WAS NOT WITTED... But Simply Objected... Russia and Japan.

HOW THE HITCH CAME ABOUT In the Arrangements for the Behring Sea Conference at Washington.

London Papers Speak in Plain Terms About the Hostility of Americans Towards the British Government.

London, Sept. 27.—Announcement was made this afternoon confirming the dispatches of the Associated Press.

The United States Ambassador, Col. John Hay, and the British Ambassador to the United States, Sir Julian Pauncefote, visited the Foreign Office this afternoon.

It is also pointed out that the Marquis of Salisbury's letter of July 20 distinctly says that an objection was received from the British side.

Some Plain Talk. St. James' Gazette Speaks in a Tone That Cannot Be Misunderstood.

London, Sept. 27.—The St. James' Gazette this afternoon remarks: "It is quite clear that no concession we can make or display, however sincere, of our wish to be friendly has availed one jot to disarm the bitter hostility of those persons who are already in a very aggressive attitude."

Recalling ex-Secretary Olney's alleged dictum that all connection between the United States and American State is in itself unnatural, the St. James' Gazette adds: "That some such doctrine is working to the injury of the United States and the interests of the Empire is plain to all eyes."

Would Bind Nobody. London, Sept. 28.—The Daily Chronicle says: "The United States and Great Britain need not be affected in the least, whether the British Government agrees to the conference or not. The conference would hardly be expected to go beyond the collection of information. It would bind nobody and could have no mandatory effect. No new situation will arise if we refuse the invitation."

An Opportunity to Snarl. The Morning Post says: "It is the chief object of the party in Congress, of which Mr. Dingley is spokesman, not to pursue a dispassionate enquiry into the national history of the seal, but to secure a verdict against the occupation of Canadian fisheries outside the zone of the Fribourg Islands."

What an Evolution! It's within the recollection of many of Toronto's oldest inhabitants when Temperance and Yonge-streets corner was occupied by a tannery.

The Times this morning says: "The substance of the American Government was either an international conference or the admission of representatives of Russia and Japan at the meeting of experts on the seal to delay a settlement on the subject of ascertained facts and to render it improbable that the seal regulations would be ready to be enforced in the summer of 1898."

tion of the award should be determined by the common agreement of the Governments of the United States and Great Britain. No other powers have any right to a controlling voice therein.

It Has Caused Surprise. London, Sept. 27.—A despatch to The Standard, from Madrid, says: "The rumor of Austrian mediation between Spain and the United States in the event of hostilities has created surprise amongst all with incalculable Spaniards fail to see what Austria could do unless seconded by naval powers, or at least by the combined capital action of several Governments."

Kindly Comradship. St. Petersburg, Sept. 27.—Emperor William, in answer to the despatch of the Russian Minister of Marine, expressing condolence with the family of the young Duke of Mecklenburg-Schwerin, who was drowned by the capsizing of torpedo boat No. 26, off Cuxhaven, on Wednesday last, has telegraphed saying: "I am deeply touched at the expression of sympathy evinced by the Russian fleet at the sinking of the torpedo boat. The death of the worthy young Prince is a sad loss to me and to the German navy. I look upon the expressions of condolence upon the part of my comrades of the Russian navy upon this melancholy occasion as an act of kindly comradeship."

Britain Gets Kassala. An Important Arab Town on the Nile Ceded to Italy. Rome, Sept. 27.—All arrangements for the cession of Kassala to Great Britain have been completed, and everything is ready for the occupation of that town by British troops.

Exchange of Compliments Over the New German Fleet. Berlin, Sept. 27.—The Hamburg Nachrichten today announced that Emperor William of Germany telegraphed his congratulations to Prince Bismarck upon the occasion of the launching of the new German armored cruiser Fuerte. The despatch was as follows: "From my heart I congratulate Your Serene Highness upon the launch of the armored cruiser Fuerte. Bismarck and I rejoice at knowing that the name of the new German Highness is the closest connection with my fleet for all time. You will be all the more proud of us since it is the first great armed cruiser built in our country. Admiral von Tirpitz, by my orders, will transmit a message of hearty congratulations to you. Prince Bismarck's reply: 'Your Majesty, I most humbly beg your respectful acceptance of my very grateful thanks for the distinction conferred upon me in christening the cruiser, and at the same time in a very respectful manner for the honor bestowed by your Majesty on my fleet. It is greatly pleased to have my fleet so greatly honored by your Majesty.'"

Cable to Iceland. Great Northern Telegraph Company Will Connect From Scotland. London, Sept. 27.—The Icelandic Parliament having voted a subsidy for the purpose, the Great Northern Telegraph Company will, during the early summer next year, lay a cable from Scotland to Iceland.

The Island Revenue Officers Discovered a Syvan Whisky Factory Near Peterboro. The Island Revenue officers of the District of Toronto discovered an illicit still near Edgeworth, in the vicinity of Peterboro, on Saturday. It was very cunningly concealed in the woods by the lake shore. Evidence that the still was not more ornamental appendage to the syvan scenery was afforded by the finding of the quantity of whisky that had evidently been produced through the medium of the still. It is also reported that some ingredients, apparently used in the distillation of spirits, were concealed elsewhere. The detective, who has reported the circumstances to headquarters, is said to be in possession of information implicating two parties, and further developments may be expected very shortly. Information has been given leading to the suspicion that another still exists in Harvey Township, off the Buckhorn road, and investigation is being made with a view of discovering its location.

What an Evolution! It's within the recollection of many of Toronto's oldest inhabitants when Temperance and Yonge-streets corner was occupied by a tannery.

The Times this morning says: "The substance of the American Government was either an international conference or the admission of representatives of Russia and Japan at the meeting of experts on the seal to delay a settlement on the subject of ascertained facts and to render it improbable that the seal regulations would be ready to be enforced in the summer of 1898."

The Morning Post says: "It is the chief object of the party in Congress, of which Mr. Dingley is spokesman, not to pursue a dispassionate enquiry into the national history of the seal, but to secure a verdict against the occupation of Canadian fisheries outside the zone of the Fribourg Islands."

