WHOLE NO. 398.

LITERATURE.

A Pane of Blue Glass.

(From Harper's Bazar.)

Gordon Gray, junior partner in the firm of Gray, Greene & Gray, owners and managers of the great Pontoosoc Mills, was on his way home to the office one bright April afternoon, when by some dim process which could hardly be called observation, he became aware that a change had taken place in an old house which for years he had passed twice a day without ever particularly noticing.

The blue-glass theory was still in its cradle at that time. No hint of it had crept into the newspapers, and the azure pane in the old sash was puzzling enough to make Gordon pause and stare. He was not sure that something he could not make out—a shimmering, glinting something, which swayed a little, like a shining flower bending from its stalk.

Her cheeks flushed a little as their eyes met, and she inquired, in a sweet, surprised voice, "Did you want anything, sir?"

Gordon Gray, in his own opinion at least, was a man of the world, but he felt himself torn asunder as he stared at the pane. "Excuse me, I—I had no intention of being so impertinent. It was the oddness of the blue glass. I could not see that anyone was inside. Pray excuse me," his brown eyes seconding the appeal with better eloquence than his confused speech was capable of.

"Thank you." Then the sash was pulled down, gently but decidedly, and Gordon resumed his walk.

"Confounded!" was his mental comment, addressed to himself. "She must have thought me a regular 'Peeping Tom.' What a petty little thing she is! How did it happen that I never heard of her before? Such blue eyes are not seen every day. Let me see. Who does own that house? I wonder I never thought to inquire."

But query brought little satisfaction. Mr. Lang lived in the house—always had lived there. Did anybody know him? Bless you, no. He was a queer old chap, full of theories, always making experiments, and coming to grief in them. "Blew his roof of one with fulminating powder, and all but burned down, summer before last, testing a new system of lightning rods. Never went out anywhere except to the postoffice, and never asked anyone inside his door. Had a family? No. He lived all alone with an old servant, or—stay! did somebody say that a niece or a cousin came to live with him in the autumn? Probably a mistake, or if not, the must be some cracked creature, like himself, who never showed outdoors. Had Mr. Gray noticed the blue pane in the end window? Droll, wasn't it? and just like old Lang.

which he prized himself, was still young and modest, and it took more than a month of these passages and repassings before he gained courage for the bolder step of laying a rose on the sill of the closed window. There it lay in the morning, dewy and fresh, as he went by. Returning at night, he glanced across the street, and felt a heart-beat. The rose was gone, and in its stead a shadow within vibrated a little more distinctly! Gordon dared to hope so.

Another morning, and another—more roses. On the fourth day, grown bolder, Gordon ventured on a fourth—a bouquet of all violets, save for one great Maréchal Nail in the centre. On the fifth day he took a desperate step, and, armed with another bunch of violets, crossed the street and tapped ever so gently on the blue glass pane.

"I beg pardon for interrupting your seance," said Gordon, gravely. "But I have ventured to bring you a few blue flowers; I believe they are recommended for use with the blue glass."

"You are very thoughtful." "The experiment interests me," went on Gordon, audaciously. "It is such a new idea, and there may be a great truth involved in it. I am anxious to know how it works. Do you feel benefited thus far?"

"I—don't—know," the dimples dying out, and sad little lines forming about the mouth. "It does not seem as if it could do any good. If my uncle—?" here she paused.

"What was your uncle going to say?" asked Gordon, eagerly. "I ought not, perhaps. It was only, if my uncle would let me go out and walk a little, I think it would do me more good than blue glass."

"Do you never walk, then, or go out? But why do I ask? Of course I should have met you." "Oh, no, I never do except in the garden. My uncle says life is too short for idle recreation, and purposes of health can be pursued at home."

"I never heard of anything so preposterous!" he exclaimed; "tons of blue glass could never make up for the lack of air and cheerful companionship that you never allowed to accept any invitations? Do you never go to parties?"

"Yes," answered Gordon, "scientific, as applied to hygiene. I learn that you are testing an experiment which I have been conducting for some study with me—that of the beneficial effects of the sun's rays filtered through glass of a dark-blue tint on the frame of the human animal. The theory is so recent that opportunities for a critical observation upon it are rare, and I have ventured to intrude upon a leisure which I know is valuable—a bow here and another from Mr. Lang—"

"a leisure which, without some valid reason, it would be unpardonable to interrupt,"—another bow—to ask that you will communicate to me some minutes as the time given to the experiment has permitted you to form. Do you find the result of the blue glass what it is claimed to be?"

