THE BRITISH FLAG FLOATS OVER ARCTIC ARCHIPELAGO

Captain Bernier on the Canadian
Government Steamer Arctic
Reaches Quebec on Return
From the North.

MORE IMPORTANT EXPEDITION
THAN DISCOVERY OF THE POLE

Captain Bernier Makes Public Letter
Received by Him From
Dr. Cook, the Brooklyn
Explorer.

Arctic Commander Believes Dr.
Cook Reached the Pole, and Fur-
thermore Believes Commander
Peary Believes He Did—Arctic
Made the Northwest Passage For
the First Time in Fifty Years—
Discovers Large Area of New
Land—Returns With Records Left
in Arctic by Explorer—Early in
the Nineteenth Century—Brings
Back With Him Live Muck-ox
and Foxes.

Quebec, Oct. 5.—Captain Bernier, the
Canadian explorer, has returned to
Quebec without finding the pole. In
fact his mission was not to seek that
elusive portion of the globe. He has,
however, returned to Quebec with his
good ship Arctic, having done what
no man has done for fifty years, made
the Northwest passage, and has found
a large tract of land to the westward,
unknown till the present, but over
which now waves the Union Jack
with the Canadian coat of arms in
the corner.

That the gallant captain has brought
with him documentary evidence of the
existence of a large tract of land in
the polar regions can be said with-
out hesitation. He also made the
definite statement to your correspond-
ent who spent two hours with him to-
day on the steamship Arctic that at
the present moment the Union Jack
flies over the whole of the Arctic archi-
pelago, and that it is only a matter of
time before the Dominion of many
thousands of square miles undreamed
of before.

Has the Goods With Him.

The good ship Arctic anchored in the
stream opposite Kings wharf at
8.30 this morning, and it was 10 o'clock
before the Arctic came into the wharf
and was warped up. As the quaint-looking
craft with her full rig and her low
funnel, which looks like an undersized
chimney pot alongside the sturdy
masts, came into view round the
bend, there could be described with-
out the need of marine glasses the
stairway form of her commander on
the bridge and the air was rent with
hoarse commands of "Relay there,"
and "Heave the rope," coupled with
the moaning of the muzzook and the
yapping of the Arctic foxes which the
captain has brought home as prima
facie evidence that he was really
north.

Came Through Without a Scratch.

The scene of the famous King's
wharf, which has before today seen
the disembarkation of royal princes
when the Arctic drew in, was very
picturesque. On the deck were wait-
ing a group of the friends of Captain
Bernier and his crew and also a group
of the members of the Geographical
society of Quebec. The Arctic looked
epic and span when she drew in and
apparently came through the north-
ern winter without a scratch. There
are many evidences, however, that the
paint brush has been wielded vigor-
ously during the past few days. Cap-
tain Bernier stood on the bridge hav-
ing his acknowledgments of the plaudits
of the crowd.

Captain Bernier's story, given to
your representatives, resolves itself
into two different portions. The first
is that from the maps and charts ex-
hibited in the little cabin of the Ar-
ctic.

(Continued on Page Two.)

CALGARY EXTENDS CONGRATULATIONS TO EDMONTON ON CORNER STONE LAYING.

Calgary, Oct. 5.—The Calgary Herald says editorially: "Ed-
monton did itself proud in its corner-stone celebration. It also did
honor to the province of Alberta and Calgary begs to extend its
warm congratulations to the city of Edmonton on the occasion of
Edmonton has the gift of enthusiasm combined with a remark-
able civic energy. Its people have a faith in its future so great as to
even transcend the bounds of its possibilities. This is said, not to
minimize the prospects of the capital, but to emphasize the fact
that its people, Edmonton would not be alive today had it not been for
the stalwart civic loyalty which has always distinguished it and
which is still noticeable in its history and Hon. Frank Oliver
will back up that statement.

CONSTRUCT \$20,000 LOG STORAGE BOOM

Engineer of Dominion Public Works
Department Here to Begin Work
on Log Reservoir Up the Saskat-
chewan River—To Improve Navi-
gation of River.

