Minard's Liniment: Lumberman's friend, held to blame in that me

After the Rain,

All day the low-hung clouds have dropped Their garnered fulness down;
All day that soft gray mist-hath wrapt Hill, valley, grove and town.
There has not been a sound to-day To break the calm of nature,
Nor motion, I might almost say,
Of life or living creature;
Of waving bough, or warbling bird,
Or cattle faintly lowing;
I could have half believed I heard
The leaves and blossoms growing.
I stood to hear—I love it well,
The rain's continuous sound,
Small drops, but thick and fast they fell
Down straight into the ground.
For leafy thickness is not yet
Earth's naked breast to screen,
Though every dripping branch is set
With shoots of tender green.
Sare since I looked, at early morn,
Though every dripping branch is set
With shoots of tender green.
Sare since I looked, at early morn,
Those honeysuckle buds
Have swelled to double growth; that thorn
Hath put forth larger studs:
That lilac's cleaving cones have burst
The milk white flowers revealing;
Even now upon my senses first
Methinks their sweets are stealing.
The very earth, the steaming air,
Is all with fragrance rife,
And grace and beauty everywhere
Are flushing into life.
Down, down they come—those fruitful store,
Those earth rejoicing drops!
A momentary deloge pours,
Then thins, decreases, stops;
And ere the dimples on the stream
Have circled out of sight,
Lo! from the west, a parting gleam
Breaks forth, of amber light.
But yet behold—abrupt and loud,
Comes down the glittering rain;
The farewell of a passing cloud,
The fringes of her train.

Thoughts that do often lie too deep for And this one life, exempt from public baunt,
Finds tongues in trees, books in running
brooks,
Sermons in stones and good in everything.

Steeps all the brain in rest, and heals the

Perkins. "I was not selling, sir," she said.

"Please explain your business at once," of her slippered feet on the carpet in a way "Isn't this" said he tartly. "I have no time to spare." that threatened a yet more violent attack of "Please allow me to do so, then," said the hysterics. young lady. "I was soliciting subscriptions

"I don't want to subscribe," hastily interrupted Mr. Perkins. "How do you know whether you do or not," inquired the young lady, with some "You can get a nice room at a good hotel spirit, until you have seen the work, at Martin. "To go and marry a girl young

Mr. Perkins smiled a little. She was brusque, but he did not altogether dislike excellent board can be had much cheaper that. And, besides, she was decidedly "Because there have been at least three of your craft before you this morning," said he, "all of them selling 'Illustrated

Lives of Great Men. "But mine is quite different. Mine is 'Careers of Great Women.' with steel plate engravings," persisted the young lady. "Your business is overcrowded," said Mr. Perkins. "No; You needn't take the trouble to show me the book. Why don't you do something else?" "Will you tell me what?" said the young lady, despairingly. "Will you help me get something whereby I may support my-

in which she extended a gracious and pat-"What can I do!" "That is what everbody says," she answered, "and between you all I should starve. You are a lawyer, will you give me some law copying?"
"Can you write a clear, and legible hand?"

Mr. Perkins asked. The young lady sat boldly down at a desk by the chimney-piece.

"I'll show you what I can do," said she. Mr. Perkins looked over her shoulder as she wrote, in a quaint, distinct style, the words:

"My name is Amy Archdale, and I want to earn my own living."

Charlatans and Quacks

Have long plied their vocation on the suffering pedals of the people. The knife has pared to the quick; caustic applications have comented the victims of corns until the conviction shaped itself—there's no cure. Putnam's Painless Corn Extractor proves on what a slender basis public opinion often rests. If you suffer from corns get the extractor and you will be satisfied. Sold The young lady sat boldly down at a desk

"rather a romantic name, ista't it?"

"I had no hand in naming myself," retorted Miss Archdale, "so I can't justly be locked hiss Archdale, "so I can't justly be locked to blame in that matter."

"Don't forget that Baden Powell was nicknamed by his schoolmates Bathing-Towel, for then it will be known how to pronounce his double-barrelled name.

NO. 12.

Tinkling Spring.