"Take a seat, sir," said Mr. Lang, waving his hand, with a gratified look. "The interest upon my time is of less consequence to me; it will be a gratification to discuss the theory in question with an inquirer, like-minded with myself. It is rare in this village to find any sympathy in scientific matters—I am happy to say that the result of my trial of blue glass confirms the statements as to its value. The subject—a young person in my own family—has made rather marked improvement during the thirteen weeks of experiment. She has gained to an appreciable degree in flesh and color, and—"

"Not at all. An ordinary window answers the purpose perfectly. It is an affair of half an hour to make the change."

"Ordinary putty," said Gordon, anxiously. "Certainly! the putty of every day," waving a hand dismissively. "You can see the pane in question, if you choose; but there is nothing to distinguish it except the color."

"I should like to examine it," said Gordon. "So it came to pass that Bertha, sitting daintily in her usual place, with her wondrous veil of shining hair falling about her, was transfixed by the apparition of her lover, led into the room by her uncle, who manifested to this new acquaintance a warmth which she had never seen in him before."

"This is the pane," he said; "and the color is dark, as you see; an oblong, two ten by one eight, set in the ordinary way, and in an ordinary frame, not interfering with the use of the window. The sash opens and shuts as usual, and is as bright and formed for I'll be even with the old dragon, yet," he muttered; and he made ready his armor and sharpened an imaginary lance with all the zeal of Perseus preparing for the rescue of Andromeda.

"Weeks went on. The blue pane opened regularly now at the sound of a particular pair of boot heels on the pavements. Sweet words and looks came out, roses went in; what besides roses we will not too particularly say. Day by day fresher bloom tinted Bertha's cheeks, and notice this unseemly levity. He was buying himself with the blue pane. Gordon preserved an air of profound scientific interest. Presently he took his leave, with permission to return for further light on the theory."

County Accounts.

Account of Monies Expended in the County of Westmorland, from Dec. 5th, 1876, till June 30th, 1877.

Chignecto Post.

Sackville, N. B., March 7, 1878.

THE LOCAL LEGISLATIVE REPORTS are dull reading. The proceedings from day to day are scarcely worth printing. The Government furnished a very lame excuse for not carrying out Mr. Rogers' resolution of last year to obtain an authoritative decision from the Supreme Court of Canada on the conflicting jurisdiction in regard to the liquor suppression.

The following is the Receiver General's Account current for 1877: Balance on hand 8128,876 71 Don't Subsidies, \$476,352 63 Casual and Territorial Revenue, 102,838 63 Fees in Supreme Court, 1,200 00 Fee Provincial Secretary's office, 6,081 50 Lunatic Asylum, 860 00 Miscellaneous, 9,168 32 School Loans, 1876 2,354 74 1877 16,264 13 618,113 45

By amt of warrant issued 8650,232 37 Balance 31st Oct. 1877, 76,767 00 8736,990 16

The balance is therefore \$29,019.11 less than last year.

Peace Signed.

CONSTANTINOPLE, March 3.—The treaty of peace has been signed. The Grand Duke Nicholas announced the fact to the soldiers at a review at San Stefano today. Russia has abandoned her claim on the Egyptian and Bulgarian tributes. The principal conditions of the preliminary treaty just signed, are: The position of Batoum, Kars, Ardahan, and the district of Bayazid. The question of navigation of the Danube remains in statu quo. Azor will be left between Montenegro and Servia, so as to enable the latter to maintain communication with Bosnia and Herzegovina. It is confirmed that Bulgaria will include Bourgas, Varna, Rustendie, but not Salonica or Adrianople. Russia is to have power to cede Dobruhska to Roumania in exchange for Roumania-Hersarabia.

Notes from the Public Accounts.

In 1873 it cost \$568,000 to collect \$13,053,000 of Customs revenue. Now they are 269 and the cost is \$104,000, though Reformers are opposed to superannations. In 1872-73, 37,000 immigrants were secured in Europe at a cost of \$287,900; but by the vigorous enforcement of the Reform principle of economy 7,700 were obtained last year at an outlay of \$354,000. In 1873 it cost \$30 to collect \$100 of Excise revenue, but now it costs \$4.25. And yet the Tories were spend-thrifts.

In 1873 the Ontario departments were so crowded with Tory clerks and messengers that it was no uncommon thing for Mr. Mackenzie to see them falling over one another in mixed heaps in the passages. Civil Government cost \$750,000. He has reformed all that end now it costs only \$312,000.

In 1873 3 Pensions cost the country \$49,000. But those were the days of the corruptionists, for the list has been reduced to \$112,000. There is no denying the fact that it takes Reformers to apply the knife.