Sept. Malhot, resident engineer of
the Dominion Department of Public
Works at Calgary, arrived in the
city last evening with plans in his
possession for the construction of a
reservoir log boom at Goose Island
encampment, eighty miles up the
Saskatchewan river from Edmonton.
This morning at 10.30 o'clock, Mr.
Malhot met the local lumbermen
and submitted the plans to them
for any suggestions or amendments
they might desire to make. Mr.
Malhot told the lumbermen that the
Department of Public Works will
construct a log boom at Goose Island
of the reservoir boom for which the
lumbermen have been petitioning
for some time. At the last session
of the council, the sum of \$20,000
was voted for this work, and after
his recent visit to Edmonton,
when he met a deputation of local
lumbermen, Hon. Wm. Pugsley,
minister of public works, decided to
begin the work under way as soon as
possible, so as to be prepared to
handle the logs that will be cut on
the Upper Saskatchewan during the
coming winter.

Uniform Method of Grading Will Im-
prove Conditions of the Grain Trade
System of Inspection is Far From
Satisfactory. Convention Will be
Called.

Chicago, Ill., Oct. 5.—Grain men and
representatives of all the board of trades
of this country and Canada, will as-
semble in Chicago soon to perfect an
organization the purpose of which will
be to place American grain upon a
higher plane in the European markets
and as a natural consequence obtain
better prices than under present condi-
tions.

TO RAISE STANDARD OF AMERICAN GRAIN

The organization which will be known
as the Associated Board of Trades of
America, or some similar title, is the
direct result of the recent convention
of board of trade men held here. Chi-
cago board of trade men are enthusias-
tic over the idea and have pushed the
matter to such a point that President John
A. Bunnell, of the board of trade of
Chicago, declared yesterday that steps
had been taken to have all boards of
trade in similar organizations and rep-
resentatives to Chicago for the pur-
pose of organization is practically un-
limited and it will look after all mat-
ters of legislation which could not be
accomplished by individual effort, the
chief result desired of the raising of the
standard of American grain. At present
there is no uniform method of grad-
ing and inspecting grain with the result
that the grain is exported to Europe
unsatisfactory to both the purchaser
and the producer.

It is proposed to establish a uniform
grading and inspecting system so that
every bit of grain that is exported will
represent just what is claimed for it by
the exporters.

American grain meets with consider-
able trouble in the European markets
because of the fact that the grain of
other countries because of the lack of
inspection and grading.

SHOOTING WAS ACCIDENTAL.

P. McGrath Exonerated from Blame for
Death of J. Stoddart.

Winnipeg, Oct. 5.—The coroner's jury
found that James Stoddart came to his
death by accidental shooting by P. Mc-
Grath, who was exonerated from blame.
The evidence showed that the party at
Oak Lake went shooting early in the
morning of October 1. One of the party,
Campbell, loaded his gun and went out-
side, but being too early returned and
did not down the gun without drawing the
charge. McGrath later picked up the
gun in error and was handling it when
it discharged, fatally injuring Stoddart,
who was seated nearby. The coroner ex-
pressed opinion that both Campbell and
McGrath were careless.

THEIR EXCELLENCIES ARE NOW IN WINNIPEG

Earl and Countess Grey Visit the
Reginald Public Institutions in
That Holiday Be Given School
Children to Commemorate His
Visit.

Regina, Sask., October 5.—Accompanied
by Lady Grey, His Excellency the
Governor General this afternoon
visited a number of the institutions in
the city. After inspecting the home
recently established by the
Children's Aid Society, the Vice-
Regal party proceeded to the Victoria
public school, where, after hearing the
pupils in kindergarten department
the whole school went through
their fine drill. Later, when the
pupils were drawn up in the school
grounds, His Excellency briefly ad-
dressed them. His remarks specially
emphasized the need for the cultivation
of many and chivalrous qualities
on the part of the boys and on
the part of the girls, and such womanly
qualities most necessary in the up-
building of happy homes. Upon the
natural occasion, to commemorate
yesterday's stone laying and
the visit of himself and Lady Grey,
today's holiday is to be granted to
the children of the city, probably on
Friday.

Continues Round of Institutions.

