PROVINCIAL SYNOD.

Some Startling Statements Made Regard Divorce.

MONTREAL, Sept. 21-Some startling statements were made by Rev. Dr. Langtry of St. Luke's church, Toronto, in the provincial synod this morning, in moving his resolution with regard to the re-marriage of divorced persons. He ridiculed the idea that such marriages should be allowed as a matter in justice to the innocent parties declaring that there charter list of fourteen members Geo. Carney is chief ranger, L. W. Shaw, V. C. R.; W. R. Hatfield, court deputy; On the authority of Judge McDonald, a well known county court judge of Ontario, and a member of the synod. Dr. Langtry asserted that very often the divorces obtained in Canada were got by collusion between the two parties in order to free themselves of the marriage bond. Rich men not infrequently called witnesses to prove their wives guilty, and then masquerading as the innocent ones. In other cases the husband forgot his vowe, and when tired of his neglect and desertion, the wife broke hers, he sued for a divorce. In his own eyes and the eyes of his friends he might be the innocent and aggrieved party, but at the last judgment it would not be so decided. Dr. Langtry foresaw a train of evils following from easy and general divorce, which far outwelshed any which might be caused by forbidding really innocent persons from marrying again. On behalf of the clergy, too, he asked that they should be protected from the importunities of those who wished such marriages per-

(1) Three fundamental facts: (a) Christ's death is the proof, not the cause of God's love; (b) Christ's death is the assurance—not the measure of God's love; (c) Christ's death is the begining—not the end of God's love.

these facts. (a) If so much has been done for us as enemies, what will be done for us as friends? (b) If death of Christ has done so much, what will His life do? (c) If reconciliation is so great a gift for all men, what can God do for you when you have submitted to Him?

(3) Three obligations upon us. (a) If God loved us, we ought to love Him. (b) If God loved us, we ought to love each other. (c) If God so loved us—and loves all—we ought to tell it to others—to all!

The above outline was so filled in and illustrated, and withal so eloquently presented, that the large audience was deeply affected at times during the delivery of the sermon.

The pulpit was occupied in the evening by Rev. C. W. Hamilton, who preached from I. John, II, 5. The storm that began before dark prevented a large attendance at the evening service. The display of cattle is pronounced by all visitors, expert as well as amateur, one of the direct and best ever seen in the maritime provinces. Americans and Upper Canadians who have inspected the array are loud in preise of the gathering, which they say would do credit to any of the New England States or Upper Canada. There are between 400 and 450 auimals on the ground, and of these the dairy breeds largely preponderate over beef cattle. Of the latter, the Polled Angus are all from Quebec province, the Galloways and Guernseys all from Prince Edward Island, and all from Prince Edward Island, and the Devons all from Nova Scotia, while George A. Perley of Mauger-ville, Sunbry Co., contributes the enground. Mr. Perley's cattle are splen-did types of their class, and go to show what a general farmer, who has a taste for stock raising, can do on a St. John river farm. Mr. Perley makes no pretentions to fanoy farm-ing, but judging by his exhibits he can give cards and spades to a great many so called scientific tillers of the soil. The exhibits of Mr. Pope of Cookshire, Quebec, and Mr. Carr of Compton, in the same province, constitute important factors in the general show, and their presence made the competition much keener in several classes. As Nova Scotia and Prince Edward Island were also on the corner whatever prices Nova and in force, whatever prizes New Brunswick stock men carried off were The beef breed exhibits comprise 55 Shorthorns, 26 Herefords, 4 Devons, 12

Polled Angus, 12 Polled Norfolk and The dairy breeds include 88 Ayrshires, 72 Jerseys, 31 Quebec Jerseys, 20 Guernseys and 27 Holsteins. The grade exhibits are: Beef grades

HORTICULTURAL DEPARTMENT. D. H. Knowlton, judge of fruits, one of the foremost practical authorities of New England on this subject, at the conclusion of his labors sent a letter to the executive head of the exhibition, of which the following is an

extract:

"Your exhibition more than ever impresses my mind with the excellency of your organization and the high educational character of your exhibits. The visitor beholds these things, and carries away with him some knowlige he did not have before of the reat busy world of industry and of he objects of nature among which he

"The fruit exhibit is of excellen quality, better than the two previous rears, though the large collective ex-sibits then shown were missing. It was difficult to judge these exhibits with justice to the exhibitors, as some he small ones are quite likely to be the best. Some of the larger horticultural societies in the states have stricken most of the premiums for collective exhibits from their lists. They argue wisely that such pre-miums have a tendency to drive away

the small growers.
"There has been a marked improveent in the care shown by exhibitors handling and displaying their uits. While there are some who are confused 'n remard to the names of the fruits they raise there is much less accuracy in the names than two

NATURAL HISTORY DEPART-

The Natural History Society makes a most interesting display in the ar-nex, that reflects much credit on the committee that took the matter in charge, namely, Col. Markham (chair-man), Dr. Matthew, Hon. A. T. Dunn, Dr. Geo. U. Flay, A. Gordon Leavitt, Wm. McIntosh and C. F. Rowe. The exhibit, which is in pharme of Mire Edith McBeath, is for the most part made up of collections that were sent in in response to the society's offer of a number of cash prizes for solvertions of insects, weeds and fungi. In addition to these collections, the society exhibits a good collection of minerals, ores and building stones. and two cases containing relies of the stone age and other curios. F. J. Purdy of Upper Jemseg contributes to this section a fine group of the na-tive woods of the province, that is worthy of permanent preservation.

Wm. McIntosh has a large collection of insects, about 1,400, mounted in glass-covered boxes neatly labelled and classified to show whether in-jurious, beneficial or otherwise. POULTRY AND HORSES. Dr. G. M. Twitchell yesterday sent

the following letter to the exhibition In the erection of the building for the exhibition of poultry you have pro-vided quarters not excelled on any grounds, well ventilated, fully lighted, and needing only uniform coops to complete the equipment. Permit me to suggest that permanent coops be provided, that individual birds may be shown under like conditions. Reyor shown under like conditions. Beyond that, to remove any possibility of the charge of tavoritism, the coops may be registered and prizes awarded by numbers rather than by names. Under the very efficient superintendence of Mr. Jack and his assistant the birds have been well cared for and the building kept clean and sweet. The mality of this magnificent exhibition warrants the belief that the industry is to rapidly increase throughout the provinces, and because it is so admirably adapted to the wants of the farmers, every inducement may well be set forth which might stimulate the growing of better birds. In nearly every class I found birds of sufficient merit to win in sharp competition at any of the great winter shows.