WEST INDIA TRADE.—A discussion took place in Parliament last week, respecting trade and postal matters with the West Indies. Mr. Forbes said the trade had fallen off from \$7,000,000 in 71 to \$5,000,000 to 76-77. Mr. Palmer thought the Government ought to subsidize a line of steamers in order to have a direct communication. Mr. Donville attributed the falling off in the trade to the alteration in the sugar duties. All the sugar that used to come direct from the West Indies now comes from Liverpool and Glasgow; and vessels that were sent to the West Indies with freight had no return cargoes. He believed the sugar trade duties ought to be altered to encourage direct trade.

QUEBEC POLITICS.—Lieut. Governor Letellier de St. Just has dismissed the Quebec Ministry, and called M. Joly, leader of the Opposition, to his counsels. That gentleman having undertaken the task of forming a new Government he will immediately appeal to the people. M. St. Just's action is regarded as high-handed, the Boucherville Government having had a good majority on every division throughout the session.

THE Election of White (Opposition) for Shelburne, looks as if Hon. Thomas Coffin, M. P., will not be called upon to sacrifice himself much longer on the altar of his country. Mr. Coffin, a Cabinet Minister was the medium of communication through whom Hon. Robt. Robinson of the local Government, tried to bribe White with the Commissioner-ship of Mines and Works to leave the Opposition.

WHEN Mr. Mackenzie called to see Mr. Langevin in the Public Works Department one day in 1873, he said he found a "multitude of messengers and clerks waiting outside to do the behests of the little man inside." The salaries of the Department were then \$46,500. The "little man" now inside has \$55,100 worth of retinue.

The Local Legislature.

FEB. 28.—Mr. SWIN moved the address in reply to Mr. Macdonald's speech. He dwelt at some length on the Eastern Extension claims, presenting the whole case.

Mr. COVERT leader of the opposition criticized the Government sharply for neglecting Mr. Rogers' resolution and alleged the leader of the Government had always opposed measures brought before the Legislature for restricting the traffic, and it was only because public sentiment would no longer tolerate such a course that the Government had consented to consider anything that might be presented. He was glad to be in accord with the Government in reference to the question of Maritime Union. It was a matter that would keep very well.

The Government appeared to have backed down on its railway policy, and although Mr. Swin's speech was not on railway account, the speech did not refer to that important subject. The gentlemen in charge of the Government departments, all but the Secretary, seemed to be hardly in Frederickton, excepting at the meetings of the Government, and this seemed to indicate that their offices were insecure or that they considered them so.

The Attorney General said with reference to Mr. Rogers' resolution for a test liquor case that Mr. Blake, Minister of Justice, advised that it was inexpedient to have the matter brought up in that way, as a real case could be carried up on appeal from the Provincial courts. This Government had intended after last session to carry up a real case but, for the reasons stated in the speech, they did not. The Ontario case was decided in January, on the narrowest possible terms, and therefore, did not settle the question as it was expected to do.

When the Government saw the settlement of the question was involved in the bill proposed in the Dominion Parliament, they felt that it would not be wise to take further action in the matter just now, but to await the action of the Dominion Parliament.

He argued that it was a proper way to proceed to ask the Dominion Parliament to change the law respecting printing and presses, inasmuch as the administration of the law is in the hands of the Province.

Mr. DAVIDSON suggested another alteration in the reply. The House was required to affirm the desirability of enlarged school-boards in towns, pending the consideration of the bill.

The Attorney General said the change would be made.

Mr. PICKARD said he wanted another change in the Address also. He agreed heartily in the doctrine of non interference by this Legislature or Government in the Dominion Parly politics, and therefore he would like to see "world" instead of "Dominion," for he did not think the hard time were confined to the Dominion alone.

Mr. WELLS criticized the Government for ignoring the express directions of the House to test the jurisdiction of the Legislature respecting the liquor law. He protested against the paragraph compelling prisoners to give evidence. It entrenched upon the Dominion Legislature, and took away a protection that the law throws around the prisoner.

Mr. BURNS considered the paragraph relating to criminal charges as well as to their not complying with the resolution of the House respecting the Liqueur law, showed that the Government were carrying their measures in a high-handed manner. He believed that lack of the necessary influence and ability lay at the bottom of the Government's failure to secure justice for the Province in the matter of the Eastern Extension and the Immigration claims.

MARCH 1.—The Attorney General introduced a bill to incorporate St. John Law Society.

Mr. BURNS gave notice of an address for a full and detailed statement of the liabilities of the Province, and every department of the Government up to the 26th Feb. last.

Mr. SMITH introduced a bill to amend the landlord and tenant act.