"I did try it," said Miss Archdale, "I was governess in a private family." 'And why did you give it up?" "Is this a catechism?" said Miss Amy, of the Alleghany on your right. miling. "Well, I have no objection to answering. Do you want me to tell you the

"Well, then, it was because my lady employer did not like to have her grown-up son address me with common policeness.
Perhaps she thought I was endeavoring to ascinate him, but she was entirely mistaken."

down your address."

I was so discouraged."

And so Miss Amy Archdele walked off with a red-tape-tied parcel of papers under her arm.

"If she does them well and promptly," said Mr. Perkins, in a sort of mental soliloquy, "there's no reason why I can't let her have some more work. If she doesn't it won't be the first case of female swindling in New York. But she has a pretty, innocent little was too much exhausted with the fatigue of deciding the yearly question, "Where shall we go?" to contend. She wrote to a distant cousin in Virginia (I mean that cousinship was distant, not the location), and engaged board for Ailsy in the farmhouse of this relative.

Wun't you to promise to come to see me next winter for a long visit. All the things we do in the winter would be so nice if I had you in them, and, really and truly, I want to try to be more comfort to my people, to be as much of a Kit as I can in our house. Won't you come?"

Kit drew a long breath and colored high with pleasure. There was nothing said for a minute or two, and then her voice had a tremulous sound, like the vox humana stop York. But she has a pretty, innocent little face, too—hang it, I've half a mind to go to her address on the six and see if she really televited discent must be the Pilon Did. her address on the sly, and see if she really is a deserving object of—charity, I was going to say. But it isn't. She wants work, not alms. There's always somebody wanting something in this great, chattering Bedlam of a city of ours," added Mr. Perkins, irately, as he drove off two metables of the control of the control of the community is plain, square, brick building, under whose rof it would seem impossible to preach any thing more frivolous than Calvinism.

In colonial days, when His Majesty's Council in an organ.

You must not tempt me," she said, presently. "It is almost like showing me the kingdoms of the world and the glory of them. But I could not possibly do it. There are many reasons that you can see would make it impossible—money reasons, and council of the more proposed to the community; a plant of the world and the glory of them. But I could not possibly do it. There may reasons that you can see would make it impossible—money reasons, and council of the more proposed to the community; a plain, square, brick building, under whose rof it would seem impossible to preach any the control of the more proposed to the community; a plain, square, brick building, under whose rof it would seem impossible to preach any the control of the community; a plain, square, brick building, under whose rof it would seem impossible to preach any the control of the community; a plain, square, brick building, under whose rof it would seem impossible to preach any the control of the community; a plain, square, brick building, under whose rof it would seem impossible to preach any the kingdoms of the world and the glory of them. Money to Loan on First-Olass

The mother and older daughter were strikingly alike, with a dignity of look and manner curiously unlike Kit's free and easy ways, and equally remote from one's ideal The Baltimore and Ohio train goes at a both had a look of care and anxiety, too, rather leisurely pace down the beautiful from which Kit's face was still free. This valley of Virginia, as if it would give you time to gaze your fill many the Phys. Bit and a look of care and anxiety, too, from which Kit's face was still free. This careworn look was yet more marked on the valley of Virginia, as if it would give you time to gaze your fill upon the Blue Ridge on your left hand, and the eccentric spurs of the Alleghany on your right.

of the Alleghany on your right.

One of its passengers sat in the parlor car, on a fair June day, gazing through the wide windows with earnest eyes, yet with that air of abstraction in their depths that showed the same of abstraction in their depths that showed the same of the same Ailsy had her wish. She studied human plainly how little she was thinking of those blue Titans.

"It hardly seems fair to my home folks," she said to Kit, one day, as they sat out

Allsy Benton was in fact absorbed with plans and prospects for the coming summer.
She belonged to that great migratory flock

which rises up from city homes every June and settles by the seashore, by the lakeside for the summer. Allsy had gone around with her families to the summer. Allsy had gone around with her families to the summer. Allsy had gone around with her families to the summer. Allsy had gone around with her families to the summer. Allsy had gone around with her families to the summer. for the summer. Allsy had gone around with her family, to these places year after year, ever since she had worn long dresses

"I am going to try you."

For the first time the tears came into her eyes.

