**UNIVERSITY COUNCIL.**

The Council consists of the Chancellor, the Trustees, the members of the Senate, and thirty-three elective members.

The Chancellor is elected by the Council, except when two or more candidates are nominated, in which case the election is by registered graduates and alumni. He holds office for three years, and, as highest officer of the University, presides at meetings of Council and Convocation, and at Statutory meetings of Senate. In his absence he is represented by the Vice-Chancellor.

Of the elective members seven retire annually, except in every fifth year, when only five retire. Successors are elected by registered graduates and alumni. Retiring members may be re-elected.

The Council has power to discuss all questions relating to the College and its welfare, to make representations of its views to the Senate or the Board of Trustees, to decide on proposals for affiliation, and to arrange all matters pertaining to the installation of Chancellor, its own meetings and business, the meetings and proceedings of Convocation, and the fees for membership, registration and voting.

Convocation for the conferring of degrees, etc., is held upon the last Wednesday of April in each year.

**ELECTIVE MEMBERS.**

## ACADEMIC YEAR.

1882.

- Sept. . 20—Candidates intending to appear at ensuing examinations required to intimate in writing their intention to the Registrar.
- " . 27—Matriculation, Supplementary, Pass and Honour Examinations in Arts and Law begin.
- Oct. . . 2—Examination for Mowat Scholarship.
- " . . 4—Classes in Arts open.
- " . 16—University Day—Registration, &c.—Holiday.
- Nov. . . 1—Matriculation and Pass Examinations in Theology and Medicine begin.
- " . . 2—Time for receiving Essays for University Prizes expires.
- " . 20—Holiday.
- Dec. . 23—Christmas Holidays begin.

1883.

- Jan. . . 9—Classes re-open.
- " . 12—Statutory Meeting of Senate.
- Feb. . . 7—Holiday.
- " . 15—Time for receiving Essays for Thorburn Prize, and for Gold Medal in History expires.
- March 2—Time for receiving Theses for M.D. expires.
- " . . 8—Time for receiving subjects of Theses for M.A. expires.
- " . 23—Holiday.
- " . 30—Notices of intention as to ensuing examinations required.
- " . 31—Time for receiving Theses for M.A. and D. Sc. expires.
- April. . 6—Class-work in Arts closes.
- " . . 9—Pass and Honour Examinations in Arts begin.
- " . 13—Class-work in Theology closes.
- " . 16—Pass Examinations in Theology begin.
- " . 23—Statutory Meeting of Senate for conferring Degrees, &c.
- " . 25—Convocation for distributing Prizes, announcing Honours and laureating Graduates.

## GENERAL ANNOUNCEMENTS.

QUEEN'S COLLEGE has, under its Royal Charter, "the style and privileges of a University."

The forty-second session will be opened on the first Wednesday (4th) of October, 1882.

*Students are particularly requested to give attention to the contents of the following pages, as all intimations shall be strictly adhered to.*

A complete compilation of statutes and by-laws, containing information as to scholastic requirements and defining the duties of students, is published separately. The regulations in the compilation are applied consistently with any changes introduced into the Calendar. Copies are to be obtained from the Registrar.

BOARDING.—No student is allowed to board or lodge in any house not approved of by the Senate, except by permission of parents or guardians given in writing. Information as to approved houses may be obtained from the Registrar. The expense of suitable boarding is moderate.

REGISTRATION.—All students are required to have their names, with other particulars, entered in the University Register. At the time of registration they must produce the Treasurer's receipt for fees.

ber); grad

Intrants must also present a certificate of character from their ministers or other competent persons, and sign a declaration promising due respect and obedience to the University authorities, diligent attention to their studies, and a courteous behaviour towards their fellow-students.

**ATTENDANCE AT CHURCH.**—All students must attend the churches to which they profess to belong, and produce certificates of attendance from their clergymen when required.

**THE LIBRARY** contains over 11,000 volumes. Students are entitled to the use of it, subject to by-laws.

**THE OBSERVATORY.**—In 1855 an Astronomical Observatory was founded by subscribers, aided by the City Corporation, and was transferred by deed to the University in 1861.

**THE MUSEUM.**—The Mineralogical and Palæontological collections are extensive and valuable. Occasional demonstrations are given to students. Friendly services towards the furnishing and enlargement of the Museum are solicited.

All graduates and undergraduates, when attending class or any college meeting, shall wear the costume prescribed by the University.

The distinctive part of the costume of Graduates is in the hood, as follows:—B.A., black, bordered with red silk; M.A., scarlet; D.Sc., black, lined with blue, bordered with white; M.D., scarlet, bound on edge with white; B.D., white, with crimson plush border; D D, black, with white lining; LL.D., black silk, lined with blue silk.

**FEES.**—The following fees are payable strictly in advance—class fees on University Day (16th October); graduation fees before Convocation Day:—

The classes of Chemistry and Physics, each per session .....	\$12 00
Any other class, any number of sessions .....	6 00
Registration and Library, per session .....	4 00
Apparatus, per session .....	2 00
Matriculation Examination .....	1 00
Pass Examination .....	2 00
Graduation Fee, Doctor of Science (D. Sc.) .....	50 00
“ “ Bachelor of Arts (B.A.) .....	10 00
“ “ Bachelor of Laws (LL.B.) .....	10 00
“ “ Doctor of Medicine (M.D.) .....	30 00
“ “ Master of Arts (M.A.) .....	20 00
Bachelor of Divinity (B.D.) .....	20 00
Admission <i>ad eundem gradum</i> , B.A. ....	10 00
“ “ “ M.A. ....	20 00

### FACULTY OF ARTS.

#### MATRICULATION.

I.—There are two Matriculation Examinations, a Junior and a Senior. Candidates who pass the Junior Examination take rank as Undergraduates the first year, and those who pass the Senior Examination take rank as Undergraduates of the second year.

II.—In both of these Examinations, the candidate is required to pass in *one* of the following groups of subjects:—

(1)	(2)	(3)
Latin,	French and German,	French and German,
Greek,	Greek,	Latin,
English,	English,	English,
Mathematics.	Mathematics.	Mathematics.

III.—The subjects of Examination in each department of study are given in the following Table :

IN	JUNIOR MATRICULATION.	SENIOR MATRICULATION.
Latin.	<p align="center">1882-3.</p> <p>Cæsar B. G., Bk. IV., c. 20-36; Bk. V., c. 8-23. Cicero, Pro Archia. Virgil, Æneid, Bk. II., vv. 1-317. Ovid, Heroides, Epistles V., XIII. Latin Grammar and Composition.</p> <p align="center">1883-4</p> <p>Cæsar, B. G., Bk. IV., c. 20-36; Bk. V., c. 8-23. Cicero, Pro Archia. Virgil, Æneid, Bk. V., vv. 1-361. Ovid, Heroides, Epistles, V., XIII. Latin Grammar and Composition.</p>	<p align="center">1882-3.</p> <p>Cicero, Pro lege Manilia. Virgil, Æneid, Book VII. Horace, Odes, Book II. Translation from authors not specified. Latin Grammar and Composition.</p> <p align="center">1883-4.</p> <p>Cicero, De Amicitia. Livy, Book I., ch. 1-30. Horace, Odes, Book III. Translation from authors not specified. Latin Grammar and Composition.</p>
Greek.	<p align="center">1882-3.</p> <p>Xenophon, Anabasis, Book I. Homer, Iliad, Book VI. Greek Grammar and Composition.</p> <p align="center">1883-4.</p> <p>Xenophon, Anabasis, Book II. Homer, Iliad, Book VI. Greek Grammar and Composition.</p>	<p align="center">2882-3.</p> <p>Herodotus, Book I. Homer, Iliad, Book XVIII. Translation from authors not specified. Greek Grammar and Composition.</p> <p align="center">1883-4.</p> <p>Xenophon, Anabasis, Book VII. Euripides, Alcestis. Translation from authors not specified. Greek Grammar and Composition.</p>
English.	<p>Writing from Dictation. Composition of a short essay on some prescribed subject. Critical Analysis of some specified work, the works for the next two years being:—</p> <p align="center">1882-3.</p> <p>The Deserted Village. The Task, Book III.</p> <p align="center">1883-4.</p> <p>Marmion, with special reference to Cantos V. and VI.</p>	<p>Earle's Philology of the English Language. *English Literature to the close of the 16th century. Critical Review of Hamlet. An Essay on some Literary subject. Special importance is attached to the style and composition of the Essay.</p> <p>*Any of the following Text Books may be consulted:—Spalding's, Shaw's, Morris', Taines', or Craik's History of English Literature.</p>

**ARITHMETIC**—A general knowledge of the subject, including Involution and Evolution.

**ALGEBRA**—A general knowledge of the fundamental rules—Factoring Simple Equations of one or more unknowns, H.C.F. and L.C.M.—Fractions—Quadratics—Problems leading to Simple Equations.

**ALGEBRA**—More difficult problems in Simple and Quadratic Equations of one or more unknowns—Surds—Maxima and Minima—Inequalities—Series, Arithmetic and Geometric—Series of Squares, Cubes, &c.—Ratio, Proportion and Variation—Permutations and Combinations—Binomial Theorem and Expansions—Logarithms in their practical applications—Exponential Equations—Interests.

English Literature to the close of the 18th century.

Schiller, Wilhelm Tell.          Schlosser, "Das Jahr, 1813."</p>

IV.—To pass the Junior Examination at least one-fourth of the marks allotted to each subject must be obtained, and to pass the Senior Examination, at least two-fifths.

V.—A student passing in any subject may attend the class connected therewith, but no student can take rank as an undergraduate, or be eligible for a Scholarship in any department without passing the examination in English.

VI.—Ungrammatical language, incorrect spelling, or illegible writing, may lead to the rejection of the papers of a candidate.

 The examinations for 1882-3 will begin in the Convocation Hall, on the 27th September, at 10 o'clock A.M.

DEGREE OF B.A.

I.—The course of study for students who have passed the Junior Matriculation examination extends over four sessions, and for students who have passed the Senior Matriculation examination, over three sessions.

II.—Junior Matriculants must take *one* of the following groups of subjects :—

(1)	(2)	(3)
Jun. Latin,	Jun. French & German,	Jun. French & German,
Sen. Latin,	Sen. French & German,	Sen. French & German,
Jun. Greek,	Jun. Greek,	Jun. Latin,
Sen. Greek,	Sen. Greek,	Sen. Latin,
Jun. Mathematics.	Jun. Mathematics.	Jun. Mathematics.

III.—Senior Matriculants must take *one* of the following groups :—

(1)	(2)	(3)
Sen. Latin,	Sen. French & German,	Sen. French & German,
Sen. Greek.	Sen. Greek.	Sen. Latin.

IV.—All students must take the classes of Junior Philosophy (Mental and Moral), English Literature (Junior and Senior), Junior Physics or Junior Chemistry, together with *one* of the following groups :—

(1)  
History,  
Senior Philosophy.

(2)  
History,  
Senior Mathematics.

(3)  
Senior Mathematics,  
Senior Philosophy.

(4)  
Senior Mathematics,  
Senior Physics.

(5)  
Senior Chemistry,  
Senior Mathematics.

(6)  
Senior Chemistry,  
Senior Philosophy.

(7)  
Senior Chemistry,  
History.

(8)  
Senior Chemistry,  
Natural Science.

(9)  
Senior Mathematics,  
Natural Science.

(10)  
Natural Science,  
Senior Philosophy.

V.—The class of Senior Mathematics must be taken before the class of Senior Physics.

VI.—The candidate for graduation must, in each session, pass an examination upon the subjects he has studied ; but he is not allowed to present himself for examination upon more than three subjects at one time, unless he has previously failed in some subject.

VII.—To pass in any subject the candidate must obtain at least *two-fifths* of the number of marks ; but if at the same examination he obtains Honours in any subject, he may pass in the other subjects upon which he has been examined by obtaining *one-third* of the marks in each subject.

VIII.—In exceptional cases the Senate may allow a candidate to come up for examination without attendance on classes, but he will be examined not only on the class-work indicated in the Calendar, but also on work specially prescribed.

These regulations, adopted in 1880, apply in their completeness only to matriculants of session 1880-81 and thereafter. Matriculants of 1877-78 must, to complete their course of study, take at least two classes, those of 1878-79 at least four classes, and those of 1879-80 at least seven classes; in other respects they are entitled to avail themselves of the options indicated above.

IX.—Graduates of other Colleges are admitted *ad eundem gradum* on producing satisfactory proof of rank and character.

Matriculants of years previous to 1880-81, who have passed in Junior Latin and in Junior Greek, may substitute, for the Senior class in either, the two classes in French and German.

#### DEGREE OF M.A.

I.—This degree is conferred upon the candidate who obtains first class Honours in Mathematics, Physics, or any two of the subjects appended, or the equivalent in second class Honours (second class Honours in two subjects being equivalent to first class Honours in one).

- |                        |                        |
|------------------------|------------------------|
| 1. Latin.              | 6. Mental Philosophy.  |
| 2. Greek.              | 7. Moral Philosophy.   |
| *3. French and German. | 8. English Literature. |
| 4. Natural Science.    | 9. History.            |
| 5. Chemistry.          | 10. Political Economy. |

II.—The degree cannot be obtained until one year after the date of graduation as B.A.

III.—The candidate must compose a satisfactory Thesis in connection with one of the subjects in which he has taken Honours. The Thesis must be sent in to the Secretary of the Senate not later than the last day of March.

---

\* French and German count as one subject.

**DEGREE OF D. Sc.**

I.—This degree is conferred upon candidates who, after taking the degree of M.A., obtain first class Honours in all of the subjects in one of the following groups, except those in which they have obtained such Honours :—

- |                        |                        |                       |           |
|------------------------|------------------------|-----------------------|-----------|
| A.                     |                        | B.                    |           |
| 1. Latin,              | } any two              | 1. Latin,             | } any two |
| 2. Greek,              |                        | 2. Greek,             |           |

| 4. Mathematics,        |                        | 4. Mathematics,       |           |
| 5. Physics,            |                        | 5. Physics,           |           |
| 6. English Literature, | 6. History,            |                       |           |
| 7. History,            | 7. English Literature, |                       |           |
| 8. Political Economy.  | 8. Political Economy.  |                       |           |

II.—The degree cannot be obtained until two years after the date of graduation as M.A.

III.—After passing the required examinations, the candidate must compose, and send in to the Secretary of the Senate, not later than the last day of March, a series of three or more lectures on some topic connected with one of the departments of study in which he has passed. These lectures he will be expected to deliver, in the first session after he has obtained the degree, to the students in the department chosen.

IV.—Candidates who already possess the degree of B.Sc. may obtain the degree of D.Sc. by conforming to the foregoing regulations.

V.—Any B.A. or M.A., on payment of the regis-

tration fee, may attend the classes in Honours free of charge.

**DEGREE OF LL.D.**

This degree is honorary, and is awarded for literary, scientific or professional distinction.

**REGULATIONS FOR HONOURS.**

I.—Honours are given in the following subjects :

- |                       |                        |
|-----------------------|------------------------|
| 1. Latin,             | 7. Political Economy,  |
| 2. Greek,             | 8. English Literature, |
| 3. French,            | 9. History,            |
| 4. German,            | 10. Mathematics,       |
| 5. Mental Philosophy, | 11. Physics,           |
| 6. Moral Philosophy,  | 12. Chemistry,         |
|                       | 13. Natural Science.   |

II.—To obtain Honours in any subject, the candidate must have passed the examinations connected with both the Junior and the Senior classes in that subject.

III.—If a candidate fails to obtain Honours in any subject, or if he only obtains second-class Honours, he may come up for examination again.

IV.—*First-class* Honours are given to the candidate who obtains at least three-fourths of the number of marks allotted to the subject.

V.—*Second-class* Honours are given to the candidate who obtains at least two-thirds of the number of marks allotted to the subject.

## SUBJECTS OF STUDY.

### LATIN.

#### JUNIOR CLASS.

Cicero, De Amicitia.  
Livy, Bk. I., c. 1-30.  
Horace, Odes, Bk. III.  
Translation from authors not specified.  
Latin Grammar and Composition.

#### SENIOR CLASS.

Tacitus, Annals, Bk. II.  
Cicero, Philippic, II.  
Horace, Satires, Bk. I.  
Translation from authors not specified.  
Latin Grammar and Composition.

#### HONOURS.

Tacitus, Annals, Bk. I., II.  
Livy, Bk. XXI.  
Cicero, De Oratore, Bk. II.  
    Philippic, II.  
    Pro Murena.  
Lucretius, Bk. II., III.  
Virgil, Æneid, Bk. VII., VIII.  
Plautus, Trinummnus.  
Terence, Phormio.  
Horace, Odes and Satires.  
Juvenal, Satires III., VII., VIII., X.  
Translation from authors not specified.  
Latin Grammar and Composition.

#### BOOKS RECOMMENDED.

Cruttwell's Roman Literature.  
Peile's Etymology.  
Papillon's Comparative Philology.  
Wordsworth's Fragments and Specimens of  
    Early Latin.  
Allen & Greenough's Latin Grammar.

### GREEK.

#### JUNIOR CLASS.

Xenophon, Anabasis, Bk. VII.  
Euripides, Alcestis.  
Translation from authors not specified.  
Greek Grammar and Composition.

SENIOR CLASS.

Thucydides, Bk. III.  
Demosthenes, Philippic, I.  
Sophocles, Ajax.  
Translation from authors not specified.  
Greek Grammar and Composition.

HONOURS.

Herodotus, Bk. IX.  
Thucydides, Bk. III., VII.  
Demosthenes, De Corona.  
Aristotle, Ethics, I., II., X.  
Plato, Apology.  
Theaetetus.  
Republic, Bk. I., IV.  
Homer, Iliad, Bk. VI., XVIII., XXII.  
Odyssey, Bk. VI., XII., XXI.  
Æschylus, Agamemnon.  
Prometheus.  
Sophocles, Ajax.  
Philoctetes.  
Euripides, Medea.  
Aristophanes, Clouds.  
Pindar, Isthmian and Nemean Odes.

BOOKS RECOMMENDED.

Mahaffy's Greek Literature.  
Goodwin's Greek Grammar.  
Papillon's Comparative Philology.

MATHEMATICS.

JUNIOR CLASS.

*Algebra*—Simple and Quadratic Equations with artifices of reduction and elimination. Theory of Quadratics. Maxima and Minima. Surds. Inequalities. Arithmetic and Geometric series. Ratio, proportion and variation. Permutations and Combinations. Binomial theorem and applications. Logarithms and their application. Exponential Equation. Interest and Annuities. Continued Fractions. Indeterminate analysis. Undetermined co-efficients with applications.

*Geometry*—Euclid. Bks. II., III. and VI., with a portion of Bk. IV. Geometry of planes and solids. (The propositions of Euclid will be treated as per text-book and also by modern methods). Elementary co-ordinate Geometry.

*Trigonometry*—Elementary principles.

SENIOR CLASS.

*Algebra*—Of functions. Nature of roots and factors. Integral roots of an equation. Evaluation of indeterminate expressions. The  $n^{\text{th}}$  term, and the sum of a series. Principle of unde-

terminated co-efficients. Partial fractions. Expansion of Algebraical functions. Reversion of series. Exponential series. Logarithmic series and theory of Logarithms. Expansion of Trigonometrical and Circular functions. Expressions for  $\pi$ . Machin's formula. DeMoivre's formula, &c. General theory of Equations.

