Printing Offices.....	10,000	12,000	15
Limo Kiln.....	50,000	5,000	17
Sugar Refinery.....	200,000	60,000	50
Foundries and Machine Shops.....	185,000	95,000	105
Vancouver Gas Company.....	200,000	60,000	50
Tannery.....	5,000	4,500	6
Steam Laundry.....	5,000	4,000	10
B. C. Canning Co.....	15,000	6,000	30
Vancouver Mfg and Trading Co.....	35,000	18,000	40
Salmon Canneries.....	150,000	12,000	200
Brickyards.....	35,000	18,000	40
Soap works.....	10,000	3,000	3
Breweries.....	50,000	15,500	18
Bakeries.....	10,000	10,000	25
Blacksmiths.....	15,000	8,000	10

\*This excellent road is now in operation, carrying hundreds of passengers daily.

VANCOUVER CITY STREET DIRECTORY.

SS. "Dunsmuir," for Nanaimo, leaves and arrives Mondays, Thursdays and Fridays, C. P. N. wharf.

SS. "Lachmee" and "Michigan" from City wharf, leave fortnightly for Portland.

The steamers "Mamie," "Etta White," "Tepic," "Mermaid," "Active," "The Belle" carry passengers for any point when required, from City wharf.

**Stages.**—W. H. Steeves' stage to the North Arm, leaves Fashion Stables, Trounce Alley, Monday, Wednesday and Friday.

**Vancouver Water Works.**—Incorporated in April, 1886, for the purpose of supplying the city of Vancouver with water obtained from the Capilano, which is a mountain stream of considerable magnitude, being reported to be no less than fifty miles in length, and averaging for a distance of seven miles up a reach (the only portion which has as yet been surveyed) a width of 150 feet at low water. It rises in the snow crowned mountains of the Howe Sound district and flows almost due south, emptying into Burrard Inlet at the First Narrows. The source is not a mountain lake, but the accumulated waters derived from melted snow and ice falling from the mountain summit. It is of a most superior quality. Being a mountain stream it is throughout its whole course very rapid, averaging five feet per second, and falling at the rate of 70 to 100 feet per mile. The point where the supply is taken from is  $6\frac{1}{2}$  miles up stream, at which place the river was carefully gauged and ascertained to be discharging at extreme low water an average of 450,000,000 gallons per 24 hours. The system is being acquired by the city, and will be managed by a committee of the city council. A double service of main pipes is being laid, which will ensure an uninterrupted supply. The service throws over the highest buildings a very considerable distance.

President, Capt. John Irving. Directors, Sir J. W. Trutch, C. M. G.; R. P. Rithet, Thomas Earle, D. M. Eberts. Secretary, J. W. McFarland. Chief Engineer, G. A. Keefer, C. E. Resident Engineer, H. B. Smith, C. E.

**Vancouver Gas Co.**—Office, 100 Cordova street. Capital, \$150,000, in 7,500 shares of \$20 each. President, G. L. Milne; secretary-treasurer, C. D. Rand; manager, Walter Thomas.

**Vancouver Electric Railway and Lighting Co.**—Office, 313 Hastings street. Capital, \$500,000, in 5,000 shares of \$100 each. Chairman, T. Dunn; secretary and treasurer, H. T. Ceperley. About four miles of track is already laid. Thompson-Houston system.

**Vancouver Club.**—Lefevre block, Hastings street, corner Seymour street. President, H. Abbott; committee—J. C. Keith, J. M. Brown, G. F. C. Cotton, A. St. George Hammersley, R. H. Alexander, R. P. Cook, C. Sweeney; honorary secretary and treasurer, G. R. Major.

**Brocton Point Amateur Athletic Club.**—Committee—C. Sweeney, C. D. Rand, J. C. Keith, R. G. Tatlow, T. Dunn, A. St. George

## CITY OF NEW WESTMINSTER.

### BOARD OF TRADE REPORT, 1891.

Although the New Westminster Board of Trade was organized and incorporated in 1882-83, this is the first public report of proceedings that has been printed for general distribution; and in view of this fact it seems quite proper to review briefly some of the most important questions of public interest with which the Board has been engaged prior to the year now ended.

It may be said generally that during the eight years of its existence the Board has been constantly occupied with matters affecting the progress and advancement of the city and district, and the success of its efforts is most gratifying. Immediately after its organization it began to take steps for the improvement of the navigation of the Fraser River. Those who have been any length of time resident in the Province need not be told how long and how shamefully the interests of this river have been neglected. Until comparatively recent years the great bulk of the trade of the Province was centered at Victoria. There were the depots of supplies, the wholesale houses, and through that city all goods and passengers coming into the country must pass. The trade of the Fraser River, therefore, was merely a local trade, and to accommodate that trade the river in its natural state offered ample facilities. These conditions, however, have been completely changed by the construction and operation of the Canadian Pacific Railway, and will be still further changed when the Westminster Southern Railway has been completed to Seattle, there to connect directly with the great trans-continental railways of the United States.

Passengers and freight, which formerly must reach us through Victoria, come to us now principally by railway; and the impetus given to every kind of industry by the introduction of railways, has so stimulated development, especially on the mainland, that we have been of late years gratified by the presence in this harbor of sea-going vessels bringing and seeking cargoes. To enable these large vessels to navigate the river with safety, the channel had to be improved and set out with proper buoys and beacons; and this has been one of the chief aims of the Board of Trade. As early as February, 1883, resolutions were passed looking to the improvement of river navigation by the placing therein of additional and better buoys and beacons, and asking for a snag-boat to be employed in keeping the river free from obstructions and placing and keeping the buoys in position. Through all the intervening years the Board has been persistently pressing upon the government's attention the great importance and urgency of such undertakings as would make the river easy of access for all classes of shipping, and its efforts have not

## NEW WESTMINSTER BOARD OF TRADE REPORT. 1005

been altogether without result. The snag-boat has been built, and its operations in the river during the past few years have done much for navigation in many ways. The river channel has been fairly well marked by bnoys and beacons, and the works of permanent improvement at the sandheads have been so far advanced as perceptibly to increase the depth of water. When these works have been completed, and the channel dredged at the shoalest parts (which will be very inexpensive), the largest class of merchant vessels will be able to reach New Westminster without the slightest trouble or risk. At present vessels drawing 21 feet may safely enter the river, but not at all stages of the tide.

When the improvements at the river mouth had so far advanced as to give water enough for ships of moderate draught, it was found very difficult to secure charters in the absence of any reliable chart showing the state of the river, and the Board spent some years and some hundreds of dollars in vain efforts to have this want supplied. On the 28th of February, 1885, a committee was appointed to procure a survey of the river channel, with authority to engage a steamer and an engineer for that purpose. A detailed history of this question of soundings and charts would fill a good sized volume; and as it is a matter of great public interest, and is to a large extent one of the live issues of to-day, a brief reference thereto will be in order. On the 31st of August, 1888, the Deputy Minister of Marine by appointment met the Board of Trade and others in this city, and on that occasion your secretary had the honor to present a statement covering the proceedings up to that time, from which the following facts are taken: In February, 1888, Mr. John Hendry, manager of the Royal City Planing Mills Co., was in San Francisco endeavoring to charter some vessels to load lumber at the company's mills in this city. One of the chief obstacles which met him was the absence of reliable bnoys and beacons to mark the river channel, and the absence of any authorized chart showing the depth of water. Mr. Hendry requested the Board of Trade to do all it could to have these things supplied. The Board did so, but found the undertaking larger than had been expected. A letter was addressed to Mr. Bole, M. P., then in Victoria, requesting him to see Captain Lewis, Agent of Marine, and have the necessary bnoys placed at once. Mr. Bole replied as follows: "Captain Lewis told me nothing could be done till after the 15th March about placing spar bnoys on the sandbanks of Fraser River between the mouth and New Westminster. I told him this would not do, as we could not wait, especially as some ships were hourly expected from San Francisco. I pointed out that the present state of things was dangerous and unsatisfactory, and requested him, if he had no authority himself, to wire at once to Ottawa and get it. . . . After a good deal of discussion, and after I had put my views in writing pretty plainly on behalf of the Board, he consented to telegraph to Ottawa for instructions." Whatever his instructions may have been, however, the buoys were not at that time placed in the river.

On the 5th March the President reported to the Board that he had seen Captain Lewis and urged upon him the importance of these buoys, but got

no satisfaction. The Board applied to Captain Lewis for some chart or official statement showing the actual depth of the water, because he had stated that at the shoalest part of the channel the depth of the water was only seven feet at low spring tides, which was believed to be an error. Captain Lewis replied that he had no authority to issue or give out any official documents from his office, and intimated that a vessel drawing more than seventeen feet of water should not venture up the river. At a meeting of your Council on the 5th of March, Captain Rogers, who was present by invitation, and who is well known to be perfectly familiar with the state of the river, stated that the channel was in as good condition as it ever had been during the thirteen years of his experience with it. "At Woodward's Slough," he said, "he had never found less than eighteen feet of water at dead low tide. He would undertake to bring a ship up to New Westminster drawing twenty-two feet. There was good protection at the mouth, and it would not be necessary for a ship to attempt to enter the river at low water. A buoy placed at each side of the entrance would be an almost infallible guide to navigation. At a comparatively small cost the channel could be put in first-class order." Mr. W. H. Higgins, representing an Eastern firm who proposed to erect a large sawmill here, stated that the location depended on the navigation of the river, and suggested that the city should at once procure an accurate survey of the channel and a chart which should be placed in the principal ship broking offices for information of vessel owners.

On March 19th a memorial was sent to the Minister of Public Works, from which the following are extracts:

"1. That the Fraser is the most important river on the Canadian Pacific Coast, being easy of access and running through the heart of the richest and most populous part of British Columbia. Upon it are situated twelve canneries with an invested capital of \$180,000 in buildings and plant, giving employment to about 5400 men during the fishing season, and consuming over \$400,000 worth of material for cans, etc. Immense tracts of fine timber lie along or near both sides of the river, which, in great part, belong to the Dominion Government. At this city there are in operation three large saw-mills with a cutting capacity of 125,000 feet of lumber per day of ten hours. A large firm of Canadian capitalists is now negotiating for the erection of new mills on the river near this city with a capacity of from 100,000 to 200,000 feet per day. The district of New Westminster, through which the Fraser River flows, is considered to be the finest agricultural district in British Columbia, and now has a population estimated at about 25,000.

"2. That the industries above noted would all be greatly stimulated and materially benefitted by having the mouth of the Fraser River so improved as to admit freely vessels of deep draught. The operations of our lumber mills have hitherto been confined almost entirely to the home market, while their capacity and the sources of supply are such as would enable them, under other circumstances, to do a large export trade. Negotiations have for a long time been carried on with a view to inducing lumber vessels to take charters for this harbor, but these negotiations have hitherto failed

NEW WESTMINSTER BOARD OF TRADE REPORT. 1007

on the sole ground that the condition of the river navigation was not satisfactory to ship owners and ship masters, and the interests of this city and district had suffered accordingly.

"3. That in view of the large interests involved, and the fact that the location of the proposed new mills is contingent upon the ability of seagoing vessels to reach them with reasonable safety and convenience, your memorialists deem it to be of the utmost importance that your government should make an appropriation sufficient for the purpose indicated.

"4. That the sum of \$10,000 set down in the estimates this year for improvements to the Fraser River is entirely insufficient, inasmuch as it will not provide for carrying the work forward so as to make the river available for the class of vessels required. Your memorialists have good reason to believe that if an additional sum of \$50,000 is placed in the supplementary estimates for this purpose, the river could be so improved this season as to make it quite safe and easy of access for vessels drawing from twenty to twenty-five feet. The plea for urgency is based on the fact that if steps are not taken to make the river navigable this season, the large benefits expected to come from the establishment of the proposed mill may be lost forever.

"5. Your memorialists respectfully call attention to the accompanying resolutions and charts, from which it will be seen (1) that the views they hold respecting the importance of the work are cordially endorsed by other representative bodies competent to judge of the circumstances; (2) that the work already done has materially improved the channel, and only requires to be carried on to completion. The channel shows a greater depth of water than before the works were begun, and it is the opinion of practical men that the improvement will be permanent. Vancouver Island forms a natural break-water to shelter the entrance to the river, and when the channel has been properly deepened and marked by beacons this will become one of the safest harbors on the coast.

"6. Your memorialists are of opinion that such a work is of national as well as local importance. At present the bulk of the export lumber trade on this coast is done by the mills on Puget Sound and in Oregon; but if the improvements asked for by your memorialists were carried out, the mills on Fraser river would be able to compete on fair terms with those elsewhere on the Pacific Coast, and your government would receive a direct benefit from the disposal of the large and valuable timber limits in this district. While hundreds of thousands of dollars are being spent from year to year for the improvement of Columbia river, your memorialists ask only what must be regarded as an exceedingly small sum when the vast interests involved are considered."

On March 28th the following letter was received from Pilot McAlister: "Having sounded the Fraser River on the 9th inst., I found the channel very much improved on the sandheads, and when the work now in progress is completed there will be no obstruction in the way of ships crossing the sandheads. The river could easily be confined in the channel so as to

admit vessels of any draught. Vessels from eighteen to twenty feet draught can be taken to New Westminster now."

On the 3rd April Pilot McAlister reported to the Pilot Board as follows: "I am fully prepared to take ships of eighteen to twenty feet draught to or from New Westminster, the depth of water on the sandheads being twenty-four feet."

Notwithstanding these statements, Capt. Lewis, Agent of Marine, repeated the opinion that only seven feet could be found at the shoalest part of the channel at low spring tides. The Board, therefore, engaged Pilot McAlister and Capt. Johnston to make fresh soundings about the end of May, and, in consequence of their report, the following telegram was sent to the Minister of Marine: "Buoys out of place on Fraser sandheads. Capt. Lewis reports only seven feet of water at low tide where Pilot McAlister and Capt. Johnston find fifteen feet. Want of authorized chart and proper care of buoys ruinous to trade of Fraser River. Vessels won't come, as they cannot insure without authorized chart with underwriters. Cannot this be remedied at once?" The Deputy Minister replied: "Capt. Lewis has standing instructions to give proper care to buoys. Admiralty chart authorized, but sands constantly shifting renders it unreliable." At this time negotiations for ships to load at this city were in progress, hence the urgency; but there appeared to be no sign of activity among the officials.

On the 9th June the following telegram was sent to the Minister of Marine: "Capt. Lewis' report of soundings of Fraser River not correct, and does us great damage. Pilots report fifteen feet water where Capt. Lewis says seven. People here very indignant, and demand prompt action as important industries are hindered and threaten to leave the city. Will you wire Capt. Lewis to take soundings at once with committee of the Board of Trade and furnish us with copy of report? Vessels refuse to come here in face of Capt. Lewis' misleading report." This telegram had the desired result. Capt. Lewis immediately received instructions from Ottawa to carry out the suggestions of the Board. On the 13th June he arrived here and proceeded to take soundings in the channel, accompanied by Capt. Robinson and A. E. Hill, C. E., representing the Board of Trade. The lowest water found was twelve feet, at low tide, between buoys 7 and 8. Referring to Capt. Lewis' report of these soundings, the Deputy Minister of Marine wrote under date of June 26th: "Mr. Lewis reports having carried out his instructions to take soundings in conjunction with members of the Board of Trade, and that he and Capt. Robinson and Mr. Hill, C. E., the members alluded to, found the depth to be twelve feet on the bar at ordinary low tide, which, less three feet, would give nine feet at low tide during L. W. Springs."

Capt. Lewis' report did not agree with that made to the Board by Mr. Hill. At this time the ship Camana was at Victoria on her way to this port, and Capt. Lewis inserted a notice in the Victoria newspapers stating that at No. 1 buoy there was only nine feet of water at L. W. Springs, eight feet between Nos. 7 and 8, and eight feet at entrance to Woodward's Slough.

NEW WESTMINSTER BOARD OF TRADE REPORT. 1009

In consequence of this notice considerable difficulty was experienced in inducing the Camana to come up the river. She did come, however, and arrived here on the 18th June in charge of Pilot McAlister, who found no trouble with the channel.

On the 20th June another letter was sent to the Minister of Marine protesting against the unfairness of the reports made by Capt. Lewis and urging the need of a complete survey of the channel and a chart showing the depth of water. After further delay the Board determined that it would, at its own expense, have the necessary soundings taken, and it requested that the department would instruct Capt. Lewis to be present. Mr. A. E. Hill, C. E., and Capt. Robinson were engaged to do the work, which was begun on the 4th July, Capt. Lewis and Capt. Glaholme, Dominion Government officials, taking part. Tide gauges were first placed at different points, and several days were spent in soundings. In his report to the Board, made on the 9th July, Mr. Hill says: "At the outer bar, between buoys 1 and 2, there is, in the track of shipping, a depth of thirteen and a quarter feet at low water spring tides. The tidal range at this point is fourteen and a half feet, giving a twenty-seven and three quarter foot channel at high water spring tides. A still deeper (but as yet unbuoyed) channel exists between buoys 1 and 2, opening out immediately north of No. 1 buoy and having a depth of nineteen and a quarter feet at low water springs. At the inner bar, inside of buoy 7, in the track of shipping, two casts only of the lead gave a depth of eleven and a half feet, with a channel of thirteen feet, deepening to fourteen and a half and sixteen feet over the remainder of the bar. The tidal range at this point is ten feet nine inches, giving a present depth, therefore, of twenty-two and a quarter feet at high water spring tides, capable of being increased to twenty-four feet by dredging a distance of probably not more than one hundred and fifty feet and to a depth of less than two feet. And further there exists a channel which a very small amount of dredging would convert into a twenty-five foot direct channel over the inner bar at high water springs. It is, in fact, the channel, though no, the present track of shipping. In sounding over it only three casts of the lead gave a depth of eleven feet, and three casts twelve and a half feet. The remainder is already a fourteen foot channel at low water springs. At the foot of Woodward Slough there is a depth of seventeen feet at low water spring tides. The tidal range at this point I have not yet had an opportunity of determining, and as this is a necessary element of the high water depth I shall be unable, until it has been determined, to state the available depth of the channel at this point. The range at Ladners, I have been informed by Capt. Lewis, is about eight feet, and if it be assumed to be the same at Woodward Slough the channel depth at high water would be twenty-five feet." It will be noticed that these careful soundings by a qualified engineer showed results materially different from the reports of Capt. Lewis. The Board sent Mr. Alex. Ewen to Victoria for the purpose of obtaining some information respecting the channel and the buoys, and when he returned he reported that Capt. Lewis had

BRITISH COLUMBIA DIRECTORY.

stated to him that he believed there was more water in the channel than he had mentioned in his reports, but it was not judicious to report more than seven or eight feet, as it was better to be under than over the mark. Mr. John Hendry, President of the Board, reported that Capt. Lewis had made a similar remark to him. It would seem, therefore, that Capt. Lewis did not report the true depth of water, but discounted it for some reason which the Board could not comprehend.

Having related these circumstances, the statement read to the Deputy Minister at that memorable interview, concluded as follows: "The Board has frequently asked for some official chart or statement showing the actual condition of the channel, which could be laid before shippers so as to satisfy them of the navigability of the river for vessels of moderate draught, and enable mill owners to secure charters. But hitherto this request has not been complied with. Capt. Lewis reported to the Minister of Marine on the 11th July that he did not see the need of a chart, and the Minister of Marine assures the Board that the admiralty charts are 'generally reliable.' For the navigation of the sandheads the admiralty charts are utterly useless, because they represent conditions which have not existed for years. As a matter of fact the channel laid down on the admiralty chart is the very channel which the Canadian Government has been for the past two years filling up with mattresses and rocks, and for the absolute extinction of which an appropriation of \$20,000 was made this year. But although that channel has not been used by vessels at all for more than three years, and is being filled up and obliterated by the Federal Government, there is no official notice of the fact. The Government refuses to make a new chart, or to certify to the actual depth of water, and throws in the face of the Board an old admiralty chart, which, if followed, would certainly lead the mariner to shipwreck; the agent of the Marine Department in this Province not only reports that there is no need for an official chart, but actually persists in misrepresenting the channel by reporting less water than really exists by four feet; and the Board of Trade has been forced to spend months of anxious labor and hundreds of dollars in an almost hopeless effort to counteract the injurious effects of the inaction of the Government and the perverseness of some of its officials. In the meantime the interests of this city and district are suffering, and the Board feels that the Fraser River does not receive the consideration to which it is fairly entitled."

At this interview the Board demanded, among other things, that a new chart of the river channel be issued, and that some competent person, resident at or near the city, be given authority to keep the buoys in place without having to obtain instructions from Ottawa or Victoria. The interview was not without result, but that result was not entirely satisfactory. Instructions were issued to the captain of the Samson to see that the buoys were kept in proper place, and in this matter to act on his own responsibility within certain limits. A complete survey of the sand-heads was ordered, and in May, 1889, the Board had the satisfaction of receiving a copy of the new chart. A careful examination of this much-hoped-for

## NEW WESTMINSTER BOARD OF TRADE REPORT. 1011

guide, however, showed it to be comparatively worthless, inasmuch as the draughtsman had undertaken to embellish it with certain dotted lines showing the three-fathom limit, and succeeded in representing an almost straight channel as being so tortuous as to discourage any ship from attempting to pass through. Near the entrance to Woodward Slough, also, the depth of water was represented as twenty-one to twenty-two feet at high water springs, whereas Pilot Gawdin, who brought the bark McDuff into the river on the 18th May, reported twenty-seven feet at this point. The Board, therefore, respectfully requested the Minister of Marine either to correct these serious errors in the chart, or recall it altogether—but it was neither corrected nor recalled. It may be added that a new survey of the channel was made last year, and the Board was promised that before this time a new chart founded thereon would be issued. It is hoped it may be free from the fatal defects of the other. As evidence of the desire of the Department to establish amicable relations with the Board, it may be mentioned that a draft of these latest soundings was, by order of the Minister, submitted to the Board for examination before going into the hands of the lithographer, and that the Minister advised the Board that the resident engineer had been instructed to furnish for its use such information respecting the depth of water in the channel etc., as might be required.

The foregoing statement of facts is necessarily curtailed, but it may be sufficiently full to give some idea of the difficulties which presented themselves to the Board when it undertook to adjust a matter most seriously affecting the public interest. It shows, also, that the Board has not lost sight of the purpose for which it was organized, but has actively and persistently exerted itself for the public good.

Another matter of great public interest which engaged the attention of the Board for some years was the Southern Railway. As early as 1886 the Board began taking steps in this matter. In October of that year the Minister of Railways was asked whether, in the event of a Provincial charter being obtained for a railway connecting this city with the United States, such a charter would be allowed by the Federal authorities. The reply was to the effect that the Government felt itself bound to prevent the construction of such a road, as it might be injurious to the interests of the C. P. R. Notwithstanding the discouraging outlook, however, the Board applied to the Provincial Legislature for a charter, which was granted. A similar application was made to the Federal Parliament in the spring of 1887, but afterwards withdrawn, as it was determined to stand by the Provincial charter and fight the matter out. A convention of representatives from the various municipalities in the Fraser valley was called and met in this city to discuss the proposed Southern Railway, the improvement of the river and other public questions, and in many other ways the Board continually kept demanding the right to connect this city with the American railway system. The proposed route was surveyed by direction of the Board at a cost of over \$2,000, and on the 25th of April, 1888, a telegram was received from Ottawa stating that the Government had decided not to disallow the

charter. After some fruitless negotiations with Senator Canfield, who wished to procure this charter, the Board finally assigned it on certain conditions to the Westminster Southern Railway Co., a company composed of our own citizens. The remainder of this history of this undertaking calls for little comment. The road is now completed, and has virtually passed into the hands of the Great Northern, and before the next annual meeting it will doubtless be in successful operation.

It would probably be quite correct to say that these two are the most important matters which have engaged the attention of the Board, and they are the matters which have occupied its attention more largely than any others. The one has been satisfactorily concluded, and it makes the City of New Westminster the most important railway centre in the Province, giving it direct communication, by two great transcontinental and competing roads, with the Canadian and American railway systems. The other, although far from satisfactory, has materially progressed. Several ships have already taken cargoes of lumber for foreign ports from our mills, our cargo of salmon has been successfully shipped, and sea-going vessels are now bringing merchandise from Great Britain and elsewhere direct to this city. There is reason to believe that the new river chart will shortly appear, and that it will be such as to afford material aid to shipping on Fraser River. We are now within measurable distance of the time when the great advantages of the river will be held at their true value, and when the city whose interests the Board has ever been anxious and zealous in promoting will be recognized as the most important commercial and industrial centre in the Province.

The Board has devoted considerable attention to the securing of reliable pilots for the river. On several occasions pilots who had no knowledge of the channel have undertaken to bring vessels to this port, and vessels have been grounded and detained. Strong representations in these cases have been made to the Pilot Board, and it is expected that a pilot will be appointed, whose duty it will be to take charge, exclusively, of Fraser River pilotage, and that such accidents will be prevented in future. Fortunately, the character of the river is such that in no case has any damage been done to vessels which have grounded in it.

The Board has been actively interested, also, in securing better mail communication; in promoting the interests of the fisheries; in the construction of the 'Mud Bay Canal'; the protection of the river bank at Sumas; the appointment of a U. S. consular agent at this port; the procuring of street letter boxes; the erection of a traffic bridge over Pitt River; the obtaining of increased facilities for freight on the C. P. R., and the enforcement of better regulations respecting bonded freight and steamboat passenger traffic. The Board persisted in requiring a 100-foot draw in the railway bridge at the Mission, where it was proposed at first to put a 60-foot draw, and its representations to the Government in this matter were completely successful.

During the year now passed the Board has not been less diligent in its

NEW WESTMINSTER BOARD OF TRADE REPORT. 1013

duties, although the scope of its operations has not afforded such opportunities as have marked some previous years. It has kept steadily on with the agitation for improvement of river navigation, in both south and north arms; it has addressed the Provincial Government respecting the need of better roads in certain parts of the district, and a traffic bridge over Pitt River; it has represented to the Minister of Fisheries the need of amending the fishery regulations and the appointment of a commission to inquire into the condition of the river fisheries; it has continued to urge the Minister of Marine to protect Garry Bush and has succeeded; it has addressed letters to the Boards of Trade at the chief places of import in Australia, requesting that the fir imported from British Columbia be not classed, as heretofore, as "Oregon Pine," but as British Columbia Fir, and it has invited the co-operation of the Boards of Trade and lumber exporters in the Province in securing this change.

Materially, the Board has been making slow but sound progress. The number of members is 64, being an increase of ten during the year. The receipts have been \$488, and the disbursements \$439.18. Cash in hand, \$558.91. There have been thirteen meetings held during the year, with a fair attendance.

CRANE, MCGREGOR & BOGGS,  
30 Broad St., Victoria, B. C.

The City of New Westminster (commonly written Westminster) was founded by Col. Moody, of the Royal Engineers, in 1858. It is situated on the north bank of Fraser River, 16 miles from its entrance into the Gulf of Georgia, and the situation was chosen both on account of its importance for a military point of view and because of natural advantages as the site for a commercial centre. The Fraser is the most important river of British Columbia. It is the great waterway which reaches from the Rocky Mountains in the interior, and, in its course to the ocean, flows through some of the richest gold mines and most fertile agricultural lands on the continent. The river is quite navigable as far as Westminster, and some miles above, for vessels drawing 21 feet or more; and when the works of improvement, under course of construction by the Federal Government, have been completed, it is confidently believed that any merchant ship will be able to reach the city with perfect safety. Above Westminster the river is navigable by flat-bottomed, stern-wheel steamers, such as ply on the Mississippi. During the last three years several ocean-going vessels have come to the city with cargoes, and taken away lumber and fish for foreign ports, and this year it is expected that about 20 sea-going vessels will come to this port, bringing or seeking cargoes.

Westminster is the only city on Fraser River, and is, therefore, the distributing point and place of export for all the commerce which the river and adjacent territory produce. It is nearly in the centre of Westminster District, the finest agricultural district in British Columbia, the district in which are situated a large majority of the great salmon canning establishments and saw-mills, and, as well, the most populous and rapidly increasing district in the Province. The city is easy of access from all parts of this territory, by railway, steamer or wagon road. The Fraser flows through the finest agricultural and timber lands anywhere to be found; and, as no other medium can compete with water in point of cheapness for the purposes of transportation, the Fraser gives Westminster a substantial advantage in this respect over any other city in the Province. It is, therefore, one of the most desirable points, both for trade and manufacturing.

Besides possessing the advantages of its situation on the river, Westminster is well supplied with other commercial avenues. It is the fresh water terminus of the Canadian Pacific Railway, and through passengers over that road, destined for Victoria or points beyond, may choose between the Burrard Inlet route, *via* Vancouver, and the Fraser route, *via* Westminster, the latter being shorter by about 25 miles. It is also the western terminus of the Great Northern Railway, which reaches it over the Westminster Southern, a road constructed by the energy of its own citizens. By means of this new road and its connections Westminster is brought into

direct railway communication with Seattle, Tacoma, Portland, San Francisco and the whole American railway system, east and south. This road is now almost completed to Seattle, and is expected to be open for regular traffic before the end of the year. The importance of this new connection is much more than the mere circumstance that it adds one more to our avenues of trade. The Great Northern is a competitor with the Canadian Pacific for the trade of British Columbia, and Westminster, being practically the western terminus of both roads, becomes the point of competition. It will, therefore, be able to take full advantage of the special facilities which these circumstances present. British Columbia has always carried on an extensive trade with California, Oregon and Washington. Manufactured goods of many kinds must be imported either from the Pacific States or from Eastern Canada or beyond, and as the Pacific States are much nearer us in point of space and time, and the cost of carriage is consequently less, this trade will continue for many years to come at least, and no city can handle it with greater facility than Westminster.

