Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

The copy filmed here has been reproduced thanks to the generosity of:

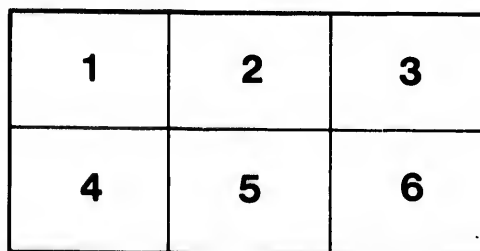

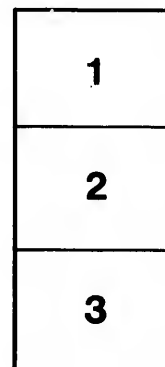

Ralph Pickard Bell Library
Mount Allison University

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol ➡ (meaning "CONTINUED"), or the symbol ▼ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Ralph Pickard Bell Library
Mount Allison University

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole ➡ signifie "A SUIVRE", le symbole ▼ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

WEATHER GUIDE.

The following Table (the result of many years' actual observation) is ascribed to Dr. Herschel. It is constructed upon a due consideration of the attraction of the Sun and Moon in their several positions respecting the Earth, and serves to show what kind of weather will most probably follow the entrance of the Moon into any of her quarters:—

Moon.	Time of Change.	In Summer.	In Winter.
If New Moon, First Quarter, Full Moon, or Last Quarter, happens	Between midnight & 2 A. M.	Fair.	Hard Frost unless wind be S. or W
	" 2 and 4 A. M.	Cold with showers.	Snow and stormy.
	" 4 " 6 "	Rain.	Stormy and rainy.
	" 6 " 8 "	Wind and rain.	Stormy.
	" 8 " 10 "	Variable.	Rain if wind W.
	" 10 " 12 "	Showery.	Snow if E.
	At 12 Noon, and to 2 P. M.	Very rainy.	Cold and high wind.
	Between 2 and 4 P. M.	Variable.	Snow or rain.
	" 4 " 6 "	Fair.	Fair and mild.
	" 6 " 8 "	Fair if wind be N. W.	Fair.
If New Moon, First Quarter, Full Moon, or Last Quarter, happens	" 8 " 10 "	Rainy if S. or S. W	Frosty if wind N or N
	" 10 " midnight.	Ditto. Ditto.	E. Snow if S or S W
		Fair.	Ditto. Ditto.

The nearer midnight any of the Moon's changes occur, the finer will be the weather during the succeeding week; the nearer noon any of those changes happen, the more foul and wet will be the weather that will follow.

EXPLANATORY.

Annular Eclipse—An Eclipse of the Sun in which its whole disk is covered by the Moon, except a bright outer ring.

Aphelion—that part of a planet's orbit *farthest* from the Sun.

Perihelion—that part of a planet's orbit *nearest* the Sun.

Elongation—angular distance of a planet from the Sun, as seen from the Earth.

Penumbra—a partial shadow resulting from the diminished light of the sun to the earth or moon, during a solar or lunar eclipse, appearing as partial.

Declination—the distance of a heavenly body from the equinoctial line

Ecliptic—the plane of the earth's orbit nearest the sun.

☾ Apogee—greatest distance from the earth.

☾ Perigee—least distance from the earth.

☐ Quadrature. ☿ Opposition. ☿ Conjunction.

♊ Ascending node. ♊ Descending node.

The letters M. A., m. a., denote *morning* and *afternoon*; h. m. s., hours, minutes and seconds.

N. north, E. east, ° Degrees,

S. south, W. west, ' Minutes of Arc.

" Seconds of Arc.

The Astronomical day is reckoned from Noon to Noon through the 24 hours. Thus July 21, 9h. is 9h. A. of July 21st, and July 21st, 15h. is 3h. M. of July 22.

The Sun's Declination and Equation of Time are given for Noon at Halifax, Apparent Time, *i.e.* when the True Sun is on the meridian.

The Moon's Southing is given in Astronomical Time for the Meridian Passage at Halifax; and her declination when on that meridian.

Both the rising and setting of the Moon are given for every day in the year.

THE TIDES.

The Tides in the Calendar given for the Ports mentioned, are the tides that occur during the day. In the Tide Table (page 57) will be found constants for finding the time of High Water at each of the places mentioned in the Table.

The Times of High Water given in the Calendar have been corrected for the varying distance of the Moon from the Earth, and also for her angular distance from the Sun. They can now be depended on as accurate to at least the same degree as the Admiralty Tide Tables.

It will sometimes be found that when a constant is added to the time of High Water at Halifax, the sum exceeds 12 hours; in this case subtract 12 hours from the sum, and the remainder will be the time of High Water at the required port on the following afternoon or morning, according as the Tide at Halifax was a morning or afternoon Tide.

It will sometimes be found that a constant to be subtracted is greater than the Time of High Water at Halifax; in this case add 12 hours to the time at Halifax, subtract the constant, and the remainder will be the time of High Water at the required Port for the previous Morning or Afternoon, according as the tide at Halifax was an Afternoon or Morning Tide.

In this Almanac all the times except for Moon's Southing are Mean Time at Halifax, i. e., Civil Time. The Moon's Southing is given for Astronomical Time at Halifax.

Standard Time is 15 minutes earlier than Halifax Mean Time, and the Railway Time one hour later than Halifax Standard Time.

WHY WE HAVE LEAP-YEARS.

