1867. First invention of the Typewriter now known as the Remington Standard. A few machines made by hand during this and the following years.
1873. The repeated experiments of the inventors having somewhat improved upon the first crude attempts, it was brought to the Remington factory, at Ilion, N. Y.
1874. After more than a year of painstaking labor on the part of many able mechanical experts, the first Remington-made machines were put upon the market.
1880. Six years after, only 1,000 machines had been sold. The public were slow to realize the value of the invention.
1882. The number increased to 2,800 machines.
1885. 5,000 machines were sold this year. It grew in popular favor. In
1890. Sales had risen to 20,000 machines per annum.
1892. Found a production of 100 machines per day inadequate to supply the still rapidly increasing demand. We have planned extensive additions to our factory, to enable it to keep pace with all demands.

## INTRODUCTORY.

The London City and Middlesex County Directory for 1893, now presented to the subscribers, contains in the city alphabetical portion of the book, 16,590 names, as against 15,635 in 1892.

This ought to be satisfactory, inasmuch as it indicates, not only a very marked increase in the population during the last twelve months, but it is also evidence of a more than ordinary close canvass for names. Another evidence of the increase is the number of vacant houses, which are only 330 against 550 a year ago.

While duly acknowledging the courtesy almost universally extended to our representatives in the furnishing of the required information, we are sorry to have to state that the patronage of the book, notwithstanding the evident growth of the city, has not increased accordingly; but, on the contrary, not only falls short of meeting the outlay, but also fails even to come up to that of previous years. In no other city that we know of is this the case. Notwithstanding this serious drawback, we have spared no expense necessary, as we think the appearance and contents of the book will bear evidence, to add to its thoroughness, reliability and general get up, in the hope, which we trust future patronage will justify, that London citizens generally will yet acknowledge our efforts, in the only practical way to do so, namely by an increased steady yearly subscription list. Otherwise it will be impossible to continue to issue such a work as we now offer.

### INSTRUCTIONS TO KEY-HOLDERS.

Upon ascertaining that there is a fire in the vicinity of your Box, unlock the outside door and pull it wide open. Then listen, and if you do not hear the little gong inside striking, proceed at once to give the alarm as directed above. If you do hear the gong striking wait until it has entirely ceased repeating its number of rounds before you attempt to pull the hook or knob.

If after pulling the box as directed, you do not hear the little gong inside striking or the Box working, shut the door and go to the nearest Telephone to send in the alarm.

Do not attempt to remove your key from the lock as you cannot do so without injuring the lock or breaking the key. Some member of the Fire Department will release and return it to you.

Never open a Box except for the purpose of giving an alarm. Never give an alarm for a fire outside of the City limits, or for a fire which is a long distance away (unless you are on a line between it and the Fire Station) or for a chimney fire. All alarms should be sent in from the Box nearest to the fire. If possible always wait until the firemen arrive and direct them to the fire if it is not visible. Always close the door of the Box before leaving it.

Keep your key in a place where you can get it quickly when required and where it will be out of the reach of children and strangers. If you intend to remove from the house you are occupying, please return your key to the nearest Fire Station.

### NOTICE TO THE PUBLIC.

Any responsible citizen can obtain a key by applying at the nearest Fire Station.

Keys will be kept at houses in the immediate neighborhood of the Boxes.

Any one having a Telephone can use it for the purpose of giving an alarm for a fire.

Ten strokes on City Hall Bell or on the gongs, followed by the number of the Box, will denote a second alarm for the same fire, and call all the apparatus of the Department.

Two strokes on Bell or gongs, (after an alarm is given) will signify that the fire is out.

Parties erecting houses or scaffolding, moving houses or cutting trees, must on no account interfere with our wires, poles or boxes. By leaving notice at the nearest Fire Station, all necessary alterations will be promptly attended to. Citizens will confer a favor by immediately reporting at the

nearest Fire Station may break or damage to car line or Boxes.

**DIRECTIONS FOR COUNTING THE SIGNAL ON THE BELL WHEN A BOX IS PULLED.**

Suppose Box 34 is pulled, you do not get 34 blows on the gongs or bell, but first you get three distinct blows, which will represent the tens, or 30; then a pause of five seconds, when four blows will be given, representing the units, or four thus } 30 4  
111-1111=34.  
Single numbers up to nine, are struck consecutively or continuously, without any break, until the whole number is given. The number of the box pulled will be repeated four or five times with an interval between.