In addition to the river, the Canadian Pacific Railway and the Great Northern Railway, we have other important means of communication, present and prospective. As this was the only city in Westminster District (or, indeed, on the mainland) until comparatively recent years, when the completion of the C. P. R. brought into existence our sister city on Burrard Inlet, the whole system of public roads in the district was made to converge towards the natural centre and source of supply, and the result is that this city may be reached by wagon road from almost every settlement in the district. Within recent times these settlements have become numerous and important. The growth of the district, as well as the city, has been remarkable within the past decade. The sparse and unimportant settlements and villages of six years ago have grown into flourishing communities, whose power of production and consumption justifies and demands a corresponding expansion of the commercial facilities of this city. The Victoria, Saanich & New Westminster Railway, for which a charter has been granted, proposes to connect this city and Victoria by rail, with a ferry across the Straits. This scheme, when completed, will enable passengers to reach the cities on Vancouver Island in one-third the time now required, and will add materially to the advantages of this city as a railway and commercial centre. An electric tramway connects the city with Vancouver, and the distance between the two cities (12 miles) is covered in half-an-hour. Another electric tramway, to connect the city with the magnificent farming lands of Lulu Island, is also projected, and will probably materialize before the close of 1892.

Regular steamboat communication is established between this city and Victoria, tri-weekly (soon to become a daily service); to Nanaimo and Vancouver, semi-weekly; to Ladners and the settlements on the south arm of the Fraser, daily; to Portland, weekly. Between Westminster and the villages and settlements on the Fraser above the city there are four regular steamboat lines, giving more than a daily service. In addition to regular

lines of steamers plying on the river, there is a vast number of freight boats carrying lumber, fish, stone, brick, lime, coal, hay and other articles of commerce, to and from various points on the river and elsewhere.

PUBLIC LIBRARY BUILDING, NEW WESTMINSTER.

To sum up, therefore, the city of Westminister has the following avenues of commerce:—The Canadian Pacific Railway, connecting it with Vancouver, the villages and settlements in the interior of the Province and the whole of eastern Canada and the United States; the Great Northern Railway and its connections, bringing us into direct connection with all cities on the Pacific coast and the transcontinental lines of the United

1017

States; the Westminster-Vancouver Electric Tramway; the public roads throughout the district which terminate here; steamboat lines to Vancouver, Nanaimo, Victoria, Portland, and to all points up and down the river.

In population Westminster ranks third among the cities of the Province, the order being as follows:—Victoria, Vancouver, Westminster, Nanaimo. According to the official census taken this year Westminster's population is 6,641. In the census of 1881 it is given as 1,500, from which it seems that the increase in ten years has been over 342 per cent. This is the largest percentage of increase shown by any city in Canada, with the single exception of Vancouver, a city that has sprung into existence since the taking of the former census, and which is altogether the creation of the C. P. R. In 1885 the number of pupils on the Public school rolls is given as 329; in 1889 the number was 448, and in 1890 it had grown to 673. It seems, therefore, that the increase in population still goes on, and, in view of the favorable circumstances now existing, there is no reason to apprehend that the rate of increase will become less in the immediate future. In population, as well as in material progress, the district of Westminster has kept pace with the city.

In proof of the material development of the city, the following official figures are submitted:—In 1888 the assessed value of taxable real estate was \$862,511; in 1889, \$2,540,245; in 1890, \$3,577,815; in 1891, \$5,287,520. The value of new buildings erected during the past three years is estimated at upwards of \$2,000,000, and it is estimated that during the present year \$1,000,000 will be spent in building operations. The faith of the people in the permanent prosperity of the city is shown in the character of the buildings constructed in recent years. Five years ago there were not ten brick and stone business blocks in the city, and none of large dimensions. To-day there are over thirty solid brick and stone blocks either completed or in course of construction. Some of these blocks are both massive and costly. The Douglas-Elliott block (under construction) is 66x132 feet, four stories high with basement, and will cost \$70,000; the Dupont block (under construction) is 89x132 feet, four stories, and will cost \$75,000; the Trapp block (under construction) is 66x132 feet, four stories, and will cost \$62,000; the Begbie block is 66x66 feet, four stories, and cost \$35,000; the Colonial Hotel block is 66x132 feet, three stories, and cost \$35,000; the Bushby block is 66x132 feet, three stories, and cost \$30,000; the Armstrong-Scoullar block is 66x144 feet, two stories with basement, and cost \$38,000; the Armstrong-English block is 66x100 feet, three stories, and cost \$30,000; the Armstrong-Young block is 66x70 feet, three stories, and cost \$25,000; the Powell block is 66x66 feet, three stories with basement, and cost \$25,000; the Cunningham block is 33x132 feet, three stories, and cost \$25,000; the Library block is 66x64 feet three stories with basement, and cost \$25,000; the Hamley block is 66x66 feet, two stories with basement, and cost \$20,000; the Bank of B. C. block is 60x66 feet, three stories, and cost \$20,000; the Queen's Hotel block is 66x70 feet, three stories, and cost \$17,000. These are

the principal commercial blocks, and it will be seen that those begun this year, and still uncompleted, are the largest and most costly.

Of public buildings there are several worthy of mention. As Westminster is the most centrally situated and easy of access from all parts of the Province, it has been selected as the site for several important Provincial institutions. Here are situated the Provincial penitentiary, Provincial lunatic asylum, the Provincial central prison for the mainland, and the County court house. All these buildings are of brick. The penitentiary cost \$1,400,000, and contains 73 convicts; the asylum cost \$155,000, and has 121 inmates (the buildings cover an area of 50x600 feet); the central prison cost \$40,000, and has 50 inmates; the court house (just completed) cost \$40,000. It is 98x100 feet, and three stories high. A new brick building for the public school is just being completed at a cost of \$25,000. It is

ARMSTRONG-YOUNG BLOCK, NEW WESTMINSTER.

85x85 feet, three stories high. The central postoffice building is of brick, three stories high, and cost about \$25,000. There is also a postoffice in the east end, known as Sapperton. The Public Library building, already mentioned, is by far the finest and most complete west of Ontario. The ground floor is occupied as stores, and the other two flats are used wholly by the library, reading rooms, Mechanics' Institute, and the Board of Trade. The building was erected this year by the city corporation. The Y. M. C. A. building is of brick, 38x66, three stories high, and cost over \$16,000. It is a very handsome building, and is fitted up with all the modern appliances.

The Association has a membership of 280. Both this and the Library build-  
 ing are lighted throughout by electricity.

**ST. MARY'S HOSPITAL, NEW WESTMINSTER.**

The city is well supplied with churches, hospitals and societies. There  
 are in all 15 churches for white people, having an aggregate seating  
 capacity of 4,430, and a membership of about 2,700. Denominationally they  
 are as follows:—Roman Catholics, three churches, seating capacity 750, mem-  
 bership 980; Church of England, three churches, seating capacity 530, mem-  
 bership 1000 (these are not all communicants—the number of communi-  
 cants cannot be ascertained); Presbyterian, three churches, seating capacity  
 1400, membership 493; Methodist, three churches, seating capacity 750,  
 membership 356; Baptist, one church, seating capacity 750, membership  
 228; Reformed Episcopal, one church, seating capacity 250, membership 60.  
 Besides these, the Roman Catholics have an Indian church, and the Meth-  
 odists have an Indian church and a Chinese mission. The Salvation Army  
 has a commodious hall, and regular daily meetings are held. The Royal  
 Columbian Hospital is a new building, well equipped and undenominational.  
 St. Mary's Hospital is a large and excellent establishment under the man-  
 agement of the Roman Catholic church. Of societies there are the Masons,  
 Oddfellows, Knights of Pythias, United Workmen, Forresters, Royal Temp-  
 lars, W. C. T. U., I. O. G. T., St. George's Society, St. Andrew's Society, St.  
 Patrick's Society, Orange Lodges and others. In addition to the Public  
 Library already mentioned, there are libraries and reading rooms in con-

nection with the Church of England and the Church of Rome, as well as the Y. M. C. A. The city band, organized in connection with the volunteer artillery company, is admittedly the best in the Province. The city has an opera house, several public halls and three first-class hotels.

RESIDENCE OF ALEX. EWEN, NEW WESTMINSTER.

During the past three years the city corporation has undertaken a number of large and important public works, some of which it has completed, and others are in course of completion. Until 1889 the whole city revenue was from \$15,000 to \$30,000 a year, and with such limited resources not much could be accomplished. In 1889 a progressive Council was elected, and the circumstances then existing were such as to suggest a progressive policy—a policy which has been carried out by succeeding Councils. The opening of new streets was undertaken on a very extensive scale, and now there are within the city limits 33 miles of completed streets, over 6 miles of streets made 25 feet in width, and 33 miles of sidewalk. The cost of these works has been over \$200,000. The corporation also spent over \$50,000 on the public parks. The principal of these is Queen's Park, comprising about 87 acres. A large sum has been spent in clearing, grading and beautifying this park, and erecting thereon a permanent exhibition building, which is the finest in the Province. Here the annual exhibitions of the Royal Agricultural and Industrial Society are held, where exhibits may be seen from nearly every part of the Province. On Queen's Park are

situated the play grounds of the cricket, lacrosse, baseball, football and other clubs.

The Council of 1889 also took preliminary steps towards supplying the city with water, and this work is now being carried on with vigor. The source of supply is Coquitlam Lake, 12 miles distant. This lake affords an ample supply of the purest water, having an elevation of about 435 feet. The contract for the whole work has been let, and it is expected to be completed early in 1892. It is, of course, the gravitation system, and the pressure will be ample for fire protection, as well as for various mechanical appliances. These works are the property of the corporation. The cost, when completed, will be \$380,000, which includes 19 miles of pipes for the distribution system. The main supply pipe is of steel, 12½ miles in length.

EXHIBITION BUILDING, NEW WESTMINSTER.

The Council of 1870 made a contract for the construction of a bridge over the north arm of Fraser River, and the dyking of 600 acres of land on the eastern end of Lulu Island. This land had been conveyed to the corporation in consideration of its undertaking these works, which are now completed. This bridge connects the city with Lulu Island, one of the most fertile agricultural districts in the country. The cost of the work was about \$65,000. This cost was paid out of the lands reclaimed, and the corporation has remaining 75 acres, where fine sites may be found for manufactories.

BRITISH COLUMBIA DIRECTORY.

In the fall of 1890 the Council purchased an electric light plant, which is now in successful operation. When additions now in hand have been completed there will be 82 street lamps of 2000 candle power each and 790 incandescant lamps. The cost of the works so far has been about \$60,000, and Westminster is better lighted, and at far less cost, than any other city in the Province. It is proposed to add another incandescant dynamo, of 1500 lamp power, this year, and when the present demand for electric light has been met it is believed the whole cost of street lighting will be nearly met by the revenue from incandescant lights.

The Council of 1890 also erected the Public Library building, at a cost of \$25,000. The revenue from the renting of shops in this building is expected to be more than the cost of its maintenance. The same Council constructed a new and commodious steam ferry boat to accommodate traffic across the river. This boat is provided with a powerful pump for fire purposes, and is, therefore, an important addition to the appliances for fire protection. The cost of the ferry, wharves, etc., has been about \$26,000, and it is expected the revenue will be nearly sufficient to make this undertaking self-sustaining.

RESIDENCE OF A. E. RAND, NEW WESTMINSTER.

The carrying out of these extensive works necessarily involved the borrowing of a large amount of money, and the debt of the city is now \$474,000, irrespective of \$180,000 required to complete the water-works, and about \$60,000 for electric light. When debentures have been issued for these amounts the debt will be \$714,000. It is fair to say, however, that a large portion of this money is for reproductive works. The water-works are expected to be self-supporting, as well as the electric light works and ferry. These three items make up \$466,000, leaving the unproductive debt only \$248,000. It may be mentioned, also, that the rate of taxation this year is only 15 mills on the \$.

The business transactions of the past year have been very large, and the state of trade is satisfactory. In real estate within the city about \$1,000,000

NEW WESTMINSTER DESCRIPTIVE.

2025

British Columbia fir and cedar is increasing wherever a knowledge of the excellent qualities of these woods has gone. For doors and panel work the cedar is much esteemed on account of its beauty when highly polished, and the Douglas fir is almost unsurpassed for strength and durability. The trees grow to enormous size, and are free from all blemishes. It is estimated that the mills of this Province produced last year 450,000,000 feet of lumber, 325,000,000 shingles and 95,000,000 lath. The value of lumber exported during the last fiscal year is \$325,881.

The product of the fisheries of the Province for 1890 is estimated (including seals and oil) at \$6,550,275, as follows:

Approximate value of fish consumed in the province	\$3,085,000
Canned salmon, 400,000 cases, value	2,400,000
Salted salmon, 3,800 barrels	41,800
Fresh salmon, 2,000,000 pounds	240,000
Smoked salmon, 13,000 pounds	3,250
Fresh halibut, 750,000 pounds	75,000
Fresh sturgeon, 320,500 pounds	16,025
Fresh trout, 20,000 pounds	2,000
Other fish, fresh, salted and smoked, 905,000 pounds	90,500
	<hr/>
150,000 gallons fish oil, value	\$5,953,575
Isinglass, etc., value	75,000
Seal skins and other furs, value	21,700
	<hr/>
Total	\$6,550,275

Of salmon canned the principal part is the product of Fraser River, which amounted to 246,050 cases, or 11,810,400 cans of one pound each, valued at \$1,476,300. The balance is made up from canneries along the coast as far north as Alaska. The product of Fraser River canneries is as follows:

Ewen & Co.'s Cannery	(cases) 29,050
British American Packing Co.	" 16,500
English & Co.	" 15,000
B. A. Wadhams	" 14,500
Delta Canning Co.	" 14,500
Richmond Canning Co.	" 14,000
Beaver Canning Co.	" 14,000
Wellington Packing Co.	" 13,500
Durham, Brodie & Co.	" 13,500
British Columbia Packing Co.	" 13,000
Bon Accord Packing Co. (2 at 13,000 each)	" 26,000
Garry Point Canning Co.	" 13,000
Harlock Packing Co.	" 13,000
Canoë Pass Canning Co.	" 12,000
British Columbia Canning Co.	" 11,500

The value of the plant employed in the fishing and oil industry is \$1,357,000. Employment is given to 7,500 men, and the wages paid and other working expenses amount to \$1,025,000 annually.

The value of gold exported from the Province by express in 1890 was \$411,877, a decrease of \$177,046 as compared with 1889. Recent discoveries

in the mining regions lead to the confident expectation that we are on the eve of extraordinary mining developments, especially in silver. Coal is now the chief mineral product of the country, and this industry is also capable of vast development. In fact, it may be fairly said of most of the industries of the Province that they are in their infancy and awaiting the advent of capital. Iron, copper, lead, platinum and other valuable metals have been discovered in various parts of the Province, and every year reveals the existence of new resources which will some day find a place in our industrial statistics.

The number of foreign vessels arriving at the port of New Westminster during the last fiscal year was 28, with a tonnage of 11,989. The number for the previous year was ten, and for the year before four. The exports from this port for the same period were as follows:

Products of the Mine .....	\$ 10
Products of the Fisheries.....	171,321
Products of the Forest .....	21,783
Animals and their products.....	11
Agricultural products.....	5,148
Manufactures .....	3,276
<b>Total.....</b>	<b>\$201,749</b>
Exports for 1889.....	36,394
Imports for 1890.....	\$255,055
Imports for 1889.....	155,549
Duty paid on imports, 1890.....	\$ 60,231
Duty paid on imports, 1889.....	31,299

Returns from the city postoffice show the following statistics:

Stamps sold in 1890.....	\$ 9,598
Stamps sold in 1888.....	7,807
Increase.....	\$ 1,791
Money orders issued, 1890.....	\$ 5,039
Money orders issued, 1889.....	4,131
Increase.....	\$ 908

There are registered at this port 61 vessels, aggregating 6,856 tons.

There are two daily newspapers published in the city—the *Columbian* (evening), and the *Ledger* (morning), both of which are well conducted and patronized. Both these papers issue weekly editions as well, and there are, besides, three monthly periodicals issued regularly. The Bank of British Columbia and the Bank of Montreal have branches in the city.

BRITISH COLUMBIA DIRECTORY.

In all respects Westminster possesses the appliances and facilities of a modern, progressive city, and the facts already given afford abundant proof of its rapid development within the past few years. The laws are well administered; life and property are as safe as in any city in Canada, and in public moral sentiment it is admittedly in advance of any other city in the Province. There are only 19 places where intoxicating liquors are sold—two saloons, fifteen hotels, one wholesale shop and one club—and public sentiment is decidedly against increasing the number of liquor licenses. It is worthy of remark that this number is less than it was ten years ago, when the population of the city was 1,500. The difference is that in 1881 there were but four hotels, whereas there are now fifteen. Westminster offers an excellent field for manufactories, and for the investment of capital. The mistake made by many people who come to this and other new countries is that they arrive without capital, and, if disappointed in obtaining situations, they speedily exhaust their means, and go away to spread an evil report of the finest province in the Dominion. Not everyone who comes here can find employment at once; but people with some money, common sense, and who are willing to work and able to adapt themselves to such circumstances as exist, may, as a rule, expect to succeed beyond what could be hoped for elsewhere.

NEW WESTMINSTER CITY STREET DIRECTORY. 1033

**WATER WORKS DEPARTMENT.**

Engineer, A. E. Hill, C. E.; Water Commissioners—J. C. Armstrong, W. A. Duncan, Geo. Turner, C. E. The source of supply is Coquitlam Lake, about 435 feet above high tide level, and distant about 14 miles. The works are being constructed by the City, at an estimated cost of \$380,000. The main is to be rivetted steel pipe, and the distribution system cast iron pipe. The material for the whole system is now all on the ground, and the pipes are being rapidly laid down. The works are expected to be completed and in operation early in 1892.

**FIRE DEPARTMENT.**

There are three fire halls, No. 1 on Columbia street, opposite Lytton Square; No. 2 on Royal avenue, near Sixth street; No. 3 on Front street, at foot of Begbie street. The appliances consist of one steam fire engine, one chemical engine, one hand engine, one hose wagon, hooks and ladders, three teams fire horses. The steam ferry is also supplied with a powerful steam pump with hose always ready for fire purposes. Chief of Fire Department, T. Ackerman; Assistant Chief, W. H. Vianen; Engineers, Jno. Kelly and Jno. Watson; Assistant, Jas. Croll; Drivers, Jas. Hamilton, Jno. Watson, and J. Logan; Hosemen, E. Noble and Neil McInnis; seven call men.

**ELECTRIC LIGHT DEPARTMENT.**

Electric Light Station, Tenth street, near Agnes street. Electrician, P. Bowler; Engineer, J. S. Grant. The works were constructed and are being operated by the City. Cost, \$60,000. There are three dynamos in operation, 83 street are lights of 2,000 candle power each, and 790 incandescent lights. There are 23 miles of arc wires on the streets. Another 1,500 lamp incandescent dynamo is being put in, with additional machinery.

**FERRY DEPARTMENT.**

The steam ferry boat "Surrey" was constructed and is operated by the Corporation across the Fraser River from the city to Surrey. Cost, \$24,000. Captain, W. P. Grant; Engineer, M. H. Clisholm; Assistant, H. Parker; Purser, Jno. Strang. The ferry runs from 9:30 a.m. to 6:30 p.m. Fare 10 cents

**LIBRARY DEPARTMENT.**

The Public Library and Reading Room was erected by the City at a cost of \$25,000. It is managed by the following commissioners: Wm. Baillie, A. Morrison, Dr. DeWolf-Smith, Thos. Turnbull, A. Shepherd. The institution is free.

**STANDING COMMITTEES.**

*Finance, Railway and Ferry*—Walker, Curtis, Keary, Smither, Sinclair. *Board of Works*—Scoullar, Smither, Shiles, Curtis, Kennedy. *Police*—Keary, Walker, Ovens, Shiles, Gifford. *Fire and Light*—Curtis, Keary, Scoullar, Sinclair, Smither. *Water and Sewerage*—Ovens, Walker, Sinclair, Gifford. *Health*—Gifford, Smither, Ovens, Shiles, Kennedy. *Parks*—Sinclair, Kennedy, Curtis, Scoullar.

Ferry to South Westminster (Surrey) daily every hour.

WESTMINSTER-VANCOUVER TRAMWAY CO.

The advent of an electric street railway in any town is an affair of no small moment to its citizens, but when, as in the case of New Westminster, it is not only a street railway, but a connecting link with a neighboring city, it marks an era in the march of that town that must always remain distinct. The company that built the newly-completed tramway line between Vancouver and New Westminster was incorporated in the year 1890, with a capital stock of \$750,000. Its officers are:—President, D. Oppenheimer; Vice-President, B. Douglas; Secretary-Treasurer, S. T. Mackintosh; Auditor, E. O. Jenks; Solicitor, J. A. Forin; Bankers, Bank of British Columbia; Directors—D. Oppenheimer, B. Douglas, H. V. Edmonds, S. Oppenheimer and S. T. Mackintosh. The work was begun in November, 1890, and was completed in August, 1891. There are 14 miles of road constructed, but the company anticipates adding to that according as the traffic demands. The power house is situated about three miles from Westminster on the way to Vancouver, and is at present equipped with two 150-horse power engines; two dynamos, 80,000 watts capacity (in electricians' language), or equal to about 220 horse power each, besides all the other necessary equipment for the running of a first-class road. The line is fitted up with 40-pound steel T rails, and is running eight cars. Four of these are large and specially equipped with double trucks for the through service and have 50 horse power electrical equipment. Three of them are ordinary street cars with 30 horse power motors, while the eighth is a baggage car and has 60 horse power motors.

**New Westminster Gas Co.**—President, J. Cunningham; Secretary, A. Smither; Manager, C. Jeffrey.

**The New Westminster & Southern Railway.**—New Westminster is most advantageously situated as regards railway connections. The New Westminster & Southern, which is a part of the Great Northern coast system, extending from New Westminster to Blaine; the Fairhaven & Southern, extending from Blaine south to its connections with the Seattle & Montana; the Seattle & Montana from that connection at Jarmin's Prairie south to Seattle, and the Portland & Puget Sound railroad from Seattle to Portland.

Glass and Cargoes with A. B. MACKENZIE & CO., 607 Columbia St., New Westminster.**

NEW WESTMINSTER CITY STREET DIRECTORY. 1037

This road, which is about completed, will make New Westminster the only point of importance in the Province of British Columbia having direct railway communication across the international boundary line, and thus forming close connection with the great trans-continental railway systems of the United States. The Southern Railway, which was built by the enterprise of the citizens of New Westminster, will be of substantial benefit to the city and country generally.

**Reid & Currie Iron Works Company.**—This Company is the largest of its kind in the city, and was only recently incorporated into a joint stock company, with a capital stock of \$100,000. The company manufactures bridge and cannery material, mill machinery, logging and iron working tools, machine shop supplies, boilers, together with all kinds of fittings and machinery for putting steamboats, ships and new buildings into repair. In addition to the manufacturing business, the Reid & Currie Iron Works Company are agents for the John Doty Engine Co., and A. R. Williams, dealer in machinery, Toronto, as well as for the London Machine and Tool Company, and John Campbell, carriage manufacturer, London, Ont.

**Westminster Foundry.**—This foundry is owned by Mr. G. W. Loggie, with Mr. F. O'Brien as manager and J. F. Neilson as mechanical superintendent. The firm is engaged in the manufacture of all kinds of cannery machinery and castings, especially dies. Blacksmithing and housework, such as columns, etc., is also done. The machinery being new and especially adapted to the work done makes the manufactured goods of this firm extra fine, the cannery dies, especially during the last season, proving superior to those which the cannery men had hitherto been accustomed to purchase from San Francisco or New York.

**The Mechanics Mills** are owned by a joint stock company, with a capital of \$25,000. The business was established in April, 1890, and is under the management of Messrs. O. B. Ackerman, President, and J. B. Knight, Secretary. The capacity of the mill is about 15,000 feet per day.

**The British Columbia Mills Timber and Trading Co.,** of which the Royal City Planing Mills is but a branch, was established in 1862. It comprises, as well as the establishment here, the Hastings Sawmills and the Royal City Sawmill and Sash and Door Factory, Vancouver, and, altogether, employs about 1,000 men, being both the largest and the oldest institution of its kind in British Columbia. It is under the control of Messrs. J. Hendry, C. M. Beecher and D. McNair, and is an incorporated company.

**The McLaren-Ross Saw Mill.**—This mill, which has recently been put into working order, is one of the finest institutions of its kind on the Pacific Coast. Neither money, labor nor pains have been spared in fitting it up, and the consequence is its location, buildings and machinery are superb, huge and of the very best to be had. When running, its capacity is over 200,000 feet per day, while between 300 to 400 men are employed at the mill and camps. A splendid dock has been constructed, and it is the intention

BRITISH COLUMBIA DIRECTORY.

of the management to go extensively into the foreign trade. It is to be hoped that this magnificent concern will give further proof to foreign timber dealers of the excellence of British Columbia lumber in general, and that of Westminster in particular.

**The Brunette Saw Mill Co.** is a joint stock company, with a capital of \$200,000, controlled by Mr. J. B. Kennedy, President; Mr. H. L. DeBeek, Secretary, and Mr. John Wilson, Manager. It was established, in a small way, on Sapperton Point in the year 1877, and was then known as the DeBeek Brothers' Mill. It has been growing little by little ever since, until last year a new mill was erected, and now both the old and new structures are used. The new mill has a capacity of 100,000 feet a day, and turns out from 50,000 to 60,000 shingles as well. They manufacture all kinds of timber and lumber. The mill is lighted by electricity, and gives employment to about 250 men.

**CLUBS.**

**Westminster Club**—Columbia Street. President, G. D. Brynmner; Vice-President, A. J. McColl; Secretary, J. S. C. Fraser.

**Trinity Church Club**—Rooms, Clarkson Street, in St. Leonard's Hall. President, The Right Rev. Bishop Sillitoe. \$3.00 entrance fee and 50c. per month.

**CHURCHES.**

BIOGRAPHICAL SKETCHES.

1137

SOME OF BRITISH COLUMBIA'S WELL KNOWN  
**LEADING, PROFESSIONAL AND BUSINESS MEN.**

*What they are doing, and what we know about them. Also some of the principal Industrial Institutions. For other Institutions and Establishments, see index.*

**Robson, Hon. John, Prime Minister of B. C.** The subject of the present sketch is pre-eminently a self-made man.

"It is not wealth, nor birth, nor state,  
But 'got up and got', that makes a man great."

A native of Perth, Ontario, Mr. Robson arrived in British Columbia early in 1859, attracted by the fame of the gold mines. Like many others unsuccessful in the mines, he accepted readily such employment as came to his hand, heedful only that it should be honest. It was at this time that he earned the reputation (of which he is specially proud), of being the "boss" axeman of British Columbia. But his natural talents and indomitable energy and industry very soon took him from the ranks of the "hewers of wood" and gave him his fitting place among leaders of men and moulders of public opinion.

In 1861 he undertook the publication of the "British Columbian" newspaper, which, under his able management, soon became an acknowledged power in the land.

In 1866 he was elected Mayor of New Westminster, and the same year he was elected to represent the district of that name in the Legislative Council, and, two years later, re-elected for the same. Removing to Victoria upon the union of the Colonies and transfer of the seat of Government, he took editorial charge of the "British Colonist," and represented the district (including the city), of Nanaimo in the Legislature until 1875, when he received an important Federal appointment. Returning to active political life in 1882, he was elected at the head of the poll to represent his old constituency, (New Westminster), in the Legislature, and, upon the meeting of the new House and overthrow of the Heaver administration, he accepted a seat in the Cabinet formed by the Hon. Wm. Smith. Continuing in the Government subsequently formed by the Hon. A. E. B. Davis, he was, upon the death of that gentleman, called upon to form the Cabinet of which he is now the able and popular leader. At the general election in 1890 he was returned at the head of

BRITISH COLUMBIA DIRECTORY.

the poll in his old district, and at the same time elected for the district of Cariboo, for personal reasons electing to sit for the latter. When British Columbia was a Crown Colony he took a prominent part in the struggle for popular rights and people's government, and for union with Canada and the founding of what he claimed would become the "Great Britain of America."

A ready and forcible speaker and writer, he is a bold and uncompromising advocate of temperance and moral reform. He has been for years President of the Y. M. C. A., and takes an active part in the various reform and philanthropic schemes and organizations with which he is identified.

**Grant, John, M. P. P., His Hon. The Mayor.** It can be well said that when an authentic history of the Victoria of to-day shall have been written, giving due credit to those who in the early days of the city's growth pinned their faith and staked their monetary substance on the future of the city, it will be known that no one man among them all is due a higher meed of praise for its phenomenal prosperity than His Worship John Grant. In Victoria he has taken a very prominent part in the City Council since 1885, first as Councillor, and for the last three years as Mayor, which high post he now holds, for a fourth term, as well as representing Victoria in the present Provincial Legislative Assembly. Although he is in opposition to the present Government, his popularity extends to both sides of the House. He is a capital debater, and equally gifted both as a speaker and with his pen. He is looked upon as being exceedingly strong politically; socially he is one of the pleasantest of men, kindly in heart, generous to a degree, and ever ready to extend a helping hand to the needy.