The Appeal on the liquor jurisdiction question could not have been made till June, 1877, and then they expected the Ontario Appeal would be on. They as well as the Dominion Government had been misled with reference to the rate the Dominion Government contended that the I. C. R. had cost. It had however transpired that portions of the I. C. R. had cost from 25 to 30 per cent. more than had been represented, and the matter was again opened that this Province might receive its full cost, viz. \$150,000 more. This claim had not been previously pressed because it might have prejudiced the \$300,000 Western Extension claim was allowed to rest, because other Provinces had similar claims, which if pressed would not make the Province any better off.

Mr. JOHNSON was pleased at the steps taken by the Government in agricultural affairs and advocated the publication of the Report in French.

Mr. O'LEARY congratulated the Province on its finances, and hoped the Government would proceed with the public works to which they were committed. The Address passed.

MARCH 2.—Mr. HAYES gave notice for Maritime Union papers, and Mr. COVERT for St. Martins and Uplam Railway papers.

MARCH 3.—Mr. PHILIPS introduced a Bill to limit the jurisdiction of County Courts in action on contracts.

In reply to Smith's enquiry of this morning, the Attorney General said that a Bill introduced by Mr. Smith in 1875 repealing certain Articles of the County Courts, was passed. These fees, however, were cancelled by an Act of 1868. In the process of consolidating the statutes the fees provisions of the Bill of 1868, which Mr. SMITH's Act repealed, were eliminated, hence

it was not necessary to place that Act in the consolidation. The Chief Commissioner laid the Public Works Report on the table. Hon. Mr. McQUEEN laid the report on agriculture on the table.

Mr. SMITH introduced a Bill to restrict the fees of attorneys and auctioneers brought in the County Courts in certain cases.

Dominion Parliament.

From our own Correspondent.

OTTAWA, MAR. 4.

THE "UMBLE" GOVERNMENT.

The Government continues to suffer the slings and arrows of outrageous opponents with a meekness that is a marvel to those who used to see the manner in which they rode rough-shod over the Opposition three or four years ago. Mackenzie takes his punishment with a grim endurance that does him credit; Huntington is so much afraid of his copper transactions being discussed that he very seldom says anything; Mills has not yet recovered from the effects of the change of having been a contractor with the Government, which is hanging over him; Smith says nothing because it requires less exertion to keep still than it does to talk; and Laflamme does not seem to take a lively interest in the proceedings, being employed apparently in getting his mind into a judicial attitude with a view of having a judgeship thrust upon him soon. Mackenzie drops his meek demeanor once in a while, and fires up into something like a fighting spirit. But he soon recollects himself, stutters and plays a pendulum, shakes his head and threatens to strike back very severely if the whipping is not stopped shortly.

Those who have been here from New Brunswick since the Ontario party got into power notice this change of tone more readily than others. "Why," said Mr. Palmer, "they wanted to sit down on us when we came here first. We had to fight like the Russians in Turkey for a hearing. They thought they should have everything their own way, and we thought otherwise. They are respectful enough now because they dare not be otherwise." The Premier's unprecedented humility is illustrated by his statement, after enduring two or three assaults on his wild blunder in locating the Pacific Railway, that he was open to receive further information on the character of the country, and would change the route if a change should appear desirable. Think of the Alexander of previous Parliamentary campaigns and try to fancy his present peaceful attitude!

THE BUDGET DEBATE.

The debate on the budget, preliminary to going into supply, was resumed Tuesday and taken up again on Friday, in both of which engagements the Government received some troublesome bruises. Dalton McCarthy, the brilliant young Q. C., who succeeded to John Hilyard Cameron's seat for Cardwell, made a vigorous assault on Tuesday, and carried the war into Africa with a vim that drew blood. He reviewed the charges they had made against the Opposition leaders in his previous speeches, denounced them as slanders, and repeated the charges which he had made against the Government, saying that he was prepared to stand by them in the House or anywhere else. In making an allusion to Coffin, who has looked more than usually grave since the funeral news from Shelburne, McCarthy said he had entirely forgotten that gentleman until his attention was accidentally attracted to him. He charged McCarthy with deserting his party for place, and when the smiling Finance Minister contradicted him, he thundered forth, "Yes, Mr. Speaker, he did desert his party when his longing to be Finance Minister was not gratified, and balanced on the independence pole, and he fell into the arms of gentlemen opposite, his reward being the prize he had been juggling for." Cartwright tried desperately to keep his smile from leaving his lips, but it crept behind his ears and kept itself concealed for a considerable time, while the Finance Minister hurled his hot over his eyes and gnawed at his finger nails as though he felt like biting something. Patterson's reply to McCarthy was a very amusing deliverance. He played with statistics as a school boy plays with balls, throwing them up and catching them on the first bound, and tossing them from hand to hand with a facility that would make a juggler envious. He said he would not juggle honorable gentlemen with more "figgers" than they could get in their hands, but would "set them little snms" which they could do without slats or pencils, and then he proceeded to "set little snms" and "do" them also, much to his own satisfaction and the amusement of his hearers. On Friday, when the debate was again the order of the day, Mr. Wallace (not the Albert's Wallace) made a very fair Opposition speech without making any particular point worth mentioning. Mr. Oliver, who replied on behalf of the Government, brought the House down with a rebuke to Mr. Mills, the poet of the House, who being in an irrepressible attitudinizing mood, kept up a constant fusillade of interruptions. "Some things must be wrong with the hon. gentleman from Niagara," said he, pointing towards the poet's chair, "some gentleman might excuse the poet's language, but the hon. gentleman from Niagara has a decided title in the well filled ladies' gallery, and Plumb experienced an eloquent flash of silence. He revenged himself on the House for this, however, by raising at eleven o'clock, and making a set speech. Plumb was not a bad fellow, but he talks too

