DEFINITION OF LIBERTY.

"The liberties of nations are from God and nature, not from kings .- Algernon Sidney.

Many definitions have been given of liber y. Most of these deserve no notice what-ver; but there are two which, having beer adopted by celebrated men, merit considera-tion. The first of these is the definition o tión the Roman lawers, that liberty is the power of doing that which is not forbidden by the I'he other is, that liberty is the powtaws. er of doing all that we ought to be allowed to do. Of these two, it appears to me, the firs includes too little, and the second too much It liberty consists in being able to do what the law permits, a despotism, established by law, is a free government. Napoleon, for instance, scarcely ever violated in France the

laws he had male; these laws, however were tyrannical. Bt if no country is free except where no unjust prohibitions and no un necessary penal laws are found, it is impossi ble to say here has ever existed a free gov What shall we say, for instance ernment. to that law of the Twelve Tables, by which was enacted that insolvent debtors should be given up to their creditors, to be bound in letters and cords; and which, though no made slaves, they were liable to be treated with the same or greater harshness? Indeed what shall we say to the freedom of any de mocracy ; for, have they not all passed laws measured by the rule of their own passions? Even England whose giverning power is formed expressly from a composition of con-flicting forces, has admitted on her statuebook many an unjust and cruel enacument, A complete definition of liberty is perhaps impossible. Nor is liberty all of one kind --A nation may have one kind and be deprived