*Geometry*—Co-ordinate Geometry of lines of the first and second orders (conics). Elementary co-ordinate Geometry of three dimensions. Theory of limits.

*Trigonometry*—Plane Trigonometry, with the simpler elements of spherical.  
Elements of Differential and Integral Calculus.

HONOURS.

Honour work may be taken up during the year at Senior Mathematics, but the first examination for Honours cannot be taken until the year succeeding the Senior year. The Honour examinations are two in number :—

FIRST.

*Higher Algebra*—Modern Geometry. Recurring series. Theory of numbers. Probabilities, &c.

*Trigonometry*—Spherical; and its application to Astronomy and Navigation.

*Higher Conics*; and analysis of the more common higher plain curves.

Differential and Integral Calculus.

SECOND.

Co-ordinate Geometry of three dimensions. Lines and surfaces of double curvature.

Theory of determinants.

Differential and Integral Calculus.

Elements of Quaternions.

The examinations for Honours may include any portion from the Junior and Senior subjects.

BOOKS FOR REFERENCE.—Snowball's Trigonometry, Salmon's Conics, Salmon's Higher Algebra, Dodgson's Determinants, Williamson's Calculus, Kelland and Tait's Quaternions.

PHYSICS.

JUNIOR CLASS.

Lectures on Mechanics, Hydrostatics and Pneumatics, Heat, Electricity and Magnetism, Sound and Light, with experimental illustrations.

Books recommended: Everett's Text Book of Physics, Balfour Stewart, Ganot, Arnot.

SENIOR CLASS.

Mechanics (Galbraith and Haughton).  
Hydrostatics (Galbraith and Haughton).  
Optics (Dupuis).  
Lockyer's Elementary Lessons in Astronomy.

HONOURS.

Tait and Steele's Dynamics of a Particle.  
Statics and Dynamics.—Earnshaw.  
Hydrostatics.—Phear.  
Optics.—Griffin, Parkinson.  
Astronomy.—Loomis.  
Newton.—Evans, Frost.

MENTAL AND MORAL PHILOSOPHY, AND POLITICAL ECONOMY.

JUNIOR CLASS.

This class meets six days a week, four of which are devoted to Metaphysics, Psychology and Ethics, one to Logic, and one to Political Economy.

The text-books used are Jevons' Lessons in Logic, and Rogers' Manual of Political Economy.

The lectures on Mental and Moral Philosophy embrace a critical account of philosophical systems, and the outlines of a system of philosophy.

Weekly exercises are required of students.

SENIOR CLASS.

This class meets five days a week, and deals with the higher problems of philosophy. During the present session the work of the class will consist mainly in the study and critical examination of the philosophy of Kant, as contained in the Critique of Pure Reason, the Critique of Practical Reason, and the Critique of Judgment.

Students are required to write the essays prescribed.

PRIVATE CLASS.

This class is intended partly for the study of the work prescribed for Honours, but mainly for the independent investigation by students of philosophical systems and theories. It meets five days a week.

HONOURS.

**A. MENTAL PHILOSOPHY.**

Candidates will be examined on the following books :

- Plato's Republic and Theætetus.
- Aristotle's De Anima.
- Descartes' Discourse on Method and Meditations.
- Locke's Essay on the Human Understanding.
- Berkeley's Philosophical Writings (Fraser).
- Hume's Treatise on Human Nature, Vol. I., with Green's Introduction (Green and Grose's edition).
- Kant's Critique of Pure Reason and Prolegomena.
- Mill's System of Logic.

**B. MORAL PHILOSOPHY.**

Candidates will be examined on the following books :

- Aristotle's Nichomachean Ethics.
- Spinoza's Ethics and De Intellectus Emendatione.
- Hume's Treatise on Human Nature, Vol. II., with Green's Introduction (Green and Grose's edition).
- Kant's Critique of Practical Reason (Abbott).
- Hegel's Philosophy of History.
- Maine's Ancient Law.

Familiarity with the substance of the main philosophical systems of ancient and modern times is expected.

**C. POLITICAL ECONOMY.**

Candidates are required to show a thorough knowledge of the Principles of Political Economy. They will be examined on the following books, although a minute knowledge of them is not expected :

Smith's Wealth of Nations (Rogers' edition).  
Mill's Principles of Political Economy.  
Fawcett's Manual of Political Economy.  
Roscher's Principles of Political Economy.

In addition, they are required to write an essay on the Commercial Relations of Canada to Great Britain and the United States. The essay must be given in to the Secretary of the Senate not later than April 7, 1883.

#### CHEMISTRY.

##### JUNIOR CLASS.

The subjects of study in this class are :

- 1 The leading elements with their more prominent compounds. Chemical system of weights and measures. Specific weight. Atomic weight. Gaseous volumes, &c. Solution. Diffusion and osmose.
- Heat in its more observable manifestations. Thermometry. Potential heat. Conduction. Convection, &c.

##### SENIOR CLASS.

The chemical elements more thoroughly studied.  
Chemistry of Carbon compounds. Chemical Philosophy. Crystallization. Principles of Crystallography. Heat in its phenomenal and dynamical relations. Theory of a gas.  
Radiant energy. Its prominent laws. The Spectrum. The Spectroscope.

In the Junior Class the subject will be studied more in its phenomenal relations; in the Senior Class, more in its theoretic and fundamental relations.

Books for consultation—Roscoe's Elementary Chemistry—Fownes' Chemistry by Watts—Youmans' Chemistry—Millers' Chemistry—Remsen's Theoretical Chemistry—Lockyer on the Spectroscope.

##### HONOURS.

The course for Honours extends over two years, and consists of book-work and laboratory work.

A thorough knowledge of their elements. Solutions of problems. Crystallography.

A thorough knowledge with the principles. The principles of Chemical technology. The composition.

The Laboratory time during

The first experiments for the the chemical action of chemical moist react

The second separation single salt of Detection of in the wet volumetric titative analysis pounds.

A working model held upon the

Books for consultation—Schorlemmer's Carbon Chemistry—Fownes' Theoretical Chemistry—Fownes' Analytical Chemistry

The lectures on Botany, Zoology

### BOOK-WORK.

#### FIRST EXAMINATION.

A thorough knowledge of all the prominent chemical reactions, with their explanations, where well understood.  
Solutions of problems involving chemical equivalents.  
Crystallography and Physical Mineralogy.

#### SECOND EXAMINATION.

A thorough knowledge of the more important Organic compounds, with their nuclei and derivatives.  
The principles of Organic Analysis.  
Chemical technology of the more commonly employed products.  
The composition and uses of the more commonly occurring minerals.

#### LABORATORY WORK.

The Laboratory may be attended for the first time during the Senior class.

The first year's work will consist of experimentations for the purpose of determining or illustrating the chemical properties of matter and the nature and action of chemical forces. Principal blowpipe and moist reactions of prominent minerals.

The second year's work will consist of a complete separation and detection of bases and acids in a single salt or a comparatively simple mixture of salts. Detection of common minerals by the blow-pipe and in the wet way. Gravimetric and Volumetric Quantitative analysis of a few commonly occurring compounds.

A working examination in the Laboratory will be held upon the second year's work.

Books for consultation—Fownes' Chemistry, by Watts—Roscoe and Schorlemmer's Chemistry—Schorlemmer's Chemistry of the Carbon Compounds—Harcourt and Madan's Practical Chemistry—Fresenius' Qualitative Analysis—Thorpe's Quantitative Chemical Analysis—Wagner's Chemical Technology.

#### NATURAL SCIENCE.

The lectures embrace an outline of the subjects of Botany, Zoology and Geology.

The Botany deals with the minute Anatomy, the Physiology and the Morphology of plants, together with the principles of Botanical Classification, and with a study of a few typical orders.

The Zoology includes the study of the leading types of animal structure, together with a general view of comparative Anatomy and Physiology.

The Geology includes Dynamical Geology, Lithology, Palæontology and Systematic and Chronologic Geology.

No text-book is used in this class, but the following should be consulted :

Huxley and Martin's Elementary Biology.  
Gray's Structural Botany.  
Macnab's Text Book of Botany.  
Packard's Zoology.  
Dana's Manual of Geology.

Students are required to give in monthly essays.

### HONOURS.

The course for Honours extends over two years, and consists of Book-work and Laboratory work. Students intending to take Honours will find it greatly to their advantage to collect as many specimens as possible of the objects belonging to each department of study.

#### FIRST YEAR. EXAMINATION.

*Botany*—A practical acquaintance with the leading orders of the Phænogamous plants of Canada. Gray's Manual of Botany and Wood's Class-Book of Botany will be used for the determination of species.

Gray's Structural Botany.  
Bessey's Botany.  
Macnab's Text-Book of Botany.

*Zoology*—

*Zoology*—An accurate knowledge of the structure, habits, and distribution of all the native species of one Class or Division of the Vertebrated Animals of Canada.

Huxley's Vertebrated Animals.  
Jordan's Manual of American Vertebrates.  
Packard's Zoology.  
Foster & Balfour's Elements of Embryology.

*Geology*—A practical acquaintance with the common rocks and minerals.

An accurate knowledge of

Dana's Manual of Geology.  
Lyell's Principles of Geology.  
Page's Physical Geography.

SECOND YEAR. EXAMINATION.

*Botany*—A more extensive knowledge of General Botany, including Distribution of Plants in Time and Space. A practical acquaintance with one of the larger Divisions or Classes of the Cryptogamous plants of Canada.

Economic Botany.  
Sachs' Text-Book of Botany.

*Zoology*—An accurate knowledge of the Morphology, Development and Distribution in Time and Space of the principal Groups of Animals. A special acquaintance with some larger Class or Division of the Invertebrated Animals of Canada.

Huxley's Invertebrated Animals.  
Wallace's Distribution of Animals.  
Mivart's Elementary Anatomy.  
Huxley's Elementary Physiology.

*Geology*—A more extensive knowledge of theoretical and practical Geology. A special acquaintance with Canadian Geology.

Chapman's Geology of Canada.  
Chapman's Synopsis of Palæontology.  
Nicholson's Palæontology.  
Croll's Climate and Time.

## HISTORY.

- Lectures. I. Ancient History—(1) On Early Aryan Institutions. (2) On the development of Greek and Roman civilization.
- II. Modern History—(1) On the Feudal System. (2) On the rise of the Communes in France. (3) On the development of the French Monarchy. (4) On the British Constitution.

## FACULTY OF LAW.

### MATRICULATION.

I.—The Junior Matriculation examination is the same as the Junior Matriculation in Arts.

II.—The Senior Matriculation examination is the same as the Senior Matriculation in Arts, with the addition of Taswell-Langmead's Constitutional History.

### DEGREE OF LL.B.

I.—The course of study for students who have passed the Junior Matriculation examination extends over four sessions, and for students who have passed the Senior Matriculation over three sessions.

II.—Junior Matriculants must take the following subjects:—

- Junior Latin.
- Senior Latin.
- Junior Mathematics.
- Junior Physics or Chemistry.
- Junior French.
- Senior French.
- Junior Philosophy and Political Economy.
- English Literature.
- History.
- { Roman Law and
- { Constitutional Law and History.
- The Law of Real Property.
- Equity.
- Common Law.
- Criminal Law, and Medical Jurisprudence.
- Commercial Law.

III.—Senior Matriculants must take the following subjects:—

- Senior Latin.
- Junior Physics or Chemistry.

Senior French.  
Junior Philosophy and Political Economy.  
English Literature.  
History.  
{ Roman Law and  
{ Constitutional Law and History.  
The Law of Real Property.  
Equity.  
Common Law.  
Criminal Law, and Medical Jurisprudence.  
Commercial Law.

IV.—The candidate for graduation must in each session pass an examination upon the subjects in Arts he has studied, but he is not allowed to present himself for examination upon more than three of those subjects at one time, unless he has previously failed in some subject.

V.—He must also pass an examination in the last year of his course in all the Professional subjects prescribed.

#### CURRICULUM OF LAW FACULTY.

The legal studies for the degree of LL.B. will extend over three sessions.

Every candidate must have regularly attended the classes prescribed in Constitutional History, Criminal and Commercial Law, Common Law, Real Property Law, Equity, Roman Law, and Medical Jurisprudence, throughout his course.

Any graduate in Arts of Queen's University, who is also a Barrister-at-Law, will be admitted to the degree of LL.B. upon passing an examination to be prescribed by the Faculty.

#### COURSE OF INSTRUCTION.

1. CONSTITUTIONAL HISTORY. Two lectures a week. Text books recommended—Stubbs' Constitutional History; Hallam's History of British Constitution; Taswell-Langmead's English Constitutional History.

2. CRIMINAL AND COMMERCIAL LAW. One lecture a week. Text

books recommended—  
mentaries, Vol.

3. ROMAN LAW. Text books—  
years. Text books—  
Jenckens' Commentaries on  
International Law.

4. COMMON LAW. Text books—  
Smith's Manual of Law,  
Vol. I. Second Edition.  
Underhill on Torts.

5. MEDICAL JURISPRUDENCE.  
Third year. Text books—

6. REAL PROPERTY. Text book—  
Williams' Real Property,  
two lectures a week.  
Dors and Purchas.

7. EQUITY. Text book—  
a week during the last  
Manual of Equity and  
Jurisprudence.

There will be examinations in  
the various courses.

Two prizes of \$20, will be given to the  
Kirkpatrick, standing respectively  
in the examinations.

Graduates in Arts for the  
degree of LL.B., must attend the  
subjects: Taswell-Langmead's  
Constitutional History;  
(Sandar's edition) of  
Law; Wheaton's International  
Law; Underhill on Torts;  
Equity; Taylor's

Candidates are expected to attend

books recommended—Smith's Mercantile Law: Blackstone's Commentaries, Vol. IV.: Russell on Crimes: Harris' Criminal Law.

3. ROMAN LAW. One lecture a week during the Second and Third years. Text books—Justinian (Sandars' edition), or Tomkins and Jenckens' Compendium of Roman Law: Kent's Commentary on International Law, or Wheaton's International Law.

4. COMMON LAW. Two lectures a week. Text books—*First year*, Smith's Manual of Common Law and Blackstone's Commentaries, Vol. I. *Second and Third years*, Smith and Pollock on Contracts, Underhill on Torts.

5. MEDICAL JURISPRUDENCE. Two lectures a week during the Third year. Text book—Taylor's Medical Jurisprudence.

6. REAL PROPERTY. One lecture a week during First year. Text book—Williams on Real Property. During Second and Third years two lectures a week. Text books—Leith's Blackstone, Dart's Vendors and Purchasers.

7. EQUITY. One lecture a week during First year: two lectures a week during Second and Third Years. Text books—Smith's Manual of Equity: Snell's Principles of Equity: Taylor's Equity Jurisprudence.

There will be examinations from time to time in the various classes.

Two prizes, one of the value of \$25 by G. A. Kirkpatrick, Esq., M.P., the other of the value of \$20, will be given to the students of the first year standing respectively first and second at the written examinations at the close of the session.

Graduates in Arts, being Barristers-at-law, will be admitted to the degree of LL.B., upon passing an examination on the following subjects: Taswell-Langmead's English Constitutional History; May's Constitutional History; Russell on Crimes; Justinian's Institutes, (Sandar's edition); Tomkins and Jencken's Compendium of Roman Law; Wheaton's International Law; Pollock on Contracts; Underhill on Torts; Dart's Vendors and Purchasers; Snell's Principles of Equity; Taylor's Equity Jurisprudence; Maine's Ancient Law.

Candidates are required to send notice to the Registrar of their intention to attend this examination by the 20th day of March.

## FACULTY OF THEOLOGY.

Matriculation and pass examinations begin on Wednesday, 1st November.

The prescribed order of classes must be observed by all students who are candidates for the degree of Bachelor of Divinity.

### I. DIVINITY.

Lectures on the Evidences of Religion natural and revealed, including the canonicity, authenticity, genuineness and credibility of the Biblical Records; the Inspiration and Authority of the Scriptures; Systematic Theology; the Pastoral Office; and Homiletics—with prelections and examinations on Hill's Lectures in Divinity, Butler's Analogy, and Greek Testament for Doctrinal Exegesis. Students have opportunities of conducting devotional exercises, practising pulpit elocution, and performing missionary work. The course extends over three sessions, that of 1881-2 being the first in order.

### II. HEBREW AND CHALDEE.

#### FIRST YEAR.

Wolfe's Hebrew Grammar.  
Gen. XIV—XVIII.  
Josh. VIII—X.  
Job I., II.  
1 Sam. I., IV.  
Ps. XXXV—L.  
Translations into Hebrew.

#### SECOND YEAR.

Gesenius' Hebrew Grammar.  
Exod. XXXII—XXXIV.  
Num. XI., XII.  
Jer. XII—XIV.  
Ps. I.—LXVII.  
Is. XL., XLI.  
Prov. XXX., XXXI.  
Translations into Hebrew.

#### THIRD YEAR.

## DEGREE OF BACHELOR OF DIVINITY.

### REGULATIONS.

I.—Candidates for the Degree of Bachelor of Divinity (B.D.) must be graduates in Arts of this University, or of a University whose degrees are recognized for this purpose by the Senate.

II.—The degree shall not be conferred until the candidate has completed his theological curriculum, with a view to the ministry in the Church to which he belongs, and has passed a satisfactory examination in the branches of Theology taught in this University.

III.—The subjects of examination shall be in two departments, the first embracing—(1) Hebrew and

(2) the Evidences of Religion and the Inspiration of Scripture; and the second embracing—(1) Church History, (2) Biblical Criticism, and (3) Systematic Theology.

IV.—Candidates who have completed their theological course may be examined in either of these departments, and may defer their examination in the other department, provided there be not a greater interval than two years between their two examinations.

V.—Students who have completed all the sessions but one of their theological course, may be admitted to examination in the first department.

VI.—A candidate may, subject to the preceding regulations, appear at any University examination in Theology, provided he gives two weeks' notice of his intention to the Registrar.

VII.—When a student, who is a candidate for the degree, shall obtain at a pass examination on any subject two-thirds of the marks allotted to the subject, he may, on recommendation of the examiner, be exempted from further examination on that subject.

#### SUBJECTS OF EXAMINATION.

##### DEPARTMENT I.

1. Evidences of Religion, and Inspiration of Scripture.
2. Hebrew, Isaiah xl--lxvi. Chaldee, Daniel ii., iii.

##### DEPARTMENT II.

1. Church History — Centuries i—iii; the Reformation; the Church in Scotland.
2. Biblical Criticism — Epistle to Romans in Greek; Biblical Hermeneutics; Hammond's Textual Criticism of New Testament. Introduction to Pentateuch and Gospel of John.
3. Systematic Theology — Person of Christ, Doctrine of Sin, Doctrine of the Atonement, Justification, Work of the Holy Spirit.

The following books may be consulted:—Paley's Evidences,

Butler's Analogy  
Bampton Lectures  
ary essay); V  
Inspiration;

### STUDENTS' MISSIONARY ASSOCIATION.

This Association holds a weekly meeting on Saturday morning, in the Divinity class-room. In addition to devotional exercises and the ordinary business of the Association, reports are read by members from time to time, respecting the fields occupied by them during the preceding summer under the Home Mission Board of the General Assembly. A Sabbath morning prayer meeting is held in the classical room under the management of the association. The Association also assists the Convener of the Presbytery's Home Mission Committee in filling appointments for Sabbath day services in the neighbourhood of Kingston.