A DIPLOMATIC JOLT FOR JONATHAN.

JOHNNIE BULL (getting off): 'I ain't goin' to play if them fellers; is goin' t' git on.'

BRITAIN'S NOBLE QUEEN. "She is the Only Court Where the Law of Parity is the Law of Favor and the Requirement of Fashion."

Hamilton's Senior Member Unwell at Vancouver.

ABSCONDING POSTMASTER From Norman, Ontario, Gathered In at Pembina, North Dakota.

Sudden Death of a Contractor—Mr. Sifton and His Klondike Party Ready to Start to-Day—Farmers Boycotting the Ogilvie Milling Company Because the Elevator Was Not Opened Early—An Ex-M.L.A. Dead—Winnipeg News.

Winipeg, Sept. 27.—(Special)—Word has been received here of the serious illness of A. T. Wood, M. P., of Hamilton, at Vancouver.

A lad named Jordan was killed by the discharging of a gun while hunting near Wolesey. J. B. Davies, postmaster at Norman, Ont., was arrested at Pembina, N. D., while attempting to abscond with public funds.

The Catholic school at St. Francis Xavier, closed since 1890, has been reopened under the Public Schools Act. This is a victory for national schools.

RETURNED WITH \$50,000. Mr. Dufresne Made His Pic in the Klondike Placers and Gives Some News as Well as Advice.

Montreal, Sept. 27.—A. Dufresne, a name of this city, but lately a resident of Boston, has returned to Montreal from the Klondike with \$50,000 in gold. Mr. Dufresne strongly advises no one to go to the Yukon without at least \$50,000 in loose money over and above provisions necessary. Still he says no one ever stays in a mining camp, unless he gets lost and cannot find any other human being. Every man's supply of provisions is free to anyone who requires food. All provisions are common property when necessity comes, and there is no scavenger in the Klondike. Speaking of the wealth of Klondike, Mr. Dufresne says that when he was in Dawson City he saw many miners take out \$1000 a day. Every body had a sack of gold instead of a roll of bills, and when anything was bought paid for it in gold dust. The miners spend money freely. They go into a saloon and call everybody in sight to have a drink. Those who have rich claims find fault with other claims, but all day. When a miner sells his claim he goes to the next large town and spends the proceeds. There are very few women in the Klondike at present, and their number is being increased rapidly.

Did You See the Balloon? The World has received numerous reports of balloons seen floating over different sections of the country. One was seen at Vancouver on Aug. 13. A few days after the President made the following strong remarks on the general question: "I don't think anything has been definitely decided upon as yet. The question is still under discussion. I can only say at this moment that it would be inadvisable to allow any Canadian steamship service to be left without a steamship service for the next six months. It is not probable that the Government will look with indifference on anything of the kind."

Yellow Jack's Doings. Increase in the Number of New Cases, But Decrease in the Death Rate. New Orleans, La., Sept. 27.—Warmer weather in the past two or three days has had the effect of increasing the number of new cases of yellow fever, but it has also had the effect of sending down the death rate. There were 23 cases on Saturday, 17 yesterday and up to half-past six to-day 21 cases. There were two deaths on Saturday, none on Sunday and two to-day.

Brought in Buenos Ayres. London, Sept. 28.—A despatch to The Times from Buenos Ayres says that during the last week or so the crops have suffered more from drought and severe frosts than from locusts.

Races at the Woodbine begin this afternoon at 2.45. Greatest racing yet seen in Canada. Admission to grand stand and betting ring \$1. Advance after 4.15 30 cents.

Fair and Warmer. Minimum and maximum temperatures: Esplanade, 50-60; Kaminops, 50-58; Calgary, 48; O'Connell, 51-52; Windup, 49-52; Fort Arthur, 34-38; Parry Sound, 56-54; Toronto, 37-60; Ottawa, 38-52; Montreal, 40-44; Quebec, 38-46; Halifax, 56-60.

Deaths. JEWELL—At 115 Agnes-street, on Sunday, Sept. 28, 1897, James Jewell, printer, aged 44 years.

STOP DUMPING SAWDUST.

Sir Louis Davies Surprises the Chandler Lumbermen by a Preemptory Notice. Ottawa, Sept. 27.—The lumbermen at the Chandler were somewhat surprised to-day when they were notified by Sir Louis Davies that they would require to stop dumping sawdust in the river after July 1 next.

Mr. Samuel W. Borbridge of S. & H. Borbridge, trunk and harness manufacturer, etc., died rather suddenly at his home last evening. He was around on Saturday, but yesterday grew worse and passed away last evening.

Mr. George J. Wilson of New Edinburgh, after an illness of several months, died early yesterday morning. Mr. Wilson leaves a widow to mourn his loss. He had been prominently before the public for a number of years, and was highly esteemed by his many acquaintances.

Dr. Borden has gone to Nova Scotia. Application has been made for probate of the will of the late Robert Munro, Public school teacher in this city by his brother, Andrew Munro of Morrisville, and Mr. R. H. Cawley, executors.

Yokohama, Sept. 27.—The British fleet now assembled at Hakodate, Japan for the annual manoeuvres, is perhaps the most powerful ever brought together under that flag in Eastern waters. Headed the list is the first-class battleship Centurion, bearing the broad pennant of His Majesty the King.

BRITAIN'S NAVAL POWER. A Grand Display of Strength at Hakodate Japan, in Readiness for the Annual Manoeuvres. Yokohama, Sept. 27.—The British fleet now assembled at Hakodate, Japan for the annual manoeuvres, is perhaps the most powerful ever brought together under that flag in Eastern waters.

THE WENTER PORT QUESTION. Sir Wm. Van Horne Thinks the Government Will Not Be Indifferent in the Matter. Montreal, Sept. 27.—Sir William Van Horne, who has just returned from the Maritime Provinces, was averse to discuss the question of a winter port at the meeting of the Executive Committee of the C. P. R. occupied in relation to St. John and a disconnection to appear to interpose as between conflicting interests.