It arises from the fact that the year does not consist of an exact number of days. The length of the day and that of the year are the measures of the motions of the earth. The globe we live on moves in two ways. It turns itself round like a spinning top, and at the same time it goes steadily forward like a bullet shot from a gun. It turns itself once completely round in twenty-four hours as shown by the clock; this amounts to the time we call a day. Its forward or onward motion carries it round the sun in a path that is nearly a circle: the time it takes to go completely around we call a year. The first motion gives us day and night following each other in turn (the word "day" here having now a different meaning, namely, not twenty-four hours, but the time of daylight.) The second motion gives us days (that is, periods of daylight) growing gradually longer and then gradually shorter, one end of the earth turning more towards the sun for half the time and the other end for the other half; and this brings us summer and winter and the other seasons. Now the length of the year is found to be nearly 365 $\frac{1}{4}$ times the length of the day of 24 hours; that is, the year is 365 days long and nearly 6 hours more. It is these 6 hours that give us our leap years, and it is the "nearly" that we find the reason for 1909 not being one of their number.

SHORTHAND INSTITUTE,

ODD FELLOWS' HALL, - ST. JOHN, N. B.

IN this College, students (ladies or gentlemen) obtain a
THOROUGH COMMERCIAL EDUCATION.

They are fitted for all kinds of office work, by doing just such work as will be required of them when they enter a Merchant's or Accountant's office.

The thoroughness and comprehensiveness of our Courses of Study are such that the holders of our Diplomas enjoy pre-eminent standing among business college graduates, making them singularly successful in obtaining and holding positions, or conducting business for themselves.

Each department of the College—**BUSINESS, SHORTHAND, TYPEWRITING, PENMANSHIP**—is under the direct supervision of one of the Principals, whose entire time, energy and skill are devoted to the interests of his students.

NO VACATIONS. Students can enter at any time. **SPECIMENS OF PENMANSHIP, and CIRCULARS** containing full particulars respecting Terms, Courses of Study, etc., mailed to any address.

TO FIND THE LATITUDE BY THE MERIDIAN ALTITUDE OF THE SUN.

The Sun's Declination in the Calendars of the Month are for the Meridian of Halifax, N. S., but will serve with sufficient accuracy to obtain the Latitude by a Meridian Altitude of the Sun on any part of the West of Nova Scotia and New Brunswick; and on the coast of Maine and Massachusetts in the United States.

RULE.—At noon note the Altitude of the Sun by a sextant, or quadrant. Add 12 miles to that Altitude to obtain the true Altitude. Subtract the true Altitude from $90^{\circ} 0'$, and you will have the Sun's Zenith distance which you will name North, as the Sun will always bear to the South at noon on that coast.

Under the Zenith distance place the Sun's Declination. If the Declination and Zenith distance are of the same name their sum will be the Latitude. If they are of different names their difference will be the Latitude.

EXAMPLE.—1895, April 7th, at noon, off Mt. Desert Rock, Coast of Maine, U. S. The observed Altitude of the Sun was $52^{\circ} 52'$ bearing South. Required the ship's Latitude.

JANUARY.—The farmer who exercises forethought in the choice of crops rarely has a bad season; of our more important crops, Indian Corn, Potatoes, and others of Southern origin, do best in a hot season, while oats, grass, turnips, cabbages and such like northern crops, make most growth in comparatively cool weather, or at least require a moist atmosphere. The occasional loss of the hay crop from drought, as was experienced in Cape Breton Island for years previous to 1894, which was a fertile year, shews that it is of the greatest importance for a farmer not only to make a judicious choice of crops suitable to the climate, and to the soils and exposures of his fields, but also to have sufficient variety in his crops, so that whether the season should prove a hot and dry one, or cold and moist, or of a medium or average character, he may fairly expect a profitable return. This is the leisure time when plans for cropping can be made. Let it be

BOSTON DRUG cures Drunkenness. J. GODFREY SMITH, Agent, Halifax, N. S.

remembered that a moderately cool wet season will give a good crop of hay, whilst a hot dry one will necessarily ensure scarcity of this important fodder. To meet such a calamity a sufficient breadth should always be sown or planted of mangles, Indian corn or other crops that are capable of taking the place of hay and which succeed best in a warm, dry season. No farming can be expected to yield profitable results where dependence is entirely placed upon hay for winter feed of farm animals, whether for dairy or beef and mutton. In Great Britain, mixed feed or "mashley" as it is called, is much used, in the green state in summer time, and dried into hay for the winter. The following mixtures of seeds for mashley were privately furnished this season to the Secretary of Agriculture by one of the most extensive farmers in the Carse of Gowrie, Scotland, and may be relied upon:—For strong rich land: 6 bushel Horse Beans, $\frac{1}{2}$ bush. For poor land : 4 bushels Oats, 1 bush Peas. In growing Oats for fodder, to be used green or ripened, he recommends $\frac{1}{2}$ th bushel of Tares to be added to the ordinary quantity of Oats sown per acre. The cutting of Mashley should be begun when the pods are formed on the Beans.

FEBRUARY is the most trying month for cattle ; we cannot too strongly impress the necessity of care in their feeding, watering and general treatment, at this season of the year. In order to overcome the many difficulties that appear in February, it is a good rule to give extra time and attention to the stock. In feeding grain and meal always mix them into cut hay, moistened, — and season with common salt. Cut hay does not digest any more rapidly than uncut, but it enables the meal or crushed grain fed with it to be more perfectly digested. Our farmers

still suffer immense loss every year in striving to fatten cattle on meal, bran and middlings fed alone, without being mixed with cut hay as here described. When fed alone the meal simply passes through the animals. In Districts where an Agricultural Society does not already exist this is a good time to organize: farmers have leisure to attend a meeting, and take steps for organization. Notification has to be made to the Office of Agriculture, so that the new society may be sanctioned by the Lieut.-Governor-in-Council, before the end of June in order to qualify for the grant for the current year.