much and puts on too many boyish airs for an old fellow. Macdonald, of Toronto, one of the largest importers in the country, made a prosy free trade speech, and the debate adjourned until to-morrow.

THE PACIFIC RAILWAY.

A long discussion occurred on a motion for Pacific Railway location surveys and reports, during which a great deal of damaging evidence in regard to the character of the country through which, against the direct remonstrances of the people living in Manitoba, the road had been located. Member after member took up the argument, and one or two who rose to reply damaged the Government more by their omissions than they helped with their praise.

THE CANAL CONTRACTS.

On a motion for papers relating to Welland Canal contract, a discussion arose which has not been finished yet, concerning the Government's system of letting contracts in general, and the Welland Canal and Goderich harbor contracts in particular. The member charged shoddy favoritism in many cases, thousands of dollars being lost to the treasury for the purpose of enriching many political parasites. The Premier's defense was that he gave the contracts in all cases in accordance with the advice of his engineers. When they did not take the lowest tender he did not take it. This rule had never been departed from. But there was no favoritism, of course! Not as though the engineers were not prompted direct or otherwise by Ministers and acted accordingly, and the Government have ways and means of letting their officials know their wishes, and engineers know which side their bread is buttered on.

THE PREMIER'S RESPONSIBILITY.

The defence is decidedly too translucent. This plea is noteworthy also, especially when taken in connection with other utterances in the same strain, which the Premier has been delivered of lately, for its attempt to shirk all responsibility, considering that this is a One-man Government and that Mr. Mackenzie is its body, soul and brains. He began by being, or pretending to be, drier regarding every detail of the public service, and now he merely tries to shirk responsibility by the plea, "My engineers told me to do it."

Mr. Mitchell's enquiry for details of expenses of Lord Dufferin's journey raised something of a row. Many of the Opposition deprecated it, and the Premier called on his friends to note it down. Finally Mr. Holtin, the member of the Government without a seat in the cabinet, moved in amendment that a return, similar to that in the public accounts, for the British Columbia trip, be made to the other members of the cabinet, and Mr. Mitchell, yielding to the pressure of sworn members of the Opposition, who disliked dividing the House on a question of this kind, did not press his motion further. Many of those on the Ministerial benches, their Marquis supporters in particular, would have voted for Mr. Mitchell, the refusal of the said information being simply scandalous. Few Maritime members would care face their constituents after having engaged in a conspiracy to keep information from the public concerning the manner in which the public money has been spent. The expenditure of \$100,000 in the present regime, and none but a toad-eating Government of the most scurrilous kind would have permitted such lavish outlays on the Maritime.

The Government General should pay his own travelling expenses, just like other people. If he had gone West on his own account, instead of at the public expense, there would have been no item of between \$4,000 and \$5,000 for Brydges, on account of railways, with an expenditure of under half of unforeseen expenses, a statement of which has just been given on call of the House, of about \$2,500 more to Mr. Brydges for Pullman car. People travel in that fashion only when others pay the bills. Such a mode of expenditure is disgraceful. If they will make me disagreeable. If they will make me disagreeable. If they will make me disagreeable.

THE GRAND BALL.