Under present conditions, and these will not be modified, the growing of horses cannot be carried out profit-ably, save by those who can produce the high class, stylish, easy roa of pleasing conformation, and good sizes, the trotter or pacer capable of a low record, or the well built, symnetrical, large, blocky draft horse, having quality of bone and carrying the type capable of longest service and least waste. For this reason I would least waste. For this reason I would suggest that the premiums for "agricultural stallions" be stricken out, unless the rules spacify the breed or breeds and require purity of blood and certificate of registration. Instead premiums might be offered on standard bree stallions 15-1 and under and not less than 950 or more than 1,050 to weigh not less than 1,050, also trot tirg bred stallions for producing road sters, not less than 15-2, to weigh 1050 or over, and to be judged by evidence of breeding, conformation, action, style and carriage. In each of these classes, for stallions 4 years and over, require that with each there must be shown three of his get, one year and over, no two from the sai dam, the quality, size and action coffspring to be considered by the judge. These, with the pure brackses, roadsters and pairs to har

MARITIME EXPERIMENTAL

W. Saxby Blair, the active horticulturist of the Maritime Experimental Farm at Nappan, N. S., has on view a grand exhibit of the products of that farm. The display he put up is quite attractive, and, as Mr. direction of an object lesson. By means of charts, etc., a summary of some of the experiments carried on during the past five years will be brought prominently forward. "Two facts," continued Mr. Blair, "are be-coming more prominent than hereto-fore in agriculture. They are the sel-ection of seed and authination and ertilization. Cultivation and fertility

make better root develo soil, warming it up more quickly, and, strange as it may seem, cultivation conserves soil moisture and enables the plant to stand the dry weather better. MR. EMMERSON'S POSITION.

It is not observed that Mr. En son has made reply to the criticism of the Globe, which says that while Mr. Emmerson is demanding the dismissal of conservatives from the public service of Canada he is trying to secure government of this province. The Globe does not understand why Mr. Emmerson should demand the dismismaster of Elgin, while he struggles to induce other conservatives to be members of his own government. It seems reasonable to suppose that a party which can provide good heads of pro-vincial departments might be allowed to hold a village postmastership.

The Globe does not condemn Mr. system. It only date him, from a liberal point of view, to be logical about it. Mr. Ellis reasons that when to turn out conservative officials he should himself cease to ask support for conservative provincial holders.

The New Brunswick liberal con the New Brunswick liberal conservatives are equally logical. They say to Mr. Emmerson: You are making war on our party in dominion affairs. You go out of your way to have conservatives dismissed from federal positions of trust. Since you hold us unfit to manage a small post office or a custom house do not ask us to as less you in coverning this province. sist you in governing this provin It may suit you to have conservatives turned out of federal positions of trust

turned out of federal positions of trust and emolument in order that you may get places for your friends, while you beg for provincial support from other conservatives whose help you need. But that sort of thing does not suit us. You may go on contending that the tories of New Brunswick are rascals, thieves and incapables in all matters of dominion concern, while they are honorable and canable in they are honorable and capable in provincial concerns. For our part we have confidence in ourselves in both spheres, and have no more confidence in your management when you are at Fredericton than we would if you were at Ottawa.

ONE MAN TWO VOTES. Each elector of St. John city will apparently have an opportunity of

casting two votes for or against prohibition next week. Polls are to be opened for the city and for the city and county. As in a parliamentary election, every city voter will also be a voter for the city and county. The purpose of the plebiscite is to

ascertain the view of the people of Canada on an important question.

The preponderance of opinion is supposed to be fearned by counting those who vote yes and those who vote no."
If a man votes "yes" twice he counts If a man votes "yes" twice he counts as two prohibitionists. If he votes "no twice he counts as two antis. If he voes "no" once and "yes" once he does not count at all. In any case the re-

lation of the result and impairs the value of the return.

It is true that the government officers in making up the result may strike out one of the duplicities St. John returns. But if that is done what is the good of taking the two votes? It costs a good deal of money to hold these extra polls, and imposes an additional burden on these will be relieved the collection of the collection of the collection. ditional burden on those who have the duty of attending at the polling places. When the plebiscite bill was before the house a motion was made that in this contest me elector should vote more than once. This motion was remore than once. This motion was rejected by the government and the majority of the house of commons. It is said that in and about Montreal many property owners have voes in five city divisions and some in five or six constituencies near by. The county of York, Ontario, contains six constitu-encies and many electors have votes in them all. It will be seen that St. John city will not be alone in furnishing duplicate votes, though it is the only place where all the electors are asked to vote twice. The amendment in favor of one man one vote should have

THE BRITISH WEST INDIES AND CANADA

The New York Times' corresp at Kingston, Jamalca, says that the movement for annexation to the United States is dead, if ever it had life. and that the people of the British West Indies are turning their attention to the question of annexation to Canada. This disposition does not yet appear to have led to active measures of any kind, but it probably would do so if encouragement were offered from the Canadian and imperial governn ents. So far as the subject has been discussed in the Canadian press. cannot be said that the rossible en-largement of our bounds has been welcomed with warm enthusiasm. The project should receive the full sympathy of the imperial authorities. The home government has the strongest desire to assist the colonies in the West Indies, and is prepared to make considerable contributions in that interest, Only the dread of departing from the traditional feed acparting from the traditional fiscal pol-icy delays the introduction of an imerial tariff which would provide a critish market for West India sugar. If Mr. Mulock's bill had be-come law no member of the present parliament could have been appointed to any position until a year after he ceased to belong to the house of commons. He lettrbawson on August 27th, and came up to White Horse Rapids on the steamer Canadian, and from there on the Nora to Lake Bennett. He then crossed the Chilcoot trail and caught the steamer Discovery at Skagway. The party with whom Mr. Bulyes travelled left Dawson two weeks later than the Wade party, who travelled via St. Mic and got here just a day behind them.
Mr. Bulyea had charge of all matters
coming under the territorial laws
particularly the matter of liquor licenses. He licensed eleven saloons Dawson, and at the first he had s trouble over it with Major Walsh, who claimed that he was the only law in attempt to close up the places licens-ed. Major Walsh used his official po-sition as commander of the Northwest Mounted Police to prevent Mr. Bulyes from carrying out his regulations. The matter was finally placed before the court, and the territorial government's jurisdiction was established. After Mr. Ogilvie gets in and has his counsel together the territorial govern-ment authority will cease, but the re-gulations made by Mr. Bulyea will old good until that time. As far as the country being gold-bearing is concerned, he does not think that it has been over-rated. Sulphur and Dominion creeks have al-ready been proven to be as good as Eldorado and Bonanza. A lot of the new creeks will have to be prospected this fall, and no doubt they will turn out well. Most of the work that is being done now is on the benches, which are turning out well on all the these creeks. Rockers are being used on these creeks, so that a large run of water is not required. The bench claims on Eldorado creek have been old as high as \$40,000 to actual miners. There will be a lot of work done this fall and winter, especially on the new creeks, and it will be perfectly safe to estimate next year's output as double that of this year. Mr. Bulyea expects to continue his journey to Regina tomorrow. He is a native of Gagetown, N. B., a distinguished graduate of the university, and has