"I'll try my very best—indeed I will," she faltered. "For—I don't mind telling you now—I haven't got a single subscription, and I was so discouraged."

year, ever since she had worn long dresses and hominy and considered and chewed on a coral rattle, and now in her sixteenth year, having a turn for originality, she had begged off, and elected to spend her summer in the deepest seclusion. Her mother was too much exhausted with the fatigue of want you to promise to come to see me next winter for a long visit. All the things we

"They will be simple-minded people, of irately, as he drove off two match boys, an apple girl and a vender of pins and shoe strings from his doorstep.

Mr. Perkins followed up his crotchet and nature among them."

"They will be simple-minded people, of fairy godmother would furnish the ball dress course," she was saying to herself, "just and the pumpkin coach, I could not go. You see, I could not leave father. I don't "Ting Sprin.g.g!" The sound of the conductor's voice in this doubtful announcement made Ailsy clutch wildly at her bag, shawl-strap, book and umbrella. But she he asked in the grocery store which occupied the first floor.

"Yes, sir, she do," the grocer's wife inter-

But she did. Sober, second thoughts convinced her that it was better to submit to the inevitable—and she was one of the first to call on Mr. and Mrs. Elisha Perkins in the elegant brownstone house that the lawyer had bought and furnished for his bride.

And perhaps one of the most triumphant moments of Amy Archdale's life was that in which she extended a gracious and pat-

You May Bend the Sapling, but Not t he Tree. "You May Bend the Sapling, but not the a ree."

When disease has become chronic and deep seated it is often difficult to cure it. That is the reason why it is best to take Hood's Sarsaparilla when disease first shows itself—in pimples, headaches, indigestion, or other troubles which tell of poor blood, weak stomach or disordered liver or kidneys. This waste medicine regulates the whole system.

Hood's Pills are the favorite family cathartic.

—Says Bishop Potter: A young man was once complaining that he had trouble in writing his sermons. I asked him what he wrote on, and he said: "That is just the truble. I board with the senior warden's wife, and you can't write a strong defence the Christian religion on three doughnuts and a cup of weak tea."

WEDNESDAY, JUNE 13TH, 1900. -China, always a fertile field for trouble is now the scene of a civil warfare, which is affecting foreign interests to such an extent that practically all the great powers of the world are being forced to interfere. The Boxers" are styled outlaws, and as such vernment forces in their outrages against nent, recognizing its inability to cope with the rebellion, has followed the lead of the insurrection and is making a common cause with the outlaws against foreign inte erence. Affairs have assumed a phase of extreme gravity, and the outcome of the intervention is a much more serious question than the immediate protection of the rights of foreigners. The celestial empire may be very near its partition, and if that long postponed event is to result from the present crisis, the peace of the world is in great danger.

With such a confliction of interests, it will be difficult for any amicable disposition of the beautiful to the world is in great danger.

With such a confliction of interests, it will be difficult for any amicable disposition of the Baptist Church next Sunday, morning and evening. appointed heirs of the estate, and if they quarrel over their spoils, the world will wit seem that nothing short of a miracle can

Her children are Capt. D. H. and J. E. Slocum, of Pott George, Mrs. N. F. Marshall and Miss Emma A. Slocumb, of Middleton, and Mrs. G. R. Marshall, of Halifax, all of whom cherish loving and tender memories of a sainted mother. Their loss is her gain.

One less at home! The charmed circle broken—a dear face aced day by day from its usual place, it cleaned, saved, perfected by grace, One more in Heaven.

William Gibson, of Dalhousie West, died of typhoid fever on Friday the 3rd of June instant, after an illness of three weeks, aged 53 years, leaving a widow and seven children to mourn the loss of a kind and affectionate to mourn the loss of a kind and affectionate father. The deceased had been successful in accumulating a substantial home and property as the result of an industrious and active life as a farmer and lumberman. He took an active part in church and school work, and will be very much missed by the community in which he lived. The funeral sook place on Monday afternoon, from the new Episcopal church, the Rev. H. D. de-Blois officiated, and preached from the 23rd Paalm, 4th verse. Wreaths of flowers were placed on the casket by friends, testifying to the worth and respect of the deceased.

Obituary.

MARY E. SLOCUMB.

