WANDERING WILLIE. ie World Interviews Him—A Telegraph Direc-tor—The Kind of Settlers We Want in the Northwest—The Judicature Act.

Hon. Wm. Macdougall was observed by World last night at the Queen's reading files of the New York papers. After tations the reporter asked the hondle member for Halton what was new in graph matters. He replied that as a ctor he had come up to attend a board ting of the Northwestern Telegraph pany, and that they had been consider a scheme making provision for the payt of the dividends to the shareholders of the absorbed companies. He said the new company was doing a larger business than the two former corporations.

"Was there not some dissatisfaction with the service now given?" said the reporter. Ion. Wm. Macdougall was observed by

isturbances. THE NORTHWEST.

Mr. Macdongall was recently up in Manitoba, and as a result of his visit there and the observations of his lifetime, he says Canada does not want that class of settlers Canada does not want that class of settlers who are styled "gentlemen farmers." He says there is a class made up of exarmy officers, and these "gentlemen farmers" from England who come out here and expect to take up a big farm in the Northwest, and hire men to work it for them, while they ride about in their leggings "overseeing their laborers," and leaving their farms neglected when shooting was to be had. Labor on such farms, especially in the Northwest, was scarce and expensive, for a man who could work on a farm was competent to take up 160 acres and cultivate it on his own account. These "gentlemen farmers" gave too much of their time to shooting, to riding about, to smoking and novel reading. Eventually they became dissatisfied and then left the country, giving it a hard name. The men we wanted was the raw material, the men who would go on a small farm and work it themselves, and who would bring up their families to work farms for themselves. The only farmer who became successful was he who took right hold himself and followed the plough.

THE JUDICATURE ACT, according to Mr. Mardonrall, was a wise

equity—we had practically one, administered by one judge. orher points.

Mr. Macdougall entertained the reporter by telling a lot of his varied political reminiscences. Some day he may write a history of our political life during the past forty years. At all events he has the material for such a work in his possession.

He expects a verdict in the Mercer case, in which he is engaged, some time next mouth.

Mr. Macdougall says fair trade is the

THE MANITOBA TIMES defends Lord Lorne for taking liquor into the Northwest, contrary to the law of the land, on the ground that the quantity taken was exceedingly small. Over \$2000 worth was passed free out of bond in this city and sent up to Winnipeg, where the greater portion is alleged to have been used. But Principle and not quantity is the question at issue. The World and other like-minded journals did not say anything against the governor personally in the matter. We treated him in the same way as we treat those civil servants whom the law exempts from municipal taxation-respectfully. What we say is, that a law which allows the governorgeneral to be exempt from paying custom duties should be abolished, as also should the laws of municipal exemptions.

The provincial did good in its day, but district fairs, more economically conducted, more energetically promoted, have taken its place. The one-time merit of the provincial was that it was itinerant—that it gave a big fair to each of the four divisions of Ontario once in four years. But now each district has its own fair every year, and the provincial finds itself without its former reason for existence. The following statement is copied in the main from the advance issue of the Report of the Superintendent of Insurance, dated "Ottawa, April 30th, 1831," addressed to HON. SIR. LEONARD TILLEY, Finance Minister, and signed J. B. CHERRIMAN: COMPANIES.

all claims, even if an unusually sudden call should be made.

Such sudden call has happened to many banks, at various times, and the weak ones have gone under; such sudden calls happened to American Fire Companies, at the Chicago and Boston confiagrations, and to Canadian Fire Companies at the St. John and Quebec fires, and found many companies unpreupon the Life Insurance Companies of this continent, such as has, at which visited Canada and the Northern States in 1873, ran the mortality of the dropt of the Companies up 25 per cent, for one or two years, and caused many that one year, in excess of the average of previous and subsequent years.

When the part unavarented call does come to the companies the window of When the next unexpected call does come to life companies, the wisdom of those insurers who hold policies in the BEST AND STRONGEST COMPANIES will need no approval, but will then get abundance of it. It is a good thing to be wise in time, and to err, if at all, on the SAFE side, by commencing while in good health an immediate and safe provision for dependent ones, or your own old age, by one of those popular