**Brown, John Cunningham, M. P. P.** The subject of this brief sketch is a representative Citizen, and the popular Mayor and Postmaster of New Westminster. Mr. Brown was born in County Clare, South of Ireland 13 Feb., 1844, and has been a resident of this Province more than 29 years,—28 of which he has been a permanent resident of New Westminster—having come to British Columbia in July, 1862. Mr. Brown takes a deep and active interest in everything which has for its object the advancement and welfare of his adopted country, and at the last general election he was honored by the people of New Westminster to a seat in the Provincial Legislature. He also holds for a second term the office of Mayor, which fact speaks for itself regarding the estimation in which he is held, and the confidence reposed in him, by his constituents.

**Croft, Henry, M. P. P.** The representative of Cowichan. Mr. Henry Croft, is a gentleman whom it is a pleasure to know, and it is not surprising to hear that a man so devoted to the interests of the Province and welfare of the public as he is, should have been elected by acclamation of the people of his district to represent them in the Provincial Parliament, first in 1886, and again was elected at the last general election of 1890. He was born in 1856, and educated at "Rugby," the great English public school of Arnold fame, and of "Tom Brown's school days," and the pride of all "old Rugby boys." Is a member

## BIOGRAPHICAL SKETCHES.

1139

The Institute of Civil Engineers, and Institute of Mechanical Engineers, England. Was formerly connected with the Chemainus Sawmill Company as manager, and a partner of the firm of Croft and Angus. He was a member of the late firm of Bourcier, Croft & Mallette, one of the largest and most successful real estate houses, in Victoria.

Now manager of the Vancouver Island Land and Investment Co., Limited.

**Higgins, Hon. D. W., M.P.P.** The name of the Hon. D. W. Higgins is inseparably connected with all that pertains to Victoria's greatness and welfare in every respect. He was a member of the first Board of Education of the Colony of Vancouver Island, for the city of Victoria. Since confederation he has served as School Trustee and City Councillor, and at the general election of 1886, was sent to the Provincial Parliament, as the representative of Esquimalt District. On the elevation of Hon. Charles Edward Fooley, from the speaker's chair to the cabinet, at the last session of that Parliament, he was called upon to preside. At the late general election he was again returned for Esquimalt, and was unanimously chosen as speaker.

For Mr. Higgins' energy and enterprise, it may here be mentioned that the people of Victoria are indebted for the inestimable boon of having at present one of the most complete systems of Electric Street Railways possible, the excellent management of which reflects no small credit upon the Company of which Mr. Higgins is President and Managing Director, and one of the principal shareholders.

Mr. Higgins has resided in Victoria since 1858, and has seen it grow from a small fur trading village, with a handful of inhabitants to its present state.

**Hunter, Jos., M.P.P.** Mr. Hunter was born in Aberdeen, Scotland, and educated at the Grammar School and Marshall College, where he had the advantage of an excellent technical education, which was followed by much important practical work in his profession of Civil Engineer, and in which profession he has earned for himself a deservedly wide reputation. He came to this country in 1864, and for many years made Cariboo district his home, where he first gained political prominence by being elected to represent that district, in the provincial legislature in 1871. As a representative from Comox, and a City Councillor Mr. Hunter is a great acquisition. He is a zealous and conscientious legislator, and his social qualities have won him much popularity.

In 1884 Mr. Hunter was appointed Chief Engineer of the E. & N. Railway, and later his responsibilities were increased by being also appointed General Superintendent, in both of which capacities he now acts. He was the first white man to cross Pine River Pass, being in charge of the first exploring party, and there is no portion of British Columbia with which Mr. Hunter is not acquainted, having made surveys all over the province.

In 1877 he was appointed by the Dominion Government to undertake the responsible and important duty of defining the international boundary line, between the United States and the Dominion, where it crosses east of the Skeena River; and in accordance with the Russian treaty of 1825. Copies of the report of this survey were afterwards

BRITISH COLUMBIA DIRECTORY.

deposited in the archives of the Dominion, and U. S. Governments, where they hold a place among the most valuable and important records of the two respective Governments.

**Kitchen, Thos. E., M. P. P.**—The subject of this sketch is one of the new members of the present Legislative Assembly, having been elected at the last general election, and it has already been incident that in nominating him for parliament, his party have made a wise selection. Mr. T. E. Kitchen came to Chilliwack, in 1877, and is one of the leading farmers of the district. He has served a second time as Reeve, which fact speaks well for the high esteem in which he is held by the Municipality, besides he is the senior member in the Legislative Assembly, and since his election he has in every possible way endeavored to promote the interests of the District and Province at large. He is a zealous and conscientious legislator, and his many admirable traits have won for him a host of friends.

**Milne, Dr. George L., M. D., M. P. P.**—The subject of this sketch, Dr. George L. Milne, M. D., Victoria University Canada, 1880; C. M. Victoria University Canada, 1882; M. D. Toronto University, 1890; Elec. Chem. Med. Conn. B. C. 1885-90. Registrar and Secretary, 1886-91, is not only one of the best known physicians in the city, but is also one of the most public spirited of Victoria citizens. He is a native of Scotland, having been born at Garmouth, Morayshire, Scotland, in 1830. At the age of seven years he removed with his parents to Canada, where his early boyhood was passed; he obtained the groundwork of his education at Meaford and Toronto. Later he attended the Toronto School of medicine, his professional education was completed at that admirable educational institution, Toronto University, of which he is a graduate. Shortly afterwards he came to British Columbia to enter into practice. He has served on the board of school trustees, and has been Registrar and Secretary of the B. C. Medical Council since its inauguration in 1880. For several years he has occupied the position of Health Officer for the city, which position he still holds, and during the consideration of the sewerage system for the city he took a lively interest in the matter, the discussion of which no doubt brought about the consideration of the separate system now adopted by the city. Besides his ability in his profession, few men in the city are more highly respected or have a larger circle of friends.

**Turner, Hon. J. H., M. P. P.**—Probably no man on the Government side has a wider reputation, is more generally known, or more highly respected than the Hon. J. H. Turner. He came to British Columbia in 1862, and in 1863 was one of the Committee for forming the Volunteers in Vancouver Island. Joining the Blanket Coat Company as a private, and passing through as sergeant, lieutenant and captain, and finally retiring into the reserve militia with the commission of lieutenant colonel, on 19 June, 1881. He was elected to the city Council of Victoria in 1877, and served two terms as Councillor; elected Mayor by acclamation in 1879, and served three terms. Was chairman of the British Columbia Benevolent Society, and the Royal Hospital, three years, retiring from these positions before leaving the Province, for a

visit to England in 1882. Was finance minister and minister of agriculture during the administration of Hon. A. E. B. Davie, and retained both offices when the Government was re-formed upon the decease of that gentleman. He was first elected as a member of the Assembly at the general election of 1886, and re-elected at the last general election for Victoria City. He is a member of the firm of Turner, Heston and Co., one of the leading wholesale houses of the city.

**McKenzie, Collin Campbell, M. P. P.**—A Pioneer of 1859, who came to this Province 42 years ago is the subject of this brief sketch. Mr. McKenzie is a native of the State of Washington, having been born at Fort Vancouver on the 25 March, 1836. He is an educationalist of a very high order, and has had extensive experience in education, not only as a teacher in several country schools, but also for many years as Principal of Victoria Boys' School, and subsequently as Superintendent of Education for the Province under the Wilken and Hegan Governments. On dismissal from Office by the Smith-Robson Government, he settled at Nanaimo, where he has established himself as a Real Estate and Insurance Agent, Accountant, &c., for which business he, by his deep learning, and scholastic ability, is so well qualified, and in which he has met with considerable success. At the general election in 1890, he was returned as one of the two members for Nanaimo Electoral District in opposition to the present Government.

**Coughlan, John, Alderman.** Among the prominent and enterprising citizens of Victoria, whose main object is to advance the interests of the city in every possible way, may be included Mr. John Coughlan. He was born in John's Newfoundland, April 21st, 1854, and received his education in Halifax City. When 24 years of age he came to British Columbia, arriving in Victoria 24th August, 1878. Mr. Coughlan has been a brick manufacturer for the past ten years, being the senior member of the firm of Coughlan & Mason, proprietors of the Pioneer brickyard. He has been a member of the City Council since 1887, always giving careful attention to the duties of his office, and fully satisfying the requirements of his constituents.

**Holland, Joshua, Alderman.** Mr. Holland is an Englishman of a genuine and characteristic type, and was born in Shropshire in 1861. When about 21 years of age his ardent desire to be in the busy world and in a prosperous country impelled him to cross the ocean, which he did in the early part of 1882. Journeying westward he finally reached the Northwest Territories, staying there about one year only, when he came to the conclusion that there were better opportunities for a man of his stamp further west, accordingly early in 1884 he came to Victoria and worked at his chosen trade of carpenter for about two years, when he finally embarked in business for himself as a contractor and builder, and with what success is better answered by the large number of dwellings, both city and rural, which have been constructed by him. Mr. Holland began his public life as a member of the City Council, to which position he was elected in 1890, and re-elected at the last general election, when he was appointed chairman of the sanitary, printing and public market committee, and is also an enthusiastic member of the streets committee. He is a man accustomed to rely solely on his own judgment, and

to weigh well the circumstances and prospects of any enterprise before undertaking it, but having once given it his sanction he throws heart and soul into the thing, and invariably finds success with the issue. He is of a genial and social disposition, and is always among the foremost to do or to give when the honor or the interests of his chosen home are at stake, and his aid and counsel are always sought among the first.

**McKillican, W. D., Alderman.** Among the goodly number of citizens who have the interest and welfare of Victoria ready at heart it may, without fear of contradiction, be said that none hold a more prominent place than Mr. W. D. McKillican, whose untiring energy and zeal in every enterprise pertaining to the advancement of the city has won for him the esteem and highest appreciation of all who know him. Mr. McKillican is a native of Canada, born at Vanklesk Hill, Ont., in 1836, and came to Victoria in 1871, where he established himself in business as a contractor and builder. In 1878 he entered into partnership with Mr. J. W. Anderson, under the name of McKillican & Anderson, and the firm at present is to be congratulated on being the recipient of a large and increasing patronage, the general confidence and public esteem which a system of upright and straightforward dealing in all business transactions has gained for it. He has served six years in the City Council under different administrations, and at the last election was again returned to serve the city.

**Munn, H. A., Alderman.** Among those who have hitherto assisted to build up the city of Victoria and to extend its reputation, it may be truly said that none have been more active in this respect than Mr. H. A. Munn, and it was but a just acknowledgment of his public worth as a citizen who has the welfare of Victoria at heart, that at the late municipal election he was elected to the City Council as one of the representatives of James Bay ward. Mr. Munn is a young man of frank and liberal views, takes an active interest in politics, advocates a spirited policy in the matter of civic improvement, and believes in building up for the present, but for the future, in which he has unlimited faith, the greatness of Victoria.

**Renouf, C. E., Alderman.** At the late municipal election Mr. Renouf, of the well-known firm of Nicholles & Renouf, was elected a city councillor by a large majority over his opponent. He has many sound business principles, and taking into consideration his extensive knowledge of the needs of the city, its resources and liabilities, will no doubt prove a very valuable member of the city government. He is a man closely identified with the interests of Victoria, and gives much of his time and money to stimulate any enterprise which tends to benefit the city. Until recently he was secretary of the British Columbia Agricultural Society.

**Richards, Jr., F. G., Alderman.** Mr. Richards, well known, is the son of an Englishman, but was born at Dodgeville, Wis., in 1855, his parents having emigrated to the United States in the early fifties. He was educated at New Westminster and Victoria, having come with his parents to this city in January, 1862, and was for twenty years a draughtsman in the lands and works department of the provincial gov-

INSURANCE, MONEY.

ernment, which position he resigned for the proprietorship of the Clarence Hotel, disposing of the same about two years ago, and entered the real estate, loan and insurance business, for which his extensive and reliable knowledge of Victoria and the resources of the surrounding country so well qualified him; having been a permanent resident for the past twenty-nine years, and a large property owner, he has been in a position to watch the growth of the city of Victoria and of possessing himself of such information regarding it to an extent which has fallen to the lot of but few other residents, hence the reason for his having been selected as a member of the City Government. He is a young man whom one cannot know without entertaining for him a very high regard, and one who justly deserves the confidence which is placed in him by all who have the pleasure of knowing him.

**Robertson, John, Alderman.** The gentleman whose name heads this sketch is too well known in this city and province to need any introduction from us, even had we space to devote to anything more than a brief notice of such an honorable career as is attached to the name of Mr. Robertson. He is a native of Scotland, having been born at Blair Athol, Perthshire, in 1832, and has an ancestral pedigree of which he may be justly proud, his father being one of the old Struan Robertsons. He came to Victoria twenty-seven years ago and engaged in horse-shoeing, and for a time was also employed at Fray's Yard. Subsequently he went to work for the late Joseph Pratt, in the Albion Iron Works, and remained there until 1870, when he went to Charlton, remaining there five years, after which he returned to Victoria and for awhile worked again in the Albion Iron Works, and in 1880 he started in business for himself as a boiler maker and general blacksmith, and to-day Mr. Robertson may be congratulated on having succeeded in building up for himself a business plant which is the largest of its kind in the province, and too much credit cannot be given him for having risen by his own efforts to a place of honor among his fellow men in the social, political and business walks of life. At the late election he was elected to a seat in the City Council by a large majority, and is one of the oldest of Victoria's pioneers and citizens, of whom the community should feel proud.

**Smith, A. J., Alderman.** Ever zealous for the advancement of the city of Victoria and whatever may tend towards its future greatness and prosperity, in which he has unbounded faith, and being the eldest member of the Board of Aldermen, Mr. Smith is a city father of whom the people of Victoria may be justly proud. He has for the past seven years most ably represented James Bay ward in the City Council, where he has rendered excellent and effective service, and is also chairman of the streets and police committees. He is a man of broad and liberal views, and believes in what is termed a progressive policy.

**Hilbert, John, Mayor.** One of Nanaimo's most popular and prominent citizens is the subject of this sketch. Mayor Hilbert was born in Lincolnshire, England, in 1815, where, after serving seven years as a carpenter's apprentice, he worked at his trade until he came to British Columbia, landing at Nanaimo in the year 1874. After his arrival he was for a time employed by the Vancouver Coal Mining and Land Co.,

subsequently working at his trade as a journeyman for about a year, he entered into business for himself, in which he has been eminently successful, and has been an employer of labor ever since. Notwithstanding the heavy claims of business upon his time and attention, he has ever taken an active interest in public affairs, and for six years has ably served the people of Nanaimo in the important capacity of alderman and councillor, and also for the greater part of that time as Chairman of the Board of Works, and in 1891 he was elected by acclamation to the position of mayor, which important office he still holds. He is the founder of Nanaimo, of the Ancient Order of Foresters, the Ancient Order of Workers and the American Legion of Honor, and a member of some five or six other orders, also a member of the Nanaimo Fire Co and the Board of Trade since their commencement. He was one of the first members of the Nanaimo Hospital, and is at present chairman of the Nanaimo School Trustees. Mayor Hilbert is a large hearted, public spirited man, ever anxious of promoting the welfare of his fellow men, in every possible way, and of whom it may be truly said that whatsoever his hand findeth to do, he does it with all his might.

**Curtis, David Samuel, Alderman.** The subject of this sketch, who occupies a prominent position not only in the ranks of his profession but also as Alderman in the city of New Westminster, was born in Cleveland, Ohio, U. S. A., on the 1st of January, 1856. After completing his education and the usual time required in the study of his profession, Mr Curtis chose for his battlefield of life the Province of British Columbia, and accordingly came to this country in September, 1874, taking up his residence in the royal city of New Westminster, where he established himself in his profession as a chemist and druggist, and has since continued to carry on an extensive and successful business.

**Kennedy, James Buckham, Alderman.** The worthy and enterprising subject of this sketch, Mr J. B. Kennedy, was born at Bytown, now Ottawa, Ontario, on the 24th February, 1841. At the age of 23 years he followed the occupation of a farmer, working on a farm near Ottawa, when he entered the lumber trade, and for nine years was employed in the same by Mr A. H. Bellamy, Ottawa. In the spring of 1877 he came to British Columbia, taking up his residence at Sapperton, New Westminster, where he has been engaged in the lumber trade ever since. He has been a stockholder in the Brunette Saw Mill Co., Ltd, since its formation, and for several years has been president of the company. He was also, for several years, a member of the School Board of New Westminster, and of the Knights of Pythias and Royal Templars of Temperance, and an Elder of the Presbyterian Church and a City Councillor.

**Smither, Alfred, Alderman.** The subject of this sketch, who occupies a prominent position in the city of New Westminster as an accountant, etc., was born in London, England, on the 3rd January, 1818, and left Liverpool for Halifax, N. S., on board the Cunard steamship Africa, 7th December, 1867, when he was sent to by the Bank of British North America, in which he was at the time

and previous to his leaving London, engaged as an accountant. After remaining about two years in Halifax, Mr. Smithier left that city and resided for different periods in Madras, Illinois, Kansas and San Francisco, California, subsequently coming to British Columbia in 1877, where he was employed first at Victoria, Enroy, Yale and Kamloops, finally establishing himself in New Westminster, where he has since been actively identified with the city's interest, and as a recognition of his varied services he has for the second time been elected Alderman to represent Ward No. 1 in the City Council. He is also secretary of the New Westminster Gas Company, Limited.

**Campbell, George, Alderman**—The subject of this sketch is one of the leading and most loyal citizens of Nanaimo. Mr. George Campbell is a native of Nova Scotia, having been born at Cape Breton on the 10th April, 1840. At the early age of 12 years he began the battle of life in a coal mine, and still follows that occupation. In 1875 he came to this Province, taking up his residence at Nanaimo, where, by his exemplary life he has gained for himself a name and reputation of which he may be justly proud. He has hitherto also been singularly fortunate in having escaped his many terrible accidents and catastrophes so incidental to his calling, and as an instance we may mention that in 1887, on a certain occasion when he was sick and unable to attend his usual work, an explosion took place in the mine in which he was employed, belonging to V. C. O., killing both his partner and the man who had temporarily taken his place. In 1883 he was elected Councillor, and in 1891 Alderman, in both of which positions he has done good service for the city of Nanaimo. He was one of the pioneers who, on October 1st, 1884, instituted the Nanaimo Equitable Pioneer Society, and the establishing of its cooperative and salutative store. Was elected and served on the committee of management for three years, and as president for five years. He is also President of the Nanaimo Association of Spiritualists for the fourth term. Mr. Campbell is a true friend of the working man and a staunch advocate for the permanent relief of the laborer.

**Walker, Walter James, Alderman**—The subject of this sketch, Mr. Walter James Walker, a worthy surviving son of Edward Johnson Walker, Esq., of the *Hornet* generation, was born at Halifax, Yorkshire, England, 3rd June, 1842, and was educated at the Commercial College, Ripponden. He studied his profession for three years in the Borough Accountants' Office, Town Hall, Halifax. Afterwards was cashier and manager for Messrs. Jonathan Bracken & Sons, paper makers, Huddersfield, Lancashire, until 1883, when he came to British Columbia, in the month of October of the same year, taking up his residence at New Westminster, where he has established himself, and at present carries on an extensive and successful business as a chartered accountant and real estate broker. In 1886 Mr. Walker was appointed City Auditor of New Westminster, and in 1887 Treasurer, Accountant and Secretary of the New Building Society. In 1888 was elected a member of the Institute of Chartered Accountants of Ontario, and a member public in 1889. In 1891 he was elected Alderman of Ward 1 and appointed public commissioner and chairman of the finance, railway and ferry committee.

and in the same year was also elected chairman of the Board of Trustees for two years. He is also auditor for several public companies in New Westminster and Vancouver.

**McCutcheon, Charles, Alderman.** The subject of this sketch is a well known and highly esteemed citizen of Nanaimo. Mr. McCutcheon was born at New Brunswick, 18th February, 1832, and came to British Columbia in 1875, taking up his residence at Nanaimo, where he established himself in business as storekeeper, in which he has succeeded with considerable success, and has for years been carrying on a thriving business. He also holds a seat in the City Council as Alderman. Previous to his coming to this province Mr. McCutcheon had extensive experience in lumbering, and his reminiscences of camp and forest life, such as from which many a true and interesting tale might be gathered, and in the relating of which, many a pleasant hour might be passed.

**Keary William Holland, Alderman.** The subject of this brief sketch, who is an old and well-known resident and City Councillor of New Westminster, was born at Dublin, Ireland, in April, 1828, and came to British Columbia in August, 1859. Having come to this country in early childhood, Mr. Keary has spent the greater part of his life in this Province, where he received his education, subsequently taking up his residence at Sapperton, New Westminster, where he has established himself as an accountant, etc., and meets with a liberal share of public patronage.

**Armstrong, R. J.** The subject of this sketch, one of New Westminster's enterprising business men, was born in the township of Cayn, Ont., 1821, where he spent the greater part of his life, but, like many others, having heard of the fame of British Columbia, he was induced to leave his native country and, in 1882, came to this Province, taking up his abode in the royal city of Westminster, where he still resides, and has by square dealing and strict integrity in all business transactions, gained for himself a position among its most respected citizens.

**Ashwell, George R., J. P.** The subject of this brief sketch, Mr. George R. Ashwell, is the pioneer storekeeper of Chilliwack, having come from Bedfordshire, England, to this place, twenty years ago, where he has carried on a successful business ever since. He has always taken a deep and active interest in the welfare of Chilliwack, and has been several times Reeve, a fact which speaks well for the confidence reposed in him and the high esteem in which he is held by his fellow-citizens. He is a Justice of the Peace for the District of Westminster, and is much respected personally by all who are acquainted with him.

**Austin, J. J.** The subject of this sketch, who may justly be termed one of the early pioneers, having come to this Province some 40 years ago, is not only one of Victoria's best known and most respected citizens, but is also a gentleman whom it is an honor and privilege to know, one whose word is as good as his bond and in whom all can have the most implicit confidence. Mr. Austin not only carries on

large and important business as a real estate, financial and insurance agent, but is also treasurer of the British Columbia Pioneer Society, the B. C. St. George's Society and Victoria Theatre Co'y, Limited, and agent for the Norwich Union Fire Insurance Company, England. He was also formerly accountant in the Provincial Lands and Works Department, and subsequently acting collector for the Province, and is identified with every movement having for its object Victoria's advancement.

**Baker, Edgar Crow, Ex. M. P.** One of Victoria's most prominent and public spirited citizens is Mr. Edgar Crow Baker, who is the third surviving son of Edward William Whitley Baker, Esq., of Lacard Park, Cheshire, England. The subject of this brief sketch was born in 1841 at Lambeth Surrey, England and is of an old English family that traces its descent from 1119. He was educated at the Royal Hospital School, Greenwich, and in 1860, obtained nomination by competition into the Royal Navy as Master's Assistant, (now styled Navigating Midshipman), having held the first place in the first class, nautical, for fifteen months previous to the examination, and passed with honors at the head of a class of 100 competitors at the general examination, winning the first prize in mathematics, navigation, nautical astronomy and scripture history, and on passing final test examination at the Royal Naval College, Portsmouth, was awarded the silver medal and thirty-five guineas in coin, also fifteen guineas worth of nautical instruments and books. He was then appointed to H. M. S. Victory but was transferred to the Bellona ten gun sailing brig, in which he continued until the spring of 1861 when he was appointed to H. M. S. Cygnet on the North American and West Indian Station and was present at the bombardment of the Haytian Capital when H. M. S. Bulldog was lost; also landed with Navy Brig, at the Jamaica insurrection during the time of Gay Eyre. Went up the Mississippi in H. M. S. Cygnet during the American civil war to protect British interests. Was sent away as prize officer in 1863 in charge of the ship Dalhousie, of Glasgow, saved by the Cygnet in the straits of Belle Isle and navigated her thence to St. Johns, Newfoundland. Was paid off from the Cygnet at Halifax in October, 1864, and joined H. M. S. Duncan, flag ship of Vice Admiral Sir James Hope, G. C. B., a ninety one gun line of battle ship on same station. During the Fenian scare took troops to St. Andrew, Bay of Fundy, and landed for service with Naval Brigade. Passed examination, received first class certificates, and obtained first commission as Navigating Sub-Lieutenant in September, 1865. Returned to England in June 1867, obtained first class certificate in examination for Navigating Lieutenant at the Royal Naval College, at Portsmouth, and an extra certificate in his examination before the Elder Brethren of the Trinity House as a Channel Pilot for H. M. Frigates of any size. Subsequently served in H. M. S. Fox in the transportation of boilers and machinery from the various dockyards in the United Kingdom for three years. Subsequently Mr. Baker served in H. M. S. Cockatrice as Naval Sub-Lieutenant in charge up the Mediterranean and the river Danube enforcing the rules of the European Commission and during this time made a survey of St. George's Channel, river Danube and several of the places where grain vessels had been sunk. Came home across the continent and remained on half pay until March,

1872, when he was appointed to H.M.S. Royal Alfred as Navigating Lieutenant, then H.M.S. Sirius in the West Indies, but exchanged into H.M.S. Siebe and took that vessel from Bermuda to Halifax and thence to the various ports in Prince Edwards Island, Newfoundland, and the Gulf of St. Lawrence, protecting the fisheries. At his own request, going on half pay in September, 1872. He served for six months on the Board of Examiners of Master and Mates when he was superceded by a political nominee, accepted a position as accountant in the store department of the Intercolonial Railway in which he continued until March 1873 when he left on furlough for British Columbia. Since his arrival here Mr. Baker has been engaged in various business pursuits, having received the position of accountant at Victoria agency of the Hastings Mill for three years, and afterwards similarly employed for nearly two years in the Provincial Treasury. Under the Dominion Act of 1873, he organized the pilotage system of British Columbia, and has also held the position of Secretary and Vice-President of the British Columbia Board of Trade, President of British Columbia Rifle Association, Vice-President of Dominion Rifle Association, Grand Secretary and Grand Master of the United and Accepted Masons, Vice-President British Columbia Benevolent Association, Member of the Council of the Imperial Federation League, Canada, Director in the Royal Hospital, and still holds the position of Secretary and Treasurer of the Board of Pilot Commissioners, Managing Director Victoria & Esquimalt Telephone Co., Managing Director Victoria Electric Light Co., Managing Director British Columbia Deposit & Loan Co., Director Matsqui Land Co., Director Nelson City Land & Improvement Co., Secretary Howe Mining Co., 1874, President Aliso & Emma Consolidated Gold Quartz Mining Co., Managing owner steamer Alert, Justice of the Peace for the Province, Real Estate and Financial Agent, Hydrographic and Marine Surveyor, Conveyancer and Notary Public. In January, 1882, he was elected a member of the City Council from Yates Street Ward, and in July following was returned at the head of the poll by the electors of Victoria District to a seat in the Canadian House of Commons, and at the general election in 1887 was again elected as the Senior Member for Victoria in the Dominion House of Commons by a larger majority than in 1882, but owing to his commercial pursuits demanding his undivided attention he resigned his seat in the Commons on the 22d of September, 1889. Personally Mr. Baker is one of the most genial of men, an English gentleman in the truest sense of the word, a man of rare qualifications and extensive practical experience, a ready writer and fluent speaker, and is highly esteemed by all classes of society.

**Blaker, Campbell Reginald.** Among the successful and enterprising business men of New Westminster, the subject of this sketch occupies a prominent position. Mr. Blaker is an Englishman, born at Ingham Crawley, in the county of Sussex, England, 11th February, 1861. After finishing his education at Lancing College, Sussex in 1879, he went to Masterton, in New Zealand, where he for a time established himself as an auctioneer and estate agent, subsequently returning to England in 1881. He then started in business as a manufacturer in the East of London, but owing to foreign competition, was eventually obliged to give up the enterprise, when he once more left the old country.

try and came to B. C., arriving in this Province on the 13th May, 1889, taking up his residence in the royal city, which he feels he has no cause to regret having made his adopted home.

**Baker, J H** The subject of this sketch is the enterprising proprietor of one of the largest boot and shoe establishments in this city. Mr. Baker is a native of Canada, and was born in Ontario in 1857. He came to British Columbia in 1879, taking up his residence here in Victoria, where some eight or nine years ago he established his present business, which from a comparatively small beginning has steadily developed and increased to an extent that Mr Baker may now be congratulated for having at present one of the finest boot and shoe houses in the Province. The premises occupied are known as the Bon Marche Boot and Shoe Store, 89 Government Street, which are artistically arranged throughout and where is carried one of the largest and finest stock of boots and shoes, and everything pertaining to foot wear to be seen in Victoria.

**Baker, Albert R D D S** The subject of this sketch is a gentleman who occupies a prominent position among the dentists of this city. Mr. Baker is a native of Victoria, having been born here in the Queen City in 1870. He is a graduate of Philadelphia Dental College; also a member of the Pennsylvania and Victoria, B. C., Dental Associations. Being a regular graduate of the above-named college Mr. Baker has a thorough knowledge of all that pertains to his profession, and both the implements and material used in the prosecution of his business are of the latest and most improved kinds, and of the best that can be procured. His rooms are situated over the drug store of Messrs. Cochrane & Munn, corner of Yates and Douglas Streets, and are among the most elegant and commodious in the city, while his uniform gentleness and attention toward his patients which has won for him a wide and favorable reputation is a high recommendation to all requiring dental aid.