On the morning of April 26th, Mary E., relict of Capt. J. E. Slocumb, of Port George passed into rest, from the home of her dangher, Mrs. N. F. Marshall, of Middleton. She was the second daughter of the late Peter Middlemas, who came to this country from Sociland and settled in Brooklyn, Annapolis county.

She was a member of the Pine Grove Baptist Church, having been baptized by the Rev. W. H. Porter during his resid once there.

Mrs. Slocumb had been a sufferer for a long time, and had been confined to her bed the greater part of the last three years, but her interess entferings were borne with the calm forticude of one who was resting with Christ. Her life was a living testimony of the power of the goapel to support its believers.

When able to be about, the was always doing for others, ever thoughful of the sick and needy, and when stricken down with disease, the same unselfish disposition was shown. Even until the last she wished the summed to his home in England, having been shown between the summend by a cable announcing the serious for the special company. The total shipments per summent to his home in England, having been shown. Even until the last she wished the entry of the special company. The total shipments per summent through by his talent, earnest-nestness and energy. He reads with great trunt to his home in England, having been summent to the summend by a cable announcing the serious testiment through by his talent, earnest-nestness and energy. He reads with great trunt to his home in England, having been summent through by his talent, earnest-nestness and energy. He reads with great trunt to his home in England, having been summent through by his talent, earnest-nestness and energy. He reads with great trunt to his home in England, having been summent through by his talent, earnest-nestness and energy. He reads with great trunt to his home in England, having been summent through by his talent, earnest-nestness and energy. He reads with great trunt to his home in En

When able to be about, the was always doing for others, ever thoughtful of the sick and needy, and when stricken down with disease, the same unselfish disposition was shown. Even until the last she wished the watchers to rest, and only until a few hours before she passed away, athough greatly distressed, she made anxious inquires about other sick ones. She was carefully tended by her daughters, all of whom were with her at the end.

She was conscious to the last, and to her, death had no terrors, and she said that all was bright beyond.

Two brothers and one sister survive her. Her children are Capt. D. H. and J. E. Slowens and is taking hold of his work with commendable zeal.

PERSONAL PARAGRAPHS. Miss Churchill, of Lockeport, is visiting

—A meeting of the Liberal party for Wards 4, 11, and the Town of Bridgetown will be held at Forresters' Hall, in the Montrop building, Sa'turday evening, June 16th, at 8 p.m. for the purpose of electing delegates to the convention, and such other business that may come before the meeting. F. R. Fax, Secty.

—There are some crack shots in the 69th battalion, and big scores have been made by No. 1 team in the league shooting this season. The score in the first shoot was 812, and the weather and light were anything but favorable. Last Saturday 857 points were marked, showing what the boys can do under favorable conditions.

—On Monday next, at 7 p. m., a service for the institution and induction of the new Rector will be held in St. James' Church in Corning, N. Y., arrived last Saturday on their annual summer visit to Bridgetown. The institution and induction will be performed by the Archdeacon of Nova Scotia. The Rev J. A. Kaulback acting for the Lord Bishop of the Diocese, who will also preach the sermon.

Russia in China.

London, June 11—The news from Pekin and Tien Tsin is generally to the effect that the anti-foreign government is spreading throughout the province, and is extending to other districts, that destruction of rail-way property and mission stations and the massacre of Christian natives continues, and that a strong force of foreign troops have been despached from Tein Tsin for Pekin.

An Express telegram states that Claude Macdonald has telegraphed to the British consul-general at Hankow confirming the worst view of the situation. The Mail correspondent in St. Petersburg says there is not the least doubt that Russia's intentions are to act independently of the other powers even if momentarily seeming to be in acord with them. A report has reached St. Petersburg from Shanghai to the effect that the government has compelled the Chinese authorities to agree to the construction of a Russian line of railway from Kiahktao, about 110 miles due south of Lake Baikal, to Pekin. The whole of north eastern Chinaseould thereby be brought within the grip of Russia.

of the exhibition this autumn. The com-missioners would like to change the dates so as not to conflict with St. John, but it is im-possible to make a change, owing to the fact that the prize lists were issued with the dates, and that engagements and contracts entered into could not be broken. The com-mission decided not to lease the grand stand or to give the privilege to anyone controlling

Is at week.

