# The Famous D.M.C. Floss and Threads

We have been selling these beautiful D. M. C. Threads now for two years, and might say we went carefully at first, buying only staple Threads and introducing them to our customers, with the assurance and confidence that we had the best made, which has been fully confirmed by the entire satisfaction given during that time, and we are now

convinced that they easily eclipse all others. We have just received a large shipment from France, and in addition to the renewal of lines already mentioned many more varieties have been added; among them the "Cotton Perle," a heavy mercerized floss, in hanks for 'crocheted slippers, auto scarfs, neckties, shawls, gentlemen's vests, etc., in beautiful shades of grey, crimson, pink, blue, lavender,

# \$1 a Cake Could Buy No Better Soap

If you were to offer us \$1 for a single cake of soap, we could make no better than our Infants'

For we have put our very best into this cake. We go to the gardens of France for pure vegetable oil. There we pay often double what we might pay. We bring cocoanut oil more than 12,000 miles from the isle of Ceylon. Then we mix these

oils and boil them doubly long. After this we send them through our own special milling process - one that we have perfected only

in our 43 years of experience. From here they fall like flakes of snow into huge bins and are then crushed under a weight of 30

tons to press out the moisture. Then they pass through granite rollers and come out in miles of silky ribbons, after which they are dried eight times. The result is the most perfect and delightful soap.

It is so pure and clean that it leaves the skin fair as an infant's. So we call this soap Infants' Delight. Order one cake today and see for yourself how different it is. Note the rich, creamy lather and

smooth as silk. Note the dainty perfume - it comes from Bulgaria and costs us \$100 a pound. But it requires 3,000 pounds of rose leaves to make a single ounce of this Otto of Roses. The fragrance is simply exquisite. Please try it and see.

NEW RISK IN MARRIAGE. [Brooklyn Times.]

It must be remembered that New York is probably the most strict state in its marriage laws. It grants an absolute divorce for only one reason, and the charge must be clearly proved and by competent witnesses, whether the defendant puts in an answer or not. If Justice Dowling's rulings were more liberal to Mr. Gould's side, the peace and continued existence of a great many martial unions would soon be attacked. The road to a separation would lie through getting one's husband or wife a little tight upon one or two occasions.

TAX SALE At tax sale held June 23, 1909, at the Court House, city, no bids were obtained for west half north half lot 25, con. 1. London; lots 84, 35, 36, Alisa Craig, and 67 and 68, Glencoe. The sale was therefore adjourned to July 14 next, at noon, when these lands will be sold for such sums as can then be obtained for them severally. A. M. McEVOY, treasurer, Middlesex.

Work Together. One of the members of the Alexandra Hospice Association, the new one launched yesterday, also informed The Advertiser today that there is no reason why the two associations cannot work in harmony, as it is claimed that the London Health Association never made any claims to look after the incurable patients. But members of the latter body deny this, and say that they made arrangements with the hospital trust to do his, and that and titled grandmothers who have so the trust, as evidenced by Chairman long held undisputed sway in society Screaton's statements, is still willing are threatened with dethronement, to carry out its pledge, and will do so just as soon as the new isolation hospital is completed, so that the necessary room may be available in the

Here's the Rub. The formation of the new association is likely to compromise matters in regard to the Blair grant of \$20,-000, and both associations may endeavor to secure it. As for the fund raised by the char-

### STILL LIVES, THOUGH FROZEN IN LIQUID AIR

Bacteria Subject of Startling Experiments in London.

London, June 29. - Even the lowest temperature yet reached on this planet does not kill bacteria. They seem not even to be affected by being frozen in liquid air.

The life and death of bacteria were touched on by Sir James Crichton Browne when lecturing on sewage disposal at the international congress of applied chemistry at South Kensing-

"Young and vigorous cultures" were exposed to such a temperature for 24 hours. Thawed out and examined,

they proved none the worse. Some bacteria even survive a six months' freezing, and others-tubercle bacilli-immersed in liquid air for 42 days, displayed undimnished virulence when injected into guinea pigs. In this hold of life bacteria and vegetable seeds stood alone:

Heat, however, was more effective for "all living organisms have their termal death point"; but there is one "group of thermophile bacteria, the nearest approach to the mythical salamander, which flourishes at about 165 degrees Fahrenheit."