**Bales, James Chestney.** The subject of this sketch, as well as having an excellent reputation as an expert and professional accountant, has for nearly thirty years been one of the well known figures in the growth and prosperity of Victoria. Mr. Bales, in every sense of the word, is an Englishman of the true type, and came to this city in 1862, where he has had a very honorable career and has established for himself a reputation for business sagacity and foresight that has gained him the esteem and confidence of all business men by whom he is known, being of an energetic spirit and withal of unimpeachable integrity. Besides being an accountant of high repute Mr. Bales is also local General Agent for the well known Lancashire Fire Insurance Co.

**Bowell, J M.** One of Vancouver's well known and most prominent citizens, is the subject of this brief sketch. Mr. John Moore Howell was born at Belleville Ont., 1st Oct., 1856, and first entered the Public Service as Private Secretary to the Minister of Customs Oct., 1878. In Oct., 1882, he was appointed Surveyor of Customs at the Port of Winnipeg, and on the Port of Vancouver being established in July, 1887, he was appointed Collector of the City, which important office he still holds. In Oct., 1880, Mr. Bowell married Miss Alma C., the only daughter of Mr. Thos. Patterson, appraiser of Customs, Ottawa.

**Black, George.** Brighton House, Burrard Inlet. The subject of this sketch who hailed from the Land of the Loal, was born in Leith, Scotland, in 1841, and is one of the oldest Pioneers in the P. C. having come to B. C. in June, 1858, when the country may be said to have been nothing more than a dense forest, and was one of the first to arrive at Chilliwack. After travelling through all the mining districts, experiencing many vicissitudes, Mr. Black subsequently settled in 1865 taking up his residence on Burrard Inlet, where he still is carrying on constantly a successful business as hotel keeper and is recognized as one of the leading men of that district.

**Blackwood, Edward Everett.** The subject of this sketch is a well known citizen of Victoria and the present agent of the N. P. R. R. Co., P. S. & S. S. Co. and N. P. R. Co. Company. Mr. Blackwood was born at Placerville, Calif., October, 1863, and came to British Columbia in the spring of 1880. He spent his early days in the country of his birth, where he remained until 1873 when he removed to Oregon, and there worked on his father's farm until 1873 when he entered Bishop Smith's Mechanical Academy, graduating in 1880 after which he taught at the Victoria High School for three years and also studied and practiced civil engineering, subsequently entering the service of the N. P. R. Co. in 1883, where he holds his present appointment. Mr. Blackwood is a young man of sterling qualities, and the N. P. R. Co. are to be congratulated in having in their local agent a gentleman respected and held in high esteem by the business men of Victoria for his excellent services, while personally he is popular with all who know him.

**Barrett & Carpenter.** Of all the real estate agencies in this city not one is more justly entitled to a place within the ranks than the excellent firm of Messrs Barrett & Carpenter, who have an equipped and commodious office at 27 Government street, and a bureau of information requisite for investors, and which the experienced and obliging members of the firm are always glad to be seeking the same. This firm, which was established in 1880, has a steady and substantial business as real estate brokers and agents. They are also agents for the Challenger Club in A. C. Fort Angeles and for Lewis' uptown steamship office, New York, and are well worthy of all the patronage the public are pleased to bestow upon them.

**Barker, Robert.** The subject of this sketch, Mr. Robert Barker, was born in the south coast of England, near Brighton, in November, 1864, and was educated at Brighton, London and Göttingen (Hanover) University. He subsequently spent several years in London, England, with some of the leading commercial and business houses. In 1886 he came to this Province, taking up his residence in Vancouver where he has since carried on a successful and profitable business as real estate and insurance agent, notary public, etc. Mr. Barker is an enterprising and progressive young man, well known in the mercantile and social world, and worthy of every success.

## BIOGRAPHICAL SKETCHES.

1151

**Barnsley, John.** The subject of this sketch, Mr. J. Barnsley, who is a partner of the well known sporting goods establishment of this city, was born in Eng., 1820, and came to Victoria in 1881, where he established himself in business, of which he was for some years sole proprietor, until about two years ago, when he admitted into partnership Mr. J. R. Collier, since which time they have carried on a steady and prosperous business. The premises occupied by them are situated at 119 Government street, where they carry on a wholesale and retail trade in all kinds of sporting goods. The stock carried is a large and valuable one, and embraces everything in the sporting goods line. They make a specialty of repairing and remodelling guns and revolvers, and perfect satisfaction is always guaranteed.

**Bayne, Richard R. M. R. I. B. A.** The subject of this sketch, after a long and honorable professional career in India, came to Victoria in July, 1890, and commenced practice in May, 1891. Mr. Bayne is a graduate and member of the Institute of British Architects, London, commenced the study of his profession as a pupil of his father, and afterwards with Sir Chas. Barry and Sir Digby Wyatt. Was Queen's Prizeman at South Kensington in 1869. Soane Medalist in 1864, travelled for two years and a half in Europe as a student, passed the Institute of Architects' examination in 1866, and was, therefore, elected graduate and member of that institute, subsequently went to India as architect of the E. I. Railway Co., a company owning 2,000 miles of railway. Carried out all their buildings. In 1881, built their new offices in Calcutta, a block three and four stories high, 300 feet long by 180 feet broad, at a cost of £50,000, in addition to the ordinary railway engineering. Left that service with the grade of district engineer. His principal works in Calcutta and other parts of India are the Calcutta Public Markets, area 75,000 square feet, cost £90,000. Designed the Madras Public Markets, estimated cost, £35,000. Corinthian Theatre, New Masonic Hall, the Jewish Synagogue Beth Ael, several jute and cotton mill works, two Bathing Ghats. Lengthened the Calcutta Dry Docks 175 feet, a very difficult piece of engineering work, many private dwellings for natives, joint scheme with Mr. Chas. Denham, F. C., for dock and canal connection with Calcutta. In Bombay Design for European hospital, 160 beds. Design for a scheme of theatre, baths, gymnasium and recreation grounds. In Madras Public Markets and Town Hall, bath premises works. In Allahabad (capital of the N. W. Provinces) the Thornhill Mayne Museum and Library, cost £25,000. Mayo Town Hall, cost £17,000. Native Hospital, Masonic Hall and Public Baths, a large hotel, costing £15,000, several Hill Station private residences, and a very large Hill Sanitarium School for 200 boys and girls, with hydraulic water scheme, with 1,200 feet rise to school buildings. Palace for the Raja of Durbungha, involving an estimated expenditure of over £100,000.

**Bell, Elliott.** The subject of this sketch, Mr. Elliott Bell, is a native of Scotland, having been born at Perth, 1850. At an early age he left home and went out to the Cape of Good Hope, where he held a commission in the irregular forces during the time of the native disturbances. Afterwards went to sea as supercargo in the N. S. S. Co., but subsequently resigned to accompany Sir Charles Warren's expedition against the Boers, after which he again went to sea as purser, in the Anchor Line, and left that company to join the C. P. steamers between Vancouver and China, which position he resigned in 1889, to join the firm of Chipman, Morgan & Co., of New Westminster, of which well known and enterprising firm he is at present a partner.

**Bossi, Geo.** The subject of this sketch, who is an Italian by birth, and one of Victoria's oldest and well known citizens, was born at Porto Corsico Lombardy, Province of Como, Italy, on the 1st March, 1831, and thirty four years later he left the shores of his classic country and land of his

birth to seek a home in more northern latitudes, arriving in British Columbia on the 25th May, 1865, finally settling in Victoria, where he has since continued to carry on business, in which he has met with a fair measure of success. He is at present proprietor of the well-known Russ House, situated at 32 and 34 Johnson street.

**Boucherat & Co.** This firm was established in 1859, since which time it has continued to occupy a foremost place among the large importers and wholesale wine and spirit merchants in this city. The premises occupied by them are prominently situated at No. 13 Yates street, where they keep in stock in large quantities and at all times a fine assortment of the choicest imported and domestic wines, liquors, brandies, rums, whiskies, &c., that can be procured, of the most reliable brands and noted for their purity, which is evinced by their large trade, extending throughout the entire Province. They are sole agents in British Columbia for G. H. Martell & Co.'s champagnes, Frellet's clarets and Santers, Josephine's Burgundy wines, Bass' Ale, Guinness' Stout and Schlitz Milwaukee Beer. They also keep a large stock of imported cigars, which they import from Cuba, &c. The members of the firm are Messrs. J. Congdon and Luke P. Boucherat, gentlemen both noted for their excellent business capacity and of high repute.

**Burgess, J. P.** One of the oldest and best established carpenter shops in this city is that of Mr. J. P. Burgess, contractor and builder, No. 10 Broughton street, where he keeps constantly on hand large quantities of well-seasoned lumber, which he finds necessary for his steadily increasing business, and where all the facilities for remodeling and renovating buildings and putting in store and office fixtures, are most complete. This business has been in existence here over twenty years, and in the prosecution of the same Mr. Burgess has the advantage of many years practical experience and thorough knowledge of it in detail. He has always maintained a reputation for honorable and fair dealing, and work of a first class order. Employing only the best and most reliable and careful workmen, and giving his personal attention to all work entrusted to him, parties, therefore, entrusting their orders to him can rely on having them executed with promptness and satisfaction.

**Braden & Stamford.** This firm, which is one of the most prominent and important of its kind in this city, carry on an extensive business as gas, steam, hot water and sanitary engineers, plumbers, etc. The business was established by Mr. Braden twenty years ago, and the firm of Braden & Stamford joined about three years ago. Their business premises are situated at No. 47 Fort street, where they carry the largest and most complete stock of plumbing and gas fitting materials and fine gas and electric light fittings of any firm in the Province. The members of the firm are Mr. James Leonard Stamford and John Braden, gentlemen who have devoted the best of their lives to this business, and have mastered every department. They employ regularly from twenty to thirty thoroughly experienced workmen, and all work done by this firm is executed in a strictly first class manner.

**The Bradstreet Co.** The first resident representative of this well known company in B. C., was Mr. J. B. Gordon, who came from their Toronto office to Victoria in March, 1890, but on his being appointed manager of their business for B. C. and Washington state, and taking up his residence at Seattle he was, in September, 1890, succeeded by Mr. R. E. Parke, who is now superintendent of their business in this city, and whose office is located at 21 Bastion Square. This company commenced the Mercantile Agency in 1849, and have offices now in all parts of the world.

**Brown, John L.** The subject of this sketch who enjoys the honor of having been born in the old celebrated Scotch town of "Bonnie

BIOGRAPHICAL SKETCHES.

1153

Dundee," first saw the light on the 1st of May, 1858. In 1881 Mr. Brown left his native country and came to British Columbia, taking up his residence at New Westminster, where he has established himself in business as a Photographer, and being an artist of well known ability, he is meeting with well deserved success.

**Brymer, George D.** The subject of this sketch, Mr. G. D. Brymer, a banker of extensive experience and recognized ability, was born at Melbourne, P. Q., in Dec. 1857, and has served the Bank of Montreal in different and various positions since 1874, being finally appointed manager at New Westminster in April 1888. Mr. Brymer, a young man who, by his keen executive tact and sound business principles, has won the respect of all business men who have the pleasure of his acquaintance, and a gentleman who, in no small degree, gives that prestige which is so essential to an institution of the kind with which he is connected.

**Burnes, T. J.** One of Victoria's oldest and most respected citizens is the subject of this sketch, Mr. T. J. Burnes, the well-known and popular prop. of the "American Hotel" and "Burnes House." Mr. Burnes is an old Pioneer having come to Victoria in 1858. Shortly after his arrival he started in the hotel business, which he carried on in various parts of the city until he finally settled down in his present establishments, known as the "American Hotel," and "Burnes House." The former of which is situated at No. 15 Yates Street, and the latter in Bastion Square. The Burnes House, which is connected with the above hotel, was established 1887, is an elegant substantial brick building costing \$30,000, containing 72 rooms, and is capable of affording accommodation for 10 persons. It is kept on European plan and is fitted with the latest modern improvements. Mr. and Mrs. Burnes, the popular proprietor and proprietress, are well known not only throughout this Province but also in the States along the Coast, and are highly esteemed by all who know them.

**Cameron, W. G.** The subject of this sketch is the well-known enterprising proprietor of the "Mechanic's Cash Clothing Store," Mr. W. G. Cameron, who although comparatively a young man is one of our oldest pioneers, having come to Victoria in 1860. For 16 years he was in the employ of Messrs. Farner, Boston & Co., subsequently entering into business for himself in Nov. 1883, having bought the bankrupt stock of Mr. C. Thorn, then doing business in a small store at No. 57 Johnson Street. In July 1888 Mr. Cameron moved into his present large and commodious premises situated at No. 35 Johnson Street. These premises are owned and were especially built by him in order to facilitate the transaction of his large and steadily increasing business, and are acknowledged to be the best lighted, most attractive and thoroughly equipped of their kind in the city. This establishment, although not one of the oldest in the city is one of the most prominent of its kind, and is the original and only cash business in Victoria, the special feature in which being "good value for cash." Mr. Cameron is a most able advertiser and spends a great deal of money for this purpose, and his name and business is widely known throughout the entire Province of British Columbia.

**Campbell, Robert** The subject of this sketch was born in the County of Pelee, Ontario, in 1836, and came to B. C. in 1874, locating first in New Westminster and subsequently in Vancouver, carrying on in both places the business of hotel proprietor until April 1891, when he retired from the hotel business and took over the "Superior Saloon" at Vancouver.

**Carne, F.** The subject of this sketch is one of our oldest and highly respected citizens, a pioneer of 1868, and a Cornishman by birth, Frederick Carne. The early days of Cariboo saw him there with pick and

BRITISH COLUMBIA DIRECTORY.

shovel in hand, he was a successful miner, and at all times admired for his candour and honest dealing; but he has long since laid aside the pick and shovel and is now the popular and well-known proprietor of the Angel Hotel. This hotel which was taken over by Mr. Carue 15 years ago is situated at 44 and 45 Langley Street, and for many years afforded accommodation for only 40 persons, but about two years ago the present enterprising proprietor enlarged his establishment considerably by the addition of a substantial new brick building 73x25 feet in dimensions with three stories, each 11, 12 and 11 feet high respectively, thus affording accommodation for 40 more persons. This hotel is well-known to most travellers on the Pacific Coast, and visitors may always depend upon first class meals, excellent beds, and every attention being paid to them.

**Carmichael, Herbert.** One of the most popular and rising young men of Victoria is the subject of this brief sketch. Mr. Carmichael is a native of Ireland, born in Donaghadee, County Down, on the 30 of October, 1866. He came to British Columbia in June 1889, taking up his residence in this city where he at present occupies a prominent position as a financial agent and analyst, in which he has already been successful and has gained for himself a wide reputation. He was educated at Queen's College, Belfast, and at Owen's College, Manchester, under Sir Henry Roscoe, obtaining a prize in chemistry and honors against all England. If one may judge from the past, it is evident that Mr. Carmichael has an honorable and prosperous career before him, and no doubt the thorough training he has had will well prove his ability for undertaking work of the most difficult kind pertaining to his profession. He is energetic, enterprising and liberal, and has lots of friends which his many good qualities have made for him.

**Church, John W., M. A.** Principal of Corrig College, Beacon Hill Park, Victoria, was born in London, England, and is the son of W. W. Church, L. L. D., of Newton Manor, in the County of Berks and Frginal, in the County of Middlesex. Mr. Church's early education was conducted in a private college kept by Dr. Crookford (the friend of Charles Dickens), he afterwards attended King's College, London, and studied in the School of Philosophy of Edinburgh University, in due course becoming Gabbett Prize-man in moral and mental Philosophy and Thorpe scholar of the University of Durham, graduating both Bachelor and Master of Arts. In 1885, when assistant master in Westcurn Sq. College he was appointed Head Master of the Middlesbrough Grammar School, which position he occupied until 1890, when he came to Victoria as Principal of Corrig in succession to the Rev. C. J. Brenton, M. A. Mr. Church has been a frequent reviewer and contributor to the Philosophical, Literary and Art Journals, and has acted as a special correspondent at several International Exhibitions. He still contributes to the London and Provincial press articles highly appreciative of Canada, British Columbia and particularly his charming new home "Victoria," which he described recently in a leading London daily paper as "the most beautiful city on the most beautiful island in the world."

**Clow, Chas. H.** The subject of this brief sketch, who is an architect of well known experience and ability, was born at Ayr, Ontario, on July 1869. In 1894 he removed to Detroit, Mich., in which place he resided until 1893, when he came to British Columbia, taking up his residence in New Westminster. For a time he was connected in partnership with Mr. S. MacLure, but on the dissolution of this partnership, in March 1894, he commenced practice by himself. Mr. Clow has been more or less interested in building operations all his life, and has erected several public buildings and residences which not only do credit to their designer, but are also valuable acquisitions to the many handsome buildings which at present adorn the City of New Westminster.

BIOGRAPHICAL SKETCHES.

1155

**Cochrane & Munn.** The name of the firm which heads this brief notice is one that holds a prominent position in its line of business as Druggists in Victoria, and although established so recently as 1890, has in this short time by its excellent management and straightforward system of dealing given evidence of having a long business life before it. The premises occupied by the firm are not only the handsomest, but are also situated in one of the best localities in this city, being at the corner of Yates and Douglas Streets, which are fast becoming the two grandest and are destined ere long to be the two most important business streets of the city. The firm make a specialty of prescriptions and toilet requisites, perfumes, soaps, sponges, etc., and are the sole agents in British Columbia for the "London Hospital" remedies. The entire management and superintendence of the business is personally carried on by Mr. Cochrane, whose experience as a chemist and druggist well qualifies him for so important and responsible a position, being a graduate of "Ontario College of Pharmacy," Toronto, and the holder of a gold medal for general proficiency, and a gold medal for chemistry. Was also seven years in the drug business at Kingston, Ontario. Mr. Cochrane came to this Province about three years ago, entering into partnership with Mr. H. A. Munn in June 1890. It is unnecessary for us to speak of the reputation of the members of this firm, except to say that they are men of rare social qualities and are justly regarded as being two of our most energetic and progressive business men.

**Cook, Geo. J.** Ever since the days of Capt. Cook, the famous navigator, the name at the head of this article has been a familiar one. The subject of this sketch is just what British Columbia requires "new blood." Mr. Cook cannot as yet be classed amongst the pioneers, arriving in British Columbia for the first time in 1890 opened up business shortly afterwards on Douglas Street, and now having secured a five years' lease of one of the stores in Hon. Mr. De Cosmos' Block, Government St., into which he will move Dec. 1st. The steady and substantial progress of the Capital City of the Province will afford Mr. Cook ample opportunity for the new business he is about to establish. He is largely interested in several very commendable enterprises and has a bright and prosperous career before him.

**Colbert & Warner.** This firm which has been established in this city for the past five years, and whose business premises are situated at 73 Yates Street, do an extensive business as plumbers, gas, steam and hot water fitters. They are also importers of and dealers in gas chandeliers, plumbing materials, etc., making ship plumbing and galvanizing a specialty. The stock carried is a large and valuable one, comprising everything in the line of gas, steam and water fittings, plumbing materials, etc., of the highest finish and in the most perfect and artistic styles and designs. The individual members of the firm are W. J. Colbert and J. H. Warner, both well-known practical business men, and who are thoroughly conversant with their line of business.

**Cowan & Wilson.** The business done by this house is so extensive and its transactions so numerous that the name of Cowan & Wilson has become almost a household word in the grocery trade. The firm is composed of Mr. Maynard H. Cowan and Mr. W. E. Wilson, both of them young men, but having a reputation as being thoroughly business men in every sense of the word. Messrs. Cowan & Wilson purchased the business of Mr. S. J. Pitts in May 1890, since which time they have vigorously pushed the business so that now they have merged their sales one hundred per cent. They occupy extensive premises at 8, 10 and 12 Yates Street, with large ware-rooms and bonded ware-houses in Waddington Alley, carrying a stock that cannot be exceeded by any other house in the Province. As fruit importers Messrs. Cowan & Wilson occupy the first place, having made a specialty of this ever

since commencing business. If push energy, and perseverance are worth any-  
 thing in the grocery business the name of Cowan & Wilson will, as years go  
 by, become better known than ever, and they will continue to hold their rank  
 amongst the most important houses in the Province.

**Crane, McGregor & Boggs.** Parties desirous of placing  
 money in safe and profitable investments should consult this well-known  
 and highly respected firm, from whom they can obtain all the information they  
 may desire regarding such a matter, and which the members of the firm are  
 always glad to give. They deal in residential and business lots and blocks,  
 acreage, farm and mineral lands, and in their list of properties will be found  
 the most desirable tracts in this city. The firm of Messrs. Crane, McGregor &  
 Boggs, though established only a few years ago, now hold a place, as a finan-  
 cial and insurance institution, second to none in the Province, and are to be  
 congratulated in having, through their courteous demeanour and business  
 tact, won for themselves the general confidence and popularity they enjoy,  
 and that through their energy and enterprise they have succeeded in building  
 up the worthy and reliable firm of which they have the honor to be the indivi-  
 dual members. The senior partner of the firm, Mr. J. E. Crane is a native of  
 Ontario, and has been a resident of Victoria since 1886, when he came to this  
 city as general agent of the "Sun Life Insurance Co." He is a member of the  
 Board of Trade, and a very active officer of the Y. M. C. A., possessed of great  
 personal magnetism, there is no more successful business man in this city.  
 Mr. W. D. McGregor the next member of the firm is a native of Montreal,  
 who came to British Columbia in 1889, for the benefit of his health, and finding  
 the climate and prospects of the country suitable to him, he decided to remain  
 in Victoria, where he now resides, and no member of the community is more high-  
 ly respected. Mr. Beaumont Boggs, who was born in Halifax, Nova Scotia, of  
 United Loyalist stock, came to British Columbia in 1886, after the Red  
 Rebellion in which he served as Lieutenant of the Halifax Battalion, and  
 the commissioner for the Province of Nova Scotia, and a notary public in  
 British Columbia, is a member of the Board of Trade, and takes an active  
 interest in all movements to advance the interest of Victoria and the develop-  
 ment of British Columbia.

**Cridge, E., Right Rev. Bishop** The well-known and  
 learned Prelate, who forms the subject of this brief sketch, and who, for  
 the past thirty-six years, has occupied a prominent position in the  
 Christian Church in this Province, was born at Bratton, Fleming, in the  
 County of Devonshire, England, A. D. 1818. At the age of eighteen he  
 commenced his distinguished career as third master of Oundle Grammar  
 School, which appointment he held from 1836 to 1842. From 1843 to  
 1848 he was Gosborne Scholar and B. A. of St. Peter's College, Cambridge,  
 when he was appointed assistant curate, and second master of the Gram-  
 mar School, North Walsham, Norfolk, and subsequently from 1851 to  
 1854 he was Incumbent of Christ's Church, Stamford, Essex. In April  
 1855, he left England for Victoria, B. C., where he was appointed minister  
 of the Victoria district church from 1855 to 1865, and dean in the same  
 from 1865 to 1874, when he became rector of the "Church of Our Lord,  
 Victoria City, and in 1876 was consecrated bishop in the Reformed Epis-  
 copal Church, which high office he still holds. As we have already  
 mentioned, Bishop Cridge, for more than thirty years has been a familiar  
 character in Victoria, known and respected by all classes of the commu-  
 nity of this city, and for a considerable portion of that time, has played a  
 part at once conspicuous and useful.

## BIOGRAPHICAL SKETCHES.

1157

**Crosdalle, H. E. & Co.** Among the representative and leading real estate and financial firms of Victoria that of H. E. Crosdalle & Co. occupy a very prominent position. The firm are large dealers in real estate, farming, and timber lands, and mining properties, and are regarded as one of the safest and most reliable firms in the Province in all their financial transactions. They also act as financial agents in the negotiation of loans, and are likewise agents for a great number of Companies, too numerous to mention in this brief notice. They make a leading speciality of Fraser river farming lands and timber limits, of which they have a large amount for sale in various parts of British Columbia. The individual members of this old and popular firm, which was established in 1883, are H. E. Crosdalle, and J. H. Browlee, both gentlemen of high repute, large experience, and genuine probity and affability.

**Danby, Wm. H.** whose present place of business is temporarily situated in Baston Square until his new offices in the Five Sister Block, now in course of construction on the corner of Government and Fort Streets, are ready for his occupation, does a steady business as a real estate and financial broker. Mr. W. H. Danby, whose business experience has been very extensive and the energy and enterprise which characterize his business transactions, fully entitles him to a high rank among the business men of this city.

**Davidson Bros.** Prominent among the representative establishments of watchmakers and manufacturing jewellers of this city may be mentioned that of Davidson Bros, whose well stocked and handsomely appointed business premises 59 Five Sisters' Block, Govt Street, where they are, as manufacturers, prepared to execute all orders, perfect in finish and chaste in design, and have facilities for turning out the best work in this line. They also make a speciality of watch repairing. The stock carried by them is a very large and choice one, containing all the various lines carried by jewellers, such as diamonds, watches, clocks, jewelry, silverware and novelties of all kinds. They also have branch establishments at Vancouver and New Westminster. The individual members of the firm are Messrs C. N. Davidson and A. A. Davidson, both thoroughgoing and enterprising business men, and their establishment fully deserves the favor with which it is so generally regarded.

**Densy, Thomas.** Among the officers of this city none are more worthy of mention in a notice of this kind than the energetic and popular chief of the Victoria Fire Department, who forms the subject of this sketch. Mr. Densy was born at Portsmouth, England, on the 2nd Nov. 1857, and came to this country in 1859, where he has resided ever since. When a boy he became a member of the lantern Brigade, and since 1870 he has been associated with the Fire Department, having held every office in the volunteer and paid brigades. He was assistant chief for two years, and for the past four years has most ably filled the responsible and important position of Chief Engineer of the department, and to his honor and credit let it be said that the fire record during his term is a recommendation of which any man should feel proud, and is evidence that the Fire Department of Victoria is a credit to the city, and a monument of untiring energy of those connected with it.

**Dowler, Wellington J., B. A.** Clerk Municipal council. Mr. Dowler, although but young in years, is a gentleman of high literary qualifications and has, during the three years he has held the important office of city clerk, proved himself to be the right man in the right place. He was born in 1860 in the town of Boleaygeon, Ontario. His father, the Rev. J. A. Dowler, a strenuous advocate of liberal education, placed his son at Perth Grammar School, one of the best institutions of its kind in the country. Mr. Dowler attended this institution for two years, Iroquois Academy for one, and then matriculated at Victoria University, Cobourg. There he remained four years pursuing the Curriculum in Arts, graduating as Bachelor of Arts in 1880. He spent a year as assistant principal of Garanoque High School, and came to this Province in 1881, where he has resided ever since. For a time he was engaged in conducting with H. M. Stramberg, Esq., M. A., a collegiate school in New Westminster, a position which he resigned in 1884, to engage in other work. In October of 1888, he was appointed clerk of the municipal council of this city, the important duties connected with which office he has very ably discharged since that time. Mr. Dowler is a man of rare qualities, pleasing in manner, and highly esteemed by all who have the pleasure of his acquaintance.

**Durien, Right Rev. Bishop, O. M. I.** The eminent and devoted prelate whose name heads this brief sketch, and who is the popular and highly esteemed R. C. Bishop of New Westminster, was born in France, 3rd December, 1830, and came to British Columbia in 1858, subsequently taking up his residence in the Diocese over which he now presides, and where by his able and considerate ecclesiastical administration, deep learning, and earnest solicitude for the spiritual welfare of his diocese, he has not only won the affection and esteem of the members of his own church, but also those of other denominations, who have the honor and privilege of his lordship's acquaintance.

**Endean, John W.** The subject of this sketch, Mr. John Endean, who may justly be said to be one of the enterprising men of this country, and who possesses the push and energy, the courage and devotion to business that is so necessary to success in this busy age, was born at Devonport, Devon, England, 31st Dec., 1861, and came to British Columbia in 1880, taking up his residence in Victoria, where he remained until 1882, when he became connected with one of the largest lumber manufacturing establishments on the Pacific Coast, and occupied that position until March 1889, when he again returned to Victoria and entered into the lumber and coal business, which he has lately disposed of. After going out of the coal and wood business he took a position as representative of the extensive and well known firm of the Point Ellice Saw and Planing Mills, situated at the foot of Pleasant Street, Rock Bay, and in which position he still holds.

**Engelhardt, J. F. E.** One of Victoria's oldest, well-known and most respected business men, Mr. J. F. E. Engelhardt, who is the subject of this sketch, was born at Trieste, Austria, 12th April, 1842, and first came to British Columbia in 1863, arriving in the Province on the 21st July of that year. On his arrival at Victoria Mr. Engelhardt joined the firm of Sulken Bros. & Co. as principal partner, and carried

on the business as importers and wholesale merchants till 1869, when it was liquidated by mutual consent. After which, in April 1867, he joined the firm of R. Broderick & Co. as manager, and was subsequently admitted a partner in 1873. In 1874, Mr. Broderick retiring from the firm, its name was changed to Engelhardt & Co. In March, 1876, he was appointed agent for the Pacific Mail S. S. Co., of San Francisco, plying between that port and Victoria, and continued in that capacity for five years; he was also agent for the Starr Bros., of the Puget Sound line of steamers, and coal contractor for the Royal Navy for 8 years, when he dissolved the business in 1884, and embarked in the customs brokerage, forwarding and commission business in 1883, and is carrying on the same at the present time.