Edward Blackadder, Esq., D. G. Lecturer
Sons of Temperance, spent a few days last
week with his sister, Mrs. Israel J. Parker.
Miss Helen Mills, of Granville Ferry,
spent a few days among her friends here last
week.

Mr. H. J. Crowe's mill was placed at the
Gesner lake last Saturday, and will commence sawing in a few days.

Mr. Norman Hall, of Brockton, Mass., is
visiting his mother and other friends.
Sohr. Earl D., Capt. Chute, loaded wood
and sailed for Boston on Tuesday last.
No fishing this week, owing to heavy run
of cross tidee.

Flashlight Division is in a good, flourishing condition; five were initiated last Saturday evening.
Crops of all kinds look well. I noticed
some potatoes at J. E. Farnsworth's about
six inches high.

BRIDGETOWN MEAT MARKET

The MISSES BARNES

(From the Cornell Reading Course for Farmer food .- All plants during growth absorb cer tain substances from the soil. Those sub stances which are essential for the best growth and development of the plant are lled plant foods. These are iron, lime, potash, sulfur, silica, nitrogen, phosphoric

2 The different plant foods are equally every one of the different plant-foods. Each s essential to aid in some particular function and no one can be substituted for another If a soil were to contain all the other plant could not be a fertile soil. It could not grow plants because phosphoric acid is necessary in the development of a plant, and no other substance is known that will take its place. The same remarks might be made respecting iron, lime, silicon, or the others.

3. The different plant foods are midely distributed in nature. - A soil on which are growing only mulleins, moss or daisies, is usually not considered a fertile soil: and yet the fact that these plants grow shows hat the soil contains the different elements of plant food at least to some extent. likely to be due to the texture of the soil. or to its lack of moisture-holding capacity, as to a deficiency, of mineral plant-food. soil which is practically worn out for onions

4 The element of which there is relati ly the least, determines the productive power of the soil (so far as plant food is concerned.) ent only to a limited extent, in which case it will measure the producing power of the soil. For if all the plant-foods are equally essential, it is evident that if in any soil there should be enough of all but one to produce produce 40 bushels of wheat per acre, yet of that one enough to supply only 15 bushels, then 15 bushels would be the largest crop possible. Hence it may be that the soil which grows sorrel and daisies ha sufficient potash, phosphoric acid and other mineral plant-foods to produce a good yield of grasses, but it may be lacking in nitrogen, or may not have available mois-

able. - Not every soil that contains an abundance of the different plant-foods is a fertile soil. The plant-food must be in such condition that the plant can use it. Gravel-stones might contain all the necessary mineral constituents, and muck has nitrogen; yet a mixture of muck and gravel stones would not be a fertile soil. Let the stones, through weathering, crumble and decay and become muck and soil, considerable available plantfood might be made. For plant-food to be available, it must be in a condition to be dissolved by the soil water. Roots absorb that which is in solution. They never take their food in solid particles or junks.

The soil man dissolve only that the ultimate particles of soil, and, obviously, chance there is for the plant food contained in these particles to be dissolved. It is in this light that we are to look upon tillage as making plant-food available by improving

7. The proportions of the different plant supplied a superabundance of most of the them are either lacking or are in an unavail able condition from which the plant finds great difficulty in extracting them. Of the acid. fourteen elements of plant food that are es sential to plants, only four and more often three are in this condition. These are nitrogen, phosphoric acid, potash and lime. The term plant-food as ordinarily used by farmers includes the first three of these substances only; not that they are any more essential to plant growth than are the other substances, but because of the deficiency of them in many soils and their corresponding

8. Phosphoric acid is one of the prime sentials.—Every farmer, whether he has used phosphates or not, has seen phosphoric acid. When a match is ignited the little curl of white smoke which first appears is pure phosphoric acid. The kind of match for this purpose is the old-fashioned one known as a sulfur match, easily recognized by th blue, flickering flame and the odor of burning sulfur. The kind known as crack or parlor matches do not show phosphoric acid.