Did You See the Balloon? The World has received numerous reports of balloons seen floating over different sections of the country. One was seen at Vancouver on Aug. 13. A few days after the President made the following strong remarks on the general question: "I don't think anything has been definitely decided upon as yet. The question is still under discussion. AN AWFUL SPECTACLE

Farmer Boecker Murdered His Whole Family AND THEN KILLED HIMSELF Wife and Six Children Shot for No Apparent Cause.

The Family Were Prosperous Germans, and to All Appearances Lived Happily.—The Murdered Woman and Her Baby Lay in Their Bed, and the Hardcore Beside Them—The Bodies of the Children Found in Different Parts of the House.

Carroll, Iowa, Sept. 27.—John Boecker, a farmer, living eight miles from this place, last night murdered his wife and six children and fatally wounded his 8-year-old son Henry. Afterwards the fiendish or demented man sent a bullet into his own head, inflicting a fatal wound.

The Door Kicked In. Boecker had an engagement to help a neighbor to-day, and on his way putting in an appearance to his brother Henry went to see why he did not come.

Boecker with his wife and baby asleep in a back room, and the three corpses lay on a bed. The wife had been shot in the neck with a shotgun, which stood in the corner; the baby had been shot and his head crushed with a revolver. The man, still breathing, had a bullet hole in his forehead, and by his side was a six-shooter with two chambers empty.

Boecker had since then been wandering about with his wife and some of the children. Later in the day he was visited by a neighbor, who says that he left the Boecker home in the evening they were seemingly a happy family, and not a premonition of the awful tragedy occurred a few hours later.

Used Gun and Revolver. Boecker used a shotgun and a revolver. He had seemingly shot his wife first, and then his children. The body of the boy, showing the rapid use of the revolver. The weapon he had borrowed from his brother Henry last evening, and he wanted to kill rats in the cellar. It is now recalled that Boecker had since then been wandering about with his wife and some of the children. Later in the day he was visited by a neighbor, who says that he left the Boecker home in the evening they were seemingly a happy family, and not a premonition of the awful tragedy occurred a few hours later.

Are You One?

We have learned that a great many people who have ordered "Sure-death" gunpowder from their dealers have been informed that it was no good, and that the powder which the dealer had on hand was much better. Don't allow yourself to be humbugged in this way. Sure-death is the strongest and cleanest powder made. You don't need to take our word for it—we can furnish testimonials from most of the best shots in the country. Insist on having Sure-death. If your dealer won't get it for you, send direct to us. Price per lb. 40 cents.

WHOLESALE AGENTS FOR CANADA.

The Griffiths Cycle Corporation, Limited, 235 AND 235 1-2 YONGE STREET, TORONTO. (World's Largest Sporting Goods Dealers.)

AGAIN STARS WERE EASY. Toronto Won Second of the Cup Series. THE SCORE WAS 6 TO 2. Dineen Had 'Em at His Mercy, Allowing Only Four Hits.

Third Game to Be Played at the Island This Afternoon—Boston Beat Hamilton, Knocking Three of the Champions Pitches Off the slab—The Eastern League Reserve List. Syracuse, Sept. 27.—Dineen had the Stars at his mercy to-day, and the second of the series between the Stars and Torontos for the Stenelet Cup went to the Canadians. The Torontos began scoring in the first innings after two men were out. McGowan Garry, c. f., was the first to get on base. He was given his base on balls, and crossed the plate when Freeman rapped out on a clean two-bagger. Snyder singled, scoring Freeman. Neither team scored again until the sixth inning.

A Good Bicycle Is a Good Friend

That's why many people are purchasing from us a good SECOND-HAND... CLEVELAND H. A. LOZIER & CO. 169 YONGE STREET.

MATTHEWS BEAT GARRARD PHILLIES BY 4 WICKETS. It Was a Fast Battle, and the Toronto and Chicago Continentals Drooped a Lot of Money. Philadelphia, Sept. 27.—The three-day cricket match began on Friday morning last between a picked team of Philadelphia amateurs and Captain Warner's English amateur team, ending this afternoon in a victory for the Philadelphia side with four wickets to spare. The score stood: England, first innings, 65; second, 37; total, 102. Philadelphia, first innings, 24; second, 119; total, 143. The teams will begin their second day's match on Friday.

THE WORLD'S SELECTIONS. First race—Harrington 1, Strathol 2, Nover 3. Second race—Clark 1, King Kenn 2, Nelson 3. Third race—Laverock 1, Mongolian 2, Nover 3.

Smart Vares at Smart Prices. The BON MARCHE SPECIAL PRICE LIST:

Table with 5 columns: WHAT 1 CENT WILL BUY, WHAT 2 CENTS WILL BUY, WHAT 3 CENTS WILL BUY, WHAT 5 CENTS WILL BUY, 5 CENT LIST CONTINUED.

This store supplies all the leading Dressmakers with Dress Lining. Why? Because we sell the right kind at the SMALLEST PRICE.

F. X. COUSINEAU & CO. KING STREET TORONTO.

SOCIETY AT THE RACES.

A small crowd and excellent racing were the order of things yesterday at the Woodbine. A cool wind blew across the course and rendered wearing of cloth gowns and hats very necessary. The grey that of autumn had settled over the race course, and the green of trees and swarthy-brown of the blue stretch of water beyond—lacked some of the beauty which is at most another three days' match on Friday.

THE SLATER SHOE

Advertisement for Slater Shoe featuring an illustration of a shoe and text: "You'll Feel the Pinch... of these machine-patterned shoes when the cold weather—the slushy weather—makes your feet sore. WHY DON'T YOU—Care at once your feet ill?—Treat your feet to a pair of the SLATER \$3 SHOES?"

W. H. STONE

Advertisement for W. H. Stone Undertaker: "W. H. STONE UNDERTAKER YONGE-343-STREET PHONE - 932. N. E.—Our charges have been greatly reduced in order to meet the popular demand for moderate priced funerals."