Senator King seconded the resolu Senator King seconded the resolu-tion. He commenced by saying he had been a life-long prohibi-tionist, although he had always been a party man. The liberal party have nothing to gain brough the plebiseite. He argued that if a very large ma-jority did not come forward and cast strong vote in favor of prohibition the government would not feel justi-fied in giving prohibition. Every man who is a prohibitionist must be pre-ared to sink every other feeling until after the prohibition of the liquor traffic is effected. The government is not a unit on this question he was sorry to say, and if the voters stay at home then the votes will be taken as against prohibition. If a strong vote is polled in favor of prohibition he would expect the government to grant would expect the government to grant it, otherwise he would no longer sup-port the party.

The discussion on the Northwest mission was spoken upon by Rev. Mr. MacIntyre, followed by Rev. Mr. Townsend on the Grand Ligne mission. These addresses were very interesting. Rev. Mr. Davison then gave a short address, and after music by the choir, the meeting was closed and a short business session was held, when the foreign missions were discussed.

This morning the convention sumed business, with Rev. John Hughes in the chair. The reports on the Northwest and Grand Ligne missions were passed, and afterward the colporteur question was discussed.

The Rev. Mr. Snell read the report from the foreign mission board, which was received without discussion.

A number of other reports were passed, after which the report on obituaries were taken up. Very touching remarks were made in regard to the late lamented Rev. Michael Gross, so highly esteemed in the denomination. A question having arisen as to the nature of the act of incorporation, under which the convention is working, it was stated by the acting president that the act had been submitted dent that the act had been submitted to two attorneys for their opinion. Both had decided that the corporation only was liable for any contracts entered into, and that there was no individual liability on the part of any members or delegates for any obligation resting upon the convention. The act was stated to be in all respects similar to those of the state conventions of the American union. It was afterwards resolved the act of incorporation be printed in the annual; also resolved that sixteen hundred copies of the annual be published and distributed.

METHODIST CONFERENCE.

The Twentieth Century Fund Fully Discussed. hand hand

The Committee on Discipline Report-Difference Between the Methodism of the East and West.

TORONTO, Sept. 12.—Toronto and the surmounding towns and villages were largely
favored with the ministrations of visitors
from a distance, and as far as heard from
the day was profitably spent. The city is
not as quiet as when the last general conference was held, in 1886, for then street
ears had not been introduced. Now they are
running night and day, Sunday and every
other day, and between these and the bicycles
the Toronto Sabbath is far from what it
was once. The world moves, but sometimes
it would seem in the wrong direction.

Between the Methodism of the cast and the
west there is a marked difference. The former is more thoughtful, sedate and orderly,
more correct in speech, more reverent in
manner, and more observant of rule and
system, while the latter has more of rush,
more extravagant in expenditure, more darfing in experiment, and less attentive to the
proprieties. The reason is to be found in
the fact that eastern Methodism so f British
origin, while that of the west is of Ameri-

Every day fresh difficulties are springing in regard to the twentieth century fund, and many think the conference was too heady in adopting the principle of the thins. A vote, practically unanimous, commits the church to the putting it through, but as far as beard from no rich laymen have yet an accounced the sums they propose to sive. The demand of nearly one half the whole amount for educational purposes is account decided opposition, while the granting of \$10,000 to help one burdened church out of the hundred the continued is very unpopular. It is not my business to structure the same to say if such a grant is made—and it may be, for it has gowerted advocates—it will do immense harm. While the delegates from the conference is setting off freworks or indulging in speaking after the spread—agle fashion, they are amongst the most diligent and thorough workers here. It is in committees the rail work is done, and there they are found taking the first in New Westminster.

The news of the first in New Westminster in the layer in the

The news of the fire in New Westminster cast a gloom over the conference. When it was known that our church and parmonage had been destroyed, and that Rev. John Bette had loss all his effects, upon which there was not a dollar of insurance, Rev. Mr. Ladmer stated the case to the conference, and commended the brother and his charge to the kindly consideration of the Methodist people. There were those present this morning that awful day in 1877, when half of St. Joan was swept away and left houseless and homeless on the streets, deprived of their all.

The twentieth century fund is still in the air. The afternoon discussion brought us no neaser a conclusion, and a further adjournment became accessary. One proposition is to allow quarterly boards to appropriate one half of their contributions as they may see fit, and white only handing over fifty percent. of what they raise to the general committee, will be credited as having contributed just double that amount to the fund. That suggestion met with much favor, and may in some form be connected with the scheme suggested by Dr. Griffin. At times today it was anything but pleasant to listen to some of the speakers.

But by far the most exciting time so far was this afternoon, when the committee on discipline brought in their report. Having refused to remove from the discipline the note appended to the general rules which forbids dancing, card playing, going to the theatre and the like, J. S. Mills of Guelph moved in amendment the report be not consurred in, and proceeded to show the inter-

surved in, and proceeded to show the injurieurs effects these prohibitions had upon our
church, and urged the removal of the same
from the discipline. He was followed by J.
T. Moore, who in a most energetic manner
contended for the retention of the prohibition, and denounced these anusements as
suinous both to soul and body. Rev. Mr.
Manning in a kind of cuttious non-committal manner was tired with what he termed
"the plaguey thing," but it was hard to
please him. Rev. Dr. Antilif noped there
would be no lowering of the bars, no coming
down to suit the tastes of the unsaved, that
our business is to "spread Scriptural holimass throughout the land." Mr Gurney
thought that as these things were indulged
in, and the pasters took ne notice of them,
it was useless to keep a law on the state
that was not enforced. We had as much
sight to go to a theatre as another man had
to go to hear a sermon, and it was nobedy's
business what he did in his own house.
Chancellor Burwash thought a statement to
the effect that whatever the New Testament
forbade should be avoided, and what that
meant each man should decide for himself.
Br. Maclaren showed that Mcthodism was
not losing her mambers, that even in Toroute, where this prohibition was said to be
working so dinastrously, we were growing at
a rapid rate, and urged the rejection of the
amendment. But the speech of the day was
by a comparatively young minister, the Rev.
Mr. Grothers. It was calm, earnest and convincing. He showed the origin of this demand was in the growing worldiness of the
thmes, that it came not from the praying
godly ones, but from a class he did to tare
to designate, and closed a powerful appeal
with the words: "I record a vote today that
I may regard with materation when the
denth clouds are gathering on my brow, and
am about to stand before my Masser."
At this stage the debate was further portmond.