In the blue-black or red tip of this match there is a small amount of the substance called phosphorus. When this phosphorus burning it unites with oxygen from the air. The result is the white substance of the parts of phosphorus and five of oxygen-such

as is sold in phosphates. 9. Farmers buy phosphoric acid in com binations with lime .- Phosphoric acid doe not exist in the soil in the free state, that is, readily unites with lime to form phosphates of lime. The chemical name of lime is calcium oxide, and the phosphates of lime are called calcium phosphates. Lime and phosphoric acid unite in three

different proportions: 1. One part phosphoric acid and 3 of

111. One part phosphoric acid and 1 of

These are called respectively tri-calcic phosphate, di-calcic phosphate and mono-

ombinations that plants obtain their phosphoric acid. These three substances vary the test applied. An alkali (like lye or water, and hence are not equally available to blue.

The mono-calcic phosphate dissolves in changed it is said to be "reverted"

The total available phosphoric acid in a la sod is to turn it on its edge with an air fertilizer is that which it contains in the space below. So long as the sod is rotting They carry too many frowns in their own forms of mono- and di-calcic phosphate. The down the soil above the furrow pushes it tri-calcic phosphates is soluble neither in down, causing a constant falling away of the water nor in soil water, and is known as the soil from the surface, leaving the roots

insoluble phosphoric acid. IO. These phosphates are mostly from bone or nourishment. (either recent or fossil.)—Bones are the chief source of phosphoric acid. The phosphate source of phosphoric acid. The phosphate rapid fermentation and the spring grain other. He can do so if he chooses, and he rock deposits found in the South are from ancient bone deposits. In bones the phosphoric acid is insoluble; that is, it is there as tri-calcic phosphate. To make it available, the bones are treated with sulfuric acid (oil of vitrol) and water. In the acidion which takes place, the sulfuric acid takes from the phosphoric acid one or two parts of its lime and puts water in their places. The lime which is taken away by the sulfuric acid and forms sulfate of lime (gypsum or land plaster). Gypsum is always a constituent of a limit and the spring grain becomes a failure. It does so even when the land has been plowed late in fall, as at this client is done in the spring. Clover sod plowed in August and well cultivated during that and the following months may grow good spring grain, but it cannot be seeded with grass or clover seed the following spring. So says American Cultivator.

So He that is warm thinks all so," but many people are always cold because of poor blood. They need Hood's Sarsaparilla.

fertilizer containing available (or treated) hosphoric acid.

11. Potash is also an essential fertili terial.-Most soils contain more potash than phosphoric acid. The potash in soils ilicates. Pure sand is silica. These siliwell that nature locked up the potash in might have run out, as the nitrogen has

13. If potash is to be applied to the soil. f potash. The last occurs in wood ashes Potash is composed of two elements, i. e.,

posits of common salt.

lement. - Nitrogen is the most expensive and consequently the most important, com-

ercially, of the plant-foods. It exists in that part of the soil composed of organic material, i. e., that arising from the decay of vegetable or animal matter. There is no nitrogen in common rocks. By ourning from a handful of soil all the organic part, the nitrogen will be lost. The nitrogen originally came from the atmosphere.

pure state it is a gas, but in the soil it is a onstituent of the organic material. 15. Nitrogen must be in combination to be vailable.—The nitrogen that exists as a constituent of any organic material is called organic nitrogen. This combination is found in manures, green crops and in fact all vege-table material; also in dried blood and tank-

Nitrogen is a constituent also of ammonia or hartshorn. By weight, fourteen of every seventeen parts of ammonia is nitrogen-Hence when the odor of ammonia escaping from manure piles is noticed, there is a los of nitrogen. Nitrogen in ammonia is called ammoniacal nitrogen.