The grand ball at Rideau Hall last week was the event of the season. There was a great crowd present, including many people who never go to ordinary balls, and the show was a fine one. There was rather too much of a jam in the ball room for dancing, everybody couldn't get at the first table, and the Earl and Countess of Dufferin didn't dance with anybody who wanted to dance with them. Apart from these little discomforts all went away very well pleased. There were a great many fellows in showy uniforms and fancy liveries. The rooms were brilliantly lighted, every point capable of bearing an argument had one, and Chinese lanterns of many hues shed a dim religious light over spoony wanderers to the conservatory, where soft eyes looked love to eyes which sparkle again, and music's voluptuous swell inspired the gay dancers and formed the basis of conversation. Unphilosophical youths from the country like me thought it a big big thing that it was an old story to those who live under the shadow of the White House.

An Inspection is respectfully solicited.

Sale to Commence this Day.

A. B. SHERATON,

Market Hall, GERMANTOWN STREET, - - - ST. JOHN, N. B. feb7

Local and other Matters.

The Agricultural Report has been received from Hon. A. McQueen.

"Eloquence and Orators" is the subject of Rev. Mr. Currie's lecture to-night at Lingley Hall.

COUNTY ACCOUNTS.—A detailed statement of the auditor's report on outside pages.

BURNED COAL. Fifty cents cheaper per chaldron than formerly, can be ordered at this office.—41

STEPHEN GODFREY, Esq., and old and respected inhabitant of Bay Verte, died on Thursday afternoon, aged 59 years.

MR. MATTHEW LOGAN, a respected inhabitant of Cumberland, died on Sunday at the venerable age of 95 years.

RELIGIOUS.—Preaching on Sabbath next at Westcott Hill, at 11 a. m. Grand Ance, 2 1/2 p. m.; Rockport, 5 1/2 p. m.; Fairfield, 2 1/2 p. m.; Westcott, 5 1/2 p. m.

TEMPERANCE AT PORT ELOIN.—On Friday evening, Rev. Mr. Gammon addressed a full house, and at the close obtained some 51 signatures to Dutcher's Reform pledge.

COUNTERFEITING AT PICOU.—Jas. Chisholm was arrested on 5th, for passing one and two dollar counterfeit (photograph) notes of the Union Bank of P. E. I.

THEFT AT SHEDDAC.—Mr. E. T. Smith's store was the scene, on 26th ult., of a most audacious theft, from the fact that it was committed in the middle of the day. The thief of thieves got \$15 in bank notes. Mr. Smith had two persons arrested, but as no proof of their being the thieves was obtained they were discharged.—Monteur Acadien.

COUNTERFEITING.—A ten dollar bill of Bank of N. B. A. was taken in Messrs. Wood's Banking Office a few days ago and has been detected as counterfeit. It purported to be an issue of the Moncton Agency, but "Moncton," which is stamped on the face in blue ink in the genuine bills, in this one is black. It is probably a photograph.

DEADLY ACCIDENT.—On Sunday last, at Memramook, as the people were just leaving the chapel, after mass, Mr. F. McQueen drove against Mrs. Belong Gaudet, striking her in the face with the shaft of his sleigh, making a deep wound in her upper lip two inches in length, breaking a part of her jaw and several teeth, and shockingly bruising the inside of her mouth, and breaking one of her shoulders. It was believed that she would live but a few hours. Dr. F. Gaudet, her son, was in immediate attendance, and under his skillful treatment she is doing as well as could be expected.

REFORM AT BAY VERTE.—On last Saturday night Rev. Mr. Gammon of Moncton, delivered a stirring address on Temperance at the Hall, James Williams, Esq., presiding. Spirited speeches were also delivered by Messrs. W. H. Faulkner, T. E. Wood and R. Wilson. The house was crowded and a good deal of enthusiasm was manifested. A Reform Club was organized at the close, with a membership of eighty. The next meeting takes place on Friday night. The following are the officers of the Club: W. W. Wood, President; T. Wood, Amos Gooden, Vice; W. H. Faulkner, Treasurer; D. Cassey, Financial Secretary; W. Wilson, Secretary; M. C. Atkinson, Asst. do.; Revs. S. J. Allan and Rev. Mr. Stebbings and A. Gooden, Chaplains; Committee, Mrs. G. L. Allen, Miss A. Cassey, Miss Ellice Fillmore, Mrs. W. W. Wood, Miss Annie and Missie Farnsworth, W. Elliot, Oliver Wood, W. Turner, J. H. Chappell, J. Somers and W. H. Faulkner.

Matters in Cumberland.