As already announced by wice, the tem-

I daresay some of our aged friends will regret the passing away of the time-honored ticket of membership, but a little reflection will show it has outlived its usefulness. When Methodism was a society in the Episcopal church it served a sond justices but shurch it served a good purpose, but when it ceased to be such it could en give the renewal card to all wh

able truths. He wanted to call a spade a spade and a sin a sin, and urged the retention of the word as at first presented. The majority, however, thought differently, and the politer term was adopted.

A proposition was made to make it incumbent upon our people to vote only for those who would pledge themselves to support prohibitory legislation, but instead of being required to do this they were recommended to do so.

"The Methodist church" sounds very pretentious and assumes an importance for the Methodism of Canada to which it certainly has no claim, when it is remembered that in numbers, wealth and territory occupied we cannot compare with the mother Methodism of Great Britain or the sister Methodism of the United States it is little less than laughable to talk about "the Methodist church" and it about "the Methodist church" as it we were alone in the world or stood head and shoulders above all others. And yet when a motion was made this afternoon to add the words "of Canada" to our name, it was voted

The general conference met this evening and prepared a constitution defining the duties and responsibilities of the committee of the church.

TOPONTO, Sept. 16.—Nearly the whole forencon was given up to the consideration of the superannuation matter, which, however interesting to listen to as a discussion, was not of nuch concern to the men from the east, as there is no connection whatever between the fund and our own supernumerary.

A statement in one of the St. John A statement in one of the St. John evening papers concerning the exciting scenes in the meeting of the eastern delegates in re of book room and a western matter created quite a commotion among the members of said meeting, as whatever was done was done quietly, and the proposed amalgamation, as I have already reported, originated in the west and not in the east. The question is, who was the telegramist? The grant of \$1,000 from St. John towards the relief of the sufferers in New Westminster gives much satisfaction here, as evidence of the interest taken in our fellow citizens in the far west.

After a long and anmiated discussion of the extension of the pastoral term, in which the giants of the conference participated, the decision arrived at, and which now becomes the law of the church, is that the minister may on the request of a three-fourths

ray on the request of a three-fourths vote of the quarterly board be appointed for a fourth or fifth year.

Three representatives of the Congregational union of Ontario and Quebec were introduced to and addressed the conference, conveying the greetings of their church to the represent-

The fraternal delegates having gone home, there will probably be after this three sessions a day so as to get through at the earliest possible moment. The conference is showing marked disapproval of lengthy speeches. It should have begun earlier.

retary. Revs. James Woodworth, A. Crews, Dr. Potts and Rev. George J. Bond were elected by a show of hands to the positions of which I have previously spoken. But the tug of war was around the editorship of the Guardian, and the friends of Rev.
Dr. Dewart were anxious to see him
back again in the place he had so
long and abby filled. 'In some way Mr. Courtice has rendered himself unpopular and he came very near being left at home. Had it not been for Dr. Dewart's political campaignfor Dr. Dewart's political campaigning in the last general election, and the indiscreet speech in his interest of Judge Dean, it is probable he would have won. As it was, of the 232 votes cast, Dr. Courtice only received 126; Dr. Dewart 70, and the rest were scattered among a dozen others. He must have felt badly while others were practically elected by a unanimous vote he only had ten votes to spare.

The greater part of the forencen was occupied in the discussion of the superannuation fund of the western octoberences, with which eastern Methodists have no connection and are in no way interested.

TORONTO, Sept. 20.—Nearly all day TORONTO, Sept. 20.—Nearly all day was devoted to the discussion of Indian and Japanese mission work, growing out of the many changes that are being introduced. Much time was spent over the relation to be sustained by the quasi-ordained laymen to the conference, and the claim they might have to recognition, after their time have to recognition, after their time of service among the Indians had expired. The conclusion reached was they could only be admitted to the they could only be admitted to the English work when they had passed the regular examinations and been recommended by the district meeting. It was substantially the same with medical missionaries, with this difference that four years of labor as doctors would count for four years as preachers, but they would have to submit to the usual theological tests. As these missionaries receive a stipulated salary and as all fees are to the handed over to the board, it was contended that some provision should be made for them in case of disability. be made for them in case of disability, and for their families in such a case,

It was decided to have such an officer appointed as soon as possible, and it is hoped a long standing trouble may be classed among the tyegones.

TORONTO, Sept. 19.—In view of the straitened circumstances of the missionary society, it was decided today that during the next quadrennium no minister be received from other churches, as has been occasionally done in the past. Henceforth, for that time at least, no one need apply; the door is barred. It was also decided that no candidates more than are absolutely required shall be accepted, and if any other offer, they are to be placed on the president's list of reserve and their names and addresses forwarded to the general superintenforwarded to the general superintendent, who shall have authority to send them to any part of the entire connection, and no one will be accepted unless he is willing to place himself in the hands of the authority of the church without any conditions as to where he may be sent; also that no candidates for the ministry nor young men having the ministry in view shall be brought into our work from abroad. This will particularly affect New-foundland, as it has largely drawn its young preachers from the mother-

So radical a departure from establish-So radical a departure from established usage called for the strongest opposition. It was contended that as amout one-third of all we raise for missionary purposes was spent on these missions, and the results were not commensurate with the expenditure, a change of administration was demanded. The change asked for would give the board power to organize districts, appoint chairmen, ordain missionaries and create a class of lay agents to whom licenses should be given to marry, baptize and do other ministerial work, and during their residence on the mission.

As this required the three-fourths As this required the three-fourths and other difficulties were being presented, a halt was called, and the matter sent back to the commission.