THE CARD AT WINDSOR. Windsor, Sept. 27.—First race, 3/4 mile, at 10:30 a.m. The entries are: H. C. Thayer, 112, Storm King 112, Suvant 107, Kinney 108, Stray 100, Keston 100, L. B. S. 100, Leck 100, M. J. 100, W. W. 100, J. P. 100, R. J. 100, J. H. 100, J. G. 100, J. K. 100, J. L. 100, J. M. 100, J. N. 100, J. O. 100, J. P. 100, J. Q. 100, J. R. 100, J. S. 100, J. T. 100, J. DOG TRAINING. The inside view of the old London champion team, has joined the T.A.C. League and will play them this evening at practice.

THE T.A.C. LEAGUE. The Toronto Amateurs' Cricket League will play Hamilton in Hamilton next Saturday.

THE THIRTIETH ROUND. Berlin, Sept. 27.—Before the beginning of play in the international tournament of the Olympic Games, the committee has decided that all of the played games of England.

THE MESSENGERS RACED. The Exhibition grounds track at an early hour yesterday morning was the scene of the Messengers' annual bicycle races.

FOR THE LAURIER BANQUET. Full Dress Suits, Trousers and Vestings. The correct make at the right price. McLEOD & GRAHAM, Fashionable Tailors, 109 King West.

SECOND DAY OF FALL RACES

New Track Record for Woodbine Park.

RAN 1 1/4 MILES IN 2.09 3/4

This Time Three Favorites Finished in Front.

Very Step 12 to 1 shot, landed the Mile Race in Slow Time—Marston 3 to 1, Ab Fashion 4 to 1, Bankook 3 to 1, Thornecliffe 4 to 5 and Bankook Five Money Won the Other Races—Even Weather, Fast Track.

Three favorites, second and third choices and a long shot landed the money on the second day of the Hunt Club fall races. The weather was clear and cool, the track fast and the attendance about 2000.

There were practically only two contenders in the three-horse race, the Jockey Club Stakes, and so fierce was the battle between the pair that a new record for the Woodbine track was established—2.09 3/4 for the mile and a quarter, beating Bankook's mark by just a quarter of a second.

The same 12 books drew in, and they had again all the business they could attend to. The takers of odds were beaten a second time, although three first choices did manage to finish in front.

Takanassas started favorite for the first race, being strongly supported and backed from 5 to 2 down to 7 to 6. Marston was played by the talent for first and second.

Bankook won the fourth race through the superior horsemanship of Songer, the Toronto jockey. Graham Anderson's good 3-year-old was the choice of the crowd.

ONE OF THE JURORS WAS ILL

And the Tarte-Grenier Case Had to Stand.

TWO KNIGHTLY WITNESSES

Will be on Hand, Namely, the Premier and Sir Oliver Mowat.

Mr. George Hague gives a glowing account of the crop and financial condition in Manitoba—Much Money Sent Out to Buy Wheat—Farmers Paying Little Debt—Sir Adolphe Caron says English Money Will Come to Canada—The Fast Steamship Project—Montreal News.

Montreal, Sept. 27.—(Special.)—The Tarte-Grenier case did not proceed this morning, as one of the jurors was ill, and after Dr. Bouchard had examined him and announced that he could not appear to-day, but might tomorrow.

It is regrettable that so few of our business prizes have been decorated in the Hunt Club's honor of their race meeting this week. It has been remarked that the appropriate decorations at Queen's races were the beauty and excellence of its jockeys.

On the Lake Shore Road. The second annual 10-mile bicycle handicap race was run off on the Lake Shore road, starting at the Cyclists' Inn, at 10 o'clock.

Bald Beat Cooper. Philadelphia, Sept. 25.—Nearly 5000 people attended the National Circuit races today at Ploca Park in this city.

Woodbine RACING CHART. WOODBINE PARK, SEPT. 27.—Second day Toronto Hunt Club Fall Races. Weather clear, track fast, 3-year-olds and up, selling.

EVERY MAN FOR HIS WARD.

The Aldermen Remember That the  
Elections Are Not Far Off.

West End Bicyclists Want King-Street  
Repaved—The Premier Accepts the  
City's Invitation—Who Are Jack &  
Robertson, the Lowest Tenderers for  
the New City Hall Elevators?—New  
Notes from the City Hall.

The report which Architect Lennox will  
present for the consideration of the Board  
of Control today will recommend, as far  
east in Saturday's World, the electric  
elevator system, as the most economical for  
the new City Hall. The result of his  
investigation and enquiries goes to show  
that each hydraulic elevator would cost 28 1/2  
cents per day, or \$117.04 per year more  
than an electric elevator.

The tenders are as follows:  
No. 1, Jack & Robertson, electric, \$34,  
No. 2, Otis Bros. & Co., electric, \$44,  
No. 3, Standard Elevator Manufacturing Company,  
electric, \$38,500, hydraulic, \$45,500; No. 4, the Pen-  
son Elevator Works, electric, \$44,000; hy-  
draulic, \$48,000.

The architect submits the following data  
as to the comparative cost of running hy-  
draulic and electric elevators. He arrives  
at his conclusions from a comparison of  
the cost of the two systems as actually  
in use in Toronto and elevators used in  
buildings that compare favorably with  
those to be placed in the new city build-  
ings.

Comparative Cost.  
He gives the result of his enquiries and  
calculations as follows:  
Cost of running hydraulic elevators: Tak-  
ing into consideration the cost of fuel and  
wages of firemen in the Freehold Loan and  
Savings Company's building, the average  
total cost per day for each elevator is  
7 1/2 cents; in the Canada Life Insurance  
building it is 8 1/2 cents; Board of Trade  
building, 9 1/2 cents; the average cost of  
hydraulic elevator, per day, therefore, is  
8 1/2 cents.