**Erskine, A. B.** The deservedly popular establishment known in this city as "Erskine's Boot and Shoe Emporium," and of which Mr. A. B. Erskine is the proprietor, enjoys a high reputation as being one of the leading and most popular houses of its kind in Victoria. The business was established by the present proprietor in 1886, and the liberal and prompt manner, in which the establishment is conducted, betokens an unusual share of popularity. The commodious premises occupied by this emporium are situated at No. 132 Government Street, corner of Johnson Street, in the centre of the business part of the city. He handles none but the best quality of goods of the finest English, American, Canadian and local manufacture, of which he has constantly on hand a large and well assorted stock. Mr. Erskine is a thorough practical business man, and parties favoring him with their patronage will in every instance find their best interests considered by him.

**Falconer, James Henderson.** Among the many business men of Victoria, who are to be congratulated for their enterprises in the way of home manufactures, few are more worthy of support than the subject of this sketch. Mr. Falconer is a native of Scotland, born at Carthness, 1867, and came to British Columbia in April, 1891. Previous to his coming to Victoria, he was in the employ of the well-known firm of Badgerow & Falconer, vinegar manufacturers, Toronto. Mr. Falconer is an expert in the manufacture of choice vinegars, sauces, catsups, pickles, flavoring extracts, apple and quince champagne, ciders, etc., having four years ago gone to Germany in the interest of the manufacture of the above named articles, as well as working for a time in one of the largest vinegar works in London, England. He has been awarded the highest medals at Toronto and other places, and also holds certificates from the leading analytical assayers, and chemists in Canada for the superiority, strength and purity of his goods, and is highly esteemed for his ability, enterprise and integrity. He is a young man of sterling probity, shrewd and active in his dealings, and very popular in trade circles.

**Fell, Thornton.** A well-known and prominent member of the legal profession in Victoria, is the subject of this brief sketch. Mr. Thornton Fell came from Liverpool, England, to this province in 1870. In 1878, he was appointed clerk of the Provincial legislative Assembly, which appointment he still holds. Having successfully passed his examinations, he was admitted as a solicitor in January 1879, and in May 1882, was called to the Bar of this Province. He then commenced the practice

BRITISH COLUMBIA DIRECTORY

of his profession, in which he has ever since been engaged, and, in 1890, was elected a Benchler of the Law Society of British Columbia. Mr. Fell is in every sense public spirited, and is interested in everything tending to the city's welfare and prosperity.

**Flint & Williams.** The business place of this well-known firm is situated at No. 46 Fort St., corner of Broad, where they carry on extensive business, not only as real estate brokers, accountants and conveyancers, but also as general commission and insurance agents. The individual members of the firm are Mr. A. St. G. Flint and Mr. B. Williams. Mr. Flint is a gentleman who has been favorably known to the business-public of Victoria for the past four years, and for the last three years has represented as secretary the "Victoria Building Society." Mr. Williams has been a resident of Victoria for twelve years, and during that time has filled various offices of trust, at present he manages as secretary the affairs of "Vancouver Island Building Society," and the "Queen City Building, Loan, and Savings Association." The above firm are also local agents for the "National Fire Insurance Co., of Ireland." Since its inception the motto of this firm has been to so use their clients as to insure a continuance of patronage.

**Findlay, Durham & Brodie.** Among the leading and enterprising firms of agents and commission merchants in this city, few occupy a more prominent position than that of Messrs. Findlay, Durham & Brodie, whose spacious offices and warehouses are situated at No. 28 Wharf Street. This firm was established in 1865, and is largely engaged in the salmon business. They are also large shareholders in the B. C. Canning Co., London, and carry on an extensive business with the Cape of Good Hope and Australia. In the insurance line they represent the following well known and tried companies. The Northern Assurance Co., and the British and Foreign Marine Insurance Co., Limited. The individual members of the firm are George James Findlay, John Henry Durham, and John Henry Brodie.

**Foley, Mathew Levi.** The subject of this sketch was born at Fullbrook, County Lanark, Ontario, on the 15th of September, 1856, and came to British Columbia in 1880, taking up his residence at New Westminster, where he at present carries on an extensive business as a valuer and lumber broker. For many years Mr. Foley was cutter and shipper of lumber to the E. B. Eddy Manufacturing Co., Hull, Quebec, and furnished estimates for some of the largest sales of timber that have ever been made in the east.

**Fullerton, John.** Few business houses in Victoria are more widely known than the excellent manufacturing and import, boot and shoe establishment of Mr. John Fullerton, whose fashionable emporium is situated at 103 Government Street. This business was commenced by the present proprietor, in 1884, and the liberal and prompt manner in which the establishment is conducted bespeaks a generous share of public patronage. He handles none but the best quality of goods, and his complete and well assorted stock of boots, shoes and slippers, is comprised of all styles and grades, from the fine and costly hand made, to the cheaper and coarser kinds. Mr. Fullerton is a thorough practical

1161

business man, and has a complete knowledge of his business in all its details.

**Futcher, T. S.** The gentleman whose name heads this sketch is the proprietor of the well-known Japanese Bazaar, situated at No. 41 Fort Street. This business, which was started at Christmas, 1889, was in 1890 further enlarged by having merged into it the business of the old-established firm of C. Gabriel & Co., late of Government street, which was purchased from them by Mr. Futcher, who is now the sole proprietor and manager, and who, since its establishment, has met with steadily increasing success. The premises occupied are large and commodious, and are well stocked with a full and complete assortment, of curios of all descriptions, direct from Japan, besides many other novelties and articles of interest, far too numerous to mention. Mr. Futcher is a gentleman, who, by his courteous and obliging disposition, makes business transactions with him a pleasure, and he is well deserving of all the public patronage he receives.

**Geiger, Thomas Francis.** The son of an old and highly respected Pioneer and resident of Victoria, who forms the subject of this sketch, was born in this city, 16th July, 1870, where he still resides. He is a member of the firm of Watson & Geiger, plumbers, carrying on a steady business at 68 Broad street. Mr. Geiger is a young man of sterling qualities and practical business tact, and while he continues to exercise that straightforwardness and square dealing which characterizes all his business transactions, he may rest assured that success and prosperity will be the inevitable result.

**Gibbons, Charles Harrison.** The gentleman whose name heads this brief sketch, is the able city editor of the well known and widely circulated newspaper, the Victoria "Daily Colonist." Mr. Gibbons was born at St. Thomas, Ontario, 9th May 1868, and came to British Columbia about four years ago. He was educated at the Collegiate Institute, and Ridley College, St. Catharines, Ontario, subsequently taking up the profession of journalist, by starting as city editor of the St. Catharines "Star," which position he held for two years, when he came to Victoria, where he has since held, with much credit, a prominent position on the staff of the leading daily newspaper of this city.

**Gilmore & McCandless.** This firm of Merchant Tailors and Clothiers, the oldest clothing and tailoring house in Victoria, was established by Mr. A. Gilmore in 1858. The premises, occupied by them at No. 37 Johnson street, consisting of two floors, 30 x 110 feet each in dimensions with large workshops adjoining are by far the largest in this line of business in the province, while the stock carried, both in style and quality is unsurpassed. The success of the house may be judged by the fact of the business being better by 25 per cent. last year than ever it was before, and as an evidence that Messrs A. Gilmore and A. G. McCandless are progressive business men, and are to be congratulated on the success they have achieved.

**Glutzburger, Samuel,** a native of Switzerland, has resided in this Province since 1887, and by dint of push and business energy, has

made himself one of the leading grocers in Vancouver. Mr. Gintzburger is every inch a business man, and his pluck and perseverance is now being most amply rewarded by the large and daily growing business he is building up around him. Of course he has had the chances that naturally arise in a rapidly growing and most excellent situated western city. The City of Vancouver is a marvel of growth, and shows conclusively what a few plucky business people can do towards building up a metropolis, and the one that is the subject of the present sketch has acted wisely in selecting a city that is destined to become one of the leading railroad and commercial shipping centres of the Pacific Coast.

**Gordon, B.** Prominent among the leading houses of this city in the grocery business, is that of Mr. B. Gordon, whose business premises are at No. 60 Government St. This business was established years ago, and has always prospered, and we do not hesitate in saying that it must continue to prosper, for the present enterprising proprietor, by his thorough knowledge of the grocery business, is enabled to buy to the best advantage the finest goods upon the market, and his customers may always rely upon the quality of every article of his stock. The establishment furnishes employment for a goodly number of hands, and the respected proprietor, Mr. B. Gordon, is an example of what may be accomplished by energy and enterprise.

**Gordon, Hugh.** This gentleman, a native of Quebec, is one of the principal boot and shoe dealers in the Royal City. Mr. Gordon is a live business man, and during his two years' residence in New Westminster, has made himself popular, both in a business way and socially. From *staid old Quebec* to the rush and bustle of a western city growing apace as Westminster is, has opened up a field in which Mr. Gordon will have ample scope for his excellent business qualities.

**Gowen, Charles.** The prominent and well-known citizen of Victoria, whose name heads this sketch, was born in London, England, 18th Feb, 1819, and came to British Columbia in 1858. Mr. Gowen has always evinced the warmest interest in everything pertaining to the welfare and advancement of this city and Province, and has taken a leading part in political and city council matters, and also in many charitable works, in fact so indefatigable at one time was his energy, in any matter that he might take in hand, that he was familiarly called the "War Horse." In a business line he occupies the position of one of the leading brewers in the Province, and has for many years carried on in this city an extensive and increasing business.

**Gray, A. B. & Co.** This well-known and popular firm of wholesale importers and commission merchants, of which Mr. Alexander Blair Gray is sole partner, was established in 1871, since which time they have carried on an extensive business in dry goods, etc., but we learn that owing to the large increase and growing importance of the other branches of their business, they are now retiring from the dry goods business. They make a speciality of importing wines, liquors and cigars, which branch of business they added to their establishment in 1881. They retired from the retail dry goods trade in 1883, and have since been actively engaged in the importing and commission business. Mr. Gray

## BIOGRAPHICAL SKETCHES.

1163

is a gentleman well-known and esteemed in commercial circles, and who, by the thorough understanding of his business and the honorable methods of transacting the same, well deserves the large and lucrative trade these good qualities have gained for him.

**Gregg, A. & Son.** Artist tailors. Among the merchant tailoring establishments of this city, not one holds a more prominent position, or is more popular, than that of A. Gregg, & Son. These gentlemen are really what they profess to be—"artist tailors,"—and their skill as cutters of gentlemen's garments, and the excellence of their goods turned out, stands unrivalled. This business was established eight years ago, and has been successful ever since its commencement. From twenty to twenty five hands are found constantly employed by this enterprising firm. Messrs. A. Gregg & Son give close personal attention to their business, and have won an excellent name for honorable and straightforward dealing.

**Gulchon, Laurent.** This gentleman who has the honor of being a resident and the founder of the town, which bears his name, is a native of France, born in 1836, and one of the oldest pioneers of this Province, having come to British Columbia in 1860, where he commenced in a general store at the mouth of Quesnelle, in which he was eminently successful, having also in connection therewith a mulepack train. Selling out in 1873, Mr. Gulchon next started ranching in Nicola Valley, again selling out in 1884, when he removed to New Westminster, where he invested extensively in real estate, and also a large farm on which he now resides. He is also prospector of Port Gulchon, which will stand in years to come as a memorial to the name of one of British Columbia's earliest settlers, who braved the hardships and privations of colonial life, and helped to make this Province what it is, the pride and delight of all who make it their adopted home.

**Hall, Dr. Ernest.** A popular member of the medical profession of Victoria, whose parlors are situated in the Jewell Block, Douglas Street, graduating from the University of Trinity College. After becoming a member by examination of the College of Physicians and Surgeons, Ont., and Fellow of Trinity Med. School, he attended the Edinburgh Infirmary and passed the Royal College of Physicians, returning to Ontario, where he was engaged in general practice for a number of years, during which time he took special courses in New York Post Graduate Med. School and in the Phila. Polyclinic. In 1889 he returned to London and attended in Moorefield's Eye Hospital and received the appointment of assistant in the Central London Throat and Ear Hospital. A lucrative practice has been the result of a comparatively short residence in Victoria.

**Hall, John, M.D.** Dr. John Hall, who occupies a prominent position, as a homeopathic doctor, in the ranks of the medical profession of this city, received his first diploma from the Western Homeopathic College of Cleveland, O., 1857. He is a member of the Homeopathic Examining Board of Canada, which was formed in 1859, and to which he was appointed by the Governor-General, conferring on him the government diploma for all Canada. This body of examiners,

after ten years existence, was merged into the College of Physicians and Surgeons of Ontario, from which he received their diploma in 1869, following his practice at the time in Toronto, and which he has continued for nearly thirty years. From these and many more honors it will be seen that the doctor is no novice in his profession, and that his long practical experience and undoubted ability as a medical man, makes him a valuable acquisition to the profession of our city.

**Hall & Leitch, Doctors.** The two medical gentlemen whose names are given above, form the subject of this sketch. Drs. F. W. Hall M. D. and H. D. Leitch M. D. Dr. Hall is a native of Chatham, Ontario, and a graduate of the college of Pharmacy, Ontario, graduating in 1881, after which he studied medicine in Detroit and Louisville, graduating in 1884, when he, with his brother, now deceased, came direct to Victoria and entered into practice together, under the name of Drs. Hall and Hall. Dr. H. D. Leitch, who has taken the place of Dr. Hall's deceased brother in the late partnership, is also a native of Ontario; born in the town of Milton, Halton Co., 1859. He was educated at the Burlington Public School and Owen Sound High School, passing from these to Trinity College, Toronto, graduating with honors in 1884, afterwards following his profession in Durham County, Ontario.

**Hanington, Ernest Barron Chandler, M. D.** A well known and popular medical gentleman of Victoria, born in New Brunswick, 20th January 1851, educated at Sackville, N. B., and McGill University, Montreal. From 1875 to 1878 he was House Surgeon of the General Public Hospital, St. John's, N. B., when he subsequently came to B. C. in October, same year. Was Chief Medical Officer of the C. P. Ry. construction in B. C., from the beginning of the Underbank contract in 1880 to its completion in 1885. Was Treasurer of the B. C. Medical Council from 1887 to 1889 and elected President in 1890. He is also visiting Physician to the Provincial Royal Jubilee Hospital, Victoria. Dr. Hanington has an extensive practice and is too well known to need any further comment from us.

**Hart, Frank William.** The subject of this sketch, who is a well known and highly respected business man and citizen of Vancouver, was born at Galesburg, Ill., U. S., June 1856, came to this province February 1885. Mr. Hart came to Granville in the days of "Port Moody, the salt water terminus of the C. P. R.," better known locally in those days, as "Gas Town." He was burnt out at the time of the great fire in 1886, losing thereby about \$13,000. He again took courage and started business once more on the present site, and has hitherto deservedly met with steadily increasing success.

**Haynes, Albert E.** The subject of this sketch is the enterprising and successful proprietor of the establishment known in this city as the "Arcade Bakery," the name of which is familiar to the homes and tables of most people of this place. This business was established by Mr. Haynes in 1889, and the premises occupied by him at No. 24 Broad Street are large, commodious and well equipped with all the appliances necessary for the transaction of his business. Mr. Haynes is a native of this province; born at New Westminster in 1864, and is a young man standing deservedly high in the esteem and confidence of the community.

BIOGRAPHICAL SKETCHES.

1165

**Heisterman & Co.** This old and universally known Insurance, Financial and Real Estate firm of which H. F. Heisterman is the founder, was established in 1861, and the business of the same, ably carried on by him under the name of H. F. Heisterman till 1882, when the firm was changed to that of H. F. Heisterman & Co, until May 1891, when by admission of Mr. G. W. Haynes, the name of the firm was changed to the style of Heisterman & Co. The individual members of the firm under its new name, are H. F. Heisterman, Geo. W. Haynes, and Foster Macgurn. Mr. Heisterman, who came to British Columbia in 1862; is one of Victoria's best known citizens, and has established a reputation for honesty and probity, in consequence of which he has secured the agency of a number of the wealthiest residents of this city, as well as many of those property owners who are non-residents. Mr. Haynes, who came to B.C. in 1861, was interested in the milling and lumber business of Burrard Inlet and the mainland. He had charge of the Moselyville Saw-mill, Coy's Mills and property, for twelve or fourteen years, and is well and favorably known throughout the province. In 1882 he became a partner with H. F. Heisterman. Mr Macgurn has been for some years Superintendent of agencies for the Mutual Life of New York, on the Pacific Coast, and after demonstrating that a large and growing new business could be done for the city, joined the above named gentlemen, and the firm received the appointment as General Agents in British Columbia for the Mutual Life Insurance Co. of New York. They also represent a number of leading fire and marine insurance companies, and the revenue therefrom forms a mean part of the annual income. This firm is so well known for its strictly truthful representation and reliability for business honor that any comment from us would be unnecessary to strengthen its well deserved popularity.

**Hibben, T. N. & Co.** The above firm, which stands among the oldest business concerns in this city, and which has justly been termed "a model stationery and publishing establishment—a credit to its founder and present proprietors,"—was established in 1848, and by the use of most effective and energetic business methods have succeeded in building up a trade connection of which they may justly be proud. The premises occupied are large and commodious and fully stocked with a choice variety of popular literature, evincing that the saying of Solomon, that "of the making of books there is no end," was never so true as to-day, for here are to be found books innumerable, from the paper covered primer to the most important classic. They also carry a full stock of stationery, plain and fancy, as well as legal and commercial blank books and office sundries. The individual members of the firm, are C. W. Kammerer and V. H. Bone, Mrs. Hibben being represented by her son Parker Hibben, who are to be congratulated in having, by close application to business and uniform courtesy, succeeded in building up a fine trade.

**Hill, Egerton B. L.** One of the leading pharmaceutical chemists, and a well-known citizen of New Westminster, is the subject of this sketch. Mr. Hill was born at River Philip, N. S., Nov. 1870, and is the son of Mr. A. J. Hill, C. E., of New Westminster, and nephew of Mr. A. E. Hill, water-works engineer of that city. He studied his profession at

BRITISH COLUMBIA DIRECTORY

the Ont. College of Pharmacy, St. James' Sq., Toronto, where he attended the lectures of the celebrated profs. E. B. Shuttleworth, O. R. Avison, and J. H. Harrison, and graduated successfully in 1889, with diploma, subsequently coming to New Westminster, where he entered into business with Mr. W. C. Coatham. He is also a member of the B. C. Pharmaceutical Association. Mr. Hill has attained the success and position one of his ability may naturally expect, and we anticipate for him an honorable and prosperous future.

**Hill, Lewis Germain.** The popular manager of Victoria Coal, Wood and Lumber Yard, was born at Sydney, Cape Breton, Nova Scotia, Sept. 1863, and came to this Province in March '88. After leaving home he followed, for a time, the profession of civil engineer, which he subsequently gave up to take the position of book-keeper and general salesman for the large wholesale house of Shipp & Harding, of St. John's, N. B., which position he held for nearly six years. He then came to this Coast, and shortly after his arrival took the position of book-keeper for Joseph McPhee, of Comox, which position he resigned after 18 months to take a similar one with the company he now represents here at Victoria. Mr. Hill is a young man of rare abilities, and enjoys the fullest confidence of the company he serves, and his sterling business qualifications well fit him for the responsible position he holds.

**Holding, Alexander.** The subject of this sketch, who is an Australian by birth, was born at Oakley, Colony of Victoria, April 1862, and resided in different parts of that colony until the age of twelve years, when he came with his parents to British Columbia, arriving at Langley on the 10th of July, 1874—where his father died about twelve years ago, and the rest of his family are still living—since which time he has been, and still is, principally engaged in farming at that place. He was the first person in Langley, if not in B. C., to engage in the bee-keeping industry, with modern appliances, which enterprise he started in 1874, and still continues to carry on. In January 1891, Mr. Holding was appointed assessor and collector by the municipal council, the onerous duties of which office he has hitherto performed with much ability, giving evidence in various instances that he is the right man in the right place, and a valuable and most efficient officer.

**Hooper, Thomas.** One of the leading architects of this city, who has gained a high reputation for proficiency in his profession, and whose offices and studio are situated over Spencer's Arcade on Government Street, first established the practice of his profession in this Province in Vancouver in '88, and in Victoria in '90, where he has designed and superintended the construction of many large and important buildings, among which we would mention, the public school at New Westminster and the public school and Y.M.C.A. buildings at Vancouver, while in this city we might name the Pandora Avenue Methodist Church, the Chinese Mission building, R. T. William's building, Broad St.; Henry Jewell's four storey structure, corner Yates and Douglas Sts.; Wilson & Daly's block, corner Johnson and Government Streets; and Lewis & Humphry's blocks, Yates Streets; A. G. McCandless' block, Johnson St.; A. R. Milne's block, Johnson St.; and residences for John Dougall, J. G. Black, J.

E. Clarch, Henry Cooly, and several other buildings. Mr Hooper enjoys a large patronage, which in consideration of his professional skill and ability, we deem it is well deserved.

**Hutcheson & Co.** This highly popular and favorite dry goods firm, which was established about three years ago and is widely known by the name of "The Westside," is one of the leading houses of its kind in Victoria. They carry a complete stock of all goods in their line, which are unsurpassed, if equalled by any house in the city, and their "Westside" kid gloves, of which they make a speciality, are known and appreciated all over the Province. The "Westside" is a spacious building situated at No. 70 Government Street, and is divided into a number of departments, all of which are worthy of inspection. Quite a staff of assistants are employed, and the facilities for transacting business are of the highest order. Mr. Hutcheson, the senior partner of the firm, is a gentleman who has had many years experience in the business and understands its every detail, to which he gives his closest attention.

**Jackson, Geo. R.** The subject of this sketch is one of our leading tailors, who came to Victoria about three years ago. Public recognition of his skill as a cutter of gentlemen's clothing and excellent taste in all details pertaining to his business, which are qualifications absolutely necessary in his profession, and are no doubt the secret of the great success which has attended the establishment of which he has the good fortune to be the head. Mr. Jackson is well and favorably known, and has won the reputation of being honest and reliable in every respect.

**Jamieson, Robert.** Among the many successful and enterprising business houses of which this city can boast, not one occupies a more prominent position than that of Mr. Robert Jamieson, bookseller and stationer, 92 Government Street. This business which had previously been carried on by Mr. Charles Morton, was in 1886, purchased by Mr. Jamieson, who, in 1888, upon the failure of the B. C. Stationery and Printing Co., purchased the large bankrupt stock and removed his own stock to the spacious premises which had been occupied by that company, at the address given above and which are fully stocked with a very large and select assortment of the most popular literature of the day, and choice stock of plain and fancy stationery, blank books and office sundries of all kinds. Mr. Jamieson also makes a speciality of cheap literature, wrapping paper and paper bags. As an establishment this house is too well-known for its reliability to need any comment from us to strengthen its well deserved popularity.

**Jensen, William.** This gentleman, a well-known and time honored citizen of Victoria, was born in Liverpool, England, June 23rd, 1810, and emigrated to this country in 1872, when the Province of B. C. was just budding into existence. Mr. Jensen's sterling and amiable qualities and business energy, soon made him one of the leading men of those times, he is a man of varied experience, was a member of the city council for some time, and in this position gave universal satisfaction, he was also proprietor of the well-known Occidental Hotel on the corner of Johnson and Wharf Streets. Mr. Jensen gave up this place about four months ago, moving into the Dallas Hotel, which was built

last summer and which is situated in a fine position near the Outer wharf, commanding a splendid view of the harbor and the Olympians. His experience as a first class hotel man is so well-known that it is needless for us to dwell on this, sufficient to say that the Hotel Dallas is first class in every particular, the proprietor having spared neither brains nor money for the comforts of his guests.

**Jessop, Jno.** An Englishman by birth; after a most adventurous trip over land on foot from old Fort Garrey, New Winnipeg, to Colville on the Columbia, reached the Pacific Coast nearly 32 years ago; Mr. Jessop, however, before coming to B. C. spent a few years in the backwoods of Ontario and elsewhere as a school teacher, subsequently coming to Victoria early in '61, where he has been a permanent, well known and highly respected resident ever since. After spending a summer in Cariboo, and about a year in newspaper work, he built the old central school in Fort Street, and recommenced teaching on the then "Canada West," non-sectarian principle, he being a first class "Toronto" Normal School graduate. This establishment was merged into the old V. I. public school system in '65 with Mr. Jessop as principal, and continued to do good work until it, and all other free schools on the Island, were starved out by a complete withdrawal of supplies during the *regime* of Governor Seymour, immediately following the union of the colonies of Vancouver Island and British Columbia. After confederation in '71, and the inauguration of the present B. C. school system, Mr. Jessop was appointed "Superintendent of Education" for the Prov., the onerous duties of which appointment he discharged till the later part of '78, when the old Board of Education and the *Supt.* resigned their positions. After a few years, work in the "Colonist" office Mr. Jessop was appointed "Immigration agent," first by the Smithe Government in '83, and shortly after by the Dominion Government.

**Johnston, P. T. & Co.** In a climate such as the City of Victoria and its vicinity is blessed with, and which may be said to be unexcelled on the face of the earth, where as a rule flowers bloom in the gardens throughout the year, and fruits of all kinds indigenous to the temperate climates, ripen in open air, no business concern can possibly be more advantageous or a greater boon to the inhabitants, and which doubtless has more or less contributed to the adornment of the tasteful homes and their beautiful surroundings, of which Victoria can boast than that of P. T. Johnston & Co., seedsmen and florists. This important business, which was established by Mr. Johnston, has been carried on by him in the same business premises since the year '68. In their nursery, corner of Calboro Bay Road and St. Charles Street, is found the most varied assortment of nursery stock in the Province, including every kind of fruit and almost every kind of ornamental tree and shrub suited to the climate. English gooseberries, of the finest kind, are in their grounds. The English walnut also does extremely well with them, and at the age of 15 years begin to bear abundantly. English filberts and cobnuts, the genuine kind are another specialty, also Japanese plums bearing an abundance of fine rich fruit on trees no bigger than a gooseberry bush. Pot plants, cut-flowers and floral designs of all descriptions are also furnished by this firm in any quantity desired.

## BIOGRAPHICAL SKETCHES.

1169

**Jones, Thomas Joseph, L.D.S.** One of the leading dental surgeons of this city, was born at Toronto, Upper Canada, on the 4th Nov. '44, and came to Victoria about nine years ago. Mr. Jones entered the dental profession in '59, and had the honor of being presented with a diploma at the Provincial Exhibition, held at Toronto in '66, for superior specimens of dental work, a case of which was purchased by the Board of Arts for exhibition at Paris, France, in '77. He was the first to take action on dental law in B. C., and as president of the Board of Dental Examiners; also first president of the B. C. Dental Association, and vice-president of the N. E. T. & L. Co. (Ltd.). At a vestry meeting held on the 6th April, '91, the doctor was also nominated by the Lord Bishop of this diocese as one of the wardens of Christ Church Cathedral. Dr. Jones not only maintains a wide reputation as a dentist, but is also well-known as an active supporter of every movement which has for its object the welfare and prosperity of this city, and the good of the community.

**Jones & Bridgman, A. W.** This favorite firm, which has a high reputation and numbers among its clients many of Victoria's wealthiest citizens, transacts a large and increasing business as real estate, financial and fire and life insurance agents and conveyancers, in the city of Victoria and province of B. C. They act as agent, in connection with the Work estate and other extensive properties, and represent a large amount of English capital. They hold the general agency for the province of the Caladonian Fire Insurance Co of Edinburgh, and of the Canada Life Assurance Co. of Hamilton. The firm is composed of A. W. Jones, Notary Public, and A. J. Weaver Bridgman, solicitor Supreme Court of England, both gentlemen of sterling business ability and integrity. Mr. Jones has been a prominent business man in Victoria for the past 18 years. He is a director of the board of the Provincial Royal Jubilee Hospital and holds a position under the Dominion government of District Paymaster to the Canadian forces in B. C. Mr. Bridgman is an English solicitor of some years standing, came to Victoria in 1888 and has since been engaged in real estate and financial business.

**Joyce & Meyer.** This firm was established by Mr A. P. Joyce, formerly of Montreal, who has been in this city about three years. The style was A. P. Joyce & Co. until last March, when he was joined by Mr. J. T. S. Meyer, formerly of Calgary Alberta, where he was in the employ of the Dominion government. This firm has gained a reputation for push and enterprise, and it is not too much to say that all transactions with which they have hitherto been connected, have always proved satisfactory to their clients. We think they have a good future before them.

**Keefer & Smith.** The above firm which was opened here on the 2nd of April 1891, is without a rival, being the only purely engineering firm in the province, and there is no doubt that prosperity and success will be the result. Amongst the many works in B. C. in which they have been engaged, and carried to a successful conclusion may be mentioned a division of the C. P. Ry. in the currents of the Frazer River; the Vancouver Waterworks and the Matsqui Dyke. The individual members of the firm are G. A. Keefer and H. B. Smith, both of whom are distinguished in the engineering profession and have been associated with the great works of Canada and the U. S. for many years.

**Keith, James Cooper.** Among the leading men of Vancouver and the Province of British Columbia, none have perhaps done more to build up the City of Vancouver than the subject of our sketch. Mr. Keith was born in Scotland in '52, and comes of a family of well-known financiers in that country, he came to Victoria in '76 to take a position in the Bank of British Columbia, which position he held for several years. But on Vancouver coming into existence, Mr. Keith was appointed manager of the Bank of British Columbia there, the first bank opened in the terminal city. Here in a growing city there was ample scope for a young man of Mr. Keith's quick energetic and amiable business qualities, and not a little of the phenomenal growth of this wonderful town can be traced to his energetic spirit, and to like men who have identified themselves with the best interest of this fine city.