Amherst is recovering from the scorching it received in October. One of the most

CREDITABLE ENTERPRISES in the country is the new wooden-ware factory of Messrs. Rhodes & Curry, erected immediately beside the Railway Station. Its location beside the I. C. R. so that lumber can be thrown from the cars off into their yard, and enabling trolleys from I. C. R., to be discharged in their building, gives them every facility for transportation, without

expense and best machinery in the 72x35 and three stories in height, exclusive of a lean-to of 40x10 and an engine house. The latter is bricked up and every care is taken in the planning of it to render the fire risk as slight as possible. The engine is a 45 horse one. The large boiler will afford steam for the drying room and feed steam pipes to heat the building. The drying room has capacity for 25 M of lumber. Messrs. Holmes & Curry have gone to a large expense in procuring the latest improved machinery in the market, being determined to be provided with facilities for doing all kinds of house-builders work in first class manner, at labor saving prices. On first flat is (1) a planer and matcher, (2) a cutting off saw, (3) a saw planer, for doing fine work for doors, windows, &c., (4) sand paper machine driven by steam, (10) a mortising and boring machine, (11) a circular saw for working on a level at any angle, up to 7 ft. in diameter, and columns 18 ft. long, (8) a buzz saw planer, for doing fine work for doors, windows, &c., (9) sand paper machine driven by steam, (10) a mortising and boring machine, (11) a circular saw for working on a level at any angle, up to 7 ft. in diameter, and columns 18 ft. long, (8) a buzz saw planer, for doing fine work for doors, windows, &c., (9) sand paper machine driven by steam, (10) a mortising and boring machine, (11) a circular saw for working on a level at any angle, up to 7 ft. in diameter, and columns 18 ft. long, (8) a buzz saw planer, for doing fine work for doors, windows, &c., (9) sand paper machine driven by steam, (10) a mortising and boring machine, (11) a circular saw for working on a level at any angle, up to 7 ft. in diameter, and columns 18 ft. long, (8) a buzz saw planer, for doing fine work for doors, windows, &c., (9) sand paper machine driven by steam, (10) a mortising and boring machine, (11) a circular saw for working on a level at any angle, up to 7 ft. in diameter, and columns 18 ft. long, (8) a buzz saw planer, for doing fine work for doors, windows, &c., (9) sand paper machine driven by steam, (10) a mortising and boring machine, (11) a circular saw for working on a level at any angle, up to 7 ft. in diameter, and columns 18 ft. long, (8) a buzz saw planer, for doing fine work for doors, windows, &c., (9) sand paper machine driven by steam, (10) a mortising and boring machine, (11) a circular saw for working on a level at any angle, up to 7 ft. in diameter, and columns 18 ft. long, (8) a buzz saw planer, for doing fine work for doors, windows, &c., (9) sand paper machine driven by steam, (10) a mortising and boring machine, (11) a circular saw for working on a level at any angle, up to 7 ft. in diameter, and columns 18 ft. long, (8) a buzz saw planer, for doing fine work for doors, windows, &c., (9) sand paper machine driven by steam, (10) a mortising and boring machine, (11) a circular saw for working on a level at any angle, up to 7 ft. in diameter, and columns 18 ft. long, (8) a buzz saw planer, for doing fine work for doors, windows, &c., (9) sand paper machine driven by steam, (10) a mortising and boring machine, (11) a circular saw for working on a level at any angle, up to 7 ft. in diameter, and columns 18 ft. long, (8) a buzz saw planer, for doing fine work for doors, windows, &c., (9) sand paper machine driven by steam, (10) a mortising and boring machine, (11) a circular saw for working on a level at any angle, up to 7 ft. in diameter, and columns 18 ft. long, (8) a buzz saw planer, for doing fine work for doors, windows, &c., (9) sand paper machine driven by steam, (10) a mortising and boring machine, (11) a circular saw for working on a level at any angle, up to 7 ft. in diameter, and columns 18 ft. long, (8) a buzz saw planer, for doing fine work for doors, windows, &c., (9) sand paper Shot Dead at his own Door. The Murder of Dr. Henry C. Moss—Escape of the Assassin.

From the St. Louis Post. The quiet, rustic town of Venice, Ill., just above East St. Louis, was this morning the scene of a dastardly murder. The victim was Dr. Henry C. Moss, one of the most respectable physicians in Illinois. The house is a usual country cottage, containing only two rooms. In front is a small yard, adorned with various flowers, while a trellis work covered with creeping vines stands in front of the door.