TORONTO, Sept. 17.—The question to which I alluded in my last as of an unusually serious character, growing out of the absence of so many from the session, was this: The conference decided by a vote of those present to change the boundaries of the Toronto and Montreal conferences. A sharp layman raised the question that as the discipline required for certain changes a two-thirds vote of the members of the conference, and as not one half were present, the decision arrived at was unconstitutional. The president was appealed to for a ruling. This he declined to do, as the committees were was appealed to for a ruling. This he declined to do, as the committees were in session, but gave it as his opinion that two-thirds of all the members, and not two-thirds of those present, was the meaning of the clause. Rev. Dr. Ryckman submitted a motion to the effect that the opinion of the president be not concurred in, but that the words be inderstood to mean two-thirds of those present and voting. At the hour of adjournment no decision

and isolation, but it is scarcely con-ceivable that actual hunger is on experience in the ancient colony, in the families of our ministers.

In discussing the question of transfers, quite a number favored the idea of giving the general superintendent full authority to send men where he deemed best, and the reasons assigned were his knowledge of the needs of the work, and the belief he would act wisely and in the fear of God. All that may be perfectly true, but no man, however wisely and good should man, however wise and good, should man, however wise and good, should have such large powers. The present cocupant of the office might do the right thing, but his successors might not be of the same stamp, and to deprive him of the authority might be no easy matter. Some men act as if they had never read history, or that all its lessons were lost on them, and see mready to deprive up of our presbyterial form of government which so conserves the rights of pasters and people, and constitute another order of class who might very easily, and probably would, become in our case as in the case of some others, the lords over

God's heritage.

Sept. 18.—This is Temperance Sunday in many of the churches, not only in this city but throughout Ontario, and there seems to be no doubt as to the issue. There is a strong but quiet canvass going on in the liquor interest, especially in the country, and the farners are urged to go against the reasure because it would interfere with the sale of their products. Here and there a minister is found among those who will vote "nay," but if they can be induced to go to the polls the great majority of the members of the evangelical churches will vote "yes."

A tremendous thunder storm passed over Toronto early, this morning, accompanied by an unusual rainfall Have heard of no damage done.

THE NOVA SCOTIA PROVINCIAL

which opened at Halifax on September it offers \$16,000 in prizes, being twenty nve per cent, more than is offered this year by any other fair this side of Toronto. While the prizes offered are mostly for the purpose of stimulating the agricultural industry in all its phases, the other great departments of industrial activity and the arts are not by any means being neglected. The main building, ample in its proportions, the transportation building inces. Arrangements have been carefully made and plans rerrected by which the business of the fair will be conducted to the satisfaction of exhibitors and sight-seers. The railway will carry all exhibits to the grounds all facilities for handling with safety and expedition being provided. A competent and experienced lodging bureau will look after the interests of intending visitors, to see that they are properly housed and fed at reasonable rates. The indications at present writing are that there will be an enormou attendance.

The special attractions are of an extersive, varied, novel and even startling character. The trapeze work of the Vaidis, twin sisters, on a revolving wheel, illuminated with 200 incandescent lamps, concluding with an 80 feet dive, is one of the marvels of the century, and has been performed amidst the admiring plaudits of the principal crowned heads of Europe. "The Relief of Lucknow" is an outdoor mili-tary drama on a colessal scale, filled with electrifying situations and introlucing feats of jugglery and legerdemain never before seen in the maritime provinces. "The Royal Canadian Dragoons," whose superb horseman-ship astounded England on the occasion of the Queen Victoria Diamond Jubilee celebration, will be a great feature. There will be balloon ascensions daily and many other great attractions. One of the days of the exhibition week there will be a grand military review on the common. Military bands will furnish high class

The whole week will be filled with interesting shows and attractions that will make a visit to Halifax in the last week of September, 1898, an event long to be remembered among the pleasant

A St. John Schooner Captain Arrested on Suspicion.

WELSHPOOL, Campobello, Sept. 19. -Last Saturday evening a somewhat serious shooting affair occurred about ten o'clock on George R. Batson's wharf. A crowd of men and boys had collected and were standing in groups on that and the adjoining wharf. There are two stores in the immediate vicinity. Two vessels, one from Nova. Scotia and another from St. John, were lying in the slips. It appears that parties had been throwing stones and other missiles at the St. John vesand other missiles at the St. John vessel for several evenings. Saturday night, at the above named time, while Mr. Snow of the Nova Scotia vessel was distributing apples to a number of boys and young men standing near his vessel, a shot was fired among them. The gun fired had been loaded with small shot. Edward North, a lad of sixteen, was struck in the face and arm, Clarence Lank in the lip. Godfrey Calder, Mr. Snow, jr., Albert Lank, Medley McLennan and Wm. Flockton, jr., were also struck by Godfrey Calder, Mr. Snow, jr., Albert Lank, Medley McLennan and Wm. Flockton, jr., were also struck by stray shots. None, however, was seriously hurt but Edward North. Dr. Williams extracted several shot, and he is doing as well as can be expected. It is believed he will recover. The master of the St. John vessel was arrested on suspicion, and will be tried before Magistrate Byron on Wednesday.

RICHIBUCTO, Sept. 16.—William McWilliams, father of Thomas Mc-Williams, the well known lumberman of Mill Branch, died today, aged

ninety-one years. SUSSEX, Sept. 18.—The handsome rectory building which was occupied by Rev. Father Savage, P. P., and his sister, Mrs. Chisholm, on Ward's Creek road, was burned to the ground this norning. The fire was first discovered near the chimney in the ell of the house at about 11 o'clock, and which, owing to the dry weather and a strong wind, soon spread to the main build-ng. Fortunately the people were about assembling for worship in the church nearby and by their saved the well-stocked barn and other buildings from being burned also. A good deal of the furniture and Father Savage's library were saved. The fire no doubt had its origin from a defective flue in the ell. It is understood that the burned building was

DORCHESTER, Sept. 17.—At ten o'clock this morning John Fitzsimmons and wife of Irishtown road, parish of Moncton, were brought up for trial here, before Justice W. Hazen Chapman, charged with keeping a house of ill fame, and at one o'clock, before the same justice, Mrs. Thadeus Bow-ser and Mrs. Minnie Oulton were brought for trial for being inmates of the Fitzsimmons house. Charles E. Knapp, clerk of the peace, appeared for the prosecution, and Geo. P. Thomas represented the parties charged. By reason of the non-appearance of witnesses no progress was made in the first named case, and the prisoners were allowed to go on their own recognizance to appear on Saturday next. On the trial of Mrs. Bowser and Mrs. Oulton, several witnesses were examined, but it was also adjourned until Saturday in order to secure more evidence. The interestng features of the trial were the controversies which frequently took place between the learned counsel, and al-though at times hardly relative to the case, they were none the less exciting and instructive.