As to cost of running electric elevators  
there had been considered:

Comparative Cost.  
He gives the result of his enquiries and  
calculations as follows:  
Cost of running hydraulic elevators: Tak-  
ing into consideration the cost of fuel and  
wages of firemen in the Freehold Loan and  
Savings Company's building, the average  
total cost per day for each elevator is  
7 1/2 cents; in the Canada Life Insurance

building it is 8 1/2 cents; Board of Trade  
building, 9 1/2 cents; the average cost of  
hydraulic elevator, per day, therefore, is  
8 1/2 cents.

As to cost of running electric elevators  
there had been considered:

The Parliament Buildings, average  
cost for each year, \$171,124.  
Confidential Life Insurance Com-  
pany building, average cost for each  
year, \$170.

The average cost per electric elevator  
per year, therefore, is \$170, or at a  
cost per day, taking 908 working days per  
year, 174 cents.

So that the extra cost per power for  
each hydraulic elevator over and above  
that of each electric elevator is 88 1/2 cents  
per day. The excess per year is \$117,04 1/2.

Mr. Lennox concludes by submitting that  
five hydraulic elevators will cost the city  
about 22 1/2 cents per year more than  
electric elevators.

In explanation of his method of compil-  
ing the above statistics the architect re-  
minds the board that if they accept a  
tender for a hydraulic plant then extra  
power for running same must be provided,  
or if the electric were chosen, then elec-  
tric power must be provided. He contin-  
ues:

"Before entering into the comparative  
cost I might say that it is claimed for the  
system of electric elevators that there is  
a steam plant provided for heating the  
building, the cost of running hydraulic  
elevators will only be during that portion  
of the year (say six months), that the  
heating plant is in operation.

The cost of running a steam plant to give  
the necessary power to operate the same  
plant is so small that it is hardly worth  
while taking into consideration, and it is  
further claimed that the steam plant  
pumping plant can be used towards  
partially helping to heat the building,  
but it will require at least 10 per cent.  
of the extra cost for the additional  
demands made on the boiler during the  
summer months to pay for the additional  
cost of running the electric elevator  
through the work the hydraulic elevator  
does in winter months.

He has gathered data as to the cost of hy-  
draulic elevators in other cities, and has  
added thereto in a direct cost, and has  
found that when it is not for the ad-  
vantage of the hydraulic elevators during  
the winter months, and then taking this  
into account and calculating the net cost  
per day for the electric elevator, it is  
10 cents.

"Then, again, it is claimed for the elec-  
tric elevators that if they are used in  
running this kind of an elevator by the  
use of a small electric engine, or dyn-  
amo, it is not fair, inasmuch as the  
electric power by electric power com-  
pany is provided at least 10 per cent. less  
than the cost of operating a steam en-  
gine to operate the dynamo. Then the  
electricity is used in operating a good  
which in turn operates the somewhat com-  
plex machinery of the hydraulic elevators.  
In giving the cost, I there-  
fore assume the charges made by the sup-  
plying company."

Pneumatic Cloths Preferred.  
The cloth tenders are as follows:  
1. Ambrose Kent & Co., pneumatic  
tender and clock, including work al-  
ready done, \$128; written estimate for  
the same, \$900; with small strikes, \$525.  
2. J. E. Ellis & Co., winding tow-  
er clock, including work already done,  
for work already done, \$760; total, \$10,422.  
3. W. A. Ablett, winding tower clock,  
for work already done, \$800; total, \$3,838.  
4. J. E. Ellis & Co., winding tow-  
er clock, including work already done,  
for work already done, \$760; total, \$10,422.  
5. W. A. Ablett, winding tower clock,  
for work already done, \$800; total, \$3,838.

The meeting of the Board of Works yes-  
terday afternoon gave the first indica-  
tion of the fact that the aldermen realize  
that they will soon have again to give an  
account of every man for his own ward, and  
of the implication of having a great many  
of the aldermen of the City of Toronto  
upon the streets, and also of applying  
several hydrants outside of the city.

But when it is bought by the cart load  
from the dealer in the city, the dealer  
dealer still has a good show in the game.

It is a matter of fact that it did nothing of  
the kind for the simple reason that the  
Government weigh judge at the entrance  
of the city has been instructed to weigh  
upon entering the works, and the empty  
cart weighed afterwards.

The return journey from the works, a  
few minutes, but the driver is not  
into the cart. But under these were  
shortly, also thrown carelessly in, and  
the weight was taken by the scales, and  
might be found there.

An outcry, of course, had to be given,  
and the cases are "milkly partisan,"  
and frequently entail considerable loss of  
time, and the driver is instructed to  
nothing, except one thing.

"But the driver is instructed to  
nothing, except one thing.  
found that a good living could be made out  
of a business which is, however, numer-  
ous and well known.

2200, was also recommended. The supplement-  
ary and original recommendations were  
adopted.

To Rebuild Kilmuir's Cottage.  
The Parks and Gardens Committee recom-  
mended the building of Kilmuir's cottage,  
the laying of gravel on top of the  
paving in the Queen's Park center paths, and  
instructed Park Commissioner Chambers  
to report on the general question of the  
grading of trees on the streets.

City Hall Notes  
S. F. McInchey has been granted a permit  
to erect a four-story warehouse at  
York-street and Mill-street, to cost \$10,  
No. 11, Colborne, 24 Ross-street, is per-  
mitted to spend \$1200 in additions to his  
residence, at Dundas and Beach, to build  
a two-story brick factory on Balmuto-  
street, at a cost of \$2000.

Mr. Van Vlack has been instructed to  
begin laying the brick pavement on  
Queen east, between Dundas and Davenport,  
and to have it laid in the center of the  
road.

Replying to a communication from Mr.  
Joseph Hope, the city engineer, who re-  
quested latest census returns, Mayor  
Shaw gives the city population at 116,987.

Hydraulic Elevators.  
Editor World: Now that the question of  
provision for the new Municipal building  
is before the City Council, and is being  
discussed by the aldermen, it is not sur-  
prising that a few of the aldermen, who  
people at large, I have thought that a few  
points in favor of the use of the hydraulic  
system as compared with electric elevators  
would be timely.