About 10 minutes past 1 o'clock this morning Dr. Moss, who was not feeling well, left his bedroom, telling his wife that he intended to take some medicine. He lit a lamp, went into the other room and obtained the physic. He then returned, leaving the lamp burning. At the window he noticed the face of a man peering in. The face appeared to be of a dark complexion, and belonged evidently either to a very dirty white man or a molatto. The imperfect light in the room did not admit of a close scrutiny. The Doctor pressing it to be some one who wished his professional services, opened the door after a slight hesitation, as he was only clad in a night dress. He perceived two men standing near the window, whose countenances were ruffianly and low expression. One of the men replied, but his wife, who was listening in bed, was unable to hear the answer. The Doctor then asked, "What are you doing in my yard?" One of the men replied, but his wife, who was listening in bed, was unable to hear the answer. The Doctor then asked, "What are you doing in my yard?"

RETRIBUTION.—Two Germans fresh from Chicago visited New York, and one, well acquainted with the city, invited the other to Delmonico's where a dinner for two and a bottle of wine were ordered. The place and fare were praised until the bill of \$11 was presented. They paid, however, and while walking down Broadway the excited German commenced to swear at the supposed extortion. His friend then said: "Do not swear, Jacob. It is wicked to swear. God has punished dot man Delmonico." "How?" "I have mine pocket full mit spoons."

Or the 206 members of the Dominion House of Commons 11 are journalists, 15 farmers, 6 manufacturers, 11 doctors, 5 shipbuilders, 8 lumbermen, 4 civil engineers, 2 contractors, 1 brewer, 1 school inspector, 1 banker, 55 lawyers, 56 merchants, and 17 gentlemen of leisure. They are all patriots besides.

WILLIAM SHAW, a convict at Joliet, Ill., has baffled a court. He had been stabbed by a fellow convict, and when the latter was brought to trial refused to testify against him. The Court couldn't convict him for a prisoner, and so that was the end of the case.

TOLEK, afterward Lord Chief Justice Northby, was asked to contribute a billowing toward the expense of burying a poor London attorney, who had died. He explained: "Only a shilling to bury an attorney! Here is a guinea; go an bury twenty-one of them."

Why the Rev. Mr. Mudge Stopped His Paper.

From the Indianapolis Times. Some years ago when the writer was a reporter upon an Eastern paper, it devolved on him to write for the same edition an account of the presentation of a gold-headed cane to the Rev. Mr. Mudge, the clergyman of the place, and description of a new hog-killing machine that had just been put in operation at the factory. Now, what made the Rev. Mr. Mudge mad was this: The inconsiderate buccanner who made up the form got the two locals mixed in a frightful manner, and when we went to press, something like this was the appalling result:

"Some of the Rev. Mudge called on me yesterday, and after a brief consultation for the unassuming hog was seized by the hind legs and slid along the beam until he reached the hot water tank. His friends explained the object of their visit and presented him with a handsome gold-headed cane. He was then seized by the tail, and swung him around in less than a minute the carcass was in the water. Thereupon he came forward and said there were times when the feelings overpowered one, and for that reason he would not do more than to attempt to thank those around him for the manner in which so huge an animal was cut in fragments was astonishing. The doctor concluded his remarks, the machine seized him, and in less than it takes to write it, the hog was cut into fragments and worked into delicious sausage. The occasion will be remembered by the doctor's friends as one of the most delightful of their lives. The best pieces can be obtained for fifteen cents per pound, and we are sure those who sat under his ministry will rejoice to hear that he has been so handsomely treated. Mad! Well, about nine o'clock that morning the office had been abandoned by every man but the advertising clerk, and he ascended to the roof and robed himself in boiler iron, so that he could see the clergyman tearing around down the street with his congregation, all wearing the panoply of war, and carrying butcher knives and things. The next day we apologized, but the next day the doctor stopped his subscription."

NEAL Dow complains very bitterly that his denial has never been able to catch up with a very circumstantial story sent out some years ago declaring the Maine Liquor law to be in operation. He says, a head annually \$25,000,000 by the operation of the law (or about \$40 a head for men, women and children); the law has been a great success since its establishment; the liquor traffic has been absolutely extinguished in all the States; the liquor traffic has been absolutely extinguished in all the States; the liquor traffic has been absolutely extinguished in all the States.

THE person who takes a paper nearly a year, reads it every week that it is published, and then evades the issue of payment on the flimsy quibble that he "never subscribed for it," might own all the steamboats on the river, and still it wouldn't make a man of him.

IF your local paper doesn't exactly suit you don't go to running it down and abusing the editor, but go to work and help to make it better by furnishing your local itemizer or the editor-in-chief with such items of interest as happens to come under your observation.—Soleil Democrat.

THE Bridgeport, Conn., Coasting Club boasts a double-rigger, thirty feet long, with a carrying capacity for twenty-eight persons and 5,000 pounds weight. It is steered by pulleys and has a powerful brake and a fifteen-inch get out of way other coasters to go with it.