MARCH.—The Nova Scotia climate is singularly adapted for the successful growth of Garden Vegetables and root crops,—yet one of the most lamentable wants on our Nova Scotia farm is the kitchen garden. Instead of finding on every farm a well furnished kitchen garden, filled with vegetables and small fruits, sufficient to provide for the family wants during the year, such an inexpensive luxury is the exception rather than the rule. Now that we have a School of

Horticulture at Wolfville, it may be expected that a taste for gardening will extend throughout the Province. There is no reason why every farmer's family should not be provided to a large extent with supplies from the garden, such as early salads in the spring time, rhubarb for pies, early green peas, early turnips, lettuce, radishes, cucumbers, early cauliflowers and cabbages, early beans, gooseberries, currants, strawberries, raspberries, winter radishes, and turnips, beets, parsnips, artichokes, seasoning herbs, melons, squashes, and dozens of other delicious and substantial articles of food that cost nothing but foresight and some agreeable labor. The nature of our climate necessitates the use of hot-beds for raising seedling plants for those crops that require a long season to mature. A hot-bed is made by piling on successive layers of well-chopped horse dung, obtained from a stable where oats are freely fed. The manure may be raised to a

J. GODFREY SMITH, Agent for Old Dr. Gordon's Remedy for Men.

APRIL.—One of the most important operations of the year is spring ploughing, the preliminary to planting and seeding. The operation usually begins in the month of April, but is prolonged far into May, commencing sooner in dry light soils and warm situations, later where the opposite prevail. Every farmer should be ready to avail himself of the early opportunities presented by the varying years. It is not wise to plough till the soil is comparatively dry, and little is gained by early sowing until the ground is warm. In fields seeded down with timothy last fall, it will now be time to sow clover,—a mixture of red and alsike is the best for hay. Where early potatoes are required, the seed should be kept in a warm place so as to start the eyes, and, wherever the ground is dry enough, they may be planted. This advice if not heeded will lead to potatoes coming up scantily, many rotting in the ground. If farmers instead of planting inert seed

proceed nevertheless with your work, vary it to suit the state of the soil and atmosphere. Men cannot fight successfully against the operations of nature, but they can very often turn them to advantage by consideration and forethought. What has to be sown and planted this month? *Everything*, except what has either already been committed to the soil, or requires a warm seed bed like the turnip. Exceptional crops also are bush beans, pole-beans, corn, tomatoes, cucumbers, squash; it is only in warm, sandy soils, and in districts not subject to night frosts in spring time, that such things can safely be put out before the end of the month. One of the principal marketable crops in Nova Scotia is the potato. It has been found advantageous of late years to plant as early as possible; as soon therefore as the ground is in fit condition, commit the potato to it; see however, that the eyes of the seed have started into growth, otherwise it will be

apt to rot in the cold seed bed. Neglect of this point, which has been urged again and again in the Farmer's Calendar of this Almanac, has caused the loss of countless thousands of dollars to our farmers. So important is the "sprouting" of seed potatoes before planting regarded in England that the seedsmen have instructions thereon printed on the labels sent out with the seed, assuring their customers that this is necessary in order to obtain a satisfactory crop. In light lands the manure [old and well rotted] may be ploughed in before planting. In heavy soils, put the manure in the drills, so that the warmth of the air may counteract the deadening effect of the cold wet clouds. Superphosphate and other artificial fertilizers may also be used.

JUNE.—Planting and sowing will still continue. Corn for ensilage should now be sown. But, while spring operations have to be continued and finished this

month, there are others appertaining more especially to the summer that have to be attended to. Garden crops will require hoeing and weeding: potatoes also, when sufficiently advanced. It should not be forgotten that we have not only to sow and cultivate, but to protect our crops, if we would gather a profitable harvest. In localities subject to late spring frosts, it is easy to protect early crops by throwing some spruce or other brush over them on cold nights. A method much used in France, and which may easily be adopted in this country, is to burn brush to windward so as to cover the field in a cloud of smoke. Attention has often been called to such simple and costless devices, and yet year after year, we hear of the loss of early crops: it is said "by frost," we should say "by neglect." The Colorado or potato beetle now challenges attention. Paris green and London purple are undoubtedly efficacious, but they are homicides as well as insecticides,

as the weather will allow; verbenas may be put out very early, and they thrive better in the moist, cool weather of early June than later, when the soil is apt to be baked by the sun. Stocks are also very hardy and rejoice in hot, dry weather, if they are in good soil. Balsams, Phloxes, Petunias, Geraniums, Heliotropes, and other tender things need not be put out so early, as they will make no progress in cool weather, and the slightest approach to frost will kill them for the season.

JULY.—This month is especially devoted to the cultivation of the various field crops. Cultivation, in this restricted sense, means the hoeing of crops, stirring by cultivators and harrows, and such like implements between or over the drills, hilling up and moulding. The objects of these operations are not merely to

destroy weed, as is erroneously supposed by many, but to keep the soil open, and thus promote the decomposition of the manure, enable the soil to retain moisture, allow free access of air to it, bring it well over and around the roots and stems, and, by these several means, to promote vigorous growth. The sowing of turnips is usually recommended for the month of June, but as the ground has to be remarkably fine for this crop, and as turnips are often put in to fill up land that was originally intended for the earlier sown roots, it frequently happens that turnips have to be sown in July. In fact, if turnips are sown early in June, they are apt to run to seed, instead of forming bulbs. Some even prefer to sow their Swedes early this month, so as to avoid the "fly," and the soft turnips for immediate feeding need not necessarily be sown till the end of July, although if they get warm, genial weather to start with they do much better earlier. ing, while it is apt to give a small yield, ensures excellent quality, and freedom from fibre, so that turnips intended for table use in winter should never be sown early. The ground should have undergone a thorough pulverization. Light sandy soil is the best for turnips. They start better after the ground is warm, but the bulbs swell most rapidly during the cold dewy nights in Autumn. The soil cannot be worked too deep, or made too fine, for turnips; the surface soil must be made fine for a seed bed. Town manures are valuable for this crop, and crushed bones have been applied with best effects, either when covered in the drills in the manner of ordinary dung, or, preferably, when sown by machine along with the seeds, so as to be in immediate contact with the latter. In many parts of the province, particularly Yarmouth, Shelburne, Queens, Digby and Annapolis, the important operation of hay harvesting will have commenced this month, and

on upland will probably be well advanced, or even finished before the end of the month. All other work has to give way to this. If the weather is warm and dull, do not hurry the hay into the barn; put it up in large, well built cocks, so as to allow it to sweat or ripen before being put into the mow. Where mows are large this is particularly necessary.