## GRADUATION IN MEDICINE.

The degree of Doctor of Medicine (M.D.) is conferred upon candidates who comply with the following regulations :—

I. Except as provided in the next regulation, every candidate must pass a matriculation examination upon the following subjects :

English Language, Grammar and Composition.

Arithmetic, with Vulgar and Decimal Fractions.

Algebra, including Simple Equations.

Geometry, first two books of Euclid.

Latin, Grammar and translation (Cæsar B. G., Bk. IV.,

c. 20—36 ; Bk. V., c. 8—23. Cicero, Pro Archia.

Virgil, Æneid, Bk. II., vv. 1—317. Ovid, Heroides,

Epistles V., XIII.)

Natural Philosophy, as in Stewart's *Physics*.

II. Graduates from a recognized University are not required to pass the above Matriculation examination. Matriculants of a recognized University are required to pass an examination or to show that they have passed an examination in Natural Philosophy.

III. Candidates who are not Graduates in Arts must furnish evidence of having attended some recognized Medical School for not less than four full sessions, must have passed all the required examinations, and must be recommended by the Faculty of the Royal College of Physicians and Surgeons in affiliation with Queen's University and by the Examiner in medicine appointed by the Senate.

Candidates who are Graduates in Arts will be required to attend only three sessions.

## EXAMINATIONS.

IV. The examinations required are a Primary, an Intermediate, and a Final.

1. The Primary examination is upon the subjects of Botany, Theoretical Chemistry, and Physiology, and is open to students only at the close of their second session. One session in Botany, two in Chemistry and two in Physiology are required.

2. The Intermediate examination is upon Anatomy, Materia Medica, Practical Chemistry, Medical Jurisprudence, and Histology, and is open to students only at the close of their third session.

But students who are Graduates in Arts are allowed to take the Intermediate and the Primary examinations at the same time. One session in Practical Chemistry, and two sessions in Medical Jurisprudence, in Anatomy and in Materia Medica are required.

3. The Final examination is open to students at the close of their course, and is upon Practice of Medicine, Surgery, Midwifery, and Sanitary Science. Two sessions' attendance upon each is required.

V. A candidate cannot be admitted to any of the foregoing examinations, until he has furnished satisfactory evidence of having complied with the regulations in regard to Matriculation.

## PRIZES.

Four valuable Prizes are offered by the Medical Faculty every year, viz. : Two House Surgeoncies of the Kingston Hospital—six months each—and two Demonstratorships of Anatomy, in value \$60 each. These Prizes are awarded to the four students making the highest number of marks at the second professional examination.

Also, two prizes, a first and second, of the respective values of \$15 and \$10, will be given next session for the two best Anatomical preparations. Subjects to be announced at the opening of the session, and preparations to be approved of by the Faculty.

Two Medals given by Dr. Murdoch Mathesson, of Queensland, a graduate of this University, will be awarded next session—a silver medal to the student who stands highest at the Primary examination, and a gold medal to the student who stands highest at the Final examination.

For University Prizes, Medals, etc., see pages 41, 42.

#### NOTICES.

1. The Examinations of the Medical Council will be held in the City of Kingston as well as in Toronto, so that students of this College will be saved the trouble and expense of attending examinations in Toronto.

2. Persons desiring to obtain full information respecting the curriculum in Medicine, Fees, etc., should apply to the Registrar of the Medical Faculty, Fife Fowler, M.D., Kingston, Ont.

## SCHOLARSHIPS.

### SCHOLARSHIPS IN ARTS.

Scholarships in Arts have *endowment nominations* connected with them, securing exemption from class fees for *one* session, and thereby adding from \$18 to \$24 to the given value of each.

Any student who passes in English is eligible for a scholarship; but scholarships marked *close* can be held only by students having in view the ministry of the Presbyterian Church, being given by their founders upon that condition.

Scholarships awarded upon matriculation examinations are tenable during the first session, and those awarded upon sessional examinations are tenable during the following session, except open scholarships, gained by students in the last year of their course in Arts, which are paid at once.

Successful candidates for scholarships must make *at least* two-thirds the number of marks allotted to the subject or subjects upon which the scholarship is awarded.

### I. JUNIOR MATRICULATION SCHOLARSHIPS.

These are prizes in money for literary articles, essays, etc., as specified under each particular prize. The prizes are given at Convocation.

#### CONDITIONS OF COMPETITION.

1. Competitive papers (except for Thorburn, which see), must be given in to the Secretary of the Senate not later than the 2nd November.
2. Each paper is to bear a motto, instead of the author's name, and to have attached to it a sealed envelope, bearing the same motto and containing a written declaration over the author's signature, to the effect that it is his unaided composition.
3. The envelopes attached to successful papers shall be opened and the writers' names made known at the closing Convocation of the session.
4. The best productions must be reported by the examiners to be of sufficient merit.
5. All successful productions shall be the property of the University, and shall be at the disposal of the Senate.

#### LEWIS.

Value, \$25. Given for the best lecture on Luke XVIII., 9—14 inclusive. Open to students of Theology registered in session 1882-3.

#### MACPHERSON.

Value, \$25. Given by the Hon. David L. MacPherson, Toronto, for the best essay on the Influence of Britain on India. Open to registered students of session 1882-3.

CARMICHAEL.

Value, \$25. Given by the Rev. James Carmichael, of King, for the best essay on the Spectroscope and Spectrum Analysis. Open to registered students of the present or preceding session.

MACLENNAN.

Value, \$25. Given by Donald B. Macleennan, Esq., M.A., Q.C., Cornwall, for the best essay on Recent English Psychology. Open to registered students of the present or preceding session.

Two prizes, each of the value of ten dollars in books, will be annually offered for competition among undergraduates for the best composition in Latin and Greek Prose respectively. Subjects for composition, 1882-3:—Latin Prose, Johnson's Rambler, No. 164 to "praise of genius." Greek Prose, Prescott's History of Charles V., Section I. down to "involved in darkness and in fable."

CHANCELLOR'S ESSAYS.

Two prizes of \$50 each to be awarded for the best English essays on the undermentioned subjects. The essays to be sent in to the University Registrar on or before University Day, 1882. If the essays be not of sufficient merit, the prizes will be open for another competition :

1. Specially for Divinity students, but open to all :  
"Should the Presbyterian Church in Canada return to the liturgy of the time of Knox, or adopt in public worship a liturgy in any form ?"

2. Specially for Medical students, but open to all :  
"How best to develop Brain Power in youth so as to preserve it in health and vigor for useful application in manhood and old age."

CARRUTH

Given by Jo

THORBURN.

Value, \$40. Given by John Thorburn, Esq., M.A., LL.D., (President of the Ottawa Literary and Scientific Society), for the best history of the County of Grenville—the history to contain details of such matters as the original characteristics, struggles, etc., of the first settlers; the rise and progress of municipal institutions, mechanics' institutions, benevolent, industrial and other establishments, newspapers, etc.; the first churches, schools, etc.; the development of agricultural and mineral resources; and events of a general character by which the country may have been particularly affected. *Any person may compete.* Competitive papers must be in the hands of the Registrar, Professor Mowat, not later than the 15th February. The successful history, or a copy of it, shall be placed in the archives office at Ottawa.

---

MEDALS.

*No Gold Medal will be awarded to any candidate who fails to obtain three-fourths of the whole number of marks. No Silver Medal will be awarded to any candidate who fails to obtain at least two-thirds of the whole number of the marks.*

PRINCE OF WALES' GOLD MEDAL IN CLASSICS.

For the best examination on the honour work in Latin and Greek. Open to all registered students.

CARRUTHERS' GOLD MEDAL IN MATHEMATICS.

Given by John Carruthers, Esq., Kingston, for the best examination on the honour work in Mathematics. Open to all registered students.

CARRUTHERS' GOLD MEDAL IN CHEMISTRY.

Given by John Carruthers, Esq., for the best ex-

amination on the honour work in Chemistry. Open to all registered students.

THE MAYOR'S GOLD MEDAL IN MENTAL AND MORAL PHILOSOPHY.

Given last session by John Gaskin, Esq., for the best examination on the honour work in Mental and Moral Philosophy, as prescribed for the session. Open to all undergraduates or graduates taking the honour work in those subjects.

CHANCELLOR'S GOLD MEDAL IN HISTORY, AND ENGLISH LANGUAGE AND LITERATURE.

Given by the Chancellor for the best examination on the honour work in those subjects, with an essay on Representative Government. Open to undergraduates or graduates taking the honour work.

GRADUATES' GOLD MEDAL IN POLITICAL ECONOMY.

*HONOURS, MEDALS, PRIZES, ETC.*

HONOUR LIST FROM 1877.

1877.

- William H. Irvine, Ontario. First-class in Mathematics and Natural Philosophy.  
Archibald Alison Mackenzie, Scotland. First-class in Classics, History, Rhetoric and English Literature, Logic, Metaphysics and Ethics.

1878.

- David Alexander Givens, Ontario. First-class in Mathematics and Natural Philosophy.  
George Macdonald, Ontario. First-class in Classics, History, Rhetoric and English Literature, Logic, Metaphysics and Ethics.  
Finlay Malcolm MacLennan, Ontario. First-class in Mathematics and Natural Philosophy.  
George Ritchie, Ontario. First-class in Classics, History, Rhetoric and English Literature, Logic, Metaphysics and Ethics.

1879.

- William Briden, Ontario. First-class in Classics.  
Hugh H. McMillan, Ontario. Second-class in Mathematics and Natural Philosophy.  
Daniel McTavish, Ontario. First-class in Classics.  
William Stewart, Ontario. First-class in Mathematics and Natural Philosophy.

1880.

- Adam R. Linton, Ontario. First-class in Classics.  
Archibald B. McCallum, Ontario. First-class in Mental and Moral Philosophy.

1881.

- John P. Hume, Ontario. First-class in Mathematics and Physics.  
Bidwell N. Davis, Ontario. First-class in Mathematics.  
Bidwell N. Davis, Ontario. First-class in Chemistry.  
John P. Hume, Ontario. First-class in Chemistry.  
Adam R. Linton, Ontario. Second-class in Chemistry.  
Adam R. Linton, Ontario. First-class in Mental and Moral Philosophy.  
Daniel McTavish, Ontario. First-class in Mental and Moral Philosophy.  
James R. O'Reilly, Ontario. First-class in Political Economy.  
Roderick McKay, Nova Scotia. First-class in Latin.  
Samuel W. Dyde, Ontario. First-class in Latin.

Alexander L. Smith, Ontario. Second-class in Latin.  
Richard W. Irvine, Ontario. Second-class in Latin.  
Samuel W. Dyde, Ontario. First-class in Greek.  
Alexander L. Smith, Ontario. First-class in Greek.  
Henry C. Fowler, Ontario. First-class in History.  
Arpad Givan, Ontario. First-class in History.  
John Young, Ontario. First-class in History.  
Henry C. Fowler, Ontario. First-class in English Literature.  
Arpad Givan, Ontario. First-class in English Literature.  
John Young, Ontario. First-class in English Literature.

1882.

Henry T. Shibley, B.A., Ontario. First-class in History.  
Charles J. Cameron, Nova Scotia. First-class in Latin.  
Alex. L. Smith, Ontario. Second-class in Latin.  
Charles J. Cameron, Nova Scotia. First-class in Greek.  
Arpad Givan, Ontario. Second-class at first honour examination  
in Mathematics.  
William Nicol, Ontario. Second-class at first honour examination  
in Chemistry.  
John Hay, Ontario. First-class in Philosophy.  
Robert Ferguson. First-class in History.  
Joshua R. Johnston. Second-class in History.  
Robert Ferguson. First-class in English Literature.  
Joshua R. Johnston. Second-class in English Literature.  
Alexander McLeod. First-class in Political Economy.

EXAMINATION PAPERS.

SESSION 1881-82.

FACULTY OF ARTS.

MATRICULATION EXAMINATION.

JUNIOR MATRICULATION.

ENGLISH LANGUAGE.

1. Analyse the following passage. Parse the words in italics, and give the derivation of each :

' Now, yield thee, or by Him who made  
The world, thy heart's blood dyes my blade !'—  
' Thy threats, thy mercy, I defy !  
Let *recreant* yield, who fears to die.'  
—Like adder darting from his coil,  
Like wolf that dashes through the toil,  
Like mountain-cat who guards her young,  
Full at Fitz-James's throat he sprung ;  
*Received*, but *recked* not not of a wound,  
And locked his arms his foeman round.—  
Now, gallant Saxon, hold thine own !  
No maiden's hand is round thee thrown !  
That *desperate* grasp thy frame might feel,  
Through bars of brass and triple steel !—  
They tug, they strain ! down, down they go,  
The Gael above, Fitz-James below,  
The Chieftain's gripe his throat *compressed*,  
His knee was planted in his breast ;  
His *clotted* locks he backward threw,  
Across his brow his hand he drew,  
From blood and mist to clear his sight,  
Then *gleamed* aloft his dagger bright !—  
But, while the dagger gleamed on high,  
*Reeled* soul and sense, reeled brain and eye.  
Down came the blow ! but in the heath  
The *erring* blade found bloodless sheath.  
The *struggling* foe may now *unclasp*  
The fainting Chief's *relaxing* grasp ;  
Unwounded from the dreadful close,  
But breathless all, Fitz-James arose.

avoidu

2. Name the principal poets contemporary with Sir Walter Scott, and their chief poems.
3. State the period and the scene in which the poem is laid ; also name the principal characters.
4. Scan the first six lines of the above passage.

MATHEMATICS-

NOTE—The principal steps of the work must be shown.

- i. Simplify the following :

$$\text{i. } \frac{\frac{2}{3} \times 3\frac{3}{4}}{\cdot 8\dot{1} \times 3\frac{2}{3}} \div \frac{9\cdot 86}{\cdot 0136}$$

$$\text{ii. } a - 1 + \frac{1}{a + 1}$$

$$x - \frac{1}{x}$$

$$\text{iii. } \frac{x - 1 - \frac{x - 1}{1 - \frac{x}{2}}}{x - 1 - \frac{x - 1}{1 - \frac{x}{2}}}$$

2. Show that—

$$\begin{aligned} & (x+y)(y+z)(z+x) + xyz \\ &= (x+y+z)(xy+yz+zx) \end{aligned}$$

3. Give the rule for pointing into periods in extracting roots.

Find the value of  $\sqrt{\frac{\sqrt{3}-\sqrt{2}}{\sqrt{5}}}$

4. If lead is 11.3 times as heavy as water, and zinc 7.2 times as heavy, how many times heavier than water is a mixture of equal bulks of lead and zinc ?
5. An imperial gallon of water weighs 10 pounds avoirdupois, and a cubic inch of water weighs

252.5 grains. A metre is 39.37 inches, and one-tenth of a metre cubed is a litre. Find the number of imperial gallons in a litre.

6. Resolve into factors—

i.  $22x - 15x^2 - 8$

ii.  $(x + y)^3 - (x - y)^3$

iii.  $4x^4 - x^2 + 2x - 1$

7. Solve the following equations—

i.  $x + \frac{1}{x+1} = \frac{(x-2)(x+4)}{x+1}$

ii.  $\frac{2x-y}{3} = \frac{3y+2z}{4} = \frac{x-y-z}{5} = 4$

8. The sum of two numbers is 7 and the difference of the squares is 21, find them.

9. What parts of a triangle must be given in order to determine it ?

10. The three angles of a triangle are equal to two right angles.

Hence the interior angles of a pentagon are together equal to six right angles.

11. If  $ABC$  be a triangle acute angled at  $B$ , and  $AD$  the perpendicular upon  $BC$ ; then, the square upon  $AC$  together with twice the rectangle  $BD \times BC$  is equal to the sum of the squares upon  $BA$  and  $BC$ . (Euc. II. 13.)

What does this relation become when the triangle is so changed that :

i.  $A$  falls upon the base between  $B$  and  $C$ .

ii.  $A$  falls upon the base produced beyond  $C$ .

iii. the point  $D$  falls upon  $B$  ?

12. The sides of a triangle are  $2a$ ,  $2b$ , and  $2c$  respectively. Find the length of the line drawn from the opposite angle to the middle point of the base  $2b$ .

LATIN.

FIRST PAPER.

I.

Translate :

Unum genus est eorum, qui magno in aere alieno maiores etiam possessiones habent, quarum amore adducti dissolvi nullo modo possunt. Horum hominum species est honestissima : sunt enim locupletes : voluntas vero et causa impudentissima. Tu agris, tu aedificiis, tu argento, tu familia, tu rebus omnibus ornatus et copiosus sis et dubites de possessione detrudere, acquirere ad fidem ? Quid enim expectas ? bellum ? Quid ergo ? in vastatione omnium tuas possessiones sacrosanctas futuras putas ? An, tabulas novas ? Errant qui istas a Catilina expectant : meo beneficio tabulae novae proferentur, verum auctionariae. Neque enim isti, qui possessiones habent, alia ratione ulla salvi esse possunt. Quod si maturius facere voluissent neque, id quod stultissimum est, certare cum usuris fructibus praediorum, et locupletioribus his et melioribus civibus uteremur.

1. Parse *adducti, dissolvi, sis, dubites, futuras.*
2. Derive *alieno, possessiones, voluntas, aedificiis, fructibus.*
3. Name the chief verbs that govern the ablative in Latin.

II.

Translate :

Ille erat unus timendus ex istis omnibus, sed tam diu, dum urbis mœnibus continebatur. Omnia norat, omnium aditus tenebat : appellare, temptare, sollicitare poterat, audebat : erat ei consilium ad facinus aptum, consilio autem neque lingua neque manus deerat. Iam ad certas res conficiendas certos homines delectos ac descriptos habebat. Neque vero, cum aliquid mandarat, confectum putabat : nihil erat quod non ipse obiret occurreret, vigilaret laboraret. Frigus, sitim, famem ferre poterat.

1. Parse *timendus, norat, audebat, obiret.*
2. Derive *temptare, sollicitare, mandare* ; and compare their meaning with that of their English derivatives.
3. Sketch the history of the Catilinarian conspiracy.

III.

Translate :

Ante quam de re publica, patres conscripti, dicam ea, quae dicenda hoc tempore arbitror, exponam vobis breviter consilium et profectionis et reversionis meae. Ego cum sperarem aliquando ad vestrum consilium auctoritatemque rem publicam esse revocatam, manendum mihi statuebam quasi in vigilia quâdam consulari ac senatoria. Nec vero usquam discedebam nec a re publica deiiciebam oculos ex eo die, quo in aedem Telluris convocati sumus. In quo templo, quantum in me fuit, ieci fundamenta pacis Atheniensiumque renovavi vetus exemplum: Graecum etiam verbum usurpavi, quo tum in sedandis discordiis usa erat civitas illa atque omnem memoriam discordiarum oblivione sempiterna delendam censi.

SECOND PAPER.

I.