**Kerr & Begg.** Booksellers and stationers, 45 Government Street, are young men of good business ability and straightforwardness. Mr. J. R. Kerr, the senior partner, was born in Waverly, Iowa, and before coming to the Queen city of British Columbia, was employed by J. K. Gill & Co., wholesale book and stationery dealers, of Portland, Oregon. He naturally gained the good-will of this firm and latterly was sent to Victoria as their general agent in Canada, and after increasing their business to large proportions he went into business for himself, taking in as a partner Mr. Roderick Begg on the 27th June, 1891. Mr. Begg is what is called in the west a "hustler." He is the son of Alexander Begg, Esq., at the present time Crofter Emigration Commissioner for B. C., and who has for many years been connected with the various governments of the Dominion.

**Kendall, Isaac Newton.** The enterprising subject of this sketch was born at East Templeton, Province of Quebec, 16th February 1842, where for many years he worked at his trade of millwright, but having heard of the fame of British Columbia, he was induced to try his fortune in this province, and came here on the 9th of April 1889 finally taking up his residence in the Royal City of New Westminster a city which is destined to be one of the wealthiest and most thriving in the province and one in which a man of Mr. Kendall's skill and ability will ever have but little cause to regret having established himself, and made his home.

**Kent, Chas.** The city council are to be congratulated on having at the head of their finance department a gentleman like the present Treasurer and Collector, Charles Kent, a well-known and good authority upon all matters pertaining to the important duties of his responsible office. Mr. Kent came to Victoria in 1862, from London, England, and for a time was engaged in the hardware business, and by whom it may be here mentioned, the first store on Fort street was built. He was for 20 years accountant in the firm of Marvin and Tilton, and in 1889 was appointed to the office which he now holds with much ability and credit both to himself and to the city corporation, while his affability and obliging disposition have won for him the respect and good will of all who know him.

## THE ALBION IRON WORKS CO., L'D, Victoria, B. C.,

MANUFACTURERS OF MARINE, SAW MILL, AND MINING MACHINERY.

BIOGRAPHICAL SKETCHES.

1171

**Kingham, Joshua.** Although only a recent arrival in Victoria and a young man, has during the short time he has been here shown by his enterprising spirit and excellent business qualifications, that he is the right sort of man for a rising city like Victoria. As a first class jeweler he has already gained a wide reputation, and the splendid establishment which bears his name is second to none in this city. Mr. Kingham is a brother of the Rev. H. Kingham, late curate of Christ Church Cathedral, and was born in England, 22nd February, 1866, and arrived in this country on the 1st of June, 1890. Being of a courteous and obliging disposition he has made a host of friends and well-wishers, and it is evident that he has a successful and prosperous career before him.

**Lawson, H.** Mr. Henry Lawson, editor of the "Colonist," was born at Charlottetown, Prince Edward Island, about sixty-two years ago, receiving part of his education in that town, supplemented by two years study in Halifax, N. S. He taught in three common schools in the rural districts of his native island for a series of years, his connection with which was severed by his appointment to the position of Deputy Collector in the Custom House at Summerside, where he acceptably served, and he was one of the arbitrators in connection with a number of purchasers of the right of way for the Island Railway. For three or four years he was principal of the Normal School at Charlottetown, a change of the island government involving his removal as well as that of a number of other officials the incoming government carrying out very extensively the practices involved in what is now known as the spoils system. For over thirty five years Mr. Lawson has written for the press being generally regarded as a cogent controversialist. This qualification in the stirring times antecedent to the entrance of the island into the Canadian Confederation secured him the offer of the editorship of the "Summerside Progress" and the establishment in it of free undenominational education, which he directed, until he became editor of the "Charlottetown Patriot," his articles and political correspondence in which were highly appreciated. In 1873 he entered the Parliamentary Gallery at Ottawa, since which time he has upon numerous occasions spent the season at the capital in a journalistic capacity. For a long period Mr. Lawson owned the "Patriot," his connection with which he only severed to enter the more extended field that presented itself in the larger provinces. He was successively an editorial writer for the "Toronto Globe," the "Cornwall Freeholder," the "Montreal Herald" and the "Montreal Star," coming to this Province about three years ago to occupy the important position of editor of the Victoria "Colonist," which is on all hands admitted to be the best and most influential paper west of Toronto. His writings are characterized by conciseness and vigor, and are always marked by respect for the opinion of others, however divergent they may be from those which he entertains and advocates. Personally he is one of the most kind hearted and generous of men, and naturally reserved as he is, the better he is known the more he is appreciated.

**Ledingham Brothers.** This popular and enterprising business concern was established six years ago, and for thoroughness of equipment, and excellence of workmanship, has gained a high reputation.

MANUFACTURER AND IMPORTER OF  
FURNITURE, CARPETS, BEDDING, WALL PAPER, NANAIMO, B. C.

1172

BIOGRAPHICAL SKETCHES.

The enterprising proprietors, G. T. and W. J. Ledingham personally superintend all work done at their establishment, which is a guarantee that it will be done with care and promptness. The premises and building occupied by them is situated at the corner of Douglas and Fisgard streets, where constant employment is given to a number of competent workmen, and where carriages, wagons and buggies are built to order in a first class and workmanlike manner. The Ledingham brothers have a thorough knowledge of their business in all its various details, are practical and hardworking, of good judgment, and worthy of the success they have achieved in their business.

**Lenz & Leiser.** This dry goods and gents furnishing business which was established in 1880, is the largest of its kind in B. C., and in point of size and excellence of stock is second to none in the north-west. The firm give constant employment to about 60 hands and are extensive importers of French, English, Persian and in fact, all foreign goods, for which they have a large demand. They are interested in the New Westminster Wooden Mills, for which they are sole agents in B. C. They are also sole agents in B. C. for Tooke Bros. of Canada, shirt manufacturers. The individual members of the firm are Moses Lenz and Gustave Leiser, gentlemen who are much respected by all who know them.

**Lewis, S. G.** The subject of this sketch was born at Sedgely, Staffordshire, England, on the 25th September, 1848, and is the youngest son of the Rev. William Lewis, Vicar of the parish in which he was born, and nephew of Col. G. Foster-Foster, formerly of Esquimalt, B. C. In 1877 Mr. Lewis came to British Columbia, taking up his residence at Lewisville, where he is one of the leading merchants of the place, and in which business he has met with much success. He is an active, enterprising business man, and has ever evinced a deep interest in everything pertaining to the welfare of the district in which he resides and the province's large.

**Lindley, William P.** No one in Victoria has become better known than the gentleman at the head of this article, a newspaper man in every sense of the word and "a hale fellow well met." Mr. Lindley is an American by birth, a native of Sacramento, Cal. His ability as a reporter has been in constant demand, first on the "Pioneer" newspaper, "the Colonist," afterwards on the "Standard," and latterly on the "Daily Evening Times." He was engaged last year as special correspondent of the "London Times," and in that capacity visited the far famed sealing grounds of Behring Sea. During the Queen's birthday celebration in Victoria he made himself most popular in the capacity of secretary to the Committee, having charge of the sports for that day, and afterwards as secretary of the Firemen's Tournament during their visit to British Columbia. Mr. Lindley is a marine engineer by profession, but is in love with his adopted occupation, that of a newspaper man. Since the establishment of the Marine Engineers' Association in this province, the subject of this sketch has acted as secretary to that society, a position in which he has displayed much tact and made himself most popular.

**Lomas, William Henry.** A pioneer of 1862, and one who in his day has done good service in furthering the interests and pro-

noting the welfare of the province of B. C., was born in Derbyshire, England, November 1810, and came to this province 29 years ago, taking up his residence in Cowichan District, where he has been settled since 1863. Mr. Lomas was one of the first promoters of the Cowichan Agricultural Society, of which he has several times been elected President, also Warden of the N. C. Municipality. He is now Indian Agent for the East Coast of Vancouver and adjacent Islands.

**Lowenberg, Harris & Co.** This popular and enterprising firm, the offices of which are situated at No. 47 Government Street, is one which may justly be termed the pioneer of such firms in the City of Victoria, and enjoys a large and increasing share of public patronage, a fact not to be wondered at, having been established since '58, thus possessing an experience of thirty-four years, during which long period they have watched the growth and development of this city and surrounding country in every section, having thereby made themselves the possessors of much valuable and reliable information regarding their particular line of business. The members of the firm, who conduct the business, are D. R. Harris and N. P. Snowden, men highly esteemed at home and abroad. They maintain an office in N. W. Westminster, known as Lowenberg, Harris, Sinclair & Co., and one in London, England, under the name of Harris, Snowden & Harris. They also represent a number of Insurance Co's. in various parts of the world. Lowenberg, Harris & Co. are really a pushing, painstaking firm, and highly deserving of the prominent position they occupy.

**Lombard, C. A., & Co.** Prominent among the leading and most thoroughly representative merchants in the piano and organ trade of Victoria is Mr. C. A. Lombard, whose commodious warehouses are at 71 Govt. Street, next door to T. N. Hibben & Co. Mr. Lombard is a pioneer of '58, and has been established in his present line of business since '85, in which he has secured a large share of permanent patronage, among the best class of citizens. Personally, he is highly esteemed for his strict integrity and sterling personal worth, and well merits the success he has achieved.

**Matthews, John Paul.** The subject of this sketch, whose name has now become a household word in most of the families of Victoria, was born in Cornwall, England, 14th Feb. '62, and when only nine years of age came with his parents to B. C. After finishing his education at one of the schools of this city, Mr. Matthews was for a time in the employ of Messrs. Neufelder & Ross, the well known grocers on Govt. St., and in '88 started in business for himself, in which he has been most deservedly successful, having by his many good qualities and square dealing, won for himself a large share of public patronage, and the esteem and confidence of all who know him. As a dealer in choice groceries, it is only just that we should remark that Mr. Matthews occupies a position second to none in this city, and in his well stocked store at the corner of Fort and Douglas Streets, which is a model of neatness and order, is to be obtained everything in the way of fine groceries, which, while within the means of everybody, are such as are usually required in first-class households.

BRITISH COLUMBIA DIRECTORY.

**McDowell, Henry.** The proprietor of one of the leading drug establishments in Vancouver, which enjoys the distinction of being the first of its kind opened in this city after the disastrous fire of '86. Mr. McDowell was born at Milton, Halton Co., Ont., and came to this Province in June '86, taking up his residence at Vancouver, where he established his present business, which from comparatively small beginnings has now developed into the largest trade in the city.

**McFeely, Edward John.** A partner in the well-known firm of McLennan & McFeely, hardware merchants and house furnishers, was born in the little town of Lindsay, Ont., on the 3rd of November, '61, came to B. C. in April '85, and entered into partnership with Mr. McLennan in the hardware, stove and plumbing business. This firm have large and extensive business premises, both in Vancouver and Victoria. Mr. McFeely is manager of the business in the former town, which is increasing daily. The business in Victoria has already increased so extensively that we hear the firm intends shortly to remove to more commodious quarters. Mr. McFeely's prompt, energetic, ready business tact, and amiable manner, justly merits the patronage which has been accorded him by an appreciating public.

**McGillivray, D., J. P.,** is a well-known merchant in the town of Chilliwack, and an extensive land owner in Simas. For a term he represented the district in the Legislative Assembly, and has also served as Reeve of the municipality. He is a J. P., and a leading member of the I. O. G. T. society. A staunch supporter of all worthy enterprises, and a prominent man in all public matters, having for their object the welfare of the community and prosperity of the Province.

**Macgowan, A. H. B.** Among the most successful and enterprising citizens of Vancouver and the Province generally, none, perhaps, are more entitled to esteem than the gentleman who forms the subject of this sketch. He was born in Prince Edward Island on the 11th of April, '59. Mr. Macgowan on settling down in Vancouver, opened in business as a commission agent, he represents the Consumers Cordage Co. of Montreal, and secretary to the Vancouver Board of Trade, also to the Horticultural and Fruit Growers' Association of B. C., and several other societies, too numerous to mention. It will, however, be seen from the above that Mr. Macgowan has not been backward in identifying himself with the best interests and advancement of the Terminal city. He is a thorough business man in every sense of the word, and one in whom all classes have implicit confidence.

**MacKenzie, Archibald B.** This well-known and enterprising citizen of the Royal City was born in Toronto, Ont., 24th April '65 and came to B. C. in March '89. He located in New Westminster, in which town he opened business as a commission merchant, real estate broker and insurance and financial agent, in which occupation he has by his many wealthy and amiable business qualities, achieved a marked success. Although Mr. MacKenzie might not be called a recent settler, he has since he came here, closely identified himself with everything that upheld the interests of his adopted city, and has won the esteem and regard of all who know him.

### BIOGRAPHICAL SKETCHES.

1175

**McLachlan, Charles.** Perhaps no name is more widely known throughout the Province of B. C. than that of this enterprising gentleman. Mr. McLachlan was born in London, England, in the year '59. He received his business training on the Stock Exchange in England, and after travelling in Egypt and elsewhere he came to B. C. in '81 and was for some two years identified with the substantial firm of Findlay, Durham & Brodie, of Victoria, as accountant and cashier. He subsequently engaged in the timber trade, selecting Vancouver as his place of residence, where he has since carried on business as a real estate, insurance and financial broker in partnership with Mr. Shannon, who is a resident of over 25 years in the Province. Mr. McLachlan is one of those zealous and enterprising citizens of whom Vancouver can feel justly proud, being a gentleman who has unsparingly identified himself with every good work pertaining to the best interests of the city.

**McLennan, Robert Purves.** The subject of this sketch, who is a member of one of the leading house furnishing and hardware firms of Victoria, was born at Pictou, Nova Scotia, on the 7th Dec., '61, and came to British Columbia on the 21st Sept., '81. Mr. McLennan is a member of the well known and enterprising firm of McLennan & McFeely, doing a large and extensive business in the house furnishing and hardware line, both in Victoria and also at Vancouver, the houses in each place being managed by the respective partners. Their trade is rapidly growing, and their enterprise and ability justly merits the honorable standing they have in the foremost ranks of the business men of this Province.

**Macfarlane, Robert.** This gentleman, who is a member of the well known and substantial firm of Bell, Irving & Paterson, is a Scotchman, was born in Glasgow, Scotland, and came to this country in the month of August '88, where he took up his residence at Sapperton, New Westminster. Mr. Macfarlane has, since he made the Royal City his home, closely identified himself with every enterprise having in view the advancement of the city's interest, and the welfare of the Province at large.

**Mackintosh, S. T.** The subject of this sketch is a native of Nova Scotia; was born March 1st, '61, and in Sept. '76, when only 15 years of age, was engaged with the Intercolonial Railway, N. S., as telegraph operator, and remained in the employ of that Company until '81 when he resigned to accept a position with the W. U. Telegraph Co. in Halifax, N. S. In May '82, he left Halifax and came to B. C. to take up a position in the Dom. Tele. and Sig. Service, and in '84 was appointed manager of this service at head office, New Westminster. After the taking over of this line by the C. P. R. he remained with the latter company until '89, when he resigned and entered into business as real estate and insurance agent at New Westminster. He is one of the promoters of the Westminster and Vancouver Tramway Co., and the Mainland and Nanaimo Steam Navigation Co., and is sec. of both these companies, also a director of the former, and one of the largest shareholders.

**Mallandine, E.** One of our leading pioneer architects, was born at Singapore, East Indies,—his father being in the H. E. I. C. S.

where he attained the rank of colonel, and for a time was acting Governor of the Straits Settlements—and was educated at Brittany, France, where he was head of the High School and obtained the silver medal at the age of 15 years. He was articled for five years to an architect in London, England, a fellow of the R. I. B. A., and worked afterwards in several offices in town and country, and was an influential member of the London Architects Association. Mr. Mallandaine came to Victoria in '58 where he established a private school, and also taught in the Boys' and Girls' Collegiate Schools. For nearly two years in these establishments he was professor of modern languages, and drawing, and was the author of the first five Directories of the Province, and that of '77. He first opened an office and commenced practice here in '63, continuously since '73, his first building being that now used by the Albion Iron Works, and has also built several warehouses, and private residences here and at Nanaimo besides churches at Metchosin, Cedar Hill, Cowichan and Comox.

**Mansell, H.** The well-known proprietor of the peculiar Boot and Shoe establishment at 95 Govt. St., who in the boot and shoe business took the lead, and has always kept it, commenced business in Waddington Alley in '59, and with the growth and progress of the city, has become the head of the largest retail and custom boot and shoe establishment in the Province of B. C. The line of goods carried by this establishment are specialties in American, English and Canadian manufactures. Mr. Mansell is an old and highly respected citizen of Victoria and during his long and active business career has ever maintained an untarnished reputation for all that is honorable.

**Marvin & Tilton.** This old and well established firm, which has been in existence 30 years, has always held a leading place in its line of business, with a full and complete stock of hardware, iron and steel. Their house, situated on the corner of Wharf and Bastion St., is filled with everything usually found in a well managed and extensive wholesale heavy hardware establishment. They are head-quarters for all goods that they handle, making all their purchases direct from first hands in very large quantities for cash, so that all orders entrusted to them are sure to be met promptly, and at the most favorable market rates. They make a specialty of fine, artistic builder's, cabinet and house furnishing hardware hose and netting, and have a wide reputation for supplies in this line. They have also developed a very large trade in mill and loggers' supplies, and are, without doubt, carrying the most extensive line of any house in this district. The individual members of the firm are Messrs. E. Marvin and E. G. Tilton, both progressive business men, who hold a prominent position among our enterprising merchants.

**Mellard, Samuel, J. P.** The worthy subject of this sketch, Mr. Samuel Mellard, is an Englishman by birth, born at Newcastle, England, in 1851, and came to this province from Bedford in 1887. He settled in Chilliwack and was appointed postmaster of that place in 1888, which position he fills with credit to himself and satisfaction to the public. He is Treasurer of the Municipality; also of the Agricultural Society; School Trustee; Commissioner for affidavits in the Supreme Court; N. P. for the province, and J. P. for the Electoral District of New Westminster. He is a member of the Masonic fraternity and is interested

## THE ALBION IRON WORKS CO., Limited, Victoria, B. C., Engineers, Iron Founders, and Boiler Makers. Fish Canning and Mining Machinery a Specialty.

BRITISH COLUMBIA DIRECTORY.

1177

in several industries in various parts of the province. He is moreover a zealous citizen, a thorough man of business, and since his coming to the Province has done his best for furthering the interests of the locality in which he resides.

**Mellon, Capt. H. A.** One of Vancouver's responsible and influential citizens, was born in Nottingham, England, in '40, and was educated at the Rev. P. Lang's Academy, Ipswich. Early evincing a predilection for the life of a sailor, soon after leaving school he went to sea, serving his time principally in the Indian trade. He was a participant in some stirring events of the Indian mutiny, and was an officer in the navy of the East India service. In '79, he quit seafaring life and went to Manitoba, but upon learning of the advantages of Vancouver as a seaport, he decided to come here, and accordingly came in '86, arriving just after the fire, to make it his permanent home. He entered into the business of real estate and fire and marine insurance, in which he has ever since been successfully engaged. In addition to his extensive agency and insurance business, he is also vice-consul for Spain for all the Province, commissioner for Manitoba, a J.P., and notary public, and nautical assessor. Personally, he is one of the most genial of men, and his many good qualities evoke the regard of his fellow citizens.

**Milne, Alexander Roland.** Among the business men of Victoria possessed of rare executive ability and sterling business habits, there are but few, if any, who possess these good qualities in a greater degree than the subject of this sketch. Mr. Milne, collector of customs for the port of this city, was born in Morayshire, Scotland, 29th Dec., '39, and was educated at Marshall College, Aberdeen. In '55, his parents came to Canada, settling in Ontario, where he remained engaged in business until '64, when he came to B. C. and went to Cariboo, where he was for some time engaged in same prospecting, subsequently coming to Victoria in '74, when he entered the service of the Canadian customs. In '85, he was appointed appraiser of the port, and in '87, was made one of the Board of Dominion Appraisers at Ottawa. In '89, a vacancy occurred in the collectorship, and Mr. Milne was appointed to fill the position and was sworn in in '90. Since then his courteous and polite manner has won for him the warm friendship of all with whom he comes in contact. Mr. Milne has always taken a front rank in societies. He was twice G.M. of the Ancient Free and Accepted Order of Masons in B. C., and is now G.P. for the Province of the Knights Templar of B. C. He is also a member of the I. O. G. T., Knights of Pythias, United Workmen and Legion of Honor. He has ever been an indefatigable worker for Canada's and Victoria's interests. He is an eloquent and effective speaker, and an able and entertaining writer, and his pen has always been ready to aid the side of right.

**Mollet, J. C.** The subject of this sketch, a native of the "Channel Islands," was born at Jersey in '46. Mr. John Carter Mollet first came to Canada in '62, and for some years settled on a farm, purchased by his father, near London, Ont., subsequently moving, in '71, to a larger farm in Arran township, near the village of Para, Bruce Co., where he remained until '84, when, being desirous of residing in a more congenial climate, he came to B. C. He is now a resident of Riverbend

BIOGRAPHICAL SKETCHES.

Alberni, where he occupies a very prominent position as a farmer, Government agent, and notary public, and is much esteemed by all with whom he has business transactions.

**Morley, C.** Among the successful and prosperous manufacturing enterprises and business operations of Victoria, there are few deserving more liberal patronage than that of Mr. C. Morley, Soda water manufacturer, etc. This well known concern has been established since '71. The premises occupied by Mr. Morley are situated in Waddington Alley, off Johnson and Yates Streets, which are of a most extensive character, where the manufacture of soda water, lemonade, ginger ale, and various essences and syrups, etc. of all kinds is carried on. He transacts a very large business throughout the entire Province; and gives regular employment to several hands. Mr. Morley is a deservedly popular man, energetic, enterprising and highly esteemed by all who know him.

**More, A. W., & Co.** Messrs. A. W. More & Co., commenced business in January '91, in well arranged and elegantly fitted up offices in "Turner block" on Douglas Street, as exchange and mortgage brokers, real estate, insurance and financial agents. Mr. Arthur William More, the sole partner of the firm, is a native of Scotland, and a banker of recognized ability, having served several years in the office of a Scotch legal firm, and was also in the service of the Clydesdale Bank, Glasgow, and other branches in Scotland, in the Chartered Bank of India, Australia and China, London, England, and in the Bank of B. C. Victoria and Nanaimo. He has been in the Province four years, and resigned the management of the Bank of B. C. at Nanaimo to enter into business for himself, in which he has already established a reputation for being at the head of one of the leading financial institutions in the Province.

**Morrison, Dr., M. D.** The subject of this sketch is one of Victoria's well known and highly respected medical practitioners, Dr. R. R. Morrison, M. D. He is a graduate of Mich. Coll., Detroit, graduating in '82, and came to Victoria in '83, where he has succeeded in securing a steady and increasing practice. In April '90, he was appointed Coroner for the city and district of Victoria and the Esquimalt district, which important office he still holds. He is also a member of the B. C. Medical Council, and a gentleman who is justly entitled to the esteem and respect in which he is held.

**Morrow, D. W.,** of Morrow, Holland & Co. Among the rising and prosperous young business men of Victoria, none hold a more prominent position than Mr. Morrow, of the firm of Messrs. Holland & Co., real estate and financial agents, much of whose success and prosperity is to be attributed to the characteristic energy and sterling business capacities with which he is gifted. Mr. Morrow was born at Barrie, Ont., where he resided until '83, when he came to Victoria, first taking up a government appointment, but after a while resigned and entered the commercial line of business as head accountant in the firm of Messrs. Cowan, Shaw & Co, which position he held until '89, when he entered the real estate and insurance business under the name of Morrow, Holland & Co., having associated with him in business, Messrs. J. Holland and H. A.

Munn, he being the senior partner of the firm. For some years Mr. Morrow was also sec. and treas. of the B.C. Fire Ins. Co. With all who know the firm of Messrs. Morrow & Co., the name of the company is a guarantee for all honorable and fair transactions, the members of which are respected alike for their business ability and financial integrity.

**Mortimer, John.** The proprietor of one of the largest granite, marble and stone works in Victoria is the subject of this sketch. The business, which was established by Mr. Mortimer in '77, is carried on by him at Nos. 15 and 17 Kane Street, where he has large and commodious premises, containing his stone yard, work-shops and every facility for the execution of his work. Here are manufactured all kinds of monuments, headstones, slabs, and granite and marble works in general. Mr. Mortimer is a thorough practical expert in his business, and is of opinion that the granite and marble in this country is equal, if not superior, to any that is imported.

**Mowat, Maxwell M.** Among the well-known business men of New Westminster the above named gentleman is one of the most enterprising and loyal citizens. Mr. Mowat was born at Des Sile, on the 5th Dec. '61, came to B. C. in '81 and obtained the position of assistant officer in charge of the Dom. Gov. Fish Hatcheries from '84 to '89, in which capacity he proved himself an able and efficient officer. Leaving this situation Mr. Mowat went into business for himself under the firm name of Mowat & Sloan, which firm dissolved partnership in '91, when Mr. Fred Turner was admitted into partnership under the name of Mowat & Turner. Besides real estate and insurance business Mr. Mowat has gone into the frozen salmon business. This year they have 120,000 pounds for export, which will be placed on the eastern market. This new and promising industry is just in its infancy, but in such able and efficient hands as Mr. Mowat's we may expect, ere long, to see this one of the leading industries of the Province.

**Muir, A. M.** A thoroughly practical architect is the subject of this brief sketch. Mr. A. Maxwell Muir is a native of Scotland, and studied his profession and received his education in the city of Glasgow. Has had an extensive experience in his profession both in the Old Country and in the United States. Came to this Province about three years ago, and until lately was in the employ of Mr. J. League, during which time he has shown himself to be an expert draughtsman and practical architect, having been engaged on many important public and private works. He has recently opened a large and elegantly equipped office in the "Turner Block," Douglas Street, where he has entered into practice for himself.

**Nelson, Charles.** This well-known and enterprising citizen of Vancouver, was born in Manchester, England, June 61, came to Canada in '82, and spent four years in Winnipeg and the Northwest, eventually coming to Vancouver in Oct. '85, just after the Terminal City had had its "baptism of fire," he commenced business on Carroll Street in Dec. '86 as a chemist and druggist, and by his many able and good business qualities has succeeded in making it one of the best of its kind in the city.

In '89 he entered into the jobbing and wholesale business, in which he continues to be successful in all its branches.

**Nicholles & Renouf.** No firm in Victoria stands higher in commercial circles or holds a more prominent position in this city than that of Nicholles & Renouf, the extensive hardware dealers, of Yates and Broad Streets. The trade of the house extends throughout the North-west, and has long enjoyed an enviable reputation in the trade through the excellence of the goods for which it is noted.

**Norris, John F.** This gentleman, who as a journalist occupies a prominent position in the ranks of his profession, is a member of the staff of the "Daily Colonist" newspaper, Victoria. He was born at Ulloxter, Staffordshire, England, and educated at Alhorne's Grammar School in his native town. For some years he was connected with the "Herald," "Gazette," "Witness," and other papers of Montreal. Edited the "Montreal Times," also the "Mining Age," of New York. Acted in a confidential capacity for late Senator Penny. During small pox epidemic of '85 he was assistant secretary of the Board of Health of the Province of Quebec, served as asst.-sec. and sec. of St. George's Society, Montreal, and was the first president of the Trades' and Labor Clubs, of Victoria, B. C.

**Nuttall, Thos. C.** One of Victoria's earliest pioneers and best known and oldest residents. Came to this Province in '59, and with the exception of two years during a visit to Europe, Newfoundland and Mainland of B. C., has resided in Victoria ever since, where he owns considerable property, and has aided materially in assisting in various ways the advancement of the city. Mr. Nuttall is a native of Newfoundland, and son of the late John Chas. Nuttall of Bristol, England, of the well-known old mercantile firm of Nuttall, Thorne & Co. merchants and ship owners of Bristol and Newfoundland. In '64, he established the agency of the old and universally known "Phoenix Fire Insurance Company, of London, England, of which he was appointed the authorized local agent, and which company he still ably represents with much credit and satisfaction to all concerned.

**Orr, William John.** A member of the well-known boot and shoe establishment of Rendell & Orr, of Nanaimo, was born in the city of Quebec on the 16th Jan. '66, and came to B. C. in April '89. Previous to his coming to this Province, Mr. Orr had considerable experience and practice as a cutter in various factories, both in Quebec and Montreal, and thoroughly understands the manufacturing of boots and shoes in all the minutest details. As mentioned above, Mr. Orr is a partner of the firm of Rendell & Orr, both of whom are practical, enterprising business men, and endeavor in every possible way to give satisfaction to all who favor them with their patronage.

**O'Neill & Cowie.** The above successful and enterprising firm carry on a general real estate, conveyancing and financial business in the Clarence block, No. 104 Yates street, and makes a speciality of farms, fruit lands and garden tracts on the Island. The senior member of the firm is Mr. James O'Neill, who is well acquainted with the character and resources of this province having

## BIOGRAPHICAL SKETCHES.

1181

been established in business in this city for the last ten years. The other member of the firm, Mr. James Cowie, although only lately from Scotland, is well known and much respected in business circles.