AUGUST.—In the northern and eastern counties, and on dyke and intervale lands, much hay has, in ordinary seasons, to be taken in during the month of August. Hay making is the most important operation of the Nova Scotia farmers, half of all his land under crop of every kind being occupied with grass destined to be made into hay. More than half a million acres have to be mown every season, and this necessarily employs for the time a large amount of labor. How-

ever, where suitable implements and appliances are used there is now no difficulty in securing the crop. After haying there will be work in top-dressing the hay-fields, and in the garden and orchard. Where the trees are in grass they will benefit by a rich top-dressing around their roots. Look after the ripening fruit, destroy the caterpillars, if any still remain; pick the early August apples, and send them into a local market or to the pic-nic. When the rain comes beds of strawberries may be made up. See that the ground is well drained and enriched with old manure. Mushrooms now appear in horse pastures, house flies become troublesome, and the swallows congregate in flocks and leave us.

SEPTEMBER.—Grain has to be harvested. Late in the month Indian corn will have to be cut and put into the silos. The ensilage forms an excellent supple

ment to the hay and roots, but ensilage is still used to only a very small extent. Later in the month, potatoes of the earlier kinds, and earlier planted, will be ready to be taken up, but while the weather remains warm they should be well aired before being put into the cellar, and only in small quantities at a time. The most experienced farmers usually wait for cold weather before taking up their full crop. The farmer's year is a complete cycle, and before one year's annual harvest is taken in, it is useful to be preparing for the next. In fact it is already time, by the beginning of September, to sow Winter Rye, which is a favorite crop with farmers who have suitable, light, sandy soils. This year (1895) County Exhibitions will be held in the several counties of the Province. They are usually held this month. Every farmer is expected to attend his County Exhibition and to show samples of the products of his farm.

OCTOBER.—The apple crop is yearly acquiring increased importance in Nova Scotia, and our apple orchards are annually extending. But there is still plenty of room, and no farmer who has suitable land, and is willing to take the necessary care, can make a better permanent investment than by planting an orchard. The best market varieties, at least those that appear at the present to be most in favor among our fruit growers in the counties of Kings and Annapolis, where orcharding is carried on to a great extent, are: Gravenstein, Yellow Bellefleur, or as it is more commonly called here, Bishop's Pippin, King of Tompkins, R. I. Greening, Ribston Pippin, Northern Spy, Vandevere, Golden Russet, Nonpareil and Baldwin. Digby County is at present our cherry county, and Cape Breton has profitable plum orchards, but these fruits may be grown all over the province.

Now that the season's work is well nigh over, the young man on the farm may repair to the School of Agriculture and Provincial Farm, Truro, where instruction is given in the art of agriculture and sciences bearing upon it. A post card of inquiry to Prof. Smith, the Provincial Lecturer on Agriculture, will bring full particulars as to the operation and arrangements of the school and Farm, and the terms upon which pupils are admitted. No fees are charged, and students are paid for their work on the farm. Students are not boarded on the farm, but can obtain comfortable board and lodging in Truro at very reasonable rates.

NOVEMBER.—To insure the improvement of cattle, every society keeps or ought to keep a sufficient number of male animals for the use of members. For

beef cattle the Short Horn Durham, Polled Angus, Galloway and Hereford are used. For milk alone, or the cheese factory, Ayrshires are to be preferred. Devons make the best working oxen, are quick, active, and easily fed, and soon fatten in the winter pastures for beef. For Domestic cows, and butter making, Guernseys or Jerseys are the most suitable. The Jerseys have been great favorites, and their increase will promote the manufacture of butter, but it threatens to lessen our capacity for beef production. Holsteins are also increasing but less rapidly, in a few localities; they are large, healthy cattle, combining beef producing with milking qualities—the yield of milk being often very large. Fall ploughing will be the principal field work this month. After ploughing do not forget to go carefully over the water furrows to make way for the exit of the rain and melting snows that are sure to flood your fields before seed

time. A well ploughed, well drained field may be sown in spring as soon as the frost is gone, while one that is regularly ploughed or has no water furrows, may long remain a puddle, defying every attempt to improve its condition, until the season is so far advanced as to reduce very much the prospect of a crop. The best part of what is too often left to be "Spring work," can be done in the month of November. At the same time care should be taken not to open up gravelly banks or hilly land, subject to be scourd by the Fall and Spring rains, or melting snows. Every season brings loud complaints of the winter-killing of grass in the hay fields. It may possibly be of use to some farmers to say that the winter-killing is merely another name for neglect. If a hay field not on a dead level is drained simply by running water furrows with a plough to carry off surface water there will be no water-killing. Where land is perfectly flat a more

effective system of draining must be adopted. The want of the simple water-furrows, cost the farmers of this Province many thousands of dollars every year.

DECEMBER - Agricultural improvement is encouraged and promoted in various ways by the Provincial Legislature. Grants are given once in three years to enable a Provincial Exhibition to be held, and this year, 1894, is the Provincial Exhibition year. There is also a system of Agricultural Societies throughout the Province, with a membership of about six thousand farmers; each society is entitled to draw from the Provincial Treasury an annual grant in aid to promote its operations. Last session, a considerable increase was made on the Legislative grant for this purpose, and an improvement introduced in the mode of its distribution.