Translate :

Parce metu, Cytherea; manent immota tuorum Fata tibi; cernes urbem et promissa Lavini Mœnia, sublimemque feres ad sidera cœli Magnanimum Ænean; neque me sententia vertit. Hic tibi-fabor enim, quando hæc te cura remordet, Longius et volvens fatorum arcana movebo— Bellum ingens geret Italia, populosque feroces Contundet; moresque viris et mœnia ponet, Tertia dum Latio regnantem viderit æstas, Ternæque transierint Rutulis hiberna subactis. At puer Ascanius, cui nunc cognomen Iulo Additur, Ilus erat, dum res stetit Iliæ regno, Triginta magnos volvendis mensibus orbes Imperio explebit, regnumque ab sede Lavini Transferet, et longam multa vi muniet Albam.

1. Parse *parce*, *cernes*, *vertit*, *contundet*, *viderit*.
2. Explain the construction of *metu*, *Rutulis*, *volvendis*, *mensibus*.
3. Give some account of Virgil's life.

Pluris opes nunc sunt, quam prisci temporis annis,  
Dum populus pauper, dum nova Roma fuit ;  
Dum casa Martigenam capiebat parva Quirinum,  
Et dabat exiguum fluminis ulva torum.  
Jupiter angusta vix totus stabat in æde :  
Inque Jovis dextra fictile fulmen erat.  
Frondebis ornabant, quæ nunc Capitolia gemmis :  
Pascebatque suas ipse senator oves.  
Nec pudor in stipula placidam cepisse quietem,  
Nec fœnum capiti supposuisse fuit.  
Jura dabat populis posito modo consul aratro :  
Et levis argenti lamina crimen erat.

1. Parse *crevit*, *habendi*, *pluris*, *annis*, *pascebat*, *cepisse*.
2. Derive *flumen*, *fictile*, *fulmen*, *crimen*.
3. Scan the first two lines of the passage.

- i. Parse : *devint*,

6. What position does the adverb take in French (1) with simple tenses, (2) with compound tenses?
7. Distinguish between *chaque* and *chacun*. Give examples of their use.
8. Translate the words *du* and *dû*; *sur* and *sûr*; *des*, *dès* and *les dés*; *cru* and *crû*; and *mur* and *mûr*.
9. When are personal pronouns used as subjects placed after the verb?

Translate into French :

- a. Alexander gave to Porus a kingdom larger than the one he had before.
- b. Socrates passed the last day of his life in discoursing on the immortality of the soul.
- c. We tell him the truth, but he will not believe us.
- d. Write injuries upon sand, and benefits on brass.
- e. It was at the entrance of Edward the Third into Calais, in 1347, that the drum was heard to beat for the first time.

## II.

Translate into English :

La situation de Hoche devint alors très-pénible. La paix, dictée en quelque sorte par les insurgés et par Cormatin, représentant de l'agence royaliste en Bretagne et en Vendée, donna au parti qui voulait continuer l'insurrection et la guerre une confiance exagérée en ses forces. " Il n'y eut pas, écrivait alors l'adjudant général Savary, un seul insurgé des deux côtés de la Loire, qui ne s'imaginât avoir fait grâce à la République." Une telle présomption engendra le mépris pour les autorités républicaines et pour les forces du gouvernement, et de graves excès furent commis en beaucoup d'endroits avec l'audace que donne la certitude de l'impunité.

Lazare Hoche, page 61.

- i. Parse: *devint*, *écrivait*, *s'imaginât*, *commis*.

2. *Beaucoup*. After what words is *de* used without the article?
3. *Alors, seul, tel*. Give the derivation.
4. *S'imaginer*. Write out fully a compound tense of this verb.

Translate into French :

The danger indeed was imminent. The disaster of Quiberon had not discouraged the English government. A new squadron sailed towards the coast of France in the last days of September: it bore two thousand foot-soldiers, five hundred cavalry-men fully equipped, arms, munitions, provisions for a numerous army, and lastly the prince so long expected, the Count d'Artois, brother of Louis the Sixteenth, and who became King Charles the Tenth.

GERMAN.

I.

1. Write out fully the declension of *Der Mann, Ein guter Mann, Der gute Mann*.
2. State the case (or cases) governed by each of the following prepositions:—*aus, mit, zu, durch, für, ohne, wegen, auf, über, von, nach, um, während*.
3. (a) In a *compound substantive* what is the gender? Which component is invariable? Decline *Kaufmann* fully. (b) Show the difference between *der See* and *die See*; *der Thor* and *das Thor*; *Fürst* and *Prinz*; *Wand* and *Mauer*; *Platz* and *Ort*.
4. Give the meaning, gender, and genitive singular of *Herz, Soldat, Nachricht, Kaiser, König, Frosch, Knabe, Straße, Dorf, Freundschaft, Kunst, Bäumchen, Reichthum*. State also to which declension these nouns belong.
5. (a) Give the degrees of comparison of *alt, stark, kurz, hoch, gut, viel, klar, stolz*. (b) Explain when

- der reich

der reichste is used in the superlative, and when am reichsten.

6. Give the principal parts of sprechen, denken, sterben, nehmen, geben, singen, leiden, schreiben.
6. (a) Distinguish between strong and weak verbs.  
(b) What auxiliary is used in German to form the passive voice ?

II.

Translate into English :

(a) Da hört man auf den höchsten Stufen,  
Auf einmal eine Stimme rufen ;  
„Sieh da, sieh da, Timotheus,  
Die Kraniche des Ibykus!“—  
Und finster plötzlich wird der Himmel,  
Und über dem Theater hin  
Sieht man in schwärzlichem Gewimmel  
Ein Kranichheer vorüberziehn.  
Die Kraniche des Ibykus.

(b) Die Antwort bringt er seinem Herrn  
In schnellem Lauf zurück.  
Als der ihn kommen sieht von fern,  
Raum traut er seinem Blick :  
„Unglücklicher ! wo kommst du her !“—  
„Bom Eisenhammer.“—„Nimmermehr !  
So hast du dich im Lauf verspätet ?“  
„Herr, nur so lang, bis ich gebetet.“

Dem, als von eurem Angesicht  
Ich heute ging, verzeiht !  
Da fragt' ich erst, nach meiner Pflicht,  
Bei der, die mir gebeut.  
Die Messe, Herr, befahl sie mir  
Zu hören ; gern gehorcht' ich ihr  
Und sprach der Rosenfränze viere  
Für euer Heil und für das ihre.“  
Der Gang nach dem Eisenhammer.

1. Die Antwort. To what rule for gender is this an exception ?
2. Wo . . . her. Explain the difference between her and hin.
3. For what are vom and im contractions ?
4. Parse ging, befehl.
5. For what does gebeut stand ? Supply the omitted auxiliary.
6. Translate into German : I am staying at home because of the rain. Yesterday I found a book in the street. We have had the good fortune to have a faithful friend. The poet Schiller died in the year 1805. Old people, young men and women, and little children, walked in the beautiful garden of our kind friend.

PASS EXAMINATION.

JUNIOR MATHEMATICS.

FIRST PAPER.

1. If  $X = z^4 - 3z^3 + 2z^2 - z + 1$ , and  $y = z - 1$ ,  
Express  $X$  in terms of  $y$ .

2. Solve the equations :

$$(a) \frac{1}{x+1} + \frac{1}{x+2} + \frac{1}{x+5} = \frac{9}{3x+8}$$

$$(b) \begin{aligned} 2x^2 + xy + 3y^2 &= 16 \\ x^2 - xy + 2y^2 &= 7 \end{aligned}$$

$$(c) \begin{aligned} ax + by - z &= a^2 + b^2 \\ bx + ay - z &= 2ab \\ x^2 + y^2 - 2z &= a^2 + b^2 + 2 \end{aligned}$$

$$(d) \begin{aligned} \sqrt{\frac{3x}{x+y}} + \sqrt{\frac{x+y}{3x}} &= 2 \\ xy - (x+y) &= 54 \end{aligned}$$

3. Has the expression  $3x - x^2 - 1$  a maximum or a minimum value? Find it.

4. In an arithmetic progression show that

$$s = \frac{n}{2} (2a + n - 1 \cdot d) = \frac{n}{2} (2z - n - 1 \cdot d)$$

5. Two men set out at the same time from a town to travel along the same road. One goes 3 miles the first day,  $4\frac{1}{2}$  miles the second, 6 the third, &c. ; the other goes 33 miles the first day,  $32\frac{5}{8}$  miles the second,  $32\frac{1}{4}$  the third, &c. Will they at any time stop over night together, and if so when and where?

6. Show how to divide the line  $AB$  into two parts in  $C$  so that  $AB \cdot BC = AC^2$ . (Euc. ii. 11.)

If a triangle be constructed having two sides each equal to  $AB$  and the base equal to  $AC$ , prove that its vertical angle is one-half of its basal angle.

7. If a secant line and a tangent line to a circle pass through a common point, the rectangle under the segments of the secant line between the point and the circumference is equal to the square upon the part of the tangent line between the given point and the point of contact. (Euc. III. 36).

8. Illustrate in any way the principle of continuity as applied to geometrical properties.

9. The loci of three points, equally distant from the angles of a triangle taken two and two, meet in a point. Prove it, and state what point it is.

If we form the loci of all points equally distant from the sides of a triangle taken two and two, these loci meet by threes in four points. What are these points?

SECOND PAPER.

1. Find expressions for the sum of  $n$  terms of the following series—

(a)  $a + ar + ar^2 + \dots$

(b)  $1^2 + 2^2 + 3^2 + \dots$

(c)  $1 + 3 + 6 + 10 + \dots$

Sum  $\frac{1}{2} + \frac{1}{3} + \frac{2}{9} + \dots$  to infinity.

If a triangular pile of balls has 33 in one side of the base, how many balls are in the pile?

2. From a company of 15 men a guard is to be

9. Show ho

formed every night. How many must be put upon the guard so that any one individual may be present every third night ?

- Expand  $(1 - x)^{-\frac{1}{2}}$  by the Binomial theorem.
- Given the logarithm of  $2 = \cdot 30103$  and the logarithm of  $3 = \cdot 47712$ , find the logarithm of,

$$\frac{\sqrt[3]{1.28} \times (27)^{\frac{2}{3}}}{\sqrt[4]{480} \times (.135)^{\frac{1}{2}}} \times \cdot 0162.$$

If  $\frac{2x}{3^{x-1}} = 9^{x-2} \times \frac{4x}{3}$ , find  $x$ .

- Make a sketch of Peaucellier's cell and prove that the tracing point describes a straight line.
- A line parallel to the base of a triangle divides the sides so that the segments between the line and the vertex are proportional to the segments between the line and the base. (Euc. VI. 2.)
- If  $a, b, c$ , be the sides of a triangle and  $C$  the angle included between  $a$  and  $b$ , show that
$$c^2 = a^2 + b^2 - 2ab \cos C.$$
If the sides of a parallelogram are 12 and 20, and the angle  $60^\circ$ , find the diagonals.
- Give three ways in which a plane may be generated by the motion of a straight line, and state what other surfaces are produced by modifying some of the conditions. What name is applied to all such surfaces, and why ?
- Show how to find the volume of a wedge.

SENIOR MATHEMATICS.

FIRST PAPER.

1. Resolve  $3x^2 - y^2 - 2xy + x + 3y - 2$  into trinomial factors, and  $x^4 - 5x^2 + 4$  into its three pairs of quadratic factors.

2. If,  $\rho^2 - 2\rho (a \cos \theta + b \sin \theta) - r^2 + a^2 + b^2 = 0$  determine the value of  $\theta$ ,  
 (1) when  $\rho$  has equal values ;  
 (2) when the values of  $\rho$  are equal in magnitude but opposite in sign.

If  $a$  and  $b$  denote the coordinates of the centre of a circle whose polar equation is the given expression, interpret the results of (1).

3. Prove that a determinant vanishes when two of its rows or columns become the same; and thence show that,

$$\begin{vmatrix} ma + nb + c & b & c \\ ma' + nb' + c' & b' & c' \\ ma'' + nb'' + c'' & b'' & c'' \end{vmatrix} = m \begin{vmatrix} a & b & c \\ a' & b' & c' \\ a'' & b'' & c'' \end{vmatrix}$$

If  $xy, x'y', x''y''$  denote the coordinates of three points upon a plane what does

$$\begin{vmatrix} x & y & 1 \\ x' & y' & 1 \\ x'' & y'' & 1 \end{vmatrix} \text{ denote ?}$$

4. Develop  $a^x$  in ascending powers of  $x$ , and by reverting the series show that

$$\log(n + 1) = \frac{1}{A} \left( \frac{n}{1} - \frac{n^2}{2} + \frac{n^3}{3} - + \dots \right)$$

What is the meaning of the constant  $\frac{1}{A}$  ?

Give any expression by which to calculate it ?

5. Give

$f a$

6. Deduce  $\pi$ , a value

7. If  $A$ , and ing

sh

8. Under solva tain

1. What

What

2. Investi is per given axis o  $x'y'$  a

3. The equ is

$2x (1 -$  its equ point lar, m

4. Find th

5. Given the relation  $2f_x = f\left(\frac{2x}{1-x^2}\right)$  to develop  $f^x$  according to ascending powers of  $x$ .

6. Deduce Machin's formula for finding the value of  $\pi$ , and indicate any other method of finding that value.

7. If  $A, B, C$  are the angular points of a triangle, and  $O$  the centre of the inscribed circle touching  $AB$  in  $N$ ,

$$\text{show that } AO = \frac{bc}{s} \cos \frac{A}{2},$$

$$\text{and } AN = s - a.$$

8. Under what conditions will  $x^3 + px + q = 0$  be solvable by trigonometry? Show how to obtain all the roots of the following by this method,  
 $x^3 - 3x^2 + 2x + 3 = 0.$

SECOND PAPER.

1. What lines are denoted by the equations,

$$x \pm y = 0? \quad xy = 0? \quad x^2 - y^2 = 0?$$

What is denoted by  $xy = a^2$ ?

2. Investigate the equation to a straight line which is perpendicular to a line from the origin of given length and making a given angle with the axis of  $x$ . What does the equation denote when  $x' y'$  are put for  $x y$ ?

3. The equation of a line to rectangular coordinates is

$$2x(1 - \sqrt{3}) + 2y(1 + \sqrt{3}) = 1 + a - b; \text{ find its equation when the origin is transferred to the point } a, -b, \text{ and the new axes, still rectangular, make an angle } \tan^{-1} \sqrt{3} \text{ with the old.}$$

4. Find the equations to the two lines which pass

through the intersection of  $3x - 4y = 5 = 0$ , and  $5x + 12y - 26 = 0$ , and bisect the angles between them.

5. If  $x^2 + y^2 - r^2 = 0$  be the equation to a circle, what does  $x'^2 + y'^2 - r^2$  express generally?

Find the equation to the tangent to a circle at the point  $x' y'$ . What does the equation denote when  $x' y'$  are not on the circle?

6. Show that a tangent at any point of a parabola makes equal angles with the radius vector and the axis.

What bearing has this upon the case of parabolic mirrors?

7. Find the polar equation to an ellipse when the pole is at the focus, and if  $\rho \rho'$  be radii vectores in opposite directions, show that,

$$\frac{\rho \rho'}{\rho + \rho'} = \frac{a}{2} (1 - e^2)$$

8. A circle has its centre at the vertex of a parabola, and touches the directrix. A common tangent to the two curves touches the parabola in  $P$ , and  $PM$  is an ordinate. Show that  $AM$  is divided into extreme and mean ratio in  $S$ .

JUNIOR CHEMISTRY.

- Describe the two commonly employed systems by which we measure (a) length, (b) weight, (c) temperature, (d) gaseous elasticity, and in each case change 100 units of one into the other.
- Explain fully how the following terms are employed in chemistry, and give illustrative examples—

Hydroxide, deliquescent, allotropic, reducing agent, basylous, diatomic, basicity.

- Refer them to them of water Nitric acid—mate.
- Give the description when—  
(a) Nitric  
(b) Hydrobromic  
(c) Potassium  
(d) Ammonia  
(e) Potassium cyanide
- Write a gas obtained How another
- Give the following the proportions—  
Caustic bonate—ide—carbon
- How would they be obtained—  
(a) To obtain  
(b) To obtain  
(c) To obtain  
(d) To obtain

3. Refer the following to their radicals by writing them upon the type of one or more molecules of water, and describe any three of them—

Nitric acid—carbonic acid—pyrosulphuric acid—orthophosphoric acid—potassic dichromate.

4. Give the chemical actions and in each case a short description of a substance, formed or obtained, when,—

(a) Nitric acid is warmed with ferrous sulphate.

(b) Hydric sulphide and sulphur dioxide are brought into a flask together.

(c) Potassic permanganate is heated.

(d) Ammonia is added in excess to cupric sulphate solution.

(e) Potassic iodide is added to solution of mercuric chloride.

5. Write a general scheme of the salts which can be obtained directly by precipitation.

How can you pass from one soluble salt to another?—give an illustrative example.

6. Give the common processes by which each of the following is obtained, and in each case detail the properties and consequent uses of the substances—

Caustic potash—slaked lime—zinc—lead carbonate—cupric sulphate—anhydrous ferric oxide—carbon disulphide.

7. How would you carry out the following operations—

(a) To obtain iodine from potassic iodide.

(b) To obtain baric chloride from heavy spar.

(c) To obtain peroxide of lead from litharge.

(d) To obtain aluminium from alum.

8. 10 grams of a solution of commercial hydrochloric acid, having a specific gravity of 1.05, is added to marble and the escaping gas passed into baric chloride solution. The precipitated carbonate weighs 7.09 grams. What is the percentage strength of the acid? (Ba = 137).

SENIOR CHEMISTRY.

FIRST PAPER.

1. Name four kinds of fermentation, and show where and under what conditions they occur.  
What conflicting theories are held in regard to the presence of vegetable life in one of them?
2. Show how to obtain methane, and how from it synthetically to form ethane.  
What theoretic relations do the monatomic alcohols hold to methane?
3. Define atomicity and basicity as applied to an organic acid, and show what connection these terms have with the derivation of the acid.
4. Give the chemical changes by which glycerine is obtained by saponification; describe it and any of its important substitution products.
5. Give the changes effected and the substances produced, and describe any three of them, when—
  - (a) A mixture of alcohol and sulphuric acid is distilled.
  - (b) A mixture of amyl alcohol, sulphuric acid, and acetic acid is distilled.
  - (c) Gallic acid is sublimed.
  - (d) Ammonium oxalate is heated with phosphorus pentoxide.

- (e) Lith
- (f) Sug
6. Show the

- (e) Litharge is added to fused potassic cyanide.  
(f) Sugar is acted upon by nitric acid.
6. Show the relations of the following to the benzene molecule as formulated by Kekule—
- (a) Diphenyl—naphthalene—anthracene.
  - (b) Phenol—picric acid—benzyl alcohol.
  - (c) Benzoic, hippuric, and tannic acids.

SECOND PAPER.

1. Describe Le Clanche's cell and formulate the chemical action within it.
2. Give a concise sketch of three theories of the nature of atoms.  
If we assume that a molecule of steam consists of three atoms, then a molecule of oxygen must consist of two atoms. Prove this.  
Give any reasons for believing that a molecule of water may really be very complex.
3. What is the atomic heat of an element? Show how it may be made useful in fixing atomic weight.
4. What is to be understood by the "dynamical theory of a gas?" Assuming this theory to be true show that the following are necessary consequences—
  - (a) The volume of a gas is proportional to its absolute temperature.
  - (b) The expansion of a gas cools it.
  - (c) The diffusive power of a gas is inversely proportional to the square root of its molecular weight.
5. What differences are there between the spectra of gases and those of liquids?