The next point visited was St.
Mary's Separate School, and from
there the party proceeded to the mun-
icipal hospital, of which institution
the president of the board of health,
L. G. Clark, secretary-treasurer,
J. H. McDonald, editor of the Plain-
dealer, and a representative of the Bul-
letin, were present. The car then
from the Vardon garage and the other
two were from that of John I. Mills.
The intention was that the party
should reach Strathcona on return early
Monday night. But while Mr. Gray
had made every possible arrangement
for convenience and convenience, accidents
to motor cars cannot be provided against
and it was this that caused the delay.
Between Strathcona and the city
several tire punctures delayed the party
and the end of the forty miles run was
made till nearly two o'clock. One of
the cars broke down near the city
and had to be towed in. A second
plunged through the railing over a
bridge into an eight-foot ditch where
it stood almost on end but neither machine
nor occupants were injured. A start over
the bridge into the West was made
about three o'clock. As the beau-
tiful expanse of clear, soft water more
than six square miles in area broke upon
the view expression of surprise were
heard on all sides with reference to the
great extent of the lake. When the
visitors had gone down to the white peb-
bled beach and had drunk the water,
the city of Edmonton was found in the
of the minerals that make what is com-
monly known as "hard" water are present
and the contrast is very noticeable
when it is compared with what comes
out of the Saskatchewan.

Almost two hours were spent at the lake by the party. The water installed by the city of Edmonton at the southern outlet was visited and the system of tak- ing the measurements explained by Mr. Gray. At the present time the outflow is small but despite the exceptionally dry season, the water is still running out over the smaller portion of the weir.

The Most Serious Accident.

The most serious accident of the ex-
cursion happened shortly after the start-
ing had been made for Wetaskiwin. The
lights on the second of the Mills cars
were not strong and the driver mistook
the blackness of a stump for the road.
The result was the disabling of the car
which hit the water pump turn off. It
was hauled to the side of the road where
it was left. Yesterday it was dragged
back to Wetaskiwin, more than 25 miles
distant, by a team of horses.

COAL MAGNATES WINCE.

Nova Scotia Mine Workers Lay Charge
of Conspiracy.

Halifax, N.S., October 5.—The United
Mine Workers ignited the fuse of
the bombshell they have been pre-
paring to throw into the coal company's
ranks here today, when an informa-
tion was laid before Stipendiary Mag-
istrate Fielding, of this city, against
the leading coal magnates of the
province, charging them, with others,
of conspiring and arranging to unduly
limit the facilities for the mining and
supplying of coal in the province.

The Mine Workers say they have
a substantial charge and are willing
to carry the case to the Privy Coun-
cil if necessary.

A MOTOR TOUR TO PIGEON LAKE

Strathcona Aldermen Are Guests of
Frank M. Gray, Promoter of
Gravity Water Scheme.

The aldermen of Strathcona with the
city solicitor, the city engineer and other
prominent men, seated around a camp
fire on the lonely shore of Pigeon Lake,
thirty miles west of Wetaskiwin and
eating their evening meal after the man-
ner of the original residents. This was
the unusual scene that presented itself
on Monday night as the result of a visit
made by Frank M. Gray, of Edmon-
ton, promoter of the proposed gravity
water supply for the Twin Cities. All
around was inky darkness, which seemed
more dense from the light of the
burning wood. Across the lake five miles
further to the west a forest fire shed a
lurid glow over the horizon and gave a
picturesque beauty to the view. Nearby
stood four motor cars with which the
party had been made from Strathcona.
The journey back, the first
few miles of which was over a narrow,
winding, stumpy road, used mostly by
the fishermen, was a difficult one at
night and was looked forward to with
apprehension by the chaffeurs of whom
E. M. Vardon, of Edmonton, was in
charge. But the return journey was
safely made and all arrived home yes-
terday afternoon delighted with their
outing.

Spain to Extend Operations.

Paris, October 6.—The Spanish am-
bassador denies that Spain has chang-
ed her intention in Morocco. He
says it is seeking entry to pacify the
country around Melilla and Spain has
but 50,000 troops in Morocco in-
stead of 70,000. A dispatch from
Madrid says that Spain is preparing
to extend her operations against the
Riffs. The correspondent adds that
10,000 men have been concentrated at
Ceuta for the march to Tetuan.