Postage Stamps, Postage Cards, etc., issued by the Canadian P. O. Department.

The stamps issued by the Canadian Post Office Department, are of the following denominations, viz.: postage stamps, $\frac{1}{2}$ c., 1 c., 2 c., 3 c., 5 c., 6 c., 8 c., 10 c., 12 $\frac{1}{2}$ c., 15 c., 20 c. and 50 c.; 3 c. letter cards and 1 c. and 3 c. envelopes are also supplied.

Post Cards are issued at one cent each, and may be sent to any address in Canada or United States. Reply Post Cards (2 cts.) may be sent to any address in Canada or the United States. Post cards are also issued at two cents each for transmission to the United Kingdom, Newfoundland, St. Pierre et Miquelon, and certain foreign countries. Post Bands are for sale at the rate of \$1.25 per hundred.

1st Class Matter.

Includes Letters, Post Cards, Legal and Commercial Papers wholly or partly written, (with the exception of those specially exempted,) and all matter of the nature of a letter or written correspondence.

The letter rate for Canada, Newfoundland and the United States is 3 cents per oz., and for other countries 5 cents per $\frac{1}{2}$ oz.

Letters addressed to any place in Canada upon which any postage has been prepaid by stamp, are to be forwarded to their destination charged with double the amount of the postage thereon not so pre-paid, which amount is to be collected on delivery.

Letters addressed to places in Canada or in the United States, wholly unpaid, and letters addressed to the United States on which at least one full rate (3 cents) has not been prepaid, are sent to the Dead Letter office.

RE-DIRECTED LETTERS.

Letters re-directed to places in Canada, the United States and Postal Union Countries, *without being taken out of the post office*, are not liable to any additional postage.

POST OFFICE DEPARTMENT.

REQUEST LETTERS.

Letters for places in Canada, Newfoundland and the United States sent in envelopes having printed thereon a REQUEST that the letters be returned to the sender, or bearing in the corner of the envelope the printed address of the sender, will be returned direct to the senders instead of being sent to Dead Letter Office.

POST CARDS.

For Canada and the United States, one cent each. For Great Britain, Newfoundland and all Postal Union Countries, two cents each. Reply cards, for Canada and the United States, two cents each. Nothing must be attached to a Post Card, except an additional stamp when necessary, nor must the card be cut or defaced in any way.

2nd Class Matter.

Newspapers and periodicals posted from the office of publication, and authorized to pass free of postage to regular subscribers in Canada Newfoundland and the United States.

3rd Class Matter.

NEWSPAPERS AND PERIODICALS.

Transient newspapers within the Dominion and the United States, 1 cent per four ounces or fraction thereof—but a single paper weighing not more than one ounce will be forwarded for $\frac{1}{2}$ cent. For the United Kingdom and all Postal Union countries, the rate is 1 cent per two ounces, or fraction of two ounces.

A newspaper or periodical must have no cover which can not easily be withdrawn. It must contain no enclosure. It must have no writing thereon but the name and address of the person to whom it is sent.

BOOKS, CIRCULARS, ETC.

The postage on printed books, pamphlets, circulars, occasional publications, etc., addressed to Canada, is 1 cent per 4 oz. To the United States, Newfoundland, Great Britain and all European countries, 1 cent per 2 oz. The postage on blank books, printers' proof sheets, maps, prints, drawings, engravings, lithographs, photographs, sheet music, printed forms, entirely blank, and printed stationery, etc., addressed to Canada and the United States, is 1 cent per 2 oz. No package must exceed 2 feet in length by 1 foot in width or depth. The limit of weight for Canada, United States and Great Britain is 5 lbs.

Seeds, cuttings, bulbs, roots and scions or grafts can only be sent to the United States as 5th class matter; when posted for delivery in Canada, the postage is 1 cent per 4 oz., and the limit of weight 5 lbs.

Commercial papers and legal documents may be sent to Great Britain, all European countries and United States, at 5 cents for the first 10 oz., and 1 cent for every additional 2 oz. These papers, when posted for delivery in Canada, must be prepaid at Letter or Parcel Post rates—but deeds and insurance policies may be sent if prepaid 1 cent per 2 oz.

PATTERNS AND SAMPLES.

Bona fide patterns and samples of merchandise, not exceeding 24 ounces in weight, may be sent to any place in Canada at 1 cent per 4 ounces. Must be put up so as to admit of inspection. Goods sent in execution of an order, however small the quantity may be, or articles

sent by one private individual to another, *not being actually Trade Patterns or Samples*, are not admissible as such. The limit of weight to United Kingdom is 5 lbs., and the limit of size 2 ft in length by 1 in breadth or depth. Postage, 2 cents for the first 4 ounces, and 1 cent for every additional two ounces.

4th Class Matter.

Closed parcels may be sent to places in Canada. They must be plainly addressed and should have the sender's name on the lower left hand corner. No correspondence must be enclosed.

Parcels for Canada must be prepaid 6 cents for 4 ounces, and must not exceed 5 lbs. in weight nor 2 feet in length by 1 foot in width or depth. They may be registered for a fee of 5 cents.

5th Class Matter.

Comprises such articles of general merchandise as are not entitled to any lower rate of postage. Postage 1 cent per oz., or fraction of an ounce. Limit of weight 5 lbs., of size, two feet in length by one foot in width or depth. Matter claiming to be 5th class *must be open to inspection*, and there must be no correspondence enclosed. Packages of 5th class matter may be sent to the United States for the same prepayment as is required within the Dominion, but the contents will be liable to customs inspection and collection of duty in the United States. Sealed tins containing fish, lobster, vegetables, meat, etc., if put up in a solid manner and labelled in such a way as to fully indicate the nature of their contents may be sent as 5th class matter within the Dominion, but no sealed matter can be forwarded to the United States under this head. Liquids, oils and fatty substances may be sent to places in Canada and the United States as 5th class, if put up in accordance with the ruling referring to such articles in the Canada Postal Guide.