How does compression affect the spectrum of a gas, and why does it so affect it ?

6. Describe a "grating" and explain its action.
7. If 10 grams. of steam be condensed in 100 grams. of water at  $15^{\circ}\text{C.}$ , what will be the resulting temperature ?

JUNIOR PHYSICS.

FIRST PAPER.

1. Define the *moment* of a force. How may it be represented geometrically ?
2. Find the pressure on the catch of a ratchet wheel 12 inches in diameter, when it is attached to an axle 5 inches in diameter sustaining a weight of 60 lbs.
3. A cart is loaded with 1800 lbs.; the pad on the horse presses with a weight of 14 lbs., and the distance from the pad to the axle is 6 feet: Where is the centre of gravity of the load in front of the axle ?
4. Define the coefficient of friction. What is the limit of the angle of friction ? If a body rest on a horizontal plane 10 feet long, and the coefficient of friction be  $\frac{3}{4}$ , how high may one end of the plane be raised before the body begins to move ?
5. How are forces measured in Kinetics ? Define a *dyne*; an *erg*. What is the kinetic energy of a mass  $m$  moving with velocity  $v$  ? Prove your answer.
6. A body weighs 200 kilograms; what acceleration will be produced in it by a force of 600 kilograms measured by a spring balance ( $g = 981 \text{ cm}$ ) ?

7. How much work is done in raising a mountain 4 miles high?
  8. What are the units of Dalton's constant? Of the velocity of sound in a thin side of a tube?
  9. How many cubic feet of water are displaced by a ship (weight 1000 lbs.), and find the depth of immersion?
  10. How do you find the density of a gas? is in small fraction of the volume of a gas at 1 gm. in air, at 0°C. and 760 mm. Hg.?
  11. Find the pressure on the piston of the cylinder of a steam engine if the water rises 10 feet.
  12. Define the capacity; heat capacity; heat conduction, stating the units.
1. Find the temperature of 20 grammes of water if 10 grammes of steam are condensed in it.
  2. Define Dielectric constant; Dielectric material; the return stroke of a lightning bolt.
  3. Assuming that the air is in what part of the spectrum? Give the reason.
  4. State the conditions for total internal reflection. Describe an experiment to show that it occurs.

7. How much work, estimated in horse power per 1', is done by a man of 12 stone climbing a mountain 4000 feet high?
8. What are the laws of Boyle for aeriform fluids? Of Dalton? What is Torricelli's theorem for the velocity of fluids issuing from an orifice in a thin side?
9. How many cubic feet of water will be displaced by a ship and cargo weighing 700 tons (2240 lbs.), and floating in Equilibrium?
10. How do you find the sp. gr. of a solid when it is in small fragments, or particles? Find the volume of a solid in c.c. which weighs 1000 gm. in air, and 800 gm. in brine of density 1.2.
11. Find the pressure on the upper surface of the piston of the common sucking pump, when the water rises above it, and prove your answer.
12. Define the *coefficient of linear expansion*; *thermal capacity*; *heat of liquefaction*; *heat of vaporization*, stating the latter two in the case of water.

SECOND PAPER.

1. Find the temperature obtained by introducing 20 grammes of water at  $100^{\circ}\text{C}$ . into 1000 grammes of water at  $0^{\circ}\text{C}$ .
2. Define *Dielectric*. Describe the action of Carre's Dielectric machine. Explain what is meant by the *return stroke* of lightning in thunderstorms.
3. Assuming the molecular theory of Magnetism, in what part of a magnet must the polarity of the separate particles be the most intense? Give the reasons for your answer.
4. State the chief disadvantages of one-fluid cells. Describe an ordinary Daniell's cell, and its action.

5. What is the current quantity of 20 cells each of 5 Ohms resistance and arranged in series, compared with the current quantity of 100 like cells, the resistance of the conducting wire in both cases being 2000 Ohms?
6. Explain the principles on which the resistance of wires is determined by Wheatstone's bridge, and show that, the four resistances taken in order being  $r_1 r_2 r_3 r_4$ ,  $r_1, r_3 = r_2, r_4$ .
7. What are induced currents? State Faraday's laws with regard to them.
8. Why does a lamp in a clear night appear as bright when it is farther from us as when it is nearer, the difference in distance not being very great?
9. Prove that a ray, falling at right angles on a plane mirror at rest, is turned when the mirror revolves, through twice the angle of rotation.
10. The focus of parallel rays falling on a spherical mirror is  $\frac{r}{2}$ , Is this strictly true for all apertures? Find the exact focus for the ray farthest from the Optical centre when the semi-aperture is  $3^\circ$ : when it is  $5^\circ$ : when it is  $60^\circ$ . ( $\text{Cos } 3^\circ = .9986$ ;  $\text{Cos } 5^\circ = .996$ ).
11. Define *Principal axis*; *Secondary axes*; *Irradiation of dispersion*; *Optical centre* of a lens.
12. Explain the cause of the dark lines in the Solar spectrum.
13. Whence arise the abnormal conditions of vision termed long-sightedness, and short-sightedness? Explain fully how these defects are remedied.
14. Explain the construction of the Compound

Microscope. How is its magnifying power ascertained by the Camera Lucida ?

SENIOR PHYSICS.

FIRST PAPER.

1. A force of 205 lbs. is resolved into two which make an angle of  $30^\circ$ . The larger force is 168 lbs. Find the smaller.
2. Two spheres touch one another ; find the distance of their centre of gravity from the point of contact, the radii being respectively 8 and 12.
3. A beam AB rests with one end on a horizontal plane, and with the other on a vertical one in the point B ; the vertical plane through the beam intersects at right angles the former plane in the line AC and the latter in the line BC ; the beam is attached at the point C by the string EC without weight ; Find the tension of the string, E being any assigned point in the beam.
4. The weight of a steelyard is 1 lb., the movable weight also is 1 lb. ; the point of suspension of the body is 8 in., and the centre of gravity of the beam 3 in. from the fulcrum on the same side ; graduate the beam for weights from 1 to 12 lbs.
5. A man weighing 154 lbs. sustains a weight of 333 lbs. with three movable pulleys, each having a separate string attached at one end to the beam. The pulleys weigh respectively 3, 2 and 1 lbs. ; find the pressure exerted by the man on the floor on which he stands.
6. The height of a rough inclined plane is to its length as 3 to 5, and a weight of 30 lbs. is supported by friction only ; find the force of friction.

4. A piston weighing 7 lbs., and closely fitting a vertical tube full of common air, whose length is 1 foot, and diameter  $\frac{1}{4}$  in., and closed at the bottom, descends by its own weight; find the distance from the top of the cylinder when it has ceased to descend.
5. Explain fully the manner in which the height of a mountain is ascertained by the barometer, specifying the corrections which must be applied to the observations which have been made.
6. Define the *dispersive power* of a prism.  $\delta$  being the minimum deviation of a prism of angle  $e$ , prove that the index of refraction = 
$$\frac{\sin \frac{\delta + e}{2}}{\sin \frac{e}{2}}$$
7. State the conditions which must be fulfilled in order that a combination of two lenses may be achromatic, and prove your answer.
8. How is the revolution of the earth round the sun proved by the Aberration of light?
9. Explain the cause of the tides: of the Precession of the Equinoxes.
10. Find the correction of the apparent place of a heavenly body for refraction in minutes and seconds of arc.
11. Given the Sun's Right Ascension; find his Longitude and Declination.

NATURAL SCIENCE.

FIRST PAPER.

1. Describe (1) the simple Cell, (2) the Tissues made up by its modifications in Plants, (3) in Animals.

2. Describe the Embryo of a Dicotyledonous plant; trace its growth till all the Organs of Vegetation are fully formed.
3. Describe carefully the Flower of a typical Phaenogamous plant. Of what organ are the different parts believed to be modifications? Give the reasons.
4. Give the characters of (1) Definite and (2) Indefinite Inflorescence. Describe the different forms of the latter and show how all may be derived from one form.
5. Describe fully an Actinia and point out the distinctions between it and a common Hydra.
6. Describe fully the Skeleton of the human Hand or Foot.
7. Trace the Embryological development of a Medusa from the ovum to the perfect animal.

*Only five questions required.*

*SPECIAL QUESTIONS.*

8. Give the various modifications of the Flower with a brief definition of each. Describe fully three of them.
9. Describe the adaptations for Allogamy.
10. Characterise briefly the orders of the Hexapodous Insects. Describe fully one Orthopterous Insect.

*Only two of these required.*

*SECOND PAPER.*

1. How were Stratified rocks (1) formed? (2) consolidated? (3) What changes did many of them afterwards undergo? Explain fully.
2. Give the characters of (1) the Laurentian, (2) the Devonian, (3) the Cretaceous.

3. In what F (2) Repti peculiari
4. In what ro found in C
5. Explain th (3) Basalt
6. Describe th in the diff
7. Name the ages.

4. Describe the mentioning
5. Explain the d
6. Describe (1)

3. In what Formations do (1) Fishes first appear, (2) Reptiles, (3) Birds, (4) Mammals, ? By what peculiarities are the first Fishes distinguished ?
4. In what rocks are (1) Petroleum, (2) Salt, chiefly found in Canada? How is their origin explained ?
5. Explain the formation of (1) Chalk, (2) Peat, (3) Basalt, (4) Atolls, (5) Joints, (6) Dykes.
6. Describe the modifications of the Nervous System in the different Branches of the Invertebrata.
7. Name the parts of an Insect with their appendages.

*SPECIAL QUESTIONS.*

8. Give in tabular form the Divisions and Subdivisions of Palaeozoic time. Describe fully the rocks of the Trenton epoch, giving their Distribution, Characteristic Fossils, &c.
9. Give the Orders of Crustacea. Describe one Decapodous Crustacean fully.

---

BOTANY.

(Medical.)

1. Define Suckers, Stolons, Offsets, Runners, Tendrils, Thorns, Prickles, giving examples of plants in which they occur.
2. Explain the difference between Determinate and Indeterminate Inflorescence.
3. Classify the Simple Fruits, giving definition of each.
4. Describe the different parts of a Complete Flower, mentioning the uses of each part.
5. Explain the different methods of Cell-formation.
6. Describe (1) the structure of the Ovary, (2) the

forms or kinds of Placentation, (3) the Dehiscence of the ripened ovary.

7. How do you prove that flowers are only modified leaves?

RHETORIC AND ENGLISH LITERATURE.

FIRST PAPER.

- i. Give a chart of the Teutonic Languages.
2. Explain the forms "yclad," "yclept."
3. Explain the forms "utmost," "uppermost," &c.
4. Illustrate the formation of inflections by the Latin future in *bo* and the Future in the Romance Languages. Explain these forms fully, as also the imperfect of the English weak verb, and the genitive and dative nouns.
5. Explain the use of *owe* in the following passages:

Thou dost here usurp  
The name thou ow'st not.

[*Tempest* 1. 2.]

To throw away the dearest thing he owed  
As 'twere a careless trifle.

[*Macbeth* 1. 4.]

Give a full history of the changes which this word has undergone.

6. State the different kinds of style, and mention at least one author in illustration of each style.
7. State the rules to be observed in the formation of sentences.
8. Contrast the poetry of the school of Dryden and Pope with the poetry of Scott and his contemporaries.
9. Distinguish between the Drama of the Unities

and the  
Drama

and the Romantic Drama. Explain fully the Drama of the Unities.

SECOND PAPER.

Write an Essay on any one of the following subjects:

1. On Tennyson's Princess.
2. On Shakespeare's As you like it.
3. On Byron's Poetry.

Special importance is attached to the style and composition of the Essay.

---

HISTORY.

FIRST PAPER.

1. Give a short sketch of the migration of the different members of the Aryan family. State the degrees of civilization reached by the Sanscrits, Greeks and Latins, at the time of their separation. Give reasons for your answer.
2. State the principles of the political and national life in Greece, and contrast them with those of the political and national life of the Romans. Point out any advantages as well as deficiencies in the national life of Greece.
3. Compare the Pelagic elements in Greece and in Italy.
4. What were the effects of the Persian wars on Greece?
5. What was the occasion of the establishment of the Roman Consulate? also of the Tribunate? By whom were the Tribunes elected? Contrast the power of the Consuls and of the Tribunes.
6. Give a short sketch of the conquests of Rome till the subjugation of Greece.

7. Compare the measures of reform proposed by the Gracchi with the terms of the Sullan constitution.
8. Describe the state of Rome in the last fifty years of the Republic. What circumstances might seem to have prepared the public mind for the establishment of a permanent Dictatorship?
9. What were the political relations existing between Sulla, Pompey and Cæsar?

SECOND PAPER.

1. Compare Greek and Roman civilization. What were the effects, on these civilizations, of the transfer of the Seat of Empire to Constantinople?
2. What was the political influence of the Christian Church in the 4th century?
3. Who were the Franks that invaded Gaul? Describe the character of their invasion, the nature of their conquest and of their settlement.
4. What was the character of the tenure of land in France, in regard to (1) Allodial lands, (2) Fiefs, (2) Benefices?
5. Compare the Monarchy in England with that in France.
6. What changes were made in the judicial system of France under Louis IX?
7. Why were neither the Privileged Orders nor the Tiers Etat able to stem the progress of the French Monarchy to absolutism?
8. What were the relations of the Church and State in England under Henry II? State fully,

9. What was the character of the Roman Republic?
10. Under what circumstances was the Roman Republic established?

- Only
1. State and character of the Roman Republic. Trace the theory of the Roman Republic.
  2. What objects were made to make to the Roman Republic? Estimate the doctrine of the Roman Republic.
  3. State and character of the Roman Republic. Summarize the doctrine of the Roman Republic. "the great error."
  4. Compare the Roman Republic with that of the Greek Republic. Is there any connection between the two?
  5. What is the character of the Roman Republic? Is there any connection between the two?

9. What were the causes of the success of the Lombard Republics? Why was that success so short-lived?
10. Under what circumstances was the Imperial Crown transferred from the Carolingians to the German Line?

---

JUNIOR PHILOSOPHY.

FIRST PAPER.

*Only three of these questions to be done.*

1. State shortly the relations of Plato to Parmenides, Cratylus and Socrates.  
Trace the influence of early Dualism in Plato's theory of ideas.
2. What objections does Plato in the Theætetus make to the Protagorean doctrine the of Sensible?  
Estimate the value of Grote's defence of the doctrine that all knowledge is individual.
3. State and explain Aristotle's definition of the Summum Bonum.  
Compare the Aristotelian view with the doctrine of modern Utilitarians, that the End is "the greatest happiness of the greatest number."
4. Compare the Stoical theory of knowledge with that of the Epicureans.  
Is there any theory which avoids the imperfections of both?
5. What is the general character of Scholasticism?  
Is there any inconsistency in Comte's limitation of knowledge to phenomena?

SECOND PAPER.

*Only three of these questions to be done.*

1. Characterise the Sensuous consciousness.  
What philosophies, ancient and modern, rest upon this stage of consciousness? Explain.
2. Name the elements implied in Perception, and point out their relations to one another.  
“In Perception we have an immediate consciousness of an independent world.” Examine this view of Hamilton.
3. Explain the nature of Productive Imagination.  
Examine the account given in Formal Logic of the process of thought.
4. Distinguish between Understanding and Reason.  
Criticise the Spencerian doctrine of the Unknowable.
5. What is the true conception of Freedom?  
“Act so that the maxim of your will may be fit for law universal.” Is it possible to deduce specific laws of morality from this principle?

SENIOR PHILOSOPHY.

FIRST PAPER.

1. Give in full Spinoza's analysis of fictitious and false ideas.
2. *Mens humana pars est infiniti intellectus Dei.* How does Spinoza reach this conclusion?
3. *Objectum ideae humanam mentem constituentis est corpus, sive certus extensionis modus actu existens, et nihil aliud.* Explain.  
Is there any imperfection in Spinoza's way of conceiving the relations of Mind and Body?

4. “Pleasures be parts donism s
6. Compare Kant's “ness.”

1. “Mathema Show by position. problem
2. “Time is form of trast her
3. Give a sho the Dedu

5. Give the p its bearing

1. Describe planetary s
2. Give the c  
(1) Utilit not ma end of  
(2) We c we kno  
(3) The s kind.
3. Give all th sitions :—

4. "Pleasures, while they are successive, may yet be parts of a whole." Is this defence of Hedonism satisfactory?
6. Compare the Cartesian *Cogito ergo sum* with Kant's "transcendental unity of self-consciousness."

SECOND PAPER.

1. "Mathematical judgments are all synthetical." Show by examples what is meant by this proposition. What is its relation to the general problem of the Critique of Pure Reason?
2. "Time is not a general conception, but a pure form of perception." Explain fully the contrast here indicated.
3. Give a short statement of the successive steps in the Deduction of the Categories.
4. Explain the doctrine of the Schematism. Illustrate by the schemata under Quality.
5. Give the proof of the Second Analogy, and show its bearing on Hume's theory of Causation.

LOGIC.

1. Describe the logical characters of the terms *planetary system, injustice, advocate, ether.*
2. Give the *converse* of these propositions :—
  - (1) Utilitarians are a class of hedonists who do not make the pleasure of the individual the end of life.
  - (2) We cannot infer of a collective whole what we know of the parts.
  - (3) The signs required in Logic are of a simple kind.
3. Give all the logical *opposites* of these propositions :—

- (1) Nothing is harmless that is mistaken for a virtue.
- (2) A determinist need not be a materialist.
4. Name the figure and mood of the following syllogisms, if they are valid. If they are not valid, state the rule which is broken, and give the technical name of the fallacy:—
- (1) Sound moralists do not make the idea of duty meaningless.  
Utilitarians make the idea of duty meaningless.  
Therefore Utilitarians are not sound moralists.
- (2) External objects are in space and time.  
External objects are in relation to knowledge.  
Therefore some things in relation to knowledge are in space and time.
- (3) Sensationalists deny the activity of thought.  
Hedonists deny the activity of thought.  
Therefore Hedonists are Sensationalists.
- (4) Those who agree with Descartes deny the direct knowledge of matter.  
Kant does not agree with Descartes.  
Therefore Kant does not deny the direct knowledge of matter.
5. Analyze the following arguments, and name the fallacy if there is any:—
- (1) If volitions are uncaused, the will is not free: no volitions are due to a cause; therefore the will is necessitated.
- (2) We must suppose actions to be determined if the law of causality is universal; but as actions are not determined, the law of causality is not universal.
- (3) On the hypothesis that the world has ex-

6. Show by an illustration of your own what is meant by the *Method of Agreement*.

---

POLITICAL ECONOMY.

1. Explain the distinction between productive and unproductive labour.
2. Is money capital which is employed to pay off a mortgage or to buy equipages? Explain.
3. Why are gold and silver most suitable as the medium of exchange?
4. What reasons are given for protecting the industries of a young country?
5. What is meant by the division of labour? State its advantages, and enquire whether the free interchange of commodities between nations tends to promote or to retard it.
6. During a period of twenty years the imports of England have been over £300,000,000 in excess of her exports. Does it follow from this that the amount of specie exported must have been in excess of that imported? Explain.