Nitric acid or aqua fortis of the drug known as nitrates are formed. The mineral 16. Nitrogen is closely connected with wekiness or fruitfulness .- Cerea that grow too much to stock with immature seeds usually have too much nitrogen and not

-The great secret of genuine happiness o learn to enjoy as one goes along. Every day should be a holiday. Not an all day play day, since it is as bad for Jack and Jill o be merely frivolous as to be stupidly dull. But no matter how busy the life may be how full of work the day, something should be brought into every day's experience which will enlarge, breaden, and deeper the mind, and prove a tonic to body and soul alike. This is the real intent life. Every day should add a new layer of

beauty and joy before it gives place to t

side of the question-comes into this subjec Are you one of these who are surprised tha re may be such a thing as mortality in volved in the very practical matter of eco omy? All of you know people who have toiled and slaved to make money that they might be happy, and, to use their own pe phrase, "enjoy life by and by." But that time never came. When they are accumu lating one kind of capital they are losing another; when the bank account is large enough to meet their notions, they hav used all the possibility of an enjoyable life in this very work of amassing. During the years of endeavor they carried frugality to the excess of stinginess, drudged through the period, and when the time came that they expected joy, there was no joy for them. They had lost the capacity for pleasure, after spending years getting ready t enjoy. "No," says one, "I don't read, I haven't time; some day I shall read all th new books, but now I am too busy." I have the theatre. When I have so much money saved, I shall go and take them all in. And so it goes; the hungry soul is denied everything until it becomes so starved that it loathes food when by and by it is offered it. What a delusion it is, this always put ting the time of enjoyment into the future, rever deferring good things until the

fully looked after. - Health. Poise of Manner Every woman can, if she will, cultivate the self control that subdues the manifestation of feeling in frowns or excessive laughter. Poise of manner may be made merely the outward expression of poise of mind, and the many little worries of life can be relegated to their proper place as trifles. True repose ulness is not the absence of strength, but its assured possession, says the Pittsburg Press. Mothers should be observant of any tenlency in their growing children to undue facial distortion in speaking and gently re mind them of it until the habit is cured. It is difficult for the adult to dismiss a habit

once formed, but it would be wise for every Mrs. McShoddie-No. I didn't, and I was young woman and man to establish a close surveillance over their manner of using the for English plum puddin ! Superstitious. sentence is a fresh grimace. -A woman who is not strong, and yet has

mother and home-maker must learn to recognize her limitations or she cannot get ough her task with satisfastion to he or her family (eavs an American writer) She must learn to economize her strength and not fritter it away in doing unnecessar things, which some one else can do as well. "'To Have and to Hold," he answered. in an ecstatic whisper.
"Don't, Harry," she protested, but her that she may have enough left for the im pertant demands that no one else can satisfy she must balance the claims of charity, soci ety and her own household, and resolutel refuse to be pushed beyond her powers of en what seems a call of duty, but to the wife and mother home is the first duty, the special field given her to cultivate, and her par may be only to train and support the work

ers whose business and duty lie outside in Many professions apply some trait or other the human eye to their own particular use. Surgeons and dentists, remembering least, five years in jail.' that some of the most delicate nerves of the human body are in the eye, when giving anæsthetics judge by his eye when the pa tient is sufficiently under the influence of the drug; they lift the upper eyelid and feel the eveball with their finger. When the eveball no longer answers to the touch of the finger | let me help myself.' the surgeon feels assured that the patient is sufficiently oblivious to the influence of the outer world for him to begin operations. So, likewise, many forms of poisoning can be told by the condition in which the eye is

and the unnaturally distended pupil of vic tims to the influence of such drugs easily "gives them away." When the clerk in the pure and plated silver ware department opens a showcase, you may letect the pungent odor of camphor. Inquiry reveals the fact that large blocks of gum camphor are deposited here and that he effect of the effluvia is to keep the metal from tarnishing. "It would be practically impossible to keep our silver clean and bright

without camphor," explained the floorwalker. - New York Press. He-But I care nothing for beauty. -Wasp waists are no longer fashionable. They have fallen from the high esteem in which our ancestresses held them, and now an artificially, exaggeratedly small waist is never seen among women of the refined and elegant class. The increasing favor in which utdoor exercise is held for women has much to do with this commendable change, and the simply made me write a hundred times on a result is an increase of gracefulness and in | slate : 'I must be home by 10 o'clock.'" clearness of complexion. The skin in partic ular is strongly affected by tight clothing, which impairs digestion and circulation. To utilize the remnants of the more costly pilet soaps make a small bag of fine flannel:

and bathroom as they accumulate. When it is nearly full sew up the open end and use lather freely in water and the flannel has leansing qualities of its own. -A pineapple filling for cake is made by eating half a pint of cream until thick.