FOREIGN PARCEL MAIL.

A parcel post mail for the United Kingdom is made up weekly at the Halifax P. O. for transmission by Canadian Packet. A parcel must not exceed 11 lbs. in weight, nor two feet in length by 1 foot in width or depth. The postage is 20 for the first lb. and 16 cents for each additional lb. or fraction thereof. Parcels can be sent to all the countries and colonies with which the United Kingdom maintains a parcel post. Information as to the principal places, and the rates applicable, can be obtained at the delivery wicket. These parcels will be subject to the same regulations as regards weight, size, etc., as parcels addressed to the United Kingdom. A parcel post has been established between Canada and Newfoundland on the conditions, &c., governing the transmission of parcels to the United Kingdom. Postage rate 15c. per lb.

A Customs declaration form giving an accurate statement of the contents and value of the parcel, etc., must be filled up by the sender. This form must be affixed to the parcel. The forms can be obtained at the delivery wicket of the Post Office.

REGISTRATION.

Every article intended for registration *must be handed in at the Post Office*, and a receipt obtained therefor. *On no account must it be dropped into a letter box.* The registration fees on letters to places in

CLAYTON & SONS, Manufacturers of Boys' and Men's Clothing.

Canada, Newfoundland, the United States, Great Britain and all European countries, 5 cents.

All classes of matter may be registered to all destinations in Canada and throughout the Postal Union; and *letters* may be registered to most of the countries not included in the Union.

MATTER WHICH CANNOT BE FORWARDED THROUGH THE POST.

Any explosive substance, liquid; etc., not properly put up, and other matter likely to entail risk or injury to the ordinary contents of the mail, will be sent to the Dead Letter Office, Ottawa.

Glass in any form is also inadmissible, except eye-glasses, spectacles and microscopic slides, which properly put up and prepaid at parcel post rate or 5th class matter rate.

No immoral publication, and no letter or post card bearing injurious words, devices, etc., can be forwarded through the mails.

Letters containing gold or silver money, jewels or precious articles, or anything liable to customs duties, cannot be forwarded by post to any of the Postal Union Countries, except to the United States.

PEASE'S ISLAND, on the south point of Pease's Island, one of the Tusket Islands, Yarmouth County, Nova Scotia, lat $43^{\circ} 37' 35''$ N., lon $66^{\circ} 1' 40''$ W. The main or sea light will be revolving catoptric, showing alternately red and white, each color visible for 15 seconds, with intervals of 45 seconds between the flashes. It is elevated 56 feet above high water mark, and in clear weather should be seen 12 miles from all points of approach from the southward, and also through the Schooner and Ellenwood Passages. A fixed red catoptric light will also be shown from a window in the tower, 16 feet below the main light. It is intended to mark the channel between the two dangers known as the Old Man and Old Woman Rocks, and is, therefore, visible between the bearings W. by N. $\frac{1}{2}$ N., and N. W. by W., and in no other directions. It should be visible $\frac{1}{2}$ miles. The tower is a wooden building, painted white, and consists of a square tower 42 feet high from base to vane on lantern, with a keeper's dwelling attached.

CANDLEBOX ISLAND, on Candlebox Island, lat N. $43^{\circ} 39' 34''$, lon W. $66^{\circ} 2' 45''$, fixed red, dioptric, elevated 56 feet, visible 8 miles, white, square tower, with dwelling attached.

TO FIND THE AREA OF A FOUR-SIDED FIELD.—Take the average of the lengths in yards of the opposite sides of the fields, multiply the two averages together, and divide the product by 1210—the result being the area of the field in rods—or by 4840, for the result in acres.

For example, the N. side of a field is 100 yards long, the S. side 200 yards, the E. side 800 yards, and the W. 1200 yards. The average of the N. and S. sides would be 150 yards, that of the E. and W. 1000 yards. Then $150 \times 1000 = 150,000 \div 1210 = 124$ rods nearly, or nearly 31 acres.

Port of Halifax, Signal Service.

Superintendent, Capt. Mills, R. E. Director, Sergt. U. Mulholland, R. E. Telephone, No. 45.

EXPLANATION OF SIGNALS.

Made on Main Signal Staff at Citadel Hill, when Vessels are seen from the Citadel or reported from an Outpost.

When Sailing Vessels are reported from an outpost, the following signals are made on the lower yard:

BY DAY.

For 1 Square Rigged vessel, 2 balls close up, one on the outer halliard and one on the inner halliard.

No. 2 Do, 1 ball hoisted on the outer halliard and one close up on the inner halliard; outer ball dropped.

" 3 Do, 2 balls close up, one on outer and one on inner halliard.

" 4 Do, 2 balls separated, and one close up on the inner halliard.

" 5 Do, a pennant of any colour on the outer halliard, and one ball close up inside.

" 6 Do, a pennant under a ball close up on the outer halliard, and a ball at the inner halliard close up.

" 7 Do, a pennant over a ball close up on the outer halliard, and a ball close up on the inner halliard.

" 8 Do, a pennant under two balls close up on the outer halliard with a ball close up on the inner halliard.

" 9 Do, a pennant between two balls close up on the outer halliard with a ball close up on the inner halliard.

For 10 Do, a flag of any colour close up on the outer halliard, with a ball close up on the inner halliard.

The above balls, &c., are hoisted on the east or west yard arm, according to the *quarter* the vessel first appears in.