WHAT CAN THE KING WANT WITH ASQUITH?

Prime Minister Leaves London Sud-
denly to Wait on King Edward at
Balmoral Castle—Politicians View
the Visit With Apprehension and
Bewilderment.

London, Oct. 5.—The members of
parliament and politicians generally
view the departure of Prime Min-
ister Asquith for Balmoral castle to
succeed Minister of War Haldane as
minister in attendance upon the
King.

Mr. Asquith has been in charge of
the finance bill and it is extremely
unusual for the prime minister, when
conducting an important measure in
parliament, to abandon it for what is
ordinarily little more than a court
formality. The incident has started
excited speculation, which is rather in-
tensified by the fact that the King
himself will, it is supposed, return to
London on October 9, or at the latest,
October 11.

Plot Against Ozar's Life.

The lobbyists have been struck with
bewilderment. They are inclined to
believe that the event forebodes some
wholly unexpected development in
the political situation. Of this, how-
ever, there is no substantial infor-
mation.

Plot Against Ozar's Life.

St. Petersburg, October 5.—The St.
Petersburg correspondent of the Stan-
dard says the winter palace of the
Czar is now under general repairs
and is being put in readiness for his
return.

Oldest Son of Court Joiner Implicated —The Czarina's Health.

It is reported that a plot against the
life has been discovered among those
engaged in the work of repairing the
palace. The oldest son of a court joiner,
and Michaeloff, has been arrested and
many compromising documents in
relation to the plot are said to have
been discovered.

At a conference of doctors, who as- sembled Monday at Ivadia to consult with reference to the health of the Czarina, they said that Her Majesty had had a relapse and that the pres- ent state of her health had given rise to anxiety.

THIRTY KILLED IN MINE EXPLOSION

Terrible Fate of Miners as Result
of Explosion of Fire-Damp in
Extension Mine.

Nanaimo, B.C., October 6.—Thirty
men are now known to be dead as the
result of an explosion in No. 2 mine
at Extension. Up to last night eight
bodies had been recovered and iden-
tified as follows: T. Thomas, J. Mol-
neux, Andrew Moffatt, A. Montague,
Thomas O'Connell, W. Davidson, E.
Dunn; one unidentified. The work
of rescue still continues, but it is
not expected any more bodies will
be recovered before noon. A large
portion of the mine where the explo-
sion occurred is badly wrecked, the
brattice work being torn down and
the rescuers are very badly hampered
by gas. The majority of the men
killed were old residents of the dis-
trict and well known.

Pitiful Scenes Attend Rescue.

The explosion occurred at nine
o'clock yesterday morning. It ap-
pears it was caused by fire damp, the
timbers in two levels catching at
once. The wives and relatives of
the miners are naturally in a state
of hysterical grief, but none of the
residents of Nanaimo are permitted
to go to Extension, only the rescue
miners and the officials being at
the scene. A miner who reached
Ladysmith at noon yesterday said he
was leaving the mine with his father
when a terrific explosion occurred,
unhinging doors and blowing out the
stoppings.

THE CORNER STONE IS WELL AND TRULY LAID

Earl Grey, Governor General, Performs Ceremony for Saskatchewan—Civic and Provincial Addresses Presented—Hon. Frank Oliver and Premier Rutherford Present.

Regina, Oct. 4.—Panorally at 2.30 heralded by the booming of cannon the vice-regal party, escorted by a detachment of Mounted police, arrived at the buildings and passing through the guard of honor furnished by the Ninety-fifth regiment, were received by Lieut. Governor A. Forget, Premier Scott and members of the provincial government, and assembled thousands of spectators, and accompanied by four brass bands playing the National anthem.

His Excellency and those comprising his party had hardly taken their seats when what in many respects was perhaps the most pleasing feature of the whole ceremony took place, the singing of the Maple Leaf Forever by twelve hundred school children, who were massed upon a special stand to the right of the vice-regal party.