The hydraulic system is an easily proved  
fact that in New York, Chicago and other  
large cities the electric elevator is being  
superseded by the hydraulic, notwith-  
standing the magnitude of the electric interests  
and the influence brought to bear in its  
favor.

Secondly, the quotations for electric elevators,  
wiring, etc., while those for the hydraulic  
system include everything necessary for  
operation, the price for the hydraulic system  
was included, the price would be  
lower than for electric elevators.

Thirdly, the cost of running the hydraulic  
elevator is much less than for electric,  
because the hydraulic system employs the  
steam directly for the power used for opera-  
tion, and the only loss is by friction of  
the machinery.

Fourthly, the hydraulic elevator is less  
liable to break down than the electric,  
because the hydraulic system employs the  
steam directly for the power used for opera-  
tion, and the only loss is by friction of  
the machinery.

Fifthly, the hydraulic elevator is less  
liable to break down than the electric,  
because the hydraulic system employs the  
steam directly for the power used for opera-  
tion, and the only loss is by friction of  
the machinery.

Sixthly, the hydraulic elevator is less  
liable to break down than the electric,  
because the hydraulic system employs the  
steam directly for the power used for opera-  
tion, and the only loss is by friction of  
the machinery.

Seventhly, the hydraulic elevator is less  
liable to break down than the electric,  
because the hydraulic system employs the  
steam directly for the power used for opera-  
tion, and the only loss is by friction of  
the machinery.

Eighthly, the hydraulic elevator is less  
liable to break down than the electric,  
because the hydraulic system employs the  
steam directly for the power used for opera-  
tion, and the only loss is by friction of  
the machinery.

Ninthly, the hydraulic elevator is less  
liable to break down than the electric,  
because the hydraulic system employs the  
steam directly for the power used for opera-  
tion, and the only loss is by friction of  
the machinery.

Tenthly, the hydraulic elevator is less  
liable to break down than the electric,  
because the hydraulic system employs the  
steam directly for the power used for opera-  
tion, and the only loss is by friction of  
the machinery.

Eleventhly, the hydraulic elevator is less  
liable to break down than the electric,  
because the hydraulic system employs the  
steam directly for the power used for opera-  
tion, and the only loss is by friction of  
the machinery.

Twelfthly, the hydraulic elevator is less  
liable to break down than the electric,  
because the hydraulic system employs the  
steam directly for the power used for opera-  
tion, and the only loss is by friction of  
the machinery.

Thirteenthly, the hydraulic elevator is less  
liable to break down than the electric,  
because the hydraulic system employs the  
steam directly for the power used for opera-  
tion, and the only loss is by friction of  
the machinery.

Fourteenthly, the hydraulic elevator is less  
liable to break down than the electric,  
because the hydraulic system employs the  
steam directly for the power used for opera-  
tion, and the only loss is by friction of  
the machinery.

Fifteenthly, the hydraulic elevator is less  
liable to break down than the electric,  
because the hydraulic system employs the  
steam directly for the power used for opera-  
tion, and the only loss is by friction of  
the machinery.

Sixteenthly, the hydraulic elevator is less  
liable to break down than the electric,  
because the hydraulic system employs the  
steam directly for the power used for opera-  
tion, and the only loss is by friction of  
the machinery.

Seventeenthly, the hydraulic elevator is less  
liable to break down than the electric,  
because the hydraulic system employs the  
steam directly for the power used for opera-  
tion, and the only loss is by friction of  
the machinery.

Eighteenthly, the hydraulic elevator is less  
liable to break down than the electric,  
because the hydraulic system employs the  
steam directly for the power used for opera-  
tion, and the only loss is by friction of  
the machinery.

Nineteenthly, the hydraulic elevator is less  
liable to break down than the electric,  
because the hydraulic system employs the  
steam directly for the power used for opera-  
tion, and the only loss is by friction of  
the machinery.

Twentiethly, the hydraulic elevator is less  
liable to break down than the electric,  
because the hydraulic system employs the  
steam directly for the power used for opera-  
tion, and the only loss is by friction of  
the machinery.

Twenty-firstly, the hydraulic elevator is less  
liable to break down than the electric,  
because the hydraulic system employs the  
steam directly for the power used for opera-  
tion, and the only loss is by friction of  
the machinery.

Twenty-secondly, the hydraulic elevator is less  
liable to break down than the electric,  
because the hydraulic system employs the  
steam directly for the power used for opera-  
tion, and the only loss is by friction of  
the machinery.

Twenty-thirdly, the hydraulic elevator is less  
liable to break down than the electric,  
because the hydraulic system employs the  
steam directly for the power used for opera-  
tion, and the only loss is by friction of  
the machinery.

Twenty-fourthly, the hydraulic elevator is less  
liable to break down than the electric,  
because the hydraulic system employs the  
steam directly for the power used for opera-  
tion, and the only loss is by friction of  
the machinery.

Twenty-fifthly, the hydraulic elevator is less  
liable to break down than the electric,  
because the hydraulic system employs the  
steam directly for the power used for opera-  
tion, and the only loss is by friction of  
the machinery.

Twenty-sixthly, the hydraulic elevator is less  
liable to break down than the electric,  
because the hydraulic system employs the  
steam directly for the power used for opera-  
tion, and the only loss is by friction of  
the machinery.

TRICKS IN THE COAL TRADE.

The Bewildering Wiles of Some Buyers  
and Sellers in the Disposal and Pur-  
chase of the Black Diamonds.

A large consumer beats down the price.  
He informs Mr. Smith, who supplies him,  
that Mr. Jones, round the corner, has offered  
to sell coal to him cheaper than Mr.  
Smith does. The information may possibly  
be false, and there is little chance of  
the consumer's having already cut Mr.  
Smith down to the lowest paying point,  
but the latter makes no sign. "If he can  
do it, I will," he says, with a resigned air,  
and he goes off to "do it."

Business Suits...