A Ship, a large ball at end of yard, with a small one at inner halliard.

A Barque, a large do at the end, with a small one dropped at inner halliard.

A Brig, a small one at end of yard, and a large one at inner halliard.

A Brigantine, a cross close up at the outer halliard. Two or more do, a cross half hoisted.

A Topsail Schooner, or Schooner wearing a Merchant's Private Signal, a cross close up at the inner halliard.

Two or more schooners, a cross inner, half hoisted.

The upper yard of the Ship Staff is used solely to designate Steam Vessels thus:

Two large balls close up, one at the outer and the other at the inner halliard, E or W, a steamer reported in that quarter.

A small ball at the outer, and a large one at the inner halliard, a very small or regular coasting Steamer.

A large ball at the outer, and a small one at the inner halliard, a large or ocean going Steamer.

Steamers or Sailing Vessels showing owners' or agents' private signal flags, are denoted on the private Signal Staff with a small descriptive pennant underneath the private signal.

When the description of vessel is ascertained, the following descriptive colors will be hoisted at the masthead, and the inner ball taken down;

A Union Jack—a Flag Ship.

Man-of-War Screw Steamer, steamer pennant, *over* the Union Jack.

Man-of-War Paddle Steamer, steamer pennant *under* the Union Jack.

Troop Ship, white pennant two blue crosses between steamer pennant and Union Jack.

Dominion blue Ensign, under steamer pennant, Dominion Government Steamer.

Foreign Men-of-War are denoted in the same manner as English, excepting that the particular National Ensign is substituted for the Union Jack.

Directions to Mariners with Reference to Canadian Storm Warnings. issued for
 Quebec and the Maritime Provinces.

I.—Cone, hoisted with the apex downwards, indicates "moderate
 gale is expected," probably at first from an easterly direction.

II.—Cone, with apex pointing upwards, indicates "moderate gale is
 expected," probably at first from a westerly direction.

III.—Drum, with Cone underneath, the apex pointing downwards, indicates fresh to heavy gale is expected, probably at first from a easterly direction.

IV.—Drum, with Cone above, the apex pointing upwards, indicates fresh to heavy gale is expected, probably at first from a westerly direction.

The Cone, when hoisted by itself, indicates that it is expected that the wind will obtain a velocity of 30 miles an hour, but will not exceed 40 miles; and it is not intended that an ordinary well found vessel should stay in port, but simply as a warning to mariners that strong winds are expected from the quarter indicated.

The Drum will always be hoisted when the velocity of the wind is expected to exceed 40 miles an hour.

The night signal, corresponding to Nos. 1 and 3, is two white lanterns hanging perpendicular.

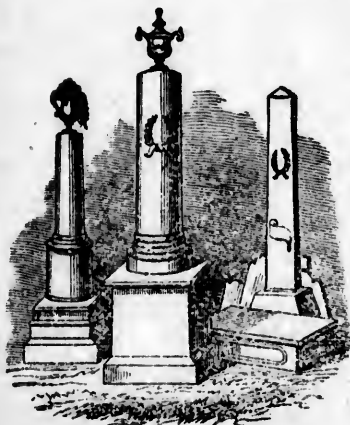

The night signal, corresponding to Nos. 2 and 4, is two white lanterns hanging horizontally.

NOTE.—Mariners will be able to obtain further information from Drum Agents or by consulting the daily probabilities. Mariners should always bear in mind that the storm signals are merely cautionary, and do not necessarily mean that a storm will occur at the place where the signal is displayed, but that one is expected either there or within such a distance that vessels leaving port would be liable to be caught in it.

The storm warnings issued for Nova Scotia, are received from the Central Office, Toronto, Ont.

TEMPERANCE DIRECTORY.

SONS OF TEMPERANCE.—The Order was instituted in New York, Sept 28th. 1842. The first Division was organized at Yarmouth, Nov. 17, 1847. The Grand Division was organized April 22, 1848, incorporated in 1851. There are now two hundred and sixty-eight (268) Subordinate Divisions with thirteen thousand eight hundred (13,800) members, — 120 Bands of Hope with 6000 members; *Grand Worthy Patriarch*, James Dempster, Halifax. *Grand Scribe*, William S. Sanders, Halifax. Office 183 Hollis St. Quarterly sessions of G. D. are held 1st week in February, May, and August. The annual session is held last week in October, in Halifax.

INDEPENDENT ORDER OF GOOD TEMPLARS.—The first Lodge in this province was organized at Economy, Colchester, July 4th, 1864. The Grand Lodge was formed February 5th, 1867. The chief officers of the Grand Lodge are *G. W. Chief Templar*, Rev. D. Stiles Fraser, Upper Steviacke; *Secretary*, Rev. W. G. Lana, Pictou; *Sup. of Juvenile Templars*, J. J. Wallis, Yarmouth; *D. G. R. T.*, J. B. Black, Amherst. No. of Lodges, 132, with membership of 6000; No. Juvenile Templars, 50, with 1606 members. The next Annual Session will be held in Yarmouth, commencing 2nd Tuesday in July, 1895.

THE WOMAN'S CHRISTIAN TEMPERANCE UNION (WHITE RIBBON), has over 700,000 members throughout the world, and is rapidly increasing in every country. Miss Frances Willard of Chicago, is at head of this movement. Miss Sarah Robinson, 14 Hurd's Lane, is President of the Halifax Union, and Miss E. B. Hart, 51 Lockman St., Halifax, *Cor. Secy*. **THE NORTH END W. C. T. U.**—*President*, Mrs. A. M. Bell, Hawthorne Place; *Cor. Sec'y*, Mrs. Howard McLean, 23 North Park St.