It was a striking scene and truly fitting in connection with such an occasion in the history of this great agricultural province.

At the close of the rendition of the song His Excellency made a short address of welcome to the governor general: "We are gathered here today," he said "upon the occasion of unusual significance in the history of Saskatchewan. His Excellency the Governor General has graciously attended to laying of the corner stone of the building which is to shelter the legislative assembly and executive departments and provincial government.

I am sure I will be only expressing the unanimous sentiments of every one gathered round when I say that we highly appreciate His Excellency's gracious act. (Loud applause.) Premier Scott then called upon the clerk of the legislative assembly (Mr. S. S. Page) to read an invocation.

At the close of the reading of the invocation Premier Scott said that all present would remember with grateful appreciation that the important step which would be witnessed in the development of provincial life was honored by the presence of one so distinguished and illustrious, both in official and private life, as the governor general.

Before proceeding with the actual ceremony he would ask His Excellency to convey an expression of sentiment of the province towards His Excellency.

The provincial secretary then read the following address: Provincial Address. To the Right Honorable Sir Albert Henry George Earl Grey, Viscount Howick, Baron Grey of Fallodon, in the County of Northumberland in the Peerage of the United Kingdom, and a Baronet, Knight Grand Cross of the Most Distinguished Order of Saint Michael and Saint George, Governor General of Canada.

May it please Your Excellency:—The government of this province of Saskatchewan desires to take this opportunity to mark with appreciation of the kindly courtesy and interest which Your Excellency has shown to this province during your tenure of the high office of governor general of these portions of His Majesty's dominions, the latest evidence of which is shown by your presence here this day.

Four years ago you took the leading part in celebrating the entrance of the province of Saskatchewan into the confederation of Canadian provinces in this North American continent, and today you will practically complete that work by laying the corner stone of this building, which is destined, as all hope and trust, to long be the home of those to whom the people of this province will entrust the duty of safeguarding their liberties, and the guidance of their future.

During the past four years the growth of this province has, under Providence, been marvellous. Our people have well nigh doubled their numbers. The crops of grain they are taking from the land to provide food for the people have increased by one hundred and fifty millions of bushels annually, the area under cultivation this year being four times that of 1902. No concrete case can be cited which will more clearly demonstrate to Your Excellency the difference which the last four years of provincial status has brought about in this country than by directing your attention to the school children now before you. In 1902 there were no more in number than are now enrolled in one of the schools of the city, and today there are eight school buildings in which instruction in all branches of education from the kindergarten upwards through a part of the university course, are given.

This prosperous condition of our people is one that we feel sure will be pleasing to Your Excellency, and we do not doubt but that the people of this province have Your Excellency's good wishes for its continuance during the years to come.

The government desires to record its gratification at the presence of Her Excellency with other members of your family and be permitted to wish that all blessings may be enjoyed by them and you. Dated at the executive council chamber at Regina in the province of Saskatchewan in the Dominion of Canada, this fourth day of October, A. D., 1906.

WALTER SCOTT, President. J. A. CALDER, W. R. MOTHERWELL, A. TURGEON, A. P. McNAB, Members of the Executive Council.

The reading and presentation of this address was received with hearty applause which turned into a burst of

enthusiastic cheering as His Excellency rose to reply.

His Excellency's Reply. Your Honor, Premier Scott, Ladies and Gentlemen,—I consider myself exceptionally fortunate that the double privilege reserved to the representatives of the crown of presiding over the official birth of the two great sister provinces of Saskatchewan and Alberta, and of the large corner stones of the executive and legislative buildings should have taken place within the term of my governor-generalship. The distinction of being thus personally and officially connected with the two provinces, large as they are more than twice as large as the United Kingdom and each of which is destined to bring to the British Crown a contribution of strength and glory, all which no man can at present measure, is a distinction which will ever remain with me as a memento, as a cause of special rejoicing and pride. Although your political life is only just beginning, your youth justifies the expectation that life will unfold for you a swelling population, a record of ever increasing service and usefulness to Canada and to the Empire. Exports of grain show increase of 10 per cent, your grain output and the customs and inland revenues collected within your limits must have become a source of congratulation and hope.