We have suits that  
vary in price but 50c,  
and it's a hard matter to  
show you why one suit  
is more than the other,  
but the difference is there  
in the value. No store  
in the country, big or  
little, comes nearer to  
dealing squarely with its  
customers than we do—  
and it's that very fact  
that is bringing to us  
customers from all over  
Ontario who want to  
trade in a store where  
there is no uncertainty  
about the goods or the  
prices.

Men's Suits  
4.50 to 15.00.

THE LUETGERT TRIAL. J. C. SMITH LOSES HIS SUIT.

Sixth Week Opened at Chicago With a Larger Crowd Than Ever—All Classes of People Attend.

Chicago, Sept. 27.—The beginning of the sixth week of the Luetgert trial today brought to the court room a larger crowd than usual. Policemen and court bailiffs on duty at the doors had much difficulty in handling the crowd and admitting those with tickets. The States Attorney's office was overrun by people who impounded Assistant States Attorneys for passes. Never before at criminal trials in Chicago, the Anarchist trial not excepted, has there been more widespread interest than has been aroused by the Luetgert trial. All classes of people have been attracted, including politicians, ministers, actors, jurists and men and women of prominence in other walks of life. During the progress of the trial a United States Senator, several ministers of national reputation, visiting judges from other States and attorneys of high repute have been among the listeners to the evidence.

Among those who gained admittance to the court room today was a full-blooded Sicilian. He is a Klondiker, his home being at Aurik, on the Yukon big meat man. He is a Klondiker, his home being at Aurik, on the Yukon big meat man. He is a Klondiker, his home being at Aurik, on the Yukon big meat man.

Physical improvement, due to Sunday's rest and massage treatment, was noticeable in Luetgert's appearance as he entered the court room today, making a cigar and greeting his attorneys and his son Arnold pleasantly.

Mary Stearning, the servant girl whose cross-examination was in progress Saturday when court adjourned, was recalled. When she went on the witness stand today to endure, as she supposed, the cross-examination of States-Attorney Deneen, which is electric in its rapidity, Mary appeared composed and defiant. Her cheeks were flushed, which indicated, apparently, some mental excitement, but the young woman, it was noted, she beat her children and her mind. Greatly to her surprise and apparent relief, Assistant States-Attorney McEwen asked the questions, and did not keep her on the stand long. His cross-examination was not severe.

"Did you not say before the grand jury that Mrs. Luetgert was a good and kind mother?" asked Mr. McEwen. "I did," confessed the witness.

"Now, you say she beat her children and was cross with them."

"When I went to the grand jury room to testify, Inspector Schack was there. He told me if I did not say what I did, he would punish me," said the witness.

Jacob Melner, of Wheaton, Ill., testified on Monday that he saw Mrs. Luetgert at the depot in Wheaton at 5 o'clock in the morning, whose description resembled that of the woman who had been inquired the way to Elmhurst, Melner is a butcher. He said he saw Mrs. Luetgert only last March when she called on him at his home. He was asked, upon cross-examination, to describe the missing woman he could not do so.

Charles Boehmer, who testified that Luetgert for 16 years, testified that on April 28 he had a brief conversation with Mrs. Luetgert, who was in a much depressed, and remarked that "things were going bad in the house."

When Mrs. Augusta Koch, a neighbor of the Luetgerts, who knew Mrs. Luetgert well, was called to the witness stand, she testified that she had seen Mrs. Luetgert at the depot in Wheaton at 5 o'clock in the morning, whose description resembled that of the woman who had been inquired the way to Elmhurst, Melner is a butcher. He said he saw Mrs. Luetgert only last March when she called on him at his home. He was asked, upon cross-examination, to describe the missing woman he could not do so.

Other for Harvard University. Mr. W. L. McKee, King's College, LL.B., who held a Fellowship in Political Economy at Harvard University, Cambridge, Mass., testified that he had seen Mrs. Luetgert in original investigations in his department at Harvard University, Cambridge, Mass., and produced a series of newspaper papers, several of which, on the origin and history of trade union organizations, were published in the Political Economy Journal. One of these was highly recommended by the professor of commerce at Harvard, who had known Mrs. Luetgert for several years and had lived with her in Cambridge, Mass., for a number of years.

A Black and White Cat Rescued. New York, Sept. 27.—The steamship Yumart of the Ward Line, which arrived today, had among her passengers a black and white cat which was rescued from a derelict schooner named the "Brooklyn." The schooner, which was sighted on Saturday, waterlogged, dismasted and abandoned. She was laden with yellow pine and had on board a man and a woman. The man, who was named Thomas, on the same day the Yumart was at Cape Hatteras, sighted the schooner and on Sunday at daylight she passed through a large school of whales, entering one completely in two.

Attacked a Priest in Church. Pittsburg, Pa., Sept. 27.—A sensation was caused here today by an assault committed upon Rev. Father Vernert, at the morning service at the Holy Trinity Church. The priest's assailant was named George Griggs, a Frenchman, 50 years of age. He was arrested after a struggle in which he was injured. Father Vernert is not seriously hurt.

No Counts Better Than Corrupt Courts. Oakland, Cal., Sept. 27.—Prof. David Starr Jordan, in an address at the First Unitarian Church, declared that it would be better to have no courts than corrupt courts. If it is right to execute a sane man for murder, it is right to hang an insane one. He held that it is as proper to prevent a pauper, insane person or criminal from reproducing his kind as it is to punish him. A Utopia, with all work equally divided, he declared to be an abomination.

Motor Case in Court. The Motor Cycle Co. of Chicago is suing Dr. H. B. Smith for the value of a number of wheels. The defense is that the wheels were not sold as such but as parts of a motor cycle. The case is being heard in the Municipal Court today.

Excursion to Chicago. On Sept. 30 and Oct. 1 and 2 ticket agents will sell round-trip tickets to Chicago via the Washburn Railroad at less than the second-class fare one way, and tickets good to return until Oct. 18. The Washburn line, the short and true route to the Windy City, Passengers leaving on early morning trains reach Chicago same evening at 9:30. Detailed information from any railroad agent or A. Richardson, Canadian Passenger Agent, N.E. cor. King and Yonge-streets, Toronto.