---

JUNIOR LATIN.

FIRST PAPER.

I.

1. What classes of Latin verbs respectively take (a) the *Acc.* and *Inf.* for the English noun clause with *that*, (b) *Ut with the Subjunctive* for the English *Inf.*?

Translate: (a) They heard that we were coming.

(b) I shall recommend everybody to obey the laws.

2. Define the term "dependent question."

Translate: They did not know where they were going.

3. State the construction of *interest*, *miseret*, *dono*.

Translate: (a) It is for your interest, nay for the interest of all, to consult the country's safety.

(b) I am sorry for him.

(c) He has presented me with the most useless slave he had.

4. Give a list of verbs that govern the ablative.

Translate: They make a bad use of their ability.

5. What is the Passive construction of verbs that govern the Dative?

Translate: Do not tell me that all our enemies must be spared.

6. In what cases are "*duration of time*" and "*place where*," respectively expressed in Latin?

Translate: He lived three years at Athens.

7. What is the meaning of the term *ablative absolute*?

Translate (using *abl. abs.*): When the city was taken, all the inhabitants were put to the sword.

## II.

Translate:

(a) After the death of the father they say he seized the son and condemned him to death without a hearing.

Translate:

Turne, tot incassum fusos patiere labores,  
Et tua Dardaniis transcribi scepra colonis ?  
Rex tibi conjugium, et quæsitæ sanguine dotes,  
Abnegat ; externusque in regnum quæritur hæres.  
I nunc, ingratis offer te, irrise, periclis :  
Tyrrenas, i, sterne acies ; tege pace Latinos.  
Hæc adeo tibi me, placida quum nocte jaceres,  
Ipsa palam fari omnipotens Saturnia jussit.  
Quare age, et armari pubem, portisque moveri,  
Lætus in arma para ; et Phrygios, qui flumine pulchro  
Consedere, duces pictasque exure carinas.

[Virgil, Æneid, Lib. VII. vv. 421—431.]

1. Parse *fusos, patiere, quæsitæ, sterne, jaceres, consedere, exure*.
2. Distinguish *peregrinus, externus—acies, agmen, exercitus*. Scan the first three lines.
3. Explain the allusion in *pictas*—and the figures in *exure* and *carinas*.
4. *fusos*—Here is metaphor. What images are most frequently employed in Latin metaphor? Show how, in the use of the subject, Latin secures unity and clearness.
5. With what works of what great author may the two sections of the Æneid be compared?

Translate :

Jam, accepta in Ponto calamitate ex eo proelio, de quo vos paulo

ante invitus admonui, quum socii pertinuissent, hostium opes animique crevissent, satis firmum praesidium provincia non haberet, amisissetis Asiam, Quirites, nisi, ad ipsum discrimen ejus temporis divinitus Cn. Pompeium ad eas regiones fortuna populi Romani attulisset. Hujus adventus et Mithridatem insolita inflammatum victoria continuit, et Tigranem magnis copiis minitantem Asiae retardavit. Et quisquam dubitabit, quid virtute perfecturus sit, qui tantum auctoritate perfecit? aut quam facile imperio atque exercitu socios et vectigalia conservaturus sit, qui ipso nomine ac rumore defenderit?

[Cicero, Pro Lege Manilia, Cap. XV.]

1. Parse *crevissent*, *attulisset*, *perfecerit*.
2. Distinguish *anima*, *mens*, *animus*—*cresco*, *augeo*—*Quirites*, *Romani*—*periculum*, *discrimen*—*socius*, *sodalis*, *comes*.
3. When is *quum* used with the subjunctive; and when with the indicative? How does it differ from *quando*? Account for the mood of *amisissetis*, *attulisset*, *perfecturus sit* and *perfecerit*.
4. Mention the various sources of revenue among the Romans and by whom the revenue was collected.
5. What office did Cicero hold at the time of the delivery of this oration, and in what year of his life and of the city was it delivered?
6. Give an account of the Mithridatic war, and of Pompey's career previous to his appointment to the supreme command in Asia.
7. Give a full account of the Manilian law. Who were its chief opponents and on what grounds did they oppose it?

[Thucydides, II. 27.]

JUNIOR FRENCH.

1. Give rules for the formation of the plural of compound nouns. Illustrate.
2. State what classes of adjectives follow the noun. Illustrate.
3. Derive *fils* and *monsieur*. Mention any peculiarity in the derivation of these; and lay down rules for the transfer of words from Latin into French.
4. Indicate the steps by which the Latin *anima* passed into the French language.

5. State the order in which you would arrange before the verb *leur*, *le—vous*, *le—y*, *en—en*, *lui—en*, *nous—nous*, *y*.
6. Mention the classes of adjectives followed by *de* and those followed by *à*.

Translate :

Mais ce jour-là, Berbel n'était pas de bonne humeur, car à peine fûmes nous entrés qu'elle se mit à quereller le mauser d'une voix aigre, disant qu'il passait sa vie au cabaret, qu'il ne songeait qu'à boire, sans se soucier du lendemain, toutes choses très-faus-ses auxquelles le mauser ne répondit pas, sachant qu'il faut tout entendre de sa mère sans se plaindre.

Il ouvrit tranquillement l'armoire, tandis que la vieille Berbel criait, et prit sur le plus haut rayon une large écuelle de terre vernissée, où le miel couleur d'or, dans des rayons blancs comme la neige, s'élevait par couches régulières. Il la déposa sur la table, et plaça deux beaux rayons dans une assiette très-propre.

1. Principal parts of *mit*, *boire*, *sachant*.
2. Derive *jour*, *mauser*, *lendemain*, *choses*.
3. What is there that is noteworthy in the gender of nouns ending in *—eur*? State the exceptions to the general rule.

Translate into French ?

During the war for the Spanish succession, several private individuals in England equipped two *privateers* (vaisseaux armateurs) intended to make *captures* (prises) in the Southern Ocean. Captain Rogers was appointed to command them. They *weighed anchor* (levèrent l'ancre) from Bristol on the second of August, 1708. In the month of January of the following year they doubled Cape Horn, whence they sailed without touching land until they arrived at the island of Juan Fernandez, situated in the Southern Sea at the distance of one hundred and ten leagues from Chili. Rogers sent ashore a boat, which returned to the vessel with a man clad in goat-skins (peaux de chèvres) who appeared wilder than the animals themselves. This was a Scotchman named Alexander Selkirk.

Qu'on l'adore ce Dieu, qu'on l'invoque à jamais !  
Son empire a des temps précédé la naissance ;  
Chantons, publions ses bienfaits.

UNE VOIX, seule.

En vain l'injuste violence  
Au peuple qui le loue imposeroit silence :  
Son nom ne périra jamais.  
Le jour annonce au jour sa gloire et sa puissance ;  
Tout l'univers est plein de sa magnificence :  
Chantons, publions ses bienfaits.

TOUT LE CHOEUR, répète.

Tout l'univers est plein de sa magnificence :  
Chantons, publions ses bienfaits.

UNE VOIX, seule.

Il donne aux fleurs leur aimable peinture ;  
Il fait naître et mûrir les fruits :  
Il leur dispense avec mesure  
Et la chaleur des jours et la fraîcheur des nuits ;  
Le champ qui les reçoit les rend avec usure

UNE AUTRE.

Il commande au soleil d'animer la nature.  
Et la lumière est un don de ses mains ;  
Mais sa loi sainte, sa loi pure  
Est le plus riche don qu'il ait fait aux humains.

1. Derive *choeur, jamais*.
2. Mention the leader of the chorus in *Athalie*. To what office in the Greek drama is there a correspondence ?
3. Mention what kind of verse is unemployed by the French. To what is this due ? Distinguish between *rich* and *sufficient* rhymes, *feminine* and *masculine* rhymes, *rimes plates*, *rimes croisées*, and *rimes mêlées*.
4. How does Racine's later poetry differ from his earlier ?

Translate :

Le lendemain, toute la cour fut chez Monsieur, chez Madame et chez M. le duc de Chartres, mais sans dire une parole : on se contentait de faire la révérence, et tout s'y passa en parfait silence. On alla ensuite attendre à l'ordinaire la levée du conseil dans la galerie et la messe du Roi. Madame y vint. Monsieur son fils

s'approcha d'elle comme il faisait tous le jours pour lui baiser la main. En ce moment Madame lui appliqua un soufflet si sonore qu'il fut entendu de quelques pas, et qui, en présence de toute la cour, couvrit de confusion ce pauvre prince, et combla les infinis spectateurs, dont j'étais, d'un prodigieux étonnement. Ce même jour l'immense dot fut déclarée, et le jour suivant le Roi alla rendre visite à Monsieur et à Madame, qui se passa fort tristement, et depuis on ne songea plus qu'aux préparatifs de la noce.

1. Derive *lendemain*, *parole*, *noce*.
2. State who are meant by Monsieur, Madame and *le Duc de Chartres*.
3. Describe the character of Saint Simon.
4. State the periods into which the history of the French language may be divided, and what influences were most powerful at each period in moulding it.
5. Account for the rapid disappearance of the Celtic language in the Roman period.
6. Prove that French is descended from Popular Latin, and not from Classical Latin.
7. Give the date of the Strasburg Oaths. Describe their nature, and show their importance in the History of French.
8. What is meant by a *strong*, a *weak* verb? Trace the history of the French article and noun.

Translate into French :

The reading of good models has always been regarded as eminently suited to develop the germ of talents. The way of precepts is a long one, that of examples is much shorter. The masters can give us the rules of style ; it is in authors that it is necessary to seek the practice of them. But what authors must one read, and how ought one to read them ? Let readers choose among the writers those whom the judgment of ages has placed in the first rank.

Fischerknabe (singt im Rahn).

Melodie des Ruhreihens.

Es lächelt der See, er ladet zum Bade,  
Der Knabe schlief ein am grünen Gestade,  
Da hört er ein Klingen,

Wie Flöten so süß,  
Wie Stimmen der Engel  
Im Paradies.

Und wie er erwachet in seliger Lust,  
Da spülen die Wasser ihm um die Brust,  
Und es ruft aus den Tiefen :  
Lieb Knabe, bist mein !  
Ich locke den Schläfer,  
Ich zieh, ihn herein.

[Wilhelm Tell. Act 1, Scene 1.

1. Mention the Forestcantons and sketch the events of the first scene.
2. Give the derivation of Rühreihen.
3. Account for the change of tense in the second line and for the present in all other places.
4. Give the principal parts of all the verbs.
5. To what local belief is there a reference in the Fisherboy's song ?

To what Greek myth is there a resemblance ?

Fischer. Der Tell in Fesseln, in des Bogts Gewalt !  
D. glaubt, er wird ihn tief genug vergraben,  
Daß er des Tages Licht nicht wieder sieht !  
Denn fürchten muß er die gerechte Rache  
Des freien Mannes, den er schwer gereizt.

Runz. Der Altlandamman auch, der edle Herr  
Von Attinghausen, sagt man, liegt am Tode.

Fischer. So bricht der letzte Anker unsrer Hoffnung !  
Der war es noch allein, der seine Stimme  
Erheben durfte für des Volkes Rechte !

Runz. Der Sturm nimmt überhand. Gehabt euch wohl !  
Ich nehme Herberg' in dem Dorf ; denn heut  
Ist doch an keine Abfahrt mehr zu denken.

3. What origin does Swiss tradition assign to the inhabitants of the Forestcantons.

Translate at sight :

Der sechste Tag der Schöpfung neigte sich zu seinem Ende. Die Sonne hatte ihre Bahn vollendet. Das Dunkel des Abends begann sich über die jugendliche Erde zu verbreiten. Der erstgeborene Sohn der Schöpfung stand auf einem Hügel Edens, neben ihm Eloah, sein Schutzengel und Begleiter.

Eloah berührte den Menschen mit seinem Stabe. Er lagerte sich an dem Hügel und schlummerte. Der erste Traum kam zu ihm hernieder. Jehovah bildete ihm die Gefährtin.

Als nun die Morgendämmerung begann, berührte Eloah den Schlummernden. Er erwacht, und fühlte sich durchströmt von Kraft und Leben. Aus der Dämmerung erhoben sich die Hügel und Thäler ; das junge Licht kam hernieder und hüpfte auf den Wellen der Ströme Edens, die Sonne stieg empor und brachte den Tag. Der Mensch erblickte das neuerschaffene Weib, die Mutter der Lebendigen. Staunen und Wonne erfüllten sein Herz.

Siehe ! sprach Eloah, aus der Ruhe wird das Göttliche geboren. Darum sollst du diesen Tag der Ruhe und dem Göttlichen heiligen.

[Krummacher.]

## HONOUR PAPERS.

### MATHEMATICS.

#### FIRST PAPER.

1. If a transversal cuts the three sides of a triangle, and if the angle which it makes with the side  $AB$  be denoted by  $C'$ , with  $BC$  by  $A'$ , and with  $CA$  by  $B'$ , then,

$$\sin A \sin A' + \sin B \sin B' + \sin C \sin C' = 0$$

2. Define the "mean centre" of a system of points.

If  $A, B, C \dots$  be a system of points, and  $a, b, c \dots$  a corresponding system of multiples, and  $O$  the mean centre, and  $P$  any point at pleasure,

$$\Sigma(a.AP^2) = \Sigma(a.AO^2) + \Sigma(a)OP^2.$$

If  $A, B, C$ , be the angular points of a triangle and  $a, b, c$  the opposite sides, then  $O$  is the centre of the inscribed circle—and,

$$\Sigma(a.AO^2) = abc.$$

3. If a line  $L$  touch the circle escribed to the side  $a$  of a triangle, and  $\alpha, \beta, \gamma$  denote the perpendiculars from  $A, B, C$  upon  $L$ , then,

$$-a\alpha + b\beta + c\gamma = 2\Delta.$$

4. The lines connecting the angular points of a triangle with the points of contact of the circles escribed to the opposite sides are concurrent.
5. If three lines through the vertices of a triangle are concurrent, and if three points taken upon these lines be connected, the connecting lines will intersect collinearly with the corresponding sides of the original triangle.

6. If a variable points with of interse

$m$ . Find t declination

5. The right a stars being they are up

6. If a variable circle pass through a pair of inverse points with respect to another circle, the chord of intersection passes through a fixed point.
7. Give an idea of what is meant by “reciprocal polars.”

Assuming either Pascal's or Brianchon's theorem, prove the other.

8. It is required to draw a circle which shall pass through a given point and cut two given circles orthogonally.

SECOND PAPER.

1. What is the polar triangle in spherics, and what relations does it hold to the primary?

2. Assuming the relation

$$\cos a = \cos b \cos c + \sin b \sin c \cos A$$

Prove the following—

$$(a) \cot a \sin b = \cos b \cos C + \sin C \cot A.$$

$$(b) \tan \frac{A+B}{2} = \frac{\cos \frac{1}{2}(a-b)}{\cos \frac{1}{2}(a+b)} \cot \frac{C}{2}.$$

$$(c) \cos \frac{A}{2} = \sqrt{\left\{ \frac{\sin S \sin (S-a)}{\sin b \sin c} \right\}}.$$

3. Describe briefly the four systems of coordinates employed in spherical astronomy.

Given the declination of a star, its altitude and hour angle, to find the latitude of the place.

4. A star is observed to cross the prime vertical at an elevation  $p$  and the meridian at an elevation  $m$ . Find the latitude of the place and the star's declination.

5. The right ascensions and declinations of two stars being given, to find their azimuth when they are upon the same vertical circle.

Under what conditions would this method of finding the meridian be impracticable ?

6. What is the loxodromic curve or rhumb line ?

If a ship starts from latitude  $l$  and longitude  $\lambda$  and sails upon this curve through an angular distance  $z$ , what is its latitude and longitude ?

7. The edges of a parallelopiped being  $a, b, c$ , and its facial angles about a solid angle  $\alpha, \beta, \gamma$ , it is required to find an expression for its volume.

THIRD PAPER.

1. If  $p$  be a function of  $q$  and  $q$  be a function of  $x$ , show that,

$$\frac{dp}{dx} = \frac{dp}{dq} \cdot \frac{dq}{dx},$$

and differentiate  $(1 + \log x)^x + \sin x$ .

2. Employ Maclaurin's theorem to find the first three terms in the development of  $\cos^n \theta$ .

3. If  $u = f(x)$  show that  $\frac{du}{dx} = 0$  denotes a maximum

or a minimum only when  $\frac{d^2u}{dx^2}$  is finite, and then according as it is negative or positive.

A statue  $a$  feet high stands upon the top of a column  $b$  feet high ; at what horizontal distance from the base of the column is the angle subtended by the statue a maximum ?

4. If  $y = f(x)$  be the equation to a plane curve, what

does  $\frac{dy}{dx}$  denote ? What does  $\frac{d^2y}{dx^2} = 0$  denote ?

Find differential equations for a tangent and a normal at the point  $x' y'$ .

5. What is me  
what mea

What l

Ellipse—C

2. If a curve be  
the differen  
differential

Find the  
the curve  $r$

3. The symbol

Explain clea

Find the v

5. What is meant by the contact of two curves, and what measures the order of contact ?

What kind of contact can a straight line have ? a circle ?

What is the osculating circle ? Write an expression for the value of its radius.

6. What is an evolute ? Find the equation to the evolute of the common parabola, ( $y^2 = 4ax$ ).

7. If  $\rho = f\theta$  be the equation to a curve, what conditions denote (a) a rectilinear asymptote, (b) a circular asymptote ?

What kind of an asymptote has the curve  $\rho(2a - \rho) = \theta^2$  ?

8. If  $r = f\theta$ , and  $u = \frac{r}{\rho}$ , and if  $p$  be the perpendicular from the pole upon the tangent, prove that,

$$\frac{r}{p^2} = u^2 + \left(\frac{du}{d\theta}\right)^2.$$

FOURTH PAPER.

1. Explain how the following curves are generated and thence derive their equations—

Ellipse—Cissoid of Diocles—Witch of Agnesi.

2. If a curve be expressed by polar coordinates, find the differential of its sectorial area ; also the differential of its length.

Find the area between the limits  $0$  and  $\pi$  of the curve  $r = a \sin \theta$ .

3. The symbol  $\int$  denotes a summatory process. Explain clearly the nature of the series summed. Find the values of—

$$\int \frac{x^3 \cdot dx}{1+x^2}, \int_0^1 \frac{2dx}{\sqrt{1+x+x^2}}, \int \frac{d\theta}{\cos \theta}$$

4. The curve  $ay^2 = x^2(b+x)$  has a loop between  $x=0$  and  $x=-b$ ; find the area of the loop.
5. A body falls to a centre of force which varies directly as the distance; if it start from a distance  $a$ , find the velocity upon arriving at the centre, and the time of falling.

To what simple instrument is the result applicable?

---

PHYSICS.

FIRST PAPER.