Indications of Future Strength. They are not only proof of the vigor of your growth, but indications of your future strength. A favoring Providence has blessed you with no begrudging hand. You could not have ordered seasons better adapted to the production of crops. You have enjoyed record years of exceptional output per acre, accompanied by exceptionally high prices. If you could rely on a continuance, year after year, of such conditions, the year you would become the richest people in the world and every business man would abandon his city office in favor of the farm.

It would be wise for you to treat the big profits of this year as capital and not as an income. Nature is the way of averaging her favors and it is important to follow her example, smiling with the blackest of frowns. You are, however, justly cherishing the ambition of becoming the granary of the Empire and giving to the city population of the world's most beautiful picture man can gaze upon, namely, that of thousands upon thousands of happy, healthy, cultured, and refined citizenry homes.

Crain Development. Nine million bushels of grain was the total of your crop ten years ago. Five years ago, before you received your provincial rights, the total of your grain crop reached thirty-seven millions. This fourfold increase of nine million in 1890 to thirty-seven millions in 1904, has been followed by still a greater increase in the next five years from thirty-seven million in 1904 to upwards of two hundred million in the present year of 1906. Of this two hundred million bushels upwards of eighty million bushels have been wheat. Ladies and gentlemen, when you consider that the largest wheat output in the United States in any one year has been eight hundred million bushels, and that your province has in the early days of her youth harvested a crop of wheat to the extent of the total wheat crop harvested in one year over the whole of the United States, that seven million acres you have this year under cultivation do not represent one tenth of the equally good land in your province waiting for the plough, you can form some estimate of the richest future awaiting your province.

Importance of Education. I observe with pleasure, Mr. Scott that you refer in your address to the children and the fact that you have provided school accommodation in Regina for eight times as many children as I saw at the inauguration, celebration four years ago. I rejoice to believe that you thoroughly understand the importance of spending neither time nor trouble nor money on the education of your children. The future of the province obviously presents one way in which the influence of home and school life may mould the character of the rising generation. It rests with you to provide an education which will inspire your boys with an ambition to serve the community and the state and to be successful and scientific agriculturists rather than to obtain employment in stuffy and overcrowded cities, and your girls with ambitions to be presiding divinities of beautiful and refined country homes.

What It Means to Be a Britisher. The manifestation of a healthy patriotic, national and imperial sentiment, both here and at Edmonton, will satisfy the world how passionately rare is the advantage you possess in being British subjects. You have realized that a continuance of your prosperity depends on the uninterrupted maintenance of the supremacy of the English speaking races on the sea. If that supremacy were to be interfered with even for one season; if hostile cruisers were to stop the export of your grain from the mouth of the St. Lawrence or from Vancouver, every one of your farmers would suffer. There is no part of the British Empire that is more interested in the maintenance of the British supremacy of seas than your prairie provinces. The people of the motherland have most gallantly undertaken the responsibility of insuring single-handed the safety of your over-seas trade until you are strong enough to come to her assistance. Your self respect as well as your self interest will not allow you to permit the overburdened motherland to perform this duty for you as soon as you are able to do it for yourselves. You will, I know, be anxious to support the Federal government in its endeavor to create a navy which shall be able to guard your coasts, to protect your over-seas trade and to take part in defence in a way worthy of yourselves, and of importance, perhaps, to the controlling part

Canada is destined to take one day in the administration of the Empire.

Message From the King. I have already given expression to gratification at the opportunity, being able, as the representative of His Majesty the King, who takes the deepest personal interest in the well-being of your people, to lay the corner stone of the buildings in which the government of your province shall administer to the requirements of the future. That the legislative and executive duties of those responsible for your wise government may ever lie in this building in such a manner as will reflect the best traditions of the Empire and conduce to the well-being of the people of Saskatchewan is my earnest prayer, and when the moment comes to spread the mortar and to lay the stone, I, in company with the present, will be joined together in one common hope that this corner stone, the towering of which has brought us here, may prove the foundation not only of your legislative and executive buildings, but of the ever-increasing righteousness, culture, prosperity and patriotism of your province.