The Barker house stables were almost totally destroyed by fire between 5 and 6 o'clock yesterday morning. The fire broke out in the hay loft and was not discovered until considerable headway had been made. There were 28 horses in the stables, all of which were got safely out. All the carriages and most of the sleighs were also saved, but a large quantity of hay and oats, a number of buffalo robes and a lot of harness were destroyed. Loss on the building, which is owned by the Central Fire Insurance company, is about \$1,500; insured in Phoenix, while F. S. Williams, proprietor of the business, estimates his loss at \$600; insured in the Atlas. The fire consumed the building with great rapidity, and only the fact that there was not a breath of wind, and that the roofs of the adjoining buildings were wet with last night's rain, towere wet with last night's rain, to-gether with the especially well direct-ed efforts of the firemen, saved a big

The Sins That Beset the End of the Century.

God Comes Before Man, Says Dr. Talmage.

The Prevalence of Blasphemy, The Sins of City Life.

WASHINGTON, Sept. 18.—This arousing discourse by Dr. Talmage will excite interest by the manner in which it asails some of the great evils nov abroad. The subject is "Enemies Overthrown," and the text Psalms lxviii., I, 'Let God arise, let His enemies be scattered."

A procession was formed to carry the ark, or sacred box, which, though only 3 feet 9 inches in length and 4 feet 3 inches in height and doubt, was the symbol of God's presence. As the leaders of the procession lifted this ornamented and brilliant box by two goldens and stated for the procession in the symbol of the en rings and started for Mount Zion all the people chanted the battle hymn of my text, "Let God arise, let His enemies be scattered."

enemies be scattered."

The Cameronians of Scotland, outraged by James I., who forced upon them religious forms that were offensive, and by the terrible persecution of Drummond, Dalziel and Turner, and by the oppressive laws of Charles 1. and Charles II., were driven to proclain against tyrants and went forth to fight for their religious liberty, and the mountain heather became red, with carnage, and at Bothwell bridge and Aird's Moss and Drumclog the battle hymn and the battle shout of those glorious old Scotchmen was the text I have chosen, "Let God arise, let His have chosen, "Let God arise, let His enemis he scattered."

What a whirlwind of power was Oliver Cromwell, and how with his soldiers, named the "Ironsides," he went from victory to victory! Opposing enemies melted as they looked at them. He dismissed parliament as easily as a schoolmaster a school. He pointed his finger at Berkerley castle, and it was taken. He ordered Sir Ralph Hopton, the general, to dismount, and he dismounted of Sec Cromwell marching on with his army and hear the battlecry of the "Ironsides," loud as a storm and solemn as a death-knell, standards reeling before it and knell, standards reeling before it and cavalry norses going back on their haunches, and armies flying at Mars-ton Moor, at Winceby Field, at Nase-

WHAT BATTLECRY? So you see my text is not like a netimes see hung up in a parlor a sword that was never in battle and only to be used on general training day, but more like some weapon carefully hung up 'n vour home, telling its story of battles, for my text hangs on holy wars of 3,000 years in which it has been carried, but still as keen and mighty as when David first unsheathed of God, and in all styles of reformatory work, what we most need now is a hattlevry. We raise our little standard and put in it the name of some man who only in a few years will cease to live. We go into contest against the armies of iniquity, depending too much on human agencies. We use for a battlecry the name of some brave Christian reformer, but after awhile that reformer dies or gets old or loses his cours is shad then we take another battlecry, and this time perbaps we put the name of some one who betrays the cause and sells out to the enemy. betrays the cause and sells out to the enemy. What we want for a battle-cry is the name of some leader who will never betray us and will never surrender, and will never die.

All respect have I for brave men and women, but if we are to get the victory all along the line we must take the hint of the Gideonites, who wiped out the Bedouin Arabs, commonly called Midianites. These Gideonites had a glorious leader in Gideon, but what was glorious leader in Gideon, but what was the battlecry with which they flung their enemies into the worst defeat in-to which any army was ever tumbled? It was, "The sword of the Lord and of Gideon." Put God first, whoever you put second. If the army of the American Revolution is to free America, it must be, "The sword of the Lord and of Washington," If the Germans want to win the day at Sedan, it must be, "The sword of the Lord and Von Moltke." Waterloo was won for the English because not only the armed men at the front, but the worshippers in the cathedrals at the rear were cry-ing. "The sword of the Lord and of

The Methodists have gone in triumph across nation after nation with the cry "The sword of the Lord and of Wes ley." The Presbyterians have from victory to detory with the The sword of the Lord and of John Knox." The Baptists have conquered millions after millions for Christ with millions after millions for Christ with the cry, "The sword of the Lord and of Judson." The American Episopalians have won their mighty way with the cry, "The sword of the Lord and of Bi-hop M'Ilvaine." The victory is to those who put God first. But as we want a battlerry suited to all sects of eligionists and to all lands, I nominate as the battlecry of Christendom in the approaching Armageddon the words of my text, counded refore the ark as it was carried to Mount "Let God arise; let its starries to

As far as our finite mind can judge, it seems about time for God to rise. Does it not seem to you that the abominations of this earth have gone far enough? Was there ever a time when sin vas so defiant? Were there ever before so many fists lifted toward God, telling Him to come on if He dare? Look at the blassberry abroad! Whet Look at the blasph-my abroad! What towering profanity! Would it be possible for anyone to calculate the number of times that the name of the Almighty God and of Jesus Christ are every day taken irreverently on the

forbidden by the law as theft or arson or murder, yet who executes it? Profanity is worse than theft or arson or murder, for these crimes are attacks on humanity; that is an attack on God. THE CURSER CURSED.

This country is pre-eminent for blasphemy. A man travelling in Russia was supposed to be a clergyman. "Why do you take me to be a clergyman?" said the man. "Oh," said the The crime is multiplying in intensity. God very often shows what He thinks of it, but for the most part the fatality is hushed up. Among the Adirondacks I met the funeral procession of dacks I met the funeral procession of a man who two days before had fallen under a flash of lightning, while boasting after a Sunday of work in the fields that he had cheated God out of one day anyhow, and the man who worked with him one the same Sabbath is still living, but a helpless, invalid under the same flash.