1. Assuming the truth of the parallelogram of forces for the direction, prove the proposition for the magnitude of the resultant.
2. Shew that a heavy body has one centre of gravity, and only one.
3. A horse walking by the side of a canal is to draw a boat along a canal by means of a horizontal rope attached to the boat near the bow. Point out the position in which the rudder must be placed in order that the boat may move parallel to the bank, and show in a diagram all the forces acting upon the boat when in motion.
4. A man sitting on a board suspended from a single movable pulley pulls downwards at one end of a rope which passes under the movable pulley, and over a pulley fixed to a beam overhead, the other end of the rope being fixed to the same beam: what is the smallest proportion of his whole weight with which the man must pull in order to raise himself?
5. A weight of 30 lbs resting on an inclined plane

of  $60^\circ$  d  
the com  
weight  
clination  
first sec  
the strin

6. Prove tha

6. How do you

of  $60^\circ$  draws (by means of a string passing over the common vertex of the two planes) another weight of 20 lbs. resting on a plane of  $40^\circ$  inclination. Find the velocity acquired in the first second of the motion, and the tension of the string. ( $\sin 40^\circ = .6428$ ).

6. Prove that a heavy particle projected in vacuo in a direction not vertical will describe a parabola ; and find the range, greatest altitude, and time of flight of a body projected with a velocity of 60 feet per 1" in a direction making an angle of  $15^\circ$  with the horizon.

SECOND PAPER.

1. Find the pressure on a parabola just immersed in a liquid with its axis vertical.
2. If  $W$  be the weight of a body in  $Oz$ , and  $V$  its volume in cubic inches, prove that its sp. gr. 
$$= \frac{W}{V} \left( \frac{6}{5} \right)^3$$
.
3. Show that the surface of a heavy fluid contained in a vessel, which revolves with a uniform velocity about a fixed vertical axis, is a paraboloid ; and thence find the answer to the following question.
4. A cylinder full of heavy fluid is set to revolve twice in a second about a vertical axis. Find the quantity of fluid spilt, supposing the radius of the cylinder to be one foot.
5. If the capacity of the receiver of a condensing pump be 30 times that of the barrel, and the length of a horizontal guage be 20 inches, determine the position of the globule of mercury after 12 strokes.
6. How do you find the distance of the earth from

the sun, knowing the velocity of light, the semi-axis of the ellipse of aberration, and the time of revolution of the earth in its orbit.

7. State as fully as you can, the conditions according to which lunar eclipses may, or may not take place.

THIRD PAPER.

1. Any number of forces act in one plane at different points of a rigid body; find their resultant, and the conditions of equilibrium.
2. Investigate the conditions of equilibrium of any forces acting at different points of a rigid body in lines which are neither parallel nor in one plane.
3. A smooth beam  $AB$  rests against two horizontal bars which pierce the vertical plane through the beam at right angles in the points  $A_1, A_2$ ; the beam passes under the lower, and over the higher bar, its lower extremity being sustained by a smooth horizontal plane; determine the pressure on the two bars, and upon the horizontal plane.
4. The sum of the squares of the sides of a triangle is equal to three times the sum of the squares of the lines drawn from the angles to the centre of gravity.
5. Find the centre of gravity of the arc of a semi-cycloid.
6. Given the altitude  $h$ , and the radii  $(a, b)$  of the ends of a parabolic frustum, find its centre of gravity.
7. The surface generated by a curve line which revolves about a fixed axis is equal to the product of the length of the curve line by the length of the path described by its centre of gravity.

8. State the done, and different different

1. The force point =

5. A particle n a fixed poi tion of its and thenc focus by w
6. Obtain an ex in terms of force situar action of w its orbit.

8. State the principle of the constancy of work done, and apply it to find the work done by the differential wheel and axle, Hunter's screw, the differential pulley block, and the steam engine.

FOURTH PAPER.

1. The force at any point in an orbit round a fixed point  $= \frac{2h^2}{SP^2} \times \text{limit } \frac{QR}{QT^2}$ ; it is also  $= \frac{2V^2}{PV}$ ,  $PV$  being the chord of curvature through the centre of force. Prove these equations.
2. A body moves in a hyperbola; find the law of force tending to one of the foci.
3. Compare the velocity at any point of the several conic sections described about a centre of force in the focus with that of a body at the same point moving in a circle with radius  $SP$ , and described about the same centre of force.
4. Investigate the differential equations for the motion of a free particle in one plane when acted on by accelerating forces in that plane; the forces being, 1st, referred to revolving coordinates axes one of which always revolves with the particle; and, 2nd, estimated in the direction of a tangent and normal to the path of the particle.
5. A particle moving obliquely is attracted towards a fixed point; determine the differential equation of its path referred to polar coordinates, and thence find the law of force situated in the focus by which a body may describe an ellipse.
6. Obtain an expression for the force at any point in terms of  $r$  and  $p$ , and thence find the law of force situated in the centre of an ellipse, by the action of which a body may have the ellipse for its orbit.

NATURAL SCIENCE.

1. What are the arguments (1) for, (2) against, the central fluidity of the earth? What is your own opinion? Give reasons.
2. The surface of all the harder rocks of Ontario is striated. Explain the theories by which it is attempted to account for this fact. Which theory do you accept? Give reasons.
3. What geological formations are represented in Ontario? Give the following particulars about three of them :
  - (1) Distribution.
  - (2) Diagnostic characters.
  - (3) Useful minerals.
  - (4) Vegetable fossils.
  - (5) Animal fossils.
  - (6) Remarks upon mode of formation, or any peculiarity.
4. More than 70 families of Dicotyledonous Angiosperms are represented in Canada. Give list of 20 of these. Also, the native genera in five of them.
5. Describe fully one native (not introduced) plant of each of the following orders or families, giving (a) the ordinal, (b) the generic, (c) the specific characters of each.
  - (1) Liliaceae, (2) Compositae, (3) Sapindaceae, (4) Ericaceae.
6. Give the diagnostic characters of the Sauropsida. Also of Aves as distinguished from Reptilia.
7. Give the dental formulae for five mammals. Give scientific names of the animals.
8. What orders or families of mammalia are repre-

9. Describe the stomach of a typical ruminant, and the process of rumination.

GOLD MEDAL IN PHILOSOPHY.

FIRST PAPER.

1. State the main objections of Aristotle to the psychology of his predecessors.
2. "To ask whether the soul and body are one is like asking whether the wax and the impression stamped upon it are so." Explain fully the view here indicated, and compare it with the "monism" of such psychologists as Fechner and Lewes.
3. How does Aristotle conceive of the relation of Sensation and its objects? Distinguish the different kinds of Sensibles. Have you any criticism to make?
4. Give a full statement of what you regard as Aristotle's view of Reason in its various aspects.
5. State the Aristotelian theory of Pleasure, and compare it with the view put forward in Spencer's "Data of Ethics."
6. Compare the social Ethics of Plato and Aristotle.

SECOND PAPER.

1. The relations of Locke, Berkeley and Hume.
2. State and examine Mill's explanation of the Uniformity of nature.
3. Give and illustrate the canons of Induction.
4. State and examine Mill's view of the basis of mathematical axioms.

5. Compare Hume and Mill on the origin and nature of Justice.
6. The relations of Psychology and Ethics.
7. Examine Comte's view of religion.
8. On what grounds has Philosophical Pessimism been based in modern times ?

ESSAY.

The value of recent applications of the notion of development to Psychology and Ethics.

THIRD PAPER.

1. Are Space and Time forms of human perception ?
2. Examine the doctrine of the Schematism.
3. Give a full statement of Kant's criticism of rational Psychology, and estimate its value.
4. How is each of the Mathematical Antinomies solved ? How does the method of solution differ from that employed in the case of the Dynamical Antinomies ?
5. "Kant does not reconcile freedom and natural causation." Does this criticism rest on a correct view of the distinction of intelligible and empirical character ?
6. Are the various statements in the Critique of Pure Reason of the distinction between phenomena and noumena reconcilable with one another ?

FOURTH PAPER.

1. "Pleasure is not the end." "Actions determined by the pure form of law are alone moral." Are these propositions true contraries ?
2. How are Reason, Will and the Idea of Duty related to each other in the ethical theory of Kant ?

3. "The effect of impera

3. "The effect produced on us by the categorical imperative could never rise above the level of a monotonous uniformity." Is this a valid criticism ?
4. "Kant does not explain morality, because he ought to have shown that the agent is free in the very act for which he is praised or blamed." Examine this.
5. "Freedom consists in liberty of choice." "Freedom consists in willing the rational." Are these propositions exclusive of each other ? Which best formulates the character of freedom ?
6. Estimate the value of Kant's proofs of Immortality and the being of God.

ESSAY.

The relation of Hegel's Logic to Kant's Critique of Pure Reason.

---

GOLD MEDAL IN POLITICAL ECONOMY.

FIRST PAPER.

1. What is meant by (a) Free Trade, (b) Protection ?
2. Under what conditions is Protection held to be most conducive to national welfare ? Add remarks.
3. Define Wages, Capital, Rent.
4. If the population of a country increase whilst its capital remains stationary, what will be the effect upon the profits of Capital, Labour and Rent respectively ?
5. Give your opinion on the theory of the Balance of Trade.

6. State the advantages or disadvantages of extreme division of labour.
7. Is the principle of co-operative associations a sound one (a) as to trade, (b) as to insurance?
8. State your opinion as to the right of the individual ownership of land.

SECOND PAPER.

1. How would you regulate the issue of the paper currency of a country?
2. Would it be expedient for the legislature to prohibit the granting of municipal bonuses, and the exemption from taxation of manufacturing industries?
3. Is Adam Smith right in holding that, because competition in a single trade tends to lower profit, the increase of capital in all trades must have the same effect?
4. How do you explain the fact that the rate of interest in the United States has been constantly higher than in England?
5. In what cases are commercial treaties consistent with sound economical principles?
6. What in your opinion are the causes of over-production?
7. What limitations, if any, may the State rightly set to freedom of contract?
8. Estimate the advantages arising from the study of Political Economy.

ESSAY.

The commercial relations of Canada and the United States.

Translate :

(a) If you do that, you will confer the greatest  
benefit upon the country.

(b) It was evident he could never speak well of  
his friends.

- (c) They chose war in preference to peace because they had never known the evils of war.
- (d) He said that he would brave every danger to save his friend from death.
- (e) If we had passed this law then, he said they would not now be able to condemn us to death.

III.

It is recorded of some eastern monarch that he kept an officer in his house whose employment it was to remind him of his mortality by calling out every morning at a stated hour: *Remember, prince, that thou shalt die!* And the contemplation of the frailness and uncertainty of our present state appeared of so much importance to Solon of Athens that he left this precept to future ages: *Keep thine eye fixed upon the end of life.*

A frequent and attentive prospect of that moment, which must put a period to all our schemes and deprive us of all our acquisitions, is indeed of the utmost efficacy to the just and rational regulation of our lives; nor would ever any thing wicked, or often any thing absurd, be undertaken or prosecuted by him who should begin every day with a serious reflection that he is born to die.

[Demosthenes, Phil. I.

1. ἄγων καὶ φέρων. What is peculiar in the use of this phrase here? What is the corresponding Latin?
2. τὴν ἱερὰν . . . τριήρη . . . What was it called? How many such were used in the time of Demosthenes?
3. Παναθηναίων, Διονυσίων . . . Mention how many of these there were and when they were celebrated?
4. Describe the geographical situation of the places named in the extract.
5. Compare the estimate of the Athenian character formed by Thucydides and Demosthenes respectively, discussing any causes which may have modified the Athenian character.
6. Sketch the relations subsisting between Macedon and Athens up to the time of the delivery of this oration.

## HISTORY.

### FIRST PAPER.

1. During what centuries was the Feudal System predominant. What are the essential characteristics of Feudalism? From what causes did Feudalism become more fully developed in France than in England or in Italy.
2. In the infancy of society, what is the nature of the prevailing institutions? Give reasons for your answer.

3. Distinguish between Representative Government and the Government of the majority. Distinguish both these forms of Government from the Sovereignty of the people. State fully the principles which form the basis of each of these Governments.
4. Pascal has said, "Plurality which does not reduce itself to unity is confusion. Unity which is not the result of plurality is tyranny." In what way may this be regarded as affording a definition of the principles of representative Government ?
5. "Publicity is an essential characteristic of representative government." How far was this recognized in the old Assemblies of the Anglo-Saxons, Franks and Lombards, and also in the modern British Parliament ?
6. What national assemblies were held by the Franks ? What was the state of these assemblies under the Merovingians and Carolingians ? What apparently was Charlemagne's view of these assemblies ?

SECOND PAPER.

1. What was the test of social conditions among the Anglo-Saxons, Franks, &c. ? Give some examples.
2. How far has the English Constitution been affected by Roman Jurisprudence ?
3. Distinguish between the terms Ealdorman and Heretoga. Under what circumstances did the Teutonic leaders assume the royal title ? What did the term Cyning imply ?
4. Name the several territorial divisions of the Anglo-Saxons. How far were the courts of these respective divisions representative ? Ex-

plain the constitutions of these courts, and also their jurisdiction.

5. What were the effects of the Norman Conquest in regard (1) to the Witenagemot, (2) to the Church, (3) to Feudalism?
6. Group together the chief provisions of the Magna Charta, and give a summary of each of these groups.

THIRD PAPER.

1. During the long reign of Edward III. the Commons succeeded in establishing as essential principles of government three great rights. What were these? What two derivative rights grew out of these?
2. It was under the Lancastrian kings that the privileges of Parliament first began to attract attention. Three of these claim special attention. What are these?
3. What were the views of James I. regarding the "Divine rights of Kings?" Answer his arguments on the subject, as elaborated by Filmore.
4. What were the terms of the protest of the Commons on the 18th December, 1621, against the arbitrary conduct of James I.?
5. Under what circumstances was the petition of rights drawn up? Give a summary of it.
6. What was the condition of the Puritans in Elizabeth's reign? What were the results of the policy pursued to them?
7. What was Elizabeth's title to the English crown?

FOURTH PAPER.

1. When was the Privy Council superseded by a Cabinet? Point out the growth of the principle of the responsibility of ministers.

2. When and under what circumstances were placemen and pensioners excluded from Parliament?
3. What were the grounds of the impeachment of Sacheverell? Hallam says, "It was of high importance in constitutional rights." Explain his meaning.
4. Under what title did the House of Hanover succeed to the English throne? In the Act of Settlement what limitations were put to the Royal Prerogative?
5. Before the Reform Act, 1832, describe the condition of representative governors in England.

ENGLISH LITERATURE.

 and birles inowe.

Lete we sum this mochele folc  
fare wher ha wulleth ;  
swa ich æuere ibiden are,  
*itholien* nulle ich hit mare.  
This *iherde* Maglaunus  
that is quene *spiledede* thus ;  
and he hire *andswardede*  
mid athelere spiche :

Leiuedi thu haues mochel *wouh*,  
nauest thu richedom inoh ?  
Ah *hald* thine fæder on lisse,  
ne luueth he nowiht longe ;  
for gef ferrene kinges  
hi herde tha tidinde,  
the we swa takede him on,  
*heo* us wolden *tælen*.

2. Parse the words in Italics, giving the Anglo-Saxon forms and pointing out any change from the Anglo-Saxon.
3. Give a history of this poem, stating the dramas from which Layaman derived his information.
4. State any characteristics of the work.

THIRD PAPER.

1. Translate into modern English the following passage :

' Doth now your *devoir*, yonge knightes proude !  
The heraldz laften here prikyng up and doun ;  
Now *ryngede* the tromp and clarioun ;  
Ther is nomore to say, but est and west  
In goth the speres [ful *sadly*] in *arest* ;  
Ther *seen* men who can juste, and who can ryde ;  
In goth the scharpe *spore* into the side.  
Ther *schyveren* schaftes upon schuldres thyk[ke] ;  
He feeleth thurh the *herte-spon* the prik [ke].  
Up *sprengen* speres of twenty foot on hight[e] ;  
Out goon the swerdes as the silver bright[e].  
The helmes thei to-hewen and *to-schrede* ;  
Out *brast* the blood, with stoute stremes reede,  
With mighty maces the bones thay *to-breste*.  
He thurgh the thikkest of the throng gan *threste*.  
Ther stomblen steedes strong, and doun can falle.  
He rolleth under foot as doth a balle.  
He *foyneth* on his foot with a tronchoun,  
And him *hurteleth* with his hors adoun.  
He thurgh the body hurt is, and *siththen* take  
Maugré his heed, and *brought* unto the stake,  
As forward was, right ther he most abyde.  
Another lad is on that other syde.  
And som tyme *doth* Theseus *hem* to rest[e],  
Hem to *refreissche*, and *drinke[n]* if hem *lest[e]*.  
Ful ofte a-day have this Thebans twoo

Ne of his prey desireth so the blood,  
As Palomon to *sle* his foo Arcite.

2. Parse the words in Italics, and when the words are from the Anglo-Saxon. Give the Anglo-Saxon form of the verbs and nouns.
3. State the plan of the Canterbury Tales. Compare them with the Decameron and Boccaccio.
4. Transfer into modern English the following passage from Spenser's *Faerie Queene* :

Like as a lyon whose imperiall powre  
A prowde rebellious unicorn defyes,  
T' avoide the rash assault and wrathful *stowre*  
Of his fiers foe, him to a tree applies,  
And when him running in full course he spies,  
He slips aside ; the whiles that furious beast  
His precious horne, sought of his enimies,  
Strikes in the stocke, ne thence can be releast,  
But to the mighty victour yields a bounteous feast.

With such faire *sleight* him Guyon often *fauld*,  
Fill at the last all breathlesse, wearie, faint,  
Him spying, with fresh onset he assaile,  
And, kindling new his courage seeming *queint*,  
Strooke him so hugely, that through great constraint  
He made him *stoup* perforce unto his knee,  
And do unwilling worship to the saint,  
That on his shield depainted he did see ;  
Such homage till that instant never learned hee.

Whom Guyon seeing stoup, pursewed fast  
The present offer of faire victory,  
And soone his dreadfull blade about he cast,  
Wherewith he smote his haughty crest so hye,  
That streight on grownd made him full low to lye ;  
Then on his brest his victour foote he thrust :  
With that he cryde ; Mercy, *doe me not dye*,  
Ne *deeme* thy force by fortunes doome unjust,  
That hath (*maugre* her spight) thus low me laid in dust.

*Eftsoones* his cruell hand Sir Guyon stayd,  
Temp'ring the passion with *advizement* slow  
And maistring might on enemy dismay'd ;  
For th' equall dye of warre he well did know ;  
Then to him said, Live, and allegaunce owe  
To him, that gives thee life and libertie,  
And henceforth by this dayes ensample trow,  
That hasty wroth, and heedlesse hazardie,  
Do breede repentaunce late, and lasting infamie.

5. Parse the words in Italics, giving the Anglo-Saxon forms as above. Explain the idiom *doe me not dye*. Mention any German idiom to which it conforms.
6. Scan the last four lines of the above extract.
7. Give an outline of Books I and II.

FOURTH PAPER.

- I. Write a critical essay on either of the following subjects : (a) Hamlet, (b) King Lear.

PASS EXAMINATIONS.

DIVINITY.

FIRST PAPER.

1. Give the views of Robertson Smith with regard to the composition and date of the Pentateuch.
2. Criticize his arguments.
3. From what point of view is the Old Testament Revelation independent of the questions raised by modern criticism ?
4. In what respects was Moses' prophetic position unique ?
5. Analyze the conception of God in the Mosaic Revelation.
6. What influence would belief in such a Being have on a Community ?
7. Under what limitations was Revelation necessarily made to the Jews ?
8. What were the peculiar perils and the educative value of each of the three great epochs between Moses and Christ ?