Governor-General's Plea. Loud cheers and vigorous hand clapping frequently interspersed the remarks of the Governor-General which within your limits must be remembered until its close.

Heavy clouds had been passing swiftly overhead and for a few moments a sharp shower of rain fell. A beautiful rainbow on the north side of the lake during the singing of the "Maple Leaf Forever" by the school children. At the conclusion of the song, Lieutenant Governor Forget handed the mallet to the governor-general. The actual ceremony of laying the corner stone was then performed by the governor-general to the accompaniment of the playing of God Save the King by the massed bands, and the cheering of the vast audience.

Turning to the lieutenant governor, Earl Grey said: "Your honor, I trust have carried out your command in a manner satisfactory to you. This rowel, as you desire, will be kept in the archives of my family."

Premier Scott then introduced the Minister of Interior, Hon. Frank Oliver, who was received with loud applause. In an eloquent speech which brought out the spirit of the West, the minister of the interior spoke of the growth of Saskatchewan in the two provinces, and the part they were already taking and the greater part they are destined to take in making Canadian history. The settlement of these prairies, he remarked, was not overlooked and their welfare was a matter of thoughtful consideration on the part of the Dominion government. Mr. Oliver concluded with a note referring to the prize he felt it his duty to present to the Entwine and Pembina River Liberal association.

We the undersigned wish to state that there is no Entwine and Pembina River association. At the last meeting, on June 15, it was resolved that the Association be called the Entwine, Liberal Association, and the following officers were elected, President, W. A. Marshall; vice-president, W. E. Entwistle; secretary-treasurer, F. L. Elsie.

There has since come to our notice certain printed matter, showing Arthur W. Arup as president of the Liberal association, which we emphatically deny and contradict. We also wish to state that Arthur W. Arup is merely a member of the Entwine Liberal association.

President, W. A. Marshall. Vice Pres., W. E. Entwistle. Sec-Treas., F. L. Elsie. Entwine, Alta., October 1.

Importance of Education. I observe with pleasure, Mr. Scott that you refer in your address to the children and the fact that you have provided school accommodation in Regina for eight times as many children as I saw at the inauguration, celebration four years ago. I rejoice to believe that you thoroughly understand the importance of spending neither time nor trouble nor money on the education of your children. The future of the province obviously presents one way in which the influence of home and school life may mould the character of the rising generation. It rests with you to provide an education which will inspire your boys with an ambition to serve the community and the state and to be successful and scientific agriculturists rather than to obtain employment in stuffy and overcrowded cities, and your girls with ambitions to be presiding divinities of beautiful and refined country homes.

What It Means to Be a Britisher. The manifestation of a healthy patriotic, national and imperial sentiment, both here and at Edmonton, will satisfy the world how passionately rare is the advantage you possess in being British subjects. You have realized that a continuance of your prosperity depends on the uninterrupted maintenance of the supremacy of the English speaking races on the sea. If that supremacy were to be interfered with even for one season; if hostile cruisers were to stop the export of your grain from the mouth of the St. Lawrence or from Vancouver, every one of your farmers would suffer. There is no part of the British Empire that is more interested in the maintenance of the British supremacy of seas than your prairie provinces. The people of the motherland have most gallantly undertaken the responsibility of insuring single-handed the safety of your over-seas trade until you are strong enough to come to her assistance. Your self respect as well as your self interest will not allow you to permit the overburdened motherland to perform this duty for you as soon as you are able to do it for yourselves. You will, I know, be anxious to support the Federal government in its endeavor to create a navy which shall be able to guard your coasts, to protect your over-seas trade and to take part in defence in a way worthy of yourselves, and of importance, perhaps, to the controlling part

every house; a complete method of sewage and drainage is being constructed; and the city is lighted by its own electric plant that can supply light to every building. In addition to these utilities the streets and avenues are being boulevarded; fifty acres within the city limits, and two hundred and fifty acres on its confines are being rapidly converted from vacant prairie to delightful gardens and parks.