ROYAL TEMPLARS: Canadian Headquarters, Hamilton, Ontario.—Maritime Grand Council has 80 Subordinate Councils and 1500 members. *Grand-Coun.*, J. K. Flemming, Woodstock, N. B.; *Grand Vice.*, J. Bryenton, Amherst; *G. Secy.*, W. L. McFarlane, Washmaskiss, N. B. Next meeting at Amherst second week in August, 1895.

THE W. C. T. U. of the Maritime Provinces numbers about 3,500 members. *Pres.*, Mrs. C. R. Archibald, Halifax. *Cor. Sec'y.*, Mrs. Judge Steadman, Fredericton. *Rec. Sec'y.*, Miss Sarah Robinson, Halifax.

THE N. S. BRANCH OF DOMINION TEMPERANCE ALLIANCE consists of delegates from all other Societies, combining for united action to secure advanced legislation and to enforce existing laws. Officers: — *President*, Walter McCurdy, Mid. Musquodoboit. *Secretary*, Firman McClure, Truro.

THE CHURCH TEMPERANCE SOCIETIES and Unions are important factors in this great Moral Reform. Catholics and Protestants of all names are working by means of societies within their own borders; and many of the active supporters of church societies are leaders of the above named organizations.

GAME LAWS OF NOVA SCOTIA.

MOOSE and CARIBOU.—Close season from January 15th to September 15th. Penalty for hunting in close season, \$50 to \$200. No person shall kill more than two moose and four caribou. Penalty \$50 to \$200. Meat must be taken from woods within ten days from time of killing. Penalty \$50 to \$200. No person shall have in possession any green hide or fresh meat, whether killed in Nova Scotia or elsewhere, between January 25th and September 14th. Penalty \$20 to \$50. No person shall set any snare or trap for moose or caribou. Possession of a snare is presumptive evidence of intention to break the law. Penalty \$50 to \$100. No person shall hunt or kill moose or caribou with dogs. Penalty \$50 to \$100. All dogs hunting moose may be destroyed by any person. No person shall for ten years hunt or kill American elk or red deer. Penalty \$50 to \$100. No person shall for three years hunt or kill any cow moose. Penalty \$100 to \$200.

BIRDS.—Close season for partridge, woodcock, grouse, snipe, teal, from December 1st to September 15th. For blue winged duck, from April 1st to September 15th. Penalty for shooting or having in possession in close season, or killing after sunset, \$5 to \$10 for each bird.

PHASANTS, etc.—It is unlawful to hunt, kill or have in possession any pheasant, blackcock, capercaillie or ptarmigan.

RABBITS, HARES.—Close season from March 1st to September 1st. All snares or hedges unlawfully set may be destroyed. Penalty for each offence \$2.

OTTER and BEAVER.—Close season for three years, namely from May 1st 1894, to May 1st, 1897.

MINK.—Close season from March 1st to November 1st.

OTHER FUR BEARING ANIMALS.—Close season for all other fur-bearing animals, except bear, wolf, loup-cervier, wild-cat, skunk, musquash, raccoon and fox, from April 1st to November 1st.

LICENSES.—No person not domiciled in Nova Scotia shall hunt without license. License fee for birds, hares and rabbits, \$10; for all other game, \$30. Licenses may be had at Provincial Secretary's Office, Halifax, from all clerks of counties, and from the agents of the Game Society in various parts of the province. License fee for officers army and navy on this station, \$5. Such officers who are members of Game Society are not required to take any license. Penalty for hunting without license, \$50 to \$100, in addition to the license fee. The hunter, guide or companion of any such person hunting without license, is liable to same fine as the person himself.

NOTE.—Whenever a fine is imposed by the game laws, the person fined is liable to imprisonment if the fine is not paid.

EXPORT OF HIDES, etc.—Unlawful to export moose or caribou hides from Nova Scotia. Any hides attempted to be exported shall be forfeited. Penalty—\$5 for each hide. Unlawful to export partridge or woodcock. Penalty—\$20.

FISH.—SALMON.—Close season from August 15th to March 1st, except that salmon may be fished for with the fly alone from February 1st to August 15th. From low water nearest 6 o'clock p. m. of every Saturday, to low water nearest 6 a. m. of every Monday, no one shall fish for salmon in non-tidal waters. The use of nets is prohibited in non-tidal waters. In non-tidal waters frequented by salmon, no one shall fish for any kind of fish between 9 o'clock p. m. of every Saturday and 6 o'clock a. m. of the following Monday. Drifting and dipping for salmon is prohibited. Penalty for breach of foregoing provisions, \$20 for each offence.

TROUT, &c.—Unlawful to fish for or to have in possession any speckled trout (*salvelinus fontinalis*), lake trout or land-locked salmon, between 1st October and 1st April. Unlawful to fish for trout by any other means than angling with hook and line. Penalty for breach of foregoing provisions, \$20 for each offence.

EXPLOSIVES.—The use of explosives to kill any kind of fish is prohibited under a penalty of \$20.

BASS.—Close season, from 1st March to 1st October, except that bass may be fished for at all times by angling with hook and line. Bass should not be fished for by any net having meshes of a less size than 6 inches, extension measure, nor by means of seines. Penalty, \$20.

SHAD and GASPAREAUX.—Close season for shad and gaspareaux shall be from sunset on Friday evening to sunrise on Monday morning in each week. Penalty, \$20.

SYDNEY COAL.

This celebrated Coal, mined by the General Mining Association, Ltd., of London, G. B., at North Sydney Cape Breton, has long been generally known under the name of Sydney Coal, and this name is registered as a Trade Mark. To guard against deception, from other coals being sold with the prefix of "Sydney," or as "Sydney Coal," a certificate is issued with each cargo of Genuine Sydney Coal Shipped.

"Sydney Coal" stands at the head of all Nova Scotian and Cape Breton Coals in its reputation for House Use. It is also an excellent Steam Coal.