**Page & MacGregor.** This deservedly popular and well-established firm not only transacts an extensive real estate and insurance, but also a loan and mortgage business. The members of the firm, both sterling men of business, are Charles M. Page and P. C. MacGregor. Mr. Page was for a long time connected with both the London, Paris and American Bank, Ltd., and the Bank of British Columbia, in London and on this continent, and the business training he received with these two great financial institutions eminently fits him to conduct a business such as the one in which he is now engaged. The other member of the firm, Mr. MacGregor, who is representative of the Federal Life Insurance Co., of Montreal, is a man of genuine business qualities, and, like other shrewd and farseeing business men, has great faith in the future of Victoria, and has not hesitated to back up his faith by large financial investments, thereby making himself the possessor of extensive interests in the city.

**Peacock, A. Philip.** A member of the legal profession, who has recently established himself at 21 Bastion street, where he has entered into the practice of his profession as a solicitor, notary public, commissioner, etc. Mr. Peacock was admitted a solicitor of the Supreme Court of Judicature of England, in July, 1879, subsequently practicing in Bedford Row, London, until he left for America, and on coming to this Province was admitted in May, '90 to the Supreme Court of B. C. In January, '91, he was appointed law clerk and librarian to the Legislative Assembly of B. C., the duties of which are very important, and, at times, most arduous. Mr. Peacock is an earnest assistant in everything having for its object the welfare of the community and the prosperity of the city, and we wish him every success in his professional career.

**Pemberton & Son.** The above firm of civil engineers, surveyors, real estate and financial agents, which has been established here about two years, holds a very prominent position among the firms of its kind in this city. The members of the firm are J. D. Pemberton, C. E., and E. B. Pemberton, C. E., notary public. Mr. J. D. Pemberton has had extensive experience in his profession as engineer of many of the first railways in England and Ireland, and everything in surveying and civil engineering is thoroughly understood by this firm, and will be executed to the satisfaction of their patrons.

**Perkins, W. H. Staddon.** The subject of this sketch was born at York, England, 9th April, 1864, and received his education at St. Roman's College, Surrey. In 1880, being actuated by a desire to see the world, he left the old country and came to America, choosing the Western States as his destination, where he engaged himself as a teamster and drove an eight-mule team until '82, when he came to Victoria and started in the fruit business on Fort street, after which he entered the employ of Mr. David Spencer, until '88, when he embarked in business on a small scale in the "Novelty House," at Nanaimo, subsequently entering into partnership with Mr. Spencer, and opened what is known as the "Cash Store," and which is generally acknowledged to be the leading dry goods establishment in Nanaimo. Mr. Perkins is a zealous and prominent member of the English Episcopal church, being ex-warden of St. Paul's and the people's present warden of St. Alban's, and sat in the last session of the Diocesan Synod, held at Victoria in June, '91, when he was elected a member of the executive committee of the Diocesan Synod of British Columbia. He is also an active member of the Masonic Lodge and Chapter, the Knights of Pythias, and several other benevolent societies, and

takes an interest in everything tending to the welfare of Nanaimo and its people. In 1886 he was married to Miss Alice J. Bard, daughter of J. Bard, Esq., of Dublin, Ireland.

**Perry & Hall.** This successful and enterprising firm, which is one of the most prominent and important of its kind in Victoria, carry on a large and extensive business in the manufacture of articles from tin, zinc, copper and sheet iron. The premises occupied by them are situated at 94 and 96 Johnson street, and are thoroughly equipped with all the latest improved and modern machinery for the production of their extensive business. The members of the firm are Mr. Wm. Perry and Alfred Hall, gentlemen who through executive ability and honorable methods of transacting business, have built up for themselves a large and influential trade.

**Phillips Alexander.** A native of Scotland, born at Elgin, on the 7th August, 1849, came to this Province in September 1894. Previous to his coming to New Westminster, where he has established himself as a house and land agent and conveyancer, he was for 14 years in practice as a solicitor in Scotland, eight of which were in the city of Glasgow. He was a practical agricultural trust of experience, and has still a large stake in land in the old country, but the depreciation in the value of land there, and the overcropping has made him seek a home and a sphere of work where the prospects are brighter.

**Phillips, Joseph & son.** The enterprising proprietor of one of Victoria's prominent industries, and a citizen deserving of much credit, is a C. F. Fishman by birth, born 24th March, 1849. After serving his apprenticeship at the trade of stone mason, he left the land of his birth and came to America, where he worked in various parts of the States until 1881, when he came to Victoria and embarked in business for himself, in which he has been constantly successful, and to-day he has one of the largest stocks of rough and finished stone of various kinds, in British Columbia. Mr. Phillips is not only an operative mason of well known high repute, but he also holds a very prominent position in this city as a speculative Mason, and his services and work are such for the benefit of the craft have met with the highest recognition of his brethren of that fraternity, who feel a pride in recognizing him as the present Wm. Master of Lodge Vancouver, Quaries No. 2, and in February, 91, he was also elected by a large majority Grand Master of the L. O. O. F., for whose order he has for many years been a most zealous and worthy member, and is highly esteemed by all who have the pleasure of knowing him.

**Phillips, George.** Among the prominent houses in this city of Victoria, none is more worthy of mention than that of Mr. George Phillips, of 146 1/2 Vermont street, where is to be seen one of the largest and finest stocks of stoves, ranges, etc., of all kinds, in Victoria. He also makes a specialty of having churches, schools and residences of all sizes, by the hydraulic system, with the famous A. Cheney steel plate furnace, some of the most beautiful given in the city having been heat-d by him. In connection with his business, Mr. Phillips has also a full line of S. S. ship stoves, and a towing ship, in which several men are constantly employed, and where towing and all kinds is done under his personal supervision, and being a man of true business capacity, and large practical experience in his special line, he is able to give his patrons the best satisfaction possible both in quality of goods furnished and character of work done.

**Phillips, A. & Son.** This enterprising firm, which stands second to none in Victoria for the manufacture of superior aerated waters, was established in 1858, and has always maintained a high reputation for the superiority

1183

of its products. Their business premises, which are situated at No. 8 Lower Yates street, consists of a new and commodious two story brick building, which is fitted up with every convenience for facilitating the transaction of their large business. The members of this enterprising firm are Mr. A. Phillips and his son, P. A. Phillips, and no firm is more deserving of the success they have met in business.

**Potts, Charles Herbert Beevor.** A young English barrister and solicitor, was born in Sussex, Eng., 23rd April, 1864. He was articled to one of the leading firms in the city of London, Eng., and admitted to practice as a solicitor of England in 1887, and came to British Columbia in 1889, taking up his residence in Nanaimo, V. I. He is a notary public for British Columbia, and commissioner for affidavits, and solicitor for the D. B. and Loan Association (Nanaimo branch), besides holding various other appointments. Mr. Potts is a gentleman of superior qualifications, courteous and obliging in manners, and what may be justly termed a capital all round lawyer.

**Prior, E. G. & Co.** With the growth and prosperity of this city no firm has been more closely identified, or has held a more conspicuous position, than that of Messrs. Prior & Co., the business of which was established by Mr. Alfred Fellows, in 1838, and continued by him until 1853, when Mr. Prior purchased a half interest. In 1884 Mr. Fellows retired, and the business was conducted under the name of E. G. Prior, until '89, when Mr. G. F. Myrthens joined the firm, since which time the business has been conducted under the name of E. G. Prior & Co. The premises occupied by this house are large and substantial, consisting of a four story block, on the corner of Government and Johnson streets, which is packed with all kinds of heavy and sheet hardware, iron, steel, brass, belting, etc. Fair line of agricultural implements, too, is a large and varied one. They also maintain a branch house at Kamloops, B. C., and their trade extends over the entire Province.

**Quinlan, Walter J., D. D. S.** One of the leading and well known members of the dental profession of Victoria, is a native of Ontario, born in that province 10th November, 1869, and was educated at the Bay Street College Institute, and Toronto University. He subsequently attended the Royal College of Dental Surgeons, Ontario, and graduated at the Philadelphia Dental College in '90, when he came to this province three months after, and commenced the practice of his profession. Dr. Quinlan is a young man of pleasing manners and well known ability, and his business has grown until now he has a practice second to none in this province. He is prominent and popular member of the Masonic fraternity, being Master of Lodge Victoria, C. O. number No. 1, and was recently unanimously elected Provincial Grand Secretary of that noble and ancient order.

**Rowings, Charles Goodman.** The subject of this sketch, who came to Victoria on the 10th July, 1891, is the popular and efficient General Agent of the Union Pacific Railway Co. Mr. Rowings is a native of America, born at Danctur, Ill., U. S. A., 16th Sept., 1854, and is an old time railroad man and operator, having been for some years in the service of the O. R. & N. C. P. and Postal Telegraph Co. During the short time he has been in this city he has won for himself an excellent reputation as a business man, entering heart and soul into everything pertaining to the duties of his office and the welfare of the company he serves, while his courteous and obliging disposition has gained the esteem and good will of all with whom he has business transactions.

BIOGRAPHICAL SKETCHES.

**Rayner, T. G.** The sole representative of the business established by him eight years ago, proves by the large and increasing patronage which he has managed to obtain in so short a time, that his commitments are convinced that in dealing with him they are dealing with one whose integrity and skill as a thorough, practical business man can be fully relied upon. He has a very large list of valuable properties which would well repay intending investors to inspect before deciding any real estate transaction. Mr. Rayner is general agent for the province of B. C. of the Provident Savings Life Assurance Society of New York, and also agent for the Scottish Union, and Nat. Fire Ins. Co., of Edinburgh. His place of business in Victoria is Bank building, Tronace Ave.

**Redfern, C. E.** One of Victoria's well known and most respected citizens, came to this province from London, England in 1862, where shortly after his arrival he established himself in the jewelry business, which he has hitherto continued to carry on, and has succeeded in building up a large and permanent trade. In addition to a well selected stock of gold and silver watches, solid silverware, and jewelry, Mr. Redfern also makes a speciality of diamonds and other precious stones, the mountings of which are manufactured in his own establishment. Another branch of Mr. Redfern's business is that of optical goods, and he gives special attention to the repairing of ship chronometers and the regulating and rating of the same by transit observation. In addition to his varied assortment of smaller time pieces Mr. Redfern is also celebrated for his church and turret clocks, and it may be here mentioned the city council are to be congratulated for having given to a man like Mr. Redfern the contract for the magnificent clock which now adorns the tower of the City Hall. This clock and bell were made by Messrs. Gillett & Johnson of Croydon, England, who have appointed Mr. Redfern their agent for B. C. Notwithstanding the heavy demands which a large business makes upon his time and attention, Mr. Redfern has ever evinced a deep and active interest in the welfare of the city of Victoria, having served with much credit and ability in two important capacities, first in that of councilman for two successive terms, and secondly as Mayor in 1881, which high office he held with much honor and credit both to himself and his constituency.

**Reid John.** A native of the Emerald Isle, was born in Carrickfergus, Ireland, 29th March, 1852, and came to B. C. in 1877, subsequently settling down in the Royal City, where he established himself in the blacksmithing trade, which by dint of his good business qualities and energetic exertions he has succeeded in building up one of the best in the city, and which from small beginnings has grown to such dimensions that the firm decided to form the business into a joint stock company. This was recently done, and incorporated under the name of Reid & Currie Iron Works Co., with a capital stock of \$100,000, thus making it one of the largest concerns of its kind in the city. It is hardly necessary to dwell upon Mr. Reid's many good qualities, suffice it to say that he is one of New Westminster's live business men, and has closely identified himself with every good work which had the advancement of his adopted city in view.

**Rendell Edward.** The enterprising subject of this sketch, who occupies a prominent position in the boot and shoe trade of Nanaimo, was born at Taunton, Somersetshire, England, 20th June, 1849, and came to Victoria in 1884, where he found employment in the large retail boot and shoe house of Mr. A. B. Erskine, who at that time had also a boot and shoe business at Nanaimo. This business was subsequently purchased by Mr. Rendell, and W. J. Orr, who are now the proprietors of the concern, and are at present doing a steadily increasing business.

1185

**Richards, F. G., jr.** Among all the popular and well known real estate, financial and insurance firms which this city possesses, few hold a more prominent place than that of Mr. F. G. Richards, jr., who by his vast practical experience and honourable transactions as a real estate agent has made for himself a name which is known far and wide. The business of which he is the sole proprietor was established by him about three years ago, during which time he has won a very large share of public patronage. He is also agent for various insurance companies, etc. To anybody contemplating investment, and is desirous of information regarding Victoria and the resources of the surrounding country, they cannot do better than pay a visit to Mr. Richards' office, 51 Yates street, where they can obtain all the information they may wish. Personally, Mr. Richards is a most courteous and affable young gentleman and well deserves the good name and popularity which he happily enjoys.

**Rithet, R. P. & Co., Ltd.** Standing foremost among Victoria's prominent business houses, and the largest establishment of its kind in the Province, is the firm of Messrs. R. P. Rithet & Co., Limited, importers, commission merchants, shipping and insurance agents. This large and important commercial institution was formed by Welch, Rithet & Co., in 1871, and continued by them until 1889, when they were succeeded by R. P. Rithet & Co., which was the name and style of the firm until January, 1891, when it was incorporated under the present firm name of R. P. Rithet & Co., Ltd. They are extensive importers and the stock carried by them is, both in size and quantity, unsurpassed. They are the authorized agents for various well known companies, and are represented in London and Liverpool by R. D. Welch & Co., and in San Francisco by Welch & Co. The members of the firm are, R. P. Rithet, President; R. Seabrook, Vice President; W. M. Chutey, Secretary, and R. J. Ker, Treasurer.

**Roberts, Rev. Robert James.** A much respected clergyman of the Church of England is the subject of this sketch. Mr. Roberts was born in Ireland in 1811, is a graduate of Trinity College, Dublin, and was ordained by the Bishop of Huron in 1858. This veteran of the cross was for many years missionary to the Indians in the County of Brant, Ontario, but on account of bad health was superannuated in 1878. At present he has charge of N. E. C. property on Kupar Island, where mission work is carried on among the Indians, and in which he has met with much encouragement and success.

**Robson, David.** A native of Canada, was born near Perth, Ontario, 1840, and brought up at Simco, Ontario, came to B. C. in March, 1862 and took a position on the staff of the "British Columbian," then published at New Westminster by his brother, the present Prime Minister, returned to Ontario in fall of 1866 and entered Victoria University, Cobourg, where he was admitted to the degree of B. A. in 1870, established the "Bulletin" newspaper at Colingwood, Ont., in 1870, which he edited and published till 1881, when he returned to New Westminster and joined his brother in publishing the "Columbian," retired from the Columbian in 1888 and accepted the position of City Clerk at New Westminster, which position he still holds and where he still resides, married Elizabeth Henry, at Colingwood in 1876, has three children, is of Scotch descent, Methodist, total abstainer, and in politics a Liberal.

**Ross, Dixie H. & Co.** This well known and popular first class family grocery establishment was founded 16 years ago, and has ever since enjoyed a large share of public patronage. The stock carried by them embraces a complete assortment of staple and fancy groceries, foreign and domestic condiments, provisions, flour, etc. They also make a speciality of Messrs. Cross & Black-

BIOGRAPHICAL SKETCHES.

well's full line of oilmen's stores, French wines and conserves from Bordeaux, and Californian wines. This firm maintains a high reputation for the quality of their goods, for their square dealing and strict business integrity, and they are deserving of the liberal patronage they receive.

**Ross, Herbert Gerrard.** The subject of this sketch was born at Quebec, P. Q., on the 19th August, 1860, where he was for some years engaged in the lumber manufacturing business, subsequently coming to B. C. in April, 1887, taking up his residence at New Westminster, where he worked for the B. C. P. Mills Co., the Brunette Saw Mill Co., and the MacLaren-Ross Lumber Co. till 1889, when he established his present business. He is also agent for several well known and reliable companies, among which may be mentioned the Canadian Life Ins. Co., by far the largest company of its kind in the Dominion. In February, '91, he was elected a member of the Board of Trade, and is an active, enterprising man, possessing sterling business qualities, and is recognized as one of Westminster's most progressive citizens.

**Routledge & Co.** This popular and well known firm, whose commercial offices are situated at 48 Government street, is one which it would be of advantage to those, whether residents or visitors, contemplating investment, to become acquainted with, since they have on their property lists, not only some of the best farming, mining and coal lands in the market, but also have the handling of every description of B. C. and Puget Sound property. The members of the firm are W. H. Routledge and J. E. Church. Mr. Routledge is an Englishman, who came to the Pacific Coast direct from England, and after having been in Victoria a few months started in the real estate and insurance business. His gentleman's tact and commercial adaptability is universally known, and throughout the entire Western States he has won the reputation of being a first class real estate broker. Mr. Routledge, moreover, is a man of great experience and initiative ability, and one whose decision is seldom questioned. Mr. Church is an American, who has been extensively engaged in the commission business, and for upright dealing and business integrity is a worthy example. He entered the firm in February last, with the intention of extending the already large connection of the firm. The firm has branch offices at Seattle, Wash., Vancouver and New Westminster, B. C., and is undoubtedly one of the principal leading real estate firms on the Pacific Coast.

**Rowbotham, Arthur James.** Among the old pioneers of the early days of Victoria, perhaps none are more respected and so widely known as the above named gentleman. He was born in Derby, Sept. 6th, 1851, and came to this Province May 15th, 1865, when the colony of Victoria was only in its infancy. Mr. Rowbotham commenced business on his own account in '82, at the corner of Pandora and Douglas streets, subsequently removing to the corner of Yates and Broad streets, where he still carries on a steadily increasing business, and is the recipient of a very fair share of public patronage.

**Russell, Charles Frederick.** This enterprising and well known business man was born in London, Eng., 7th March, 1851, and came to this country during the Cassiar gold excitement in 1872. On his arrival in British Columbia, Mr. Russell entered into the mining and trading business, in which for five years he was eminently successful, after which he took a trip to Australia and New Zealand, subsequently returning to this Province, when he founded the well known firm of Russell, McDonald & Co., of Victoria and Vancouver, which is now, we believe, the oldest retail partnership firm in the Province.

### BIOGRAPHICAL SKETCHES.

1187

**Salmon, Henry Louis.** One of Victoria's most prominent and popular wholesale and retail tobacconists, was born in London, Eng., 15th July, 1858, and came to B. C. in January, '84. Shortly after his arrival in this country he started in his present business, buying out his brother, Mr. Maurice Salmon, since which time the business has increased to such an extent that it was found necessary to build the present commodious and elegant store, which has recently been erected on the site of the old frame building, corner of Government and Yates streets, and which is the most substantial and attractive store of its kind on the coast. Mr. Salmon is a large importer of Havana cigars and tobaccos of the most select brands, and smokers' requisites generally. Through his own efforts he has achieved success, and he well merits the popular estimation and respect in which he is held.

**Schoen, Sigmund.** Born in Hungary in 1859, and a resident of British Columbia since 1881, is one of Victoria's most pushing and enterprising grocers, carrying on business at 177 Douglas street, where everything in the way of first class groceries, provisions, etc., is to be obtained. Mr. Schoen commenced business in 1885 and by untiring energy and the strictest attention thereto, is now enjoying a most lucrative trade, and the well stocked and neatly arranged store of which he is sole proprietor is a credit to him in every sense of the word, and an evidence of his rare business tact and commendable industry.

**Seriven, Augustine, The Ven. Archdeacon, M. A.** The subject of this brief sketch who is a prominent ecclesiastic of the Church of England in this Diocese, and the son of an English clergyman, was born in Warwickshire, England, 28th August 1851. After graduating B. A. from St. Mary Hall, Oxford, in 1873 and M. A. in 1885, he was curate in the parishes of Kirkham, Lancashire, Frindsbury, Kent, St. Peter's, Rochester and Curate in sole charge of Marlborough and Frindsbury, N. Devon, finally coming to British Columbia in November 1884, where he holds the high office of Archdeacon of Vancouver and is also a Canon of Christ Church Cathedral, Victoria, and Rector of the parish of St. James. As a scholar and a preacher Archdeacon Seriven most ably sustains the reputation of his *alma mater*, and is very popular both in his parish and throughout the Diocese at large.

**Sears, Joseph.** Is the enterprising proprietor of one of the oldest and most popular painting, glazing and wall paper establishments in this city. This business which was established by Mr. Sears in 1876 has always maintained a high reputation in the art of sign painting, frescoing, paper hanging and all kinds of interior decorating. The stock carried is one of the largest in Victoria and consists of paints, oils, colors, varnishes, brushes, window and plate glass, wall paper, etc., of all descriptions. Mr. Sears is a man of many years experience, and there is no part of his business with which he is not thoroughly acquainted.

**Schl-Hastie-Erskine Furniture Co., Ltd.** This firm, which is the embodiment under a new name, of two old well known and prominent firms which have for many years been carrying on business in this city, in the same line, was during the past year amalgamated as a joint stock company, under the above name and style. The premises occupied by them are situated at 66 and 68 Government street, and the stock carried by them is one of the largest in the province, embracing everything in the line of furniture, and upholstered goods, crockery, glassware, carpets, etc. The members of the firm are Jacob Schl, James Hastie and R. Erskine, all men of business experience and energy. Mr. Schl

BIOGRAPHICAL SKETCHES.

has been in business for over thirty years, and has succeeded in building up a large trade. Mr. Hastie and Mr. Erskine have also been in business for a number of years, and all three have established a reputation that is surety for their prosperity.

**Shakespeare, N.** One of our prominent public spirited citizens, and well known postmaster, was born at Brierly Hill, Staffordshire, England, on the 26th January, 1839, and was educated at the public schools of his native place. He came to Victoria 10th January, '63, and has since that time been a resident of the Province. His first public position was that of councillor, and his efforts during the four years he was in council were always directed in favor of the workingman. In '82 he was elected mayor of the city by a large majority of the ratepayers. The same year he was also elected President of the Mechanics' Institute, and at the general election, '82, was sent to Ottawa to represent Victoria in the House of Commons, and again re-elected to the same position at the general election in the spring of '87. In '85 Mr. Shakespeare was elected to the presidency of the B. C. Agricultural Association, and in '86 he was also made president of the B. C. Mutual Fire Ins. Co., of which he was the principal organizer in Victoria. He was president of the Anti-Chinese Association of Victoria in 1879, was elected Grand Worthy Chief of the Grand Lodge of Good Templars of Washington Territory and B. C. in 1877, and elected to the same position in 1878, and in 1886 he filled the honorable office of president of the Y. M. C. A. of Victoria. In 1884 he introduced and succeeded in getting carried a resolution in favor of restricting Chinese immigration in the Dominion of Canada. On the 27th December, 1887 he was appointed postmaster of the city of Victoria, which important position he still holds. He is a justice of the peace for the Province of B. C. In politics a Liberal Conservative, and in religion a Methodist. He is thoroughly identified with everything that tends to the city's welfare, and is a staunch friend of all movements adopted for the good of his fellowmen.

**Shannon, William.** A native of "Erna Isle," was born at Sligo, Ire-land, in 1841, and came to B. C. in 1863. In the early days of Mr. Shannon's residence in this Province, he was extensively engaged in farming, contracting and stock raising, from which pursuits he acquired much valuable practical knowledge and experience. He has also largely explored the country, especially in relation to timber lands and agricultural settlements, and as a member of the firm of Shannon & McEachlan, real estate and financial agents, his attention is chiefly directed to these points, and to real estate investments generally, both in the city and Province, and as Mr. Shannon has been a resident in this Province for over 25 years, he is regarded as an expert of great ability in this particular line of business.

**Sheppard, Henry Wm.** There are few people in this province better known or more respected than the popular subject of this sketch, who has the honor of being the superintendent of Victoria city police. Mr. Sheppard was born in London, England, 14th May, 1835, and left the land of his birth for Australia, in '54. He came to this country in '62, taking up his residence at Cariboo and Cassiar, where he was engaged in the former 31-see 12 years, and in the latter three years as a miner. In '64 he joined the Victoria police force but resigned after six months and returned to Cariboo. In '80 he again joined the police in which he served six years as constable and nearly two years as sergeant, when in November, '88, he was elected to the responsible and important office of Superintendent of Police, which office he still holds with much honor and credit to himself and to the police force at large.

BIOGRAPHICAL SKETCHES.

1189

**Shotbolt, Thomas.** One of the oldest and most popular chemists and druggists establishments in this city is that of Mr. Thomas Shotbolt, 59 Johnson street, which was established by him in 1862, since which time to the present the establishment has ever maintained the reputation of being one of the most reliable of its kind in Victoria. Special attention is given to the careful preparation of physicians' prescriptions, while the stock carried comprises full assortments of pure and fresh English, French and American drugs, chemicals, patent medicines and choice perfumery, toilet requisites, etc. As a gentleman and business man he is energetic and reliable, enjoying the confidence of all who know him, and well deserving of the high esteem in which he is held.

**Shrapnel, Edwd. Scrope.** This gentleman, who as an artist occupies a very prominent position in the ranks of his profession, is the grandson of the gallant General Shrapnel, R. A., the famous inventor of the Shrapnel shell, still in use in the British army. He was born at Gosport, County of Hampshire, Eng., 12th January, 1845, and came to British Columbia 15th September, 1889. He is the first member of the Royal Canadian Academy and Ontario Society of Artists, who has resided permanently in British Columbia, and is the originator of the B. C. Art Association, and is at present the president of the same.

**Sorby, Thos. C.** Among the eminent architects of Victoria, few names hold a more prominent position than that of Mr. Thos. Chas. Sorby, whose office is situated at No. 6 Bastedo square, where are to be seen numerous artistic designs of the handsome buildings which adorn this city and other places in the Province, and which have made his name widely and favorably known as an architect of the highest order. Mr. Sorby has been established here about five years, coming first from England to Montreal in 1882, and subsequently to Vancouver, where he practiced his profession till '86, finally coming to Victoria where he has been established since that year. Among the numerous buildings constructed from his designs we may mention the following: At Vancouver, the Hotel Vancouver, Stephens Block, County Court House, Bank of B. C., St. James Church, Hudsons Bay block, and residences for Messrs. Abbott and J. Angus, also the Central Hotel at Sehome, North Bend and Glacier hotels, C. P. Ry. stations at Toronto, Peterborough, Winnipeg and other smaller stations, etc., on the line. While in this city we may mention the residences of Messrs. Dumbleton, R. Ward, D. R. Harris, T. R. Smith, the Hon. A. N. Richards and others, and lastly, but by no means the least, the Five Sisters Block, now fully completed, at a cost of about \$150,000, our Government and Post streets, and which will be the finest structure in the city, and will fully justify the success which Mr. Sorby has achieved in his profession.

**Spencer, David.** The enterprising proprietor of the well known "Spencer's Arcade," established his business here 17 years ago, and has by strict attention to the interests, good judgment, and a constant desire to please, won for himself a position among the great mercantile houses of this Province. The premises occupied by his establishment are a very commodious, a solid block running from Government street clear through to Broad, containing two stories and lighted throughout by electricity. The firm gives constant employment to 62 hands, the wages of whom amount to \$25,000 annually. The class of goods carried in stock the money value of which continually on hand is about \$120,000, embraces every conceivable article that a first class dry goods house can be expected to carry, the departments in which being as follows: Silks and foreign dress goods, hosiery and gloves, mantles, millinery, carpets and

## BIOGRAPHICAL SKETCHES.

house furnishings, habit and dress materials, and art department. This house by honorable dealing, has long since established itself firmly in the confidence of the Victoria public, and persons who trade with this firm once, usually return and in most cases become constant patrons.

**Springer, Benjamin.** One of the oldest of Vancouver's citizens was born in London, Ont., on the second day of February, 1841, came to B. C. in 1862, and may be justly classed among the few successful pioneers of those early days of the colony. Mr. Springer first went to Cariboo which in those days was the centre of a gold excitement, after putting up with much hardship and the great dangers of those times, he returned to the coast and took a position as tallyman in the Moodyville sawmill, from this he was given a position as book keeper in the office, and from which position he eventually became manager of the mill, which under his able and energetic management, has become one of the largest and most successful in the Province. Mr. Springer early took an active interest in the Terminal city and has closely identified himself with every movement having for its object the advancement of the same.

**Turnks, J. Gerhardt.** Mr. Turnks was attitled to Messrs. Hows, Price & Wooller, of Weston Super Mare, England, and came to Victoria in '88, where he has established himself in his profession. He has had great experience in designs for villas of the better class and residences of country gentlemen and in all the detail of church design. In Victoria the villas erected by him are dotted over the James Bay and other districts. He is also the architect of the new church at Cobass, of Mr. T. W. Carter's residence on Herald street, Mr. Peire's store on Douglas street, and other buildings in and around the city.

**Toller, A. & Co.** The above firm, whose offices are at No. 8 Broad street, have been established in this city for the last 4½ years. The chief representative of the firm is Mr. A. Toller, a gentleman of wide and varied experience in financial transactions, and who, by strict attention and unsparring personal devotion, has succeeded in conducting a large real estate and general agency business to the satisfaction of all concerned, and to the mutual benefit of themselves and the public generally.

