CHRONIC BRONCHITIS.

Bronchitis is an inflammation of the mucous membrane of the bronchial tubes, and is one of the most common of the pulmonary affections. Chronic Bronchitis more often occurs later in life. When a cold satties on the lungs, the disease either ends in bronchitis more often occurs later in life. When a cold satties on the lungs, the disease either ends in bronchitis or pneumonia. If it ends in bronchitis or pneumonia is incapable o 'taking his usual amount of exercise, and experience a shortness of breath, with more or less warmth in the palms of his hands. Soon after this a cough appears, accompanied by an expectoration of thick mucous, followed by a hectic flush, loss of flesh and strength, and night sweats continue, when the patient assumes all the appearance of having a genuine case of consumption. But this is simply catarrh of the ungs, or chronic bronchitis.

In the later stages of the disease the mucous membrane of the larger bronchial tube softens, while in the smaller tubes and air-cells of the lungs, the mucous membrane becomes congested and inflamed. There are no cavities nor tubercles in the lungs, but merely a wasting away of the larger bronchial tubes, and death takes placefrom obstruction of the bronchial tubes and air-cells of the lungs. The patient dies from exhaustion and suffocation, being unable to expectorate the mucous which accumulates in the passage leading to the lungs, which in some cases is sticky and small in quantity, but more commonly copious, of a light stray or yellowish green. Oftentimes streaks of blood make their appearance in the mucous, and at times there is a disparence of the accumulate and the mucous has affected are very liable to take a cold, at which time the mucous be

Mr. Riordan at the freedom" may take it into his head that and again expressed the doubt, as he shook can policy, and then-look out for squalls. his sapient head, whether he would let "Chris." run again.

Whoever Mr. Bunting may nominally represent he will really represent John Riordan, and John Riordan he will have to obey, as he had to obey when the Syndicate question first came up in parliament when he was dumb, until he got orders how he

constituency, and the workingmen know what sort of a workingman C. W. Bunting is. Commencing as a workingman from the moment he went into sugar, and by ways known to others beside himself got on, he has looked haughtly on the class from which he sprung, and his own printers, good conservatives many of them, would work against him, for they too like his constituents in Welland have felt the edge of his falseness. To them his promises remain unfulfilled to this day.

From the moment Mr. Bunting has got the Mail he has been trying to wear George Brown's shoes, but they do not fit him for a cent. A party may submit to dictation from a real dictator, but not from a Brummagem one. Bunting is Brummagem all over. In this respect he gets, as Sir ency of Toronto represented by the chiefs Charles Lyall would say the whole orang. Charles Lyall would say, the whole orangoutang. He has been four years in parliament, and what has he done? He cannot than as it says, and what it means is this : advise or speak or organize. Socially he "Look, Sir John, how we are supporting is of no account. Politically he is a cipher you for a leading constituency;" and again behind the figure of the Mail. Any importance he has is as nominal proprietor of porting you." In other words, the Telethe Mail, and that importance may any day disappear in a gust of John Riordan's temper. He has been tested, and what hashe proved ? Brummagem Bunting would describe the whole situation.

A DANGEROUS JUNCTION. The Montreal Witness opposes anti-Chinese bills, and favors the immigration of the of this wonderful scheme. Chinese into America, unchecked and unlimited. This was to have been expected; nearly all the Protestant religi ous journals lean the ity, which by those who entertain it is to prosperty. supposed to be part of the religion of the New Testament. Commercial greed wants would gladly see enough Chinese come into the country to bring workingmen's wages down to twenty-five cents a day. The cosmopolities and the sentimentalists—friends of every country but their own—outrageously, misinterpret the divine command to go into all the world and preach the gospel to every centre. They propose, instead, the bijest the best hors into our own country. and to deprive our own people of work and tion of Greeks, and Romans, and he then barbarians, into Palestine? He was ready to ge to the uttermost parts of the earth to preach the gospel; but filling up of a Chrstian country with a most dangerous and undesirable class of heathens was not thought of in his day. As for the effect thought of in his day. As for the effect thoo the Chinese of living and working in America for many years, the thing has had a pretty long trial, and with what result? As far as we can learn, it is not pretended that as many as half-a-dozen Chinese, out of all that have ever come into California to work for wages, have ever been any neverted to christianity. They keep up their "joss-houses" and all their old superstitious in America just as in China, and it appears to be a matter of pride and of determination with them to friend the same separate people in spite of the foreign influences surrounding them. Further, the greater the aggregate number of Chinese settled in America, the more powerful does the vast heathen mass become to resist all christianizing influences. With only a hundred Chinese in San Francisco, a missionary might hope to make a few converts among them; with twenty thousand Chinese massed together, anywhere in the larger the mass of Chinese settled amongst us, the more unimpressionable by snything that we can do or say does it become; the greater is its stolid vis inertive of resistance to our efforts. This is something for the advocates of Chinese immigration to ponder, Dr. Wild among the rest.

A CONUNDRUM FOR THE GLOBE. It is a standing contention with the Globe that the N. i bs the farmers of ten cents average of every bushel of wheat they sell, by making it that much cheaper in the market. Strange to tell, however, the same N.P. makes flour dear, the bread tax CARRIAGES being part of it. In other words, the N.P. makes cheap wheat and dear flour, as the Globe has time and again endeavored to show. Now, a country in which wheat was cheap and flour dear would necessarily be a paradise for millers, because their profit lies in the margin between the grain and the flour. The dearer that flour is, in propor- 63 & 65 Adelaide st. West, Toronto tion to wheat, the greater is the miller's profit. But the Globe contends, besides that the N.P. is ruining the millers; which is just what the reverse condition of dear wheat and cheap flour would certainly do. There is a conundrum here fer our big conporary to solve.