SECOND PAPER.

1. By what tests does J. H. Newman distinguish a development from a corruption ?
2. Apply those tests to Christianity and other religions.
3. What New Testament writings are admitted by all schools to be Apostolic ?

4. What do those writings imply as to the Church's origin and characteristics ?
5. Indicate the special evidential value of those writings ?
6. Summarize the turning points of the controversy between the Tubingen and more conservative schools.
7. What view do critics of the middle school take of John's Gospel, and of the Synoptic Gospels ?
8. What is the great fact behind the Gospel history ? Criticize its significance.

---

APOLOGETICS.

FIRST PAPER.

1. Distinguish between the Scientific Scepticism of Greek philosophers and the Scientific Scepticism of to-day.
2. Wherein does the Apologetic required in the 19th century differ from that required in the 18th century ?
3. Is a reasoned basis for Christian Apologetics necessary, or may we rest on the authority of a supernatural Revelation ?
4. How does the philosophic doctrine of the relativity of knowledge affect the theistic argument ?
5. State Berkeley's "theory of vision," and show how it affected subsequent thought.
6. Why is the causal judgment not satisfied with the theory of an endless succession of causes ?
7. Define "the correlation of forces," and "the conservation of energy."
8. Define the expression, "Laws of nature."

9. State the Law.
10. How do arguments
11. Explain final causes
12. State the is proved

9. State the theistic argument from "the reign of Law."
10. How does science attempt to set aside this argument? Criticize the attempt.
11. Explain Bacon's objection to the argument from final causes.
12. State the argument by which finality or design is proved.

SECOND PAPER.

1. Criticize the argument that Natural Selection accounts for all adaptations.
2. Distinguish between the modern theory of Evolution and Evolution as a fact or method.
3. Show that Evolution does not set aside the notion of Final Cause.
4. State and criticize the theory of Immanent Finality.
5. What useful purposes has this theory served in this century?
6. Mention some of the theories by which the origin of the moral Sense has been accounted for.
7. How does the fact of our having a moral nature bear on the theistic argument?
8. Prove that the conception of order or law can be applied to history.
9. If we have not an innate idea of the Infinite, why is it legitimate to infer the Infinite?
10. Prove that we may apply Personality to the Supreme Being.

RELATIONS OF SCIENCE AND RELIGION.

1. Indicate the different planes of existence, with what is peculiar to each.
2. What principles of natural law does Dawson formulate from the bible ?
3. How does the portion of Genesis, chaps. 1 to 11, differ from the rest of the book, and from what materials was that portion compiled ?
4. What are the evidences of the great antiquity of Astronomy ; and what do the signs of the Zodiac teach of early religion ?
5. Point out the principal divisions of the human race, and how God was apprehended by each.
6. Define a miracle in relation to the laws of nature.
7. What other races of beings are there (having a spiritual nature) and what is their relation to man ?
8. How do you answer the Deistical argument from the insignificance of the earth, as compared with the universe ?
9. What scientific questions arise out of the fragmentary nature of Gen. chap. 1—11 ?
10. Describe the kinds of the demoniac influence on man referred to in scripture.
11. What do Science and Scripture teach about the resurrection ?

---

BUTLER'S ANALOGY.

3. Does Butler assume that we have only probable evidence of the truth of religion ?
4. In arguing that there is a future life, what are his main positions ?
5. Define what is meant by the natural and the moral government of God respectively.
6. What circumstances in natural punishment are analogous to what religion teaches of future punishment ?
7. Prove by analogy that the doctrine of necessity does not destroy responsibility.
8. Prove by analogy that we are not competent judges as to what teaching might have been expected in a revelation.

HEBREW.

FIRST YEAR.

1. Translate Josh. i. 6, 14, ii. 19, 20, vii. 6, 15, Ps. x. 4, 10, xxxv. 12, 13.
2. Analyze (1) הַחֹמָה (2) אַרְוֹן (3) אִמָּה (4) מִדְּלַתִּי  
(5) בְּמִדָּה (6) מִתְמוֹל (7) שְׁלֵשׁ (8) נְדוּתִי  
(9) עֵבֶר, עֵבֶרָם (10) בְּקֶרֶן.
3. Account for the use of בְּעֵבֶר, Josh. v. 1.
4. Why was circumcision not practised in the wilderness, Josh. v. 5 ?
5. Who is meant by אִישׁ, Josh. v. 13 ? Give your reasons.
6. Where was (1) Ai ? (2) Bethel ? (3) Give their modern names ?
7. How is the destruction of Jericho as recorded Josh. vi. 21, to be justified ?

8. What is peculiar in **הָאֱהָרִי**, Josh. vii. 21 ?
9. Give the two analyses of **יִרְאֵתֶם**, Josh. iv. 24.  
What is in favour of each ?
10. How is the plural of compounds formed ?
11. Give a paradigm of Kal of **נָלַח**.

SECOND YEAR.

1. Translate (1) Ex. xxiii. 1, 2, (2) Deut. xxxiii. 21, 29,  
(3) Jer. x. 14, 15, (4) Ps. xviii. 7, 8, (5) Dan.  
iii. 1, 2.
2. Analyze (1) **תַּחֲגֹג** (2) **תִּשִׁי** (3) **בְּתַפְּוִי** (4) **וַיִּתֵּא** (5)  
**וּמְנִי** (6) **הַצִּיֵּת** (7) **וַאֲצַבְעֶתָא** (8) **וּרְעוּ**.
3. Name the four kingdoms referred to in Dan. ii.  
Give reasons for your identification of the fourth  
kingdom.
4. Shew the beneficence of the ordinance of the  
Sabbatical year.
5. Explain the last clause of Ex. xxiii. 19.
6. Point out the Jeremian idioms, Jer. x., xi.
7. What conjugations of **נָבֵא** are used ? Why these  
only ?
8. In what respect is the syntax of prepositions like  
that of negative conjunctions ?

  2. What arguments against the Pauline authorship of the epistle are derived from chs. I, II ?
  3. State the three chief subjects of the doctrinal part of the epistle. Where is each subject discussed ?
  4. Shew that *τινες* is the true reading III, 16.
  5. Shew the consistency of v, 8 with Christ's perfection.
  6. Who was Melchizedek ? Shew that he was not (1) Christ, (2) an angel, (3) Enoch or Shem.
  7. How do the gospels and epistles differ in the use of the article with *χριστος* ? Account for the difference.
  8. Explain *βαπτισμων διδαχης* VI, 2. Account for the order of the words.
  9. In IX, 15, 16, 17, what is the meaning of *διαθηκη* ? Give your reasons.
  10. How does *καινη* IX, 15 differ from *νεα* XII, 24 ?
  11. What is meant by heavenly things being purified IX, 23 ?
  12. Explain the difficulty connected with *χρυσου ενχουσα θυματηριον* IX, 3.
  13. Disprove the inference drawn by Edward Irving from *χωρις αμαρτιας οφθησεται* IX, 28.

TEXTUAL CRITICISM.

1. What is the number of extant MSS? How many are uncials? How many have been collated?
2. Discuss the text of 1 John V. 7, 8.
3. Of the various readings, 1 Tim. III. 16, which is the correct one? Give your reasons.
4. Shew that Mark XVI. 9—20 is (1) genuine and canonical, (2) not authentic.
5. Mention the sources of various readings.
6. Give the arguments for determining the date of a MS.
7. To what centuries do extant MSS. belong?
8. State the grounds on which MSS. are classed in groups.
9. What two main groups are commonly recognized by critics?
10. Explain (1) Ammonian Sections.  
(2) Eusebian Canons.  
(3) conflate Readings.  
(4) homoioteleuton.  
(5) C<sup>1</sup>, C<sup>2</sup>, C<sup>3</sup> C\*.
11. Give an account of Codices **N**, A, B, C, D.
12. Name those of the versions that are of critical value, and give their dates.
13. Mention the chief canons of criticism in reference to (1) external evidence, (2) internal evidence.

  3. What materials have we for constructing a history (a) of the Apostolic Period, (b) of the rest of the time up to A.D. 325?
  4. Distinguish between the twelve Apostles and the seventy Disciples, showing the spheres they were respectively designed to occupy.
  5. Mention circumstances in the early life of Saul of Tarsus, tending to qualify him for his future career, and trace the events that led up to his conversion.
  6. For what object and when was the Council of Jerusalem assembled? Who took part in it, and what decree did it promulgate?
  7. What members of the Herodian family came into contact with Christianity? Show the relations of such to the history.
  8. Criticise the allegation that Peter was the founder of the Christian Church at Rome.
  9. State the historical circumstances which led to Paul's writing his letters (a) to the Galatians, (b) to the Corinthians.
  10. Mention the Fathers of the Antenicene Period, (a) Greek, (b) Latin, and name one or more of their writings.

## EXAMINATIONS IN MEDICINE.

### MATERIA MEDICA.

1. State the principal differences in the action of Opium, Morphia, Aloes and Senna, and between the Mercurial and Saline Cathartics.
2. State how Calomel, Chloroform, Rochelle Salts, and Tartar Emetic are made.
3. Write a prescription for a child of five years of age, with Dropsy following Scarlet Fever, consisting of Tincture of Foxglove, Acetate of Potash, Tincture of Squills. Two teaspoonfuls every four hours.
4. Give the doses of Tincture of Aconite, Liquor Arsenicalis, Strychnia, Phosphorus, Chloral Hydrate, Digitalis, Extract of Belladonna, Iodide of Potassium, Diluted Hydrocyanic Acid, and Corrosive Sublimate, and the hypodermic doses of Morphia, Atropia, Pilocarpin, and Ergotine.
5. Contrast the action of Aconite and Digitalis as Sedatives.
6. Mention the best Narcotics to be used under the following circumstances :
  - (a) Sleeplessness from over-work and worry.
  - (b) Delirium Tremens.
  - (c) Delirium of Typhus.
  - (d) Acute Mania.
7. What are the indications by which we know that Arsenic, Belladonna, and Strychnia are beginning to produce their physiological effects ?

  3. What is the character of the delirium of Typhoid Fever? Give the dietetic and general management of the disease.
  4. What Physical signs are induced by Mitral Regurgitation.
  5. Diagnose Delirium Tremens from Meningitis, and state how these diseases differ as to treatment.

---

ANATOMY.

*Four Questions at least must be answered in full.*

1. What bones would be cut through in making a median vertical section of the skull? Enumerate the various eminences and depressions that would be seen along the inner edge of such a section. What cavities would be laid open by it?
2. Describe the structure, attachments and uses of the anterior annular ligament of the wrist-joint. Enumerate the parts passing under it.
3. Name the muscles of the larynx, giving the special action of each; and its nerve supply.
4. State the sources from which the heart is furnished with nerves; mention the position and connexions of the cardiac plexuses; and the manner of the distribution of their branches to the heart.
5. (a) When the femoral artery is tied above the origin of the profunda femoris, by what channels does the blood reach the lower extremity?

- (b) What is the relation of the external jugular vein to the cervical fascia in the different parts of its course?
6. Enumerate the parts in contact with the left pleura.
  7. Contrast the Anatomy of an Oblique and a Direct inguinal Hernia.

—  
CHEMISTRY.

1. Arsenious oxide is acted upon by nitric acid; the escaping gas is passed into ammonia solution, and after some time the solution is heated. Give the chemical action, and describe the gases liberated.
2. By what process is potassic bromide formed? How would you distinguish it from potassic iodide?
3. How is potassic permanganate formed, and for what is it used?  
What substances are formed when you add a solution of sulphur dioxide to it?
4. Explain the chemical changes taking place in the Bichromate Battery.
5. Explain carefully what is meant by isomerism, and illustrate by reference to the di-chlor-benzene molecule. What is the difference between isomerism and allotropism?
6. Given ethyl, alcohol, and other necessary chemicals, explain how you would form, acetic acid, chloroform, chloral hydrate, ethene dichloride?
7. Give the natural and the artificial sources of benzoic acid. What is its aldehyde, and what substance is used as a substitute for it? Show

what relation exists between benzoic acid and salicylic acid.

8. Give and explain the changes which take place when potassic cyanide is added to a solution of ferrous sulphate.
9. Write a concise sketch of the amylaceous group of carbohydrates, and show how they are affected by yeast fermentation, by iodine, by nitric acid; and state how they act upon polarized light, if they act at all.
10. Give the general characteristics of the alkaloids, and classify the more prominent ones.

---

PRACTICAL CHEMISTRY.

1. You are given a white powder of a sharp but pleasant sour taste. How would you proceed to determine what it is?
2. How could you distinguish between the following substances with certainty, all being in the form of powders:  
*Lime—Calomel—Sublimate of Bismuth—Tartar Emetic.*
3. How would you detect the following adulterations: Copper in Pickles, Sulphuric Acid in Vinegar, Sand in Sugar?

---

OBSTETRICS.

1. What are the conditions necessary for Normal Menstruation?
2. Give the derangements of Pregnancy arising from natural causes.
3. State the conditions of the Uterus which delay Labour, and indications for treatment in each.

4. Give the Diagrams and Mechanism of a Face Presentation (Chin Anterior).
5. What circumstances call for Indications of Premature Labour, and give methods for performing it.
6. State in detail the management of Puerperal Convulsions, occurring during labour.

---

SURGERY.

1. What is the uniform character of Inflammatory Fever?
2. Explain in what manner inflammatory effusions differ from all others.
3. Describe generally pus, its physical and chemical properties. Mention the varieties, what they indicate, and how the living differs from the dead pus cell.
4. Give symptoms and treatment of Shock.
5. Name the constitutional affections which may follow wounds. Give time at which they are likely to appear, and symptoms and treatment of any one of them.

---

MEDICAL JURISPRUDENCE.

1. Give a correct mode of making a post-mortem examination in all its details in a case of supposed poisoning.
2. Give the proofs of the age of a uterine child at six months, and from that period up to nine months, and also the proofs of a child having been born alive.
3. Give the difference between a contusion caused before and after death; and what circumstance,

- or pe  
blanc

or period before death, may cause a resemblance between them.

4. How soon after death does decomposition set in? Give the order of its occurrence, with the condition favouring and retarding the process.
5. What are the distinctive characters of an incised wound caused before and after death?

#### PHYSIOLOGY.

1. Mention four proximate principles contained in milk and explain fully the changes which take place when milk turns sour during a thunder storm.
2. From what sources does the Portal Vein receive its blood? Describe its distribution, and trace the course of the blood onwards into the general circulation.
3. Explain the formation of the Pulse at the wrist. What is meant by a *dicrotic* pulse, how is it produced, and in what conditions of the system is it present?
4. Describe *Cholesterine* and *Urea*, and explain fully how they are eliminated. What consequences follow their retention in the system?
5. Explain the dependence of the function of the Kidney on that of the skin in relation to blood pressure.
6. Describe the influence of the Nervous System on the Heart, and on Secretion. Explain why a distant and a near object, lying before the eye, cannot be at the same time distinctly seen. What is the mechanism by which a sharply defined image of each in turn is formed on the retina?
7. How is the product of fecundation nourished as an ovum, an embryo, and a foetus? What relics of foetal development are found in the Umbilical Cord, and account for their presence?

## LIST OF GRADUATES.

(Graduates are requested to intimate to the Registrar change of residence or any omissions in the list.)

Those marked thus \* are clergymen.

### LL.D.

Name.	Present address.	Year of Graduation.
His Excellency the Marquis of Lorne.	Ottawa .....	....1879
Bell, George.....	Toronto .....	* ....1872
Chapman, Edward J.....	Toronto .....	....1867

## REVOLVING BOOK CASE.

These Cases occupy no more room than a chair, and hold more books than any other Case ever made occupying the same space. The books are accessible to any one sitting at a table or before the fire without moving. A slight pressure of the hand will bring either side to view. Nothing to get out of order, well made, nicely finished and enduring.

### SPECIAL ORDERS.

Any size or style made to order. Cases sent on trial to any responsible party with the distinct understanding that if they do not perform as represented and to entire satisfaction they may be returned.

*Send for Illustrated Catalogue of 15 different styles, to*

**B. H. ROTHWELL,**

Successor to STACEY & WALPOLE, KINGSTON.

# WEBSTER FOR SCHOOLS.

WEBSTER has been warmly recommended by State Superintendents of Public Schools of 36 States, and by more than Fifty College Presidents.

Within the past year 28 State Superintendents of Schools have in writing expressed the desire that every Public School in their respective States should be supplied with a copy of

## WEBSTER'S UNABRIDGED DICTIONARY

*For the use of Teachers and Scholars.*

Over **32,000** copies of the Work have been placed in the Public Schools of the country by Legislative Enactment or School Officers.

Every State purchase of Dictionaries for Schools has been of Webster.

**New Edition of Webster has 118,000 Words,**  
(3,000 more than any English Dictionary.)

**Four Pages Col'd. Plates, 3,000 Engravings,**  
(nearly three times the number in any other Dictionary), also  
contains a

*Biographical Dictionary of 3,700 Popular Persons.*

PUBLISHED BY

**G. & C. Merriam & Co., Springfield, Mass.**

For sale at

**ROTHWELL'S Book Store,**

(Successor to STACEY & WALPOLE,) Kingston, Ont.

# Ontario Business College,

**BELLEVILLE, . . . ONTARIO,**

ESTABLISHED IN 1868,

Is an Institution for the TRAINING OF ACCOUNTANTS, and for the imparting of a THOROUGH COMMERCIAL EDUCATION to all Classes.

Its Principals have had long experience in some of the largest Importing, Manufacturing and Joint Stock concerns in Canada as Accountants and Financial Managers, and are the authors of two Standard Canadian Works on Book-Keeping, "The Canadian Accountant" and "Johnson's Joint Stock Company Book-Keeping," and one of them is a Fellow of the Institute of Accountants of Ontario.

Its course of training, and the practical results of its teaching, have gained for it the front rank among the Commercial Colleges, not only of Canada, but America.

Address

**ROBINSON & JOHNSON,**

**Ontario Business College,**

**BELLEVILLE, ONT.**

Students may enter any time. Send for the College Circular.

## STEAM PRINTING HOUSE.

### The "British Whig,"

The Leading Paper of Kingston, having about Double the Circulation of the Rival Daily.

Kingston has 2,632 houses, and the "WHIG's" average circulation for the past three months has been :

For March	.....	1,616
" April	.....	1,654
" May	.....	1,619

Thus clearly reaching both sides in Politics.

It is worth double the price to advertise in the WHIG, as compared with any other Kingston Paper.

The WEEKLY BRITISH WHIG, a well compiled Journal, \$1.25 per year. \$1.00 in Clubs of Five.

A LARGE JOB OFFICE, proud of its Stylish Work.

QUEEN'S COLLEGE CALENDAR and QUEEN'S COLLEGE JOURNAL have for many years past been specimens of its work.

**B. H. ROTHWELL,**  
**LATE STACEY & WALPOLE.**

Invites special attention to his large stock of Educational Books used in the various Colleges, High Schools and Public Schools in Canada; Medical and Theological Books, besides a miscellaneous collection of Standard Books, to which is added every important work of interest as soon as published.