**Trimen, L. Buttress.** Is the son of, and was for some time partner, of the late Andrew Trimen, of No. 3 Adam street, Adelphi, London, Eng., author of "Church and Chapel Architecture," etc., came to Victoria in '87, since which time he has designed and executed several more or less important works here and elsewhere, amongst which may be mentioned St. Andrew's Presbyterian Church, the residence of N. P. Snowden, Esq., on the Gorge, Henry Croft, Esq., M. P. P., near the Esplanade road, overlooking the harbor, the Hon. H. P. Pellet Crease, P. J., on Fort street, etc., etc., Messrs. Prior & Co.'s and other stores on Government street, Mr. Saunders', and several adjoining on Johnson street, etc., etc., while at New Westminster the Douglas Hotel, Bank of Montreal, the Haunley block, and other buildings, had their origin in his office, as did also the Harrison block at Vancouver, the Swiss residence of J. Bryden, Esq., at Wellington, etc., etc. Mr. Trimen occupies a front rank in his profession, and his ability as an architect is, beyond question, of the highest order.

**Turner, Fred, G.** Was born at New Westminster, B. C., on the 11th May, 1870, and has resided in that city not only since his own infancy, but also since the infancy of the Province. Mr. Turner commenced his business career in the office of Woods & Turner, land surveyors, etc. After serving

### BIOGRAPHICAL SKETCHES.

1191

five years with them, he took a position in the Land Registry Office in the city of his birth, which position he filled for two years, and in February, 1891, he entered into partnership with Maxwell M. Mowat, under the firm name of Mowat & Turner.

**Turner, Beeton & Co.** During the past thirty years no firm has played a more important part in building up the business of this city, or has a higher reputation in B. C., and on the Pacific Coast than that of Messrs. Turner, Beeton & Co., importers, wholesale dealers in general merchandise and manufacturers' agents. The premises occupied by this firm, situated at the foot of Yates street, are large and commodious, consisting of a four story brick building, with five large boarded and other warehouses on the wharves at the rear, for the storage of goods. They are owners of Inverness cannery on Skeena river, and agents for Balmoral cannery on the same river. They are also agents for the Guardian Assurance Co., the North British & Mercantile Insurance Co., of London, and the Commercial Insurance Co. (marine), of San Francisco, and a great number of other well known and important firms and companies in Europe and elsewhere. The firm is composed of J. H. Turner, M. P. F. and Finance Minister of the province, and H. C. Beeton, the Agent General, the former has charge of the business in Victoria and the latter in London. Both these gentlemen are thoroughly identified with all matters affecting the city and province. With ample capital, energy, enterprise and an efficient staff of employes, both in London and Victoria, they have succeeded in building up a concern second to none in the province, and not surpassed in honorable methods of business.

**Tyson, Andrew M.** This gentleman, a native of bonnie Scotland and can almost be classed amongst the pioneers of this country, arriving in British Columbia in 1853. He is one of the youngest men in his line of occupation in the province and by close attention and management of his business, he has become known and much respected in his adopted home. The city of Vancouver being quite the style of western cities of the Pacific slope, and Mr. Tyson being a man of energy and excellent taste the field for trade in Vancouver is rapidly spreading and the opportunity for men of Mr. Tyson's stamp is most excellent.

**Verrinder Bros., Drs.** The two medical gentlemen whose name heads this sketch occupy a prominent position as dental and oral surgeons in this city. Dr. Robert F. Verrinder received his early education in his native state, Wisconsin, but did not enter upon his professional career till 1881, when he removed to San Francisco, where he matriculated and graduated after three years' study, with honors as doctor of medicine. He then went to Philadelphia to complete his studies in dentistry at the Philadelphia Dental College, graduating therefrom in February, 85, as doctor of dental surgery, in the front ranks of his class. After practicing his profession for some years in San Francisco, he came to Victoria, where he has succeeded in establishing a practice which has grown to such proportions as to demand assistance, which he has obtained by sending for his brother, Dr. A. E. Verrinder (also a graduate of the same renowned dental and medical colleges), who gave up his practice in San Francisco, to enter into partnership with his brother in this city, where they enjoy the distinction of being the only regular medical graduates in the dental profession in British Columbia.

**Wade, Mark Sweeten, M. D., F. C. S.** A prominent and well known physician and surgeon of this city, was born at Sunderland, England, 23rd Nov., 1858, and came to B. C. in Nov., 1881. For a short time after his

BIOGRAPHICAL SKETCHES.

arrival in this country he practiced his profession in the New Westminster district and was afterwards one of the medical staff during the construction of the Onderdonk contract of the C. P. R. He was then appointed by the Government resident physician at Clinton, Lillooet district, and finally removed to Victoria, in 1889, where he has since continued to carry on an extensive and steadily increasing practice. He is connected with several local scientific and benevolent societies, and as a learned physician of excellent repute has won the esteem and confidence of all who know him.

**Whitt, M. W., & Co.** Few business houses in Victoria are more widely known than that of Mr. M. W. Whitt, general dealer in books, stationery, office materials, fancy goods, music and musical instruments. This business was established fifteen years ago by the present proprietor, whose long experience has eminently fitted him for the successful conduct of his business. Mr. Whitt is also agent for J. & J. Taylor's safes, and S. May & Co.'s billiard goods. This house is so well known and has retained its old customers so long, that its reputation is established beyond the requirements of praise.

**Ward, Robert & Co.\*** It has been well said that to no class of her merchants does Victoria point with more pride than she does to her commission merchants, who have not only been to a large extent, the means of advertising her as a desirable business locality, but through them her wholesale and retail merchants have come to be looked upon as the most stable of her business men. A prominent point, and one that will have more effect than any other is the fact that less money has been lost through failures of her merchants than can be said of any other city on the coast. This has given them a very high commercial standing and made Victoria a valuable factor in the commission business. No firm of our merchants can lay a more just claim to all these advantages than that of Messrs. Robert Ward & Co., commission merchants, shipping and insurance agents, and it is due as much to their business integrity that the present state of affairs exists as to any other merchants in the city. This well known firm, which is located at 76 Wharf street, was established in 1872, and from its inception has succeeded in building up a large and influential trade. They as agents, represent Messrs. Curtiss & Harvey, London, the salmon canning establishments of Ewen & Co., the Bon Accord Fishing Co., Fraser river, A. J. McMillan's Naas River Cannery, and they are also general agents for the province of B. C. for the following well known insurance companies: Royal Insurance Co., Standard Life Assurance Co., London and Provincial Marine Insurance Co., (Limited), the London Assurance Co. and the Union Insurance Co. Mr. Robert Ward is Consul for Sweden and Norway, a J. P. and has served for four consecutive years the office of president of the B. C. Board of Trade; is also a pilot commissioner for the Victoria and Esquimalt Pilotage District, and sole partner in the firm, and is much esteemed both in social as well as business circles by all who know him.

**Warren, James Douglas.** This well known pioneer of British Columbia who was born in Prince Edward Island, came to B. C. in the early days of the Fraser River gold excitement, in 1858, when the present site of New Westminster was nothing but a primeval forest. Mr. Warren is the oldest fur and seal trader now living in the Royal City. He was for a long time engaged in the coasting and steamboat business, but recently opened business for himself in the agency line. He has always associated himself with and taken an active interest in all things beneficial to the town of his adoption, and none is more worthy of the universal respect and esteem which is justly accorded him by his fellow citizens.

## BIOGRAPHICAL SKETCHES.

1193

**Watson, George.** Among the enterprising young men of Victoria who have entered into business on their own account few are more deserving of success than the young man whose name heads this sketch. Mr. Watson, the son of one of the early pioneers of this province, was born at Victoria, B. C., 27th Nov., 1869, and has grown with the city. He is a partner of the firm of Watson & Geiger, practical plumbers, carrying on business at 68 Broad street, and being a young man of energy and good business qualifications has a bright and prosperous career before him.

**Webb, Horatio.** Was born in Bedfordshire, England, and came to this province in 1869, settling shortly afterwards in Chilliwack, where he has been very successful and has at present one of the best farms in the valley. He is a thoroughly practical farmer, and has always taken a great interest in the agricultural society, and has been awarded several prizes for agricultural exhibits. He is deputy sheriff and also a leading brother in the L.O.O.F., being one of its charter members. Personally he is a genial man and his many good qualities evoke the regard of his fellow citizens.

**Weiler Brothers.** One of the largest and most successful establishments in Victoria for the manufacturing of furniture of all kinds, importing of crockery, glassware, wall paper, carpets, etc., is that of Weiler Bros. The business was established by their father Mr. John Weiler, in 1862, and was ably conducted by him till January 1891, when he retired from business, and his four sons—George, Charles Otto and Joseph—became his successors. Their extensive and handsomely furnished salesrooms are situated at 51, 53 and 55 Fort street, three stories in height, and extended from Fort street clear through to Broughton. The factory, a substantial structure and three stories high, is situated on Humboldt street. Here twenty-five men are kept constantly employed in the manufacture of parlor, bed room and dining room suites and office furniture. Their trade has grown so rapidly that they have found it necessary to build another factory. The total amount of floor space covered in the factory and salesrooms is 60,000 square feet, and so great is the amount of business done annually that the services of sixty hands are required. Our limited space forbids us enumerating the various articles carried in stock at this popular house, which is a prominent point of interest with strangers in the city, and well worth a visit.

**Wells, A. C., J. P.** Has the reputation of being not only one of the best farmers in Chilliwack, but also for having the only cheese factory in the province. Mr. Wells came from Napanee in 1862, residing for a time in Yale and Victoria, after which he removed to Chilliwack where he has made himself, and the place in which he resides famous, not only by the products of his farm, but also by his excellent cheese, magnificent stock and abundant products of his orchard, by which he has proved to the world in a most evident manner, that a man with prudence and persevering industry can make farming in the famous Fraser Valley profitable to an extent which cannot be surpassed in any other part of the globe.

**White, Frederick George.** Who is a young man of extensive and varied experience in his profession, was born at Osgoode, Ont., 25th July, 1864, and came to B. C. in the summer of 83. During the survey and construction of the C. P. Railway, Mr. White held a prominent position therein until its completion, in Rogers and Eagle pass, and was a member of the firm of Blackett & White, of Langley, B. C., until they sold the business to the H. B. Co., in January, 1890, when he went to Seattle, where he held the position of supt. with Eldred & Ryan, bridge and railroad contractors, which posi-

**CRANE, MCGREGOR & BOGGS,**  
 30 BROAD STREET, VICTORIA.

tion he resigned and returned to Victoria in February, 1891, where he is at present manager of the B. C. D. & D. Co., Ltd.

**Wilson, William Ridgway, B. A. S.** Was articled for four years to one of the leading firms of architects in Liverpool, Eng., after which he went to London, where he was engaged in some of the principal architects' offices in that city, among which may be mentioned that of the late Sir Horace Jones, city architect. He has also passed the examinations under the South Kensington Science and Art Department, qualifying him to lecture on building construction, and also examinations which entitled him to his honor as a student at the Royal Academy. In 1887 he came to this province, where he has since been established in his profession as an architect, and has succeeded in carrying out some thirty or more buildings in this city, and also at Nanaimo and New Westminster, all of which fully attest his skill and ability as an architect.

**Wilson, W. & J.** The two gentlemen whose names head this sketch, are the worthy proprietors of one of the largest and finest establishments in Victoria, the business of which was established by them in 1893, and who, both being gentlemen of large experience and a thorough knowledge of all details pertaining to the same, have, ever since its inception, enjoyed the confidence of their patrons and the public generally. Their establishment, which contains a fine assortment of ready-made clothing and general furnishing goods for men and boys, is situated on Government street, opposite the post office. Special attention is given to fine imported goods, and the best selections are made from British and foreign manufacturers. Messrs. W. & J. Wilson, it may be mentioned, are looked upon as among the most respected and deservedly successful merchants of the city.

**Wilson, A. & W.** This firm, which was established in 1864, is one of the oldest and most prominent of its kind in the city, their business premises containing a handsome three-story brick building situated on Broad street, is supplied with all modern improvements necessary for carrying on their extensive business. The large and varied stock carried by them comprises everything in the line of gas and electric light fittings, heating and cooking stoves and ranges, cutlery, house furnishings, hardware, &c., ship and house plumbing, gasfitting and tin-smithing of all kinds is also done, and in this line their stock is unapproachable. Messrs. A. & W. Wilson are well known practical business men and are thoroughly conversant with their line of business.

**Winnett, J. W.** Is one of the latest acquisitions to the ranks of our financial men, being the local manager of the "Dominion Building and Loan Association," the business of which association is beginning to assume immense proportions and has taken a place in the front rank of moneyed institutions. The capital stock of the association is \$10,000,000, of which stock Mr. Winnett is to be congratulated in having been successful in placing a quarter of a million in this city, and the demand for shares increases and must continue to increase as the association becomes better known and which we believe has a very successful future before it, for it is evident that, as the country develops, the business of this association must go on with it. The association is fortunate in having in its local manager such an able and popular officer, who evidently has the interests of the association at heart and on whom much of its success depends.

**Wize, James Edward.** One of the first settlers in Vancouver, born in Niagara, county of Lincoln, Ont., 18th Oct., 1861, and came to this province in 1883. Mr. Wize is a well-known contractor and builder, having resided for a time both in Victoria and Vancouver, finally removing to New Westminster in 1890, where he embarked in a general enterprise as coal and

BIOGRAPHICAL SKETCHES.

1195

wood merchant, etc., and being a man of rare tact and good business qualifications, with a keen sense of the excellent prospects which the Royal City affords to a man of his stamp, he may rest assured of his ultimate success and prosperity in his praiseworthy business undertakings.

**Wood, William Alfred.** Was born in Oxford County, Ont., 18th June 1864, and came to B. C. in 1884. For three years he was in the employment of the Dominion Government, under Sir Joseph Trutch, holding various positions of trust and responsibility on the Oudemans section of the C.P.R. During the last four years he has been station agent for the E. & N. R. Co., at Duncan's, where, by his urbanity and obliging disposition, he has gained the good will and respect of the patrons of the road at that thriving place.

**Woods, Charles Edward.** This gentleman is one of British Columbia's earliest settlers. Born in Lepton, England, on the 13th of Sept., 1855, and came to this country in 1860, two years after the Fraser River gold excitement, at the time when New Westminster was just starting into existence. Mr. Woods by profession is a provincial land surveyor; he is also partner in the well known firm of Woods & Gamble, land surveyors, real estate, insurance and financial brokers. He early associated himself with the interests of the Royal City, and as a zealous and loyal citizen not one perhaps is to be more highly commended, or justly deserving of praise.

**Yates & Jay.** The above firm whose commodious offices are situated at 51 Langley street, was established here in January, 1885, and ranks among the leading legal firms of this city. They also have a branch office at Vancouver under the name and style of Yates, Jay & Russell. The individual members of the Victoria establishment are Mr. J. Stuart Yates, M. A., LL. B., Edinburgh University, and Mr. Geo. Jay, jr., their learning and ability give them both a prominent position in the ranks of the legal fraternity of which they may be justly proud.

**Young, H. & Co.** Prominent among the leading and most thoroughly reliable general dry goods establishments in Victoria, is that of H. Young and Co., well known as the "White House." This firm has been established 40 years and is situated at No. 47 Government street. They keep a full and complete stock of general merchandise, the dry goods line, such as silks, woollens, linens, hosiery millinery of all kinds, and mantles in endless variety. The management of the firm is in the hands of Mr. H. Young, who has had a thoroughly practical experience in the business, and is familiar with its every detail.

**Albion Iron Works Co. Limited, Victoria.** The above named company, which was established thirty years ago, and the business of which commenced by Mr. J. Spratt in 1861, enjoys the well merited honor of being the largest and most complete institution of its kind on the Pacific Coast. Among the original founders, officers and shareholders of the company may be mentioned the names of J. Spratt, J. Dunsinuir and R. P. Rittner, to whose enterprise, ability and industrial courage is to be credited the development of the present large works, which now cover three and a half acres, and are equipped with all the latest and most modern machinery for iron, steel and brass working, making it the most complete establishment for the manufacture of mining, milling and canning machinery, marine and land engines and boilers, heavy castings, etc., in the Great Northwest, having every

BIOGRAPHICAL SKETCHES.

facility for turning out a superior article of workmanship. Employment is given to 250 men in the various departments, and the pay averages about \$15,000 a month. The officers of the company are James Dunsmuir, president; R. P. Rithet, vice-president, and W. F. Bullen, secretary and manager.

**B. C. Land and Investment Agency, Limited.** This company, the business of which was first established by Mr. T. Allso, in 1863, is not only one of the oldest, but ranks among the most prominent financial agencies in this city. The managing directors of this substantial and influential concern, are T. Allso, H. S. Mason and C. A. Holland, the capital of which is \$200,000, while the reserve fund is \$25,000, and controls investments in the Province of over seven million dollars. The business of the agency consists in the purchase and sale of land; the investment of money on mortgages and the management of estates; it has also a savings bank department connected with it. In the insurance and investment departments of the business the agency represents the North British Mercantile Insurance Co., the Canadian Pacific Land and Mortgage Company, Limited, and several others.

**B. C. Soap Works.** This highly commendable institution, which, from a small beginning, was established here by the worthy and enterprising proprietor, Mr. W. J. Pendray, about 15 years ago, has now grown to be the largest and best institution of its kind in this district. The works are situated at No. 25 Humboldt street, and are equipped with all the best machinery requisite for the manufacture of soap of all grades, both for toilet and laundry use. Mr. Pendray has been justly and highly complimented, both by medal awards, and in large contracts in consequence of their superior quality and purity. Mr. J. W. Pendray is a public spirited citizen and enjoys the confidence and esteem of the trade of the whole community.

**Colonial Metropole.** Prominent among the hotels of Victoria of high reputation, and which is in every way deserving of patronage and generous support is the Colonial Metropole, situated at 31 and 33 Johnson Street. The enterprising proprietor of which is Mr. Thos. Tugwell, who is one of our oldest and most respected citizens, having come to the Province in 1858. Mr. Tugwell is an Englishman, and was born at Brighton, Sussex, England. For a time after his arrival in this country he was engaged in exploring the west coast of Vancouver Island, and from his reminiscences of his experience among the Indians during his exploring expeditions might be gathered many an interesting and thrilling tale. Subsequently for about 20 years he was successfully engaged in seed growing and stock-raising, until he sold out and went into the hotel business, in which he has also met with much success. The Colonial Metropole is a handsome solid three-story brick building with a frontage of 120 feet, containing 60 rooms all well ventilated and lighted throughout by electricity, and fitted with fire escapes, baths and every modern improvement. Mr. Tugwell is a true type of an honest, straightforward Englishman, and well deserves the success he has achieved.

**Diamond Palace.** The "Diamond Palace" as the establishment of which Mr. A. A. Clayton is sole proprietor is called, is situated at 47 Government Street, where is to be seen the largest, finest and most varied stock of jewelry, gold and silver watches, silverware, optical glasses, etc., in the city. This house has been in existence for the past four years, in which time it has taken a very prominent and conspicuous

position among the jewelry establishments in Victoria. Mr. Clayton makes a specialty of setting diamonds and other precious stones, of which he is a large importer, enameling, chasing, engraving and manufacturing all kinds of native jewelry to order. He also makes a special feature of souvenirs for tourists, and is the only one in the city who manufactures the real etched spoon, and parties desiring the genuine article will find it at Mr. Clayton's.

**Dominion Hotel.** (Established 1876). This well-known and popular hotel situated at 119, 121 and 123, Yates Street, stands prominent among the hotels of Victoria, and ranks in the list of the finest hotels on the Pacific Coast. It is a three story fire-proof brick building, containing 66 rooms, all of which are furnished in the most tasteful and comfortable manner, affording accommodation for 120 persons. The dining room is a large, airy, well lighted apartment and is admirably arranged in every particular. Particular attention is paid to the table, and the menu is always of the best and choicest description, the cuisine being in charge of the most accomplished cooks to be obtained, while the attendance cannot be surpassed. The proprietor Mr. S. Jones, jr., is an enterprising young man, obliging and courteous, who looks after the comfort of his guests, and in every respect deserves the liberal public patronage which is accorded him.

**Hull, Gospel & Co.** Of all the excellent financial and insurance companies, whether of long standing or of recent establishment, of which this city can boast, not one of them can it be said enjoys a larger share of public patronage and esteem than that of Messrs. Hull, Gospel & Co., whose elegant offices at No. 100 Government street, forms one of the principal attractions to the eye of a new arrival in Victoria. Messrs. Richard Hull and W. J. Gospel formed partnership in 1882, and have since continued to carry on a large and increasing business as fire, life and marine insurance agents, and handling Wellington coal. They likewise do a general conveyancing and real estate business. The firm are also interested in the seal fishery industry as owners and agents. In April 1891 Mr. Gospel retired from the business, the name of the firm remaining unchanged, leaving Mr. Hull sole representative and head of the firm, to which he as usual, devotes his time and energy, and continues to enjoy the popularity and good will of all with whom he has business transactions.

**Irving & Haywood.** The above well established and popular firm, situated at Williams Building, 28 1/2 Broad street, carry on a general real estate and insurance business. They also have agencies in the cities of Vancouver, B. C., Port Angeles, Wash., and in London, England. The individual members of the firm are, Mr. Robt. Irving and Mr. Wm. C. Haywood, both old residents of Victoria, men of strict business principles, commercial integrity, and are in every respect thoroughly identified with Victoria's interests and in all that tends to its advancement and prosperity.

**Janion Wharf Co.** This company which has been known for the last 30 years as the Janion Wharf, so called after the late Mr. Janion, the founder, do a large and important business as general merchants, warehousemen and wharfingers, making coal an adjunct to their business. The premises occupied by the company, situated at 28 Store street, are large and commodious, consisting of a solid stone building of three storeys high, affording room for 2,000 tons of freight, with their large and commodious wharf, and other ware-

houses at the rear, thus providing every facility for steamers and sailing vessels, and also for the storage of goods. The company is composed of John Turner and Charles Rattray, the latter being the chief manager of the company, to which he devotes his time and attention with much credit to himself and satisfaction to all with whom he has business transactions.

**National Electric Tramway and Lighting Co., Limited.**

Of all the successful commercial and industrial enterprises which have helped to make the city of Victoria what it is to-day, not one of them, can it be said, is likely to be more conducive towards its growth and development as a great metropolis and important commercial centre, than the facilities for rapid travelling which are at present afforded by the N. E. T. & L. Co. This company, which has a capital stock of \$250,000, was organized in February, 1889, and has at present in operation a track of 9½ miles, extending a distance of 1.08 miles north as far as the fountain on Douglas street, 1.24 miles south, over James Bay to the outer wharf, 2½ miles from Rock Bay to Jubilee Hospital, and 3½ miles west to the naval dockyard at Esquimalt. Further large extensions are contemplated, which are daily being felt necessary, owing to the rapid growth and development of the city. The cars running on the company's lines are of the latest and best designs, and in superiority of finish and for elegance and comfort they cannot be surpassed. The system of electric lighting adopted by the company is that of Thomson-Houston, of which system they have at present 2,000 lights in operation, and by which not only their cars and own premises, but also a great number of business houses and private residences in the city are lighted. The controlling officers of the company are the Hon. D. W. Higgins, president; Dr. T. J. Jones, vice-president, and Major C. T. Dupont, secretary, who are to be congratulated for having brought the company to its present high state of efficiency, and in having made the tramway in every respect a substantial success.

**Queen's Market.** This well known popular institution was established in 1885 by the late Thomas Harris, ex Mayor, the present proprietor being Mr. Lawrence Goodacre, and is unquestionably one of the largest and most successful wholesale and retail markets in the Province of B. C. The business gives constant employment to 16 hands. The number of cattle killed per month is 150, sheep 800, lambs 200, and 100 calves and pigs. The market, which is situated at the corner of Johnson and Government streets, is one of the most conspicuous establishments in Victoria. The worthy and highly respected proprietor of this enterprise is not only contractor by appointment to Her Majesty's Royal Navy, the Dom. Gov. and military, but also to the R. J. Hospital and many other institutions. Mr. Goodacre is too well and favorably known for all that is good and meritorious, to need any special mention at our hands.

**Rock Bay Sawmill.** Standing foremost among the many manufacturing and prosperous industries for which the city of Victoria is justly noted, we would mention that of the well developed lumber firm of Mr. W. P. Sayward, the enterprising proprietor of the Rock Bay Sawmill. This mill is one of the oldest and most complete in the city, having been established in 1858, and gives constant employment to a large number of men. The mill, which is equipped with the latest and most approved machinery, has a capacity of 45,000 feet of lumber per day of 10 hours, and from which lumber of all kinds is turned out. Mr. Sayward is also a large importer of all kinds of doors, windows and dressed lumber, and has every accommodation for the promotion and furtherance of his business. Mr. Sayward possesses unusual advan-

tages for delivering lumber and building supplies at the shortest notice and least possible cost. He is a man of much tact and business ability, and great credit is due to him for the manner in which he has worked to bring his business plant to its present state of perfection and magnitude.

**Sheffield Cutlery Store, 78 Gov't. St.** This business which is the oldest and leading house of its kind in Victoria, was established by M. & H. A. Fox, some years ago, and is noted for its excellent and complete stock of "Sheffield Cutlery." They also make a specialty of shaving materials, fishing tackle, pipes and smokers requisites, etc. The trade of this enterprising and popular concern has been built up by honorable and straightforward dealing, and M. and H. A. Fox are to be congratulated in possessing the confidence of a large number of patrons, and of all with whom they have had any business transactions.

**Vancouver Island Land and Investment Co., Limited.** This company, which is one of the largest of its kind in Victoria, are successors to the late firm of Boncher, Croft & Mallette, real estate and financial brokers, 72 Government street. The company deal largely in real estate, timber lands and mining properties, and has upon its books some of the most desirable property to be had in the province, and also in State of Washington, U.S.A. They act as financial agents in the negotiation of loans and mortgages, and undertake the management of estates, the investment of funds and the collecting and remitting of rents, etc., and also undertake the purchase and sale of real estate in Victoria and other parts of the province. The company possess one of the largest and finest collections of local and foreign mineral specimens to be seen in British Columbia, which is largely used by prospecting investors, and the inspection of which well repays the trouble of a visit to the company's elegantly equipped office on Government street. In the insurance department of the business the company represent the North American Life Ins. Co. The officers of the company are H. Croft, M. P. P., president; John B. McKilligan, secretary, with whom any business that is placed receives their prompt attention and the most careful supervision is given to all negotiations and transactions of landed interest.

**Victoria Roller, Flour and Rice Mills.** The above named mills, situated at 64 and 66 Store street, were established here in 1885, and are a branch of the well-known Mount Royal Milling and Manufacturing Co., Ltd., Montreal, of which Messrs. Hall, Ross & Co., are agents. The mill has a capacity of 200 barrels per day. The various brands of flour, known as the "baker's extra," and the "Delta" brand family flours, are acknowledged as having no superiors and are fast gaining a wide reputation. Bran, shorts, all kinds of grain and brewers' malt are also gristed. They also mill rice meal for cattle, chit rice for pulp, rice flour, brewers' rice, China and Japan rice, &c. For some years this mill has made a specialty of its rice products and has a well-earned reputation for the quality produced. The machinery with which the mill is furnished is of the latest and most improved design, every improvement that ingenuity could suggest having been brought into use, thereby making the mill not only one of the most perfect and costly, but the most complete in the use of modern ideas and invention.

**Victoria Transfer Co., Ltd.** This Company was organized and commenced business in this city about eight years ago, and Victoria may be considered fortunate in possessing one of the largest and best conducted Companies of the kind in the Province of B. C. The services of 35 men are required to conduct the large business of the Company, where can be obtained

some of the most elegant and complete turnouts. Their backs especially are recommended to visitors, not only for their elegance and comfort, but more on account of the experienced and civil drivers and their moderate charges, to say nothing of the various conveyances of all kinds used in the service of the Company. They have agents on all the steamers entering the city, and baggage as well as passengers are conveyed to all parts of the city at very moderate rates. They are also dealers in hay and grain, and buy and sell horses and carriages. The officers of the Company are F. S. Barnard, M.P.P., pres., Alex. Mount, secy., and A. Henderson, supt., all of whom are business men of unsurpassed ability, and well known and popular citizens.

## INDELIBLE PHOTOS. ON SILK

Handkerchiefs, Book Marks, etc., will not wash out, fade nor break. Something nice for Birthday Gifts.

The finest Views in British Columbia and the CHEAPEST. An enormous stock to choose from, comprising everything of interest, including Views of Alaska, the Canadian Pacific Railway, Esquimalt, British War Ships, etc., mounted and unmounted.

If you want a photograph of anything, a ship, boat, House, or family groups, a postal card will call our View Artist to any part of the Province, thereby insuring you a better picture than you could get from your local photographer, who may not have the experience or facilities.

OUR Portraits are second to none in every respect, the finishing department has lately been placed in charge of a gentleman of large experience in the best studios in the east. We make a specialty of life size heads or groups. Our large work is something beyond comparison in this Province, as it is not enlarged but made direct from the subject with a large camera.

We are pleased to have people call and see samples.

Victoria, British Columbia, 1901.

W. C. WARD, Manager.

# St. Louis College,

NEW WESTMINSTER, B. C.

St. Louis College is conducted by the R. R. Fathers Oblates of Mary Immaculate, and is under the patronage of the Right Rev. Bishop Paul Durieu, O.M.I., Vicar Apostolic of British Columbia

The general purpose of the College is to impart a Commercial as well as a Liberal Education to the young men received in the Institution. Hence the various branches of a Commercial course are taught thoroughly; while great attention is paid to the study of classics, ancient and modern.

TERMS—Boarders—Board and Tuition, per session of five months, \$75.00; washing and mending, \$10.00; bed and bedding, \$3.00.

Day Scholars—Senior Students, \$3.00 per month; Junior Students, \$2.00 per month.