Big Price for Morales. San Francisco, Sept. 27.—The latest news from Guatemala received today says that a price of \$100,000 has been placed on the head of Prospero Morales, the revolutionary leader, and his aide, Manuel Fuentes, by President Barrios.

HAD SEVERAL FIGHTS. Government Troops Tried to Capture Quetzaltenango Repeatedly Without Success.

New York, Sept. 27.—A despatch to The Herald from La Libertad, Salvador, says: The latest news received in this city from Guatemala is that several engagements have taken place between the Government and rebel forces near Quetzaltenango, and that each fight has resulted in the defeat of the Government troops. The fighting in each instance has been caused directly by the Government's effort to retake Quetzaltenango from the rebels.

General Scorero de Leon, who was sent by President Barrios into the fighting district with a large force of men, has gone over to the revolutionists, taking all his men. His first order, after joining the rebellion was to capture the city of Retalhuleu, which he now holds. The Government has just sent 200 men to the steamship City of Guatemala to Chaperupico, which port is now held by the rebels.

The true story of the capture by the insurgents of the airport (Coos has just become known) has been known to the rebels. The Government has just sent 200 men to the steamship City of Guatemala to Chaperupico, which port is now held by the rebels.

SPAIN WOULD FIGHT. Her Capacity for War Compared With That of the United States—It Would Not Be Easy for Uncle Sam.

New York, Sept. 27.—A despatch to The Journal says: Several of the English papers publish comparative statements of the strength of the fighting forces of the United States and Spain. The Sunday Times remarks: "It is needless to say that the general American opinion is that, in the event of hostilities, the bearers of the Star Spangled banner would be quickly and easily defeated. Such an assumption, however, is not correct. It is based on a comparison of the ready fighting forces of the nations as they exist today."

"Spain has not, of course, nearly the population or wealth to draw upon that the United States has, but nevertheless she has a much larger standing army of trained soldiers, and a fleet which, at the present time, is little, if at all inferior to that of the United States. She is fighting for her very existence, as it were, and she has already displayed a tenacity which lends us to believe she would not give up the struggle until the last peseta of the national wealth and credit had been expended."

THE ENGINEER WAS KILLED. A Locomotive on the Northern Central R.R. Exploded and Caused Death.

Harrisburg, Pa., Sept. 27.—Engineer E. Bennett Mitchell was killed and Fireman John R. Cavley seriously injured this morning by the explosion of a locomotive on the Northern Central Railroad at Georgetown, a few miles north of Harrisburg. Mitchell was thrown up the side of a mountain a distance of sixty feet, and was dead when found. Fireman Cavley was hurled in an opposite direction almost to the edge of the Susquehanna River, and is thought he will die. All the cars except the rear Pullman sleeper were derailed. None of the passengers were injured.

THEY HAVE THE MONEY. Baltimore, Sept. 27.—It is announced here today, upon reliable authority that the receivers of the B. & O. Railway have arranged to buy back the bonds of the B. & O. and Chicago division of the system upon which default was made on June 15, 1937.

PROSPECTS VERY FAVORABLE. The Barren V. F. Line at the Arizona Copper Mining Company has completed arrangements to begin work on the property.

SAW BILL WILL WIN. The mill at the Saw Bill mine is now running full time, producing out the yellow metal. Some difficulty was experienced last week with the engine, the valves not being properly adjusted.

TRUE BILLS AGAINST FITKINS. The Grand Jury in the General Sessions Court this morning returned the true bills against Charles Fitkins of Toronto Junction for non-support. Fitkins is the father of the triplets who were being reared at the Museum, two of whom have since died.

NO COUNTS BETTER THAN CORRUPT COURTS. Oakland, Cal., Sept. 27.—Prof. David Starr Jordan, in an address at the First Unitarian Church, declared that it would be better to have no courts than corrupt courts. If it is right to execute a sane man for murder, it is right to hang an insane one.

IS YOUR HEART STRONG? Or have you palpitation, throbbing or irregular beating, dizziness, short breath, smothering or choking sensation, pain in the breast of heart. If so, your heart is affected and in turn affect your nerves, causing nervousness, sleeplessness, morbid anxious feeling, debility.

MILBURN'S HEART AND NERVE PILLS. Cure all these complaints by regulating the heart's action and building up the nervous and muscular system to perfect health and strength.

BELL TELEPHONE OF CANADA PUBLIC OFFICE. Long Distance Lines. Persons wishing to communicate by telephone with other cities and towns in Canada will find convenient routes through the Bell Telephone Company of Canada.

TORONTO ELECTRIC MOTOR CO. make the best Motor or Generator built in Canada. If you want the best call on Toronto Electric Motor Co. 103 to 109 Adelaide St. W., Toronto.

THE PELLY-YUKON MINING SYNDICATE.

The first well equipped party to leave for the Yukon Gold Fields left on Saturday by C.P.R. under the leadership of Mr. Edgar Bray, D.L.S. No company can boast of a better or more trustworthy party than that secured by The Pelly-Yukon Syndicate.

The lieutenant of the party, Mr. B. Woods, is also a man of large experience, and with two such men at the head of the expedition success of the same is almost a certainty.

Prospecting will be done on the way. On account of valuable information already in possession of Mr. Bray, who has been over part of the ground, his knowledge places him in a position few can occupy in the territory to be explored.

The second party will leave for this Company in the early spring and will be joined by the first party, and in this way many claims can be taken up and worked successfully.

To secure an interest in this syndicate send at once for all information to Head Office, Land Security Buildings, Toronto. Stock will be raised in price in the near future, no ice of which will appear in a few days.

Until notice is given we'll continue to sell at 20 cents, or 100 shares \$20.00—fully paid.

J. CURRY Secretary.

INLAND NAVIGATION. Niagara Falls Line. EMPRESS OF INDIA and G.T.R. System.