In addition to the above indications of your excellency in the city that have been constructed by the enterprise of its citizens cannot fail to attract attention. New churches, new schoolhouses in elegant designs (one of which is named after your excellency) meet the eye. An extensive residential quarter of villas and mansions, warehouses, offices, stores, residential chambers and hotels give to the conspicuous streets of the city an air of push, progress and prosperity, that can hardly be said to have existed when your excellency first became governor.

It is a delight to the citizens of Regina to be able to give assurance of your excellency that the progress and prosperity indicated here are bound to continue, and there is a heartfelt wish for an early opportunity to again extend a cordial welcome to your excellency.

In conclusion, the citizens desire to record their loyalty to the crown and person of his royal and imperial majesty, Edward VII. Signed on behalf of the Mayor and Aldermen of the city of Regina, in the Province of Saskatchewan, Canada, and sealed with the corporation seal, the 4th October 1906. (Sgd.) H. H. MACDONALD, Act. City Clerk. (Sgd.) R. H. WILLIAMS, Mayor.

J. Obed Smith Protests. London, Oct. 3.—Obed Smith sends a note to the press in reference to the remarks of the Grenadier Guard, published yesterday. He states: "It is here one feature of our emigration work for Canada which stands out as a glowing tribute to the success of the kindness and care with which children who are adopted are treated. It is a protest against the unwarranted assumption that angling even remotely suggestive of white slavery exists in Canada."

CORRESPONDENCE. HE IS NOT PRESIDENT. Editor Bulletin.—In your columns of September 20, under heading of Entwine district news, Arthur W. Arup has been presented to the readers of your paper as being president of the Entwine and Pembina River Liberal association.

TEN for TEN CENTS

Be it Known that the Entire **\$60,000 STOCK** OF **Gariepy & Lessard**

is now in the hands of LEWIS BROS. & CO. of CHICAGO, ILLINOIS,
and SPOKANE, WASHINGTON, to be closed out before November
21st regardless of loss or consequences.

Messrs. Gariepy & Lessard retire from the mercantile business as they have other business interests which require and demands all their time and attention.

LEWIS BROS. & CO.

have been in business in Canada and the United States for many years, having handled more merchandise than any fine firms in their trade. Fair and square dealing is what has been responsible for their phenomenal success. They know no limit when cutting and slashing prices. You may prepare for the greatest price wreckage you have ever known.

Stock consists of Dry Goods, Groceries, Clothing, Shoes, Hats, Furnishing goods for men, women and children, Notions, etc., etc.

Messrs. Gariepy & Lessard have been in business in Edmonton for many years and have earned the enviable reputation of being thoroughly reliable. Their over-ambition to please their customers prompted them to put in a mammoth stock of dependable merchandise which, in a very short period of time, will be thrown on the market at the mercy of the buying public and closed out in the very shortest possible time—nothing but the bare walls will remain.

THE STORE WILL BE CLOSED Tuesday, Wednesday, Thursday and Friday, October 12, 13, 14 and 15, during which time Lewis Bros.' large staff of sales people will be busily engaged marking down the price of every article in the store and prepare for the thrillings the news of this mighty movement has already caused commotion throughout the entire mercantile community. The entire stock will be marked down to prices that will sell at sight.

OUR METHOD OF CLOSING OUT STOCKS.

The question has been asked by a good many Edmonton people, what system we used in closing out stocks; the old Chicago way—and will be I am sure, a surprise to the people of Edmonton and vicinity. Every item in the store will be put on sale, not one item reserved. Although the original price tags will be left on each article new ones will also be attached, that you may see for yourself the great reductions that have been made, and display merchandise on counters and tables so as to make shopping easy and just as fast as one line is sold out others take their places until the entire stock is sold.

Remember the Sale Opens Saturday, October 16th at 9 a.m.

We advise you to come early in the forenoons as you will find it almost impossible to get waited on afternoons and evenings on account of the throngs of eager shoppers. Surprising bargains await you. Come and revel in these astonishing values; is it not easier to make money by saving than any other way. Come and make money; join the procession of thoughtful and prudent shoppers and be at the store every day at the sale. Buy good goods, save money.

GARIEPY & LESSARD

LEWIS BROS. & CO. of Chicago, Illinois, and Spokane, Washington, in charge.
