Baltimore has had its "Black Friday," as well as New York. This time it last, the following houses went under with liabilities ranging between two and three millions of dollars:-

Th. de Saussure, and are now able to furnish some further details.

Professor Soret, in delivering a most interesting report, passed in review the operations of the Industrial section, in reference to Commerce, 'aying great stress upon the competition that has taken place in the manufacture of chronometers. This competition was instituted with the object of testing the workmanship and precision of obronometers turned out by Gene wese manufacturers, and none but those adopted for pocket use were admitted. They were deposited in charge of the authorities at the Observatory, and underwent the most searching ordered possible to be applied to pocket instruments of this class. The jury specially retained to decide the difficult question 2s to whom to award the palm of excellency unanimously decided in favor of Messrs, J. M. Badollet & Co. This firm having carried off the sole prize by exhibiting a chronometer which fulfilled in the highest degree every condition required, crowned their first success by gaining honorable mention for two other chronometers. The allusion to this triple honor was received with enthusiastic app'ause, and Professor Humbert, President of the Fine Arts Section, closed the meeting with a happy and humorous dissertation upon subjects connected with this department.