Years ago in a Pittsburg prison two

nen were talking about the Bible and Christianity, and one of them. Thompson by name, applied to Jesus Christ a very low and villianous epithet, and as he was uttering it he fell. A physician was called, but no help could be given. After a day lying with distended pupils and palsied tongue he lassed out of this world. In a cemetery in Sullivan county, in New York state, are eight headstones in a line, and all are alike, and these are the facts: In 1861 diphtheria raged in the Christianity, and one of them, Thompfacts: In 1861 diphtheria raged in the village, and a physician was remarkably successful in curing his patients. So confident did he become that he boasted that no case of diphtheria ould stand before him and finally lefied Almighty God to produce a case of diphtheria that he could not cure. His youngest child soon after took the ase and died, and one child after disease and died, and one child after another, until all the eight had died of diphtheria. The blasphemer chal-lenged Almighty God, and God ac-cepted the challenge. Do you think that because God has been silent in your case, O profane swearer, that he is dead. Is there nothing now in the peculiar feeling of your tongue, or nothing in the numbness of your brain that indicates that God may come to avenge your blasphemies, or is already avenging them? But these cases I have noticed, I believe are only a few cases where there are hundreds. Families keep them quiet to avoid the horrible conspicuity. Physicians suppress them through professional confidence. It is a very, very, very long roll that contains the names of those who died with blasphemies on their lips.

Still the crime rolls on, up through parlors, up through chandeliers with ights all ablaze and through the pictured corridors of clubrooms, out through busy exchanges, where oath meets oath, and down through all the aunts of sin, mingling with the rattling dice and crackling billiard balls, and the laughter of her who hath forgotten the covenant of her God, and round the city and round the continnt and round the earth a seething. boiling surge flings its hot spray into the face of a long suffering God, and the ship captain curses his crew, and ler the stone that bruises his foot or the mud that soils his shoes, or the defective timepiece that gets him too late to the rall train. I arraign profane swearing and blasphemy, two names for the same thing, as being one of the gigantic crimes of this land, and for its extirpation it does seem as if it were about time for God to arise. THE DAY OF DRINK

Then look for a moment at the evil of drunkenness. Whether you live in Washington or New York or Chicago or Cincinnati or Savannah or Boston or in any of the cities of this land, count up the saloons on that street as compared with the saloons five as compared with the saloons five years ago, and I see they are growing far out of proportion to the increase of the population. You people who are so precise and particular lest there should be some imprudence and rashness in attacking the rum traffic will heve your some some night pitched in-to your tront door dead drunk, or your daughter will come home with her children because her husband has by children because her husband has by strong drink been turned into a demoniac. The drink fiend has despoiled whole streets of good homes in all our cities. Fathers, brothers, sons on the funeral pyre of strong drink! Fasten tighter the victims! Stir up the flames! Pile on the corpses! More men, women and children for the sacrifice! Let us have whole generations on fire of evil habit, and at the ound of the cornet, flute, harp, sackbut, psaltery and duscimer let all the people fall down and worship King Alcohol, or you shall be cast into the fiery furnace under some political plat-

fratricide, the parricide, the matricide, the usorleide, of the century. Yet un-der what innocent and delusive and mirthful names alcoholism deceives mirthful names alcoholism deceives the people! It is a "cordial." It is "bitters." It is an "eye opener." It is an "appetizer." It is a "digester." It is an invigorator." It is a "settler." It is a "nightcap." Why don't they put on the right labels—"Essence of Perdition," "Conscience Stupifier," "Five Drams of Heartache," "Tears of Orphanage," "Blood of Souls." "Scabs of an Eternal Leprosy," "Venom of the Worm that Never Dies?" Only once in awhile is there anything in the title of liquors to even hint their atrocity, as in the case of hint their atrocity, as in the case of "sour mash." That I see advertised all over. It is an honest name, and anyone can understand it. "Sour mash!" That is, it makes a man's mash!" That is, it makes a man's disposition sour, and his associations sour, and his prospects sour, and then it is good to mash his body and mash his soul, and mash his business, and mash his family. "Sour mash!" One honest name at last for an intoxicant! But through lying labels of many of the apothecaries' shops, good people, who are only a little under tone in health and wanting some invigoration. health and wanting some invigoration have unwittingly got on their tongue the fangs of this cobra that stings to

customers. And it is a treat on their coming to town, and a treat while the bargaining progresses, and a treat when the purchase is made, and a treat when the purchase is made, and a treat as he leaves town. Others, to drown their troubles, submerge themselves with this worst trouble. Oh, the world is battered and bruised and blasted with this growing evil! It is more and more entrenched and fortified. They have millions of dollars subscribed to marshal and advance the alcoholic forces. They nominate and elect and govern the vast majority of the officeholders of this country. On their side they have enlisted the mightiest political power of the centuries, and behind them stand all the myrmidons of the nether world, satanmyrmidons of the nether world, satanmyrmidons of the nether world, satanle, Apollyonic and diabolic. It is beyond all human effort to overthrow
this Bastile of decanters or capture
this Gibraltar of rum jugs. And while
I approve of all human agencies of
reform I would utterly despair if we
had nothing else. But what cheers
me is that our best troops are yet to
come. Our chief artiMery is in reserve.
Our greatest commander has not yet Our greatest commander has not yet fully taken the field. If all hell is on their side, all heaven is on our side. Now "Let God arise, and let His enemies be scattered."

Then look at the impurities of these

great cities. Ever and anon there are in the newspapers explosions of soci life that make the story of Sodo quite respectable, "for such things."
Christ says, "were more tolerable for
Sodom and Gomorrah" than for the
Chorazins and Bethsadlas of greater light. It is no unusual thing in our cities to see men in high positions with two or three families, or refined ladies willing solemnly to marry the very swine of society if they be wealthy. The Bible all aflame with denuncia tion against an impure life, but many of the American ministry uttering not one point bank word against this in up his church pew. Machinery organ-ized in all the cities of the United States and Canada by which to put yearly in the grinding mill of this iniquity thousands of the unsuspecting of the country farmhouses, one pro curess confessing in the courts that she had supplied the infernal market with 150 victims in six months. Oh, for 500 newspapers in America to swing open the door of this lazar house of social corruption! Exposure must come before extirpation.

THE CITY OF SINDI While the city van carries the scum of this sin from the prison to the police court morning by morning it is full time, if we do not want high American life to become like that of the court of Louis XV., to put millionaire Lotharies and the Pompadours of your brownstone palaces into a van of popular indignation and drive them out of respectable associations. What prospect of social purification can ing places it is usual to see a young woman of excellent rearing stand and imper and giggle and roll up her eyes sideways before one of those first class satyrs of fashionable life, and on the ballroom floor join him in the dance, the maternal chaperon meanwhite beaming from the window on the scene? Matches are made in heaven, brimstone indicates the opposite

cities. By some these immoralities are called peccadillos, gallantries, eccentricities, and are related to the realms of jocularity, and few efforts are being made against them. God bless the 'White Cross' movement, as it is called—an organization making a mighty assault on this evil! God forward the tracts on this subject distributed by the religious tract societies of the land! God help parents in the great work they are doing in trying to start their children with pure principles! God help all legis-lators in their attempt to prohibit this

THE DAY OF JUDGMENT. But is this all? Then it is only question of time when the last vestige question of time when the last vestige of purity and home will vanish out of sight. Human arms, human pens, human voices, human talents are not sufficient. I begin to look up. It listen for artillery rumbling down the sapphire boulevards of heaven. I watch to see if in the morning light there be not the flash of descending scimitars. Oh, for God! Does it not seem time for His appearance. Is it not time for all lands to cry out, "Let

God arise and let His enemies be scat-I got a letter asking me if I did not think that the earthquake in one of our cities was the Divine chastisement on that city for its sins. That letter I answered by saying that if all our American cities got all the punishment they deserved for their horrible impurities the earth would long ago have cracked, opening crevices transcontinental and taken down all our cities

so far under that the tip of our church spires would be 500 feet below the sur-face. It is the Lord's mercies that we Not only are the affairs of this world so a-twist, a-jangle and racked that there seems a need of the Divine appearance, but there is another reaappearance, but there is another reason. Have you not noticed in the history of this planet God turns a leaf about every 2,000 years? God turned a leaf and this world was fitted for human residence. About 2,000 more years pased along, and God turned another leaf, and it was the deluge. About 2,000 more years passed on and it was the Nativity. Almost 2,000 more years passed by, and He will probably soon turn another leaf. What it shall be I cannot say. It may be the demolition of all these monstrosities of turpitude and the establishment, of turpitude and the establishment of righteousness in all the earth. He can do it, and He will do it. I am as contident as if it were already accomplished. How easily He can do it my text suggests. It does not ask God to hurl a great thunderbolt of His power, but just to rise from the throne on which He sits. Only that will be necessary. "Let God arise!" arise!" REDEMPTION.

It will be an exertion of omnipot ence. It will be no bending or brace ing for a mighty lift. It will be no sending down the sky of the white horse cavalry of heaven or rumbling war charlots. He will only arise. Now He is sitting in the majesty and

attence of His reign. He is from His ness and impurity and fraud and Sab-bath breaking, and when they have done their worst and are most surely organized He will bestir Himself and say: My enemies have denied Me long enough, and their cup of iniquity is full. I have given them all oppor-tunity for repentence. This dispen-sation of patience is ended, and the faith of the good shall be tried no longer." And now God begins to rise, and what mountains give way under His right foot I know not; but, standing in the full radiance and grandeur of His nature, He looks this way and that, and how His enemies are scat-tered! Blasphemers, white and dumb, reel down to their doom, and those who have trafficked in that which destroys the bodies and souls of men and families will fly with cut foot on the down grade of broken decanters, and the polluters of society that did their bad work with large fortunes and high social sphere will overtake in their descent the degraded rabble of the unorground city ife as they tumble over the eternal precipices, and the world shall be left clear and clean for the friends of humanity and the worshippers of Almighty God. The last tthorn plucked off, the world will be left a blooming rose on the bosom of that Christ who came to gardenize it. The earth that stood snarling with its tigerish passion, thrusting out its rag-ing clays, shall lie down a lamb at the feet of the Lamb of God, who took

away the sins of the world.

And now the best thing I can wish for you, and the best thing I can wish for myself, is that we may be found His warm and undisguised and enthu-siastic friends in that hour when God shall rise and His enemies shall be scattered.

SUNDAY SCHOOL COLUMN.

GLOUCESTER COUNTY SUNDAY SCHOOL WORKERS.

The annual convention of Gloucester County Sunday School Association was held in Bathurst on Thursday, Sept. 15th. It had been preceded by several days of work through the county by the field secretary. The attendance was a thoroughly representative one, and its proceedings of a character practical for their work. After opening devotions, led by the field secretary, John Brown, in the chair, made a few opening remarks.

Miss Edith J. Shirren was prese

in place of Miss Lucas, and by motion was welcomed to the convention.

The first conference was on the condition of the work, and one new school was reported. This neighborhood had been the subject of careful inquiry one year ago, and is an illustration of how associated Christians can encourage each other to fill every available part each other to fill every available part of their county with a Sunday school. Two schools in the county were reported not evergreen. These are to be encouraged, so that then the county may be a banner county in this respect. It is now a bright example to some more favorably circumstanced. stanced.

A conference on normal work filled the remainder of the morning section was of a me will be renewed and new ones formed at an early date. The norming session was held in the Presbyterian Sunday school hall.

The second session was held in the Methodist church, and was opened by Rev. A. F. Thompson. After the reading of the minutes, Mrs. C. Harris of Ontario gave an address on Food for Lambs of the Flock. It was full of good lessons, pointed by apt

illinstration.

The strength of the session was given to a conference on the Sunday school programme. This was conducted by Miss Shirren, who Hiberally used the blackboard. This was of deep interest, and many joined in it.

The nominating committee having sat between sessions, nade a partial report and asked leave to sit again.

At 7.30 the third session commenced. Rev. Wm. Harrison occupied the chair, by request of the president, who had to leave.

Unfinished business included the report of the nominating committee; also the election of county delegates to the provincial convention.

to the provincial convention.

The new officers are: John Brown, president; Mitchell Grant, secretary; superintendent home department, Mrs. Shirley; superintendent normal department, Rev. Wm. Harrison; super-intendent primary department. Miss Kyle; vice-presidents for districts, R. Kyle; vice-presidents for districts, R. Hickson for the east coast district, Mrs. Ferguson for Bathurst and Middle River, Mr. Vance for Tetagouche, and Mrs. McCurdy for Belledune; additional members of the executive, Rev. A. F. Thompson, Miss Ida Kerr and Mrs. McLean.

Miss Shirrest addressed the conven-tion on Supplementary Lessons. In the afternoon she had showed what there might be in a graded school; but she now showed what might be and needed to be done in a school not graded, and however weak and small. The questions were answered and the final address given by Mr. Lucas. the final address given by Mr. Lucas.
The county workers said that this convention was an advance on those previously held by them.
Kings county Sunday school convention opened at Sussex yesterday afternoon, and is continuing today.
Westmorland county convention opens at Salisbury on the afternoon

opens at Salisbury on the afternoon of the 22nd and closes on the afterroon of the 23rd.

The programme for the provincial convention at Moncton is progressing. Professor Hamill will again be wetcomed by the Sunday school workers of this province.

Considerably over one hundred persons took the recent Sunday school normal class examination. Truly the work is growing.
